	<p>refugees, asylum seekers and migrants, on land and at sea; calls on the European Commission and Member States to put the human rights of migrants, asylum seekers and refugees, as well as the principle of responsibility sharing, at the centre of its migration and asylum policies; Expresses grave concern over the humanitarian situation in hotspots; Calls on the Commission to propose an urgent solution to resolve the flagrant human rights violations in reception centres for refugees and migrants on European soil;</p>	<p>access to fundamental rights, such as the right to access the asylum procedure and discusses them with the relevant national authorities in charge of investigations. All the measures taken by the border guards to prevent and discourage unauthorised crossing of external borders should be taken in respect of fundamental rights and obligations related to effective access to international protection, in particular the principle of non-refoulement.</p> <p>The Commission monitors the respect of fundamental rights stemming from EU acquis on border management, asylum and migration and the Charter of Fundamental Rights, inter alia by launching infringement proceedings where EU rules and the corresponding rights stemming from the Charter are systematically breached by the Member States, be it by practice or in the transposition of EU legislation.</p>		<p>access to international protection, as well as its readiness to launch infringement proceedings, there is no mention regarding an urgent solution to resolve human rights violations.</p> <p>It is unclear if an infringement proceeding falls under such a category.</p>	
17)	<p>46. [...] calls on the Commission to immediately resume its annual anti-corruption monitoring and reporting, with reference to the EU institutions and the Member States;</p>	<p>With regard to corruption, the recent years have shown that even challenges that appeared to have been overcome re-emerged with more intensity and progress made was considerably reversed. No policy area or aspect of the economy or society across the EU is free of corruption risks. The annual Rule of Law Report covers, among others, the anti-corruption framework and it reflects the fact that several Member States have adopted comprehensive new anti-corruption strategies or revised existing ones. These strategies need to be effectively implemented and continuously monitored, to ensure that real progress is made, especially with regard to the effectiveness of the investigation, prosecution and adjudication of</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		corruption cases. The Commission will continue this monitoring.			
18)	51. Strongly condemns the efforts of the governments of some Member States to weaken the separation of powers and the independence of the judiciary; expresses its deep concern, in particular, about decisions which call into question the primacy of European law and calls on the Commission to use all available means to take action against these attacks;	The Commission is committed to uphold the rule of law in the Union by using all the means at its disposal.		Based on the general nature of the wording of the commitment or/and on the information found, it was unclear whether the promise has been actually carried out or not.	
19)	52. Calls on the Commission to address in a timely manner all Article 2 TEU violations, in particular those affecting fundamental rights, in the framework of its announced rule of law review cycle	The Commission is committed to uphold the rule of law in the Union by using all the means at its disposal. The Commission fully agrees with the European Parliament with regard to the importance of strengthening the EU's capacity to monitor the respect of the common values on which the EU is founded. To this end, the Commission has presented on 30 September 2020 its first annual Rule of Law Report, at the centre of the new comprehensive European Rule of Law Mechanism. The Mechanism is a yearly process, with the aim of preventing problems from emerging or deepening, notably by having open debates and by exchanging best practices. The Rule of Law Report looks at key developments as regards the rule of law across the whole EU. It covers both positive developments and challenges, and provides a country-specific assessment of all the 27 Member States. One of the objectives of the European Rule of Law Mechanism is to strengthen the inter-institutional cooperation on rule of law matters. In particular, it aims at triggering an inclusive debate at European and national level. The Commission is continuously assessing how existing instruments can best be used to promote and uphold the rule of law, democracy and fundamental rights, and is ready to continue the dialogue with the European Parliament in this regard.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		The Commission is also ready to organise further discussions with the European Parliament on the 2020 Rule of Law Report, including on individual country chapters, as part of a stronger inter-institutional dialogue on the rule of law.			
20)	54. Calls on the Commission and the Council to make full use of all the tools at their disposal to address risks of serious breaches of the rule of law and to move forward with the on-going Article 7 procedures	The Commission is committed to uphold the rule of law in the Union by using all the means at its disposal.		No further/specific actions proposed/promised to be taken by the Commission.	
21)	55. [...] calls on the Commission to adopt common EU standards on prison conditions in order to protect the rights of prisoners and promote detention standards in the EU;	Detention conditions may hamper the smooth operation of judicial cooperation instruments, such as the European Arrest Warrant. The Commission will soon launch a study on pre-trial detention in order to identify shortcomings and to develop adequate remedies. Member States will also need to invest in the development of alternatives measures to pre-trial detention, as was confirmed by the Council Conclusions on Alternatives to Detention, which were adopted under the Finnish Presidency.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. <a href="#">Non-paper</a> from the Commission services on detention conditions and procedural rights in pre-trial detention, 24 September 2021. For info: <a href="#">Pre-trial Detention and EU Law: Collecting Fragments of Harmonisation Within the Existing Legal Framework   European Papers</a> .	
22)	56. Recalls the obligation laid down in article 6 TEU to accede to the ECHR; calls the Commission to take the necessary steps to eliminate the legal barriers that prevent the conclusion of the accession process, and to present a new draft agreement for the accession of the EU to the ECHR;	On 29 September 2020, the negotiations for the accession of the European Union to the European Convention on Human Rights (ECHR) resumed in Strasbourg at the Council of Europe. On that occasion, Vice President Jourová and Secretary General Pejčinović Burić issued a joint statement expressing the 'hope that the negotiations can be brought to a speedy and successful conclusion for the benefit of Europe as a whole'. The last negotiating meeting took place by videoconference on 24-26 November 2020.		The Commission is currently carrying out the specific action. <a href="#">12th meeting of the CDDH ad hoc negotiation group "47+1"</a> on the EU accession to the ECHR (7 - 10 December 2021).	

4.1.23.7. LIBE Resolution 7: EP resolution of 17 December 2020 on implementation of the Dublin III Regulation

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation of the Dublin III Regulation</b>		17/12/2020 <a href="#">T9-0361/2020</a> <a href="#">2019/2206(INI)</a> LIBE	<a href="#">SP(2021)190</a>	Final reply (SP) received 18 June 2021	Mixed reply			
1)	7. [...] recalls that the Commission did not follow Parliament's call in its resolution of 18 May 2017 for a proposal to extend the relocation measures until the adoption of the reform of the Dublin III Regulation;		Firstly, the Commission, together with the European Asylum Support Office (EASO), will continue to work closely with the Member States to improve the efficiency of the implementation of the rules of the current Dublin III Regulation. In addition to promoting temporary solidarity solutions in the form of relocation to reduce pressure on Member States of first entry, the Commission strives to find workable solutions to the other shortcomings in the implementation of the regulation identified by the European Parliament.				Although the Commission mentions the promotion of relocation on temporary basis, it is unclear to what extent this measure will be implemented until the reform of DUBLIN III.	
2)	14. Calls on the Commission and the Member States to facilitate the work of EASO staff by allowing interviews of asylum seekers to be held in a language other than that of the country in which it is conducted while ensuring that the applicant is provided with interpretation in a language they understand; [...]		No specific reply is provided to this particular point.				Not mentioned.	
3)	19. [...] calls on the Member States and the Commission to clarify a 'significant risk of absconding;		No specific reply is provided to this particular point.				Not mentioned.	
4)	20. Urges the Member States and the Commission to clearly state that detention is never in the best interests of the child;		Although no specific reply is provided to this particular point, the Commission strives to find workable solutions to the other shortcomings in the implementation of the regulation identified by the European Parliament. In particular, issues raised by the Covid19 pandemic, family tracing, protection of minors (including unaccompanied minors) and fundamental rights in general, as well as the optimisation of transfer procedures and the harmonisation of Dublin				It is unclear to what extent the Commission specifically links the protection of minors with the detention problematic.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>procedures are addressed through coordinated discussions and specific Commission and/ or EASO guidance and targeted recommendations, as necessary.</p> <p>In line with the European Parliament resolution, the proposal ensures respect and protection of fundamental rights in all steps of the process, notably by strengthening the rights of unaccompanied minors, increasing the effectiveness of the judicial review and reinforcing the right to liberty and freedom of movement by shortening the time limits under which a person may be detained under the regulation. The applicants should also be better informed about the application of the regulation and their rights and obligations within it.</p>			
5)	23.[...]; calls on the Commission to ensure full compliance with the hierarchy of criteria;		<p>While the responsibility criterion linked to first entry remains, these new rules will make the other criteria more effective, which consequently aims at ensuring respect for the hierarchy (paragraph 23). [...] In line with the European Parliament resolution, the proposal ensures respect and protection of fundamental rights in all steps of the process, notably by strengthening the rights of unaccompanied minors, increasing the effectiveness of the judicial review and reinforcing the right to liberty and freedom of movement by shortening the time limits under which a person may be detained under the regulation. The applicants should also be better informed about the application of the regulation and their rights and obligations within it.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposal</a> for a regulation on Asylum and Migration Management, published 23 September 2020).</p>	
6)	24.[...]; calls on the Commission and the Member States to harmonise the standard of proof required for family		[...] the Commission proposal widens the definition of family members to include siblings and families		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>reunification in the direction of more achievable standards and requirements; [...];</p> <p>calls therefore on the Commission to carefully monitor the sound application of the family-related definitions by Member States, as defined in Article 3 of the Regulation;</p>		<p>formed in transit and to simplify the rules on evidence relating to family reunification (paragraph 24).</p>		<p>point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposal</a> for a regulation on Asylum and Migration Management, published 23 September 2020).</p>	
7)	<p>35. [...] calls on the Commission to revise the rules in order to improve the execution of transfers and do away with the transfer of responsibility in cases where an asylum seeker absconds, to foster trust between Member States, to monitor the situation and, where necessary, impose penalties on Member States which refuse transfers;</p>		<p>In line with the European Parliament resolution, the Commission proposal also prolongs the periods of responsibility for Member States. For instance, a Member State would become responsible if an applicant makes an application within 3 years following the irregular entry, which is an extension from the current 12 months. Similarly, a Member State would be responsible to examine an application if the applicant holds a visa or a residence permit that expired less than 3 years instead of respectively 6 months and 2 years as is currently the case. Finally, the proposal deletes the current rule that shifts responsibility to the transferring Member State after 18 months if the applicant has absconded (paragraph 35).</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposal</a> for a regulation on Asylum and Migration Management, published 23 September 2020).</p>	
8)	<p>36. [...] calls on the Commission to propose a system which duly takes account of asylum seekers' proven meaningful links to a Member State, such as previous legal residence or educational diplomas, and which ensures that the treatment of asylum seekers is equal in relative terms across the EU;</p>		<p>[...] the Commission proposal for a regulation on Asylum and Migration Management presented in the context of the Pact on Migration and Asylum, aims at rebalancing solidarity and a fair sharing of responsibility between the Member States. The proposal is based on the concept of mandatory solidarity, tailored to the needs of the Member State faced with migratory pressure or further to search and rescue operations. The principle is that all Member States must contribute, but there is flexibility on how Member States can contribute. The main forms of solidarity contributions are relocation and return</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposal</a> for a regulation on Asylum and Migration Management, published 23 September 2020).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>sponsorship, but there is also the possibility to contribute through capacity measures. A correction mechanism will ensure that there will always be a credible level of solidarity in the form of relocation or return sponsorship. The proposal also plans the possibility of voluntary solidarity between Member States on a bilateral basis. When relocation is chosen as a solidarity measure, Member States will also be obliged to take into account meaningful links between the person concerned and the Member State of relocation (paragraph 36). In times of crises, this solidarity would be immediate, as proposed in the proposal on a Crisis Regulation<sup>26</sup> and wider in scope in terms of solidarity measures, which are limited to relocation and return sponsorship and do not include capacity measures.</p> <p>[...]</p> <p>A new criterion linked to the possession of a professional or educational diploma has also been added (paragraph 36).</p>			
9)	37. [...] calls on the Member States and the Commission to increase the funds available for the provision of legal assistance during the Dublin procedure;	No specific reply is provided to this particular point.		Not mentioned.	
10)	39. Calls on the Commission to assess the overall implementation of the CEAS, as well as any gaps and shortcomings in the Dublin III Regulation that lead to a disproportionate burden of responsibility being placed on countries at the external borders of the EU;	No specific reply is provided to this particular point, but as called for in the European Parliament resolution, the proposal sets out a new governance structure, where, as a first step, Member States will put in place national strategies on managing migration at national level, including contingency planning, to prevent the build-up of migratory pressure and also with a focus on monitoring of fundamental rights. These strategies will		No further specific actions proposed/promised to be taken by the Commission.	

<sup>26</sup> Proposal for a regulation of the European Parliament and of the Council addressing situations of crisis and force majeure in the field of migration and asylum, COM/2020/613 final.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>contribute to a new European Strategy that will set out the strategic approach to migration management at Union level, enabling a forward looking perspective on migration management. Furthermore, the Commission will adopt a yearly Migration Management report that will include a short-term projection of the evolution of the migratory situation and allow for a timely response to evolving trends in migration and responses to the results of the monitoring framework. This governance framework will be complemented by a system of regular monitoring of the migratory situation through situational reporting by the Commission.</p>			
11)	<p>43. Calls on the Commission and the Member States to include, among the sources used to monitor implementation of the Regulation, reliable, up-to-date information provided by non-state actors, in particular international organisations and NGOs;</p>		<p>No specific reply is provided to this particular point.</p>		<p>Not mentioned.</p>	
12)	<p>44. [...] calls on the Commission to clarify how Articles 12 and 14 of the Regulation should be applied when determining what Member State should be responsible for an asylum application; proposes the evaluation, as one of the hierarchy of criteria, of the possible impact of visa-waived entry applications on the proper functioning of the Dublin system;</p>		<p>Although no specific reply is provided to this particular point, nevertheless the Commission states that in line with the European Parliament resolution, the Commission proposal also prolongs the periods of responsibility for Member States. For instance, a Member State would become responsible if an applicant makes an application within 3 years following the irregular entry, which is an extension from the current 12 months. Similarly, a Member State would be responsible to examine an application if the applicant holds a visa or a residence permit that expired less than 3 years instead of respectively 6 months and 2 years as is currently the case. Finally, the proposal deletes the current rule that shifts</p>		<p>Although the Commission proposal refers to the Member States periods of responsibility, it says nothing on the evaluation of the possible impact of visa waived entry applications.</p>

		responsibility to the transferring Member State after 18 months if the applicant has absconded.			
13)	45. [...] urges the Commission and all Member States to rather take stock of the factors contributing to greater efficiency, to take joint and coordinated action to optimise the effective implementation of the Dublin III Regulation, and work towards harmonising the implementation of the Regulation;	Although no specific reply is provided to this particular point, nevertheless the Commission states that [...], together with the European Asylum Support Office (EASO), it will continue to work closely with the Member States to improve the efficiency of the implementation of the rules of the current Dublin III Regulation.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
14)	49. Deplores the fact that the Commission has still not published its Article 46 assessment report; calls on the Commission to ensure that the Dublin III Regulation is implemented more effectively;	Although no specific reply is provided to this particular point, nevertheless the Commission states that [...] the Commission, together with the European Asylum Support Office (EASO), will continue to work closely with the Member States to improve the efficiency of the implementation of the rules of the current Dublin III Regulation. In addition to promoting temporary solidarity solutions in the form of relocation to reduce pressure on Member States of first entry, the Commission strives to find workable solutions to the other shortcomings in the implementation of the regulation identified by the European Parliament. In particular, issues raised by the Covid19 pandemic, family tracing, protection of minors (including unaccompanied minors) and fundamental rights in general, as well as the optimisation of transfer procedures and the harmonisation of Dublin procedures are addressed through coordinated discussions and specific Commission and/ or EASO guidance and targeted recommendations, as necessary.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

4.1.23.8. LIBE Resolution 8: EP resolution of 17 December 2020 on implementation of the Return Directive

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation report on the Return Directive</b>		17/12/2020 <a href="#">T9-0362/2020</a> <a href="#">2019/2208(INI)</a> LIBE	<a href="#">SP(2021)190</a>	Final reply (SP) received 18 June 2021	Specific reply			
1)	1. Notes the lack of an implementation assessment from the Commission and calls on the Commission to carry out such an assessment, which was due in 2017, in compliance with Article 19 of the Return Directive and in line with the principle of better law-making;		The first report on the application of the Return Directive was adopted on 28 March 2014 in the context of the Communication to the Council and to the Parliament on EU Return Policy (COM(2014)199 final). The second report on the application of the Directive was not published due to the adoption of the Commission proposal for a recast of the Return Directive in September 2018. The Commission continuously assesses the implementation of this Directive through studies (including those carried out in the context of the European Migration Network) and Schengen evaluations (EU 1053/2013). The Commission remains committed to carrying out and publishing an implementation assessment in 2022 if the recast Return Directive will not have been adopted by then.				In absence of the adoption of the <a href="#">recast Return Directive (ongoing)</a> , the Commission will publish an implementation assessment, scheduled for 2022.	
2)	2. Reiterates the importance of an evidence-based common approach to guide coherent policy-making and well-informed public discourse and calls on the Commission to urge and support Member States to collect and publish qualitative and quantitative data on the implementation of the Return Directive, particularly data on entry bans and detention, as these are the categories currently not collected by Eurostat, and making use in particular of the newly available instruments such as SIS return and Regulation (EU) 2020/851 amending Regulation (EC) No 862/2007 on		The Commission will continue to collect and publish qualitative and quantitative data on the implementation of the Directive, notably the statistical data collected through the Regulation on statistics on migration and international protection (EC 862/2007) and the Schengen Information System for return (EU 2018/1860), and to provide guidance and support to the Member States in this respect (point 2). The revision of the Regulation on Migration Statistics (EU 2020/851), adopted in 2020, will help improve data collection on returns (i.e. apprehensions and voluntary returns). The European Migration				On 2 June 2021 the Commission <a href="#">adopted a proposal for a Council Regulation</a> on the establishment and operation of an evaluation and monitoring mechanism to verify the application of the Schengen <i>acquis</i> and repealing Regulation (EU).  Furthermore the European Commission published a <a href="#">Report on the implementation of Regulation (EC) No 862/2007 on Community statistics on migration and international protection</a> on 24 August 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Community statistics on migration and international protection;	Network (Return Expert Group) will continue to collect and publish quantitative and qualitative data on a range of return related topics (i.e. on detention and alternatives to detention).			
3)	4. [...] ; calls on the Commission to launch infringement procedures where justified; highlights that the effectiveness of the Return Directive should be measured by referring to the return rate as well as by the sustainability of returns and implementation of fundamental rights safeguards, the respect for procedural guarantees and the effectiveness of voluntary returns; [...]	The Commission regularly verifies and monitors the application of return rules by means of exchanges with Member States' competent authorities and Schengen evaluations carried out also with the support of the European Union Agency for Fundamental Rights. In its activities, the Commission is focussing on the respect of fundamental rights in return procedures, including on the availability and effectiveness of forced-return monitoring systems. The Commission remains committed to continue monitoring the implementation of the Directive and, as the guardian of the Treaties, to commencing infringement proceedings under Article 258 of the Treaty on the Functioning of the European Union whenever it considers it necessary (points 4 and 36).		No further/specific actions proposed/promised to be taken by the Commission.  The Commission has launched several <a href="#">infringements proceedings</a> for lack of full transposition of the return Directive.	
4)	10. [...] ; calls on the Commission to continue considering voluntary returns as the preferred option over forced returns and to encourage Member States to develop an effective framework for access to voluntary return programmes;	The Commission continues to consider voluntary returns as the primary option for the return of irregular migrants, having primacy over forced returns (point 10). As part of the implementation of the new Pact on Migration and Asylum, the Commission will present a new Strategy on Voluntary Return and Reintegration in 2021. The Commission also remains committed to encouraging Member States to develop effective frameworks for access to voluntary return programmes and reinforcing the effectiveness, attractiveness and accessibility of the voluntary return programmes set up in the Member States.		On <a href="#">27 April 2021</a> the European Commission has published a Communication ' <a href="#">The EU strategy on voluntary return and reintegration</a> '.	
5)	11. Calls on the Commission to continue to provide funding for and increase the resources available to assisted voluntary return programmes in order to	The Commission will promote complementarities with EU-funded actions in the countries of return. In line with this objective, the Commission remains		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	encourage the use of such programmes with the ultimate aim of ensuring sustainable returns and reintegration;	committed to continue providing funding for assisted voluntary return programmes, notably in the context of the implementation of the new Asylum, Migration and Integration Fund for the period 2021-2027 (point 11).		working on action falling under the scope of the EP request ( <a href="#">implementation of the new Asylum, Migration and Integration Fund for the period 2021-2027</a> ).	
6)	<p>35. Calls on the Commission to ensure that Member States and Frontex have monitoring bodies in place that are supported by a proper mandate, capacity and competence, a high level of independence and expertise, and transparent procedures; [...]</p> <p>calls on the Commission and Member States to make use of existing independent monitoring bodies, such as national and international organisations and National Human Rights Institutions, by cooperating with or designating them as forced return monitoring systems;</p>	<p>The Commission recognises the importance of monitoring and assessing voluntary return and reintegration programmes and their effectiveness and will further develop these points in the upcoming Strategy on Voluntary Return and Reintegration.</p> <p>No specific reply is provided to this particular point (on making use of existing independent monitoring bodies Human Rights Institutions,...), but:</p> <p>The Commission regularly verifies and monitors the application of return rules by means of exchanges with Member States' competent authorities and Schengen evaluations carried out also with the support of the European Union Agency for Fundamental Rights. In its activities, the Commission is focussing on the respect of fundamental rights in return procedures, including on the availability and effectiveness of forced-return monitoring systems.</p> <p>Frontex is reinforcing its internal mechanism for fundamental rights monitoring, ensuring the availability of additional resources to the Fundamental Rights Officer (including a deputy Fundamental Rights Officer and at least 40 fundamental rights monitors). The Management</p>		<p>On <a href="#">27 April 2021</a> the European Commission has published a Communication '<a href="#">The EU strategy on voluntary return and reintegration</a>'.</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Board of Frontex adopted a decision on 20 January 2021 setting out special rules for ensuring their full independence in the performance of their duties.			
	urges the Commission to ensure the establishment of a post-return monitoring mechanism to understand the fate of returned persons, where legally and practically possible, with particular attention for vulnerable groups, including unaccompanied minors and families;	No specific reply is provided to this particular point (on post-return monitoring mechanism).		Not mentioned.	
	[...] calls on the Commission to facilitate the exchange of good practices between the Member States regarding post-return monitoring and to allocate sufficient funding for this purpose;	The Commission is promoting the exchange of good practices on reintegration, including on the monitoring, in several fora, including the European Migration Network.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Migration Network</a> ).	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	36. Calls on the Member States to ensure the proper implementation of the Return Directive in all its aspects; calls on the Commission to continue monitoring this implementation and take action in the event of non-compliance;		The Commission regularly verifies and monitors the application of return rules by means of exchanges with Member States' competent authorities and Schengen evaluations carried out also with the support of the European Union Agency for Fundamental Rights. In its activities, the Commission is focussing on the respect of fundamental rights in return procedures, including on the availability and effectiveness of forced-return monitoring systems. The Commission remains committed to continue monitoring the implementation of the Directive and, as the guardian of the Treaties, to commencing infringement proceedings under Article 258 of the Treaty on the Functioning of the European Union whenever it considers it necessary (points 4 and 36).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

## 4.1.23.9. LIBE Resolution 9: EP resolution of 20 January 2021 on European Arrest Warrant and surrender procedures between Member States

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>European Arrest Warrant and surrender procedures between Member States</b>	20/01/2021 <a href="#">T9-0006/2021</a> <a href="#">2019/2207(INI)</a> LIBE	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	Specific reply		
1)	10. Calls on the Commission to provide clear, understandable, comprehensive and comparable data, as the existing data is confusing and can offer a false impression of the (non-)efficiency of EAWs; calls on the Commission to set out the method by which the Member States should fulfil their obligation to systematically collect and transfer reliable and up-to-date data to the Commission; calls on the Commission to assess the possibility of creating a common database containing judicial decisions on EAWs, using solely anonymised data, which would become a smart and efficient instrument for assessing judicial cooperation, identifying weak points and being better prepared for any adjustments; recalls that judicial cooperation is a key element in guaranteeing social, economic, environmental and digital stability; reiterates its call to the Commission to request from Member States comprehensive data relating to the operation of the EAW mechanism and to include such data in its next implementation report;	The Commission agrees that the provision of information, statistics and data, including on case-law, has the potential to improve the assessment and operation of the Framework Decision on EAW.  Statistics on the EAW are published by the Commission on a yearly basis. From 2005 to 2013, statistics were collected and published by the Council. Following the entry into force of the Treaty of Lisbon and the expiry in December 2014 of the transitional period concerning the former third pillar instruments, the Commission is now responsible for collecting and publishing this quantitative information. <sup>27</sup>  At the European Parliament's request, the Commission undertook a revision of the standard questionnaire in 2013, in order to obtain a more comprehensive overview of the practical operation of the EAW. The revised questionnaire was discussed by the Member States' delegations and agreed upon at the Working Party on Cooperation in Criminal Matters. <sup>28</sup>  However, the Member States are not under a legal obligation to provide statistics. Moreover, not all of them provide replies to every question in the standard			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Communication on digitalisation of justice, together with a proposal for a Regulation on e-CODEX</a> ).	

<sup>27</sup> The reports covering 2014-2018 are available at [https://e-justice.europa.eu/content\\_european\\_arrest\\_warrant-90-en.do](https://e-justice.europa.eu/content_european_arrest_warrant-90-en.do).

		<p>questionnaire. Therefore, statistical comparisons of data from different years may not always be accurate, since Member States' response rates vary from year to year.</p> <p>It is however expected that the Commission's digitalisation efforts with respect to judicial cooperation instruments as described below will facilitate data gathering in the future.</p> <p>In that context, the Commission has adopted on 2 December 2020 a Communication on digitalisation of justice, together with a proposal for a Regulation on e-CODEX<sup>29</sup>. The proposal covers EU cross-border judicial cooperation instruments, including the Framework Decision on EAW. The Communication proposes a toolbox of measures, including funding, which are targeted at fostering digitalisation of justice. The toolbox also proposes to make the digital channel the default option in EU cross-border judicial cooperation through a legislative proposal, which was also announced in the Commission work programme for 2021.<sup>30</sup></p> <p>As regards the European Parliament's recommendation for a database on the EAW, it should be noted that, the European Judicial Network (EJN), in consultation with the Commission, Eurojust and other relevant stakeholders, will continue to explore options for expanding and further improving the EJN website,</p>		<p>On 1 December 2021 the Commission published a <a href="#">Proposal for a regulation on digitalisation of judicial cooperation</a>.</p> <p>As regards the case law, Eurojust published an update of the <a href="#">Case-law by the court of justice of EU on the European union European arrest warrant</a> on 15 March 2021.</p>	

<sup>29</sup> See for more information: [https://ec.europa.eu/info/policies/justice-and-fundamental-rights/digitalisation-justice/communication-digitalisation-justice-european-union-a-d-proposal-e-codex-regulation\\_en](https://ec.europa.eu/info/policies/justice-and-fundamental-rights/digitalisation-justice/communication-digitalisation-justice-european-union-a-d-proposal-e-codex-regulation_en). The e-CODEX system is the key building block for the secure electronic data exchange between competent authorities in the context of EU cross-border judicial cooperation procedures.

<sup>30</sup> [https://ec.europa.eu/info/sites/info/files/2021\\_commission\\_work\\_programme\\_and\\_annexes\\_en.pdf](https://ec.europa.eu/info/sites/info/files/2021_commission_work_programme_and_annexes_en.pdf).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		which already provides a broad range of information on the EAW. As regards the case law on the EAW, Eurojust will update its overview 'Case law by the Court of Justice of the EU on the EAW', last updated in March 2020, as frequently as possible, and to continue making it electronically available as appropriate. <sup>31</sup>			
2)	12. Underlines that the principle of mutual recognition must be premised upon mutual trust, which can be achieved only if respect for the fundamental and procedural rights of suspects and accused persons in criminal proceedings is guaranteed throughout the Union; recalls the importance of implementing the procedural rights directives with a view to guaranteeing the right to a fair trial; urges the Commission, in this regard, to ensure the full and correct implementation of these directives and to consider launching infringement proceedings where necessary;	In addition to its implementation reports on Directive 2010/64/EU on the right to interpretation and translation, Directive 2012/13/EU on the right to information and Directive 2013/48/EU on the right of access to a lawyer, the Commission is currently preparing the most recent implementation report on the Directive (EU) 2016/343 on the strengthening of certain aspects of the presumption of innocence and of the right to be present at the trial in criminal proceedings which will be published soon. Compliance assessments are ongoing with regard to Directive (EU) 2016/1919 on legal aid and Directive (EU) 2016/800 on procedural safeguards for children. The Commission is also pursuing infringement proceedings against several Member States to ensure the complete and correct implementation of all procedural rights directives. Further infringement proceedings are under consideration and will be launched by the Commission if considered necessary. The Commission will continue to closely monitor the implementation of these directives to ensure the right to a fair trial and the rights of defence of suspects and accused persons in criminal proceedings and the rights		On 31 December 2021, the Commission adopted an <a href="#">implementation report</a> . There are ongoing infringement proceedings for the lack of full transposition of procedural rights directive; for instance in July 2021 <a href="#">letter of formal notice to six EU MS on the right of access to a lawyer</a> . The Commission also sent a reasoned opinion to Slovakia and an additional reasoned opinion to Bulgaria. See also launch of infringement proceedings in March 2021 <a href="#">infringements-proceedings in JHA matters</a> .	

<sup>31</sup> See point 10 of the Council conclusions on the European Arrest Warrant adopted under the German Presidency in December 2020.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		of requested persons subject to European arrest warrant proceedings.			
3)	<p>13. Calls on the Commission to analyse common offences in the Member States with a view to better defining when the EAW should be used and to facilitate proportionality assessments; calls on the Commission to carry out a formal and substantive consistency assessment of the list of 32 categories that do not require a double criminality check, including criteria such as the gravity of the offence, its cross-border dimension or its harmful effect in undermining the fundamental values of the Union; notes that greater legal certainty must be provided to all involved in implementation, thereby avoiding unnecessary disputes; calls on the Commission to fully evaluate the issues of drawing up, where possible, a homogeneous list of categories of offences, based in specific offences and interests protected by law; recommends, furthermore, that the inclusion of an annex containing definitions for each list entry be assessed, in order to facilitate interpretation;</p>	<p>As regards the recommendation of the European Parliament to expand the list of 32 categories of offences for which no double criminality check is required, it should be pointed out that the list as it currently stands in Article 2 of the Framework Decision on EAW covers most of the offences that Member States consider as serious offences within the EU. Moreover, some crimes as mentioned in the resolution, such as environmental crime, racism and xenophobia (i.e. hate crime within the meaning of Article 4 of Framework Decision 2008/913), rape, sexual exploitation of children, crimes within the jurisdiction of the International Criminal Court (i.e. genocide, crimes against humanity and war crimes) are already included in the list of 32 categories of offences as laid down in Article 2(2) of the Framework Decision on EAW.</p> <p>The Commission will nevertheless look into this issue through a gap analysis, to see whether further offences would need to be added.</p> <p>It should be noted that the Commission is working on an initiative to expand the list of EU crimes with regard to hate speech and hate crime.</p> <p>Finally, any possible modification of this list would not just affect the functioning of the EAW but would likely also have an impact on all other relevant mutual recognition instruments, which contain a similar list. This matter therefore requires a careful analysis.</p>		<p><a href="#">Initiative to expand the list of hate-crimes and hate speech.</a></p> <p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p>	
4)	<p>16. Recalls that in principle, the punishment threshold laid down in Article 2(2) of the EAW Framework Decision aims to ensure the proportionality of the EAW; calls on the Commission, however, to analyse the possibility of</p>	<p>Although the follow-up mentions par. 16, no specific reply provided for this particular point on analysing the possibility of reducing the three-year threshold for certain offences, unless:</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	reducing the three-year threshold for certain offences, such as trafficking in human beings, sexual exploitation of children and child pornography;	The Commission notes that the proportionality issue currently arises only in a relatively small number of Member States and has improved because of the dissemination of such guidelines and good bi-lateral contacts.		working on action falling under the scope of the EP request (revising the <a href="#">EAW Handbook</a> ).	
5)	17. Calls on the Commission to clarify the issue of offences accessory to or related to the main offences that meets the EAW threshold, for example by considering updating the EAW handbook or possibly via EU instruments in the field of harmonisation of criminal law, including the indication of the application of EAWs in Member States in that regard; recalls, in this regard, that the EAW does not regulate surrender for accessory or related offences and that the speciality rule might apply precluding the issuing Member State from prosecuting those offences;	<p>The EAW in its current form is Europe's most successful criminal justice instrument. It provides a legally sound and efficient tool for surrendering people from one Member State to another, thereby ensuring that suspected and convicted persons have no hiding place in the European area of justice. The EAW is used increasingly: to illustrate, in 2018, 6,976 EAWs were executed as compared to 3,467 in 2013.</p> <p>Some issues as raised by the European Parliament have already been addressed by soft law measures, such as guidelines via the Commission's EAW Handbook<sup>32</sup> on proportionality or accessory offences.</p> <p>The Commission is currently revising the EAW Handbook to address several perceived lacunas. The revised Handbook will <i>inter alia</i> contain an update of the 35 new judgments rendered by the CJEU on the Framework Decision on EAW since the last version of the Handbook.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (revising the <a href="#">EAW Handbook</a> ).	
6)	19. Calls on the Commission to continue assessing the transposition of the EAW and other judicial cooperation	The Commission has published its fourth implementation report on the EAW on 2 July 2020 <sup>33</sup> . The report demonstrates that there is still room for improvement as regards complete transposition and		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

<sup>32</sup> Commission Notice of 28 September 2017, Handbook on how to issue and execute a European Arrest Warrant, C(2017)6389 final. To illustrate, Section 2.4 of the EAW Handbook of 2017 already provides guidance on applying a proportionality test at issuing stage. Section 2.3 presently deals with the issue of accessory or related offences to the main offences that meet the EAW threshold.

<sup>33</sup> Report from the Commission to the European Parliament and the Council on the implementation of Council Framework Decision of 13 June 2002 on the European arrest warrant and the surrender procedures between Member States, COM(2020) 270 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	instruments and to initiate infringement proceedings where necessary;	<p>conformity of national laws with the Framework Decision on EAW.</p> <p>The implementation report has revealed that transposition issues mostly relate to the implementation of optional grounds for non-recognition as mandatory, adding additional grounds for non-recognition, most notably prohibitions to surrender nationals, but also for example on proportionality, trial readiness and a human rights grounds, requiring double criminality outside the scope of the instrument. Mandatory time limits (in particular lengthy appeal proceedings without strict time limits are problematic) and ground for non-recognition on in absentia proceedings are also not correctly transposed.</p> <p>Complete and correct transposition of the Framework Decision on EAW will contribute substantially in making the EAW work even better than it does today. The Commission will therefore not hesitate to launch infringement proceedings if needed. So far, the Commission has launched infringement proceedings against seven Member States and will continue whenever necessary.</p>		<p>working on action falling under the scope of the EP request (launch of infringement proceedings).</p> <p>In February 2021, the <u>Commission launched several infringement proceedings</u> against EU Member States. In the proceedings against Cyprus, Germany and Sweden, the Commission took the first step by sending a letter of formal notice requesting further information to the countries for the incomplete and/or incorrect transposition of the FWD. In 2020, the Commission already initiated infringement proceedings against Austria, the Czech Republic, Estonia, Ireland, Italy, Lithuania and Poland for the incorrect transposition of the FD EAW.</p>	
7)	22. Notes the Commission's worrisome report on the implementation of Directive 2013/48/EU; urges the Commission to continue to assess Member States' compliance with the directive and to take appropriate measures, including infringement proceedings, to ensure conformity with its provisions; urges the Commission to step up efforts to ensure the full implementation of all directives on procedural safeguards in order to make sure that requested persons have recourse to effective defence in cross-border proceedings; urges the Commission to consider taking action in the light of the inadequate implementation of the Commission	The Commission is also pursuing infringement proceedings against several Member States to ensure the complete and correct implementation of all procedural rights directives. Further infringement proceedings are under consideration and will be launched by the Commission if considered necessary. The Commission will continue to closely monitor the implementation of these directives to ensure the right to a fair trial and the rights of defence of suspects and accused persons in criminal proceedings and the rights of requested persons subject to European arrest warrant proceedings.		<p>In 2021 the Commission launched 4 <u><a href="#">infringement proceedings</a></u> for failing to transpose correctly EU rules on access to a lawyer and on the right to communicate upon arrest.</p> <p>The Commission launched <u><a href="#">infringement proceedings</a></u> for failing to correctly transpose EU rules on the right to interpretation and translation in criminal proceedings (Directive (EU) 2010/64) and for non-conformity of their national legislations with EU rules on the right to</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>recommendation of 27 November 2013 on procedural safeguards suspected or accused in criminal proceedings<sup>34</sup>, in particular in respect of vulnerable adults;</p>	<p>The Commission is also pursuing infringement proceedings against several Member States to ensure the complete and correct implementation of all procedural rights directives. Further infringement proceedings are under consideration and will be launched by the Commission if considered necessary.</p> <p>Regarding the protection of vulnerable adults, The Commission is currently launching a study, which will examine the legal situation in the Member States and the follow-up which has been given to the 2013 Recommendation, identify possible problems or gaps which could negatively impact cross-border situations and the need for further measures on EU level.</p> <p>The Commission considers that the right of access to a lawyer and to legal aid in both the issuing and executing Member States is important for both mutual recognition and trust. The implementation report on Directive 2013/48 on access to a lawyer in criminal proceedings highlighted concerns, which must be addressed by the Member States. The Commission will launch infringement proceedings if necessary. Access to a lawyer must also mean communication with an appropriately experienced and qualified professional who has access to relevant and up to date information. This must be addressed through continuing assessment and available training.</p>		<p>information in criminal proceedings (Directive (EU) 2012/13).</p> <p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out. There is reportedly a study launched in February 2021 to assess the need for more effective legal protection of vulnerable adults within the European Union. As part of this study a <a href="#">survey</a> was conducted (none of them found publicly).</p>	
8)	<p>24. Calls on the Commission to provide for a uniform application and effective monitoring of time limits;</p>	<p>Although the follow-up does not mention point 24, the Commission however expresses it believes that more regular contact between experts from different Member States is key to improving the EAW process. The EAW coordination group could facilitate contacts</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

<sup>34</sup> OJ C 378, 24.12.2013, p. 8.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		between specialist EAW practitioners, which would encourage uniformity of approach.			
9)	<p>25. Calls on the Commission to ensure adequate funding for Eurojust and the European Judicial Network (EJN) to enable them to facilitate and coordinate the EAW; deplores the fact that the Commission's current budgetary appropriations for Eurojust are insufficient in the light of the challenges faced by the agency with regard to its continuously growing caseload, and that they have led to a stagnation in financing despite an increased workload;</p>	<p>The Commission is fully aware of Eurojust's changing operational priorities and the budget proposals for the years to come reflect the Commission's unflinching support to Eurojust. In the context of Multiannual Financial Framework (MFF) 2021-2027 Eurojust will receive EUR 349 million. Budget 2021 starts with EUR 43.8 million while the foreseen budget for year 2027 is EUR 56.8 million. The budget for the period 2021-2027 will increase with an annual rate around 4,6%. These amounts represent a substantial increase of almost 41% and EUR 101.34 million from previous MFF 2014-2020, and a real increase of 24,96 % and EUR 69.62 million from the final budget approved in the period 2014-2020.</p> <p>With these amounts, the budgetary authorities ensure that Eurojust has adequate resources for its operational work, including those arising from EAWs. Furthermore, the Commission has a permanent representative in both the Executive and the Management Board of Eurojust. This representation gives the Commission the opportunity to know, in real time, Eurojust's needs in terms of budget and staff. During the annual budget process, the Commission assesses the resource needs of all decentralised agencies, including Eurojust. However, the current resources assigned to Eurojust seem to be enough to perform its operational work.</p> <p>The Commission also supports financially the training of justice professionals, such as judges, prosecutors, and lawyers, on judicial cooperation in criminal matters, including on the EAW. The European Judicial</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">MFF</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Training Network (EJTN) <sup>35</sup> receives an annual operating grant that enables the <a href="#">EJTN</a> to organise several EU-level seminars and to sponsor the participation of foreign judges and prosecutors in national seminars organised by its members on the topic.			
10)	26. Calls on the Commission and the Member States to provide appropriate funding for legal aid to persons concerned by EAW proceedings, including for legal assistance in both the issuing and executing Member States before surrender is ordered, funding for suitably qualified interpreters and translators, specific training on the EAW for practitioners, including police, prosecutors, the judiciary and defence lawyers, particularly in areas such as the fundamental rights aspects of the EAW, the assessment of proportionality and alternative measures to detention, representation in EAW cases, and regarding the procedure for requesting a preliminary ruling of the CJEU and for seeking assurances from other Member States' authorities; underlines the value of European Judicial Training Network (EJTN) programmes such as EAW simulations and language training; stresses that in order to ensure equality of arms, lawyers should have access to targeted, accessible and affordable training; calls on the Commission to promote and facilitate the provision of such training;	<p>No specific reply is provided to this particular call on funding for legal aid, however the Commission considers that the right of access to a lawyer and to legal aid in both the issuing and executing Member States is important for both mutual recognition and trust. The implementation report on Directive 2013/48 on access to a lawyer in criminal proceedings highlighted concerns, which must be addressed by the Member States. The Commission will launch infringement proceedings if necessary.</p> <p>Access to a lawyer must also mean communication with an appropriately experienced and qualified professional who has access to relevant and up to date information. This must be addressed through continuing assessment and available training.</p> <p>The Commission also supports financially the training of justice professionals, such as judges, prosecutors, and lawyers, on judicial cooperation in criminal matters, including on the EAW.</p> <p>[...] Finally, the useful recommendations of the European Parliament in this resolution in relation to training, networking and exchange of information will inform the Commission's ongoing work on improving the EAW. The Commission aims to achieve a closer alignment with all relevant parties through the</p>		No further/specific actions proposed/promised to be taken by the Commission.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		European Arrest Warrant coordination group, which was recently set up.			
11)	27. Calls on the Commission, in cooperation with Member States, to support and eventually further develop the EJTN and existing national training platforms for the judiciary and, if necessary, launch an additional training platform for experts and practitioners on mutual recognition instruments, including the EAW;	<p>The Commission supports every year cross-border training projects for judges and prosecutors or for lawyers on judicial cooperation instruments in criminal matters among which the EAW, in the framework of its annual <a href="#">call for proposals for action grants in the field of European judicial training</a><sup>36</sup>. For example, the European Lawyers Foundation (ELF) is currently implementing the “CrimiLaw” project (2019 call) to train lawyers on EU instruments on procedural rights in cross-border criminal proceedings in cooperation with the bar associations of seven Member States. In addition, in the framework of the “JudCoopAFSJ” project (2019 call) and of the “BES Practice 3.0” project (2020 call) several judicial training providers are organising training activities for judges and prosecutors.</p> <p>The newly launched <a href="#">European Training Platform</a><sup>37</sup> will also be an additional tool to advertise training courses and training materials for self-study on EU law for justice professionals.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (European Lawyers Foundation (ELF) is currently implementing the ‘ <a href="#">CrimiLaw</a> ’, ‘ <a href="#">JudCoopAFSJ</a> ’ project (2019 call), the ‘BES Practice 3.0’ project (2020 call), ( <a href="#">European Training Platform</a> ).	
12)	30. Calls on the Commission to take account of the opinions of national parliaments, in line with Protocol 2 to the TEU, if it decides to propose legislative acts in the field of EU criminal law, as their participation provides a check on the application of the principles of subsidiarity and proportionality in EU criminal law;	No specific reply is provided to this particular point (on taking into account the opinions of national parliaments).		Not mentioned.	
13)	33. Highlights the link between detention conditions and EAW measures and reminds Member States that Article 3 of the ECHR and the relevant case law impose on the	The Commission attaches great importance to the respect of the fundamental rights of persons that are in detention in the EU. Poor prison conditions may indeed

	Member States not only negative obligations, but also positive obligations, by requiring them to ensure that prison conditions are consistent with human dignity and that thorough, effective investigations are carried out in the event of rights violations; calls on the Commission to explore the legal and financial means available at Union level to improve standards of detention;	<p>also affect the efficient operation of EU mutual recognition instruments, such as the EAW, and increase the danger of radicalisation in prisons.</p> <p>As regards detention conditions and the management of prisons, the Member States agreed to respect the existing Council of Europe standards on the matter, such as the European Prison Rules.</p> <p>Since 2016, the Commission provides a direct grant to the Council of Europe aimed at the creation of an EU network of independent prison monitoring bodies such as National Preventive Mechanisms (NPMs) which Member States have set up following ratification of the Optional Protocol to the Convention against Torture (OPCAT). It allows bodies monitoring prisons in the Member States to meet regularly within an informal network to discuss detention matters and exchange best practice in this field. Both the Convention against Torture and the NPMs already publish detailed reports on the situation of prisons in Europe. Under this direct grant, the Commission is also financing the collection of the Council of Europe's Annual Penal Statistics, better known as SPACE (Statistiques Pénales Annuelles du Conseil de l'Europe). SPACE statistics ensure that a common working methodology is applied to enhance comparability of data across Europe.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
14)	35. Reiterates its call <sup>38</sup> for Member States to improve deficient prison conditions; calls on the Commission to fully exploit the possibility of financing the modernisation of detention facilities through EU Structural Funds; recalls in this regard that in its 2018	Since 2016, the Commission provides a direct grant to the Council of Europe aimed at the creation of an EU network of independent prison monitoring bodies such as National Preventive Mechanisms (NPMs) which Member States have set up following ratification of the		The Commission assessed how the use of EU funds could support the modernisation of detention facilities; the Commission considers a new mapping of funding opportunities under the MFF 2021-2027.	

<sup>38</sup> European Parliament resolution of 5 October 2017 on prison systems and conditions (OJ C 346, 27.9.2018, p. 94).

	<p>conclusions on promoting mutual recognition by enhancing mutual trust<sup>39</sup>, the Council also invited the Commission to promote the use of EU funds to support the Member States in addressing the problem of deficient detention conditions;</p>	<p>Optional Protocol to the Convention against Torture (OPCAT). It allows bodies monitoring prisons in the Member States to meet regularly within an informal network to discuss detention matters and exchange best practice in this field. Both the Convention against Torture and the NPMS already publish detailed reports on the situation of prisons in Europe. Under this direct grant, the Commission is also financing the collection of the Council of Europe's Annual Penal Statistics, better known as SPACE (Statistiques Pénales Annuelles du Conseil de l'Europe). SPACE statistics ensure that a common working methodology is applied to enhance comparability of data across Europe.</p> <p>As regards the need for the Member States to allocate adequate resources to the refurbishment and modernisation of prisons, the Commission has undertaken a mapping exercise in 2016 to see how different EU funds could be employed to improve the situation in prisons in the EU.</p> <p>This mapping has revealed that the European Regional Development Fund (ERDF) can be used to support energy efficiency interventions such as the installation of central heating, hot water, ventilation systems and isolation of windows and walls, which can directly improve sanitary conditions in prisons. Together with the European Social Fund (ESF) it can also be used to co-finance interventions in view of social and economic reintegration of detainees to the labour market and society after release (such as training, education and health facilities, including infrastructure in prisons with this aim).</p>			

<sup>39</sup> OJC 449, 13.12.2018, p. 6.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		The Commission considers performing a new mapping of funding opportunities for prisons under the MFF 2021-2027.			
15)	37. Calls on the Commission to study the feasibility of supplementing instruments on procedural rights, such as those on admissibility of evidence and prison conditions in pre-trial detention, in particular on the basis of Council of Europe standards or higher, including with regard to time limits on pre-trial detention; states that the Commission should aim for the highest standards while respecting the principles of subsidiarity and proportionality; believes that the absence of minimum standards on prison conditions and pre-trial detention at EU level, of the limitation of the use of pre-trial detention to being a measure of last resort and of the consideration of alternatives, coupled with the lack of a proper assessment of whether the cases are trial-ready, can lead to unjustified and excessive periods being spent by suspects and accused persons in pre-trial detention; recalls that this situation has been further exacerbated by the COVID-19 pandemic; calls on the Commission to achieve EU minimum standards, particularly on criminal procedural safeguards and on prison and detention conditions, as well as to strengthen the information tools for national executing authorities on the conditions of pre-trial detention and imprisonment in each Member State;	<p>Although not mentioned for point 37 but point 38, the Commission states that:</p> <p>The topic of pre-trial detention has been on the EU agenda for quite some years now and the Commission performed a comparative law study on this topic in 2015.<sup>40</sup> It turned out that, overall, Member States legislations conform to a reasonably high degree with the case law of the European Court of Human Rights (ECtHR) and the recommendations of the Council of Europe in this field, but there are shortcomings in practice. Around 19% of the total prison population consists of pre-trial detainees, which contributes to overcrowding and leads to poor detention conditions.</p> <p>The Commission is currently launching an additional study on this topic, which will feed into the Commission's assessment of the need for EU wide rules in the area of pre-trial detention for cross border and/ or domestic cases.</p> <p>The Commission is also launching a study on the cross-border use of evidence in criminal proceedings. The objective of this study is to analyse the existing national rules on the collection, handling and transfer of evidence in EU Member States and current EU rules and identify problems or gaps in the context of cross-border situations.</p> <p>As regards the European Parliament's request to strengthen the information tools for national executing</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Criminal Detention Database by the European Union Agency for Fundamental Rights (FRA)</a> ).	

<sup>40</sup> Study on Financial and Other Impacts for an Impact Assessment of a Measure Covering Rights for Suspects and Accused Persons who are in Pre-Trial Detention.

		<p>Decision 2009/829/JHA on the European Supervision Order, it is expected that it will also provide insights into the scarce application of these two framework decisions in practice, while suggestions will also be made for improvement.</p> <p>Organisations who receive operating grants from the Commission, such as the European Organisation for Prison and Correctional Services (EuroPris) and the Confederation of European Probation (CEP) have created specific Experts Groups on the detention related framework decisions, which meet on a yearly basis. Numerous action grants funded by the Commission have also been dedicated to awareness raising and support in the practical application of those EU instruments.</p> <p>An implementation report of the Directive the European Investigation Order (EIO) is planned to be issued by the Commission in the second quarter of 2021. The Commission will continue to assess Member States' compliance with the directive and will take appropriate measures to ensure conformity with its provisions throughout the Union.</p>		<p>On 20 July 2021, the Commission adopted the implementation <a href="#">report</a>.</p>	
21)	49. Calls on the Commission to continue negotiations with the UK aimed at preserving EU standards in respect of the procedural and fundamental rights of suspects and accused persons; [...]	The Trade and Cooperation Agreement with the United Kingdom signed on 30 December 2021 <sup>50</sup> provides for close relations between the EU and the UK on law enforcement and judicial cooperation in criminal matters. It covers, amongst other things, ambitious extradition arrangements and the exchange of sensitive information that may impact human lives or rights (e.g. by leading to deprivation of liberty). Such relations require a high degree of confidence that the		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>50</sup> Trade and Cooperation Agreement between the European Union and the European Atomic Energy Community, of the one part, and the United Kingdom of Great Britain and Northern Ireland, of the other part. OJ L 444, 31.12.2020, p. 14–1462.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>human rights concerned will be upheld and a common understanding on how to protect those rights.</p> <p>To this end, the agreement commits the EU, its Member States and the United Kingdom to continue to respect democracy and the rule of law, and protect and give domestic effect to fundamental rights such as those set out in the European Convention on Human Rights (ECHR), which is the reference text on fundamental rights in 47 countries in the European continent and beyond. Nothing modifies the obligation to respect fundamental rights and legal principles as reflected, in particular, in the European Convention on Human Rights and, in the case of the Union and its Member States, in the Charter of Fundamental Rights of the European Union. Specific procedural rights, modelled on the EU acquis, complete the protection of suspects and accused persons in surrender proceedings, i.e. the right to interpretation and translation, the right to be informed of the arrest warrant, its contents and of the possibility to consent to surrender to the issuing State, the right to be assisted by a lawyer in the executing State and to be informed of his or her right to appoint a lawyer in the issuing State and the right to have the consular authorities informed.</p> <p>In addition to specific dispute settlement mechanisms in the field of law enforcement and judicial cooperation, the agreement contains provisions on suspension and termination of the law enforcement and judicial cooperation part of the agreement, in case guarantees to protect human rights, fundamental freedoms and personal data are no longer ensured, or in case of serious breach of an obligation under the Agreement.</p>			

4.1.23.10. LIBE Resolution 10: EP resolution of 10 February 2021 on implementation of Article 43 of Directive 2013/32/EU of the European Parliament and of the Council of 26 June 2013 on common procedures for granting and withdrawing international protection

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation of Article 43 of Directive 2013/32/EU of the European Parliament and of the Council of 26 June 2013 on common procedures for granting and withdrawing international protection</b>	10/02/2021 <a href="#">T9-0042/2021</a> <a href="#">2020/2047(INI)</a> <a href="#">LIBE</a>	<a href="#">SP(2021)247</a>	Final reply (SP) received 16 July 2021	Mixed reply			
1)	1. Notes that the Commission has conducted stakeholder consultations as well as exchanges with Parliament and the Member States in preparation of the New Pact on Asylum and Migration; highlights however that, despite its legal reporting obligation and the requirements stemming from the Inter-institutional Agreement on Better Law Making, the Commission has never presented an implementation report on the APD, and that in 2016 and 2020 it presented proposals for an Asylum Procedures Regulation without providing for any impact assessment; expects the Commission to present this report, which has been overdue since 2017;	The report on the application of the Asylum Procedures Directive was not published due to the adoption of the Commission proposal for a new Asylum Procedure Regulation in July 2016 and ensuing legislative negotiations. The Commission continuously assesses the implementation of the Asylum Procedures Directive through studies, including those carried out in the context of the European Migration Network, and through the European Asylum Support Office (EASO) led Asylum Processes Network and a dedicated Contact Committee. The Commission continues collecting and publishing qualitative and quantitative data on the implementation of the directive, notably statistical data collected through the recently revised Regulation on statistics on migration and international protection (EU 2020/851). The Commission remains committed to carrying out and publishing an implementation report of the Asylum Procedures Directive if the Asylum Procedures Regulation will not repeal it.				As Commission remains committed to ‘[...] an implementation report of the Asylum Procedures Directive if the Asylum Procedures Regulation will not repeal it...’ future developments are required to address this point.	
2)	15. Highlights the recent findings by the FRA, in particular that the number of alleged incidents of fundamental rights violations reported at external	The Commission considers the respect of fundamental rights and the respect for the <i>non-refoulement</i> principle at external borders essential. While Member States are				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>borders have increased significantly in recent years; notes that this includes many cases of persons being refused entry without their asylum claims being registered, including in the context of border procedures; reiterates that Member States are obliged to prevent unauthorised border crossings, and recalls that this obligation is without prejudice to the rights of persons requesting international protection; concurs with the FRA that the regularity and seriousness of these alleged incidents constitute a serious fundamental rights concern; reiterates that automatic refusal of entry, refoulement and collective expulsions are prohibited under EU and international law; highlights furthermore that, under Article 8 of the APD, Member States have a duty to inform persons on the possibility to apply for asylum if there are indications of protection needs, and that persons subject to a refusal of entry must be ensured access to an effective remedy in accordance with EU law and the ECHR; deplores all cases where Member States fail to respect their obligations in this regard, and calls on them to fully comply with those obligations; [...] calls on the Commission to effectively ensure Member States' compliance with these obligations, including by suspending EU payments in cases of serious deficiencies;</p>	<p>obliged to prevent unauthorised border crossings, the rights of persons requesting international protection must be respected. Where the Asylum Procedures Directive applies, it covers the right of access to the procedure (Article 6), meaning registration of an application for international protection made within specific time limits and an effective opportunity to lodge it as soon as possible. Under Article 8, the Member States have a duty to inform persons on the possibility to apply for asylum if there are indications they may wish to do so. If Member States examine applications in a border procedure, all basic principles and guarantees of the asylum procedure apply, including an individual assessment of the application. This is provided for in Article 43 of the Asylum Procedures Directive and in the draft Asylum Procedure Regulation. The current Reception Conditions Directive, in its Article 8 to which the Asylum Procedures Directive refers, as well as the provisional agreement on the revised Reception Conditions Directive as supported by the European Parliament, contains a detention ground for the use of the border procedure, to be applied on an individual basis. The same provisional agreement, and Article 11 of the current Reception Conditions Directive, provide strict rules on the detention of minors. The Commission regularly monitors the situation at the borders in Schengen evaluations, carried out also with the support of the European Union Agency for Fundamental Rights. Monitoring will be part of the new mandate for the future European Union Agency for Asylum, the successor of EASO, once the proposal is adopted.</p>		<p>working on action falling under the scope of the EP request.</p>	
3)	<p>33. Calls on the Commission to effectively monitor the implementation of Article 43 and the related provisions of the APD and to take action in the event of non-</p>	<p>The Commission addresses any serious fundamental rights concerns in regular exchanges with the Member States. 		making process in the relevant procurement procedures.			
2)	7. Stresses that international agreements are legally binding and have an impact on EU legislation, and underlines the need for negotiations to be transparent throughout the entire process; recalls that according to Article 218 TFEU, Parliament must be fully and immediately informed at every stage while negotiations are taking place; calls on the Commission to step up its efforts and to ensure full compliance with Article 218 TFEU;	No specific reply is provided to this particular point.		Not mentioned.	
3)	26. Recalls its calls on the Commission and Council in its resolution of 28 April 2016 on public access to documents for the years 2014-2015;	No specific reply is provided to this particular point.		Not mentioned.	
4)	46. Urges the Commission to ensure public access to all advance purchase agreements, in their full form, between the EU and private companies in the field of health, in particular when ordering vaccines;	The Commission proactively and successively strives to publish information about the signature of the advance purchase contracts and informs the public about the state of play of negotiations with vaccine manufacturers. However, the Commission notes that the objective of procuring Covid-19 vaccines from commercial manufacturers requires that certain interests that could be undermined by the disclosure of documents be duly protected. This applies in particular to the protection of sensitive business information and the protection of the decision-making process in the relevant procurement procedures.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already proactive in this field.	

## 4.1.23.12. LIBE Resolution 12: EP resolution of 20 May 2021 on new Avenues for Legal Labour Migration

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
New Avenues for Legal Labour Migration	20/05/2021 <a href="#">T9-260/2021</a> <a href="#">2020/2010(INI)</a> LIBE	<a href="#">SP(2021)507</a> -	Final reply (SP) received 22 September 2021	Specific reply			
1)	12. [...] calls on the Commission to consider a legislative revision of the aforementioned directive following its evaluation; calls on the Commission to propose appropriate legislative action to improve the existing directives by aligning them with the most favourable provisions;	The Commission will continue to simplify and further harmonise the current legal framework on legal migration (points 11 and-12 of the resolution), by presenting at the end of 2021 a 'Skills and Talent package', including a revision of the Directive on long-term residents to improve the rights and the intra-EU mobility of those migrants who are already well integrated in our societies, and a review of the Single Permit Directive, to make the procedure for the admission of low and medium skilled workers easier for employers and migration authorities. To prepare these legislative proposals, the Commission is carrying out an impact assessment, which will include an assessment of the inefficiencies in labour market tests and labour migration schemes (point 26).				The <a href="#">revised proposal</a> was expected to be published in the fourth quarter of 2021, as announced in the Commission Work Programme 2021, but has been postponed to April 2022.	
2)	24. Supports global and regional cooperation on migration as one way to strengthen the availability and flexibility of pathways for regular migration; remains convinced that enhancing proper legal migration channels would help to reduce irregular migration, undermine the business model of criminal smugglers, reduce trafficking in human beings and labour exploitation, enhance equal opportunities for all workers and offer a legal path for those considering migrating to the Union; calls, in that respect, on the Commission to regulate recruitment agencies, potentially through the European Labour Authority;	As indicated in the Pact, with a high-level Conference on 11 June 2021 the Commission also launched the initiative of Talent Partnerships to support mobility and migration schemes for labour and training purposes between interested EU Member States and key third countries, which could also provide partner countries with assistance for capacity-building in areas such as labour market or skills intelligence, vocational education and training, and diaspora mobilisation (points 23-26). Following the launch of the initiative, in the next months the Commission will hold operational				The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out. Even though pilot projects have been initiated through the <a href="#">Migration Partnership Facility</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>discussions with interested Member States to design and implement a number of tailor-made Talent Partnerships with specific key countries and regions.</p> <p>[...]</p> <p>To prepare these legislative proposals, the Commission is carrying out an impact assessment, which will include an assessment of the inefficiencies in labour market tests and labour migration schemes (point 26).</p>			
3)	<p>26. Underlines the important role of remittances and the benefits that safe, regular and orderly migration has for both sending and receiving countries; supports efforts to address the 'brain drain' and 'brain gain' issues by further developing instruments that allow for circular migration; calls on the Commission in that respect to analyse the benefits and downsides of existing models applied by other countries, such as a points-based system and expression-of-interest-based models; recommends, with a view to facilitating circular migration, the introduction of preferred mobility, and access to renewable permits, the right of re-entry, and an extension of the permitted period of absence for TCNs to allow them to return to their home countries;</p>	<p>The Commission will continue to simplify and further harmonise the current legal framework on legal migration (points 11 and 12 of the resolution), by presenting at the end of 2021 a 'Skills and Talent package', including a revision of the Directive on long-term residents to improve the rights and the intra-EU mobility of those migrants who are already well integrated in our societies, and a review of the Single Permit Directive, to make the procedure for the admission of low and medium skilled workers easier for employers and migration authorities. To prepare these legislative proposals, the Commission is carrying out an impact assessment, which will include an assessment of the inefficiencies in labour market tests and labour migration schemes (point 26).</p>		<p>The Commission published a <a href="#">roadmap</a> for its future Communication to the European Parliament and to the Council: <a href="#">Legal migration: Attracting skills and talent to the EU</a>.</p> <p>The roadmap notes that the Commission will build on the evidence gathered in the context of the 2019 Fitness check on the EU legal migration policy, and on the 2019 <a href="#">study</a> carried out by the OECD outlining several possible scenarios.</p> <p>Finally, two new ongoing studies by external consultants will feed into this Communication: a study to support the impact assessment of the two legislative initiatives, and a technical feasibility study addressing the possible options to build an EU Talent pool.</p>	
4)	<p>29. Takes the view that EU and national policies on legal migration should focus on responding to labour market and skills shortages; calls on the Commission, to this end, to analyse inefficiencies in labour market tests and labour migration schemes which do not respond to real labour market needs; recommends that the Union develop its</p>	<p>Although the follow-up mentions par .., no specific reply provided for this particular point, the Commission states</p> <p>[...] that the Commission is carrying out an impact assessment, which will include an assessment of</p>		<p>The Commission published a <a href="#">roadmap</a> for its future Communication to the European Parliament and to the Council: <a href="#">Legal migration: Attracting skills and talent to the EU</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	legislative framework to cover, to a greater extent, TCNs seeking work in low-skilled or medium-skilled employment <sup>51</sup> ;	<p>the inefficiencies in labour market tests and labour migration schemes.</p> <p>The Commission is going to address many of the issues identified in the resolution. In particular, as foreseen in the Pact, in June 2021 the Commission launched the 'Talent Partnerships' initiative to strengthen relations with third countries on enhancing legal pathways. Also, as announced in the Pact, by the end of 2021 the Commission will present a 'Skills and Talent package', including: a revision of the Directive on long-term residents, a review of the Single Permit Directive, and options to develop an EU Talent Pool.</p>		<p>The roadmap notes that the Commission will build on the evidence gathered in the context of the 2019 Fitness check on the EU legal migration policy, and on the 2019 <a href="#">study</a> carried out by the OECD outlining several possible scenarios.</p> <p>Finally, two new ongoing studies by external consultants will feed into this Communication: a study to support the impact assessment of the two legislative initiatives, and a technical feasibility study addressing the possible options to build an EU Talent pool.</p>	
5)	30. Notes, in that context, that TCNs are often employed in the home and domestic care sector <sup>52</sup> ; notes that this is a sector in which most employees are women; calls on the EU and its Member States to ratify ILO Convention 189 on domestic workers and to ensure the full application of employment standards; calls on the Commission, moreover, to consider legislative action in this area;	<p>The Commission is going to address many of the issues identified in the resolution. [...]</p> <p>The Commission will present this package with a political Communication on legal labour migration, which is also going to assess and take into account the more forward-looking suggestions of the resolution.</p>		Although the Commission refers to the point, it is unclear at this stage what the <a href="#">package on legal migration</a> will include.	
6)	31. Calls on the Commission to develop an EU-wide scheme to attract and facilitate the cross-border activities of self-employed people, entrepreneurs, and start-ups – in order to enhance innovation – as well as younger TCNs with no formal qualifications, through, for example, job-seeker and training visas, taking into account the services	The Commission will continue to work closely with the European Parliament to improve the legal migration pathways. In its Communication accompanying the 'Skills and Talent package', the Commission will start assessing the legal and political feasibility of the more forward-looking		The Commission published a <a href="#">roadmap</a> for its future Communication to the European Parliament and to the Council: <a href="#">Legal migration :Attracting skills and talent to the EU.</a>

## 4.1.23.13. LIBE Resolution 13: EP resolution of 24 June 2021 on Commission's 2020 Rule of law report

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Commission's 2020 Rule of law report</b>	24/06/2021 <a href="#">T9-0313/2021</a> <a href="#">2021/2025(INI)</a> <b>LIBE</b>	<a href="#">SP(2021)557</a>	Final reply (SP) received 25 October 2021	General reply		
1)	2. [...] encourages the Commission to also highlight positive trends in Member States that could serve as good examples for others to follow;	As regards the scope of the European Rule of Law Mechanism, the Commission underlines that this scope is already broad, covering four areas: national justice systems, anti-corruption frameworks, media pluralism and media freedom and other institutional issues related to checks and balances. The 2021 Rule of Law Report covers the same scope as the first annual Rule of Law Report, consolidating the exercise started by the 2020 report while further deepening the Commission's assessment, which is in line with the Parliament's request to deepen the country analyses. It also further develops on the impacts of the COVID-19 pandemic under the report's different pillars. The report consists of an umbrella Communication, which identifies the main trends and developments over the reporting period under each of the pillars across the EU, as well as 27 country chapters. The country chapters analyse new developments since the adoption of the first report and the follow up to the challenges and developments identified in the 2020 Report.			In July 2021, the Commission published a new <a href="#">Rule of law report</a> with respective country chapters. In the <a href="#">communication</a> issued for this report, the Commission states that the report 'seeks to strengthen the rule of law in full respect for national traditions and specificities, stimulating a constructive debate and encouraging all Member States to examine how challenges can be addressed and to learn from each other's experiences'.	
2)	3. Notes with satisfaction that the report contains country-specific chapters; commends the Commission's efforts to engage with national governments and national parliaments as well as civil society and other national actors; encourages the Commission to devote greater efforts to deepening the country analyses with a	The Commission is continuously assessing how existing instruments can best be used to promote and uphold the rule of law, democracy and fundamental rights, and is ready to continue the dialogue in this regard. The Commission is in particular ready to organise further discussions with			In July 2021, the Commission published a new <a href="#">Rule of law report</a> with respective country chapters. In the <a href="#">communication</a> issued for this report, the Commission states that 'the Commission was encouraged by the response to the 2020 Rule of Law Report in the European Parliament and in the Council,	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>view to better assessing the severity of rule of law challenges;</p>	<p>the European Parliament on the basis of the recently adopted 2021 Rule of Report, including in particular on the individual country chapters, as part of a stronger interinstitutional dialogue on the rule of law. The Commission is ready to reflect on how to further improve this consultation process to ensure the broadest involvement of stakeholders possible. The Commission has also dedicated additional time to the country visits, carrying out over 400 meetings (compared to around 300 meetings for the 2020 Rule of Law Report) with national authorities, independent bodies and stakeholders. Proposals for meetings by both national authorities and stakeholders have been taken into account for this and the list of authorities and stakeholders that were met during the country visit is made public in the annex of each country chapter.</p> <p>In preparing its assessment, the Commission relied also on important external expertise from a variety of bodies, organisations and independent experts, including the Fundamental Rights Agency and the Council of Europe. However, the annual Rule of Law Report represents the Commission's own assessment and the Commission takes responsibility for it. Delegation of decision-making powers to an external panel of experts could raise concerns in terms of legitimacy, the balance of inputs and the accountability for the results.</p>		<p>as well as in national Parliaments, and looks forward to further strengthening inter-institutional cooperation on the rule of law'. It also states that 'outreach was also undertaken with civil society and the Member States, including with national parliaments.'</p>	
3)	<p>4. Welcomes the fact that all Member States are scrutinised according to the same indicators and methodology; emphasises, however, that presenting breaches of a different nature equally risks trivialising the most serious breaches of the rule of law; urges the Commission to differentiate its reporting by distinguishing between systemic breaches of the rule of</p>	<p>As regards the scope of the European Rule of Law Mechanism, the Commission underlines that this scope is already broad, covering four areas: national justice systems, anti-corruption frameworks, media pluralism and media freedom and other institutional issues related to checks and balances. The 2021 Rule of Law Report covers the same scope as the first</p>		<p>In the methodology published for the <a href="#">Rule of law report</a> for 2021, the Commission states that the report seeks to 'qualitatively assess all Member States, whilst remaining proportionate to the situation and developments in full respect of the principle of equality of Member States'. There are</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>law and individual, isolated breaches; [...] calls on the Commission to update its methodology accordingly and to keep Parliament informed without undue delay;</p>	<p>annual Rule of Law Report, consolidating the exercise started by the 2020 report while further deepening the Commission's assessment, which is in line with the Parliament's request to deepen the country analyses. It also further develops on the impacts of the COVID-19 pandemic under the report's different pillars. The report consists of an umbrella Communication, which identifies the main trends and developments over the reporting period under each of the pillars across the EU, as well as 27 country chapters. The country chapters analyse new developments since the adoption of the first report and the follow up to the challenges and developments identified in the 2020 Report.</p> <p>As it stands, the rule of law mechanism also contributes to the promotion of democracy and respect of fundamental rights and equality, as these values are inextricably interlinked. The report is also part of broader EU efforts to promote and defend its founding values. This work includes the European Democracy Action Plan and the renewed Strategy for the Implementation of the Charter of Fundamental Rights, as well as targeted strategies to progress towards a "Union of Equality". Another related aspect is monitoring the application of EU law and the protection of fundamental rights under the Charter, including through the use of infringement proceedings. These instruments illustrate together the Commission's comprehensive approach to promoting the values of democracy, the rule of law and respect for fundamental rights.</p> <p>With regard to the methodology, the Commission agrees on the importance of the consultation of stakeholders and on using a variety of sources, including via visits in the Member States. This approach has been followed for both editions of the</p>		<p>cases where 'serious breaches' are identified in country reports.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Rule of Law Report prepared so far. The approach on the methodology has been transparent, developed in close collaboration with the Member States and has been made public. For the preparation of the 2021 Rule of Law Report, the Commission has again collected written input from Member States and from stakeholders through a targeted stakeholder consultation. The Commission is ready to reflect on how to further improve this consultation process to ensure the broadest involvement of stakeholders possible. The Commission has also dedicated additional time to the country visits, carrying out over 400 meetings (compared to around 300 meetings for the 2020 Rule of Law Report) with national authorities, independent bodies and stakeholders. Proposals for meetings by both national authorities and stakeholders have been taken into account for this and the list of authorities and stakeholders that were met during the country visit is made public in the annex of each country chapter.</p>			
4)	<p>5. Considers that the 2020 report is overly descriptive and does not provide sufficient analysis; calls on the Commission to make future reports more analytical; considers it necessary that future reports should contain country-specific recommendations on how to address the concerns identified or remedy breaches, including deadlines for implementation, where appropriate, and benchmarks to be followed up on;</p> <p>calls on the Commission to include in the reports indications of the follow-up on the implementation of its recommendations and remedial action;</p>	<p>The approach on the methodology has been transparent, developed in close collaboration with the Member States and has been made public. For the preparation of the 2021 Rule of Law Report, the Commission has again collected written input from Member States and from stakeholders through a targeted stakeholder consultation. The Commission is ready to reflect on how to further improve this consultation process to ensure the broadest involvement of stakeholders possible.</p>		<p>In July 2021, the Commission published a new <a href="#">Rule of law report</a> with respective country chapters. In the <a href="#">communication</a> issued for this report, the Commission states that 'the evolving dialogue between the institutions on the rule of law will continue to develop in the coming years. The European Parliament adopted a Resolution welcoming the 2020 Rule of Law Report, while reiterating its previous calls for improvements, notably on the inclusion of country-specific recommendations. The Commission welcomes the resolution, and will carefully reflect on it in the preparation of future Reports. The Commission remains committed to deepening the dialogue with the European Parliament.'</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>8. Considers that the annual reports should identify cross-cutting trends at EU level; believes that an EU-wide perspective is absent from the 2020 report;</p> <p>asks the Commission to identify instances where certain measures or practices that undermine the rule of law, media freedom, checks and balances, or the fight against corruption in one Member State become blueprints for others, or when the gravity and scope of such practices have the potential to affect the Union as a whole;</p> <p>calls on the Commission to assess how such attacks compromise the quality of democracy in the Union; calls for the reports' analyses to prioritise these trends, including the increasing challenges posed by national constitutional courts to the EU legal architecture, in order to guide remedial action at EU level;</p> <p>calls on the Commission to provide clear illustrations of systematic disinformation and foreign interference campaigns aimed at undermining public trust in state institutions and independent media while pushing Member States towards authoritarian-style governance structures;</p>	<p>Similarly, as regards media pluralism and media freedom, the 2021 Rule of Law Report looks into the de jure and de facto independence of the media - both public service and private media - by pointing to instances of political pressure and influence on the media. It also covers different types of attacks against journalists - physical and online, including cases of hate speech directed at journalists and media.</p> <p>In addition, the 2021 Rule of Law Report further deepens and consolidates the assessment of developments related to the enabling framework for civil society and covers developments related to national human rights institutions, equality bodies and ombudsperson institutions.</p> <p>As it stands, the rule of law mechanism also contributes to the promotion of democracy and respect of fundamental rights and equality, as these values are inextricably interlinked. The report is also part of broader EU efforts to promote and defend its founding values. This work includes the European Democracy Action Plan and the renewed Strategy for the Implementation of the Charter of Fundamental Rights, as well as targeted strategies to progress towards a "Union of Equality". Another related aspect is monitoring the application of EU law and the protection of fundamental rights under the Charter, including through the use of infringement proceedings. These instruments illustrate together the Commission's comprehensive approach to promoting the values of democracy, the rule of law and respect for fundamental rights.</p>		<p>The <a href="#">Rule of law report</a> with respective country chapters, published in July 2021 covers topics such as cross-cutting trends in EU Member States and cases where Member States' national courts did not accept the findings of a CJEU preliminary ruling and questioned the principle of primacy of EU law.</p>	
6)	<p>9. Regrets the fact that not all rule of law issues were covered in sufficient detail in the 2020 report;</p>	<p>The 2021 Rule of Law Report covers the same scope as the first annual Rule of Law Report, consolidating the exercise started by the 2020 report while further</p>		<p>In July 2021, the Commission published a new <a href="#">Rule of law report</a> with respective country chapters.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>invites the Commission to develop its country-specific expertise and capacity so as to react more swiftly to negative developments in the Member States;</p> <p>calls on the Commission to devote sufficient resources to the monitoring and enforcement of the rule of law in the EU;</p>	<p>deepening the Commission’s assessment, which is in line with the Parliament’s request to deepen the country analyses. It also further develops on the impacts of the COVID-19 pandemic under the report’s different pillars. The report consists of an umbrella Communication, which identifies the main trends and developments over the reporting period under each of the pillars across the EU, as well as 27 country chapters. The country chapters analyse new developments since the adoption of the first report and the follow up to the challenges and developments identified in the 2020 Report.</p> <p>[...]</p> <p>The Commission is ready to reflect on how to further improve this consultation process to ensure the broadest involvement of stakeholders possible. The Commission has also dedicated additional time to the country visits, carrying out over 400 meetings (compared to around 300 meetings for the 2020 Rule of Law Report) with national authorities, independent bodies and stakeholders. Proposals for meetings by both national authorities and stakeholders have been taken into account for this and the list of authorities and stakeholders that were met during the country visit is made public in the annex of each country chapter.</p> <p>[...]</p> <p>The 2021 Report monitors progress made and developments with regard to the points raised in the respective country chapters of the 2020 Rule of Law Report and any other significant developments.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	<p>14. Is alarmed by the stark deterioration of the independence of some Member States' justice systems and by the increasing and blatant lack of compliance with EU law, including CJEU judgments; notes that judicial independence continues to be an area of serious concern in some Member States, as reflected in some country chapters;</p> <p>calls on the Commission to clearly assess and designate such shortcomings and findings identified as a clear risk of a serious breach of the rule of law;</p> <p>is deeply concerned by the Commission's failure to react promptly and with legal means to the serious risks regarding the rule of law identified in the country chapters, above all once these have materialised into actual breaches of the rule of law;</p> <p>calls on the Commission to provide a meaningful, simple and clear assessment of the different national justice systems and to highlight where best practices for comparable systems might be applied and how similar deficiencies could be addressed;</p>	<p>The Commission is continuously assessing how existing instruments can best be used to promote and uphold the rule of law, democracy and fundamental rights, and is ready to continue the dialogue in this regard. The Commission is in particular ready to organise further discussions with the European Parliament on the basis of the recently adopted 2021 Rule of Report, including in particular on the individual country chapters, as part of a stronger interinstitutional dialogue on the rule of law.</p>		<p>In the <a href="#">Rule of law report</a> with respective country chapters, published in July 2021 the Commission uses a coherent and equivalent approach, applying the same methodology and examining the same range of topics in all Member States, while remaining proportionate to the situation. In each country chapter, the analysis focuses in particular on topics where there have been significant developments, or where important challenges have been identified in the previous report and persist during the reporting period. The terms used for the assessments aim at being comparable and uniform across the country chapters and at capturing the level of gravity, taking into account the overall country-specific context. The country chapters do not purport to give an exhaustive description of all rule of law issues in every Member State, but to present significant developments. The assessment refers to EU law requirements, including those resulting from the case-law of the CJEU. In addition, the recommendations and opinions of the Council of Europe provide a useful frame of reference for relevant standards and best practices.</p>	
8)	<p>16. Decries the political pressure applied in Hungary and Poland to prevent national courts from initiating preliminary ruling proceedings before the CJEU under Article 267 TFEU, which is intended to prevent national judges from asking the CJEU questions in relation to EU requirements on judicial independence; considers this practice to be in contravention of the Treaties and the CJEU's established interpretation of the relevant provisions; is appalled by the growing and deliberate lack of compliance with CJEU rulings; believes that these</p>			<p>In July 2021, the Commission published a new <a href="#">Rule of law report</a> with respective country chapters.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>unlawful developments pose a systemic threat to the unity and consistency of EU law and to the very functioning of the Union; invites the Commission to include in its future reports detailed data on Member States' compliance with CJEU rulings; considers, therefore, that forthcoming annual reports should consider the failure to respect CJEU rulings as serious violations in the assessment;</p> <p>urges the Commission to ensure immediate and adequate legal responses to refusals to implement and respect CJEU rulings, such as court actions under Article 260 TFEU;</p> <p>calls on the Commission to closely monitor the rulings of national courts regarding the primacy of EU law over national constitutional norms and to initiate infringement proceedings against Member States that consistently breach this principle;</p>	<p>When identifying and assessing breaches of the principles of the rule of law that affect the financial interests of the Union, the Commission will take into account the Rule of Law Report as one of the sources. Since 1 January 2021, the Commission has been monitoring possible breaches of the principles of the rule of law in Member States that would be relevant under the said Regulation on a general regime of conditionality.</p> <p>As regards the justice systems the country chapters already cover relevant developments related to lawyers, and information related to the length of proceedings and backlogs in courts is also provided, as well as on systemic issues related to the implementation of European Court of Human Rights (ECtHR) judgments related in particular to excessive length of proceedings. Relevant developments related to the respect of the principle of primacy of EU law are covered as part of the pillar on institutional checks and balances.</p>			
9)	<p>17. Notes that the slowness of civil, criminal and administrative judicial procedures constitute a major danger, not least for the respect for the rule of law; calls on the Commission to include in its future reports an evaluation of prison conditions, judicial backlogs and the average duration of trials for each Member State;</p>	<p>The resolution calls for a number of new topics to be included in the report. The Commission would like to stress that many of these topics are already included within the scope of the report.</p>		<p>The Commission did include at least some of the topics mentioned by Parliament in its new <a href="#">Rule of law report</a>.</p>	
10)	<p>19. Invites the Commission to place greater emphasis on the misuse of EU funds, particularly in view of the Rule of Law Conditionality Regulation, and to review the proper functioning of investigations and public prosecution services in each Member State in relation to the investigation and prosecution of fraud, including tax</p>	<p>As regards the general regime of conditionality for the protection of the Union's budget, the Commission would like to stress that the general regime of conditionality and the Rule of Law Report are two distinct instruments with different objectives and scope. However, when identifying and assessing</p>		<p>In the <a href="#">Rule of law report</a> with respective country chapters, published in July 2021 the Commission states that the rule of law is a precondition for the proper management of EU funds and in May 2018 the Commission proposed to accompany its proposals for the new budgetary framework with a legislative</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	fraud, corruption or other breaches of EU law relating to the implementation of the EU budget or the protection of the Union's financial interests;	breaches of the principles of the rule of law that affect the financial interests of the Union, the Commission will take into account the Rule of Law Report as one of the sources. Since 1 January 2021, the Commission has been monitoring possible breaches of the principles of the rule of law in Member States that would be relevant under the said Regulation on a general regime of conditionality.		proposal for a dedicated mechanism to protect EU funds against risks arising due to rule of law breaches in individual Member States.	
11)	<p>20. Is deeply concerned by the growing threat of corruption-related crimes;</p> <p>calls on the Commission to update and enhance the Union's anti-corruption legislation where necessary, using the report's findings to better respond to the deficiencies identified, and to enact an appropriate set of policies to combat judicial corruption in the Member States; underlines the dangers of the rise of corruption for the cohesion of the Union's legal order, the effectiveness of its common policies, the protection of fundamental rights, its international credibility and the functioning of its internal market, in which respect for the rule of law plays an important role;</p> <p>calls on the Commission to outline best practices, identify areas that are particularly susceptible to corruption and devise country-specific recommendations for improvements, and to use that knowledge to update and enhance the Union's anti-corruption framework;</p>	As regards the anti-corruption framework, the 2021 Rule of Law Report deepens the analysis of the institutional, legal and strategic framework to fight corruption. The report covers a wide variety of corruption-related areas and risks, assessing as well the criminal legislation and instruments to fight corruption across the EU and the capacity to investigate and prosecute corruption. In the 2021 Rule of Law Report, the assessment related to public procurements was taken in consideration in the context of the measures to respond to the COVID-19 pandemic. The report assesses the anti-corruption framework from a wide angle, including instruments and procedures that are conducive to deter and correct frauds and misuse of EU funds. In order to step up efforts at EU level, as indicated in the EU Strategy to tackle Organised Crime 2021-2025, the Commission will study the existing EU anticorruption rules to assess whether they are up to date with evolving criminal practices and to ensure that they cover all relevant corruption-related offences.		In the <a href="#">Rule of law report</a> with respective country chapters, published in July 2021 the Commission states: <i>'The European Parliament adopted a Resolution welcoming the 2020 Rule of Law Report, while reiterating its previous calls for improvements, notably on the inclusion of country-specific recommendations. The Commission welcomes the resolution, and will carefully reflect on it in the preparation of future Reports. The Commission remains committed to deepening the dialogue with the European Parliament.'</i>

19)	30.[...] calls on the Commission to pay more attention in the next annual cycle to the activities of national ombudspersons and equality bodies by looking in greater depth at how they function, their degree of independence and their real contribution in ensuring that adequate safeguards are in place; [...]		In addition, the 2021 Rule of Law Report further deepens and consolidates the assessment of developments related to the enabling framework for civil society and covers developments related to national human rights institutions, equality bodies and ombudsperson institutions.		The <a href="#">Rule of law report</a> with respective country chapters, published in July 2021 does cover this topic.	
20)	31. Stresses the importance of a healthy civic space for promoting and monitoring EU values and holding governments accountable with regard to their adherence to these, as well as for counterbalancing the erosion of the rule of law and fostering a rule of law culture; invites the Commission to deepen its assessment of civic space in the 2021 report; considers it beneficial to explore the definition of clear benchmarks on an enabling civic space to further strengthen this area of analysis in the long run, including, among other areas, an enabling legal environment for the exercise of civic freedoms, a framework for civic organisations' financial viability and sustainability, including the issue of government-organised non-governmental organisations (GONGOs), access to and participation in decision-making, the right to access information, safe space, including as regards incidences of and responses to verbal and physical attacks, smear campaigns, and legal, administrative and fiscal harassment including from SLAPPs, the chilling effects they create, and their long-term consequences in terms of active citizenship in another country; reiterates that the EU institutions should maintain an open, transparent and regular dialogue with representative associations and civil society; calls on the Commission to assess in its future reports whether the exercise of		As regards civil society, the Commission recalls that as highlighted in the recently adopted Strategy to strengthen the application of the Charter of Fundamental Rights in the EU, civil society organisations and rights defenders, including national human rights institutions (NHRIs), are vital for a healthy democracy and a society where people can enjoy their fundamental rights. The Commission is committed in ensuring a supportive environment for civil society organisations, strong and independent national human rights institutions, as well as reinforcing civil society organisations and NHRIs' capacity to defend people's rights.  The Commission agrees that providing funding to civil society organisations is crucial to their functioning. The new Citizenship, Equality, Rights and Values programme will fund civil society organisations to promote activities under all its specific objectives in continuity with the current practice. It will also promote awareness of rights and values through support to civil society organisations, including NGOs and think tanks, contributing to the effective enjoyment of rights under EU law. 	<p>Commission to foster debate about the report in national parliaments and to engage with civil society organisations in the follow-up to the report;</p>	<p>to strengthen the interinstitutional cooperation on rule of law matters. In particular, it aims at triggering an inclusive debate at European and national level. Such a debate has been carried out based on the first annual Rule of Law Report with the Council, the European Parliament and at national level, in particular with national parliaments. The Commission looks forward to continuing this dialogue on the basis of the second annual Rule of Law Report. The Commission also recalls its support for the idea of the European Parliament to involve national parliaments and, in particular, to set up an inter-parliamentary dialogue between the European Parliament and national parliaments. The Commission is ready to contribute to such a dialogue.</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	
42)	<p>63. Calls on the Commission to make clear in its annual rule of law reports that not all rule of law shortcomings and violations are of the same nature and/or intensity and that when the values listed in Article 2 TEU are being deliberately, gravely, permanently and systematically violated over a period of time, Member States could fail to fulfil all the criteria that define a democracy and become authoritarian regimes; stresses that the Commission's main priority should be to enforce EU law when breaches of Article 2 TEU occur and that its annual rule of law reports should mainly contribute to that end; calls on the Commission, therefore, to assess countries under ongoing Article 7 TEU proceedings in depth in order to illustrate how the rule of law has been structurally undermined to facilitate the consolidation of authoritarian-style governance structures;</p>	<p>On the procedures under Article 7 of the Treaty on European Union, the Commission calls on the Member States concerned and the Council to invest in accelerating the resolution of the problems raised under these procedures, finding solutions that protect the rule of law and the values common to all the Member States. Until a solution is found to the concerns raised, the Commission remains committed to supporting the Council in the continuation of the Article 7 procedures to resolve the issues at stake. The Commission also reiterates that the European Parliament should be given the possibility to present its case in the Council in the procedures it has initiated.</p>		<p>In the <a href="#">Rule of law report</a> with respective country chapters, published in July 2021 the Commission uses a coherent and equivalent approach, applying the same methodology and examining the same range of topics in all Member States, while remaining proportionate to the situation. In each country chapter, the analysis focuses in particular on topics where there have been significant developments, or where important challenges have been identified in the previous report and persist during the reporting period. The terms used for the assessments aim at being comparable and uniform across the country chapters and at capturing the level of gravity, taking into account the overall country-specific context. The country chapters do not purport to give an exhaustive description of all rule of law issues in every Member State, but to present significant developments. The assessment refers to EU law requirements, including those resulting from the case-law of the CJEU. In addition, the recommendations and opinions of the Council of</p>

4.1.23.14. LIBE Resolution 14: EP resolution of 9 July 2021 on Annual Report on the Functioning of the Schengen Area

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Annual Report on the Functioning of the Schengen Area</b>	9/07/2021 <a href="#">T9-0350/2021</a> <a href="#">2019/296(INI)</a> LIBE	SP(2021)640	Final reply (SP) received 4 November 2021	Mixed reply			
1)	4. Recalls that despite having identified significant shortcomings in the implementation of the Schengen <i>acquis</i> , the Commission has been slow or outright reluctant to initiate infringement proceedings; reiterates its call on the Commission to exercise appropriate scrutiny over the application of the Schengen <i>acquis</i> , to assess whether the principles of necessity and proportionality have been respected and to use infringement proceedings where necessary; underlines the urgent need to enhance mutual trust and cooperation among the Schengen states and to ensure appropriate governance for the Schengen area;	On internal borders (points 1 to 5), the Commission launched the announced political and technical dialogue with the Member States having long-lasting internal border controls, with a view to lifting these border controls at internal borders as soon as possible.				The Commission adopted the <a href="#">strategy towards a fully functioning and resilient Schengen area</a> on 2 June 2021.  Where the Commission plans to “integrate into these reports (State of Schengen report) a ‘State of Schengen Scoreboard’ to assess in an interconnected manner the implementation of the Schengen <i>acquis</i> in the different policy fields and better support Member States in addressing any challenges”.  It is unclear how much this plan will enable the appropriate scrutiny over the application of the Schengen <i>acquis</i> as requested by the EP.	
2)	9. Reiterates its call on the Member States to ensure proper implementation of the Return Directive <sup>56</sup> in all its aspects and calls on the Commission to monitor its implementation;	No specific reply is provided to this particular point.				Not mentioned.	
3)	13. Is concerned about the impact of the existing travel restrictions on the rights of refugees and people seeking international protection; calls on the Commission and the Member States to ensure that the adoption of such measures is fully consistent with the requirements	No specific reply is provided to this particular point.				Not mentioned.	

<sup>56</sup> Directive 2008/115/EC of the European Parliament and of the Council of 16 December 2008 on common standards and procedures in Member States for returning illegally staying third-country nationals (OJ L 348, 24.12.2008, p. 98).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	enshrined in Articles 3 and 4 of the SBC and in the Charter;				
4)	17. [...] calls on the Commission and the Member States to promote and carry out effective, independent and prompt investigations into any allegations of pushbacks and ill-treatment at the borders and to ensure that deficiencies are immediately remedied;	<p>Although the follow-up does not mentions point 17, the Commission however states that as regards the activities of Frontex (points 14 to 16 and 19), the Commission will continue to work with Frontex and its Management Board to ensure that there are appropriate checks and balances within the agency, to strengthen a culture of transparency and accountability, and to ensure respect of fundamental rights. The Commission is also fully cooperating with the Parliament's Frontex Scrutiny Group, and will swiftly implement the recommendations addressed directly to the Commission. The Commission's long-standing efforts towards the correct implementation of the Agency's mandate will continue. The Commission welcomes the Agency's reinforced framework for fundamental rights monitoring and the appointment of Frontex's Fundamental Rights Officer, who took up his duties on 1 June 2021. He is currently assisted by 20 out of the total of 40 Fundamental Rights Monitors. The Agency should now fully implement this framework and swiftly recruit the remaining 20 Fundamental Rights Monitors.</p> <p>The Commission has also already informed the Agency at the Management Board meeting of 24 - 25 March that it will be appropriately informed in case of infringement procedures against a Member State which could implicate the operations of the Agency.</p>		<p>In Commission <a href="#">proposal</a> for a Council regulation on the establishment and operation of an evaluation and monitoring mechanism to verify the application of the Schengen acquis, there is an improved focus on evaluating compliance with fundamental rights, including through unannounced evaluation and visits in the MS for the purpose of investigate compliance with obligations under the Schengen acquis, in particular in response to [...] serious allegations of fundamental rights violations.</p> <p>In an effort to shorten and simplify the procedures to make the process more effective and efficient and increase peer-pressure, the proposal entails a fast-track procedure for a serious deficiency to ensure that the deficiencies identified are addressed promptly.</p> <p>To be followed up as it is unclear what falls under 'addressing promptly'.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In addition as regards the Schengen Evaluation and Monitoring Mechanism (points 20 to 31), [...] in preparing the proposal, the Commission has taken into account most of the views that the Parliament expressed during the targeted consultations that took place prior to its adoption. These include, in particular (but not only), an improved focus on evaluating compliance with fundamental rights, accelerating the procedures, notably in cases where serious deficiencies have been identified and removing, as a general rule, the current EU Restricted classification level of evaluation reports.</p>			
5)	<p>20. Expresses its view that the SEMM has brought significant improvements to governance of the Schengen area and has contributed to ensuring its functioning by enhancing mutual trust and collective responsibility; emphasises, however, the <i>sui generis</i> nature of the evaluation mechanism in EU law and recalls that the Commission remains ultimately responsible for ensuring the application of the Treaties and the measures adopted by the institutions pursuant thereto;</p>	<p>Consolidated reply to point 20-31</p> <p>As regards the Schengen Evaluation and Monitoring Mechanism (points 20 to 31), the negotiations in the Council have been launched by the Slovenian Presidency and the Commission is counting on a quick progress on this file. In preparing the proposal, the Commission has taken into account most of the views that the Parliament expressed during the targeted consultations that took place prior to its adoption. These include, in particular (but not only), an improved focus on evaluating compliance with fundamental rights, accelerating the procedures, notably in cases where serious deficiencies have been identified and removing, as a general rule, the current EU Restricted classification level of evaluation reports.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>On 2 June 2021, the Commission published its <a href="#">proposal</a> for a Council regulation on the establishment and operation of an evaluation and monitoring mechanism to verify the application of the Schengen acquis.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	23. Calls on the Commission to allocate sufficient resources to ensure a comprehensive evaluation of the Schengen system, including by increasing the number of on-site visits to Member States; points out that, despite the Commission adopting 198 evaluation reports in the period 2015-2019, only 45 Schengen evaluations have been closed; [...]	Consolidated reply to point 20-31 As regards the Schengen Evaluation and Monitoring Mechanism (points 20 to 31), the negotiations in the Council have been launched by the Slovenian Presidency and the Commission is counting on a quick progress on this file. In preparing the proposal, the Commission has taken into account most of the views that the Parliament expressed during the targeted consultations that took place prior to its adoption. These include, in particular (but not only), an improved focus on evaluating compliance with fundamental rights, accelerating the procedures, notably in cases where serious deficiencies have been identified and removing, as a general rule, the current EU Restricted classification level of evaluation reports.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  In its <a href="#">proposal</a> for a Council regulation on the establishment and operation of an evaluation and monitoring mechanism to verify the application of the Schengen acquis, the Commission noted that the proposal does not require an increase of the human and financial resources that are already allocated for the Commission.	
7)	24. Calls on the Council to hold regular discussions at ministerial level on the proper functioning of the Schengen area, including discussions in situations where the evaluation reports have shown serious shortcomings, thus assuming the political role given to it by the Schengen evaluation process; calls, furthermore, on the Commission and the Council to prevent anything compromising the purpose of this mechanism, namely to determine whether all the preconditions for lifting internal border controls with a candidate country have been met and to ensure compliance with the Schengen <i>acquis</i> on the part of those Member States in which it is fully established;	Consolidated reply to point 20-31 does not clarify the Commission position on this particular point. As regards the Schengen Evaluation and Monitoring Mechanism (points 20 to 31), the negotiations in the Council have been launched by the Slovenian Presidency and the Commission is counting on a quick progress on this file. In preparing the proposal, the Commission has taken into account most of the views that the Parliament expressed during the targeted consultations that took place prior to its adoption. These include, in particular (but not only), an improved focus on evaluating compliance with fundamental rights, accelerating the procedures, notably in cases where serious deficiencies have been identified and removing, as a general rule, the current EU Restricted classification level of evaluation reports.		It is unclear how the Commission's proposal has taken into account this demand.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	30. [...] calls on the Commission to continue to assess in all Member States the compliance of border management operations with fundamental rights requirements and to take the necessary measures in the event of human rights violations;	<p>The Consolidated reply to point 20-31 does not clarify the Commission position on this particular point</p> <p>As regards the Schengen Evaluation and Monitoring Mechanism (points 20 to 31), the negotiations in the Council have been launched by the Slovenian Presidency and the Commission is counting on a quick progress on this file. In preparing the proposal, the Commission has taken into account most of the views that the Parliament expressed during the targeted consultations that took place prior to its adoption. These include, in particular (but not only), an improved focus on evaluating compliance with fundamental rights, accelerating the procedures, notably in cases where serious deficiencies have been identified and removing, as a general rule, the current EU Restricted classification level of evaluation reports.</p>		<p>In the Commission's <u>proposal</u> for a Council regulation on the establishment and operation of an evaluation and monitoring mechanism to verify the application of the Schengen acquis, there is an improved focus on evaluating compliance with fundamental rights, including through unannounced evaluation and visits in the MS for the purpose of investigate compliance with obligations under the Schengen acquis, in particular in response to [...] serious allegations of fundamental rights violations.</p> <p>In an effort to shorten and simplify the procedures to make the process more effective and efficient and increase peer-pressure, the proposal entails a fast-track procedure for a serious deficiency to ensure that the deficiencies identified are addressed promptly.</p> <p>To be followed up as it is unclear what falls under 'addressing promptly'.</p>	
9)	32. Notes the progress made in the development of the new large-scale IT systems and interoperability among them; calls on the Member States, the Commission and the agencies involved to uphold the envisaged timetable for implementation, which provides for implementation of the new IT systems, completion of the reforms of the existing systems and interoperability of those systems by the end of 2023; [...]	<p>The Commission is in close contact with the Member States to ensure that the schedule of the implementation of the large IT systems at the external borders is complied with (points 32 to 33).</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

## 4.1.23.15. LIBE Resolution 15: EP resolution of 6 October 2021 on artificial intelligence in criminal law and its use by the police and judicial authorities in criminal matters

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Artificial intelligence in criminal law and its use by the police and judicial authorities in criminal matters</b>	6/10/2021 <a href="#">T9-0405/2021</a> <a href="#">2020/2016(INI)</a> LIBE	<a href="#">SP(2021)791</a>	Final reply (SP) received 26 January 2022	Specific reply			
1)	14. [...] calls on the Commission to issue guidelines on how to conduct such an assessment in the context of judicial cooperation in criminal matters; [...]	Regarding the idea of guidelines on how to conduct an assessment in the context of judicial cooperation in criminal matters, the Commission does not see a need to issue guidelines (point 14). Judicial authorities are allowed to refrain, by way of exception, from giving effect to a European arrest warrant (EAW) in case of a real risk of breach of the fundamental right to an independent tribunal and, therefore, of the essence of the fundamental right to a fair trial (Article 47(2) Charter) (see Case C-216/18 PPU, LM). However, for the LM case-law to apply, a strict two-stage examination must be performed by the executing State. The case-law of the Court of Justice, which will be further explained in the updated EAW Handbook, provides the necessary guidance in this respect. It follows from the above-mentioned LM judgment that the threshold for suspending EAWs in case of fair trial rights concerns is very high and has so far only applied in relation to EAWs issued by Poland. It will not apply in general to all cases of concerns over the use of AI tools by the issuing State.				No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	<p>29. Takes note of the Commission’s feasibility study on possible changes to the Prüm Decision<sup>57</sup>, including regarding facial images; takes note of earlier research that no potential new identifiers, e.g. iris or facial recognition, would be as reliable in a forensic context as DNA or fingerprints; reminds the Commission that any legislative proposal must be evidence based and respect the principle of proportionality; urges the Commission not to extend the Prüm Decision framework unless there is solid scientific evidence of the reliability of facial recognition in a forensic context compared to DNA or fingerprints, after it has conducted a full impact assessment, and taking into account the recommendations of the European Data Protection Supervisor (EDPS) and EDPB;</p>	<p>As regards the claim that legislative proposal must be evidence-based and respect the principle of proportionality (point 29), the Commission would like to underline that all its activities must respect the principle of proportionality, as set out in Article 5 of the Treaty on the European Union (TUE) and recalled in point 2.3 of the Explanatory Memorandum accompanying the Commission’s proposal for an AI Act of 21 April 2021 (COM(2021)206 final).</p> <p>The AI Act proposal is of a horizontal nature and will apply to AI systems developed, deployed and used in all areas, including the areas of law enforcement and justice. It is accompanied by an impact assessment analysing in detail the problems posed by the use of AI as regard fundamental rights and the health and safety of persons in the Union. The impact assessment provides evidence and a methodology for the classification of AI systems which poses a high risk to fundamental rights in the area of law enforcement and analyses the most effective and proportionate policy options to address those risks.</p> <p>In the context of the revision of the Prüm Decisions, the Commission conducted a full impact assessment and assessed the inclusion of several data categories, and notably of facial images, and will table a proposal for a revision shortly on this basis.</p> <p>Facial images and recognition technology are essential components of EU information systems, such the Visa Information System (VIS), the Entry-Exit</p>		<p>The European Commission <a href="#">is working</a> on an impact assessment <b>evaluating</b> the functioning of the Prüm framework in EU Member States including whether it is fit for purpose and fulfils its objective.</p>	

<sup>57</sup> Council Decision 2008/615/JHA of 23 June 2008 on the stepping up of cross-border cooperation, particularly in combating terrorism and cross-border crime (OJ L 210, 6.8.2008, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>System (EES) and the European Criminal Records Information System for third-country nationals (ECRIS-TCN), to complement the use of fingerprint matching. Other law enforcement systems, such as the Schengen Information System (SIS), also provide for the use of facial images. The Commission will ensure that the necessary safeguards are provided for the inclusion of facial images in the Prüm framework.</p>			
3)	<p>31. [...] calls on the Commission, therefore, to implement, through legislative and non-legislative means, and if necessary through infringement proceedings, a ban on any processing of biometric data, including facial images, for law enforcement purposes that leads to mass surveillance in publicly accessible spaces; calls further on the Commission to stop funding biometric research or deployment or programmes that are likely to result in indiscriminate mass surveillance in public spaces; highlights, in this context, that special attention should be paid, and a strict framework applied, to the use of drones in police operations;</p>	<p>The Commission is not in favour of any use of technology leading to mass surveillance (point 31). The AI Act proposal clearly confirms this position. Article 5(1d) of the proposed Act explicitly prohibits the use of ‘real-time’ remote biometric identification AI systems in publicly accessible spaces for the purpose of law enforcement. This is only allowed for certain well-defined and limited exceptions which are subject to specific safeguards and an ex ante authorization procedure.</p> <p>In addition, the proposal classifies AI systems intended to be used for the ‘real-time’ and ‘post’ remote biometric identification of natural persons as high-risk, irrespective of their specific purpose (law enforcement or not) and place of use (publicly accessible or not). Those systems will only be permitted if they comply with specific requirements and pass conformity checks by a third party before</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>they can be placed on the EU market or put into service. Those measures of ex-ante control are complemented with a robust system of ex post monitoring and supervision.</p> <p>It should be noted that the General Data Protection Regulation (GDPR) and the Law Enforcement Directive already prohibits the processing of biometric data for the purpose of uniquely identifying a natural person, unless limited exceptions apply. The proposed AI Act simply lays down rules that are complementary to the data protection acquis on this point.</p> <p>The Commission will continue to apply the necessary safeguards to avoid that any EU-funded research on biometrics and other technologies would result in indiscriminate mass surveillance in public spaces and that tools and applications will be developed that would not be in line with EU values and fundamental rights or other legislation.</p> <p>EU-funded research and innovation on civil security is, on the one hand, key to ensure the availability at European level of solutions that can effectively address current and future security threats. On the other hand, research is also needed to understand challenges posed by the use of new technologies and consequently to develop solutions that are both more efficient and, at the same time, fully compliant with fundamental rights.</p> <p>Any project funded under an EU research programme must be compliant with the highest ethical, legal and social acceptance standards and safeguards, in particular the Union's rules on data protection. This is checked both before any funding decision is taken and also during the lifetime of the projects once these are launched. Ethics evaluations, screenings</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and reviews before and during the research activities are not only conducted to tick boxes, but an essential part of research project management from the EU side, and include contractual obligations for the beneficiaries of EU research funding.</p> <p>The Framework Programme for Horizon Europe 2021-2027, the Digital Europe Programme and the European Defence Fund specifically address ethics related to AI systems and/ or techniques. The guiding document on how to carry out the ethics assessment for project proposals includes a detailed ethics issues checklist and an appraisal procedure<sup>58</sup>. Any use of AI systems or techniques must be clearly described in the project and must demonstrate technical robustness, safety and be in line with the Ethics Guidelines of the High Level Expert Group on AI. The specific case of AI systems used for biometric identification is one of the examples of high-risk areas and applications in the guidance document for project applicants and independent ethics experts who are responsible for screening the proposals for research projects.<sup>59</sup></p>			

<sup>58</sup> [https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/common/guidance/how-to-complete-your-ethics-self-assessment\\_en.pdf](https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/common/guidance/how-to-complete-your-ethics-self-assessment_en.pdf).

<sup>59</sup> [https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/guidelines-on-serious-and-complex-cases\\_he\\_en.pdf](https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/guidelines-on-serious-and-complex-cases_he_en.pdf).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>33. [...] requests that the Commission compile and update the information in a single place; calls on the Commission to also publish and update information concerning the use of AI by the Union agencies charged with law enforcement and judicial tasks; calls on the EDPB to assess the legality of these AI technologies and applications in use by law enforcement authorities and the judiciary;</p>	<p>The AI Act proposal requires all high-risk stand-alone AI systems placed on the market or put into service in the Union to be registered in a publicly accessible EU-wide database (point 33). This includes information on high-risk AI systems intended to be used by national authorities and Union agencies charged with law enforcement and judicial tasks. Under the proposal, the publicly accessible information includes data on the purpose of the system, its status, copy of the conformity declaration, and the Member States in which the AI system has been placed on the market, put into service or made available. In order to preserve the interests of security and to prevent misuse of this information by criminals, the proposal does not require the instructions of use (including information for false positive and negatives) to be published if the system is used for law enforcement purposes.</p> <p>Agencies are publishing their studies on the use of AI, such as recently done by Frontex<sup>60</sup>, the European Border and Coast Guard Agency. In addition, agencies such as the EU Agency for Law Enforcement Training (CEPOL) should play an important role in educating end-users across the law enforcement agencies in the Member States about the fundamental rights angles of the use of AI technologies in the context of law enforcement, drawing on the expertise of the EU Agency for Fundamental Rights, where relevant.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

<sup>60</sup> <https://frontex.europa.eu/media-centre/news/news-release/artificial-intelligence-based-capabilities-for-european-border-and-coast-guard-1Dczqe>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>34. Recalls that AI applications, including those used in the context of law enforcement and the judiciary, are being developed globally at a rapid pace; urges all European stakeholders, including the Member States and the Commission, to ensure, through international cooperation, the engagement of partners outside the EU in order to raise standards at international level and to find a common and complementary legal and ethical framework for the use of AI, in particular for law enforcement and the judiciary, that fully respects the Charter, the European data protection acquis and human rights more widely;</p>	<p>The proposed AI Act, once adopted, will provide a coordinated European approach for the placing on the market (point 34), putting into service and use of AI systems in the Union, including in the law enforcement area. This Act will constitute the first regional approach to such AI regulation, which offers the potential to influence comparable activities in other parts of the world, similar to what happened with the adoption of the GDPR, hence raising international standards. The Commission is closely involved in multilateral fora developing frameworks for trustworthy AI, in particular Council of Europe, the Organisation for Economic Cooperation and Development (OECD) and the United Nations Educational, Scientific and Cultural Organisation (UNESCO) and it pursues enhanced bilateral cooperation on AI with like-minded partners such as the US, Japan and Canada.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>The Commission <a href="#">aims to address</a> the risks generated by specific uses of AI through a set of complementary, proportionate and flexible rules. These rules will also provide Europe with a leading role in setting the global gold standard.</p>	
6)	<p>35. [...] calls on the Commission, furthermore, to consider whether specific legislative action on further specifying the criteria and conditions for the development, use and deployment of AI applications and solutions by law enforcement and judicial authorities is needed;</p>	<p>With the proposed AI Act, the Commission chose a horizontal approach to the regulation of AI, which includes AI systems developed, deployed and used in the fields of law enforcement and justice in order to ensure secure (point 35), trustworthy and human-centric AI systems that can be used in full respect of EU values and fundamental rights. That approach seems most appropriate since it reflects the nature of AI which is often operated across sectors and poses common challenges to fundamental rights due to</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request</p> <p>The Commission <a href="#">aims to address</a> the risks generated by specific uses of AI through a set of complementary, proportionate and flexible rules.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		specific characteristics of many AI systems, in particular opacity, complexity, data dependency, unpredictability and varying degrees of autonomy.		These rules will also provide Europe with a leading role in setting the global gold standard.	

#### 4.1.24. PECH

Between July 2019 and December 2021, the **Committee on Fisheries (PECH)** was responsible for seven 'ordinary' own-initiative reports (INI) and no legislative own-initiative reports (INL) leading to the adoption of seven Parliament's resolutions ('PECH resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

Table 29: Overview on PECH resolutions and its follow-up (July 2019 and December 2021)

Resolutions and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	7
Number of INI parliamentary procedures	7
Number of INL parliamentary procedures <sup>3</sup>	0
Number of Commission written follow-up documents to the INI resolutions	4
Number of INI procedures to which the Commission did not send the written response <sup>4</sup>	3
Number of INI procedures to which the Commission did not respond before the 31 January 2022 <sup>5</sup>	0

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent seven written replies to the Parliament’s seven PECH resolutions. In four cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other three replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. In total, the Commission submitted two general and two mixed replies. The Commission has not replied with written follow-up documents to 57 of Parliament's 112 requests.

### Analysis of the Commission actions

The Commission proposed/promised 16 genuine actions. In 23 cases, no further specific actions were proposed/promised to be taken by the Commission. In 17 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 16 actions proposed/promised by the Commission, the Commission already carried out the action in four cases. In the 12 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

#### 4.1.24.1. PECH Resolution 1: EP resolution of 21 January 2021 on more fish in the seas? Measures to promote stock recovery above the maximum sustainable yield (MSY), including fish recovery areas and marine protected areas

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>More fish in the seas? Measures to promote stock recovery above the maximum sustainable yield (MSY), including fish recovery areas and marine protected areas</b>	21/01/2021 <a href="#">T9-0017/2021</a> <a href="#">2019/2162(INI)</a> PECH	<a href="#">SP(2021)223</a>	Final reply (SP) received on 9 July 2021	General reply			
1)	3. Calls on the Commission and the Member States to strengthen scientific coverage with the objective that 100 % of the fish stocks exploited in European waters be assessed at the latest by 2025 and that the MSY can be calculated for all these stocks, where scientifically possible;	With regard to the MSY objective, much progress has been made in the northern European waters in the last decades, and progress has begun in the Mediterranean Basin although much more needs to be done. The Commission agrees that marine protected areas, and in particular strictly protected areas, should be expanded and data collection and monitoring should be improved, as should the protection of sensitive species and sensitive habitats.				No further/specific actions proposed/promised to be taken by the Commission.	
2)	5. Calls on the Commission make its TAC proposals [...], as provided for in the CFP Regulation;	No specific reply is provided to this <b>particular point</b> (on TACs proposals).				Not mentioned.	
3)	7. Urges the Commission to strengthen the implementation of the ecosystem approach to fisheries management, including by increasingly applying multi-species approaches, in order to minimise the negative impacts of fishing activities and other factors such as climate change on marine ecosystems, fish populations and society and to ensure ocean resilience to climate change; reiterates that fully documented fisheries and quality data is key to improving fisheries management; calls on the Commission and the Member States to take the necessary steps in order to improve data collection on recreational fisheries, considering their environmental impact and socio-economic value;	The Commission agrees that marine protected areas, and in particular strictly protected areas, should be expanded and data collection and monitoring should be improved, as should the protection of sensitive species and sensitive habitats.  More such areas will benefit fishers as well as nature itself. The Commission will present an Action Plan to conserve fisheries resources and to protect marine ecosystems in 2021, as announced in the Biodiversity Strategy. This Action Plan, which is also intrinsically linked to the upcoming report on the implementation of the Technical Measures Regulation (Regulation (EU)				<a href="#">Action plan</a> planned for 2021 is not yet published by the Commission, a stakeholder <a href="#">consultation</a> was launched in October 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		2019/1241), will identify where action is required, such as, to address the by-catch of sensitive species and adverse impacts on seabed and on sensitive habitats, through strengthening technical measures, including area closures and local gear restrictions, gear changes (to minimize the effects of damaging gear on the seabed and on juveniles and spawning aggregations) and mitigation measures for sensitive species.			
4)	8. Calls on the Commission to continue to support plans to improve selectivity and survival of non-target species, and with a view to implementing an ecosystem approach to fisheries management, to establish which practices are harmful to stocks, ocean biodiversity and marine environments and to introduce measures to limit and change them;	The Commission will present an Action Plan to conserve fisheries resources and to protect marine ecosystems in 2021, as announced in the Biodiversity Strategy. This Action Plan, which is also intrinsically linked to the upcoming report on the implementation of the Technical Measures Regulation (Regulation (EU) 2019/1241), will identify where action is required, such as, to address the by-catch of sensitive species and adverse impacts on seabed and on sensitive habitats, through strengthening technical measures, including area closures and local gear restrictions, gear changes (to minimize the effects of damaging gear on the seabed and on juveniles and spawning aggregations) and mitigation measures for sensitive species.		<a href="#">Action plan</a> planned for 2021 is not yet published by the Commission, a stakeholder <a href="#">consultation</a> was launched in October 2021.	
5)	11. Calls on the Commission to support the harmonisation of the indicators under criterion (III.) for GES under the MSFD, with the aim of setting benchmarks and an assessment methodology that are common across all Member States;	No specific reply is provided to this particular point (on harmonisation of indicators).		Not mentioned.	
6)	12. Calls on the Commission to study the relevance of using indicators other than MSY in fisheries management that would take into account species interactions and socio-economic factors as well as the effects of climate change and pollution; notes that other indicators such as MEY are being studied and implemented by some countries;	With regard to moving to MEY the Commission considers this not compatible with the CFP objectives.		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	15. Calls on the Commission to ensure that Member States adopt data collection programmes that cover the impact of fishing activities on the wider environment, including on the bycatch of sensitive species, and on the seabed;	The Commission agrees that marine protected areas, and in particular strictly protected areas, should be expanded and data collection and monitoring should be improved, as should the protection of sensitive species and sensitive habitats.		No further/specific actions proposed/promised to be taken by the Commission.	
8)	21. Calls on the Commission to accompany any legislative proposal with impact assessments based on the best available scientific advice and in close coordination with local communities and authorities;	No specific reply is provided to this particular point (on legislative proposal with impact assessment).		Not mentioned.	
9)	22. Urges the Commission to adopt guidelines for the MPA targets to be implemented in each EU maritime region, in order to ensure balanced geographic distribution and ecological representativeness;	No specific reply is provided to this particular point (on adoption guidelines for the MPA targets).		Not mentioned.	
10)	25. Urges the Commission to set strong science-based MPA management guidelines for Member States and to establish a classification of MPAs taking into account their stage of establishment, management plans and ecosystemic benefits, drawing on existing guidelines such as the global standards of the IUCN;	No specific reply is provided to this particular point.		Not mentioned.	
11)	26. Insists that the Commission must accompany fisheries agreements with third countries with management and governance measures such as protected marine areas, thus making it possible to improve fish stock management and tackle the many cumulative effects of these agreements, such as pollution, illegal, unreported and unregulated (IUU) fishing and the development of some practices such as industrial fisheries that put the sustainability of some stocks at risk;	No specific reply is provided to this particular point (on accompanying fisheries agreements with third countries...).		Not mentioned.	
12)	34. Calls on the Commission and the Member States, in international negotiations on a treaty for the conservation and sustainable use of marine biodiversity in areas beyond national jurisdiction and in the	No specific reply is provided to this particular point.			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	framework of RFMOs, to champion an ambitious global mechanism to establish MPAs in the high seas or in areas beyond national jurisdiction, to take a proactive role, after an agreement on marine biological diversity beyond national jurisdiction has been found, in the creation of new effectively managed area-based management tools including MPAs in the high seas; recalls that the establishment of MPAs in areas beyond national jurisdiction must be supported by socio-economic and ecological impact assessments based on the best available scientific advice;			Not mentioned.	
13)	35. Calls on the Commission and the Member States to promote the idea that the ocean in its entirety provides humanity with ecosystem services, and that the ocean must therefore be recognised as a global commons in international negotiations under the auspices of the UN;	No specific reply is provided to this particular point (on promoting of the ocean as a global common).		Not mentioned.	
14)	39. Calls on the Commission to publish a study on the impact of those diverse sources of pollution on the rebuilding of fish stocks and on marine ecosystems;	No specific reply is provided to this particular point (on publishing a study on the impact of those diverse sources of pollution, on the rebuilding of fish stocks and on marine ecosystems).		Not mentioned.	
15)	40. Underlines the need to involve fishermen in the fight against pollution of the seas and oceans; calls on the Commission accordingly to urge Member States to adopt legislation authorising fishermen to bring to land any waste caught at sea; considers that these provisions should introduce a system of incentives for fishermen and for the use of appropriate collection systems;	No specific reply is provided to this particular point (on legislation regarding water of the sea).		Not mentioned.	
16)	42. Calls on the Commission to consider these requests and to respond to them in its new action plan to preserve fisheries resources and protect marine ecosystems, which it plans to present by 2021, and in	The Commission will present an Action Plan to conserve fisheries resources and to protect marine ecosystems in 2021, as announced in the Biodiversity Strategy. This Action Plan, which is also intrinsically linked to the upcoming report on the implementation			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	its revision of the CFP, as well as in all forthcoming legislative proposals;	of the Technical Measures Regulation (Regulation (EU) 2019/1241), will identify where action is required, such as, to address the by-catch of sensitive species and adverse impacts on seabed and on sensitive habitats, through strengthening technical measures, including area closures and local gear restrictions, gear changes (to minimize the effects of damaging gear on the seabed and on juveniles and spawning aggregations) and mitigation measures for sensitive species.		<a href="#">Action plan</a> planned for 2021 is not yet published by the Commission, a stakeholder <a href="#">consultation</a> was launched in October 2021.	

4.1.24.2. PECH Resolution 2: EP resolution of 20 March 2021 on Impact on fisheries of marine litter

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Impact on fisheries of marine litter</b>	20/03/2021 <a href="#">T9-0096/2021</a> <a href="#">2019/2160(INI)</a> <a href="#">PECH</a>	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	Mixed reply		
1)	2. [...]; calls on the Commission, in this context, to present implementing acts laying down eligibility criteria for a reduced charge for 'green ships' and to design appropriate incentives for the delivery of collected waste onshore, including a compensation mechanism tailored to fishers' efforts and methodological criteria for calculating the volume and quantity of passively caught waste, so that the marine waste reduction targets, as laid down in the directive, can be implemented quickly;	Regarding the collection of marine litter (points 2, 33 and 48), the Commission is currently preparing the delegated and implementing acts planned by Directive (EU) 2019/833 on port reception facilities <sup>7</sup> , including implementing acts for green waste management on board of ships and reporting/monitoring of passively fished waste, to be adopted in the third quarter 2021. The directive provides for a right of delivery without any additional charges in order to incentivise the delivery of passively fished waste. Furthermore, both the current and the future European Maritime, Fisheries and Aquaculture Fund (EMFAF) support the protection of the marine environment and promote the circular economy, including through the collection of marine litter and lost fishing gear and "fishing for litter" projects. In its assessment of the draft EMFAF programmes submitted by the Member States, the Commission will consequently take into account the contribution of the Member States to the protection and restoration of marine ecosystems and to the reduction of marine litter.			Draft <a href="#">delegated and implementing acts</a> available on EUR-lex.	
2)	6. Calls on the Commission to extend the Marine Strategy Framework Directive to the outermost regions;	No specific reply provided to this particular point.			Not mentioned.	

<sup>7</sup> Directive (EU) 2019/883 of the European Parliament and of the Council of 17 April 2019 on port reception facilities for the delivery of waste from ships, amending Directive 2010/65/EU and repealing Directive 2000/59/EC.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>8. Recalls that the issue of marine waste cannot be tackled effectively at national level alone but requires cooperation at all levels, including at global, European and regional level; calls on the Commission to champion an ambitious governance model in international UN negotiations on marine biodiversity beyond national jurisdictions and to recognise all seas and the ocean as a global common good, with a view to adopting a new approach that prioritises individual and collective responsibilities over the traditional principles of freedom and sovereign rights, as laid down in the Law of the Sea, and thus ensures that the sea is protected, including from the detrimental impact of marine litter;</p>	<p>On the international front (points 8,9, 10, 11, 19, 23, 52 and 54), the Commission continues to support activities carried out under the Global Partnership on Marine Litter. The Commission also continues to actively engage with a large number of third countries and relevant stakeholders in view of the resumed 5th session of the United Nations Environment Assembly, currently planned to take place in February 2022. In this Assembly, the Commission will work towards the adoption of a resolution establishing an intergovernmental negotiating committee and the launch of negotiations for a legally binding agreement aimed at tackling plastic pollution in the environment through circular approach to plastics. The Commission supported the development and adoption of the FAO (Food and Agriculture Organization) Voluntary Guidelines on the Marking of Fishing Gear<sup>8</sup>. These Voluntary Guidelines are comprehensive and include the retrieval of fishing gear and Fishing Aggregating Devices.</p> <p>The European Commission is already a recognised partner in the UN Decade of Ocean Science. Ongoing and planned Commission initiatives and programmes such as Horizon Europe will contribute to achieving the Decade's outcomes. The Commission also participates actively in the fight against marine litter in the Mediterranean, for example under the Barcelona Convention<sup>9</sup>. The Commission is committed to revising the rules on the export of waste and aims to table a legislative proposal to this end in 2021. One of its aims</p>		Ongoing follow-up actions by the Commission, including the 5th session of the United Nations Environment Assembly, currently planned to take place in February 2022 and the 17 November 2021 Commission <a href="#">proposal</a> for a new regulation on waste shipments.	

<sup>8</sup> [mofglarge.JPG \(563x797\) \(fao.org\)](#).

<sup>9</sup> Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>will be to make sure that the EU takes a greater responsibility for the management of its waste and does not export its waste challenges to third countries. The EU candidate countries have committed to gradually align their legislation with the EU environmental acquis. In bilateral co-operation meetings with the candidate countries within the framework of the Stabilisation and Association Agreements the Commission raises the need to respect environmental standards and to progress with the approximation to the EU waste management acquis, including the establishment of integrated waste management infrastructure.</p>			
4)	<p>10. Calls on the Commission and the Member States to lead efforts towards an ambitious, legally binding agreement on plastic pollution at the UN Environment Assembly covering the full lifecycle of plastics, including shared global objectives for the reduction of plastic pollution at sea and a vision for a transition to a safe, circular economy for plastics, as well as effective global governance of lost fishing gear, or 'ghost gear', which represents a threat to all marine activities and ecosystems worldwide;</p>	<p>On the international front (points 8, 9, 10, 11, 19, 23, 52 and 54), the Commission continues to support activities carried out under the Global Partnership on Marine Litter. The Commission also continues to actively engage with a large number of third countries and relevant stakeholders in view of the resumed 5th session of the United Nations Environment Assembly, currently planned to take place in February 2022. In this Assembly, the Commission will work towards the adoption of a resolution establishing an intergovernmental negotiating committee and the launch of negotiations for a legally binding agreement aimed at tackling plastic pollution in the environment through circular approach to plastics. The Commission supported the development and adoption of the FAO (Food and Agriculture Organization) Voluntary Guidelines on the Marking of Fishing Gear<sup>10</sup>. These Voluntary Guidelines are comprehensive and include the retrieval of fishing gear and Fishing Aggregating Devices.</p>		<p>Ongoing follow-up actions by the Commission, including the 5th session of the United Nations Environment Assembly, currently planned to take place in February 2022 and the 17 November 2017 Commission <a href="#">proposal</a> for a new regulation on waste shipments.</p>	

<sup>10</sup> [mofqlarge.JPG \(563x797\) \(fao.org\)](#).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	13. Calls on the Commission and the Member States to coordinate on the basis of a single timetable their work on laws such as the Marine Strategy Framework Directive, the directive on the reduction of the impact of certain plastic products on the environment, the directive on port reception facilities and the Maritime Spatial Planning Directive, with a view to making legislation in this area more consistent;	<p>The 2014 Maritime Spatial Planning (MSP) Directive<sup>11</sup> (points 7 and 13) establishes a framework for all the Member States aimed at promoting the sustainable growth of maritime economies, the sustainable development of marine areas and the sustainable use of marine resources. Nevertheless, it is for the Member States to develop a vision of how they see the use of their seas, and to decide what marine space will be allocated to each activity at sea. Article 15(3) of the directive fixes 31 March 2021 as the deadline for the Member States to establish maritime spatial plans. Under Article 14(1) of the directive, Member States have of a maximum of three months following publication of the plans to send copies of them to the Commission and to any other Member States concerned. Hence, the Commission will only have a complete picture of the submitted plans by mid-2021. The Commission will then report to the Parliament and the Council on the implementation of the directive by 31 March 2022, pursuant to its Article 14(2). In its report, the Commission will address, among other issues, the contribution of maritime spatial plans to environmental protection and to the European Green Deal as a whole.</p> <p>In addition, maritime spatial plans should apply an ecosystem-based approach as referred to in Article 1(3) of Directive 2008/56/EC<sup>12</sup> -the Marine Strategy Framework Directive (MSFD) with the aim of ensuring that the collective pressure of all activities is kept within levels compatible with the achievement of good environmental status. The MSFD sets a specific descriptor (Descriptor 10) to ensure that "properties and</p>		Ongoing follow-up actions by the Commission with reports to the Parliament, scheduled for 2022.	

<sup>11</sup> Directive 2014/89/EU of the European Parliament and of the Council of 23 July 2014 establishing a framework for maritime spatial planning.

<sup>12</sup> Directive 2008/56/EC of the European Parliament and of the Council of 17 June 2008 establishing a framework for community action in the field of marine environmental policy.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>quantities of marine litter do not cause harm to the coastal and marine environment". The spatial dimension of all descriptors will be analysed within the framework of the MSFD review, which started in 2021.</p> <p>The Commission encourages a coordinated approach between those environmental directives with a strong spatial component. The Maritime Spatial Planning Directive leaves enough room to the Member States to align their timetable to other related directives, as it only requires them to review their plans whenever needed and at least every 10 years. In addition, the Commission will report every four years after 2022 on the implementation of the directive (Article 14(2)) and will look at the interactions between spatial plans and environmental legislation. With the idea to support the Member States in the integration of environmental aspects in their maritime spatial plans, the Commission launched a study on the ecosystem-based approach in MSP in 2019<sup>13</sup>. The study will lead to the publication of a guidance on the ecosystem-based approach and will notably advise Member States on how to better integrate the data and monitoring tools from the implementation of the directives cited above in their maritime spatial plans.</p> <p>Taking into account land-sea interactions is also a requirement of the MSP Directive, which involves looking at pollution from the land and how to better articulate land/ coastal planning and maritime planning in order to limit it. The Commission will, in the context of the review of the MSFD, look into improving the links with other legislation and examine the possibility to extend this directive to outermost regions (point 6). The</p>		<p><a href="#">Study integrating ecosystem based approach maritime spatial planning.</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		MSFD monitoring guidelines are currently updated and will focus on the items covered by the Single-Use Plastic Directive, in particular products found on the beaches.			
6)	14. Calls on the Commission to increase the collection of data on the amount and type of litter in European waters and its effect on fishing, and also to increase the collection and harmonisation of data on the amount, quantity and quality of marine waste landed, disposed of and delivered for recycling, notably through the 'Fishing for Litter' (FFL) programme, including the volume, materials and types of item caught	For monitoring and data collection (point 14), the Technical Group on Litter, in close cooperation with the European Marine Observation and Data Network (EMODnet), is updating monitoring guidelines and baselines for litter quantities in coastlines, sea bed and water column, for all types of litter, including microplastics; for beach litter this work is completed. Monitoring and assessment of litter quantities and impacts, including its spatial distribution (i.e. identification of hot spots of lost or abandoned fishing gear) as required by the MSFD is the first necessary step for elucidating litter effects on fishing. Furthermore, the adoption of the Commission Implementing Act on reporting of fishing gear placed on the market and waste fishing gear containing plastic (under the Single-Use plastics directive) is imminent. This implementing act will provide for harmonised reporting throughout the EU Member States. This will result in compatible data regarding fishing gear, better information on the scale of the marine litter problem and more efficient and effective future actions when revising the Single-Use plastics Directive in 2027. The first reporting period is the year of 2022 (the first reports by the Member States have to be submitted to the Commission by 1 July 2024). Based on the Single-Use plastics Directive, the Commission shall review the quality of the data and information reported and their collection method in view of having it improved.		Ongoing follow-up actions by the Commission with 2022 as first reporting period.	
7)	15. [...] urges the Commission to draw up an annual report on the amount of marine waste landed in ports	No specific reply provided for this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	through the FFL programme, including the volume, materials and types of item caught;				
8)	19. Calls on all other relevant stakeholders, namely the fisheries Advisory Councils, to support the reduction of marine waste through effective and efficient measures; calls on the Commission and the Member States to adopt the UN Food and Agriculture Organization's Voluntary Guidelines for the Marking of Fishing Gear to promote responsible fishing gear management, improve efforts to identify lost gear and support the sustainability of fisheries through the reduction of ALDFG, also in line with the provisions of the Fisheries Control Regulation; calls on the Commission to support efforts to operationalise the marking and reporting of lost fishing gear in European waters and, through efforts at the International Maritime Organization, boost international cooperation with a view to tackling this source of marine plastic pollution;	The Commission supported the development and adoption of the FAO (Food and Agriculture Organization) Voluntary Guidelines on the Marking of Fishing Gear <sup>14</sup> . These Voluntary Guidelines are comprehensive and include the retrieval of fishing gear and Fishing Aggregating Devices.		<a href="#">Voluntary Guidelines on the Marking of Fishing Gear, 2019.</a>	
9)	22. Calls on the Commission and the Member States to better implement the 'polluter pays' principle;	No specific reply provided for this particular point (on polluter pays).		Not mentioned.	
10)	23. Urges the Commission to play a major role in the UN's Decade of Ocean Science and to support digitalisation and the use of artificial intelligence with a view to improving our understanding of the seas and the ocean and the impact of marine litter on them;	The European Commission is already a recognised partner in the UN Decade of Ocean Science. Ongoing and planned Commission initiatives and programmes such as Horizon Europe will contribute to achieving the Decade's outcomes.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
11)	24. Stresses that the shortage of available data and studies makes it difficult to quantify the exact extent to which damage caused by marine litter is affecting the fisheries sector and its negative economic	Regarding more research and its financing (points 24 and 26), harmonised data on beach litter for all EU coastal countries, made available through EMODnet, provides the baseline for the Marine Strategy		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

<sup>14</sup> [mofqlarge.JPG \(563x797\) \(fao.org\).](#)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>consequences for fishers; calls, therefore, on the Commission and the Member States to step up research finance and data collection on the amount and various types of litter in European waters and its impact on fisheries, aquaculture and ecosystems and to propose robust measures to address and prevent the impact of nano- and microplastics on both fishery resources and human health;</p>	<p>Framework Directive assessment of environmental status. Work is ongoing to do the same for floating, seafloor litter and microplastics. The Scientific Advice Mechanism (SAM) and corresponding reports from the Science Advice for Policy by European Academies (SAPEA) on microplastic pollution and on the biodegradability of plastics point to the fact that although knowledge is growing, some evidence remains uncertain and it is by its nature complex. There are a number of ongoing projects under Horizon 2020 addressing the issue of plastic pollution, including marine aspects and including understanding exposures to micro- and nanoplastics and impacts on human health. Horizon Europe will provide further research opportunities for building on the results of these projects with the view of addressing knowledge gaps.</p> <p>Very concretely, the Commission manages many projects supporting data collection and litter monitoring in the EU and in its neighbourhood (e.g. INDICIT (Implementation Of Indicators Of Marine Litter On Sea Turtles And Biota In Regional Sea Conventions And Marine Strategy Framework Directive Areas), several LIFE projects, projects supporting under regional plans against litter in the Mediterranean, the North East Atlantic, the Baltic and the Black Sea). The Blue Economy call 2017 resulted in 5 projects on marine litter with the aim to develop new technologies and monitoring approaches. Following the recommendations by Mission Starfish, the European Commission is preparing an implementation plan for the future Horizon Europe Mission on Ocean, Seas and Waters. The relevant actions will complement the measures under the Zero Pollution Action Plan. For measures on fishing gear, the Horizon Europe framework programme is expected to support</p>		<p>request (<a href="#">Horizon 2020, Scientific Advice Mechanism, Science Advice for Policy by European Academies (SAPEA)</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		technological solutions improving the marking of fishing gear.			
12)	25. Points out that the directive on single-use plastics concerns waste commonly found on beaches; urges the Commission to step up existing measures on single-use plastics, drawing, in particular, on work to be done on waste in the water column and on the seabed as part of the Marine Strategy Framework Directive, and to consider phasing out expanded polystyrene containers and packaging from fishery products in line with the ambition of replacing single-use plastics with durable alternatives for the environment and fishers;	Concerning single-use plastics (point 25), the Commission is committed to carry out an evaluation of the Single-Use Plastic Directive <sup>15</sup> by 3 July 2027 in accordance with Article 15 of that directive. A report will be submitted to the European Parliament, the Council and the European Economic and Social Committee. The need for a legislative proposal setting binding quantitative consumption reduction targets and binding collection rates for waste fishing gear, will also be assessed in that context. The report will also include: (a) an assessment of the need to review the Annex listing single-use plastic products, including as regards caps and lids made of plastic which are used for glass and metal beverage containers; (b) a study of the feasibility of establishing binding collection rates for waste fishing gear and binding quantitative Union targets for the consumption reduction of, in particular, single-use plastic products listed in Part A of the Annex of the directive, taking into account consumption levels and already achieved reductions in the Member States; (c) an assessment of the change in materials used in the single-use plastic products covered by this directive as well as of new consumption patterns and business models based on re-usable alternatives; this shall, wherever possible, include an overall life cycle analysis to assess the environmental impact of such products and their alternatives.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (an evaluation of the <a href="#">Single-Use Plastic Directive</a> ).	
	26. Calls on the Commission to act on the recommendations issued by Mission Starfish 2030 on	For measures on fishing gear, the Horizon Europe framework programme is expected to support		No further/specific actions proposed/promised to be taken by the Commission on this particular point as	

<sup>15</sup> Directive (EU) 2019/904 of the European Parliament and of the Council of 5 June 2019 on the reduction of the impact of certain plastic products on the environment.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	tackling marine waste, and in particular to assess the proposal for the marking of fishing gear using new geolocation technologies in order to help locate and collect lost gear, where relevant and possible; highlights, in this regard, that the Commission should improve the marking of fishing gear following the Food and Agriculture Organization's Voluntary Guidelines for the Marking of Fishing Gear and making sure that fishers and aquaculturists are accompanied in the transition by appropriate funding programmes;	technological solutions improving the marking of fishing gear.		according to the Commission, it has been already working on action falling under the scope of the EP request (an evaluation of the <a href="#">Single-Use Plastic Directive</a> ).	
13)	32. [...]; urges the Commission, therefore, to organise future projects for the circular economy for fishing gear in relation to existing EU funding programmes for research and innovation;	For measures on fishing gear, the Horizon Europe framework programme is expected to support technological solutions improving the marking of fishing gear.		Horizon Europe has already had one <a href="#">call for proposals</a> on the topic in 2021.	
14)	33. [...]; calls on the Commission to follow up on whether these national plans result in an increase in the collection and recycling of fishing gear in comparison with today's levels, and, in this regard, to draw up an appropriate and ambitious plan to support the development of a circular economy in the fisheries sector;	Regarding the collection of marine litter (points 2, 33 and 48), the Commission is currently preparing the delegated and implementing acts planned by Directive (EU) 2019/833 on port reception facilities <sup>16</sup> , including implementing acts for green waste management on board of ships and reporting/monitoring of passively fished waste, to be adopted in the third quarter 2021. The directive provides for a right of delivery without any additional charges in order to incentivise the delivery of passively fished waste. Furthermore, both the current and the future European Maritime, Fisheries and Aquaculture Fund (EMFAF) support the protection of the marine environment and promote the circular economy, including through the collection of marine litter and lost fishing gear and "fishing for litter"		Draft <a href="#">delegated and implementing acts</a> available on EUR-lex.	

<sup>16</sup> Directive (EU) 2019/883 of the European Parliament and of the Council of 17 April 2019 on port reception facilities for the delivery of waste from ships, amending Directive 2010/65/EU and repealing Directive 2000/59/EC.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>projects. In its assessment of the draft EMFAF programmes submitted by the Member States, the Commission will consequently take into account the contribution of the Member States to the protection and restoration of marine ecosystems and to the reduction of marine litter.</p>			
15)	<p>35. Urges the Commission to create incentives for the circular economy along the entire production chain for fishing and aquaculture gear by promoting research and supporting businesses that recycle and reuse gear; calls on the Commission, therefore, to create a specific fund to support Member States that establish production chains for recycled and environmentally friendly gear, using resources such as those under the NextGenerationEU instrument and from tax penalties imposed following infringement proceedings against Member States;</p>	<p>Concerning incentives under the <u>circular economy</u> (point 35), the Single Use Plastics Directive promotes circular approaches that give priority to sustainable and non-toxic re-usable products and re-use systems rather than to single-use products. It also provides, among other, for the Commission to request the European standardisation organisations to develop harmonised standards relating to the circular design of fishing gear to encourage preparing for re-use and facilitate recyclability at end of life. The Commission requested this standard on 10 February 2021. The same directive obliges the Member States to establish in their territories extended producer responsibility schemes. These schemes have to cover for the costs of the separate collection of waste fishing gear containing plastic that has been delivered to adequate port reception facilities, as provided for by the Port Reception Facilities Directive (see above), the costs of its subsequent transport and treatment and the costs of awareness raising measures. Furthermore, the Member States with marine waters have to set annual collection rates of waste fishing gear. They have to establish extended producer responsibility schemes and set annual collection rates of waste fishing gear containing plastic by 31 December 2024 at the latest. The EU provides financing for initiatives towards circular economy through InvestEU, Horizon Europe and the European Maritime, Fisheries and Aquaculture Fund.</p>		<p>Commission implementing decision <a href="#">C(2021)739</a> of 10 February 2021 on a standardization request to the European Committee for Standardisation as regards circular design of fishing gear in support of Directive (EU) 2019/904.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	38. Calls on the Commission to draw up an EU-level action plan to combat littering in the Union's hydrosphere by reducing waste at its source, cutting down on plastic use and consumption, and tackling the pollution of rivers, water courses and coastlines due to littering, which can be drastically reduced in a coordinated manner;	The Commission points to the numerous measures taken under existing EU legislation, in particular Directive 2008/98/EC on waste (as amended by Directive 2018/851/EC) <sup>17</sup> , when it comes to reducing waste at its source (points 38 and 53). The obligations on the development of waste prevention programmes and waste management plans under this directive also apply to the outermost regions. Existing Union funding opportunities for waste management are also available to these regions. In addition, the Water Framework Directive (Directive 2000/60/EC) <sup>18</sup> requires the Member States to ensure that all surface water bodies are brought into good surface water body status. Where litter is found to be a pressure on water quality, the Member States are held to take appropriate measures to ensure water quality is not deteriorating and, where applicable, is brought into good status within the timelines set by the directive.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Water Framework Directive - <a href="#">Directive 2000/60/EC</a> ) <sup>19</sup> .	
17)	41. Calls on the Commission to increase the awareness of maritime operators in all their potential interactions with the marine environment, in particular during the sale or leasing of ships;	On awareness raising (points 41 and 56), the Commission, working together with the Member States, is actively promoting environmental regulations and awareness through its involvement in the work of the International Maritime Organisation, which has adopted a wide range of internationally accepted measures to prevent and control pollution caused by ships and to mitigate the effects of any damage that may occur as a result of maritime operations and accidents. Since 2017, the Commission coordinates the coalition "World aquariums against plastic pollution" together with UN Environment Programme, involving more than 200		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">World aquariums against plastic pollution" together with UN Environment Programme</a> ).

		<p>aquariums worldwide. Also implemented since 2017, the "EU beach clean ups" are organised every year with EU representations and delegations, Member States' embassies and UN staff worldwide. In 2018-2019, the Commission organised the "Ready to change" campaign focusing on single-use plastics. The Commission also helps the promotion of many initiatives, such as the European Week for Waste Reduction and the World Clean-up Day.</p>			
18)	<p>48. Calls on the Commission and the Member States, therefore, to support the collection at sea by fishers of lost fishing gear or other marine waste, particularly plastics, by promoting best practices, incentivising voluntary participation in initiatives for the collection of sea litter and supporting the adoption of FFL programmes;</p>	<p>Regarding the collection of marine litter (points 2, 33 and 48), the Commission is currently preparing the delegated and implementing acts planned by Directive (EU) 2019/833 on port reception facilities<sup>20</sup>, including implementing acts for green waste management on board of ships and reporting/monitoring of passively fished waste, to be adopted in the third quarter 2021. The directive provides for a right of delivery without any additional charges in order to incentivise the delivery of passively fished waste. Furthermore, both the current and the future European Maritime, Fisheries and Aquaculture Fund (EMFAF) support the protection of the marine environment and promote the circular economy, including through the collection of marine litter and lost fishing gear and "fishing for litter" projects. In its assessment of the draft EMFAF programmes submitted by the Member States, the Commission will consequently take into account the contribution of the Member States to the protection and restoration of marine ecosystems and to the reduction of marine litter.</p>		<p>Draft <a href="#">delegated and implementing acts</a> available on EUR-lex.</p>	

<sup>20</sup> Directive (EU) 2019/883 of the European Parliament and of the Council of 17 April 2019 on port reception facilities for the delivery of waste from ships, amending Directive 2010/65/EU and repealing Directive 2000/59/EC.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	49. Calls on the Commission to conduct an assessment of the social and economic contribution of fishers through FFL projects, with a view to quantifying more accurately the contribution of the fisheries sector to action for cleaner seas;	No specific reply provided for this particular point.		Not mentioned.	
20)	50. Urges the Commission to go beyond the aims of Directive (EU) 2019/883, studying and quantifying in economic terms the environmental damage caused by man-made marine waste and setting up a 'Marine Litter Fund' to combat discharge of waste into the sea, mitigate damage to fisheries, and protect the seas and the ocean;	No specific reply provided for this particular point.		Not mentioned.	
21)	51. Calls on the Commission to urge the Member States to ensure proper management and adequate disposal of waste accidentally caught or collected during voluntary campaigns, so that responsibility for and the cost of delivery, management and disposal of such waste are not borne by fishers, and to avoid further damage to the environment;	No specific reply provided for this particular point.		Not mentioned.	
22)	52. [...] urges the Commission and the Member States to launch a plan for ridding the Mediterranean of pollution together with all the countries bordering the sea;	The Commission also participates actively in the fight against marine litter in the Mediterranean, for example under the Barcelona Convention <sup>21</sup> . The Commission is committed to revising the rules on the export of waste and aims to table a legislative proposal to this end in 2021. One of its aims will be to make sure that the EU takes a greater responsibility for the management of its waste and does not export its waste challenges to third countries. The EU candidate countries have committed to gradually align their legislation with the EU		On 17 November 2021, the Commission presented its <a href="#">proposal</a> for a new regulation on waste shipments.	

<sup>21</sup> Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	calls on the Commission to put an end to the export of waste to third countries, as soon as possible;	environmental acquis. In bilateral co-operation meetings with the candidate countries within the framework of the Stabilisation and Association Agreements the Commission raises the need to respect environmental standards and to progress with the approximation to the EU waste management acquis, including the establishment of integrated waste management infrastructure.			
23)	53. Calls on the Commission to create a support mechanism for the collection of marine litter in the outermost regions, given the natural vulnerability of these regions, thereby providing them with infrastructure for their cycling of collected waste;	The Commission points to the numerous measures taken under existing EU legislation, in particular Directive 2008/98/EC on waste (as amended by Directive 2018/851/EC) <sup>22</sup> , when it comes to <u>reducing waste at its source</u> (points 38 and 53). The obligations on the development of waste prevention programmes and waste management plans under this directive also apply to the outermost regions. Existing Union funding opportunities for waste management are also available to these regions.		No further/specific actions proposed/promised to be taken by the Commission.	
24)	54. Calls on the Commission, in the EU accession negotiations, to demand full implementation of waste management legislation in candidate countries, including through the establishment of integrated waste management infrastructure;	The EU candidate countries have committed to gradually align their legislation with the EU environmental acquis. In bilateral co-operation meetings with the candidate countries within the framework of the Stabilisation and Association Agreements the Commission raises the need to respect environmental standards and to progress with the approximation to the EU waste management acquis, including the establishment of integrated waste management infrastructure.		No further/specific actions proposed/promised to be taken by the Commission.	
25)	56. Calls on the Commission and the Member States to promote campaigns to raise awareness of the issue of marine pollution caused by plastics and	On awareness raising (points 41 and 56), the Commission, working together with the Member States, is actively promoting environmental regulations and		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

<sup>22</sup> Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives.

	microplastics, underlining the fact that fishers are also often affected by this phenomenon, especially in the case of microplastics;	awareness through its involvement in the work of the International Maritime Organisation, which has adopted a wide range of internationally accepted measures to prevent and control pollution caused by ships and to mitigate the effects of any damage that may occur as a result of maritime operations and accidents. Since 2017, the Commission coordinates the coalition "World aquariums against plastic pollution" together with UN Environment Programme, involving more than 200 aquariums worldwide. Also implemented since 2017, the "EU beach clean ups" are organised every year with EU representations and delegations, Member States' embassies and UN staff worldwide. In 2018-2019, the Commission organised the "Ready to change" campaign focusing on single-use plastics. The Commission also helps the promotion of many initiatives, such as the European Week for Waste Reduction and the World Clean-up Day.		working on action falling under the scope of the EP request ( <a href="#">World aquariums against plastic pollution, EUBeachCleanup 2021</a> ).	
26)	57. Welcomes the preparatory work done by the European Chemicals Agency (ECHA) on restrictions on microplastics intentionally added to products; calls on the Commission to be ambitious in following up this proposal with concrete and, where appropriate, legal measures, including by exploring the problem of the spread of nano- and microplastics in the water cycle, particularly those released into the environment unintentionally, and to propose measures for them to be phased out;	No specific reply provided for this particular point.		Not mentioned.	
27)	58. Calls on the Commission to tackle the problem of the loss and spread of microplastics, such as plastic pellets, in the environment throughout the supply chain, especially during land and sea transport, and the associated risks of spillage;	Regarding further spread of micro-plastics (point 58) the Commission will take action to reduce the releases of these microplastics in particular from tyres, pellets and textiles under the Plastics Strategy and the new Circular Economy Action Plan. Taking into account recent accidents resulting in plastic pellets and other litter spills and in view of the Action plan against plastic litter		Actions to be followed up within the Plastics Strategy and the new Circular Economy Action Plan. Public consultation on <a href="#">Microplastics pollution – measures to reduce its impact on the environment</a> , open 30 November 2021 - 18 January 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		of the International Maritime Organisation, the Commission considers that accidental containers' losses deserve closer monitoring and probably additional initiatives in order to combat resulting pollution. Microplastics intentionally used in products will be restricted under the Chemicals Legislation (REACH).			

## 4.1.24.3. PECH Resolution 3: EP resolution of 18 May 2021 on securing the objectives of the landing obligation under Article 15 of the Common Fisheries Policy

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Securing the objectives of the landing obligation under Article 15 of the Common Fisheries Policy	18/05/2021 <a href="#">T9-227/2021</a> <a href="#">2019/2177(INI)</a> PECH	On 10 November 2021, the Parliament received " <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – May 2021 part-session" informing that Commissioner Nicolas Schmit, on behalf of Commissioner Virginijus Sinkevičius, addressed the key elements of the resolution during the short presentation at the European Parliament's plenary session on 17 May. As the Commission stated in plenary, the landing obligation will be taken into account in the Commission's report on the functioning of the Common Fisheries (CFP) Policy to be presented in 2022, as it is a cornerstone of the CFP for achieving sustainable fisheries. The observations contained in Parliament's resolution are very timely and relevant in that regard.  The <a href="#">plenary debate</a> took place on 17 May 2021.			
1)	13. Recalls that the landing obligation is not a goal in itself but a tool to drive improvements in fishing and operational behaviour, incentivise the development and usage of more selective gears to minimise unwanted catches, and improve catch documentation for a better understanding and scientific assessment of fish stocks; notes that many fishers do not concur with the link between the objectives of the landing obligation and its implementation, which tends to hamper compliance; recognises that while pursuing this ultimate objective requires time and sufficient knowledge, greater efforts are needed to promote a common understanding of it and to put into practice the results of the studies carried out by scientists and fishers to improve selectivity and reduce unwanted catches; calls on the Commission to continue to support				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	plans to improve selectivity, including where appropriate by using incentives for the uptake of more selective gear;				
2)	15. Notes that discard levels vary heavily from fisheries to sea basins, leading to the perception that the 'one rule fits all' approach may not be the optimal strategy to encourage fishers to become more selective; calls on the Commission to identify the main shortcomings and to propose adapted and tailor-made solutions for specific fisheries for each sea basin, paying particular attention to small-scale artisanal fishing, especially in the outermost regions;				
3)	18. Stresses that efficient fisheries management systems, including being able to use all elements to properly implement the landing obligation and achieve the objectives of the CFP, need to be supported by accurate and reliable catch documentation and scientific data; calls on the Commission and the Member States to step up efforts to fully implement applicable EU legislation if needed and to take further action to ensure full documentation and data collection, in a manner proportionate to their fishing capacity for the small-scale coastal fleet;				
4)	24. Calls on the Commission, within the framework of the evaluation report on the implementation of the CFP due in 2022 to, in particular:  (a) assess the extent to which the reduction of discards under the landing obligation has been achieved and whether it has contributed to improving the status of stocks (MSY) and to reducing the impact on the marine ecosystem;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>(b) assess the socioeconomic impact of the landing obligation, the remuneration system, the number of crew members and the safety and working conditions on board, in line with FAO and ILO recommendations;</p> <p>(c) identify and monitor fisheries where scientific evidence indicates that increases in selectivity are currently difficult to achieve;</p> <p>(d) assess the effectiveness and applicability of the recently adopted quota pools for by-catch as an efficient and applicable tool to counter choke species situations;</p> <p>(e) assess the impact on the sustainability of the species removed by the Council from the list of stocks subject to TACs in recent years and evaluate the potential consequences of its reintroduction under the TAC system;</p> <p>(f) identify and remove the administrative difficulties encountered in developing and implementing selectivity pilot projects, which are hampering fishers' efforts to be more selective;</p> <p>(g) identify commercial and/or charitable opportunities in an effort to have the best possible usage of those unavoidable landed catches below minimum conservation reference sizes and unwanted catches, in order to avoid waste of natural resources, as well as avoiding jeopardising the sustainability objectives of the CFP;</p> <p>(h) assess whether the current landing obligation policy is fit for purpose and evaluate the feasibility of adapting the landing obligation on a case-by-case basis by fishery and/or stock;</p> <p>(i) assess pathways for better adaptation and simplification of Article 15 of the CFP to facilitate its implementation and understanding by all stakeholders</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and in particular the use by Member States of the overall available tools provided by the legal framework in place to improve selectivity and reduce unwanted catches;				
5)	25. Calls on the Commission to submit, based on this evaluation and if appropriate, a legislative proposal in order to better achieve the objectives of reducing discards and improving stocks;				

## 4.1.24.4. PECH Resolution 4: EP resolution of 24 June 2021 on challenges and opportunities for the fishing sector in the Black Sea

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
Challenges and opportunities for the fishing sector in the Black Sea		24/06/2021 <a href="#">T9-0307/2021</a> <a href="#">2019/2159(INI)</a> PECH	<a href="#">SP(2021)581</a> -	Final reply SP received 29 September 2021	General reply		
1)	2. Points out that the Sofia Ministerial Declaration of 7 June 2018 already emphasised the need for a collaborative approach to fishing-related issues in the Black Sea, such as the sustainability of marine resources, improving data collection and tackling IUU fishing; calls on the Commission to publish a report on the implementation of the Sofia Ministerial Declaration;		[...] Fisheries sustainability and sustainable development of aquaculture through enhanced cooperation among the Black Sea countries is a fundamental element of this new fisheries governance. The GFCM will organise a dedicated Conference for the Black Sea in 2022. The implementation of the Sofia Ministerial declaration, by all contracting parties, will be assessed on that occasion (point 2).			The action <a href="#">planned</a> to be achieved in 2022 at the occasion of the organisation of the Conference for the Black Sea in 2022.	
2)	57. Calls on the Commission and the competent authorities in Bulgaria and Romania to provide funding for research on the state of the Black Sea shads ( <i>Alosa spp.</i> ) currently listed in Annex V of the Habitats Directive, including scientific and socio-economic analyses assessing the need to move it to Annex II or even Annex I of the directive, if the necessary criteria are met;		Regarding the funding for research on the state of Black Sea shad (point 57), the Commission notes the possibility for the Member States to promote actions under the EMFF improving marine data and knowledge, data collection and data management systems (including the implementation of pilot studies to improve existing data collection and data management systems).			No further/specific actions proposed/promised to be taken by the Commission.	
3)	58. Calls on the Commission to urgently consider transferring the sturgeon, which is currently listed in Annex V of the Habitats Directive to Annex II or even Annex I;		With regard to the protection status of Sturgeon species under the Habitats Directive (point 58), in light of the conclusions of the fitness check evaluation of the Nature Directives, the Commission does not have any plans to propose amendments of the Habitats Directive, including its annexes. The current listing of some Sturgeon species under Annex V of the directive already requires Member States to ensure that they achieve favourable conservation status and to monitor progress			No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		towards attaining this objective. The Commission works closely with the Member States on Sturgeon conservation and EU funds have supported several related projects. An ongoing pilot project assesses technical solutions for making the Iron Gates dams on the border between Romania and Serbia passable to sturgeon species in order to open a migration route to the Middle Danube Basin.			
4)	59. Calls on the Commission to explore whether a multi-annual management plan similar to those in place in other sea basins could be introduced for the Black Sea;	Fisheries management and conservation of marine resources has been strengthened with multiannual management plans (i.e. GFCM turbot multiannual management plan <sup>23</sup> ). Interactions between fisheries and the marine environment and protection of vulnerable species are key elements for the work towards shaping future measures. Despite the good progress made, more efforts are needed. To this end, the EU is working on further measures. For example, it is driving the GFCM work on new multiannual management plans and conservation measures, on interaction between fisheries and the environment and climatic effects, and on the protection of vulnerable species and bycatches. Within the EU, an autonomous quotas system was applied since 2008 to the key commercial stocks of turbot and sprat. For the latter, it is still applied while for turbot a regional TAC and quotas regime has been set at the GFCM level and is annually transposed in the EU fishing opportunities Regulation.		No further/specific actions proposed/promised to be taken by the Commission.	
5)	61. Calls on the Commission to assess the state of play with regard to the implementation of the common fisheries policy in the Black Sea, paying	The Commission notes that it works actively with the relevant Members States on the fulfilment of the CFP objectives in the Black Sea (point 61). In addition, the		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

<sup>23</sup> Recommendation GFCM/41/2017/4 on a multiannual management plan for turbot fisheries in the Black Sea (geographical subarea 29) and Recommendation GFCM/43/2019/3 amending Recommendation GFCM/41/2017/4 on a multiannual management plan for turbot fisheries in the Black Sea (geographical subarea 29).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	particular attention to how coastal Member States used the 2014-2020 EMFF to ensure that stocks were managed sustainably and that biodiversity was improved;	Commission has engaged in a successful strategy to address fisheries conservation issues at international level in this area, through work under the GFCM. The Commission also notes that EMFF 2014 – 2020 funds are used from both Black Sea Member States to improve their fisheries management and support CFP implementation.		working on action falling under the scope of the EP request ( <a href="#">CFP for Black Sea</a> ).	

4.1.24.5. PECH Resolution 5: EP resolution of 7 July 2021 on the impact on the fishing sector of offshore windfarms and other renewable energy systems

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>The impact on the fishing sector of offshore windfarms and other renewable energy systems</b>	7/07/2021 <a href="#">T9-0338/2021</a> <a href="#">2019/2158(INI)</a> PECH	<a href="#">SP(2021)598</a>	Final reply (SP) received 8 November 2021	Mixed reply			
1)	8. Stresses that floating wind farms have the potential to be developed in deep water areas, which expands the viable zone for wind energy development while reducing its visibility from shore; calls, therefore, on the Commission and the Member States to support the upscaling and commercialisation of sustainable floating offshore wind technology that further reduces the impact on fisheries;	Regarding the need to upscale and commercialise sustainable floating offshore wind technology (point 8), it is already emphasised in the above-mentioned Commission Communication of 19 November 2020, especially for EU countries and regions with deeper seas in the Atlantic, the Mediterranean and the Black Sea. The Commission committed to continue its support to the development of new wind, ocean energy and solar floating technology designs, notably through its Horizon Europe programme <sup>24</sup> . For the years 2021-2022, EUR 60 million were allocated to research on floating wind, on top of the more than EUR 78 million already granted via the FP7 and H2020 funding programmes since 2009. The new Innovation Fund and the European Investment Bank also provides some specific opportunities for the development of floating offshore renewables.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Horizon Europe programme</a> ).	
2)	31. Stresses that outermost regions' and islands' energy mixes are highly dependent on fossil fuel imports, despite their local characteristics which are conducive to the development of renewables; calls, therefore, on the Commission and the Member States to pay special attention and dedicate specific funding to the	On the call to support specifically outermost territories and islands (point 31), the Commission is already considering the special needs and threats that those regions are facing. In particular, these are acknowledged in all European Green Deal strategies, notably in the EU Strategy to harness the potential of				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP

		<p>marine resources. Nevertheless, it is for Member States to develop a vision of how they see the use of their seas, and to decide what marine space will be allocated to each activity at sea. Article 15(3) of the MSPD fixed 31 March 2021 as the maximum deadline for Member States to establish maritime spatial plans. Under Article 14(1) of the MSPD, Member States have a maximum of three months following publication of the plans to send copies of them to the Commission and to any other Member States concerned. The Commission services have started to analyse the plans submitted by mid-2021. The Commission will then report to the Parliament and the Council on the implementation of the Directive by 31 March 2022, pursuant to Article 14(2) of the MSPD. In its report, the Commission will address, among other issues, the contribution of maritime spatial plans to environmental protection and to the European Green Deal as a whole. The fair consultation and inclusion of all sectors, notably fisheries, will also be analysed in this report. In addition, maritime spatial plans should apply an ecosystem-based approach as referred to in Article 1(3) of Directive 2008/56/EC - the Marine Strategy Framework Directive (MSFD), with the aim of ensuring that the collective pressure of all activities is kept within levels compatible with the achievement of good environmental status.</p>		<p><a href="#">Network (EMODnet), Strategic Environmental Assessment North Sea Energy</a>.</p>	

4.1.24.6. PECH Resolution 6: EP resolution of 16 September 2021 on fishers for the future

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Fishers for the future	16/09/2021 <a href="#">T9-0386/2021</a> <a href="#">2019/2161(INI)</a> PECH	On 3 November 2021, the Parliament received " <a href="#">Replies</a> " of the Commission to positions and resolutions adopted by the European Parliament – September 2021 part-session " informing that the Commission will not be responding formally to the requests addressed in the resolution as all relevant points were addressed in plenary by Commissioner Nicolas Schmit on behalf of Commissioner Virginijus Sinkevičius.  The <a href="#">plenary debate</a> took place on 13 September 2021.			
1)	5. Urges the Commission, particularly Eurostat, and the Member States, to take account of employment trends, not only in relation to the total number of jobs, but also with regard to the level of training, gender and age structure of the working population in the fisheries and aquaculture sector and, if possible, also in the fisheries and aquaculture value chain, producing data in this respect in similar detail to that which exists for monitoring economic activity and the performance of the sector in a specific way;				
2)	7. [...] urges the Commission, and Eurostat in particular, to gather sound and up-to-date data on the blue economy and on changes in the job market in the fisheries sector, changes to fishers' average earnings, their training levels, participation by gender and age group, along with data on the extent and performance of these activities in the outermost regions;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	11. Calls on the Commission to support national authorities in acquiring systems in order to be able to identify and report IUU fishing activities;				
4)	16. Is concerned about the derogations granted by international conventions to small-scale vessels in terms of non-binding labour and safety standards which may result in overall living and working conditions being less favourable to fishers working in certain fleet segments and between Member States; calls, therefore, on the Commission and the Member States to take swift and concerted action in order to apply similar standard conditions and support all fishing vessels to follow them, as fundamental pillars of the economy and the identity of small coastal communities;				
5)	26. Urges the Commission and the Member States to ensure that the best safety, work and living standards are in place on fishing vessels, regardless of their size;				
6)	29. Urges the Commission to present, as quickly as possible, a proposal for an accompanying directive on control and enforcement provisions, as was done for the maritime transport sector, in order to establish a harmonised inspections system;				
7)	33. Underlines the clear contradiction between the CFP and the requirements set out in social legislation such as ILO C 188, transposed into EU law by Directive (EU) 2017/159; stresses that according to these legal				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>texts, there is a requirement for more space on board, on a mandatory basis for vessels of 24 metres in length or over, while the fishing industry is prevented from increasing space on board; highlights the contradiction between the need for Member States to respect the standards set out in ILO C 188 and the rules of the CFP, which make the obligation impossible to fulfil; urges the Commission to identify alternative formulas for measuring fishing capacity, in the context of the EMFAF, and reaffirms that an increase in the gross tonnage of vessels should be permitted when the additional volumes are a response to the need to improve the safety and comfort of crews (also known as social or safety tonnage) and that these operations should be eligible for funding; emphasises that the space on board dedicated to the kitchen, cabins, toilets or recreational areas has nothing to do with the ability of the vessel to find, catch or store fish, and therefore, the fishing capacity;</p>				
8)	<p>45. [...] calls on the Commission to present a proposal for a directive transposing the STCW-F into the Union's acquis in order to complete the implementation in EU law of the internationally agreed minimum standards for ensuring safety at sea in fishing;</p>				
9)	<p>48. Encourages the creation of an association of young European fishers to promote the generational renewal of the fisheries sector and to represent and bring together young fishers and their organisations throughout the Union; calls on the Commission to</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	support the mobilisation of budgetary resources for the implementation of projects to achieve that end;				
10)	51. Calls on the Commission and the Member States to establish common bases for a standard training and certification system for the various categories of fishers, allowing rapid recognition at European level of the certification obtained in a given Member State; considers that this should include a procedure for the recognition of certificates obtained outside the Union that is compatible with the European training recognition system, facilitating the movement of fishers within the EU;				
11)	52. [...] calls, therefore on the Commission to propose specific measures for recognition of fishers' certificates of competency in line with the provisions of the STCW-F Convention, not only for European fishers but also for citizens of non-EU countries having ratified or acceded to the STCW-F;				
12)	62. Calls on the Commission to launch initiatives to acknowledge the work of women in fisheries and to secure equal pay between genders; recalls that the gender equality strategy for 2020-2025 requires that the relevant EU funds support actions to promote women's participation in the labour market and work-life balance, promote investments in care facilities, support female entrepreneurship, and fight gender segregation;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	67. Urges the Commission and the Member States to implement measures to improve the qualifications of women involved in the blue economy, particularly the fisheries, shellfish, aquaculture and canning industries and to promote official recognition of their contribution to the sea-industry supply chain; [...]				
14)	73. Calls on the Commission and the Member States to take the action needed to maintain and boost systems and means of support, including funding, in order to promote concentration of supply, including by providing real support for the establishment and operation of producer organisations (POs), particularly for small-scale coastal and artisanal fishing;				
15)	75. Calls on the Commission, working in close cooperation with the Member States, to establish and implement support mechanisms for small-scale, artisanal and coastal fisheries that make it possible to tackle the specific problems in this part of the sector;				
16)	77. Calls on the Commission to consider better ways to promote the marketing of processed fishery products with higher added value, including canned products, following the example of certain agricultural products, and programmes for the external promotion of EU fishery products, including their presentation at international exhibitions and fairs;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	82. Points out that developing marine research and innovation potential in the outermost regions is essential to driving the growth of the blue economy in those regions; adds, furthermore, that boosting their participation in international research networks that involve their universities, with knowledge of their unique characteristics, may help the outermost regions to improve their innovation systems and create jobs; urges the Commission to make an effort to equip these regions with the means to study and harness their biodiversity efficiently;				
18)	83. Underlines the common fisheries policy goal of promoting selective fishing and the EU target of achieving climate neutrality by 2050; highlights progress towards a low-emission cutter fleet and innovative fishing techniques that contribute to the achievement of both the 2050 target and the selectivity objective; calls on the Commission to encourage and prioritise these developments in order to hold out prospects for the sector through innovation;				
19)	87. Believes that the fisheries sector would be more attractive to more young people if it was affiliated and complemented with emerging sectors, for example tourism; urges, in this context, the Member States and their regions to cut the red tape in fishing tourism as a source of income; calls, further, on the Commission to promote back-up lines, within the framework of existing EU programmes, for the restoration of the tangible and intangible heritage associated with maritime activities, preserving the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	identity of coastal communities and optimising their use for tourism;				
20)	92. [...]; urges the Commission and the Member States to establish life-long learning systems to keep skills up-to-date and create opportunities for all age cohorts;				
21)	99. Calls on the Commission and the Member States to support efforts to promote social dialogue between the parties, concerning the following in particular: (a) training for young entrepreneurs in the fisheries sector; (b) professional updating and skills development for sustainable fisheries; (c) raising awareness of good fishing practices; (d) safety and protection of human life at sea; (e) on-board health and safety of workers;				
22)	106. Calls on the Commission and the Council of the EU to use trade policy to ensure that similar environmental and social sustainability standards are applied to both European and foreign operators, opening up the internal market only to compliant products; [...]				
23)	110. Calls on the Commission and the Member States to raise public awareness in Europe, particularly among younger generations, including schools and job search agencies, of the importance of fishing activities as a career opportunity; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	112. Encourages the Commission to design, in cooperation with the Member States and their coastal regions, a proper strategy to promote European fish, accompanied by proper financial support, including for species for which there is less demand and which have less commercial value, with a view to increasing their value and, at the same time, preventing the concentration of effort on species that have a higher value and are, therefore, more likely to be overfished;				
25)	119. Urges the Commission to address the aspects and demands set out in this resolution in its next report on the implementation of the CFP;				

4.1.24.7. PECH Resolution 7: EP resolution of 6 October 2021 on rebuilding fish stocks in the Mediterranean Sea: assessment and next steps

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>Rebuilding fish stocks in the Mediterranean Sea: assessment and next steps</b></p>	<p>6/10/2021  <a href="#">T9-0408/2021</a>  <a href="#">2019/2178(INI)</a>  <b>PECH</b></p>	<p>On 9 November 2021, the Parliament received "<a href="#">Replies</a>" of the Commission to positions and resolutions adopted by the European Parliament –October I 2021 part-session" informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Helena Dalli on behalf of Commissioner Virginijus Sinkevičius.</p> <p>The <a href="#">plenary debate</a> took place on 4 October 2021.</p>			
<p>1)</p>	<p>1. Calls on the Commission, after consulting the Advisory Council for the Mediterranean (MED-AC), to identify the obstacles to the process of rebuilding fish stocks, including an analysis of the implementation of the 2017-2020 GFCM strategy, with a view to including its findings in the 2021-2030 strategy, ensuring that practical steps are taken to rebuild fish stocks, including considering, if needed and found appropriate, both legislative and non-legislative actions;</p>				
<p>2)</p>	<p>5. Calls on the Commission to ensure a level playing field for all economic sectors in the implementation of effectively managed and connected marine protected areas (MPAs);</p>				
<p>3)</p>	<p>6. Urges the Commission to address the needs of Mediterranean countries by providing scientific and technical support for those countries to utilise</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	regional and international funding mechanisms, and for developing sustainable development projects;				
4)	7. Calls on the Commission to assess whether new stock management plans are required to achieve the principles of social, economic and environmental sustainability set out in the CFP;				
5)	11. Calls on the Commission to draw on the successful example of bluefin tuna by studying the introduction of total allowable catches (TACs) in the long term for some species including hake and to come forward with a proposal during the evaluation of the multiannual plan in 2024;				
6)	12. Recalls that the success of MPAs and other protected areas lies in them being embraced by fishers, coastal communities and other stakeholders; calls on the Commission to consider the need to facilitate the active participation of the fisheries sector, including its artisanal component, the local communities and all relevant stakeholders in the design, management and monitoring of MPAs;				
7)	18. Calls on the Commission to promote the objectives of the European Green Deal at the GFCM level and to support sustainable ocean governance and fish stock management through adequate funding;				
8)	19. Calls on the Commission to ensure that every legislative proposal aimed at increasing fish stocks which restricts fishing activities is preceded by a wide-ranging impact assessment to quantify its possible socioeconomic and environmental impact on coastal communities and on the productivity and competitiveness of EU fisheries undertakings and the production chain, and is supported by the best				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	available scientific data shared with stakeholders related to the fisheries sector;				
9)	22. Calls on the Commission and the Member States to ensure that all legislative and non-legislative proposals are shared with fishers' associations, including guilds ( <i>cofradías</i> ), under a co-management model;				
10)	27. Calls on the Commission to safeguard the competitiveness and sustainable development of the entire fisheries sector and its production chain, enhancing the value of fisheries products and improving labelling and traceability and placing particular emphasis on measures to ensure that imported products comply with European standards;				
11)	28. Calls on the Council and the Commission to positively assess Parliament's position in the ongoing revision of Regulation (EC) No 1005/2008 <sup>37</sup> (IUU Regulation), and especially in relation to the proposal from Parliament to introduce safeguard measures, subject to certain conditions, under which preferential tariffs for fishery and aquaculture products are temporarily suspended from non-EU states that do not properly cooperate in combatting illegal, unreported and unregulated fishing;				
12)	29. Requests that the Commission and the Member States improve the labelling and traceability of all seafood products in order to provide consumers with clearer information regarding the origin of the product, species and information on other aspects such as production methods and the standards				

<sup>37</sup> Council Regulation (EC) No 1005/2008 of 29 September 2008 establishing a Community system to prevent, deter and eliminate illegal, unreported and unregulated fishing, amending Regulations (EEC) No 2847/93, (EC) No 1936/2001 and (EC) No 601/2004 and repealing Regulations (EC) No 1093/94 and (EC) No 1447/1999 (OJ L 286, 29.10.2008, p. 1).

	territorial waters and marine protected areas and make the conditions in which EU fishers work safer; stresses that it is essential to provide these agencies with adequate funding and manpower to this end;				
27)	62. Calls on the High Representative of the Union for Foreign Affairs and Security Policy to step up the Union's efforts to uphold international law, security and the rule of law in the southern Mediterranean;				

#### 4.1.25. PETI

Between July 2019 and December 2021, the **Committee on Petitions (PETI)** was responsible for five 'ordinary' own-initiative reports (INI) leading to the adoption of five Parliament's resolutions ('PETI resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent three written replies to the Parliament's five PET resolutions. In three cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). By the cut-off date for the present study (31 January 2022), the Commission had not

yet replied to two PETI resolutions. Nevertheless, the Commission was still in the deadline to respond formally to these two resolutions. In total, the Commission submitted three specific replies. At the cut-off date of this study, the Commission had not yet replied to 43 of the Parliament's 63 requests.

### Analysis of the Commission actions

The Commission proposed/promised eight genuine actions. In 11 cases, no further specific actions were proposed/promised to be taken by the Commission and in one case it remained unclear if an action was carried out.

Among the eight actions proposed/promised by the Commission, the Commission already carried out the action in four cases. In the four remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.25.1. PETI Resolution 1: EP resolution of 16 January 2020 on activities of the European Ombudsman – annual report 2018

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Activities of the European Ombudsman – annual report 2018</b>	16/01/2020 <a href="#">T9-0016/2020</a> <a href="#">2019/2134(INI)</a> <b>PETI</b>	<a href="#">SP(2020)278</a>	Final reply (SP) received 21 August 2020	Specific reply			
1)	23. Calls on the Commission, in the phase of informal dialogue between itself and the Member States, to ensure a high level of transparency and access to documents and information with regard to the EU Pilot and infringement procedures, particularly on those related to petitions received, and full access by appropriate means to EU Pilot and infringement procedures that have already ended; Calls on the Commission to take a different approach with regard to investigations of breaches of EU law and to launch infringement procedures without relying solely on the EU Pilot mechanism;	The Commission considers that the request goes against established case law of the EU Courts. As explained in point 24 of the resolution, the Commission already provides public information on both EU Pilots and infringement files.  Documents relating to EU Pilots are protected by a general presumption of non-disclosure based on settled case law of the EU Courts (see, for example, Judgment of the Court of 11 May 2017, Kingdom of Sweden v European Commission, C-562/14 P, EU:C:2017:356, point 51 <sup>7</sup> ).				No further/specific actions proposed/promised to be taken by the Commission.  No further/specific actions proposed/promised to be taken by the Commission.	
2)	Point 30. Requests that the new Commission set one up, thereby ensuring the highest standards in terms of transparency, ethics and rule of law;	The Commission has set out on a number of occasions its different reading of the applicable rules and its different factual assessment regarding many of the elements presented by the European Ombudsman in support of her findings of maladministration, including				No further/specific actions proposed/promised to be taken by the Commission.	

<sup>7</sup> <http://curia.europa.eu/juris/document/document.jsf?text=&docid=190582&pageIndex=0&doclang=en&mode=lst&dir=&occ=first&part=1&cid=4550319>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>in its opinion of 3 December 2018 on the Ombudsman’s initial findings and recommendations<sup>8</sup>.</p> <p>Since taking the decision in July 2019 to transfer the previous Secretary-General to a new function, it had consistently maintained that it was for the new College to take a decision on the appointment of a new Secretary-General, including the procedure to be applied for the selection process.</p> <p>At the end of 2019, the Commission decided to publish a vacancy notice for the position. This led to a selection procedure and the appointment of a new Secretary-General on 14 January 2020.</p> <p>The Commission further underlines that, by virtue of Article 336 TFEU, the Union legislator lays down the Staff Regulations, which contain rules on the appointment of managers, including the Secretary-General. Those rules were respected when, taking account of the Secretary-General’s responsibilities in accordance with Article 20 of the Commission’s Rules of Procedure, the College of Commissioners appointed its new Secretary-General on a proposal put forward in agreement between the Commissioner responsible for Administration and the President.</p> <p>The Commission also recalls that the Interinstitutional Roundtable held in September 2018 concluded that the procedures applied across the institutions are robust and fit for purpose. The Commission was comforted in its view that it is in many respects leading the way in applying modern, state-of the art selection procedures for senior officials, including the use of independent</p>			

<sup>8</sup> <https://www.ombudsman.europa.eu/en/correspondence/en/107213>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		assessment centres, thereby guaranteeing high standards of fairness and transparency.			
3)	31. Calls on the Commission to demonstrate further commitment when it comes to solving all instances of maladministration found by the Ombudsman in its activities;	<p>The Commission would like to stress that compliance rates must be assessed in the light of the different below mentioned factors.</p> <p>Compliance rates vary from one year to another and should not lead to conclusions based on a specific year's figures. It must be stressed that these figures have been overall stable over time, and reflect a very high level of compliance, always between two thirds and three fourth of the cases.</p> <p>Only approximately 6% of the Ombudsman's final closing decisions and recommendations concerning the Commission contain a finding of maladministration.</p> <p>The Commission, although always making its best endeavour to respect the Ombudsman's proposals, has the right to disagree with the Ombudsman's conclusions, which is for example mostly the case when the Commission is bound by legal constraints.</p> <p>The Commission remains by far the main addressee of the Ombudsman's inquiries, approximately two thirds, since it is the EU institution that takes by far the highest number of decisions with direct and individual impact on citizens.</p> <p>The number of inquiries launched by the Ombudsman has increased.</p> <p>Last, in its recent 'Putting it right?' report, published in December 2019, on cases closed in 2018, the Ombudsman acknowledges that, sometimes, the changes that it is pursuing via recommendations simply take time, meaning that improvements introduced by the institutions may occur too late to be captured in the Ombudsman's annual statistics.</p>		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>39. Urges the Commission to update the text of the General Implementing Provisions (GIPs), which govern the operation of the JSIS as regards medical expenses and the expenses related to reasonable accommodation at workplace of persons with disabilities or serious illness;</p>	<p>In view of the measures set out below, the Commission considers that the interpretation and application of Article 72 of the Staff Regulations on reimbursement of medical costs is in line with Article 25 of the UNCRPD.</p> <p>In accordance with the General Implementing Provisions (GIPs), recognition of a serious illness giving the right to 100% reimbursement of medical costs is made based on four cumulative criteria, which, according to the case-law, are interdependent.</p> <p>Taking account of this case law, the Commission has, in practice, taken a flexible and holistic approach with regard to the application of these criteria in the case of medical costs linked to a disability. Thus, in practice, a significant number of medical-related expenses linked to disabilities are already reimbursed at 100%.</p> <p>However, the Commission recognises that, to enhance legal certainty, this flexible and holistic approach should be codified in the GIPs and committed to undertake a revision thereof. Following extensive consultations with the associations of persons with disabilities, the staff unions, the Staff Committee, the Staff Regulations Committee, and the Joint Committee for Equal Opportunities, the Commission adopted on 12 May 2020 the Decision C(2020) 3002 modifying the GIPs. The latter delivers on the commitments set out by the Commission in its Opinion of 14 January 2019 on the Recommendation and addresses the concerns raised by the Ombudsman, who considered that 'this flexible approach needs to be formalised so as to ensure that it is applied consistently'<sup>9</sup>.</p>		<p>The revision of the 2008 General Implementing Provisions (GIP) as well as of the GIP related to article 24 Annex X of the Staff Regulations was envisaged in the Commission's <a href="#">2021 Management Plan for the PMO</a> - action seems to be still pending.</p> <p>The <a href="#">Commission Decision</a> amending the Decision of 2 July 2007 laying down general implementing provisions for the reimbursement of medical expenses was adopted on 12 May 2020.</p>	

<sup>9</sup> Point 23 of the Ombudsman's Recommendation.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>It is also important to note that the Commission takes a comprehensive approach to the issues faced by persons with disabilities. This approach entails, in addition to the reimbursement of medical costs under the JSIS, the granting of social aid for a range of non-medical expenses pursuant to Article 76 of the Staff Regulations. In that regard, on the basis of a proposal put forward by the Commission, on 30 April 2020 the College of Heads of Administration adopted Conclusion n° 281/20, laying down new interinstitutional guidelines for the implementation of aid for persons with disabilities. Under these new guidelines, a greater number of staff members are now eligible for support; the range of non-medical costs that are reimbursed has been increased; and, in most cases, staff members are no longer required to cover a part of the costs linked to the purchase of non-medical equipment in order to receive the aid. Moreover, in line with the commitment made by the Commission in 2019, the schooling costs for children with disabilities who cannot be accommodated in the European Schools will be fully covered.</p>			

4.1.25.2. PETI Resolution 2: EP resolution of 17 December 2020 on outcome of the Committee on Petitions' deliberations during 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Outcome of the Committee on Petitions' deliberations during 2019</b>	17/12/2020 <a href="#">T9-0383/2020</a> <a href="#">2020/2044(INI)</a> PETI	<a href="#">SP(2021)190</a>	Final reply (SP) received 18 June 2021	Specific reply			
1)	7. [...] reiterates its call on the Commission to ensure transparency and access to documents in the framework of the EU Pilot procedures in relation to petitions received, and of the EU Pilot and infringement procedures that have already been concluded;	Regarding infringement-related petitions that touch upon elements covered by on-going EU Pilot investigations, the Commission is fully dedicated to delivering on the commitments of the Framework Agreement on relation between the European Parliament and the Commission as regards transmission of information to the European Parliament while, at the same time, respecting the need for confidentiality with regard to the Member States in EU Pilot investigations and infringement procedures, as recognised by the Court of Justice. The Commission considers that disclosing detailed information before opening a formal infringement procedure would be premature, given that investigations are still ongoing and a finding on whether or not EU law is being infringed has not yet been made. The Commission also proactively publishes summary press communications on all formal steps taken in infringement procedures and holds an extensive and user-friendly public database. Moreover, the Commission publishes its annual reports on monitoring the application of EU law, where it provides ample information on its monitoring and enforcement activity.  Access to documents related to on-going or closed EU Pilot investigations and formal infringement procedures is governed by the provisions on public access to documents laid down in Regulation (EC) No				No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		1049/2001 <sup>10</sup> . In principle, documents held by the institutions are accessible if they are not covered by any of the exceptions mentioned in that regulation, in accordance with the exception regime provided for therein. Due consideration should be given to the protection of personal data as set out in the recently adopted Regulation (EU) 2018/1725 <sup>11</sup> .			
2)	8. Calls on the Commission to commit to a more active involvement with the Committee on Petitions in order to ensure that petitioners receive a precise response to their requests and complaints regarding the implementation of EU law;	<p>The Commission made further efforts to improve the speed, quality and pertinence of its contributions to the replies to petitioners' concerns and is committed to continue providing detailed responses to petitions and outlining possible solutions at European or national level.</p> <p>This includes the modernisation of the IT tools for handling petitions and streamlining the underlying procedures. In addition, Commissioners and high-ranking officials have been representing the Commission more and more often in the Committee's meetings, especially when it comes to sensitive petitions.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point.	

<sup>10</sup> Regulation (EC) No 1049/2001 of the European Parliament and of the Council of 30 May 2001 regarding public access to European Parliament, Council and Commission documents, OJ L 145, 31.5.2001, p. 4.

<sup>11</sup> Regulation (EU) 2018/1725 of the European Parliament and of the Council of 23 October 2018 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC, OJ L 295, 21.11.2018, p. 39.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	10. [...] calls on the Commission to submit a proposal for a recast of the 2001 Regulation, with a view to enhancing transparency and accountability by promoting good administrative practice;	Regarding the recast of Regulation (EC) No 1049/2001, the Commission has already submitted two proposals. The first proposal, from 2008, represented a substantial recast of the regulation. The second proposal, submitted in 2011, extended the right of public access to documents of all institutions, bodies, offices and agencies in order to align the regulation with the Article 15(3) of the Treaty on the Functioning of the European Union (TFEU). In its 2020 Work Programme, the Commission proposed to withdraw these two proposals given the lack of significant progress and foreseeable agreement. Following the negative opinion of the European Parliament, it decided not to withdraw them. The Commission stands ready to continue the interinstitutional negotiations. The Commission notes that the regulation and the case law of the Court continue to be a sufficient legal framework for ensuring the public access to documents.		No further/specific actions proposed/promised to be taken by the Commission on this particular point.	
4)	11. [...] calls on the Commission to respect the commitments made in its communication of 17 July 2019 entitled 'Strengthening the rule of law within the Union: A blueprint for action' (COM(2019)0343), in order to promote a culture of respect for the rule of law, reinforce cooperation with national authorities, and ensure an effective common response to actual threats within the Union;	In 2020, the Commission set up the European Rule of Law Mechanism aimed at preventing rule of law challenges and promoting a rule of law culture in the Union. The first Rule of Law Report <sup>12</sup> , published on 30 September 2020, allowed for a deeper dialogue on the rule of law at both EU and national level, by having open debates, and by exchanging best practices. The report has already been discussed in the General Affairs Council and in the European Parliament, as well as in national parliaments.  Moreover, the Commission will follow-up the idea of a rule of law event and will strengthen its communication		The Commission is following on the rule of law principle. On 20 July 2021, the Commission published the <a href="#">2021 Rule of law report</a> .  A High-Level <a href="#">Conference</a> on the 'Rule of Law in Europe' was held on 17-18 May 2021, jointly organised by the Portuguese Council Presidency and the European Commission.

		Fundamental Rights Interactive Tool <sup>14</sup> (FRIT or "fundamental rights wizard"), which is an online tool assisting citizens in identifying where to turn to in case their fundamental rights have been breached.			
6)	18. [...] reiterates its call on the Commission to use the full potential of the early warning system as laid down in the revised waste directives; [...]	In 2022, the Commission will issue Early Warning Reports in line with the requirements in Directives 2008/98/EC <sup>15</sup> , 1994/62/EC <sup>16</sup> and 1999/31/EC <sup>17</sup> to identify the Member States at risk of not meeting the relevant waste management targets. The Commission will issue recommendations to address the identified shortcomings as well as share best practices in waste management that are instrumental in meeting the said waste management targets. These reports are complementary to other instruments, such as the Environmental Implementation Reports and the different funding programmes, to guide the Member States in raising their waste management performance.		The last <a href="#">early warning reports</a> were issued in 2018. The amended Waste Framework Directive, Packaging and Packaging Waste Directive and Landfill Directive have removed the obligation for implementation reports and require the European Commission, supported by the EEA, to publish early warning reports three years ahead of the recycling and landfilling target years. The next reports are due in 2022 for the targets on recycling of municipal waste and packaging waste with a 2025 deadline.	
7)	20. [...] and therefore urges the Commission, together with the Member States, to ensure the correct implementation of EU legislation in this field; is convinced that the Commission must step up its activities to make sure that environmental assessments conducted by Member States for the	The Commission is aware that concerns about endocrine disrupting chemicals remain a global challenge and a source of concern for many EU citizens.

	<p>authorisation of infrastructure projects concerning which petitioners have highlighted serious risks for human health and the environment are based on accurate and comprehensive analyses in full compliance with EU law;</p>	<p>The 2018 Communication 'Towards a comprehensive EU framework on endocrine disruptors'<sup>18</sup> outlined the Commission's strategic approach to deal with these substances in the future and announced a number of concrete actions to be implemented across policy areas.</p> <p>In 2020, the Commission published the 'Chemicals Strategy for Sustainability towards a Toxic-free Environment'<sup>19</sup> that includes several actions such as banning endocrine disruptors in consumer products as soon as they are identified, allowing their use only where it is proven to be essential for society. The Commission committed also to propose legally binding hazard identification of endocrine disruptors. These actions will contribute to better protect the human health and the environment.</p> <p>The Commission has to act within the legal framework regarding impact assessments and is not responsible for assessing and authorising projects or for proactively checking that every environmental impact assessment or strategic environmental assessment is in compliance with EU law. This falls within the responsibility of the competent national authorities. It should be noted that every year approximately 16 000 environmental impact assessments and 34 000 screenings are carried out in the EU. The Commission pays particular attention to projects that may cause irreversible environmental or public health damage, and uses the appropriate legal remedies at its disposition. The Strategic Environmental Assessment Directive<sup>20</sup>, the Environmental Impact</p>		<p>The Commission started works on the <a href="#">targeted revision of the CLP Regulation</a>. The inception impact assessment suggests that the new proposal, <a href="#">announced</a> for the second quarter of 2022, should include the identification of endocrine disruptors.</p>

		<p>Commission for the specific uses envisaged, or if the use is already exempted from the authorisation procedure.</p> <p>In order to fulfil the requirements of REACH for applications for authorisation, the use applied for shall be described in sufficient detail to determine the exact use function.</p> <p>Authorisations shall be granted if the applicant can demonstrate that the risk from the use of the substance is adequately controlled. If not, an authorisation may still be granted when it is proven that the socio-economic benefits of using the substance outweigh the risks and there are no suitable alternative substances or technologies.</p> <p>A company that cannot replace a substance included in Annex XIV from its production processes (because of lack of technical or economic feasible alternatives) submits an application for authorisation to ECHA, which will subsequently launch a public consultation on alternative substances or technologies. The application will be then submitted to ECHA's scientific Committees for Risk Assessment (RAC) and Socio-Economic Analysis (SEAC), which will issue opinions on the merits of the application taking also into account the information contained in the application and gathered during the public consultation. The two opinions from RAC and SEAC are sent to the Commission, who takes the decision whether to grant or not the authorisation and under which conditions. The Commission has three months to prepare a draft authorisation decision. A final decision granting or refusing the authorisation shall be taken in comitology in accordance with the examination procedure.</p> <p>Authorisations are subject to time-limited review periods that are determined on a case-by-case basis and</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>are normally subject to conditions and/or monitoring arrangements.</p> <p>The Commission has so far adopted 120 authorisation decisions and is currently processing 78 drafts.</p>			
9)	<p>28. [...] invites the Commission to present as soon as possible an updated EU guidance on species protection rules in order to achieve a satisfactory coexistence between people and large carnivores in affected areas;</p>	<p>The Commission intends to finalise its updated guidance on the strict protection of species of Community interest under the Habitats Directive during the first half of 2021.</p>		<p>On 12 October 2021, the Commission adopted a revised guidance document on species protection: <a href="#">Commission notice Guidance document on the strict protection of animal species of Community interest under the Habitats Directive</a>, C(2021) 7301.</p>	
10)	<p>29. [...] encourages the Commission to approach ECIs as openly and responsively as possible in order to make this instrument a real success of European participatory democracy in the eyes of the citizens; therefore calls on the Commission to initiate a legislative proposal on the basis of any successful ECI that was supported by the European Parliament;</p>	<p>The Commission manages several dissemination campaigns, such as social media campaigns, a national 'ECI ambassadors' network or awareness raising events in Member States. By the end of 2020, the number of average monthly visit to the Commission website on the European citizens' initiative<sup>24</sup> (ECI) increased by 30% compared to 2019. The Commission also manages a collaborative platform (ECI Forum<sup>25</sup>) to provide information and support to potential organisers in setting up and managing their initiatives. Traffic to the Forum more than tripled in 2020 compared to 2019, which illustrates its growing impact and usefulness.</p> <p>The Commission carefully examines all successful initiatives before setting out, in a Communication, its legal and political conclusions on the initiative and the action it intends to take, if any, and its reasons for taking</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (e.g. <a href="#">ECI Ambassadors</a>).</p>	

<sup>24</sup> <https://europa.eu/citizens-initiative/en>.

<sup>25</sup> <https://europa.eu/citizens-initiative-forum/en>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>or not taking action. The Commission also takes into account any position taken by the European Parliament. When examining a citizens' initiative and assessing follow-up actions, the Commission considers the principles of subsidiarity and proportionality, as well as any measures already taken, for example since the launch of the ECI concerned. While for a number of successful European citizens' initiatives follow-up has taken the form of a new or revised EU legislation, for other initiatives, meaningful non-legislative follow-up has taken place. For example, in response to the initiative 'Stop vivisection', the Commission implemented measures to advance the replacing of animal testing in research and progress was discussed in scientific conferences organised by the Commission. The initiative 'Right2Water' inspired the Commission to run, on behalf of the EU, a successful campaign to keep the universal access to water and sanitation in the list of the UN Sustainable Development Goals - '2030 Agenda for Sustainable Development'<sup>26</sup>.</p> <p>This demonstrates that the success of the instrument should not be measured only by whether legislative follow-up is proposed. The added value of the ECI instrument resides also in the opportunities that it creates for EU citizens to initiate debate on different policies within the EU institutions.</p>			

<sup>26</sup> <https://sdqs.un.org/2030agenda>.

4.1.25.3. PETI Resolution 3: EP resolution of 10 March 2021 on activities of the European Ombudsman - annual report 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Activities of the European Ombudsman - annual report 2019	10/03/2021 <a href="#">T9-082/2021</a> <a href="#">2020/2125(INI)</a> PETI	SP(2021)361	Final reply (SP) received 3 August 2021	Specific reply			
1)	12. calls more broadly on the Commission to fulfil its obligations regarding sustainability impact assessments of all EU trade agreements;	The resolution notes that, in keeping with the European Ombudsman’s recommendations, the Commission and the Council have maintained a high level of transparency in the legislative process throughout the negotiations on EU-UK relations and urges them to do the same when drawing up the future free trade agreement. The Commission will continue to implement its evaluation policy, including the preparation of Sustainability Impact Assessments (SIA) for major trade policy initiatives. SIAs are trade-specific instruments stemming from own commitments by the Commission.				Most EU trade agreements are accompanied by sustainability impact assessments (SIAs). However, according to the Commission’s <a href="#">website on SIAs</a> , it appears that no SIA was conducted for the trade agreements with the UK and Vietnam. Moreover, a case before the Ombudsman ( <a href="#">1026/2020/MAS</a> ) concerned the Commission’s failure to finalise the SIA before concluding the negotiations on the EU-Mercosur trade agreement.  No further/specific actions promised by the Commission.	
2)	16. Supports the Ombudsman’s activity performed in her inquiry 853/2020/KR concerning the BlackRock case and firmly believes that the Commission must follow the Ombudsman’s recommendations in this regard; calls, therefore, on the Commission to update and strengthen all applicable rules concerning public procurement procedures, including its guidelines, in order to prevent the occurrence of any conflicts of interest; calls on the Commission to adopt all necessary measures to preserve the integrity and credibility of policy-making related to the adoption of new rules on ESG issues at EU level;	Regarding the Ombudsman inquiry 853/2020/KR concerning the BlackRock case, the Commission welcomes that according to the Ombudsman’s conclusions there was no maladministration by the Commission services in awarding the study in question to BlackRock Investment Management (UK) Ltd. The Commission has in the meantime replied to the Ombudsman on her two suggestions concerning the Commission’s internal guidelines and possible changes to the Financial Regulation. It is reflecting on possible clarifications to its internal guidelines while leaving the authorising officer sufficient discretion to capture the specificity of each case in full compliance with the principles of non-discrimination, equality of treatment and transparency. It may also include the issue in a				With regard to the BlackRock case, the Commission <a href="#">replied</a> on 12 April 2021 that it was considering amending its internal guidelines and the Financial Regulation to impose an obligation for tenderers to disclose conflicting interests. This is in line with the Ombudsman’s conclusions.  The process of a <a href="#">targeted revision</a> of the EU’s Financial Regulation was launched in spring 2021, but it is unclear whether it addresses the issues in question. It is also unclear whether the Commission’s internal guidelines (‘Vademecum’) have been amended, as they are not publicly accessible.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		targeted public consultation on the planned revision of the Financial Regulation that it intends to launch shortly. The Commission services will organise a public workshop, open to civil and NGOs, to discuss BlackRock's final report once approved and published.		The Commission published the <a href="#">final study</a> by BlackRock on 27 August 2021. It is however unclear whether the publication was followed up by a workshop.	
3)	20. Notes that the Commission has committed to implementing many of the European Ombudsman's proposals, such as asking individuals who switch to the private sector to provide additional information about the organisation they are joining and more details about the type of professional activity they are embarking on; emphasises that such transfers cannot be taken lightly, as they could lead to conflicts of interest when former public officials take up a job with a firm to lobby on policies that they previously legislated or worked on; notes that according to a recent report <sup>27</sup> 99 % of requests for transfer into the private sector were approved by the Commission, with a rejection rate of only 0,62 %, which points to the need to strengthen oversight; recalls that ethics rules are not a mere formality and should be adhered to by all institutions; urges the Commission to implement all recommendations made by the Ombudsman, to take a more robust approach to the issue of 'revolving doors' and to follow through with the proposed measures, including forbidding new activity when there is evidence that this activity would lead to a conflict with the public interest and publishing, directly on its ethics website and in a timely manner, all related information on each case of	On the ethics rules, the resolution urges the Commission to implement all recommendations made by the Ombudsman, to take a more robust approach to the issue of 'revolving doors' and to follow through with the proposed measures, including forbidding new activity when there is evidence that this activity would lead to a conflict with the public interest and publishing, directly on its ethics website and in a timely manner, all related information on each case of former senior staff members assessed lobbying with a view to implementing the one-year lobbying and advocacy ban.  The fact that less than 1% of requests are refused does not mean that the Commission is not assessing conflicts of interest properly or that the Commission would authorise former staff members to perform unethical activities. A phenomenon cannot be assessed by a mere statistic of refused activities, as former Commission staff are explicitly informed by the administration, before they leave the service, about the rules applicable to new occupational activities and consequently are not seek engagements that contradict the rules. The majority of requests for post-service activities do usually either not raise conflict of interest issues at all or the risks, if any, can be mitigated		No further specific actions proposed/promised to be taken by the Commission.	

<sup>27</sup> Corporate Europe Observatory, 'From Facebook friends to lobby consultants – EU revolving door rules not fit for purpose', 22 October 2020 (<https://corporateeurope.org/en/2020/10/facebook-friends-lobby-consultants>).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	former senior staff members assessed with a view to implementing the one-year lobbying and advocacy ban;	with conditions. Typical examples of post-service activities include academia, public international and national administrations, speaking engagements, NGOs, foundations and think tanks. 20% of Commission's decisions on post-service activities do contain specific restrictions, such as a ban on professional contacts with former Commission staff of up to 2 years. Focusing only on prohibitions (as the report to which the Parliament refers does) does not give an accurate and comprehensive picture of the situation. The administration also examines the staff or former staff's future employer and tasks before making its assessment. Where staff members face the risk of a prohibition, they can decide not to pursue their envisaged activity and consequently not to submit a formal request after receiving guidance from the ethics service. Therefore, the fact that only few requests are refused does not mean that the Commission is not assessing conflicts of interest properly. Whenever it has deemed it necessary to adopt measures to protect its interests and its reputation, the Commission has made use, or informed its former staff members of its intention to make use, of the possibility provided for in Article 16 of the Staff Regulations to forbid a job move. In other instances, the Commission worked with general or specific restrictions, some open ended or limited in time, where these were equally effective and more proportionate in view of the circumstances of the individual case. These restrictions can be very strict and adequate to exclude, or mitigate in a suitable way, potential situations of conflicts of interest and to protect the interests and reputation of the institution.			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>21. Points out that the EU public administration must improve those of its rules and standards designed to prevent conflicts of interest and guarantee respect for the duty of discretion and integrity; calls on the European Ombudsman to promote the highest ethics rules and standards throughout the EU institutions, agencies and bodies, ensuring that they are fully and consistently implemented; calls for the evaluation of the declarations of interests submitted by Commissioners-designate to be carried out independently by appropriate means; underlines the need to revise the current rules and practices in order to strengthen integrity requirements for Commissioners both during and after their mandates and stresses that Commissioners' post-term-of-office notification periods must be increased;</p>	<p>On the conflict of interests standards designed to prevent conflicts of interest and guarantee respect for the duty of discretion and integrity, the rules and procedures in place are designed to avoid possible conflicts of interest, to protect the legitimate interests of the institution and are fit for purpose. The Staff Regulations of Officials and Conditions of Employment of Other Servants of the European Union<sup>28</sup> were reinforced with the last reform, which introduced the explicit obligation for new staff or staff coming back from leave on personal grounds (if more than 6 months), to provide a declaration on any potential conflict that could arise at the occasion of their entry or return into service. In case a potential conflict of interest is identified by the administration of the recruiting institution, appropriate measures are put in place to mitigate any potential risks. In addition, under Article 11a of the Staff Regulations, all staff members, while in the performance of their duties, are constantly under the obligation not to deal with a matter in which, directly or indirectly, they may have a personal interest such as to impair their independence, in particular family and financial interests. It should also be noted that the special report of the European Court of Auditors (ECA) on 'the ethical frameworks of the audited EU institutions: scope for improvement' confirmed that, to a large extent, the audited institutions – Parliament, Council and Commission – have established adequate ethical frameworks and that the Commission is well advanced on this matter. The Commission is ready to share its internal rules and</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p> <p>See also website <a href="https://ec.europa.eu/code-of-conduct/">Code of Conduct for the Members of the European Commission</a> (europa.eu).</p>	

<sup>28</sup> Regulation No 31 (EEC), 11 (EAEC) laying down the Staff Regulations of Officials and the Conditions of Employment of Other Servants of the European Economic Community and the European Atomic Energy Community, OJ 45, 14.6.1962, p. 1385.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>practical experience with the other EU institutions and agencies and exchange best practices.</p> <p>The new Code of Conduct for the Members of the Commission adopted on 31 January 2018 was welcomed both by the Ombudsman and the European Parliament. It provides for a comprehensive set of high ethical standards. For the time being, the Commission does not see the need to change its rules, while remaining open to further clarifications for its practical implementation, where this is useful. For example, and as requested by the Ombudsman, the Commission envisages to clarify the existing rules on the participation of the Members of the Commission in national election campaigns. The declarations of interest of Commissioners-designate are assessed by the European Parliament in the framework of the procedure for the appointment of the Commission set out in Article 17(7) TEU. As regards the assessment and approval of former Commissioners' post mandate activities, it is important to note that the 'cooling-off period' has been extended from 18 months to 2 years by the new Code of Conduct (and from 18 months to 3 years as regards former Presidents). This two-year period corresponds to the period during which former Members of the Commission are entitled to a transitional allowance, knowing that this latter period was shortened by Council Regulation 2016/300 of 29 February 2016, from three to two years. The assessment procedure of former Commissioners' envisaged post mandate activities has been reinforced, notably with the establishment of an Independent Ethical Committee and the publication of the relevant Commission decisions and the related opinions of the Independent Ethical Committee.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	28. Welcomes the European Ombudsman's increased focus on cases concerning the Commission's management of EU-funded projects; urges the Commission to guarantee the transparent distribution and management of funds; insists that the Commission improve the transparency of its preparation process for the annual Work Programmes for the funds it manages; calls, in particular, on the Commission to ensure that resources made available through the European Structural and Investment Funds are disbursed by the Member States in accordance with the requirements laid down in the UNCRPD on independent living for persons with disabilities;	<p>The resolution urges the Commission to guarantee the transparent distribution and management of funds and insists that it improve the transparency of its preparation process for the annual Work Programmes for the funds it manages. In particular, the resolution calls on the Commission to ensure that resources made available through the European Structural and Investment (ESI) Funds are disbursed by the Member States in accordance with the requirements laid down in the UNCRPD (United Nations Convention on the Rights of Persons with Disabilities) on independent living for persons with disabilities.</p> <p><b>Under shared management, the responsibility for selecting and implementing individual operations lies with Member States. Therefore, it is not in the Commission's competence to select the operations to be supported by the ESI Funds. However, the Commission pays great attention to the situation of persons with disabilities in all Member States of the European Union and is committed to uphold and protect their rights. Furthermore, the Commission services will work closely with Member States during the negotiations for the 2021-2027 programming period to ensure continued progress on deinstitutionalization.</b></p>		In the new <a href="#">Disability Strategy 2021-2030</a> , published on 3 March 2021, the Commission commits to support Member States ('national, regional and local authorities') in their efforts for deinstitutionalization and independent living, including through the 2021-2027 shared management funds, and to ensure that EU funds do not support actions that contribute to segregation or exclusion.	
6)	33. Calls on the Commission to propose a comprehensive, ambitious and long-term European Disability Strategy for the post-2020 period in order to make possible, inter alia, the full and consistent implementation of the UNCRPD;	<p>The resolution calls on the Commission to propose a comprehensive, ambitious and long-term European Disability Strategy for the post-2020 period in order to make possible, inter alia, the full and consistent implementation of the UNCRPD.</p> <p>The new Strategy on the Rights of Persons with Disabilities has been presented on 3 March 2021. This Strategy covers the period from 2021 to 2030 and sets</p>		The new disability strategy was published on 3 March 2021: <a href="#">Union of Equality: Strategy for the Rights of Persons with Disabilities 2021-2030</a> , COM(2021) 101. It is the main EU tool to implement the UNCRPD.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the framework for the implementation of the UN Convention on the Rights of People with Disabilities by the Member States as well as the EU institutions. This new Strategy focuses on several important areas such as employment, social security, education, accessibility and independent living for persons with disabilities. The Strategy contributes to building a Union of Equality as announced by President von der Leyen, along with other equality strategies presented by this Commission. It will also strengthen Europe's role as a global partner in supporting the inclusion of persons with disabilities.</p>			

## 4.1.25.4. PETI Resolution 4: EP resolution of 6 October 2021 on protection of persons with disabilities through petitions: lessons learnt

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Protection of persons with disabilities through petitions: lessons learnt</b>	6/10/2021 <a href="#">T9-0414/2021</a> <a href="#">2020/2209(INI)</a> PETI	N.A. <sup>29</sup>					
1)	5. Calls on the Commission to conduct a comprehensive and cross-cutting review of EU legislation and funding programmes with a view to complying fully with the CRPD by constructively involving disability organisations and the members of the EU framework for monitoring the implementation of the CRPD;						
2)	6. Calls on the Commission and the Member States to take into account the diversity and heterogeneity of persons with disabilities when designing and implementing policies and measures;						

<sup>29</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	10. Calls on the Member States to carry out national disability awareness-raising campaigns promoting the CRPD and the European Disability Strategy 2021-2030 that are accessible for all and involve persons with disabilities and the family members and organisations that represent them; calls on the Member States to adopt ambitious timelines for the implementation of the strategy; calls on the Commission to develop a set of detailed indicators in the forthcoming delegated act on the revised social scoreboard to measure the progress toward the goals and objectives of the strategy and to ensure compliance by all those involved with the commitments outlined in these documents;				
4)	12. Welcomes the plans of the Commission to examine the functioning of the EU framework for monitoring the implementation of the CRPD in 2022 and propose actions on this basis; calls on the Commission to strengthen the EU framework and its independence, above all by ensuring greater involvement and participation of experts, non-governmental organisations, social partners and particularly persons with disabilities, without discrimination based on the type of disability or any other personal circumstance; [...]				
5)	14. Calls on the Commission and the Member States to set clear objectives to improve the living and working conditions of persons with disabilities, while respecting the principles of accessibility and non-discrimination and investing in equal opportunities				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and the participation of persons with disabilities in all areas of life;				
6)	19. Calls on the Commission and the Member States to better acknowledge the importance of accessible and quality support services and systems for independent living; stresses the need to promote strategies and standards for personalised quality support for dependent persons with disabilities and their carers, including improved social protection and various forms of support for informal carers; calls on the Commission to present a strategic EU care agenda as a further step forward in qualitatively empowering the healthcare sector in the EU, including personal and household service workers; reiterates that the care agenda also needs to reflect the situation of the 100 million informal carers in the EU, who provide 80 % of long-term care but whose work mostly goes unrecognised;				
7)	21. Calls on the Commission to structurally integrate the European Disability Strategy 2021-2030 into the European Semester process as the latter should be used to inspire Member State policies and approaches, to strengthen the inclusiveness of society and to support the employment and social protection of people with disabilities; calls on the Commission to carry out an annual review of disability mainstreaming under the European Semester process;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	22. Calls on the Commission and the Member States to establish a common definition of disability in line with the concluding observations of the CRPD Committee on the initial report of the European Union adopted in 2015, and to ensure mutual recognition of disability status across the Member States, so as to ensure the free movement of persons with disabilities and the proper exercise and recognition of their EU citizenship rights;				
9)	23. Calls on the Commission to ensure that the EU and the Member States fully comply with all relevant EU and UN obligations on the rights of persons with disabilities, in particular the CRPD and the CRPD Committee's general comments to the convention, and with the relevant EU measures and funding rules, and to provide support to them and their families and carers and enable exchanges of best practices in this area;				
10)	25. Calls on the Commission to ensure that the Member States correctly implement Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation – GDPR) <sup>30</sup> , and to take the				

<sup>30</sup> OJ L119, 4.5.2016, p.1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	necessary measures in order to protect the sensitive data of persons with disabilities;				
11)	31. Urges the Member States to ensure that persons with disabilities are involved in the policymaking process without any constraints; notes that the CRPD requires full political participation, which means that persons with disabilities must be able to participate in elections and decision-making processes on an equal basis with others; calls on the Commission to ensure that the Member States provide facilitated naturalisation or specific exemptions from naturalisation exams for persons with disabilities to guarantee their access to citizenship;				
12)	32. Recalls the high number of EU citizens deprived of their right to participate in elections, including European Parliament elections, because of their disabilities or mental health problems; thus calls on the Commission and the Member States to ensure the real right of persons with disabilities to vote in European Parliament elections;				
13)	34. Calls on the Commission and the Member States to be ambitious regarding the scope of the entitlements card users will have and ensure proper implementation by all the Member States by way of binding EU legislation if necessary;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	36. Calls on the Commission to exempt persons with disabilities and their families and helpers from the payment of tolls across the EU to support their movement, especially when they need to make multiple journeys for medical treatment and their wellbeing;				
15)	37. Calls on the Commission to further strengthen the legislative framework for the participation of persons with disabilities in tourism; [...]				
16)	38. [...] calls on the Commission to consider making a proposal relating to the rights of passengers with disabilities in urban and rural transport, to bridge the gaps that still exist; calls for the adoption of an equally effective maritime transport package;				
17)	39. Calls on the Commission to support the Member States to ensure the necessary conditions at local, regional and national level to allow persons with disabilities to enjoy their rights to free movement, self-determination and personal choices on an equal basis with others, to live independently and to be included in the community, as laid down in Article 19 of the CRPD;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
18)	40. Notes the Commission's proposal for the creation of the 'AccessibleEU' resource centre by 2022; calls on the Commission to create an EU agency on accessibility (EU Access Board) that would be in charge of developing technical specifications on accessibility in support of specific EU policies and legislation, carrying out consultations with rights-holders, stakeholders and non-governmental organisations, helping Member States and EU institutions to implement accessibility in a harmonised way for the benefit of the single market, and raising awareness of the importance of accessibility for equal societies;				
19)	41. Calls on the Commission and the Member States to ensure the cognitive, sensory and physical accessibility of EU initiatives on the digitalisation of the labour market;				
20)	42. Regrets the fact that access to the built environment and physical accessibility were not included within the scope of the European Accessibility Act; calls on the Commission to use the European Accessibility Act as a basis for adopting a robust EU framework for an accessible and inclusive environment with fully accessible public spaces, services, including public transport, communication, administrative and financial services, and the built environment; welcomes the Commission's 'Access City Award' initiative;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	45. [...] calls on the Commission to mainstream accessibility into all policy areas and calls on the Member States to fully implement existing legislation;				
22)	56. Stresses the urgent need for EU legislation aimed at protecting citizens against all forms of discrimination in the EU and considers this to be primordial for the correct implementation of CRPD policies; urges the Member States to adopt the EU horizontal anti-discrimination directive tabled by the Commission in 2008; calls on the Commission to present an alternative solution in order to move forward in tackling discrimination across the EU, in all areas of life, as soon as possible;				
23)	58. Reiterates its call on the Commission to work with the Court of Justice of the European Union on communication and accessibility strategies in order to ensure that persons with disabilities have the ability to access the EU justice system without facing any form of discrimination; calls on the Commission and the Member States to continue empowerment programmes for persons with disabilities to enable them to recognise and report cases of discrimination against them;				
24)	59. Condemns all forms of discrimination against persons with disabilities in the workplace; calls on the Member States and the Commission to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	implement policies aimed at preventing cases of harassment based on disability; [...]				
25)	72. Calls on the Member States to take an intersectional approach, especially in their policies and measures, to creating inclusive employment; regrets that multiple and intersectional discrimination is insufficiently addressed in the European Disability Strategy 2021-2030; calls, therefore, on the Commission to place special emphasis on intersectionality in the implementation of the strategy and to set clear, measurable and ambitious targets relating to workplace diversity that reflect the heterogeneity of persons with disabilities, in order to address multiple and intersectional discrimination;				
26)	73. Calls on the Commission and the Member States to promote and support social enterprises focusing on the employment of persons with disabilities, as they are a lever to boost the creation of decent jobs;				
27)	78. Calls on the Commission to start revising the Employment Equality Directive as soon as possible with a view to fully harmonising it with the provisions of the CRPD and implementing a participatory process aimed at ensuring the direct and full involvement of organisations that represent persons with disabilities;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
28)	83. Calls on the Commission and the Member States to step up their efforts to tackle the persisting disability employment gap and to foster access for persons with disabilities to quality and sustainable jobs; welcomes, in this regard, the Commission's proposal in the European Pillar of Social Rights action plan to include the disability employment gap in the revised social scoreboard;				
29)	87. Calls on the Member States to encourage workplace adaptations and take action to improve occupational health and safety; calls on the Commission to pay special attention to workers with disabilities in the upcoming EU strategic framework on health and safety at work and to set ambitious goals;				
30)	91. Calls on the Commission and the Member States to include in the final content of the partnership agreements on the European Structural and Investment Funds and in these funds' programmes objectives and approaches that improve the living conditions of persons with disabilities, while respecting the principles of accessibility and non-discrimination, and investing in equal opportunities and the participation of persons with disabilities in all				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	areas of life, including in supporting the transition from institutional to community-based living; asks the Commission to monitor closely the use of EU funds in line with the CRPD;				
31)	95. Invites the Commission and the Member States to ensure that rural development programmes and strategies include specific outreach measures for persons with disabilities living in rural areas and to involve them in the design and implementation of said programmes and strategies;				
32)	99. Calls on the Commission to conduct further research into the impact and health-related effects of emerging technologies on persons with disabilities, such as the case of LED lights on photosensitive persons;				
33)	100. Recalls that in order to develop appropriate and effective policies and find solutions tailored to the needs of all persons with disabilities in the EU, there is a need for comparable and reliable EU data; calls, therefore, on the Commission and the Member States to intensify their efforts for a common framework for European statistics on individuals and households to collect reliable data on the participation of persons with disabilities in the various levels and types of education and labour and in social life;				

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
34)	103. [...] calls on the Commission and the Member States to invest in training professionals regarding the needs of persons with disabilities; [...]					
35)	104. Points out that inclusive education and vocational training programmes are two of the key prerequisites for a more inclusive labour market; calls on the Commission to ensure that the upcoming EU approach to micro-credentials for lifelong learning and employability is accessible and inclusive and reflects on how to improve the realisation of the right to work of persons with disabilities; [...]					
36)	114. Calls on the Commission and the Member States to ensure the full development, advancement and empowerment of women with disabilities and to promote their participation in public decision-making; points out that adequate measures should be put in place to ensure that their perspectives are fully taken into account and that, together with disability-specific consultative bodies, the participation of organisations representing women with disabilities is promoted;					
37)	119. Calls on the Commission and the Member States to address the employment gap faced by women with disabilities, notably by tackling gender stereotypes, strengthening their participation in the digital economy, increasing their representation in education, training and employment in STEM subjects and occupations, and combating deterrents to work such as sexual harassment; calls on the Commission and the Member States to take concrete

	<p>measures to ensure that women with disabilities participate in decision-making and receive equal pay for equal work via binding pay transparency measures, to combat their high risk of in-work poverty and to adjust labour regulations such as flexible working arrangements and parental leave to their specific needs; calls on the Commission and the Member States to support social economy business models and initiatives aimed at improving the social and labour inclusion of women with disabilities through the action plan on the social economy;</p>				

4.1.25.5. PETI Resolution 5: EP resolution of 16 September 2021 on deliberations of the Committee on Petitions in 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Deliberations of the Committee on Petitions in 2020</b>	16/9/2021 <a href="#">T9-0507/2021</a> <a href="#">2021/2019(INI)</a> PETI	N.A. <sup>31</sup>					
1)	9. Recalls that petitions contribute considerably to the Commission's role as guardian of the Treaties; stresses that reinforced cooperation between the Committee on Petitions and the Commission is essential to ensure the successful treatment of petitions; urges the Commission to refrain from general replies and to provide timely, precise, clear and targeted responses to efficiently answer the concrete requests of petitioners; calls on the Commission to ensure transparency and access to documents and information in the framework of the EU Pilot procedures in relation to petitions received, and of the EU Pilot and infringement procedures that have already been concluded, and to take into account any issues related to the breach of EU law that are raised through petitions as a matter of priority when considering whether to initiate an infringement procedure, especially when the issues are related to environmental legislation;						

<sup>31</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	10. Asks the Commission to provide a clarification regarding its competence in relation to petitions, including those raising issues that fall under a field of activity of the EU but not under a policy where the EU has legislative competence;					
3)	11. Calls on national authorities to be proactive in taking the necessary measures to respond to citizens' concerns as expressed in their petitions where cases of systemic failure in compliance with EU law occur; calls on the Commission to regularly follow up on progress in complying with EU legislation in the cases examined;					
4)	24. [...] urges, therefore, the Commission, together with the Member States, to ensure the correct implementation of EU legislation in this field;					
5)	28. [...] calls on the Commission to consider initiating a legislative proposal on the basis of the content of any successful ECI;					
6)	29. Stresses that transparency and public access to the documents of the EU institutions are vital in order to ensure the highest levels of protection of the democratic rights of citizens and their trust in EU institutions; points out that the current Regulation (EC) No 1049/2001 regarding public access to European Parliament, Council and Commission documents no longer reflects the actual situation; deeply regrets that the revision of Regulation (EC) No 1049/2001 has been stalled for years with no					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	progress; calls on the Commission to submit a proposal for a recast of the 2001 regulation with a view to enhancing transparency and accountability by promoting good administrative practice, in line with requirements of the Lisbon Treaty;				

#### 4.1.26. REGI

Between July 2019 and December 2021, the **Committee on Regional Development (REGI)** was responsible for six 'ordinary' own-initiative reports (INI) and no legislative own-initiative reports (INL) leading to the adoption of six Parliament's resolutions ('REGI resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent six written replies to the Parliament’s six REGI resolutions. In all six cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). In total, the Commission submitted five specific replies and one mixed reply.

### Analysis of the Commission actions

The Commission proposed/promised 15 genuine actions. In 54 cases, no further specific actions were proposed/promised to be taken by the Commission and in seven cases it remained unclear if an action was carried out. In seven cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 15 actions proposed/promised by the Commission, the Commission already carried out the action in two cases. In the 13 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.26.1.REGI Resolution 1: EP resolution of 20 March 2021 on Cohesion Policy and regional environment strategies in the fight against climate change

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			Action of the Commission
Cohesion Policy and regional environment strategies in the fight against climate change	20/03/2021 <a href="#">T9-0097/2021</a> <a href="#">2020/2074(INI)</a> <a href="#">REGI</a>	<a href="#">SP(2021)345</a>	Final reply (SP) received 3 August 2021	Specific reply	
1)	13. [...] calls on the Commission to provide support and facilitate cooperation between regions and the exchange of know-how and best practices; [...]	<p>The Commission shares the European Parliament's view that cooperation between regions and the exchange of expertise and best practices is an important element in advancing the transition to a climate-neutral EU. In this regard, the Commission already strives to facilitate such cooperation. Notably, the Energy and Managing Authorities (EMA) network serves as an informal platform to exchange information, share good practices, experiences and the latest implementation and policy developments. It aims at supporting Managing Authorities to make the best possible use of cohesion policy funds to advance with the energy transition. Additionally, the European Network of Environmental Authorities- Managing Authorities (ENEA-MA) provides a forum for the exchange of the experience among Environmental Authorities and Managing Authorities in integrating environmental aspects into cohesion policy programmes and projects. The Commission has also set up a Just Transition Platform to assist EU countries and regions to unlock the support available through the Just Transition Mechanism, by providing access to knowledge, offering technical and advisory support as well as facilitating exchange of information and good practices.</p> <p>The Commission contributes to the preparation and the implementation of the EU macro-regional strategies and the Interreg programmes, which are two key EU cohesion policy tools for strengthening territorial cooperation</p>			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Energy and Managing Authorities (EMA) network</a> , <a href="#">Just Transition Platform</a> , <a href="#">European Network of Environmental Authorities- Managing Authorities (ENEA-MA)</a> , <a href="#">European Covenant of Mayors for Climate &amp; Energy</a> ).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>between the Member States and also between them and non-EU countries. The EU macro-regional strategies have proved to be an important platform for coordination and cooperation in the field of climate action and, as stated in the third report on the implementation of EU macro-regional strategies (COM(2020) 578 final), are highly relevant in delivering the EU priorities for 2019-2024 in their respective territories, in particular the European Green Deal. Moreover, the Interreg programmes, covering cross-border, transnational and interregional cooperation, provide a framework for joint action, in order to find common solutions to shared challenges, such as the fight against climate change. They promote exchanges of experience, and facilitate acting together. As in the past, also in the programming period 2021-2027 Interreg will continue to put a strong emphasis on supporting the achievement of the climate objectives and the transition towards a greener, climate neutral and resilient Europe.</p> <p>The European Covenant<sup>7</sup> of Mayors for Climate &amp; Energy is a resource for local climate and energy actions. The European Climate Adaptation Platform Climate-ADAPT<sup>8</sup> aims to support Europe in adapting to climate change by helping users to access and share data and information. The European Climate Pact<sup>9</sup>, which is an initiative of the European Green Deal, is an opportunity for people, communities and organisations to participate in climate action across Europe.</p>			

<sup>7</sup> <https://www.covenantofmayors.eu/>.

<sup>8</sup> <https://climate-adapt.eea.europa.eu/about>.

<sup>9</sup> [https://europa.eu/climate-pact/index\\_en](https://europa.eu/climate-pact/index_en).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	<p>22. Calls on the Commission to monitor and publish reports using a common standard for all Member States about the progress of national governments and local and regional authorities in addressing climate change at all levels, as well as to assess the interlinkages between environmental policies and the economy;</p>	<p>Concerning monitoring, cohesion policy has one of the most robust systems of objective setting, monitoring and evaluation. For the 2014-2020 period, the Commission developed the ESIF Open Data <a href="#">platform</a>. The platform dynamically presents progress on financial inputs and achievements for each of 530 ESF Fund programmes, by Member State, by theme and by fund. The platform provides the reference tool for all financial inputs and physical achievements. This allows tracking progress, benchmark and compare financial and progress with outputs. The platform provides dedicated <a href="#">data stories</a> on the cohesion policy support to <a href="#">climate objectives</a>, <a href="#">risk prevention measures</a>, <a href="#">clean energy transition</a>, <a href="#">protecting nature and biodiversity</a>, <a href="#">waste management</a>, <a href="#">air quality</a>, <a href="#">clean urban transport</a>, etc. The Commission intends to continue this work and extend the platform to the programmes of the period 2021-2027.</p> <p>The Member States are reporting under Regulation (EU) 2018/1999 on the Governance of the Energy Union and Climate Action and Commission Implementing Regulation (EU) 2020/1208. The European Climate Law will amend certain of the provisions on reporting. Information at Member State level is available on <a href="#">Climate-ADAPT</a>.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (the Commission developed the ESIF Open Data <a href="#">platform</a>, <a href="#">Climate-ADAPT</a>).</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (a <a href="#">toolkit</a> on sustainability transitions).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>32. [...] calls on the Commission, in this regard, to produce user-friendly guidelines to give regional and local governments the opportunity to acknowledge and capitalise on consolidated best practices on energy transition and the decarbonisation of economies; [...]</p>	<p>On paragraph 32, to achieve the European Green Deal objectives, Europe need to engage in 'sustainability transitions', which involve a profound transformation of societal systems towards more sustainable modes. The European Commission published a <a href="#">toolkit</a> on sustainability transitions to help national and regional authorities implement necessary systemic changes through cohesion policy. It contains good practice principles to promote sustainability transitions in the planning and delivery of Partnership Agreements and Programmes for the 2021-2027 funding period. It also offers advice on project selection criteria and other tools to mainstream sustainability in programmes. The toolkit is accompanied by a <a href="#">report</a> with additional case studies, inspiring examples and more information.</p> <p>The Commission recognised the outermost regions' clean energy potential in its communication on a strategic partnership with the EU's outermost regions (COM(2017) 623 final) and committed to mainstreaming their good practices in this context through the Clean Energy for EU Islands initiative. The Commission has further committed to paying particular attention to these regions in the European Green Deal communication (COM/2019/640 final), taking into account their renewable energy sources. In its Circular economy action plan (COM(2020)98 final), the Commission committed to tailoring circular economy solutions to the outermost regions and islands. In its offshore renewable energy strategy (COM(2020)741 final) it identifies the outermost regions as pioneers in decarbonising islands.</p> <p>The outermost regions and islands can use a range of EU instruments to support transition towards clean energy including the European Regional development Fund, the LIFE programme, and the NESOI (New Energy Solutions Optimised for Island) project for technical assistance in shaping energy projects.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (a <a href="#">toolkit</a> on sustainability transitions).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	43. Invites the Commission to benchmark draft spending plans against highest possible climate ambition;	On paragraph 43, as regards investments in climate action, at least 30% of the European Regional Development Fund and 37% of the Cohesion Fund investments will contribute to climate objectives. To guide and mobilise investments, the Commission proposed a dedicated objective for a greener and low-carbon Europe. The Commission will monitor all the programmes against these targets using EU Coefficient, based on the original OECD Rio markers. This system was introduced already for the 2014-2020 period in order to track cohesion policy contribution to the 20% headline target set for the MFF 2014-2020. The methodology has been further enhanced for the 2021-2027 period, ensuring consistency between programmes and shifting towards an “effect-based” methodology that also includes relevant elements of the Taxonomy for Sustainable Finance. The achievement of this target is monitored with the help of ESIF Open Data platform <a href="#">climate tracking tool</a> .		The activity appears to be ongoing.	

4.1.26.2. REGI Resolution 2: EP resolution of 18 May 2021 on review of the European Union Solidarity Fund

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Review of the European Union Solidarity Fund	18/05/2021 <a href="#">T9-220/2021</a> <a href="#">2020/2087(INI)</a> REGI	<a href="#">SP(2021)507</a>	Final reply (SP) received 22 September 2021	Specific reply			
1)	5. Points out that it is vital for aid and funds to be sent as quickly, easily and flexibly as possible to the affected regions and underlines that synergies between the EUSF and the Union Civil Protection Mechanism, the ERDF climate change adaptation component and territorial cooperation programmes are essential in order to create a comprehensive response and resilience package; calls on the Commission to continue its work on the guidance for the EUSF's simplified usage in order to facilitate the actions of national, regional and local authorities; insists that synergies between the EUSF and the aforementioned EU funding instruments, among others, should be used flexibly and to their fullest extent; recalls that the implementation report by each beneficiary country should detail the preventive measures – including the use of EU structural funds – taken or proposed to limit future damage and to avoid, to the extent possible, a recurrence of similar natural disasters;	The Commission has set up a dedicated website on the EUSF <sup>10</sup> providing necessary information and guidance for potential applicants as well as latest developments.  The Commission is looking into the possibilities of improving its guidance on the EUSF implementation.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (dedicated website <a href="#">EUSF</a> );  Because of a general character of the promise, it is unclear whether the Commission has delivered or not.	

<sup>10</sup> [https://ec.europa.eu/regional\\_policy/en/funding/solidarity-fund/](https://ec.europa.eu/regional_policy/en/funding/solidarity-fund/).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	10. Invites the Commission, in the context of a future reform of the EUSF, to continue its work to simplify and speed up the application procedure for Member States, for example by paying particular attention to simplifying applications for activation of the EUSF across several regions in the context of cross-border disasters, so as to ensure a swifter response to the intensification of major and regional natural disasters and major public health emergencies;	In light of the considerations mentioned under paragraph 9 and without additional budgetary means, simplifying the application for activation the EUSF across several regions in the context of cross-border disasters or widening the scope of the EUSF by accepting cross-border disasters is not considered feasible.		No further/specific actions proposed/promised to be taken by the Commission.	
3)	11. Is of the opinion that climate change and the intensification of natural disasters are making territories and regions increasingly vulnerable; calls on the Commission, accordingly, to consider revising the EUSF in order to better take into account disasters on a regional scale; underlines, moreover, the role of ERDF programmes, in synergy with rural development programmes, in the prevention and mitigation of risks, such as tectonic and hydrogeological risks; acknowledges, furthermore, that droughts were included in the scope of the EUSF Regulation during the 2014 revision, but notes that they represent a recurrent feature of EU climate developments and that their economic impact is difficult to assess; calls on the Commission to assess the specific impacts of droughts and to address them appropriately in the context of a future reform of the EUSF;	The frequency of major natural disasters in past years and the inclusion of health emergencies in the scope of EUSF has increased the budgetary pressure on the fund. Given also the inclusion of the EUSF within the SEAR envelope with a maximum annual amount of EUR 1 200 million in 2018 prices for both instruments, a revision that would widen the scope of the EUSF is not considered feasible.		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	12. Calls on the Commission and the Member States to strengthen research and education with a view to putting in place a system to ensure better preparedness to prevent and manage disasters and to minimise the impact of such crises;	The Joint Research Centre (JRC) agrees with the text that refers to more and better research in the field of crisis management. It notes that a system to prevent and manage disasters and to minimise the impact of such crises exist already, recently strengthened by the amended RescEU legislation, building on more science and better knowledge.	C C	No further/specific actions proposed/promised to be taken by the Commission.	C C
5)	15. Calls on the Commission to ensure the dissemination of good practices with regard to governance and the use of institutional coordination structures in disaster situations;	No specific reply is provided to this particular point.	C C	Not mentioned.	C C
6)	22. Welcomes the fact that the revised EUSF adopted in March 2020 increased the value of advance payments from 10 % to 25 % of the anticipated financial contribution and the upper limit from EUR 30 million to EUR 100 million; points out, in this context, the importance of advance payments for increasing the effectiveness of aid programmes, in particular in regions and local communities with limited alternative funding sources; asks the Commission to reflect on additional ways to promote this option and calls for increased operational efforts to be made in order to reduce the average time for the release of advanced payments, while ensuring the EU budget is protected;	The average time for making advance payments is determined by multiple factors including the 12 weeks to submit the application, the time necessary to do a first eligibility check and the administrative procedures to adopt the necessary financing decision. The Commission services engage to perform these tasks in the shortest possible time given the available resources.	C C	No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	C C

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	24. Notes that the average time needed to make advance payments is five months and calls on the Commission to consider some more reactive solutions;	<p>Although the follow-up does not mention point 24, the Commission however states that:</p> <p>The average time for making advance payments is determined by multiple factors including the 12 weeks to submit the application, the time necessary to do a first eligibility check and the administrative procedures to adopt the necessary financing decision. The Commission services engage to perform these tasks in the shortest possible time given the available resources.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
8)	25. Notes, moreover, that it takes an average of one year for the full amount of an EUSF grant to reach the beneficiary; calls on the Commission to explore ways of simplifying and making the allocation of the fund as flexible as possible in the context of a future reform, in order to ensure rapid action and prompt relief for disaster-stricken regions and/or countries;	<p>Until 2020, the activation of the EUSF required the mobilisation of funds through an amending budget procedure after the European Commission completed its assessment and decided to activate the EUSF. In the period 2021-2027, in accordance with Article 9 of the MFF Regulation, the EUSF and the EAR were both put under one special instrument, the Solidarity and Emergency Aid Reserve (SEAR). The intention of the legislator was that this would make mobilisation of the EUSF faster and more flexible as in accordance with Article 9(3) of the MFF Regulation, the appropriations from the SEAR are entered in the general budget of the Union as a provision. Thus, whenever there is a need to mobilise the EUSF, a transfer from the SEAR reserve line to the EUSF operational line is to be proposed to the budgetary authority (Article 31 of the Financial Regulation). This procedure should be faster than the mobilisation of the funding through the amending budget procedure.</p> <p>Moreover, as additional flexibility in exceptional cases and if the remaining financial resources available in the SEAR are not sufficient to cover the EUSF needs in the year of occurrence of a disaster, the MFF Regulation foresees also a possibility to frontload from the n+1 the EUSF share of SEAR to year n. Such frontloading is limited to a maximum amount of EUR 400 million (2018 prices)</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">MFF 2021-2027</a> , <a href="#">SEAR reserve</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and reduces the annual EUSF allocation for year n+1 accordingly.			
9)	30. Calls on the Commission to strengthen and simplify the synergies between the EUSF and the cohesion policy funds, as well as the Union Civil Protection Mechanism, with a view to ensuring effective and structured risk management for reconstruction projects in the short, medium and long term, not only through the construction of sustainable, energy-efficient and resource-efficient infrastructure, but also through the deployment of preventive measures; also calls on the Commission to demonstrate flexibility with regard to programming and the amending of national or regional programmes when it comes to dealing with major and regional natural disasters and major public health emergencies; reiterates, in this regard, that EUSF financial assistance should focus on stronger resilience and the sustainability of the investments in the affected areas;	<p>EUSF is primarily designed to contribute to post-disaster emergency relief in the Member States and accession countries confronted with devastating natural disasters and major public health emergencies. It is intended to provide financial assistance to cover part of essential emergency and recovery response actions. Accordingly, the EUSF is not designed for 'building back better' and resilience aspects are not specifically underlined in the EUSF regulation. Nevertheless resilience measures are encouraged by promoting better coordination and complementarity with financial resources from other sources, especially, where applicable with other EU funding, especially with cohesion policy funding.</p> <p>A real case example: the Commission's involvement and active participation at the high-level meetings to ensure a comprehensive multi-fund approach to the earthquake recovery for Croatia after the two devastating earthquakes 2020/ 2021. In the discussions, the EUSF is only one funding source among others but building back better can be achieved through coordination with other funds.</p> <p>Further flexibility was introduced in the legislative framework by an amendment of the Common Provisions Regulation (EU) No 1303/2013 on 4 July 2017 by Regulation (EU) 2017/1199, enabling additional assistance to Member States affected by natural disasters. Namely, in Article 120 of Regulation (EU) No 1303/2013, a new paragraph 8 allows for insertion of a separate priority axis within an operational programme with a co-financing rate of up to 95 % to support operations in</p>		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>response to major or regional natural disasters if they fulfil all conditions defined by the Regulation.</p> <p>In this regard, Croatia was the first Member State to make use of the provisions of this new paragraph 8 of Article 120 of the Regulation (EU) No 1303/2013. The creation of a new priority axis with an EU allocation of EUR 111 million from the European Regional Development Fund (ERDF), and a co-financing rate of 95 % was provided through the amendment in early June 2021 of the Operational programme "Competitiveness and Cohesion". This amendment allowed for additional financial support to mitigate the consequences of a series of devastating earthquakes that hit the Sisak-Moslavina County and parts of Karlovac and Zagreb Counties in Croatia starting from 28 December 2020.</p> <p>Besides, the Croatian authorities amended various Operational programmes financed by the Fund for European Aid to the Most Deprived (FEAD), the European Social fund (ESF) and the European Agricultural Fund for Rural Development (EAFRD) independent of this additional flexibility, on the basis of the standard rules concerning programme amendments. For example, they have implemented additional measures for food and basic material aid through FEAD, they have mobilized an amount of EUR 15.7 million through ESF, which will, inter alia, be used to finance measures for support to NGOs for providing an efficient respond to the needs of local communities in crisis situations. On top of that, the EAFRD will be used for restoring agricultural production potential damaged or destroyed by earthquakes in the amount of EUR 15.9 million, where the intensity of support amounts to 100 % of eligible investment costs.</p>			
10)	35.Reiterates the importance of communicating to the public the tangible benefits brought about by	The Commission regularly publishes press statements and/or news items regarding received new EUSF applications and/ or proposed mobilisation of the EUSF		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the EUSF, in order to further increase citizens' trust in EU tools and programmes;</p> <p>calls on the Commission and the Member States to improve the visibility of the fund's assistance through ad hoc, targeted communication activities, in parallel to making the rapid response and delivery of aid a priority, specifically in order to highlight the EU's added value in the event of major and regional natural disasters and major public health emergencies, which is a concrete expression of EU solidarity and the Union's ability to put genuine mutual assistance into practice by providing significant budgetary resources; also asks the Commission, as part of the future revision of the regulation, to oblige beneficiary countries to inform their citizens about the EU's financial support for the implemented operations;</p>	<p>assistance, as well as, information on the disbursed amounts. The EUSF is also regularly covered by REGIO Flash news and in Panorama articles.</p> <p>Moreover, the Cohesion policy open data portal<sup>11</sup> provides data on the EUSF applications, awarded assistance and type of disasters in an accessible way.</p> <p>There is no complete and systematic overview of communication and media coverage in Member States. However, daily press clippings and frequent questions from journalists demonstrate the high visibility of the EUSF related support decisions in regional and national media. In 2019, an interview with a Commission representative was shown on a big screen at the airport in Italy providing a very visible proof of the EU support through the EUSF for the Italian earthquakes.</p> <p>The Commission has taken note of the European Parliament's proposal and will assess possibilities to improve visibility the EUSF assistance.</p>		<p>working on action falling under the scope of the EP request (<a href="#">EUSF</a>, <a href="#">REGIO Flash</a> , <a href="#">Cohesion policy open data portal</a>).</p>

## 4.1.26.3.REGI Resolution 3: EP resolution of 19 May 2021 on reversing demographic trends in EU regions using cohesion policy instruments

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Reversing demographic trends in EU regions using cohesion policy instruments	19/05/2021 <a href="#">T9-248/2021</a> <a href="#">2020/2039(INI)</a> REGI	<a href="#">SP(2021)507</a>	Final replied received on 22 September 2021	Specific reply			
1)	9. [...] encourages the Commission and Member States to create specific strategies to promote the empowerment of women in rural areas; encourages the collection of gender-disaggregated data in order to identify and address any current gender inequalities;	<p>As regards women empowerment and gender issues, the Common Provisions Regulation stipulates that the use of the European Regional Development Fund (ERDF) and the European Social fund (ESF) funding to enhance the effectiveness of labour markets and access to quality employment through developing infrastructure is subject to the enabling condition requiring a national strategic policy framework for gender equality. This framework should include (i) evidence-based identification of challenges to gender equality, (ii) measures to address gender gaps in employment, pay and pensions, and promote work-life balance, including through improving access to early childhood education and care, with targets. Empowerment of women is promoted overall, in particular through the European Social Fund Plus (ESF+) support, aiming to increase the participation of women in employment as well as conciliation between working and personal life, combatting the feminisation of poverty and gender discrimination in the labour market and in education and training; all relevant data collected for reporting on ESF+ indicators will be broken down by gender.</p> <p>The Common Agricultural Policy (CAP) includes the specific objective to promote “gender equality, including participation of women in farming”. This will enable the Member States to include in their strategic plans</p>				No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>measures providing for specific advantages in favour of women in rural areas, and in particular in farming.</p> <p>The Long-term Vision for Rural Areas further underlines the support for women in relation to entrepreneurship, participation in decision-making and investments in work-life balance services, such as early childhood education and care, as well as services for older people, including opportunities to increase women's integration in the labour market. It also introduces a Rural Observatory to further improve data collection and analysis on rural areas, including sex-disaggregated data where available.</p>			
2)	<p>19. Underlines the importance of current initiatives such as the European Innovation Partnership on Active and Healthy Ageing, Ambient Assisted Living and the EIT Digital and Health Knowledge Innovation Communities; calls on the Commission to take into account the solutions already developed by these initiatives for accommodating the demographic shift when addressing the demographic challenges faced by European regions; stresses the importance of the European Qualifications Framework for Lifelong Learning as a way of supporting education and training in areas at risk of depopulation;</p>	<p>The Commission will take into account the solutions developed by the mentioned initiatives when addressing the demographic challenges in European regions (paragraph 19). In that broader context, Cohesion policy will continue to support integrated strategies helping the affected territories facing demographic challenges.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Cohesion policy</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	32. Points to the increased spread of teleworking during the COVID-19 crisis, and believes that it may prove to be a useful tool to reverse depopulation trends in rural areas, making it possible for young educated people to stay in areas which they would otherwise leave; invites the Commission and Member States to reflect on how teleworking could impact future intra-EU mobility and the perceived attractiveness of different regions;	As regards the possible effects of teleworking on mobility within the EU, the Commission recognises that the COVID-19 crisis may introduce significant changes to society, which rural areas could benefit from. Actions at European level may support rural residents in benefitting from such opportunities and facilitate easier integration in the labour force regardless of the place of residence. Investments enhancing digital connectivity, concentrating EU support in areas suffering from market failure – in particular in rural areas, will contribute to the revitalisation and attractiveness of those areas. The Long-term Vision for Rural Areas aims at exploring these opportunities and designing improved tools to capitalise on the opportunities offered by Europe’s recovery plan. It highlights the importance of broadband coverage for businesses and people to work remotely and adapt to innovations and new economic activities in rural areas. It proposes an integrated set of actions - ‘Rural Digital Futures’ - to boost the sustainable digital transformation of rural areas, raise their attractiveness for people and businesses to stay or return. The Commission also highlights the importance of introducing digital technology together with efforts to improve digital skills, where necessary and in particular in rural areas, as a prerequisite to fully reap off the benefits of digital investments (paragraph 32).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">The Long-term Vision for Rural Area</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	33. Calls on the Commission to propose a strategy on demographic change built on the following main elements: decent employment conditions, work-life balance, the territorial aspect of policies promoting economic activity and employment, the adequate provision of social services of general interest in all territories, effective local public transport, and adequate care for dependent persons and long-term care, with special attention on new forms of work and their social impact;	Addressing demographic change is a strategic priority for this Commission, as illustrated in the Report on the Impact of Demographic Change, the Green Paper on Ageing and the Long-term Vision for Rural Areas, which have set the scene for debates and actions related to demography. As such, actions are of transversal nature and should be reflected as a horizontal principle in various EU initiatives, the Commission has opted for this building blocks approach, rather than for a standalone demography strategy. As the Commission's growth strategy, the European Green Deal stresses the importance of a socially just transition, including taking into consideration demographic challenges and responding to them in a socially just manner. The Commission is working to integrate demography-related aspects in all relevant EU policies. A number of relevant initiatives have recently been adopted or are planned, for example, on gender equality, employment conditions, work-life balance, supplementary pensions, long-term care, occupational safety and health. Many principles of the European Pillar of Social Rights, on which the Commission launched an Action Plan in March 2021, are relevant to demographic challenges (paragraph 33).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Report on the Impact of Demographic Change</a> , <a href="#">Green Paper on Ageing</a> , <a href="#">Action Plan on European Pillar of Social Rights</a> ).	
5)	40. Calls on the Member States to conduct the programming and implementation process of the 2021-2027 cohesion policy with full respect for the partnership principle, and to take account of the particular needs of the regions with demographic constraints in their partnership agreements; stresses the importance of prioritising regional and sub-regional needs, including demographic and migration aspects and territorial challenges (urban and rural); believes that these strategies should be accompanied by territorial and demographic	The Commission shares the view concerning the importance of the partnership principle in general and of the Code of Conduct on Partnership in particular for the programming and implementation process of 2021-2027 cohesion policy. In particular, the Commission is putting in place a European Community of Practice on Partnership, aiming at reinforcing the effectiveness of partnership. It has also been empowered to review the European code of conduct on partnership and will duly monitor its implementation. With the Long-term Vision for Rural Areas, it also launches a Rural Pact that will be		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">2021-2027 cohesion policy</a> , <a href="#">Long-term Vision for Rural Areas</a> , <a href="#">Rural Pact</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	impact assessments, conducted in parallel with economic, environmental and social assessments; calls on the Commission to monitor and where appropriate secure the full implementation of the Code of Conduct on Partnership which can contribute to an increase of the cohesion policy absorption rate in parallel with enhanced quality of projects;	developed, promoting interactions between all levels of governance and rural stakeholders (paragraph 40).			
6)	44. Considers it appropriate to involve regional and local authorities in long-term cooperative governance and planning initiatives at various levels; asks the Commission and the Member States to disseminate good practices on the use and benefits of this type of governance and planning tools to support polycentric development, and to use the territorial impact assessments (TIA) to further design EU and national policies that affect demographic change;	<p>The Commission views territorial impact assessment as an important tool for policy design and in this regard recognises the high importance of the active and genuine involvement of regions in the planning and management of EU and national policies. Practical guidance on territorial impact assessments (TIA) has been prepared by the European Observation Network for Territorial Development and Cohesion programme (ESPON) and is being actively promoted.</p> <p>Furthermore, a rural proofing mechanism will be put in place under the Better Regulation Agenda, drawing among others on territorial impact assessments and better monitoring of the situation of rural areas, to assess major initiatives' impact on rural areas and ensure consistency and complementarity (paragraph 44).</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Practical guidance on territorial impact assessments</a> (TIA)).</p> <p>A <a href="#">first meeting</a> of a new thematic working group on rural proofing is scheduled for 27 January 2022.</p>	
7)	48. Calls on the Commission to focus on policy coordination at EU level on issues related to functional cooperation areas at different levels, such as cross-border, macro-regional and rural-urban, in order to address demographic challenges;	As regards policy coordination, the Commission is committed to supporting functional cooperation of all types, especially in the context of demographic challenges. Existing mechanisms at EU level aiming at exchanging experiences and good practices on cooperation areas, such as the Interreg (European Territorial Cooperation) Europe or Urbact (Urban Development network programme) programmes, tools such as LEADER (for rural development) and Community-		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Interreg</a> (European Territorial Cooperation) Europe or <a href="#">Urbact</a> (Urban Development network programme) programmes, <a href="#">LEADER</a> (for rural	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		led local development (CLLD) regarding linkages between urban and rural areas, continue to be available to address demographic and depopulation challenges (paragraph 48).		development), <a href="#">Community-led local development</a> (CLLD)).	
8)	50. Acknowledges that ‘magnet cities’ primarily contribute to the building of regional ‘growth poles’; underlines, nevertheless, that second-tier cities play a critical role in regional development, and in this respect calls on the Commission and the Member States to put in practice strategies for the harmonised development of these cities;	The Long-Term Vision for Rural Areas contains tools and actions to help rural regions address their own unique set of pressing issues, from demographic change to physical and digital connectivity, the risk of poverty and limited access to services. It also considers the specific challenges faced by young people and women (paragraph 50).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Long-Term Vision for Rural Areas</a> ).	
9)	54. Calls on the Commission to ensure that the initiative on the long-term vision for rural areas includes practical solutions and means of support to address peripheries and demographic changes; believes that this long-term vision for rural areas should develop into a true European rural agenda, with tangible and concrete objectives, and the involvement of all relevant regional and local actors, both in its architecture and its implementation; believes, furthermore, that it should include a gender mainstreaming strategy accompanied by impact assessment tools; invites the Commission, in agreement with the Member States and local and regional authorities, to propose a new deal on demographics in the EU as a multi-level policy approach which would lead to a European strategy on demographic trends; believes that demographic issues, including depopulation	Because the European Commission is aware and convinced of the value of the contribution of the local and regional level in EU policy making, the Long-term Vision for Rural Areas has been designed based on a wide public consultation, with the participation of all relevant regional and local actors, local authorities and local stakeholders both in its architecture and implementation through the Rural Pact (paragraph 54).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Long-Term Vision for Rural Areas</a> ).

	and ageing, should be among the issues addressed during the Conference on the Future of Europe;				

4.1.26.4. REGI Resolution 4: EP resolution of 9 June 2021 on the gender dimension in Cohesion Policy

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
The gender dimension in Cohesion Policy	9/06/2021 <a href="#">T9-0276/2021</a> <a href="#">2020/2040(INI)</a> REGI	<a href="#">SP(2021)531</a>	Final reply (SP) received 23 September 2021	Specific reply			
1)	11. Calls on the Commission, the Member States and their respective authorities to follow the principles of the rule of law, including the principle of non-discrimination, and respect for fundamental rights when it comes to decisions on funding programmes or regions, followed by monitoring, investigation and appropriate actions in cases of breaches of these principles, while always ensuring the protection of final beneficiaries;	<p>The Commission is strongly committed to combat discrimination against LGBTQI+ people within the powers conferred by the Treaties. The Union is founded on the value of respect for human rights, including the rights of persons belonging to minorities. In Article 2 of the Treaty on the European Union, these values are considered to be common to the Member States in a society in which non-discrimination and equality between women and men prevail.</p> <p>The mainstreaming of equality, including gender equality is a horizontal cross-cutting principle for all cohesion policy investments. Cohesion policy legislation requires gender equality to be taken into account in all the steps of the investment programmes – from the preparation of programmes, to project selection and implementation, to programme monitoring and evaluation. The 2021-2027 regulations, in particular Article 8 ESF+ and Article 9 CPR, require the Commission and the Member States to ensure that the Funds are implemented in compliance with the EU Charter of Fundamental Rights. The Commission will carefully monitor this throughout the programming period, starting with the preparation of the partnership agreement and the programmes. Furthermore, the Commission has provided trainings to national authorities regarding horizontal principles, including on non-discrimination and</p>				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Cohesion policy art. 8 <a href="#">ESF</a> , <a href="#">Art 9 CPR</a> , <a href="#">Cohesion policy programmes in 2021-2027</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>gender equality and respect of the EU Charter of Fundamental Rights and UN Convention on the Rights of Persons with Disabilities.</p> <p>The Charter of Fundamental Rights, which applies to the Member States when implementing EU law, including as an enabling condition for the Cohesion policy programmes in 2021-2027, prohibits discrimination based on sexual orientation. EU law, in a number of directives, provides for a right not to be discriminated against based on sexual orientation in the area of employment and occupation and on sex in the areas of employment and occupation, access to and supply of goods and services and social security. These directives have been transposed by all the Member States.</p> <p>The Commission has on several occasions strongly condemned the so-called "LGBT ideology-free zones". The President of the Commission clearly stated that these "are humanity free zones and have no place in our Union"<sup>12</sup> The Commission closely monitors developments in Poland and Hungary and their compliance with EU law, and will not refrain from taking any necessary measures to combat discrimination.</p> <p>Under shared management, the rules, both for the 2014-2020 and the 2021-2027 programming period, require the Member States and the Commission to prevent any form of discrimination, including based on sexual orientation during the preparation and implementation of programmes supported by the Funds. The criteria for selecting projects supported by the Funds should also ensure respect of this principle. Although the Member States are responsible for selecting operations, the Commission monitors the situation, particularly if a risk of</p>			

<sup>12</sup> State of the Union Address by President Ursula von der Leyen at the European Parliament Plenary, 16 September 2020.

		non-respect of fundamental rights has been identified. If projects do not comply with applicable law, financial corrections can be applied by the Member State or the Commission.			
2)	13. Recognises the burden placed on women as principal caregivers in formal and informal settings, as well as its social value, especially during the COVID-19 crisis; acknowledges that 80 % of all care across the EU is provided by often unpaid informal carers, 75 % of whom are women; therefore points out the crucial role of cohesion policy in securing adequate investments in care services; calls on the Member States to prioritise the available funds within cohesion policy for the provision of care to meet not only the growing demand for care infrastructure, but also to effectively address gender gaps in employment, the resulting pay and pension gaps, labour market segregation and, as a result, to improve working conditions and ensure the same pay for the same work, to fight informal employment and precariousness and to create new high-quality	<p>The Commission takes note of the proposal for a Care Deal for Europe aiming to support a transition to a better care economy. Long-term care policies have to be seen together with other policies that directly impact long-term care, particularly policies on pensions, healthcare, and healthy and active ageing. The Commission's recent Green paper on ageing discusses the gender aspects of care and old-age poverty, as well as gender labour market and pension gaps, and poses relevant questions. The Commission will take into account the public consultation inputs to these questions when reflecting on further policy responses, including the planned initiative on long-term care.</p> <p>To address the needs emerging from the COVID-19 pandemic, cohesion policy funds have already provided flexible and fast ways of support, including to the most vulnerable groups in society, taking into account the challenges identified in relevant European Semester</p>		The Commission is preparing the public consultations on <a href="#">long-term care</a> . Final document to be adopted by the Commission in Q3 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>jobs in this sector, as well as to support a transition towards a better care economy that is accessible for all; requests that the Commission therefore propose a Care Deal for Europe aimed at supporting such a transition;</p>	<p>country-specific recommendations, many of which deal with gender equality-related policies and challenges. The new EU Gender Equality Strategy provides a framework to strengthen gender mainstreaming through systematic inclusion of a gender perspective in all EU policies and processes. In the new Multiannual Financial Framework 2021–2027 and under NextGenerationEU, gender mainstreaming and gender equality will be promoted throughout the programming and implementation process. With an overall budget of EUR 1.55 billion, the Citizens, Equality, Rights and Values Programme (CERV) will promote gender equality, equal treatment and equal rights of all in order to promote more democratic, diverse and open societies.</p> <p>Equality is also placed at the heart of the European recovery plan, as preliminary data shows that the crisis disproportionately affected women, young generations and disadvantaged groups in society. Two of the six pillars of the Recovery and Resilience Facility are social cohesion and policies for the next generation, children and youth. The money that the Member States will receive under the Recovery and Resilience Facility will complement and create synergies with funding under the EU cohesion policy. The European Pillar of Social Rights Action Plan announces a proposal for an initiative on Long-Term Care in 2022 to set a framework for policy reforms to guide the development of sustainable long-term care that ensures better access to quality services for those in need.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Multiannual Financial Framework 2021–2027, NextGenerationEU</a>).</p> <p>On 14 June 2021, the Commission adopted <a href="#">a Long-term care report</a>.</p> <p>Furthermore, the Commission is preparing the public consultations on <a href="#">long-term care</a>. Final document to be adopted by the Commission in Q3 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>22. Calls for the introduction of <i>ex ante</i> and <i>ex post</i> gender impact assessment as part of the Member States' evaluations, in connection with the promotion of gender equality in how the funds are spent and whether compliance with gender equality targets is effectively respected; calls on the Commission and Member States to ensure that during the mid-term review of the post-2020 cohesion policy, an evaluation on the use of their sources is carried out in order to assess their effectiveness, efficiency, impact and, where applicable, inclusiveness and non-discrimination, including from a gender perspective;</p>	<p>The 2021-2027 ERDF and Cohesion Fund regulation does not include a requirement for mandatory <i>ex-post</i> and <i>ex-ante</i> gender impact assessments for all ERDF and Cohesion Fund programmes, which need to remain relevant and proportionate, and to correspond to Better Regulation principles. It is possible to analyse the gender impact of specific interventions in specific programmes by the Member States, as one of the many elements of the mid-term review, when deemed relevant. With respect to the 2021-2027 Commission mid-term evaluation, considering the very wide scope of the interventions supported by ERDF and the Cohesion Fund, data availability and the fact that gender impacts are only relevant for specific interventions in certain programmes, it is not feasible to include a systematic assessment of gender impacts.</p> <p>Review meetings will be organised annually between the Commission and each Member State to examine the performance of each programme. Such meetings can concern: any issues that affect the performance of the</p>		<p>No further/specific action proposed to be taken by the Commission.</p>

		<p>programme and the measures taken to address them; the contribution of the programme to tackling the challenges identified in the relevant country-specific recommendations that are linked to the implementation of the programme; the progress in carrying out evaluations and syntheses of evaluations; and the fulfilment of relevant enabling conditions, among others<sup>13</sup>. Wherever relevant, review meetings may therefore discuss the gender equality issues and improve programme performance in this regard. The final performance report will also assess the achievement of programme objectives.</p>		<p><a href="#">Performance, monitoring and evaluation of the European Regional Development Fund, the Cohesion Fund and the Just Transition Fund in 2021-2027</a>, July 2021.</p>	

<sup>13</sup> In 2019, the Commission issued country specific recommendations on increasing women's labour market participation and tackling the gender pay gap to several Member States.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>25. Highlights the gender data gap in the field of cohesion policy and urban planning, which exists in a number of Member States, and calls on the Member States to introduce data collection methods corresponding to sex-disaggregated data so that differences between genders can be properly analysed; stresses that in order to ensure gender mainstreaming, the Commission should implement a gender impact assessment for each policy and legislative proposal in the area of cohesion policy, define gender-responsive indicators, collect gender-disaggregated data and carry out gender-responsive evaluations;</p>	<p>In line with its commitment under the Interinstitutional Agreement accompanying the new multiannual financial framework (MFF), the Commission will strengthen the assessment of gender equality impact in evaluations and impact assessments for relevant future EU funding programmes and instruments and is updating its Better Regulation guidance, accordingly.</p> <p>When preparing future proposals for EU spending programmes, including in the areas for cohesion policy, the Commission will screen whether the potential impact on gender equality of future EU funding programmes and instruments is significant.</p> <p>The Commission is developing a methodology for tracking gender equality related expenditure, which will be tested and rolled out progressively.</p> <p>The Commission will operate within the constraints set by the MFF 2021-2027 as agreed with the European Parliament and the Council in December 2020, and the basic acts of the spending programmes as adopted by the Parliament and Council. These constraints relate for example to the definition of objectives and indicators for the new programmes, reporting obligations on Member States, and the availability of relevant data.</p>		<p>The activity appears to be ongoing.</p> <p>The Commission is developing a <a href="#">methodology</a> for tracking gender equality related expenditure.</p>	
5)	<p>27. Emphasises the fact that countless women are facing the challenges of the COVID-19 pandemic which has led to spikes in reports of domestic violence; calls on the Council to urgently conclude the EU's ratification of the Istanbul Convention on preventing and combating violence against women and domestic violence; calls on the Commission and the Member States to allocate cohesion policy funding and to deliver programmes that are aimed at preventing and combating violence against women and at helping the victims of violence; [...]</p>	<p>The Commission is committed to concluding the EU accession to the Council of Europe Convention on preventing and combating violence against women and domestic violence. The Commission also plans to present a legislative proposal to prevent and combat gender-based violence against women and domestic violence by the end of 2021. The EU Gender Equality Strategy 2020-2025 sets out a comprehensive set of measures to decrease this kind of violence.</p> <p>To address previous challenges and other needs emerging from the COVID-19 crisis, cohesion policy funds have</p>		<p>From 8 February to 10 May 2021, the Commission organised <a href="#">public consultations</a> on combating gender-based violence, protecting victims and punishing offenders.</p> <p>The Commission's adoption planned for Q4 2021 was delayed to Q1 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>already provided flexible and fast means of support, including to the most vulnerable individuals in society. Additional resources have been allocated through REACT-EU to 2014-2020 cohesion policy programmes, extending the Member States' possibilities to finance crisis response and crisis repair measures. Building on past efforts, cohesion policy funds for the 2021-2027 period will provide support to preventing and combating violence against women and at helping the victims of violence through integrated actions, including for housing and high-quality social services. In a shared management setting, the Member States are to propose effective measures to target such intervention areas. The Commission continues to raise awareness on the importance of allocating cohesion policy funding for inclusive growth, fighting inequalities and all forms of discrimination and protecting vulnerable groups. Under the CERV programme, the Commission also funds measures aimed at ending violence against women and domestic violence.</p>			
6)	28. Calls on the Commission to include the necessary recommendations on promoting the gender dimension and gender-related issues in its communication on the launch of the new cohesion policy 2021–2027;	<p>In relation to promoting the gender dimension and gender-related issues in the communication on the launch of the new cohesion policy 2021–2027, the Commission continues to raise awareness and provide support through technical seminars with managing authorities and external communication events with national, regional and local stakeholders such as the European Week of Regions and Cities on mainstreaming the gender perspective horizontally in all investments.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">under new Cohesion policy 2021–2027</a>).</p>	

4.1.26.5. REGI Resolution 5: EP resolution of 14 September 2021 on towards a stronger partnership with the EU outermost regions

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Towards a stronger partnership with the EU outermost regions</b>		14/9/2021 <a href="#">T9-0368/2021</a> <a href="#">2020/2120(INI)</a> <b>REGI</b>	<a href="#">SP(2021)709</a>	Final reply (SP) received 18 January 2022  Mixed reply			
1)	4. Calls on the Commission services and the national and regional authorities to strike a balance between legitimate and essential controls on the use of EU funds and simplifying and making more flexible the administrative rules needed to modernise and optimise them, in order to encourage local initiatives;		Regarding the Parliament's call for striking the right balance between controls on the use of EU funds and simplifying and making more flexible their administrative rules (point 4), the Commission recalls that the legislation ruling Cohesion Policy Funds, as well as other shared management funds in 2021-2027, contains 75 simplification measures, while ensuring effective controls. These reduce for example the number of controls, cut red tape for beneficiaries, and enable a smoother implementation of operational programmes. The Commission will also continue paying attention to potential rules and regulatory obligations from national and regional authorities that could make the implementation more burdensome.			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
2)	6. Calls on the Commission, in line with its role as 'guardian of the Treaties', to make the OR Unit in DG REGIO the 'guardian of the correct application of Article 349 TFEU', and to consider setting up a fully-fledged directorate directly linked to 'OR correspondents' in the other directorates-general;		The Parliament suggests a systematised 'outermost regions reflex' within the institutions and to set up a new directorate for the outermost regions (points 5 and 6). The Commission is committed to enshrining the specificities of the outermost regions - as recognised in Article 349 TFEU - across all relevant EU policies. For this purpose, the Commission services coordinate and cooperate on all matters of potential relevance for these regions, including in the framework of a dedicated 'Outermost Regions Interservice Group'. In addition, the Commission has recently updated its Better Regulation			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		guidelines, strengthening territorial impact assessments, to ensure that such assessments systematically take into account the needs and specificities of the outermost regions and other specific territories.			
3)	9. Calls for the establishment of a genuine communication strategy which would, in particular, involve young people and inform them about the opportunities offered by the EU and raise their awareness of the usefulness of Europe in their daily lives; calls for a Commission office to be set up in each OR, taking into account the archipelagic nature of many of these regions and their multiple and geographically separated territories;	The Parliament emphasizes the importance of communication to raise awareness about the role of Europe in the outermost regions, in particular involving young people (point 9). The European Year of Youth 2022 will offer ample such opportunities and the Commission will continue to inform the outermost regions regularly about the opportunities offered by EU policies, funds and programs.		Commission action ongoing, but too little time since the adoption of the EP resolution to assess the action.	
4)	12. Stresses the importance of the website <sup>14</sup> that provides statistical data on the ORs (Eurostat), developed in cooperation with the statistical services of Portugal, Spain and France and the ORs; deplores the fact that there are no exhaustive data on Saint Martin, which prevents comprehensive and comparative analyses of all the ORs; urges the Commission, and Eurostat in particular, to collect reliable, aggregated and up-to-date data from the ORs, which will enable sectoral analyses, and also to assess the impact of implementing European policy in the ORs;	No specific reply is provided to this particular point.		Not mentioned.	

<sup>14</sup> [https://ec.europa.eu/eurostat/cache/RCI/#?vis=outermost.population\(=fr](https://ec.europa.eu/eurostat/cache/RCI/#?vis=outermost.population(=fr)

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	14. Highlights that the dialogues with the citizens are a fundamental element in inducing proximity and building bridges between the ORs and the European institutions; calls, in this context, on the Commission to intensify these dialogues, in particular in the ORs;		Consolidated reply points 14-17. [...] The Commission is committed to dialogue with citizens and civil society and intends to strengthen such dialogue.		No further/specific actions proposed/promised to be taken by the Commission.	
6)	15. Calls on the Commission to help build a new strategy for and with the ORs that responds to local realities and needs and reflects the European Parliament's recommendations, and that is based on respect for their specific characteristics, consolidation of what has been achieved and optimisation of existing arrangements, innovation and an appreciation of the ORs as 'territories offering solutions';		Consolidated reply points 14-17 The Parliament also calls for a new strategy for and with the outermost regions and suggests strengthening the dialogue with citizens from these regions (points 14 to 17). The Commission agrees with the Parliament and intends to adopt a new Communication shaping and updating the strategic approach towards the outermost regions - as key partners in a green, digital and fair recovery. For this purpose, the Commission published a Roadmap on 12 May 2021 and undertook an open consultation, as well as targeted consultations over the past few months. The Commission is committed to dialogue with citizens and civil society and intends to strengthen such dialogue.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	<p>19. Calls on the Commission, the Member States and the ORs to make the fight against poverty, unemployment and social exclusion – including the exclusion of people with disabilities – the priorities of European solidarity, while investing in education and training and in future projects focusing on innovation, especially social innovation, reskilling and diversification;</p>	<p>Regarding the Parliament’s calls for fighting poverty, unemployment, and social exclusion in the outermost regions (points 19 to 21), the Commission draws attention to the European Pillar of Social Rights Action Plan, which includes targets and initiatives to combat poverty and social exclusion. The Plan aims to reduce the number of people at risk of poverty or social exclusion by at least 15 million by 2030, including at least 5 million children.</p> <p>The European Social Fund Plus (ESF+) 2021-2027 will be the key instrument to assist Member States and their regions – including the outermost regions - in implementing the Pillar, and as such, investing in policies that promote social inclusion, with at least 25% of national envelopes devoted to this priority.</p> <p>The new ALMA (Aim, Learn, Master, Achieve) initiative implemented under the ESF+ funding to support the integration of young disadvantaged people not in employment, education or training (NEET) and at high risk of social exclusion, which is an important challenge in the outermost regions. Erasmus+ and the European Solidarity Corps Programmes – which promote equal opportunities and access, inclusion, diversity and fairness across all their actions – provide opportunities for young people and organisations from the outermost regions.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">European Social Fund Plus (ESF+)</a> , <a href="#">new ALMA</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	<p>26. Stresses, in this regard, the need to prioritise investment in all levels of education and lifelong training in the ORs as a way of preventing school drop-out; urges the Commission to regard education as a 'key element' in the development of the ORs, by helping regional and local authorities to design public policies that encourage young people and offer them new and attractive educational, training, skilling and reskilling options at local and regional level, including digital skills, whether through face-to-face learning or distance learning, so that they can build up a set of recognised skills;</p>	<p>Cosolidated reply to points 26 and 29.</p> <p>Regarding the Parliament's call for prioritising youth and education, (points 25, 26 and 29), the Commission recalls that the European Social Fund Plus (ESF+) as well as Erasmus+ are the key instruments to provide support to the outermost regions in these areas. For the first time, in the 2021-27 cohesion policy budget there is a new specific additional allocation for the outermost regions under the ESF+, worth €372 million, whose main objective is to reduce the obstacles linked to geographical remoteness, including through measures promoting the mobility of students, trainees and job-seekers. The ESF+ Regulation earmarks 12.5% of the ESF+ envelope of each outermost region with a significant NEET rate for measures to support young people. The outermost regions will also receive the highest co-financing rate (85%) under ESF+. As part of the ESF+, the Employment and Social Innovation (EaSI) strand will continue supporting initiatives addressing young people, such as "Your First EURES job" as well as mobility schemes tackling youth unemployment and skills mismatches. The new ALMA initiative will also target young disadvantaged people in these regions with the ultimate aim to integrate them into the labour market.</p> <p>Under the European Education Area, the Commission launched a new initiative – 'Pathways to School Success' - which can address some of the outermost regions' challenges. 'Pathways to School Success' promotes better educational outcomes by reducing underachievement in basic skills (reading, maths, science) and early leaving from education and training. This initiative will focus on disadvantaged groups and promote e.g. exchanges of information between education systems in the use of EU funds within operational programmes.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p><a href="#">European Social Fund Plus (ESF+).</a></p> <p><a href="#">Your First EURES job.</a></p> <p><a href="#">Pathways to School Success.</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	<p>29. Calls on the Commission to support youth employment in the ORs by working with the private sector, universities and local authorities to establish a digital one-stop shop in order to help young people who are seeking their first job or looking to establish or take over businesses in the ORs;</p>	<p>Consolidated reply to points 26 and 29.</p> <p>Regarding the Parliament’s call for prioritising youth and education, (points 25, 26 and 29), the Commission recalls that the European Social Fund Plus (ESF+) as well as Erasmus+ are the key instruments to provide support to the outermost regions in these areas. For the first time, in the 2021-27 cohesion policy budget there is a new specific additional allocation for the outermost regions under the ESF+, worth EUR 372 million, whose main objective is to reduce the obstacles linked to geographical remoteness, including through measures promoting the mobility of students, trainees and job-seekers. Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	<p>39. Urges the Commission to increase the budgets allocated to campaigns to promote and raise awareness and appreciation of EU quality schemes, particularly:</p> <p>(i) products with a Protected Designation of Origin (PDO), Protected Geographical Indication (PGI) and Traditional Speciality Guaranteed (TSG), and voluntary certification schemes;</p> <p>(ii) organic production methods;</p> <p>(iii) logos for specific quality agricultural products from the ORs;</p>	<p>Regarding the Parliament’s call for increasing the budget for EU quality schemes (point 39), the Commission highlights that the budget allocated to co-funding the promotion of quality schemes has increased significantly since 2018. A specific ring-fenced amount for co-funding the promotion of EU organic products was introduced in 2021 in line with the Biodiversity Strategy and the Organic Action Plan. The Commission is reviewing its agri-food promotion policy, with a view to enhancing its contribution to sustainable production and consumption.</p>		<p>The Commission proposal for <a href="#">revision of quality schemes of agri products</a> is postponed to 2022.</p>	
11)	<p>43. Calls on the Commission to set up pilot projects in the ORs focusing on the blue economy and training, which would give these regions a leading position in ocean governance, and to support innovation and research, including on hydro-biodegradable materials, with a view to supporting the transition to a circular economy, keeping in mind that these materials are not a solution to marine pollution;</p>	<p>As regards the Parliament’s call for supporting the outermost regions in maritime policy, blue growth and food autonomy (points 42 to 44), the Commission recalls its commitment to supporting the outermost regions in seizing the opportunities offered by their large exclusive economic zones, in protecting their exceptionally diverse ecosystems, and in developing sustainable blue economy strategies as expressed in its Communication on the Sustainable Blue Economy of May 2021. The Commission is supporting the outermost regions in shaping Blue Economy Strategies with seminars, methodological guidance and advice.</p> <p>The European Maritime Aquaculture and Fisheries Fund (EMFAF) provides specific support to the outermost regions’ fisheries, aquaculture and other blue economy sectors; and offers a high degree of flexibility to these regions in developing tailored actions needed e.g. for recovery and food autonomy.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p><a href="#">Communication on the Sustainable Blue Economy of May 2021.</a></p> <p><a href="#">The European Maritime Aquaculture and Fisheries Fund (EMFAF).</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	46. Urges the Commission to help the Member States to improve the collection of the scientific data needed to meet the eligibility conditions for fishing fleet renewal State aid in the ORs;	<p>On the issue of fishing fleet renewal and gathering of data as a necessary precondition for granting State aid (points 45 and 46), the Commission is aware of the outermost regions challenges regarding working conditions in vessels and health and safety of fishers, which in certain cases requires modernising or renewing the fleets. While the EMFAF Regulation does not allow financing of fleet renewals, it can support certain investments on board under specific conditions e.g. investments in low-impact fishing techniques, in safety on board or in energy efficiency. With the 2018 amendment to the Guidelines for the examination of state aid to the fishery and aquaculture sector, the Commission introduced the possibility to grant state aid for the renewal of the fishing fleet exclusively in the outermost regions, subject to specific conditions, i.e. provided that the fishing capacity in the relevant fleet segment is in balance with fishing opportunities available to that fleet segment. The Commission provides ample support under the European Maritime and Fisheries Fund 2014-2020 (EMFF) and EMFAF to collect the data required to provide such aid.</p> <p>The Commission has launched a study to identify gaps in data collection in the outermost regions to assist their Member States in the necessary data gathering accordingly.</p>	C C	<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>The work on the study appears to be ongoing.</p>	C C
13)	48. Calls on the Commission and the Council to establish by 2027 a support instrument similar to the POSEI scheme for the maritime and fisheries	Although the follow-up does not mentions point 48, the Commission however states that Financial allocations for the POSEI programme in 2021-2027 will be fully maintained at their 2014-2020 levels. POSEI allocations	C C	No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	C C

	ORs, and calls, too, for the creation of a trans-OR nature network;				
16)	66. Calls on the Commission to propose strong support to be provided to the ORs in order to promote a new sustainable economic model, with structural initiatives for developing the circular economy and promoting jobs and new 'green' professions;	No specific reply is provided to this particular point.		Not mentioned.	
17)	68. Calls on the Commission to establish in the ORs a centre for combating marine pollution and to support the development of infrastructure for collecting and treating marine litter;	On the Parliament's proposal for a centre in the outermost regions for combating marine pollution (point 68), the Commission recalls that the Member States and their outermost regions can design measures to combat marine pollution and collect/ treat marine litter with the support of the European Maritime Aquaculture and Fisheries Fund.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
18)	69. Calls on the Commission to invite applications for scientific research projects for the ORs under the Horizon Europe programme, following on from the achievements of the Horizon 2020 programme;	The Parliament suggests inviting applications for scientific research projects for the outermost regions under Horizon Europe (point 69). In 2018, the Commission launched a specific call worth EUR 4.3 million for a project (on going) bringing together outermost regions to prepare local actors to seize research opportunities under Horizon 2020. There are multiple calls and missions of interest to the outermost regions (e.g. on blue economy, green transition, biodiversity, space, etc.) in pillar II "Global Challenges and European Industrial Competitiveness" of Horizon Europe to which the Commission encourages the outermost regions to apply. The widening and sharing excellence component of Horizon Europe – which seeks to support research and innovation capacity - is now fully accessible to the outermost regions, offering opportunities to help unlock their potential in research and innovation.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	71. Calls on the Commission to develop and promote macro-regional strategies for the ORs in their respective geographical areas, while examining all opportunities for better coordination in practice of the simultaneous measures under the various EU funds (ERDF, Overseas Association Decision and Europe in the world (Neighbourhood, Development and International Cooperation Instrument));	<p>Consolidated reply to points 71-72</p> <p>The Parliament calls for establishing macro-regional strategies for the outermost regions including taking into account the specificities of these regions in the 'Atlantic macro-regional strategy' (points 70 to 72). The Commission welcomes developing macro-regional strategies including for the geographic areas of which the outermost regions are part, when requested by the concerned EU Member States. The Atlantic action plan 2.0 (COM(2020) 329 final) emphasises the importance of involving regions in the Atlantic maritime strategy. To that end, the Atlantic Strategy Committee, which is the executive body of the action plan, ensures the involvement of representatives of the coastal regions, which can include outermost regions.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
20)	72. Calls on the Commission to take account of the ORs in the Atlantic macro-regional strategy by including topics relevant to them;	<p>Consolidated reply to points 71-72</p> <p>The Parliament calls for establishing macro-regional strategies for the outermost regions including taking into account the specificities of these regions in the 'Atlantic macro-regional strategy' (points 70 to 72). The Commission welcomes developing macro-regional strategies including for the geographic areas of which the outermost regions are part, when requested by the concerned EU Member States. 	remoteness from the European continent and their small markets, when implementing its competition policy; points out that State aid derogations for the ORs are particularly useful;			Not mentioned.	
22)	77. Welcomes the adaptation of EU State aid legislation to the crisis resulting from COVID-19; calls on the Commission to study the need to permanently continue some of these exceptional measures for the ORs, together with the measures already adopted for these regions under the General Block Exemption Regulation <sup>15</sup> and the Guidelines on Regional State Aid;	The Parliament calls for continuing exceptional measures under EU State aid legislation (point 77). The specificities of the outermost regions are reflected in the Regional aid Guidelines, as well as in the regional aid section of the General Block Exemption Regulation, whereby undertakings in the outermost regions may get full compensation for additional costs stemming from their specific constraints. This approach is maintained in the new Regional aid Guidelines adopted on 19 April 2021. The specificities of the outermost regions are also reflected in the sector specific State aid instruments in the agricultural and fishery sectors (the agricultural block exemption Regulation (EU) No 702/2014, the fishery and aquaculture block exemption Regulation (EU) No 1388/2014 as well as the specific European Union Guidelines on State aid in these two sectors), which provide for higher aid intensities for the outermost regions. This approach will be maintained in the new State aid rules for these two sectors, which are scheduled to apply as from 1 January 2023. The Temporary Framework aims to address liquidity issues that companies face in light of the COVID-19 outbreak and as such is not meant as a permanent instrument.		The work on the rules appear to be ongoing. <a href="#">Regional State Aid</a>	
23)	79. Reiterates that significant constraints, linked to their remoteness, poor connectivity, dependence on ports and airports, and terrain, put the ORs at a disadvantage; considers that it is necessary to have	Consolidated reply to points 79, 80, 85 Regarding the Parliament's call for a POSEI transport programme for the outermost regions and their specific		No further/specific action proposed to be taken by the Commission.	

<sup>15</sup> Commission Regulation (EU) No 651/2014 of 17 June 2014 declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty (OJL 187, 26.6.2014, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	a transport policy that is fully adjusted to the reality of the ORs, within the framework of the ERDF and the Connecting Europe Facility (CEF)); calls on the Commission to establish a POSEI transport programme as an additional tool, in order to compensate for the combined disadvantages and losses;	connection needs (points 79 to 80 and 85), the Commission recognises the outermost regions' specific connection challenges and the need to provide adequate Union funding to match those needs. Consequently, the Connecting Europe Facility 2021-27 includes more favourable conditions for projects located in the outermost regions with a co-financing rate of up to 70 % as well as specific attention to the outermost regions in the award criteria. [...]			
24)	84. Urges the Commission to ensure that the CEF involves a call specific to the ORs with adapted eligibility criteria, so that support can be provided for alternative and sustainable fuel supply infrastructure in the regions' main ports, as well as for urban mobility and aviation;	Regarding the Parliament's suggestion for specific calls to the outermost regions under the Connecting Europe Facility (CEF) (point 84), the Commission recalls that the first CEF Transport call for proposals for the period 2021-2027 was published on 16 September 2021, making EUR 7 billion available to support infrastructure projects across the EU. This call is open to outermost regions, and it specifically highlights support to the development of outermost regions' maritime ports.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  The first <a href="#">CEF Transport call for proposals</a> for the period 2021-2027.	
25)	85. Calls on the Commission to integrate the OR dimension when revising Regulation (EU) No 1315/2013 on trans-European transport networks <sup>16</sup> , by ensuring the interconnection of the central and global networks, and by relaxing the conceptual framework of motorways of the sea;	Consolidated reply to points 79, 80, 85  [...] the Commission intends to present a legislative proposal to revise the Trans-European Transport Network (TEN-T) regulation in December 2021, which seeks to reinforce measures contributing to enhanced accessibility and connectivity, including accessibility to outermost regions, islands, and other remote, isolated and sparsely populated parts of the EU. The Commission intends to modernise the "motorways of the sea" concept into "European maritime space" which will encompass all dimensions of maritime transport.		No further/specific action proposed to be taken by the Commission.	

<sup>16</sup> OJL 348, 20.12.2013, p. 1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
26)	87. Welcomes the Digital Europe programme's proposal that seeks to promote greater connectivity and better digital skills in the ORs; calls on the Commission to provide the technical support needed to set up European digital innovation hubs in the ORs, as envisaged in the Digital Europe Programme;	Concerning the Parliament's call for technical support to set up European digital innovation hubs in the outermost regions (point 87), the Commission will select the initial network of European Digital Innovation Hubs from entities pre-selected by the Member States and will verify whether the needs of the outermost regions are sufficiently covered. If this is not the case, a call for specific entities will be organised in line with the Digital Europe Programme.		The selection of <a href="#">initial network of European Digital Innovation Hubs</a> appear to be ongoing.	
27)	89. Draws attention to the fact that satellites provide uninterrupted very high-capacity connectivity, which is essential for overcoming the digital divide, particularly in the ORs; calls on the Commission, therefore, to update the European Space Strategy, adopting specific measures for the ORs;	Concerning the call for an update of the European Space Strategy (point 89) to adopt specific measures for the outermost regions, the Commission intends to present a legislative proposal on building an EU space-based global secure communication system. One of the objectives of this initiative is to provide high-speed broadband availability across the EU and worldwide to overcome existing gaps and address growing data and service demands. It will benefit all EU regions, including those that face challenges such as remoteness, insularity or difficult topography and climate as the outermost regions do.		The Commission <a href="#">proposal</a> is expected in Q2/2022.	
28)	90. Calls on the Commission to ensure that the ORs benefit fully from international agreements (economic partnership agreements (EPAs), free trade agreements (FTAs), etc.) concluded between the EU and third countries by creating an 'OR impact of trade policy' task force, which would ensure the effective involvement of the ORs, including representatives from the OR economic sectors;	Consolidated reply to points 90, 91 The Parliament calls for ensuring that the outermost regions benefit from international agreements, measuring the cumulative impact of trade agreements on these regions, respect for environmental and social standards in trade agreements as well as protection of sensitive agricultural products from these regions (points 90 to 94). The Commission recalls that the outermost regions are part of the negotiations process, mandate and consultations via their Member States. The Commission conducts all evaluations on specific trade		No further/specific action proposed to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>policy initiatives, both ex-ante and ex-post, with specific analyses on the impact on the outermost regions.</p> <p>Trade and Sustainable Development (TSD) chapters in the EU's bilateral trade agreements are ambitious, broad, binding and enforceable through a dedicated TSD dispute settlement mechanism. The Commission has made substantial efforts to improve the implementation and the enforcement of these chapters and launched a TSD Action Plan for this purpose. At present, the Commission is reviewing the TSD Action Plan to address the challenges that have arisen with the evolution of the Commission's thinking on trade policy and the recovery from the COVID-19 pandemic. The Review includes an open public consultation as well as a comparative study on how other major trading economies implement and enforce TSD commitments in their trade agreements. The Review is expected to be completed during the first half on 2022.</p> <p>The Commission is committed to taking into account the interests of the outermost regions for their sensitive products when negotiating or renegotiating trade agreements. These sectors, especially bananas, sugar and rum, are treated as sensitive in trade negotiations. Trade agreements provide for a bilateral safeguard clause: measures can be taken, if as a result of the reduction or elimination of duties, goods are imported in such increased quantities and under such conditions as to cause - or threaten to cause - serious damage to a domestic industry producing similar or directly competitive goods. The agreement with Mercosur provides for a specific safeguard clause for the outermost regions.</p>			
29)	91. Calls on the Commission to carry out a study measuring the cumulative impact of trade	Consolidated reply to points 90, 91.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as

	agreements with third countries on the socio-economic development of the ORs;	[...] The Commission conducts all evaluations on specific trade policy initiatives, both ex-ante and ex-post, with specific analyses on the impact on the outermost regions. [...]		according to the Commission, it has been already working on action falling under the scope of the EP request.	

4.1.26.6. REGI Resolution 6: EP resolution of 14 September 2021 on a new approach to the Atlantic maritime strategy

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>A new approach to the Atlantic maritime strategy</b>		14/9/2021 <a href="#">T9-0369/2021</a> <a href="#">2020/2276(INI)</a> <b>REGI</b>	<a href="#">SP(2021)709</a>	Final reply (SP) received 18 January 2022	Mixed reply			
1)	11. Stresses that greater synergies are needed between the different EU funds, strategies and programmes, particularly directly managed programmes and national and regional programmes, in order to support a sustainable, robust and competitive blue economy in the Atlantic regions; calls on the Commission to consider labelling projects that meet the various priorities and objectives of the new strategy, in order to make them easier to finance under the relevant EU programmes and funds [...];	Consolidated reply to points 11 and 13. Concerning the lack of earmarked funding attached to the Atlantic action plan (points 5, 11 and 13), it should be highlighted that the European Funds, including the future territorial cooperation programme (Interreg) in the Atlantic area and the European Maritime, Fisheries and Aquaculture Fund (EMFAF), are expected to be the main sources of funding. Interreg transnational programmes will support blue funding elements, once they are part of the national programmes.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.		
2)	13. Stresses the importance of making EU funding programmes widely known to potential beneficiaries and calls on the Commission to issue a clear and simplified guide on all of these opportunities; furthermore invites the Commission to consider labelling projects to make the European dimension visible to the public;	Consolidated reply to points 11 and 13. Concerning the lack of earmarked funding attached to the Atlantic action plan (points 5, 11 and 13), it should be highlighted that the European Funds, including the future territorial cooperation programme (Interreg) in the Atlantic area and the European Maritime, Fisheries and Aquaculture Fund (EMFAF), are expected to be the main sources of funding. Interreg transnational programmes will support				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>blue funding elements, once they are part of the national programmes.</p> <p>Although the follow-up mentions point 13, no specific reply provided for this particular point on issuing a clear and simplified guide [...]</p>			
3)	<p>24. Stresses the need to develop high-quality, smart and sustainable tourism as this is a crucial sector of the blue economy, and expects Parliament and the Commission to launch pilot projects in this area;</p> <p>urges the Commission to ensure that the Atlantic action plan 2.0 is properly aligned with the coastal and maritime tourism strategy and calls for an immediate reassessment of the latter;</p> <p>calls, furthermore, on the Commission and the Member States to develop new forms of sustainable maritime and coastal tourism that enhance the value of these areas by diversifying the activities on offer, while at the same time preserving them by combating the harmful effects of mass tourism on coastlines, the environment and cultural heritage;</p> <p>highlights the importance of the circular economy in the tourism sector in developing more sustainable practices that benefit local development and local employment throughout the year; notes the significant potential of gastronomic tourism linked in</p>	<p>On the lacking reference to tourism, sustainable fisheries and aquaculture (points 19, 24 and 25) in the revised action plan, the Commission stresses that the purpose of the revised action plan was to bring in a thematic focus, which was clearly missing in the previous action plan. Such a thematic focus was manifested in the clearly defined four thematic pillars, which were identified jointly by the participating Member States and regions through a bottom up consultation process. Tourism, sustainable fisheries and aquaculture were not among the chosen themes. Nevertheless, the Commission is currently exploring ways with the Member States on how to integrate these themes in the action plan's implementation. Finally, the Common Fisheries Policy is dealing with matters specifically related to fisheries in the Atlantic area.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	particular to fisheries and aquaculture products;				
4)	27. Calls on the Commission, the Member States and their regions to foster innovative environmental and socioeconomic sustainable projects in the Atlantic maritime sectors, in and around ports, all along the Atlantic shoreline and in maritime territories, such as the installation of 'green' maritime loading infrastructure;	No specific reply is provided to this particular point.		Not mentioned.	
5)	28. Calls on the Commission to include in the new Atlantic action plan more measures to promote connectivity between ports and airports, when applicable, by enhancing their sustainability, and the development of maritime hinterland areas via multimodal connections; regrets the persistent problems concerning the interoperability of rail transport in the Atlantic Corridor;	Consolidated reply to point 28-32. On ports and connectivity (points 28 to 32), it is important to highlight that one of the four thematic pillars on the revised action plan addresses directly the issue of improving connectivity in the Atlantic area including the developing a trans-European transport network (TEN-T) motorways of the Sea in the Atlantic area among other related actions. Innovation in ports is another stated objective of the revised action plan. To that end, the Commission has already co-funded a project (supported by the European Maritime and Fisheries Fund -EMFF) called Aspban <sup>17</sup> that has kick-started in May 2021 with the aim to establish an innovative network of Atlantic port accelerator involving start-ups and SMEs so that ports can be transformed into true blue hubs.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>17</sup> AspBAN project 2021 – Atlantic smart ports blue acceleration network.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	29. Calls on the Commission and the Member States to complete priority projects included in the trans-European transport network (TEN-T) for the Atlantic Corridor, especially in cross-border areas and in the context of the future TEN-T guidelines and the Connecting Europe Facility (2021-2027), and to promote and invest in the full development of the TEN-T motorways of the sea connecting islands to the mainland;	<p>Consolidated reply to points 28-32.</p> <p>On ports and connectivity (points 28 to 32), it is important to highlight that one of the four thematic pillars on the revised action plan addresses directly the issue of improving connectivity in the Atlantic area including the developing a trans-European transport network (TEN-T) motorways of the Sea in the Atlantic area among other related actions. Innovation in ports is another stated objective of the revised action plan. To that end, the Commission has already co-funded a project (supported by the European Maritime and Fisheries Fund -EMFF) called Aspban<sup>18</sup> that has kick-started in May 2021 with the aim to establish an innovative network of Atlantic port accelerator involving start-ups and SMEs so that ports can be transformed into true blue hubs.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
7)	30. Calls on the Commission and the Atlantic regions to develop strategies to eliminate rail bottlenecks, to continue with the development of high-speed rail links and the parallel upgrading of conventional lines, providing cross-border continuity, to draw up plans for multimodal transfer to sustainable modes of transport, to support the development of the Atlantic rail motorway, to enhance rail-port connections and to link them with other major TEN-T corridors, in particular the Mediterranean, North Sea-Mediterranean and Rhine-Alps corridors, as well as the other lines on the Atlantic Corridor, taking into account the objectives of the European Green Deal and	<p>Consolidated reply to points 28-32.</p> <p>On ports and connectivity (points 28 to 32), it is important to highlight that one of the four thematic pillars on the revised action plan addresses directly the issue of improving connectivity in the Atlantic area including the developing a trans-European transport network (TEN-T) motorways of the Sea in the Atlantic area among other related actions. Innovation in ports is another stated objective of the revised action plan. To that end, the Commission has already co-funded a project (supported by the European Maritime and Fisheries Fund -EMFF) called Aspban<sup>19</sup> that has kick-started in May 2021 with the aim to establish an innovative network of Atlantic port accelerator involving start-ups and SMEs so that ports can be transformed into true blue hubs.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>18</sup> Idem.

<sup>19</sup> Idem.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the EU biodiversity strategy for 2030; notes with satisfaction the planned realignment of the maritime corridors between mainland Europe and Ireland following Brexit, and in particular the integration of Ireland into the Atlantic Corridor;				
8)	32. Calls on the Commission to boost the decarbonisation of maritime transport as a way to promote investments improving sustainability; invites the Commission and the maritime transport industry to evaluate the benefit of establishing an EU partnership for maritime transport, to foster innovation within the sector, to contribute to decarbonisation, to create infrastructure for loading, storing and supplying alternative fuels in ports and cargo terminals, and to develop waste management plans for Atlantic ports;	Consolidated reply to points 28-32. On ports and connectivity (points 28 to 32), it is important to highlight that one of the four thematic pillars on the revised action plan addresses directly the issue of improving connectivity in the Atlantic area including the developing a trans-European transport network (TEN-T) motorways of the Sea in the Atlantic area among other related actions. Innovation in ports is another stated objective of the revised action plan. To that end, the Commission has already co-funded a project (supported by the European Maritime and Fisheries Fund -EMFF) called Aspban <sup>20</sup> that has kick-started in May 2021 with the aim to establish an innovative network of Atlantic port accelerator involving start-ups and SMEs so that ports can be transformed into true blue hubs.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
9)	40. Supports research on the oceans and calls on the Commission and the Atlantic regions, under Pillar IV of the action plan, to promote a major joint project to clean up the Atlantic Ocean and its seabed, to support oceanographic research and observation on the ocean floor, and to promote sustainable	Consolidated reply points 40-49. Concerning the thematic pillar of healthy ocean and resilient coasts (points 39 to 48), the Commission welcomes the suggestions put forward in the resolution and it will explore further the feasibility of the actions proposed, such as developing enhanced prevention and risk management capabilities with the relevant stakeholders.		Because of a general character of the Commission reply, it is unclear whether the Commission has delivered or not.	

<sup>20</sup> Idem.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	measures for pollution prevention; calls, in this context, for the development of actions to contribute to the protection and decarbonisation of maritime sources, such as the carbon produced by vessels;				
10)	41. Is of the opinion that the circular economy should be expanded through the collection of maritime litter and its reintroduction into the economy; urges the Commission to support the construction of centres for the collection and treatment of plastics and other marine refuse, particularly in the Atlantic ORs, which are heavily affected by waste carried by marine currents; suggests that a centre to prevent and combat marine pollution be set up in one of the Atlantic ORs;	Consolidated reply points 40-49. Concerning the thematic pillar of healthy ocean and resilient coasts (points 39 to 48), the Commission welcomes the suggestions put forward in the resolution and it will explore further the feasibility of the actions proposed, such as developing enhanced prevention and risk management capabilities with the relevant stakeholders.		Because of a general character of the Commission reply, it is unclear whether the Commission has delivered or not.	
11)	42. Calls on the Commission and the Member States and their regions to develop enhanced prevention and risk management capabilities to deal with accidents on land and at sea and natural disasters; calls on the Commission to work closely with the European Maritime Safety Agency to support Member States in mitigating shipping-related environmental risks and in improving the overall sustainability and safety of the maritime sector;	Consolidated reply points 40-49. Concerning the thematic pillar of healthy ocean and resilient coasts (points 39 to 48), the Commission welcomes the suggestions put forward in the resolution and it will explore further the feasibility of the actions proposed, such as developing enhanced prevention and risk management capabilities with the relevant stakeholders.		Because of a general character of the Commission reply, it is unclear whether the Commission has delivered or not.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	43. Welcomes the reference in the Atlantic action plan 2.0 to the mapping and preservation or the recreation of coastal wetlands as part of Goal 6 on achieving stronger coastal resilience; calls on the Commission to ensure that these areas have effective management plans;	Consolidated reply points 40-49. Concerning the thematic pillar of healthy ocean and resilient coasts (points 39 to 48), the Commission welcomes the suggestions put forward in the resolution and it will explore further the feasibility of the actions proposed, such as developing enhanced prevention and risk management capabilities with the relevant stakeholders.		Because of a general character of the Commission reply, it is unclear whether the Commission has delivered or not.	
13)	45. Calls on the Commission to draw up, in collaboration with the International Maritime Organization, ambitious initiatives and a road map for ship decarbonisation based on an in-depth impact assessment;	Consolidated reply points 40-49. Concerning the thematic pillar of healthy ocean and resilient coasts (points 39 to 48), the Commission welcomes the suggestions put forward in the resolution and it will explore further the feasibility of the actions proposed, such as developing enhanced prevention and risk management capabilities with the relevant stakeholders.		Because of a general character of the Commission reply, it is unclear whether the Commission has delivered or not.	
14)	46. Calls on the Member States to designate large protected maritime areas, and emphasises the importance of protecting all marine species; underscores the fact that marine protected areas do not only protect marine ecosystems, but also play a role in climate mitigation and adaptation and contribute to healthy and resilient oceans; reiterates the call of the Commission, in its biodiversity strategy for 2030, for at least 30 % of sea area in the EU to be protected, including through fish stock recovery areas, as provided for in the common fisheries policy, and for at	Consolidated reply points 40-49. Concerning the thematic pillar of healthy ocean and resilient coasts (points 39 to 48), the Commission welcomes the suggestions put forward in the resolution and it will explore further the feasibility of the actions proposed, such as developing enhanced prevention and risk management capabilities with the relevant stakeholders.		Because of a general character of the Commission reply, it is unclear whether the Commission has delivered or not.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	least 10 % of EU waters to be classed as strictly protected areas <sup>21</sup> ;				
15)	54. Calls on the Commission, in the context of the specific Atlantic strategy goals, to focus on the least-developed regions of the Atlantic area; considers it fundamental to increase the number of specific calls for projects in the Atlantic regions, including for small, medium and large-scale transatlantic projects, on the less developed socioeconomic priorities of the Atlantic strategy; recalls, in this context, the importance of fully implementing the partnership principle, with socioeconomic partners and other stakeholders being involved in the drawing up of the cohesion policy programmes in the Atlantic regions, also in order to ensure better planning and implementation of the projects on the ground;	On governance (point 54), it is to be highlighted that the Commission has been working intensively with Member States and regions in order to embed the priorities of sea-basin and macro-regional strategies in the EU-funded operational programmes. Key macro-regional strategy implementers are more and more promoting cooperation with national authorities managing EU-funded operational programmes. Consequently, for the period 2021-2027, authorities accelerate their efforts to align national/regional EU funding programmes under shared management with the priorities and objectives of the four existing macro-regional strategies. This is the so called 'embedding' process. In addition, the Commission is also keen to facilitate the alignment between the Interreg Atlantic Area Programme and the revised Atlantic action plan.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
16)	58. Urges the Commission to review the current strategy, given the serious shortcomings identified;	No specific reply is provided to this particular point.		Not mentioned.	

<sup>21</sup> The EU biodiversity strategy for 2030 sets the objectives to legally protect a minimum of 30 % of the EU's land areas and 30 % of its sea area and to integrate ecological corridors (which means an extra 4 % of land and 19 % of sea areas compared to today). Moreover, it requires 10 % of EU land and 10 % of EU seas to be strictly protected areas (today, only 3 % of land and less than 1 % of marine areas are under strict protection).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	60. Calls on the Commission to conduct an in-depth analysis on the benefits to the Member States and their regions of implementing an Atlantic macro region, which would address the common challenges faced by these regions; calls on the Commission to take the specificities of ORs into consideration in the action plan and in its analysis of the creation of an Atlantic macro region and stresses the need to take due account of their specificities by developing in each basin – the Caribbean basin, the Amazon basin and the Macaronesia basin – dedicated strategies focusing on the ORs' particular challenges, thereby guaranteeing that no region is left behind;	On the development of a macro-regional strategy (points 59 and 60) in the Atlantic area, it is important to highlight that macro-regional strategies and sea-basin strategies have a significant role to play in helping participating countries, including third countries, and regions in contributing to EU priorities. These priorities include the European Green Deal, the European Digital Strategy, 'An economy that works for people' and 'A stronger Europe in the world'. Concretely, macro-regional strategies have helped for example to improve the water quality of the Baltic and Adriatic-Ionian Seas. In the Baltic Region, they have also contributed to the increase of knowledge of the 'blue bio economy' through a dedicated platform <sup>22</sup> . In the Adriatic and the Ionian regions, they facilitated knowledge transfer on blue technologies <sup>23</sup> .		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent six written replies to the Parliament’s seven TRAN resolutions. In all six cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one TRAN resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted two specific and three general replies as well as one mixed reply. At the cut-off date of this study, the Commission had not yet replied to 45 of Parliament’s 214 requests.

### Analysis of the Commission actions

The Commission proposed/promised 128 genuine actions. In 64 cases, no further specific actions were proposed/promised to be taken by the Commission and in 43 cases it remained unclear if an action was carried out. In 68 cases, due to the lack of reply to the Parliament's request, no action was mentioned. Among the 128 actions proposed/promised by the Commission, the Commission already carried out the action in 46 cases. In the 82 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.27.1. TRAN Resolution 1: EP resolution of 20 January 2021 on revision of the Trans-European Transport Network (TEN-T) guidelines

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Revision of the Trans-European Transport Network (TEN-T) guidelines		20/01/2021 <a href="#">T9-0010/2021</a> <a href="#">2019/2192(INI)</a> TRAN	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	General reply			
1)	5. [...] calls on the Commission to take over all adjustments laid down in the revision of the CEF <sup>7</sup> , as well as the requirements arising from the Commission's proposal for a regulation on streamlining measures for advancing the realisation of the TEN-T (COM(2018)0277);		No specific reply is provided to this particular point (on taking over adjustments laid down in the revision of the CEF).				Not mentioned.	
2)	6. Urges the Commission to prioritise under the TEN-T the full deployment of alternative fuels for all modes of transport, especially renewable fuels, with a view to decarbonisation, including the development of relevant technologies, charging and refuelling infrastructure (i.e. e-charging facilities and LNG and hydrogen refuelling facilities), safety, security and interoperability standards, and the regulatory framework for alternative fuels in order to achieve climate neutrality by 2050, while respecting the principle of technology neutrality and ensuring technological diversity;		As regards the standards and requirements by transport mode, the Commission will be looking into how to strengthen them as to enhance the efficiency and intermodality of the network and to contribute to a low-emission mobility whilst respecting a technology neutral approach for the introduction of alternative fuels.				Because of a general character of the promise, it is unclear how this will be implemented. On 14 December 2021, the Commission published the <a href="#">proposal</a> for a revision of the <a href="#">Regulation on the trans-European transport network</a> .	

<sup>7</sup> In particular, the adjustments laid down in Part III of the Annex (to the European Parliament legislative resolution on the proposal for a regulation of the European Parliament and of the Council establishing the Connecting Europe Facility (CEF)).

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	9. [...] encourages the Commission to promote among Member States the financing of these systems under the Recovery and Resilience Facility;		No specific reply is provided to this particular point (on promoting systems under Recovery and Resilience Facility).		Not mentioned.	
4)	12. [...] calls on the Commission to propose a legislative framework to improve the risk-management, resilience and climate adaptation of transport infrastructure on the core network, all modes included;		No specific reply is provided to this particular point (on legislative framework, to improve the risk-management, resilience and climate adaptation of transport infrastructure on the core network, all modes included).		Not mentioned.	
5)	14. [...]; calls on the Commission to strengthen synergies and policy coherence between the relevant EU instruments beyond the CEF (e.g. the European Regional Development Fund) and, furthermore, to optimise the use of blending tools in order to attract private investors and leverage public funding;		No specific reply is provided to this particular point (on synergies beyond CEF, on private investors, on public funding).		Not mentioned.	
6)	15. [...] calls on the Commission to update Parliament annually on construction progress; calls on the Commission, during negotiations with the Member States, to reserve an appropriate amount of the aid for the development of EU transport policies and to submit a final report to Parliament; invites the Commission to ensure that the national programmes implementing the Recovery and Resilience Facility accord a prominent role to investments in modern, digital, sustainable and safe transport infrastructure;		No specific reply is provided to this particular point (on update of the Parliament annually on construction process).		Not mentioned.	
7)	19. [...] calls on the Commission, in this regard, to take a more targeted approach by applying higher co-financing rates to projects with the highest European added value in order to unlock national investments;		No specific reply is provided to this particular point.		Not mentioned.	
8)	20. [...] calls on the Commission to assist the Member States that wish to introduce substantive preclusion clauses – in conformity with Union law – that could speed up national judicial proceedings significantly;		No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	21. [...] <sup>8</sup> ; calls on the Commission to add a chapter on reducing unjustified administrative burdens to the TEN-T progress report;	No specific reply is provided to this particular point, however the Commission shares the European Parliament's objective to ensure the completion of the core network by 2030 and of the comprehensive network by 2050, as required by the current legal framework. Streamlining of the monitoring and reporting obligations and tools of TEN-T would certainly contribute to this objective.		No further/specific actions proposed/promised to be taken by the Commission.	
10)	22. Urges the Commission to strengthen its oversight of the implementation of the TEN-T by making use of the powers already conferred on it by the regulation, reinforcing relevant instruments to require Member States to fulfil their obligations and strengthening the role of the European coordinators in the governance of the corridors, particularly in regard to cross-border links, as well as the 'one-stop-shop' role of the designated authority in the permit granting procedure; invites the Commission to strengthen and use the provisions of Article 56 of Regulation (EU) No 1315/2013 in its revision of the TEN-T guidelines aimed at encouraging Member States to speed up the planning and completion of projects; calls on the Commission to clarify how rules and requirements are to be interpreted for the purposes of evaluation, reporting and eligibility assessments; invites the Commission to promote the exchange of best practices on civil society and stakeholder involvement and consultation between Member States and to promote these at European, national, regional and local levels;	<p>The Commission shares the European Parliament's objective to ensure the completion of the core network by 2030 and of the comprehensive network by 2050, as required by the current legal framework. Streamlining of the monitoring and reporting obligations and tools of TEN-T would certainly contribute to this objective. The role of the European coordinators and related governance tools should be strengthened to strive for a greater alignment of national infrastructure and investment plans with the requirements set by the regulation.</p> <p>In order not to endanger the completion of the network by the deadlines set in the current legislation, the Commission very much welcomes the European Parliament's resolution calling to allow only for minor changes to the TEN-T network design and to preserve the deadlines of 2030 and 2050. Any change to the maps specifying the TEN-T network will have to be in line with a transparent methodology, based on an objective and harmonised approach.</p>		On 14 December 2021 the Commission published the <a href="#">proposal</a> for a revision of the <a href="#">Regulation on the trans-European transport network</a> .	

<sup>8</sup> As stated in the provisional agreement of 17 June 2020 resulting from interinstitutional negotiations on the regulation on streamlining measures for advancing the realisation of the trans-European transport network.

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	26. Calls on the Commission, in this regard, to take further measures to increase the roll-out of alternative fuels and the deployment of electric charging points and hydrogen filling stations, taking into account possible future alternative fuel solutions and with full respect for the principle of technology neutrality;		As regards the standards and requirements by transport mode, the Commission will be looking into how to strengthen them as to enhance the efficiency and intermodality of the network and to contribute to a low-emission mobility whilst respecting a technology neutral approach for the introduction of alternative fuels.		Because of a general character of the promise, it is unclear how this will be implemented. On 14 December 2021 the Commission published the <a href="#">proposal</a> for a revision of the <a href="#">Regulation on the trans-European transport network</a> .	
12)	28. Reminds the Commission and the Member States of the need to provide sufficient safe and secure parking areas for trucks along the TEN-T to increase both road safety and the well-being of network users, in particular transport workers;		No specific reply is provided to this particular point (on parking areas for trucks).		Not mentioned.	
13)	30. Points out the potential of novel and active modes of connected mobility in the urban and local transport of people and goods; calls on the Commission and the Member States to work closely with regions and cities, particularly across borders, to enhance and complete relevant missing last-mile infrastructure and inter-modal and cross-border connections throughout the TEN-T, thus enabling more seamless and efficient use of infrastructure and services which in turn prevents congestion and reduces emissions;		No specific reply is provided to this particular point (on closer cooperation with cities, regions, etc).		Not mentioned.	
14)	31. [...] calls on the Commission to report to Parliament annually on progress in this domain; [...]		No specific reply is provided to this particular point (on annual reporting to the Parliament).		Not mentioned.	
15)	32. Calls on the Commission to regularly adopt binding periodic targets for the deployment of the ERTMS, in order to complete its introduction within the core TEN-T network, due by 2030; considers that the ERA should act as an efficient and effective system authority and fulfil its enhanced role and responsibilities on ERTMS under the Fourth Railway Package; calls for a roadmap of ERTMS implementation on rail freight corridors to be financed through a Project of Common Interest under the Recovery and Resilience Facility; points out the		No specific reply is provided to this particular point (on ERTMS and ERA).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	importance of regulatory stability regarding the technical specifications for interoperability as a means of unlocking investments in the ERTMS and asks the Commission to analyse carefully further changes when updating the TSI for 2030 and to ensure compatibility;				
16)	33. Underlines that European rail infrastructure must ensure sufficient capacity for both freight and passenger trains, providing for higher infrastructure use and generating greater return on investments; urges the Commission to prioritise cross-border train connectivity in order to strengthen the modal shift in international passenger transport; stresses in this regard the potential of night trains for climate-friendly and competitive travel; takes the view that seamless cross-border rail transport on the TEN-T network and along the European rail freight corridors requires mandatory cross-border cooperation among infrastructure managers; calls on the Commission to put forward binding measures for infrastructure managers as part of the TEN-T review;	No specific reply is provided to this particular point (on train connectivity).		Not mentioned.	
17)	35. Stresses the importance of inland waterway transport as a sustainable transport mode and underlines the need to ensure future-proof high-capacity infrastructure, and the reliability, quality and good navigability of waterways, in particular against the background of climate change; recognises the important role of ports as strategic nodes in both the core and comprehensive networks; calls on the Commission to ensure seamless links between core and comprehensive inland and maritime ports and rail and road networks, in order to facilitate multimodality; <i>calls for action to be taken to ensure the harmonised cross-border deployment of the RIS and to facilitate the uptake of innovative, efficient, and sustainable solutions in the sector;</i>	No specific reply is provided to this particular point (on seamless links between core and comprehensive inland and maritime ports and rail and road networks, etc.).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
18)	37. Emphasises the role that high-quality maritime links play, not only for the EU's international trade, but also for intra-EU trade; underlines the important role of the Motorways of the Sea pillar of the TEN-T and short sea shipping as sustainable modes of transport in this context; considers that the purpose of the Motorways of the Sea pillar is to facilitate needs-based short sea links and services, seamlessly integrated with and complementing land transport, to facilitate cooperation between maritime ports and boost their connection to their hinterlands, and to promote the development and roll-out of clean and alternative fuels, subject to impact assessment, and energy efficiency solutions for maritime transport; calls on the Commission, therefore, to evaluate which core corridor end points should be made available as sea connections to other core corridors and where the TEN-T maps should be updated in line with the findings of that evaluation;	No specific reply is provided to this particular point (on evaluation of the core corridors).		Not mentioned.	
19)	39. Highlights the importance of short sea connections for regional connectivity, particularly for peripheral regions and islands; considers that the Motorways of the Sea requirements exclude national short sea connections; urges the Commission, therefore, to simplify these requirements in the TEN-T regulation, in order to put maritime links on an equal footing with land-based links, taking into account, in particular, links to ports on the comprehensive network;	No specific reply is provided to this particular point (to simplify Motorways of the Sea requirements in the TEN-T regulations).		Not mentioned.	
20)	40. Emphasises the potential that exists for the shipping industry's emissions to be reduced significantly by means of investments in port infrastructure that support the use of alternative fuels and the transition to battery charging and power supply while vessels are at berth; points out that such investments should be given particular priority as a way	No specific reply is provided to this particular point (on development of the financial instruments).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to promote multimodal transport based at ports; asks the Commission to further develop the financial instruments that are available to boost investments for that purpose and to further support the ongoing development of different clean technologies by stimulating research;				
21)	41. Urges the Commission to recognise the wider role of ports, beyond purely transport functions, when it comes to decarbonisation efforts, most particularly their potential to contribute to the exploitation of onshore and offshore wind energy opportunities;	No specific reply is provided to this particular point (on the role of ports).		Not mentioned.	
22)	44. [...] calls on the Commission to explore possible synergies with EuroVélo and its 16 corridors, notably by increasing financial support, in order to promote local and environmentally friendly cycle tourism in Europe;	No specific reply is provided to this particular point (on EuroVelo).		Not mentioned.	
23)	46. Points out the significance of maintaining the TEN-T links with the UK, starting with its recognition as a 'neighbouring country' as defined in Article 3(b) of the TEN-T regulation, while safeguarding the implementation and completion of jointly agreed TEN-T infrastructure projects and ensuring that the UK participates in the financing of this connection; calls on the Commission to pay special attention to the external borders of the EU and to monitor the impact of the withdrawal of the UK on border regions; recalls the major role of the UK and the so-called land bridge as part of the TEN-T network and recognises the negative impact of Brexit on the connectivity, accessibility and economic cohesion between Ireland and continental Europe, as well as across the island of Ireland; calls on the Commission to ensure the effective connection of Ireland with mainland Europe, with particular attention to maritime routes, through the core and	The Commission also supports the European Parliament's resolution regarding the cooperation with third countries, in particular in view of the TEN-T connections beyond the EU's external borders. The Commission will be looking into ways of how to develop common infrastructure planning at EU external borders and to promote EU standards to ensure interoperability with the EU network.		Because of a general character of the promise, it is unclear how this will be implemented. On 14 December 2021, the Commission published the <a href="#">proposal</a> for a revision of the <a href="#">Regulation on the trans-European transport network</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	comprehensive network, whatever the shape of future EU-UK relations;				
24)	47. Underlines that the TEN-T, with its main hubs, has a strategic function for the Union; urges the Commission to develop plans to protect strategic infrastructure and the TEN-T as a whole; calls on the Commission to ensure that the EU's strategic interest, the prohibition of price dumping, the full respect of high European working standards and the principle of reciprocity in terms of access to public procurement are fully applied during tender procedures for TEN-T projects;	No specific reply is provided to this particular point (on EU's strategic interest).		Not mentioned.	
25)	49. Highlights that transport infrastructure policy offers a clear opportunity to increase synergies between defence needs and the TEN-T, with the overall aim of improving military mobility across the Union, taking into account geographical balance and considering the potential benefits for civil protection; insists that transport infrastructure in trans-European network sections that have been identified as being suitable for dual use should be adapted strictly in line with the dual use principle, to address both civilian and defence needs; calls on the Commission to maintain its original proposal for the financing of military mobility under the MFF 2021-2027;	No specific reply is provided to this particular point (on financing military mobility under the MFF 2021-2027).		Not mentioned.	

## 4.1.27.2. TRAN Resolution 2: EP resolution of 25 March 2021 on establishing an EU strategy for sustainable tourism

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Establishing an EU strategy for sustainable tourism</b>	25/03/2021 <a href="#">T9-0109/2021</a> <a href="#">2020/2038(INI)</a> TRAN	<a href="#">SP(2021)480</a>	Final reply (SP) received 20 August 2021	Mixed reply			
1)	5. Calls on the Commission and the Member States to develop as a matter of priority a common vaccination certificate and a system of mutual recognition of vaccination procedures for medical purposes, which should be rolled out in parallel with the distribution of vaccines, while preserving individuals' rights to privacy and data protection; believes that once vaccines have been made available to the general public and there is sufficient scientific evidence that vaccinated persons do not transmit the virus, the certificate could be considered for travel purposes as an alternative to PCR tests and quarantine requirements, while retaining the need to respect current sanitary measures, such as wearing face masks in public and observing social distancing; [...]	On 14 June 2021, the Parliament and the Council adopted Regulation (EU) 2021/953 establishing the EU Digital COVID Certificate <sup>9</sup> . This regulation aims to facilitate free movement within the EU during the COVID-19 pandemic by establishing a common framework for the issuance, verification and acceptance of interoperable certificates on COVID-19 vaccination, testing and recovery. This allows EU citizens exercising their right to free movement to demonstrate that they fulfil public health requirements imposed by the Member State of destination. The regulation also aims to ensure that restrictions of free movement currently in place to limit the spread of COVID-19 can be lifted in a coordinated manner. Apart from vaccination certificates, the "EU Digital COVID Certificate" also covers documents certifying a negative test result for SARS-CoV-2 infection and documents certifying that the person concerned has recovered from a previous infection. This allows persons who are not vaccinated to benefit from such an interoperable framework as well, facilitating their free movement.				On 14 June 2021, the Parliament and the Council adopted <a href="#">Regulation (EU) 2021/953</a> establishing the EU Digital COVID Certificate <sup>10</sup> .	
2)	6. [...] calls on the Commission to present a mobile application in order to better disseminate the	The Commission has already developed a mobile application for its Re-Open EU-portal which is				No further/specific actions proposed/promised to be taken by the Commission on this particular point as	

<sup>9</sup> <http://data.europa.eu/eli/reg/2021/953/oj>.

<sup>10</sup> <http://data.europa.eu/eli/reg/2021/953/oj>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	information, and to continue providing real-time information on the status of borders and on transport and tourism services available in EU countries, including information on public health and safety measures and other relevant information; [...]	providing real-time information on the status of borders and on transport and tourism services available in EU countries, including information on public health and safety measures and other relevant information. The Re-Open EU mobile app is available in both Google Play and Apple App Store since December 2020. The Commission intends to operate both the portal and the app as long as the pandemic is ongoing.		according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Re-Open EU-portal</a> ).	
3)	7. Calls on the Commission to launch a dedicated EU communication campaign on travel and tourism through an 'EU Tourism Brand' aimed at promoting EU travel and rebuilding citizens' confidence in travel and tourism during COVID-19;	In order to support the restart of the EU tourism ecosystem, the EU co-funded various campaigns promoting Europe as a safe destination. These campaigns are developed and implemented by the European Travel Commission (ETC) thanks to an EU ad hoc grant. The first campaign focused on intra-EU tourism ahead of the summer 2020, with the support of Euronews. A new general interest campaign called 'Open-up to Europe' is scheduled for end May 2021, with the support of 32 destinations (at national, region and city level) and travel brands. Other campaigns promoting Destination Europe are conducted on long haul markets in order to keep it on the minds of North Americans and Chinese travellers in particular. The European Year of Rail 2021 is also an opportunity to focus on this sustainable, specific travel mode to promote sustainable EU destinations.		The portal <a href="https://openuptoeurope.eu/">https://openuptoeurope.eu/</a> is operational.  <a href="#">European Year of Rail 2021.</a>	
4)	8. Calls on the Commission and the Member States to introduce a common colour coding system and common criteria for travel to third countries through mutual recognition of comparable protective measures against COVID-19 across all modes of travel, but above all in the aviation and maritime sectors;	The Council adopted on 30 June 2020, on a proposal by the Commission, the Council Recommendation (EU) 2020/912 on the temporary restriction on non-essential travel into the EU and the possible lifting of such restriction. It was amended on 20 May 2021 by Council Recommendation (EU) 2021/816. The latest revision introduced three major changes: (i) where Member States accept proof of vaccination in order to waive travel restrictions to limit the spread of COVID-		On 21 May 2021, <a href="#">Council Recommendation (EU) 2021/816</a> was published.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>calls on the Commission and the Member States to establish an early alert system that warns tourists through new technologies in a user-friendly way about any potential health threats in a third country destination; asks the Commission and the Member States to support tour operators in the organisation of travel experiences in selected areas in third countries, while fully respecting robust health protocols that minimise the risk of contagion;</p>	<p>19, Member States should in principle lift the temporary restriction on non-essential travel to the EU with regard to travellers from third countries who are fully vaccinated (at least 14 days before arrival) with a vaccine approved by the EU or WHO to enter the EU for non-essential travel, taking into account, on a case-by-case basis, reciprocity granted to the EU+ area; (ii) the 14-day notification rate threshold for third countries to be included in Annex I was raised to 75 cases per 100.000 population; and (iii) the emergency brake was established for Member States to be able to take action quickly in the light of new variants. In addition, the ECDC is to provide a regular mapping of variants in third countries. While not working with a colour-system, the recommendation sets out clear and objective criteria and thresholds to decide for which third countries the current restriction on non-essential travel into the EU should be lifted. These third countries are included in Annex I of the Council Recommendation. This list is reviewed by the Council every two weeks, and if need be amended, to take into account the epidemiological developments in these countries.</p> <p>This information is monitored and provided to citizens through Member State Government portals, normally maintained by the relevant Ministries of Foreign Affairs. There are currently no plans to duplicate this work at EU level.</p>			
5)	<p>9. Urges the Commission to introduce an EU hygiene certification seal, which should be developed jointly by the ECDC and the Member States and should certify touristic activities, ensuring compliance with minimum</p>	<p>The Commission has invited the European Committee for Standardisation (CEN) to prepare a standardisation document as a basis for health and safety protocols for the hospitality sector. It is based on a protocol prepared at the International Standardisation Union</p>		<p><a href="#">CEN Workshop Agreement</a> (CWA), published in mid-May 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	hygiene standards for the prevention and control of the COVID-19 virus and other possible infections; [...]	(ISO) and is complemented with a visual identity, as well as other additions in a CEN Workshop Agreement (CWA). It was published in mid May 2021. The Commission is already in close cooperation with Member States in order to support implementation with the help of national administrations.			
6)	10. [...]; calls on the Commission to take specific action in relation to European regions in which tourism accounts for a more substantial share of their GDP as well as to islands and outermost regions; [...]	Actions and investments in the area of tourism are eligible for EU support under the Cohesion policy Funds (e.g. the European Regional Development Fund (ERDF)) and can be financed under the national recovery and resilience plans implementing the Recovery and Resilience Facility. The legal basis for these Funds set the rules for the support of economic operators executed by the Member States.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Regional Development Fund (ERDF)</a> ).	
7)	11. Calls on the Commission to encourage Member States to temporarily set reduced VAT rates on travel and tourism services, accompanied by a special stimulus package for all micro enterprises and SMEs for the 2020-2024 period, in order to minimise the number of bankruptcies and preserve jobs and workers' rights in the European tourism industry, while utilising investments to foster the transition towards a more digital and sustainable tourism ecosystem;	<p>REACT-EU extends the crisis-response and crisis-repair measures delivered through the coronavirus response investment initiative (CRII) and the coronavirus response investment initiative plus (CRII+), and constitutes a bridge to the long-term recovery plan. The programme supports investment projects that foster crisis-repair capacities and contribute to a green, digital and resilient recovery of the economy, including support for maintaining jobs, short-time work schemes and support for the self-employed. It can also support job creation and youth employment measures, healthcare systems and the provision of working capital and investment support for small and medium-sized enterprises.</p> <p>Support for tourism SMEs (small and medium sized enterprises) transition to green and digital path is available under several EU programmes. In order to facilitate the access to EU funding for tourism, the</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">REACT-EU, Guide on EU funding for tourism operational since May 2021, EU VAT rules</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>online "Guide on EU funding for tourism" is operational since May 2021<sup>11</sup>.</p> <p>Moreover, under EU VAT rules, the Member States have the possibility to apply reduced rates (no less than 5%) to specific goods or services, including certain hospitality and other tourism-related services. Hence, the Member States are already able to apply what they consider as the most appropriate VAT (Value Added Tax) rates in support of the tourism sector. Indeed, some Member States have decided to reduce the VAT rate for such services for a limited period of time, to help companies restoring their financial position after a year with very low revenues.</p>			
8)	<p>13. Asks the Commission to implement the adopted preparatory action 'a European crisis management mechanism for tourism', jointly with Parliament, with a view to being ready to cope with future crises to help tourist destinations establish crisis prevention plans, contingency measures and preparedness plans and actions;</p>	<p>Already in the initial implementability assessment communicated to the Parliament last spring, the Commission did not find it possible to establish a crisis management mechanism with a means of a preparatory action. There are crisis management structures, horizontal ones, already in place, such as the integrated political crisis response (IPCR) at EU level. Therefore, the Commission has proposed to allocate the budget of this preparatory action to the Single Market Programme, where the funds will be used to support the resilience of EU tourism ecosystem. The Commission intends to map tourism governance in response to the COVID-19 pandemic, to set up a platform for technical assistance to destinations to strengthen their governance for crisis preparedness and management. With part of the budget we will reinforce the grant support to tourism SMEs, building their capacities to carry out the green and digital transition.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Single Market Programme</a>).</p>

9)	14. Calls on the Commission to regularly inform and cooperate with Parliament about the preparatory work and progress made in the development of pilot projects and preparatory actions and to keep the parliamentary committee responsible and the MEPs who initiated the projects involved in the process;		The Commission reports on the progress made in the development of pilot projects and preparatory actions both in writing and in the context of the regular exchange of views upon invitation of the Parliament, in particular the TRAN Committee.		No further/specific actions proposed/promised to be taken by the Commission.	
10)	15. Calls on the Commission to establish a new governance model between the EU Institutions, strengthening the organisational, financial and human resources structure by setting up a dedicated Directorate dealing specifically with tourism, backed by adequate funding, with a view to taking an integrated and efficient approach to tourism, supporting the relaunch of tourism in European regions and helping businesses to implement the measures needed to achieve key objectives in the areas of sustainability and innovation, and increasing their competitiveness and attractiveness;		The Commission service responsible for Internal Market, Industry, Entrepreneurship and SMEs (DG GROW) has a directorate dedicated to tourism and the proximity ecosystem. The Commission implements EU policies in synergy and coherence across its services and departments. It supports the idea of close cooperation among the EU Institutions in particular on the competitiveness and twin green and digital transition of the tourism ecosystem.		No further/specific actions proposed/promised to be taken by the Commission.	
11)	16. Calls on the Commission, moreover, to take account of the possible synergies between the various Directorates-General in view of the cross-cutting nature of tourism, in fields such as agriculture, transport, culture, maritime, regional development, employment and climate;		The Commission implements EU policies in synergy and coherence across its services and departments. It supports the idea of close cooperation among the EU Institutions in particular on the competitiveness and twin green and digital transition of the tourism ecosystem.		No further/specific actions proposed/promised to be taken by the Commission.	
12)	17. [...] calls on the Commission, therefore, to start making full use of the Treaties to develop a comprehensive European tourism policy towards the creation of the European Tourism Union;		The Commission expects the Conference on the Future of Europe to be an important forum for debate on the future of the European economy, including tourism and other industrial ecosystems.		No further/specific actions proposed/promised to be taken by the Commission.	
13)	19. Calls on the Commission to create an EU mechanism to monitor the provision of support to micro enterprises and SMEs, focusing on liquidity and		REACT-EU extends the crisis-response and crisis-repair measures delivered through the coronavirus response investment initiative (CRII) and the coronavirus		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	delivering EU added value and transparency in order to increase the ability of those enterprises to access and use EU funds and financial instruments to facilitate the modernisation and implementation of innovative and sustainable projects, ensuring accountability and administrative simplification;	<p>response investment initiative plus (CRII+), and constitutes a bridge to the long-term recovery plan. The programme supports investment projects that foster crisis-repair capacities and contribute to a green, digital and resilient recovery of the economy, including support for maintaining jobs, short-time work schemes and support for the self-employed. It can also support job creation and youth employment measures, healthcare systems and the provision of working capital and investment support for small and medium-sized enterprises.</p> <p>Support for tourism SMEs (small and medium sized enterprises) transition to green and digital path is available under several EU programmes. In order to facilitate the access to EU funding for tourism, the online "Guide on EU funding for tourism" is operational since May 2021<sup>12</sup>.</p> <p>Moreover, under EU VAT rules, the Member States have the possibility to apply reduced rates (no less than 5%) to specific goods or services, including certain hospitality and other tourism-related services. Hence, the Member States are already able to apply what they consider as the most appropriate VAT (Value Added Tax) rates in support of the tourism sector. Indeed, some Member States have decided to reduce the VAT rate for such services for a limited period of time, to help companies restoring their financial position after a year with very low revenues.</p>		working on action falling under the scope of the EP request ( <a href="#">REACT-EU</a> , <a href="#">EU VAT rules</a> , <a href="#">Annual Single Market Report</a> ).

	<p>contact point that facilitates access to information for micro enterprises and SMEs, by means of a one-stop shop or online tool with the assistance and guidance of the Member States, whenever needed; calls on the Commission to raise awareness of this guide among companies and SMEs in the tourism sector;</p>	<p>In order to facilitate the access to EU funding for tourism, the online “Guide on EU funding for tourism” has been launched in May. This online guide highlights the wide range of EU funding included in the new budget, Multiannual Financial Framework 2021-2027 and NextGenerationEU, moving towards a more sustainable, inclusive and digital EU. The guide will help tourism enterprises to find the appropriate funding according to their needs. It contains hyperlinks to the relevant EU funds’ websites and to call for proposals, as well as concrete project examples funded by previous EU programming period, for inspiration.</p>			
15)	<p>23. Calls on the Commission to set up a European Agency for Tourism in the next MFF and to devise a short-term solution by creating a tourism department in one of the existing executive agencies, in particular the Executive Agency for SMEs (EASME) or the upcoming Health and Digital Executive Agency;</p>	<p>The Multiannual Financial Framework (MFF) for 2021-2027 has been adopted last December. It is therefore too early to discuss what should be included in the next MFF. However the Commission is fully committed to support the Tourism ecosystem in the short, medium and long term. Already last year in the Communication “Tourism and transport in 2020 and beyond”, the Commission announced its intention to work together with EU institutions, the industry, regions and cities and stakeholders towards a sustainable, innovative and resilient European tourism ecosystem (‘European Agenda for Tourism 2050’). In the recently adopted Communication “Updating the 2020 New Industrial Strategy” indicating that it will co-create, in partnership with industry, public authorities, social partners and other stakeholders, a transition pathways for the tourism ecosystem.</p> <p>Currently, EISMEA (European Innovation Council and SME Executive Agency) (former EASME - Executive Agency for Small and Medium-sized Enterprises) implements a number of projects supporting tourism</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Multiannual Financial Framework</a> for 2021-2027, <a href="#">European Agenda for Tourism 2050</a>, <a href="#">Updating the 2020 New Industrial Strategy</a>, <a href="#">EISMEA</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>SMEs under former COSME programme (the EU programme for the Competitiveness of Enterprises and Small and Medium-sized Enterprises) and will continue under the Single Market programmes, in particular focusing in their green and digital transition as well as long-term resilience.</p> <p>Furthermore, the Commission recalls that a large part of the EU budgetary support to tourism is taking place through the national plans financed from the Structural and Investment Funds (2014-2020) and the Cohesion policy Funds (2021-2027). Those Funds are under shared management and therefore not managed by the executive agency. Among the spending programmes in direct management, we have no spending programme focused on tourism and therefore there is no sufficient budget to manage to justify the creation of an executive agency devoted to tourism.</p>			
16)	25. Calls on the Commission to swiftly develop a roadmap for sustainable tourism that includes innovative measures to reduce the climate and environmental footprint of the sector by developing more sustainable forms of tourism, diversifying the offer, boosting new initiatives for cooperation and developing new digital services;	See paragraph 20: the Commission is working closely with the Member States to advance towards the European Tourism Agenda. In this spirit, the Council Conclusions on Tourism were adopted by the Council on 27 May. As announced in the EU Industrial Strategy update, the process to co-create a transition pathway for the tourism ecosystem was launched on 21 June and will be finalised in collaboration with industry, public authorities, social partners and other stakeholders.		No further/specific actions proposed/promised to be taken by the Commission.	
17)	28. Calls on the Commission to bring the European Tourism Indicators System (ETIS) into operation, to equip it with a permanent governance structure and to introduce it in tourism destinations, with static indicators and real-time data for their management and	The Commission has launched work with the Joint Research Centre on the Tourism development dashboard, as an integrative tool with four main pillars, of which one is dedicated to sustainability. This sustainability pillar will be populated with comparable		Work was launched on the development of a tourism development dashboard.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	evaluation, in partnership with regions; stresses that the aim of the ETIS scoreboard is to monitor the economic, social and environmental impact of tourism;		benchmarks, both static and dynamic. These benchmarks at sustainability key performance indicators (KPIs) formed based on the lessons learnt from ETIS together with the new possibilities from big data. The objective is to provide dynamic data solution for today's needs to support the development of tourism towards green, digital and socio-economically resilient goals.			
18)	29. Calls on the Commission to examine the barriers to obtaining the Ecolabel and to expand its scope to other tourism services, as a complement to the EU Eco-Management and Audit Scheme (EMAS) for tourism, and to establish mechanisms to support those certification schemes and to promote tourism operators that have obtained those schemes;		<p>The Commission is preparing a communication campaign on EU Ecolabel for Tourist Accommodation and is already working with several tourism associations, tourism operators and on-line platforms to increase uptake, awareness and visibility of the EU Ecolabel for tourist accommodations, as the barriers to increase uptake have been identified as the lack of return on the investment to get the label.</p> <p>An EU Workshop on EU Ecolabel for Tourism Accommodations was organised on 21 January. A dedicated working group is being established within the EU Ecolabelling Board.</p> <p>The Commission is working with its services to promote EU Ecolabel Tourist Accommodations to staff travelling on mission and to participants of meetings in Brussels, at the same time working with relevant associations in Belgium to improve the offer.</p> <p>The possibility to expand the scope of the current criteria will be assessed during the revision of the criteria that is expected to start end 2022/ beginning of 2023.</p>		<p>Workshop 21 January 2021:  <a href="#">The EU Ecolabel for Tourist Accommodations - Engaging together in a sustainable recovery.</a></p> <p>Slides also present the 2021 communication campaign on EU Ecolabel for Tourist Accommodation.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	34. Welcomes the European Data Strategy and the Commission's proposal for a Data Governance Act; calls on the Commission to incorporate tourism in the governance framework for common data spaces and to better regulate the activity of online booking platforms and online travel intermediaries, enabling tourism businesses to fully commit to innovation and digitalisation, as the latter are crucial for modernising the entire sector and for developing new services and a broader, high-quality offer; calls on the Commission, furthermore, to promote data pooling for tourism and regional incubators and accelerators for tourism enterprises, harnessing research and innovation to help the many SMEs in the sector collect, process and utilise the data they produce and enable them to fully benefit from the data economy and implement sustainable solutions;	<p>Digitalisation and data-driven technologies are reshaping the way we produce, consume and live, and the benefits also concern the tourism sector, as the latest technologies offer more efficient and inclusive models. Adopted in February 2020, the Data Strategy plans the rollout of the common European data spaces in strategic sectors and areas of public interest, combining data governance and investments in data infrastructures. These investments would cover the necessary data infrastructures, data-sharing tools, architectures and governance mechanisms for thriving data sharing. Once adopted by the co-legislators, the Data Governance Act will offer to tourism and all other related sectors a framework that will unlock the value of data voluntarily made available by data holders for reuse. The availability of data for use will be fostered by increasing trust in data intermediaries and by strengthening data sharing mechanisms in the EU.</p> <p>Finally, to the extent that the online booking platforms and online travel intermediaries constitute intermediary services or gatekeepers within the meaning of the proposals for a Digital Services Act or a Digital Markets Act respectively, once adopted by the co-legislators these instruments will contribute to ensuring a level playing field, fostering innovation and competitiveness of the sector while imposing proportionate obligations for the better protection of users.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Data Strategy</a> , <a href="#">Data Governance Act</a> , <a href="#">Digital Services Act</a> , <a href="#">Digital Markets Act</a> ).	
20)	37. Calls on the Commission to respect the right of local authorities to regulate against the harmful impacts of overtourism;	The Commission is fully aware of concerns over the effects of "overtourism" and issues with affordability of housing on local communities, in particular in touristic cities, and the need for local authorities to		The Commission launched the <a href="#">Tourist services – short-term rental initiative</a> that could lead to a regulatory proposal in Q1 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>address those concerns. As announced in the SME Strategy (COM(2020) 103 final), the Commission will explore a possible initiative focusing on short-term accommodation rental services (the largest collaborative economy sector) to promote the balanced and responsible development of the collaborative economy, in full respect of public interest objectives, such as ensuring the availability of housing and protecting urban environments. The nature and form of any initiative will depend on the outcome of ongoing preparatory work, which will determine whether and how these issues should be addressed at European level.</p>			
21)	<p>40. Highlights that the European Year of Rail could present an opportunity to create public awareness of sustainable tourism and the new cross-border routes that European citizens can discover thanks to rail connections; calls on the Commission, therefore, to improve the European railway network;</p>	<p>The Commission fully shares the view that the European Year of Rail is an excellent opportunity to create public awareness of rail's potential role in the development of sustainable tourism in Europe. This is a specific objective of the Year, included under Article 2 (i) of Decision (EU) 2020/2228 on a European Year of Rail (2021). Sustainable rail tourism is covered in the Year's programme of events and activities. Key examples include the Best European Rail Tourism Campaign 2021 (co-organised by the European Travel Commission and EURAIL), UIC's "My Secret Rail Spots" photo competition and the Special European Greenways Award (organised by the European Greenways Association).</p> <p>Together with the activities of the Year, the Commission is already working on several initiatives (legislative and non-legislative) to boost European rail transport, as identified in the Action Plan of the Sustainable and Smart Mobility Strategy. The Year is a unique occasion to gather the input of stakeholders</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (e.g. <a href="#">DiscoverEU</a>, <a href="#">Best European Rail Tourism Campaign 2021</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and citizens in this exercise and build political and social momentum behind these initiatives.</p> <p>Finally, the Commission thanks the European Parliament for its support to the DiscoverEU initiative, which will officially join the Erasmus+ programme as of this year. The 2021 edition will be linked to the European Year of Rail and will aim at inspiring a change in the attitude of 18 years old about rail travelling. The Commission is planning several actions in relation to the European Year of Rail, such as virtual activities organised by e-influencers to stress the benefits of rail travel for young people, or meet-ups in locations relevant for the Year. The photo/ video competition on the European Youth Portal will also focus on the European Year of Rail as a theme and DiscoverEU will also partner with the Europolia arts festival.</p>			
22)	44. Calls on the Commission to explore possible synergies with EuroVelo and its 17 corridors, notably by increasing financial support, in order to promote cycling tourism in Europe; calls on the Commission to encourage the reconversion of disused railway lines, including by supporting bike-train projects, and to actively support bike-train intermodality;	The Commission welcomes the intention of many Member States to include in their national Recovery and Resilience Plans investments and reforms in favour of the development of cycling infrastructure, including long-distance ones, and the promotion of active mobility and sustainable modes of transport in general. The Recovery and Resilience Facility supports green and digital transition and can finance measures to support sustainable transport solutions, also actions supporting modernization and sustainability of the tourism sector.		No further/specific actions proposed/promised to be taken by the Commission.	
23)	45. Urges the Commission to propose a new European inclusive tourism scheme following the model of the Calypso initiative, enabling vulnerable social groups to use national tourist vouchers in associated	The Strategy for the Rights of Persons with Disabilities 2021-2030 indicates that the Commission will launch a European resource centre AccessibleEU to increase coherence in accessibility policies and facilitate access to relevant knowledge. Among the work of the		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	establishments in other Member States which also offer a social tourism programme to their citizens;	resource centre is to develop tools and standards aiming to facilitate implementation of EU law. Furthermore, EU-level action will also include further work on standardisation and technical specifications. In addition, the Access City Award has stimulated a coherent, cross-sectoral approach going beyond the minimum standards set by law.		request ( <a href="#">The Strategy for the Rights of Persons with Disabilities 2021-2030</a> ).	
24)	46. Calls on the Commission to present the results of the Smart Tourism Destinations pilot project and outline how it intends to implement the scheme, linking innovation with the protection of UNESCO and nature sites and traditional local specialities and centres of culture;	The Smart Tourism Destination Pilot project has kicked off in April 2021, and will finalise its deliverables in 2023. The project will be instrumental in providing policy makers at all levels with the understanding of the needs, trends, opportunities and challenges tourist destinations need to manage and strategize data. This will be achieved with a study, ready by the first quarter of 2022, as well as through concrete tools for cities to target their specific needs: an EU Guide for data on tourism destinations, a Toolkit, and a set of Recommendations for policy action. These findings will be publicly available as soon as ready. In addition, the pilot project will set up a community of practice among interested destinations, to foster mutual understanding, networking, and exchange of ideas and good practices.		First study of the pilot project to be ready in Q1 2022 with indication that the findings will be publically available. No indication from the Commission on a possible presentation of the results.	
25)	47. Calls on the Member States and the Commission to make the European Capital of Smart Tourism a permanent project with broader and fairer criteria, thereby benefiting the local economy and local supply chains; <i>calls for greater commitment towards a gradual increase in sustainable mobility opportunities throughout Europe;</i>	The third edition of the European Capital of Smart Tourism, looking for the 2022 most outstanding performer under all four of the categories considered (accessibility, sustainability, digitalisation, cultural heritage and creativity), has been launched on April 22, and it was open to cities with a population of more than 100000 inhabitants in Member States and in the		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Capital of Smart Tourism</a> ).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>effects of COVID-19, including the applicability of the SURE programme;</p>	<p>particular, 75 decisions adopted aim at supporting tourism, hospitality and related sectors while 70 decisions aim at supporting the transport sector (transport in general, airlines, airports, ports). On this basis, the amount of around EUR 70.8 billion of State aid approved aim at supporting tourism and transport so far (best estimate<sup>15</sup>). This figure is equivalent to the 2.34% of the total State aid approved in response to the COVID-19 outbreak. Approximately EUR 30 billion of the budget specifically allocated to the tourism and transport sectors have been approved as <i>ad hoc</i> measures.</p> <p>Aside from schemes specifically targeting the tourism industry, by 23 April 2021, the Commission has also adopted 192 decisions approving 253 national measures open to all sectors, from which tourism operators can also benefit. On this basis, the amount of approximately EUR 2.85 trillion of total state aid has been approved so far for measures without specific sectorial scope. The total budget allocated in response to the Covid-19 outbreak allocated through general measures is 94.05%. Member States that have put such umbrella schemes into effect are: Germany, Denmark, Spain, France, Hungary, Ireland, Italy and Slovenia.</p> <p>The Member States have transparency obligations by which, within 12 months from the moment of granting, their national authorities publish on the comprehensive national State aid website or</p>		<p>response to the COVID-19 outbreak. In particular, 75 decisions adopted aim at supporting tourism, hospitality and related sectors while 70 decisions aim at supporting the transport sector (transport in general, airlines, airports, ports).</p>	

<sup>15</sup> For some measures adopted under the Temporary Framework, it is not necessary to indicate a budget, which is why the figures included are best estimates based on budgets approved in State aid decisions and other available figures, e.g. mentioned in public communications by national authorities, and in official information communicated by the national authorities. Moreover, some measures address multiple sectors. It is thus not possible to disentangle the exact amount for each of the involved sectors.

		is still over EUR 5 billion available to help Member States to support workers regardless of the sector of the economic activity, thus also in the tourism sector.			
30)	57. Calls on the Commission and the Member States to address the situation of workers in the tourism sector affected by the COVID-19 crisis and to consider the possibility of establishing a European framework, within the action plan for the European Pillar of Social Rights, across the industry's entire value chain, in close cooperation with social partners and businesses, through a constructive dialogue on the working conditions in the sector, which is characterised by seasonality and part-time and atypical forms of employment;	<p>The situation of seasonal workers was addressed in the Commission Communication on seasonal workers in the EU in the context of the COVID-19 outbreak, published on 16 July 2020. This document provides guidance to national authorities, labour inspectorates and social partners to guarantee the rights, health and safety of seasonal workers, and to ensure that seasonal workers are aware of their rights.</p> <p>Social dialogue at EU as well as at national level is important to improve working conditions and to accompany structural change and adapt the economy in the post COVID-19 era. Therefore, under its prerogative budget lines dedicated to social dialogue, the Commission supports social partners' capacity building, allowing social partners to develop the necessary knowledge to address and improve working conditions. The Commission supports sectoral social dialogue by organising the meetings of the 43 Sectoral Social Dialogue Committees at EU level including the Committee on HORECA, which deals, among others, with various issues related to tourism. In addition, the Commission organizes dedicated hearings with European social partners, where they can give input to EU policies in the realm of social and employment policies and in particular working conditions.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Communication seasonal workers</a> and 43 Sectoral Social Dialogue Committees at EU level including the Committee on HORECA, [...]).	
31)	58. Calls on the Commission, together with the European Investment Bank, to establish sufficient dedicated support for the decarbonisation of the tourism sector, for digitalisation and for innovative projects, and the conditions of access for micro enterprises and SMEs to InvestEU, so that new skills can	Support for green and digital transformation, innovation of tourism businesses and destinations is available under several EU Funds. 		<p><a href="#">protection at EU level for non-agricultural products</a>. The Commission services are currently working on an impact assessment on the appropriateness of proposing the establishment of an EU geographical indication protection system for non-agricultural products. Within this framework, an 8 months 'study on control and enforcement rules of geographical indications for non-agricultural products' has been launched in January 2021.</p> <p>Other aspects involve various consultations with stakeholders including an <a href="#">open public consultation</a> launched in April and open until 22 July.</p>		<p><a href="#">and enforcement rules of geographical indications for non-agricultural products</a> (August 2021), <a href="#">Annex 1 : case studies</a> (September 2021).</p> <p>Link to <a href="#">public consultation</a>.</p>	
37)	65. Calls on the Commission to promote artistic and traditional craft professions, which exemplify the excellence of products made in Europe as an expression of the identity and traditions of European territories, including in the context of the tourism industry, through official recognition as part of European cultural heritage;	<p>The European Skills Agenda recognises businesses need workers with the skills required to master the green and digital transitions, and people need to be able to get the right education and training to thrive in life, including the artistic and traditional craft professions. The European Skills Agenda puts the industrial strategy into practice by pursuing a shift in upskilling (improving existing skills) and reskilling (training in new skills) of the industrial workforce. Part of this is testing the feasibility of a new industry-academia initiative focusing on companies' needs. This initiative aims to give university students real-world business experience by asking multinational teams to solve specific challenges within a company's research and development department. First results are expected by mid-2021.</p> <p>The European Pact for Skills was launched by Commissioners Nicolas Schmit and Thierry Breton on 10 November 2020. It is a shared engagement and approach to mobilise all stakeholders to invest in skills. The Pact aims to build large-scale multi-stakeholder "skills partnerships" addressing the needs of the 14 industrial ecosystems identified in the EU</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP ( <a href="#">EU Skills Agenda</a> , <a href="#">European Pact for Skills</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Industrial Strategy. The Cultural and Creative Industries are one of these ecosystems. To build on this Pact for skills, thematic roundtables took place, including a successful one on the Cultural and Creative Industries.</p> <p>Sustainable cultural tourism has strong ties and associations with the Cultural and Creative Industries. There are many EU funded projects examining the artistic and traditional craft professions. An example is INCREAS (Innovation and Creative Solutions for Cultural Heritage), which is co-funded by the Commission – Directorate-General for Education, Youth, Sport and Culture. Its aim is to contribute to identify certain skills needs for built Cultural Heritage, to map innovative projects within the Cultural Heritage Sector and to create a EU-Competence Centre for Practical Architectural Conservation in the Charterhouse Mauerbach. It creates a strong sector combining built cultural heritage and Cultural and Creative Industries, in order to increase employment opportunities and foster the idea of sustainable cultural heritage in Europe. Another recent example is the CHARTER project (“Cultural Heritage Actions to Refine Training, Education and Roles”), funded by Erasmus+ under the Blueprint Call for Skills Sectorial Alliance on Cultural Heritage. It aims to build the first ever methodology enabling the heritage sector to assess, design and produce a holistically integrated sectorial skills strategy. Its main goal is to identify and bridge the skills gaps between the educational and the occupational worlds, by developing a matrix mapping skills and competences in the heritage sector. A good example of a Creative Europe funded project is MADE IN which was recently completed. It is a research, design and heritage initiative that encourages collaboration and knowledge exchange</p>

		between traditional craftsmen and contemporary designers.			
38)	66. Calls on the Commission to evaluate and, if necessary, to review the Package Travel Directive and to unblock the negotiations in the Council on the revision of Regulation (EC) No 261/2004 on air passenger rights to take account of the effects of the recent crisis, prevent future legal uncertainty and ensure the protection of consumer rights;	<p>While the unblock of the negotiations on the revision of Regulation (EC) No 261/2004 on air passenger rights is in the hands of the Council and remains a priority, the Commission, as announced in its Sustainable and Smart Mobility Strategy (SSMS) (action 64), will assess the options and propose, if appropriate, an adequate financial protection scheme to protect passengers against the risk of a liquidity crisis or an insolvency regarding the reimbursement of tickets and their repatriation. In addition, the Commission has committed to propose a revision of the Air Services Regulation (action 59 of the Action Plan annexed to the SSMS). In this context, the Commission will inter alia assess further measures to improve the financial resilience of air carriers.</p> <p>The Commission's report on the Package Travel Directive (PTD) of 26 February 2021 provides an overview of the application of the PTD during the past two and a half years. It addresses its transposition by the Member States and its strengths and weaknesses, including challenges that have emerged in the context of the Thomas Cook bankruptcy and the Covid-19 pandemic.</p> <p>As announced in its New Consumer Agenda for 2020-2025 and confirmed by the report of 26 February 2021, the Commission will carry out by 2022 a deeper analysis into whether the current regulatory framework for package travel, including as regards insolvency protection, is still fully up to the task of ensuring robust and comprehensive consumer protection taking into account also developments in the field of passenger rights.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (report on the <a href="#">Package Travel Directive</a>).</p> <p><a href="#">New Consumer Agenda</a>, 2020.</p> <p><a href="#">Sustainable and Smart Mobility Strategy</a>, 2020.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>asks the Commission to analyse the possibility of strengthening the insolvency protection provisions by adding a prevention approach to support companies and SMEs at an earlier stage and in order to protect workers in the event of systemic shocks and/or insolvency;</p>	<p>The Commission will assess how the high level of consumer protection provided by the PTD can be ensured and how the rights of consumers can be effectively enforced at all times and how a fairer sharing of the burden among economic operators along the value chain could contribute to this objective.</p> <p>The COVID-19 pandemic highlighted the different levels of consumer protection in relation to package travel as compared to stand-alone transport services and issues in the relationship between package organisers and, for instance, air carriers. Overall, more coherent approach could enhance the level of consumer protection and bring more clarity and a fairer burden-sharing amongst travel businesses. The in-depth analysis of the PTD will take into account the review of the passenger rights regulatory framework announced in the Sustainable and Smart Mobility Strategy.</p> <p>It is to be noted that the Directive on Restructuring and Insolvency obliges Member States to establish effective and transparent mechanisms that help companies (mainly SMEs) to detect in due time circumstances that could give rise to a likelihood of insolvency and that gives them actual advice on how to overcome this difficulties. The directive is currently being transposed by the Member States.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Directive on Restructuring and Insolvency</a>).</p>	
39)	<p>67. Calls on the Commission to establish a European travel guarantee scheme, based on the experience of the COVID-19 crisis and similar schemes in the Member States, in order to secure financial liquidity for companies and guarantee refunds for travellers as well</p>	<p>The in-depth analysis of the PTD will also cover the question of whether the level of harmonisation is appropriate, for instance with regard to insolvency protection.</p>		<p>The Commission will still evaluate options and could follow-up on the call to create an EU travel guarantee form. This will not happen before 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	as repatriation costs, together with fair compensation for any damages incurred in the event of bankruptcy;	<p>As noted in the report on the application of the PTD, some business stakeholders and authorities have expressed concerns that it may be increasingly difficult to find appropriate insolvency protection providers that are willing and capable to cover the risks related to the bankruptcy of a big organiser, especially during peak season. Relatively few travel guarantee funds and insurance companies provide insolvency protection. It has been reported that banks were no longer providing security for organisers and that also some of the already relatively few insurance companies offering insolvency protection are pulling out of the market (e.g. in Austria<sup>19</sup> and Belgium<sup>20</sup>). It is therefore important to find a solid system that effectively protects travellers against the risk of insolvency. Ideas brought forward to address different challenges include multiple security providers for one organiser, or the setting up of a pan-EU guarantee fund as a kind of re-insurance for the first-line guarantors. Further analysis in this respect is required.</p> <p>In its resolution in reaction to the bankruptcy of Thomas Cook<sup>21</sup>, the European Parliament acknowledged the effective repatriation and did not raise any concerns in respect of the PTD. In this context, the Parliament nevertheless repeated its request to extend insolvency protection to seat-only flights in the framework of the revision of the Air Passenger Rights Regulation 261/2004. The insolvency of an airline can affect travellers, tour operators and</p>		<p><a href="#">Report</a> on the application of Directive (EU) 2015/2302 of the European Parliament and of the Council on package travel and linked travel arrangements.</p>

		<p>intermediaries. For example, if a package travel contract with a flight component is cancelled in accordance with the PTD, the organiser may have to refund the traveller the full price irrespective of whether he still holds the money or will be able to recover it from the airline. The call from a number of stakeholders representing travel businesses and consumers for the introduction of mandatory insolvency protection to be provided by airlines has become louder in the context of the COVID-19 crisis. The Aviation Roundtable Report on the Recovery of European Aviation (November 2020) acknowledges that this crisis has shown that passengers feel they may find themselves unprotected in case of insolvency of airlines and suggests that the impact of airline insolvency protection could be further analysed<sup>22</sup>.</p> <p>Thus, in the scope of the planned analysis, the Commission will also assess whether the differences between the PTD and the passenger rights regulations as regards insolvency protection and cancellation rights are justified or if the rules should be more aligned and whether specific rules for situations like COVID-19 should be proposed, with the objective to better protect consumers. Other methods of reducing the exposure of travellers to an organiser's insolvency, e.g. introducing alternatives to the prevailing prepayment model, could also be evaluated.</p>			
40)	68. Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the recently launched Digital Skills &amp; Jobs Platform. The Platform provides open access to a wide variety of high-quality information and resources to everyone interested in the broad topic of digital skills. Its smart search and filtering functions help users, including SME owners or employees, find what they need and connect with whom they need. With relevant, up-to-date content and dynamic, collaborative spaces, the platform caters to the needs of all users independently of their level of expertise. The Commission will also support and interlink SME intermediaries, such as clusters, the Enterprise Europe Network and Digital Innovation Hubs to help upskill staff of SMEs, including management.</p> <p>The Commission initiative on Centres of Vocational Excellence (CoVE) are intended to be world-class reference points for training in specific areas (which may include tourism) for both initial training of young people as well as for continuing up-skilling and re-skilling of adults. These centres act as catalysts for local business investment, supporting European and regional innovation and smart specialisation strategies by ensuring supply of high quality skilled workers through flexible and timely offer of training for the skills needs of companies, including SMEs. They support entrepreneurial initiatives of their learners (incubators), as well as act as knowledge and innovation hubs for SMEs.</p>			
41)	69. Notes that skills and qualifications are not always harmonised between countries and there is a lack of mutual recognition; calls on the Commission, therefore, to evaluate options for harmonising the rules and legislation in this regard;	No specific reply is provided to this particular point (on harmonising the rules and legislation in this regard).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
42)	70. Urges the Commission to work together with associations in the sector and to use best practices to issue recommendations and provide financial support for the organisation of trade tourism events, fairs, congresses and tourism related to artistic and entertainment events, such as concerts and festivals;	The Commission services are in regular contacts with the main European professional associations, starting with EEIA (European Exhibition Industry Alliance), to identify their needs and determine what could be done at EU level.		No further/specific actions proposed/promised to be taken by the Commission.	
43)	71. Requests that the Commission publish and share with stakeholders and the Member States good practices for the professional tour guide profession in order to address the problems affecting this sector; <i>considers that professional tour guides play a vital role in promoting cultural heritage in synergy with the local territory, its traditions and its specificities; believes, therefore, that this profession should enjoy adequate protection in the labour market in order to ensure high-quality services while preserving open and fair competition; calls on the Commission to analyse the lack of mutual recognition in the sector in order to ascertain where the Union can make the requisite improvements;</i>	Directive 2005/36/EC guarantees the recognition of professional qualifications throughout the EU. The directive offers the possibility to tourist guides who are fully qualified in one Member State to exercise their professional activities in another Member State where the profession is regulated as to the qualifications. To do so, the host Member State may require the tourist guide to undergo a compensation measure (an aptitude test or an adaptation period) if there are substantial differences between the training required in that Member State and the one actually followed. In the cases of temporary services provisions, tourist guides may exercise their professional activities in another Member State on the basis of a declaration.		No further/specific actions proposed/promised to be taken by the Commission.	
44)	72. Underlines the importance of accessibility of travel and tourism services for all, including for children, elderly people and disabled people, regardless of their economic situation or potential vulnerabilities; calls on the Commission to work to facilitate the possible wider implementation and recognition of the European disability card scheme; highlights that accessible tourism for all can only be achieved with the right combination of legal standards implemented by the Member States, innovation and technological developments, personnel training, awareness-raising,	The Commission would like to scale up the EU Disability Card system into all the Member States to facilitate enjoyment of free movement by persons with disabilities. Therefore it is proposing as a flagship initiative in the Strategy for the Rights of Persons with Disabilities 2021-2030 the following: "The Commission will propose creating a European Disability Card by end of 2023 with a view to be recognised in all Member States. It will build on the experience of the ongoing EU Disability Card pilot project in eight		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Strategy for the Rights of Persons with Disabilities 2021-2030, Rail Passenger Rights Regulation</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p><i>adequate promotion and communication, throughout the supply chain of the tourism offer; stresses, in this regard, the importance of European networks where public and private stakeholders can cooperate and exchange best practices; further calls on the Commission and the Member States to actively drive the ongoing development of the International Organisation for Standardisation standard on accessible tourism services and to ensure its swift and correct implementation once adopted, while also ensuring that service providers respect the relevant accessibility standards already in place or in the process of implementation and provide information on the accessibility of their services;</i></p>	<p>Member States and upon the European parking card for persons with disabilities.”</p> <p>As regards training, the Recast Rail Passenger Rights Regulation obliges rail undertakings and rail infrastructure managing undertakings to provide to their staff dealing with PRM (passengers with reduced mobility) assistance targeted disability-related training, in order to know how to meet the needs of PRM. Regular refresher training courses are also foreseen. Also staff, working at the station or on board trains, who deal directly with the travelling public has to receive training and regular refresher training courses to raise awareness of the needs of PRM.</p> <p>The Recast Rail Passenger Rights Regulation will make for passengers, including PRM easier to enforce their rights as passengers: they will be able to submit their compensation and reimbursement request in an EU wide standardised form, which will be also be accessible for PRM.</p> <p>The Recast Rail Passenger Rights Regulation stipulates that information on the accessibility of stations, access conditions to rolling stock and available services and facilities shall be presented to PRM in an accessible format.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
45)	73. Calls on the Commission to propose a standardised method for collating interactive feedback on the accessibility of destinations by enterprises and tourists and to promote its use to the tourism sector as a whole;	<p>The Commission would like to scale up the EU Disability Card system into all the Member States to facilitate enjoyment of free movement by persons with disabilities. Therefore it is proposing as a flagship initiative in the Strategy for the Rights of Persons with Disabilities 2021-2030 the following: "The Commission will propose creating a European Disability Card by end of 2023 with a view to be recognised in all Member States. It will build on the experience of the ongoing EU Disability Card pilot project in eight Member States and upon the European parking card for persons with disabilities."</p> <p>As regards training, the Recast Rail Passenger Rights Regulation obliges rail undertakings and rail infrastructure managing undertakings to provide to their staff dealing with PRM (passengers with reduced mobility) assistance targeted disability-related training, in order to know how to meet the needs of PRM. Regular refresher training courses are also foreseen. Also staff, working at the station or on board trains, who deal directly with the travelling public has to receive training and regular refresher training courses to raise awareness of the needs of PRM.</p> <p>The Recast Rail Passenger Rights Regulation will make for passengers, including PRM easier to enforce their rights as passengers: they will be able to submit their compensation and reimbursement request in an EU wide standardised form, which will be also be accessible for PRM.</p> <p>The Recast Rail Passenger Rights Regulation stipulates that information on the accessibility of stations, access conditions to rolling stock and available services and facilities shall be presented to PRM in an accessible format.</p>		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
46)	74. Calls on the Commission to consider the special characteristics and additional constraints of the outermost regions when formulating and assessing the impact of tourism legislation, in accordance with Article 349 of the TFEU, as those regions rely heavily on tourism for their economic, social and cultural development; warns, in this context, of the need to ensure proper funding to safeguard the accessibility of the outermost regions; calls on the Commission, furthermore, to take into consideration the climate and digital transition in the outermost regions;	The Commission is aware of the specificities of the outermost regions and their specific constraints further aggravated by the COVID-19 crisis. Many outermost regions rely heavily on the tourism sector and are particularly affected by the reduction of air passengers, rising unemployment and decreasing GDP rates. The Corona Response Investment Initiatives (CRII and CRII+) have already helped Member States by providing liquidity to sectors such as tourism, health and SMEs. The Commission has commissioned a study on the impact of the COVID-19 crisis on the outermost regions and will assess carefully the preliminary findings to be finalised in autumn 2021. The Commission has enshrined the outermost regions' specificities in over 20 pieces of legislation for EU financing instruments for the Multiannual Financial Framework (MFF) period 2021-2027, offering unprecedented opportunities for the outermost regions to capitalise on their unique assets. The Commission will also adapt its strategic approach to the outermost regions with a new Communication due in 2022, taking into account the COVID-19 impact.		The Commission launched a <a href="#">public consultation</a> to gather views for a new strategic approach to the outermost regions for a green, digital and fair recovery. Initiative expected in Q2 2022.  <a href="#">Study</a> on the impact of COVID-19 on the Outermost Regions, October 2021. Actions will follow in 2022 based on study/future communication.	
47)	75. Call on the Commission to pay particular attention to mountainous regions, islands and insular regions and rural areas and underlines the importance of well-structured institutional cooperation with all interested regional actors, as well as the Committee of the Regions;	The Commission shares the views of the Parliament and supports the areas listed. Particular importance is devoted to the EU rural areas: they are home to 134 million people and cover 84% of the EU territory.		No further specific actions proposed/promised to be taken by the Commission.	
48)	76. Encourages the Commission and the Member States to ensure mobility in territories suffering from double and triple insularity, given the abrupt decline in supply; [...]	No specific reply is provided to this particular point.		Not mentioned.	

## 4.1.27.3. TRAN Resolution 3: EP resolution of 27 April 2021 on implementation report on the road safety aspects of the Roadworthiness Package

11)	<p>20. Notes that according to Commission reports, roadside inspections of commercial vehicles have been falling in the last six years; deplores this trend and recalls that under the Roadworthiness Package, Member States have since 2018 been obliged to ensure that a minimum number of roadside inspections are carried out in relation to the number of registered vehicles on their territory (5 %); calls on Member States to step up their efforts to reach the 5 % minimum target, and recalls that the first reporting obligation when this target will be scrutinised will be due by 31 March 2021 for the years 2019-2020; calls on the Commission to include vehicles in category N1<sup>24</sup> used for commercial road haulage purposes in the scope of roadside inspections, given their increase in number and high mileage;</p>	<p>The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.</p>		<p>EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU’s roadworthiness package</a>, first quarter 2023.</p>	
12)	<p>21. Calls on the Commission to work with Member States to further improve the quality and non-discriminatory nature of these roadside inspections in line with internal market rules, for example by setting and collecting key performance indicator (KPI) data and encouraging the use of risk rating profile systems for a better targeting of checks and penalties, especially for repeat offenders, while fully respecting the EU data protection framework;</p>	<p>The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.</p>		<p>EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU’s roadworthiness package</a>, first quarter 2023.</p>	

<sup>24</sup> Vehicles used for the carriage of goods and which have a maximum mass not exceeding 3.5 tonnes (e.g. pick-up trucks, vans).

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	23. Regrets the fact that the provisions in the Roadworthiness Package relating to the inspection of cargo securing are not mandatory, leading to only a few Member States transposing the relevant safety measures; concludes, therefore, that harmonisation is far from accomplished in this regard; urges the Commission to propose a reinforcement of these provisions in the next revision, including on harmonised minimum requirements for cargo securing, mandatory cargo securing equipment for each vehicle and for the minimum range of competences, training and knowledge for both the personnel involved in cargo securing and for the inspectors;		The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.		EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU’s roadworthiness package</a> , first quarter 2023.	
14)	24. Regrets the fact that only a few Member States keep a national electronic database of the major and dangerous deficiencies brought to light by roadside inspections and that Member States seldom notify the results of these inspections to the national contact point of the Member State in which the vehicle is registered; regrets the fact that the Roadworthiness Package does not set out any action that the Member State of registration should take once it has been notified of such major and dangerous deficiencies; urges the Commission to reinforce these provisions in the next revision, including by setting a unified scheme of actions which should be taken by the Member State of registration after receiving such a notification;		The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.		EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU’s roadworthiness package</a> , first quarter 2023.	
15)	25. Calls on the Commission, in view of the electronic data record for vehicles under the Roadworthiness Package, to consider amending Directive 2014/46/EU on registration documents for vehicles in order to end the obligation of delivery of physical documents and		No specific reply provided.		Not mentioned.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the obligation for the driver to present printed registration certificates; notes that conditions should be put in place for inspectors to make full use of electronic records;					
16)	26. Calls on the Member States to facilitate systematic data exchange on roadworthiness testing and odometer readings between their respective competent authorities for testing, registration and vehicle approval, test equipment manufacturers and vehicle manufacturers; welcomes, in this regard, the Commission's feasibility study on the Vehicle Information Platform; calls on the Commission and the Member States to work to ensure that a Vehicle Information Platform is set up as part of the next revision in order to expedite and facilitate data exchange and ensure more effective coordination between the Member States; stresses that this Vehicle Information Platform should enable an entirely paperless process of inspection and data exchange, in full respect of cybersecurity and data protection vis-à-vis third parties; welcomes in this regard the deployment by the Commission of the EU MOVEHUB platform and its recently developed ODOCAR module, providing an IT infrastructure for the exchange of odometer readings across the Union based on a database solution, including the possibility to exchange information with the Eucaris network; calls on the Commission to evaluate whether the use of the EU MOVEHUB should be made mandatory for Member States in a future revision;		The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.		EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU's roadworthiness package</a> , first quarter 2023.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	27. Calls on the Commission to assess during the next revision the possibility of including, as part of a mandatory data exchange on vehicle history between registration authorities, not only odometer readings but also information about accidents and the frequency of significant malfunctions, as this would ensure that EU citizens are protected from fraud and better informed as regards the history and state of their vehicles and formerly hidden vehicle repairs; considers that road accidents should trigger additional inspections, which help to ensure that vehicles are properly repaired and enhance road safety;	The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.		EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU’s roadworthiness package</a> , first quarter 2023.	
18)	28. Calls on the Commission to take due account of the technical progress in vehicle safety features for the next revision; notes that pursuant to Regulation (EU) 2019/2144, new vehicles will need to start being equipped with new advanced safety and driver assistance systems from 2022; calls on the Commission to include such new systems within the scope of periodic technical inspections as well as the skills and knowledge of vehicle inspectors, and to reduce the risk of tampering and manipulation of such systems; requests that the Commission also include eCall as well as software and ‘over-the-air’ updates in periodic technical inspections <sup>25</sup> , and that it draw up guidelines and standards for regular safety checks and inspections of autonomous and connected vehicles; calls on the Commission to explore the further use of sensors embedded in vehicles in the context of roadside inspections, and to pay special attention to the particular requirements of self-diagnosis systems of	The Commission states that it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023. 	vehicles and to the overriding principle of public health; calls in this regard on car manufacturers and authorities to cooperate on the implementation of new driving assistance technologies, in order to ensure permanent compliance with standards and to help foresee future trends;				
19)	29. Notes the rise of new modes of transport using public roads such as e-scooters, onewheels and hoverboards, among others; requests that the Commission assess whether these new modes should be addressed in the upcoming revision with the aim of improving road safety;	The Commission states it is currently premature to conclude at this stage on certain specific aspects and how these can be best addressed - possible revision of the EU legal framework on roadworthiness testing of vehicles has been announced for 2023.		EU legal framework on roadworthiness testing of vehicles has been announced for 2023. <a href="#">Vehicle safety – revising the EU’s roadworthiness package</a> , first quarter 2023.	
20)	30. Calls on the Commission to organise a European Year of Road Safety within the coming years, in preparation for 2030 as the intermediate target date for the achievement of Vision Zero;	No specific reply provided to this particular point.		Not mentioned.	
21)	31. Calls on the Commission and the Member States to ensure adequate funding for road infrastructure quality, in particular maintenance; furthermore, calls on the Commission to strengthen its approach to maintenance by taking appropriate measures to enhance long-term maintenance planning by Member States; notes that connectivity and digital security will be of paramount importance for the upcoming rise of connected and autonomous vehicles;	No specific reply provided to this particular point (on ensuring the adequate funding for road infrastructure quality).		Not mentioned.	

## 4.1.27.4. TRAN Resolution 4: EP resolution of 27 April 2021 on technical and operational measures for more efficient and cleaner maritime transport

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Technical and operational measures for more efficient and cleaner maritime transport</b>	27/04/2021 <a href="#">T9-131/2021</a> <a href="#">2019/2193(INI)</a> TRAN	<a href="#">SP(2021)537</a>	Final reply (SP) received 7 September 2021	Specific reply			
1)	1. Deplores the distortion of competition on the European market between fossil fuels, which benefit from more favourable tax treatment, and clean alternative fuels from renewable sources; calls on the Commission to address this situation by proposing to restore fair competition rules, applying the polluter-pays principle to maritime transport and promoting and further incentivising, including through tax exemptions, the use of alternatives to heavy fuels that are considerably reducing the impact on climate and the environment in the maritime sector;	To achieve a climate-neutral Europe by 2050, the Commission tabled in July 2021 the Fit for 55 package of measures to reduce emissions by at least 55% by 2030. As part of this package, the Commission proposed to apply the polluter-pays principle to maritime transport through the extension of the EU Emissions Trading Scheme (ETS) to maritime and the revision of the Energy Tax Directive. [...] At the International Maritime Organization (IMO), the Commission, together with the Member States, steered further development of global carbon intensity standards and their adoption at the meeting of the Marine Environment Protection Committee held on 10-17 June 2021 (MEPC 76). To pave the way for the effective uptake of sustainable alternative fuels at global level, the Commission is preparing a submission of the Union to the IMO for life cycle guidelines to estimate greenhouse gas emissions intensity of marine fuels for the discussion at the 77th meeting of the Marine Environment Protection Committee in November 2021.				On 14 July 2021, the Commission presented <a href="#">Fit for 55 package</a> .  <a href="#">Marine Environment Protection Committee (MEPC 76)</a> , 10 to 17 June 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	5. Calls on the Commission and the Member States, taking into account the IMO's initial strategy on the reduction of greenhouse gas emissions from ships adopted in 2018 and its forthcoming revision, to use their weight in the IMO to ensure that it adopts concrete measures in order to lay an ambitious and realistic path towards zero-emission shipping that is consistent with the temperature goal of the Paris Agreement, thereby contributing to the international level playing field;	On IMO's strategy to reduce greenhouse gas emissions, the Commission, together with the Member States, succeeded in pushing for the adoption of the work plan for the implementation of mid-term measures, including a market-based measure, to deliver on the ambition of the Initial IMO strategy on reduction of Greenhouse Gas (GHG) emissions from ship and its forthcoming revision scheduled for 2023. Given the international and competitive dimension of the maritime transport sector, the Commission has also carefully assessed and taken into account the coordination and consistency of the forthcoming EU initiatives on maritime with potential future measures at the IMO. Information on the package of measures and notably FuelEU maritime and the extension of ETS to maritime transport will be shared with the IMO in September. Currently the Commission is considering with Member States different options for Union submissions to the IMO on medium term measures that will contribute on the decarbonisation of the fuel used by ships.		A <a href="#">revision</a> of strategy on reduction of Greenhouse Gas (GHG) emissions from ships is scheduled for 2023.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	6. Calls on the Commission to address under the FuelEU Maritime initiative not only the carbon intensity of fuels but also the technical and operational measures which would improve the efficiency of ships and their operations; recalls that, in the context of the revision of Regulation (EU) 2015/757 <sup>26</sup> , Parliament called on shipping companies to achieve a 40 % reduction in emissions by 2030 as an average across all ships under their responsibility, compared to the average performance per category of ships of the same size and type; adds that the initiative should also include a life-cycle approach incorporating all GHG emissions; stresses that alternative fuels that do not meet the REDII -70 % threshold on a life-cycle basis should not be allowed for regulatory compliance;	On ship energy efficiency, the Commission agrees that improvements in ship energy efficiency and an increased use of cleaner fuels should be pursued in parallel. This requires however separate instruments and for this reason the Commission aims to propose a basket of measures to address maritime emissions with the objective of addressing the various technological, market and regulatory barriers that hinder the decarbonisation of the sector. Accordingly, while the FuelEU Maritime initiative focuses on the use of cleaner energy, other instruments such as carbon pricing will incentivise the implementation of energy efficiency measures, along with energy efficiency measures at global level (existing technical standards for new ships and carbon intensity measures adopted at MEPC 76). The Commission agrees that the FuelEU Maritime initiative should assess emissions through a life-cycle approach incorporating all GHG emissions and consider the greenhouse gas emission savings thresholds set out in Directive (EU) 2018/2001 on the promotion of the use of energy from renewable sources.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">FuelEU Maritime Initiative</a> , carbon pricing, <a href="#">MEPC 76</a> ).	
4)	10. Notes the positive role of the European maritime cluster and the positive developments internationally to support innovation and reduce shipping emissions, and calls on the Commission and the Member States to support initiatives contributing to these positive developments;	No specific reply is provided to this particular point.		Not mentioned.	

<sup>26</sup> Regulation (EU) 2015/757 of the European Parliament and of the Council of 29 April 2015 on the monitoring, reporting and verification of carbon dioxide emissions from maritime transport, and amending Directive 2009/16/EC (OJ L 123, 19.5.2015, p. 55).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>11. Calls on the Commission to support, through legislation, the objective of zero pollution (GHG emissions and air pollutants) at berth, and to promote the development and deployment of clean multimodal solutions in ports supported through a corridor approach; calls on the Commission, in particular, to take swift action to regulate EU port access for the most polluting ships based on the Port State Control Directive<sup>27</sup> framework, and to incentivise and support the use of on-shore power supply using clean electricity or any other energy-saving technologies that have a considerable effect on diminishing GHG emissions and air pollutants; <i>regrets that the revision of Directive 2014/94/EU has been postponed;</i></p> <p>urges the Commission to propose a revision of Directive 2014/94/EU as soon as possible in order to include incentives for both Member States and ports to scale-up the deployment of the necessary infrastructure;</p>	<p>On zero emissions at berth, with the FuelEU Maritime initiative, the Commission indeed aims to promote the objective of zero emissions at berth by obliging use of on-shore power supply or other zero emission technologies for the most polluting ships. Requirements on the demand side will be matched with requirements on ports to develop infrastructure for on-shore power supply within the context of the revision of Directive 2014/94/EU on the deployment of alternative fuels infrastructure.</p> <p>[...]</p>		<p>On 14 July 2021 the Commission presented a <a href="#">proposal</a> for a regulation on the use of renewable and low-carbon fuels in maritime transport and amending Directive 2009/16/EC (Fuel EU Maritime initiative).</p>	

<sup>27</sup> Directive 2009/16/EC of the European Parliament and of the Council of 23 April 2009 on port State control (OJ L 131, 28.5.2009, p. 57).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	calls on the Commission also to propose a revision of Directive 2003/96/EC <sup>28</sup> ;	On the revision of the Energy Tax Directive: Revising the Energy Taxation Directive forms part of the group of policy reforms necessary to deliver on the increased ambition set out in the European Green Deal to make the EU climate-neutral by 2050. The Commission proposed a revision of the Energy Tax Directive, also as part of the Fit for 55 package. Aligning taxation of energy products and electricity with EU energy and climate policies is one of the objectives of the revision, including as regards possible taxation measures that provide the right incentives for consuming cleaner electricity and thereby serve to reduce pollution at ports.		On 14 July 2021, the Commission presented <a href="#">Fit for 55 package</a> , which includes a <a href="#">proposal</a> on the deployment of alternative fuels infrastructure, and repealing Directive 2014/94/EU of the European Parliament and of the Council.	
6)	12. Calls on the Commission to draw up a strategy on zero-emission ports and support bottom up initiatives, including measures to promote the development of port industries specialising in the circular economy, which would, in particular, ensure better use of ships' waste that is recovered and treated in ports;	The Parliament calls on the Commission to draw up a strategy on zero-emission ports and support bottom up initiatives in ports. The Sustainable and Smart Mobility Strategy sets the strategic objectives for the transition of ports to zero-emission multimodal nodes and their potential to become clean energy hubs. These strategic orientations are and will be reflected in legislative initiatives in 2021 such as the FuelEU Maritime initiative and the revisions of the Alternative Fuels Infrastructure Directive (Directive 2014/94/EU) and of the TEN-T Regulation (Regulation (EU) 1315/2013). The Commission will also work closely with ports and other stakeholders, notably within the European Ports Forum and its Sustainable		On 14 July 2021, the Commission published a <a href="#">proposal</a> on the deployment of alternative fuels infrastructure, and repealing Directive 2014/94/EU of the European Parliament and of the Council.	

<sup>28</sup> Council Directive 2003/96/EC of 27 October 2003 restructuring the Community framework for the taxation of energy products and electricity (OJ L 283, 31.10.2003, p. 51).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Ports Subgroup, to share best practices followed by the most sustainable ports, including on greening of port services and operations. Adopted in the framework of the Commission's circular economy package, Directive (EU) 2019/883 on port reception facilities for the delivery of waste from ships, with a focus on oily waste and sea-based marine litter. It sets measures to ensure that waste generated on ships or collected at sea is always returned to land, recycled and processed in ports.			
7)	13. Calls on the Commission to promote a modal shift towards short-sea shipping in the Green Deal, on the same basis as rail and inland waterways, as a sustainable alternative to goods and passenger transport by road and air; [...]	<u>Paragraphs 13 and 15:</u> The Commission recognises the importance of a modal shift towards short-sea shipping. The Sustainable and Smart Mobility Strategy fixes targets to that end. Accordingly, transport by inland waterways and short sea shipping should increase by 25% by 2030 and by 50% by 2050. This will be facilitated by future initiatives on multimodality, in particular the strategy's flagship 4 'Greening freight transport', which will revamp the existing framework for intermodal transport, along with flagships 28 and 34 on a European framework for the harmonised measurement of transport and logistics greenhouse gas emissions carbon footprint, which will provide businesses and end-users with an estimate of the carbon footprint of their choices. Moreover, the EU Recovery and Resilience Fund will help Member States to invest and launch reforms that will contribute to roll out alternative refuelling infrastructure as well as fleet renewal for all transport modes.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Sustainable and Smart Mobility Strategy – putting European transport on track for the future</a> , EU Recovery and Resilience Fund).	
8)	15. Calls also for a clear strategy to promote Roll-On-Roll-Off (RO-RO) shipping for freight, thereby reducing the presence of heavy-duty vehicles from roads; encourages the Commission to take more concrete steps to combine its maritime policy with the aim of	<u>Paragraphs 13 and 15:</u> The Commission recognises the importance of a modal shift towards short-sea shipping. The Sustainable and Smart Mobility Strategy fixes targets to that end. Accordingly, transport by inland waterways and short sea shipping		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Sustainable and Smart Mobility Strategy –</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	avoiding long and environmentally harmful road distribution transport across the continent, by encouraging deliveries closer to end-destination markets via smaller ports;	should increase by 25% by 2030 and by 50% by 2050. This will be facilitated by future initiatives on multimodality, in particular the strategy's flagship 4 'Greening freight transport', which will revamp the existing framework for intermodal transport, along with flagships 28 and 34 on a European framework for the harmonised measurement of transport and logistics greenhouse gas emissions carbon footprint, which will provide businesses and end-users with an estimate of the carbon footprint of their choices. Moreover, the EU Recovery and Resilience Fund will help Member States to invest and launch reforms that will contribute to roll out alternative refuelling infrastructure as well as fleet renewal for all transport modes.		<a href="#">putting European transport on track for the future, EU Recovery and Resilience Fund</a> ).	
9)	16. Calls on the Commission to restore meaning to the concept of Motorways of the Sea, as an integrated part of the TEN-T network, as it is instrumental in facilitating short-sea links and services as sustainable alternatives to land transport, and to facilitate cooperation among maritime ports and the connection to their hinterland by simplifying access criteria, in particular for links between ports outside the core network, by providing significant financial support for maritime links as an alternative to land transport and by ensuring their connection to railway networks;	<p>Related to the provision of sustainable alternatives to land transport, the Sustainable and Smart Mobility Strategy put at its core a more sustainable and less polluting transport system. It states that transport by inland waterways and short sea shipping should increase by 25% by 2030 and by 50% by 2050 (compared to the levels of 2015). By increasing short sea shipping, there is a potential to reduce road transport significantly.</p> <p>This will be supported through the Connecting Europe Facility (CEF), which aims to contribute to the completion of the TEN-T and to the decarbonisation of transport. Concerning maritime ports, the CEF will in particular aim at enhancing modal shift and decarbonising waterborne transport, by supporting investments in multimodal terminals and transshipment infrastructure, as well as the roll-out of alternative fuelling infrastructure among others. This will support the creation and strengthening of hinterland connections and improve the</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request :</p> <p>On 9 December 2020, the Commission adopted <a href="#">Sustainable and Smart Mobility Strategy</a>. The <a href="#">Agreement on 2021-2027 Connecting Europe Facility</a> was reached 31 March 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>interconnection with other transport modes. Motorways of the Sea will be supported also under the CEF II, placing particular emphasis on cross-border short sea shipping with the aim of improving maritime links. The request of the Parliament to provide significant financial support for maritime links and hinterland connectivity is thus an objective which is shared by the Commission, but this also depends on the Member States who should submit projects of high quality under the CEF programme.</p> <p>In addition to CEF, InvestEU can support the development of sustainable and safe transport, including port infrastructures and equipment, new vessels, or retrofitting to meet environmental criteria, alternative fuels, and their charging or fuelling mechanisms, including to small and medium sized enterprises (SMEs) and for innovative technologies and mobility services in accordance with Union transport priorities and the commitments taken under the Paris Agreement. InvestEU will also offer financial advisory services to facilitate access to funding.</p> <p>Specifically on Motorways of the Sea, in the ongoing revision of the TEN-T regulation (EU) No 1315/2013, it is the Commission's intention to reinforce the maritime pillar of the TEN-T policy by establishing a European Maritime Space aiming to make the sector smarter, more sustainable and seamless. A sustainable European Maritime Space will address the objectives and priorities in the European Green Deal as well as the new Sustainable and Smart Mobility Strategy.</p> <p>The connectivity of ports to the hinterland will be a key element of the European Maritime Space. The</p>		<p>On 27 May 2021, the Commission published SWD on <a href="#">the evaluation of the Regulation (EU) N° 1315/2013 on Union Guidelines for the development of a transEuropean transport network</a>.</p> <p>On 14 December 2021, the Commission published the <a href="#">proposal</a> on the revision of the TEN-T regulation.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Commission is currently assessing whether stricter requirements for last mile connectivity to the hinterland should be included in the revised TEN-T regulation. Port clustering can be positive to improve efficiency, as long as competition between ports is not distorted.</p>			
10)	<p>18. Stresses the urgent health and environmental need to establish a sulphur emission control area (SECA) covering all Mediterranean countries; calls on the Commission and the Member States to give active support to the submission of such an area to the IMO before 2022; urges the Member States also to support the principle of swiftly adopting a nitrogen emission control area (NECA) aimed at reducing nitrogen emissions in the Mediterranean;</p>	<p>The Commission agrees on the urgent need to act on ship pollution sources to improve our health and environment. One cost-effective policy tool is indeed the creation of Emission Control Areas (ECA) to promote cleaner shipping in all EU waters and possibly globally in the future. The establishment of SOx (sulphur oxides) and NOx (nitrogen oxides) ECAs in the North Sea and the Baltic Sea have resulted in clear improvements in air quality in coastal areas. Future ECAs can be established by a regional agreement of the coastal states concerned to protect a sea basin and established under global rules. The Commission is spearheading efforts in the Mediterranean Sea to ensure, together with all littoral states, a positive decision is taken at the end of 2021 and to move forward in the framework of the Barcelona Convention (notably at COP 22 in Antalya, on 7 - 10 December 2021). Based on the regional agreement, the Commission will continue to actively support formal requesting the declaration of such an area to the IMO in 2022 with the view of its entering into force as soon as possible. The Commission and the Member States bordering the Mediterranean Sea will also endeavour to start preparatory work in 2022 in the Barcelona Convention context to swiftly adopt also an Emission Control Area for nitrogen oxides.</p> <p>Furthermore, ongoing climate policy developments (such as the FuelEU Maritime proposal which imposes</p>		<p>On the 10 December 2021, at COP 22 of the Barcelona Convention in Antalya, Turkey, 22 signatory governments agreed to establish in Mediterranean Sea a sulphur emission control area (SECA) for shipping, under MARPOL (Annex VI), with the proposal to be submitted for adoption to MEPC 78 in June 2022. <a href="#">Barcelona Convention.</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		on-shore power supply requirements at berth) will lead to positive co-benefits in the reduction of air pollution emission.			
11)	19. Calls on the Commission to provide for the extension of these emission control areas to all EU seas in order to achieve a uniform reduction in the permitted NO <sub>x</sub> and SO <sub>x</sub> emission levels from ships; stresses that the cumulative reduction in sulphur oxide and nitrogen oxide emissions has a direct impact on the reduction of fine particles (PM10 and PM2.5);	<p>Furthermore, ongoing climate policy developments (such as the FuelEU Maritime proposal which imposes on-shore power supply requirements at berth) will lead to positive co-benefits in the reduction of air pollution emission.</p> <p>The Commission notes that the negative effect of air and water pollution from shipping are widely documented in existing scientific literature. Cost benefit analyses exist, including studies funded by the Commission, underpinning the case for decisive action on air pollution including through the creation of emission control areas. Technical evidence also points to manageable costs for the maritime industry which, when passed on to citizens or small businesses would not hamper their welfare.</p>		No further/specific actions proposed/promised to be taken by the Commission although through its reply the Commission indicates such measures would be technically and financially possible.	
12)	21. Calls on the Commission, shipowners and ship-operators to ensure the implementation of all available operational and technical measures to achieve energy efficiency, in particular speed optimisation, including slow steaming where appropriate, innovation in hydrodynamics optimisation of navigable routes, the introduction of new propulsion methods, such as wind-assist technologies, vessel optimisation and better optimisation within the maritime logistics chain;	On achieving energy efficiency, it is the Commission's objective to lead by example in proposing ambitious measures to decarbonise maritime transport at the EU level and bringing them to the attention of the IMO. The Commission is ready to advocate the EU level of ambition of achieving climate neutrality by 2050 at the IMO (paragraph 20) and to support the maritime cluster in the implementation of available energy efficiency measures, as also discussed in the Commission's European Sustainable Shipping Forum expert sub-group on ship energy efficiency.		No further/specific actions proposed/promised to be taken by the Commission.	
13)	24. Welcomes the new sulphur content limit in fuels of 0,5 % introduced by the IMO on 1 January 2020, and stresses that it should not lead to a shift in pollution from air to water; calls, therefore, on the Commission, and the Member States, in line with Directive (EU)	The Commission is very concerned about the persistent nature of the pollutants in the discharge waters from open-loop scrubbers and their potential to accumulate in the environment and seafood have a negative impact on the marine environment, on		The Commission is working on the issue at IMO level (a first guidance document foreseen in 2022) and considers individual action should the IMO discussions stagnate on the issue.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>2019/883<sup>29</sup>, to work at IMO level towards a comprehensive consideration of the environmental impacts on discharges into the sea of waste water from open-loop scrubbers and other cargo residues and to ensure that they are properly collected and processed in port reception facilities; in this regard, strongly encourages Member States to set up discharge bans for wastewater from open-loop scrubbers and certain cargo residues in their territorial waters in accordance with Directive 2000/60/EC<sup>30</sup>; stresses that sustainable solutions should be favoured from the outset, on the basis of life-cycle analysis; notes that the purpose of open-loop scrubbers is to address air pollution and that investments in them have been made; points out that the use of open-loop scrubbers has an impact on the environment and welcomes the fact that the IMO is studying their long-term impact; calls on the Commission, in this regard, to implement on the basis of an impact assessment a gradual phase-out of the use of open-loop scrubbers in order to comply with emission limits, in line with the IMO framework and the MARPOL Convention;</p>	<p>biodiversity, human health and fisheries. To date, a number of Member States have already set up water discharge from these systems in their territorial waters based on the precautionary principle and to comply with Directives 2000/60/EC and 2008/56/EC. In this context, the Commission is determined to continue to work in the IMO context on the evaluation and harmonisation of rules and guidance on discharge water from scrubbers into the aquatic environment; as an outcome of this work, the IMO will develop in 2022 guidance on the required risk and impact assessment framework with the view to possibly adopt globally harmonised regulation restricting related discharges. The Commission agrees on the urgency of the matter with a view to timely protection of the environment, and at the same time to take into account investments made and ensure a level playing field for all ships, including those not equipped with scrubbers, across the EU at the international level through enhanced legal clarity. In case IMO development would not be conclusive, the Commission could consider proposing EU rules in the future, based on technical evidence of costs and benefits, mandating a gradual phase-out of the use of exhaust gas cleaning systems in order to comply with emission and water pollutant limits under EU legislation.</p>			

<sup>29</sup> Directive (EU) 2019/883 of the European Parliament and of the Council of 17 April 2019 on port reception facilities for the delivery of waste from ships, amending Directive 2010/65/EU and repealing Directive 2000/59/EC (OJ L 151, 7.6.2019, p. 116).

<sup>30</sup> Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	25. Calls on the Commission to integrate alternative propulsion systems, including wind and solar, into the upcoming FuelEU Maritime initiative; <i>calls on it to assess the current initiatives and projects concerning sail freight transport and to ensure that propulsion systems for transport are eligible for European funding;</i>	The Commission agrees with the importance of promoting the use of renewable energy sources and alternative propulsion systems, such as wind and solar energy, in maritime transport and has taken this into account in formulating the FuelEU Maritime proposal.		On 14 July 2021, the Commission presented the <a href="#">proposal</a> for a regulation on the use of renewable and low-carbon fuels in maritime transport and amending Directive 2009/16/EC (Fuel EU Maritime initiative).	
15)	26. Calls on the Commission to introduce measures, accompanied with the necessary funding, to enable European shipyards to make additional investments into sustainable, social and digitalised shipbuilding and the ship repair industry, which is of strategic importance to generate jobs, thereby supporting the transition to a circular economy model that takes into account the entire life-cycle of ships; stresses the importance of supporting and developing sustainable solutions for building and dismantling vessels within the EU in line with the New Circular Economy Action Plan; stresses in this light that shipyards should exercise due diligence in their value chains inside and outside the EU, in line with OECD and UN standards, so that adverse environmental impacts when dismantling vessels can be avoided;	On ship recycling: the EU has a unique and ambitious policy to promote safe and environmentally sound ship recycling globally. The main instrument of this policy is Regulation (EU) No 1257/2013 of the European Parliament and of the Council of 20 November 2013 on ship recycling (“the Ship Recycling Regulation”).  The Ship Recycling Regulation, which has been applicable since 31 December 2018, requires all large commercial seagoing vessels flying the flag of the Member States of the Union to be dismantled only in ship recycling facilities included in the ‘European List of ship recycling facilities’ (Commission Implementing Decision (EU) 2016/2323). As announced in the recent Communication on Sustainable Blue Economy (COM(2021) 240 final), the Commission plans to revise the Ship Recycling Regulation by 2023 to possibly extend its scope and reinforce the existing regime. The European Green Deal and the new Circular Economy Action Plan (CEAP) also call for creating a well-functioning EU market for secondary raw materials, as well as addressing waste exports, which represent a loss of resources and economic opportunities for the recycling industry in the EU. Sustainable ship recycling in Europe has the potential to be an important contributor to the circular economy. End-		The issue to be followed up in 2023 when the Commission plans to <a href="#">revise the Ship Recycling Regulation</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>of-life ships can have a useful and profitable new life as scrap metal, thus providing important secondary raw materials for steel making in Europe. Therefore, the Commission will, in the context of the future revision of the Ship Recycling Regulation, explore new measures in support of sustainable ship recycling in Europe, in line with the general policy objectives of the European Green Deal and the CEAP.</p>			
16)	<p>27. Calls on the Commission to provide support under its European funding programmes, in particular the Horizon Europe and InvestEU programmes, for research into and deployment of clean technologies and fuels; [...] calls for the Horizon Europe programme to renew the calls for 'Green Deal' projects, launched by the Commission under Horizon 2020, in particular in order to green the maritime sector and to support research and innovation and the deployment of alternatives to heavy fuels that are considerably reducing the impact on climate and the environment in the maritime sector;</p>	<p>On support for research into and deployment of clean technologies and fuels, the Horizon Europe Work Programme 2021-2022 includes providing support for research and deployment of clean technologies and fuels for the shipping industry, the land-based fuel supply chain and ports. The European Green Deal underlines the need to achieve clean, climate neutral shipping and waterborne operations and the importance of research and innovation in this respect. To provide the innovations needed to achieve these targets and show global leadership (also in pushing far more ambitious global regulatory standards) a new co-programmed European Partnership "Zero Emission Waterborne Transport" (ZEWT) has been established (Commission Decision C(2021)4113)<sup>31</sup>. This Partnership will contribute to maintaining and reinforcing Europe's global leadership in innovative, green waterborne transport solutions. It will mobilise resources and leverage private and public investments towards the central objective of demonstrating by 2030 the deployable</p>		<p>On 15 June 2021, the Commission adopted the <a href="#">Horizon Europe Work Programme 2021-2022</a>.</p>	

<sup>31</sup> On 14/6/2021, Commission adopted Commission Decision C(2021)4113 on the approval and signature of the memoranda of understanding for 11 Co-Programmed Partnerships, including ZEWT. Implementation runs through the Horizon Europe work programmes and their calls for proposals. Each partnership provides Commission with input on relevant call topics to be included in the work programmes.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>solutions needed for all main types of waterborne transport to become “net zero emission” by 2050 at the latest.</p> <p>The EU has supported research and innovation on hydrogen for many years, starting through traditional collaborative projects, and subsequently mainly with the Fuel Cells and Hydrogen Joint Undertaking (FCH JU). A proposal for a regulation establishing the Joint Undertakings under Horizon Europe, including the establishment of the Clean Hydrogen for Europe Joint Undertaking (CLEANH2-JU), the continuation of FCH JU, is currently under discussion. If established, CLEANH2-JU will have the leading role in research activities related to hydrogen, but will not have the exclusivity, as hydrogen related research will also be supported under other partnerships under Horizon Europe. If established, CLEANH2-JU will closely cooperate with the above-mentioned co-programmed partnership “Zero Emission Waterborne Transport” (ZEWT) to provide support to activities of research, development and demonstration urgently needed in the area of hydrogen and fuel cell-based technology. One of the most important factors to decarbonise shipping is the availability of carbon-free fuels in ports, which will also be addressed in the roadmap of the CLEANH2-JU.</p> <p>To enable low-carbon, smart, clean and competitive waterborne transport, the Commission indicated as potential research challenges, the increase of performance for fuel cell application and R&amp;I in ports for alternate energy supplies and uses.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	28. Calls on the Commission to make projects aimed at decarbonising maritime transport and reducing polluting emissions, including the necessary port infrastructure and facilities, eligible under the cohesion policy and through the European Structural and Investment Funds, the CEF and the Green Deal and to make funds and incentives available to support the maritime sector in the transition towards a zero-carbon economy, taking into account the social dimension of the transformation; stresses the importance of creating synergies and complementarities between different EU funding solutions, without creating an unnecessary administrative burden, which would discourage private investments and therefore slow down the technological progress and thus the improvement of cost-efficiency; calls on the Commission to promote and invest in a green European maritime industry on EU territory as part of its European industrial recovery plan, taking the lead in the development of new eco-designed ships, the renovation and modernisation of existing vessels, and dismantlement;	On the call related to projects aimed at decarbonising maritime transport (paragraph 28) and the support for decarbonisation and modal shift by CEF (paragraph 30), the Commission recalls that the CEF II will contribute at least 60% of its funding to the Union's climate objectives and places particular emphasis on the enhanced support to transport sustainability, digitalisation and climate resilience. Among other objectives, CEF supports the deployment of the alternative fuels infrastructure and thus, facilitates the transition process towards the goal of zero emissions. For instance, in ports, on-shore power supply equipment, alternative fuel infrastructure (including hydrogen) and better rail connections will be eligible.		CEF II <a href="#">Regulation</a> (EU) 2021/1153 of the European Parliament and of the Council of 7 July 2021 establishing the Connecting Europe Facility and repealing Regulations (EU) No 1316/2013 and (EU) No 283/2014.	
18)	33. [...] encourages the Commission to establish an EU network to exchange good practices on how to adapt the workforce to the new needs of the sector;	No specific reply provided to this particular point (on establishing the EU network).		Not mentioned.	
19)	34. Supports the Commission's review of State aid guidelines in all relevant sectors, including transport and in particular maritime, in order to achieve the objectives of the European Green Deal by applying the 'just transition' principle and by allowing national governments to directly support investments in decarbonisation and clean energy; calls on the Commission to examine whether the current tax exemptions allow unfair cross-sector competition	On state aid, the Commission is encouraging, support for greener vessels, including in the context of State aid for maritime transport activities. Examples in this respect are the tonnage tax decisions adopted for Portugal in 2018 (SA.48929) and Cyprus in 2019 (SA.51809).  While quite some State aid guidelines (in relation to transport, but also beyond) are under review/ evaluation, no maritime specific guidelines are under		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	conditions; urges the Commission to provide clarity on State aid for sustainable shipping projects;	review or being evaluated at the moment, including the maritime guidelines on aid to maritime transport (e.g. special tax regime applicable to maritime transport instead of normal corporate taxation and reduction of labour costs). The Commission is currently revising the Guidelines on State aid for environmental protection and energy. A public consultation was launched on 7 June in this respect which includes a new section on aid for clean means of transport, including inland and sea-going vessels.			
20)	35. Points out the economic consequences of the COVID-19 pandemic for the waterborne sector, especially collective passenger transport; calls on the Member States to include the waterborne sector as a priority in their national recovery plans, so as to ensure that it can have comprehensive access to the resources allocated under the Recovery and Resilience Facility; asks the Commission, moreover, to map smart investment initiatives for the sustainable and resilient recovery of the sector;	On investment initiatives for the sustainable and resilient recovery of the maritime sector, the Commission will keep Parliament fully informed about the various initiatives for the recovery and resilience of the European economy, including for the maritime sector, in the framework of the Recovery and Resilience dialogue established under Article 26 of the Recover and Resilience Facility Regulation. In addition the Commission will present to the Parliament and the Council a review report on the implementation of the Facility by 31 July 2022, as provided under Article 16 of this regulation.		No further/specific actions proposed/promised to be taken by the Commission.	
21)	36. Calls on the Commission to ensure the transparency and availability of information on the environmental impact and energy performance of ships and to assess the establishment of a European label scheme, in line with actions taken at IMO level, which should aim to effectively reduce emissions and assist the sector by providing improved access to funding, loans and guarantees based on its emission performance and improving emissions monitoring, create benefits by incentivising port authorities to differentiate port infrastructure charges, and raise the sector's attractiveness; moreover stresses the need to further	As regards transparency on environmental impact and energy performance of ships, the technical screening criteria for environmentally sustainable shipping activities were established via the EU Taxonomy. EU taxonomy for sustainable activities is based on Sustainable finance taxonomy (Regulation (EU) 2020/852) and sets EU harmonised criteria for determining whether an economic activity qualifies as environmentally sustainable.  Among other economic sectors, maritime was addressed in the EU Taxonomy Climate Delegated		No further/specific actions proposed/promised to be taken by the Commission.  <a href="#">EU Taxonomy Climate Delegated Act.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>promote, develop and implement the 'green ship' scheme, which should take into account emission reduction, waste treatment and environmental impact, notably through the sharing of experience and expertise;</p>	<p>Act, with two annexes on climate change mitigation and adaptation, which was adopted on 21 April 2021. Sea and coastal water transport vessels with zero emissions, as well as hybrid and dual fuel vessels that derive at least 25% of their energy from zero emission fuels or plug-in power for their normal operation will be considered taxonomy compliant. In addition, the Taxonomy includes also 'best in class' vessels, which are benchmarked to the IMO rules (vessels with the Energy Efficiency Design Index (EEDI) value 10% below the IMO requirements). The criteria also recognise ambitious retrofits allowing to improve the energy efficiency of existing fleet.</p> <p>Maritime activities are considered transitional, which means that the criteria, which are currently set until 2025, have to be revised in every 3 years. Future evolution of the maritime Taxonomy framework would take into account both the EU policy framework and relevant IMO developments.</p> <p>There is currently no plan for a European label scheme apart from the Taxonomy. In relation to control and implementation, the Commission would note the work that it has embarked upon to update and revise Directives 2009/16/EC on port State control, 2009/18/EC on maritime accident investigation and 2009/21/EC on compliance with flag state requirements.</p> <p>These three legislative acts have been in place for over 10 years and need to be updated to take account of lessons learned and changes in technology and in the international regulatory environment. There are also challenging administrative and political developments (such as the Green Deal or COVID resilience) that need to be</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		addressed in order to maintain the highest level of safety in the most efficient way.			
22)	37. Calls on the Commission to propose a revision of the Port State Control Directive by the end of 2021 at the latest, as provided for in the Commission's working programme for 2021, to allow for more effective and comprehensive control of ships and simplified procedures, including incentives for compliance with environmental, social, public health and labour law standards, safety on board of ships calling at EU ports for both seafarers and dock workers, and the possibilities for effective proportionate and dissuasive sanctions, taking into account environmental, public health, tax and social law;	As regards port State control the Commission is looking in particular at the use of electronic data and information (including ship e-Certificates) to simplify procedures and to support the better targeting of vessels for inspection. This should allow inspectors to concentrate on operational issues and on poorly performing ships rather than documentation checks. This will incentivise compliance with safety, environmental, social and labour law standards rewarding good operators and targeting the poor performers. This will link with the continuous compliance issue in the Flag State Directive.		The Commission proposal on revision of the <a href="#">PsC Directive</a> was scheduled in Q4 2021 but it is still pending.	
23)	38. Calls on the Commission to increase, in coordination with the ILO, capacity-building for third countries on inspections and enforcement and to launch campaigns with the social partners to increase awareness of rights and obligations under the Maritime Labour Convention; calls on the Commission to promote the creation by the ILO of a database containing inspection findings and seafarers' complaints to help seafarers and shipowners engage with the most reputable MLC-compliant recruitment and placement services;	<p>Another key area is administrative capacity. Any revision of the legislation will consider measures to address problems of recruitment, retention and training of suitable inspectors. The possible inclusion of larger fishing vessels within a port state control regime will be looked into. The Commission has begun a dialogue with the International Labour Organization (ILO) to examine the possibility of creating a database containing the findings of port State control inspections relating to living and working conditions on board and seafarers' complaints.</p> <p>On flag State requirements, the planned revision of the current Directive should align EU law with the International Maritime Organisation Implementation of the International Instruments Code, which has become mandatory in 2016 to provide for adequate enforcement of IMO standards at EU level and harmonised implementation.</p>		<p>The Commission confirms it is working within ILO for the creation of such a database.</p> <p>The Commission informs it already provides support to third countries through various programmes.</p> <p><a href="#">Compliance with Flag State requirements (shipping)</a> (revision).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The revised directive will address the need for adequate technical capacity in maritime administrations for Member States to fulfil their responsibilities as Flag States. The Commission is also looking at the digitalisation of EU maritime administrations, which are moving from paper-based records into the digital age. The use of uniform electronic information (e-Certificates/e-Registers and a uniform technical protocol to enable exchange; link with port State control) will support Member States as Flag States, enabling more efficient control and monitoring of their flagged fleet as well as the recognised organisations to which many flag states have delegated a large number of their tasks.</p> <p>On the subject of accident investigation, the issues of administrative capacity and regulatory burden need to be looked at. Smaller Member States, Member States with small fleets, short coastlines and landlocked Member States have found the establishment and funding of a permanent accident investigation body (as required by the directive) to be a heavy resource burden. The Commission will seek to identify means to support the Member States in their accident investigation obligations either by sharing and/ or pooling resources, making use of the expertise of the European Maritime Safety Agency (EMSA), in particular for analysis, and benefitting from possible EU-provided top-up facilities. The possible extension of the directive on accident investigation to certain types of accidents involving fishing vessels of less than 15 metres in length (larger fishing vessels are already within the scope of the Directive).</p> <p>With regard to monitoring oil pollution at sea, the operational Union Maritime Information and Exchange System (SafeSeaNet) includes the CleaSeaNet services within its Integrated Maritime</p>		<p><a href="#">Maritime Accident Investigation</a> (revision).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Services, allowing the detection of suspect spills at sea. In that respect the EU financed SAFEMD (and BCSea) projects, executed by EMSA for the beneficiary third countries, allows, at their request for the duration of the project, access to the CleanSeaNet oil spill detection service.</p>			
24)	<p>39. Highlights the potential of the European Maritime Safety Agency (EMSA), with its Safe Sea Net satellite system, in monitoring oil pollution and illegal discharges of fuel residues at sea and implementing Regulation (EU) 2015/757; emphasises that regional cooperation, including with third countries, is essential in this area, especially in the Mediterranean Sea; calls on the Commission, therefore, to reinforce the exchange of information and cooperation among countries;</p>	<p>On EMSA and its Safe Sea Net satellite system: The Commission would highlight the ongoing preparatory work on revising the Directive on ship-source pollution and penalties for pollution offences (Directive 2005/35/EC). The directive provides the legal basis for EMSA monitoring activities (CleanSeaNet) and assistance to MS to prevent and respond to such marine pollution. Thanks to satellite surveillance and the SafeSeaNet system (Directive 2002/59/EC on Union maritime monitoring and information system), Member States are able to track the potentially responsible vessels. The Commission would also underline that Regulation 2015/757/EU has a different purpose and is the MRV (monitoring, reporting and verification) system for CO2 emissions from ships where EMSA also assists the Commission.</p> <p>Regarding the exchange of information and cooperation among countries, especially in the Mediterranean, the Commission highlights to the successful SAFEMED projects funded under the European Neighbourhood Instrument and implemented by EMSA. Through these projects EMSA provides training and technical assistance to the beneficiary countries and encourages them to cooperate further on all matters related to the safety and sustainability of shipping. This includes encouragement to non EU Mediterranean countries to cooperate amongst themselves. As for cooperation and information-sharing between EU and non EU</p>		<p>In 2021 the Commission financed a new phase of SAFEMED that will allow EMSA to provide support to support regional cooperation in the Mediterranean notably when it comes to CleanSeaNet.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		states this is strictly regulated under the Directive 2002/59/EC on Union maritime monitoring and information system as the data is owned by the Member States.			

#### 4.1.27.5. TRAN Resolution 5: EP resolution of 9 June 2021 on railway safety and signalling: Assessing the state of play of the ERTMS deployment

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Railway safety and signalling: Assessing the state of play of the ERTMS deployment</b>		9/06/2021 <a href="#">T9-0327/2021</a> <a href="#">2019/2191(INI)</a> TRAN	<a href="#">SP(2021)558</a>	Final reply (SP) received 8 November 2021		General reply	
1)	6. [...] calls on the Commission, moreover, to use bilateral EU cooperation to promote the deployment of the ERTMS in non-EU countries;		No specific reply provided.			Not mentioned.	
2)	13. Underlines that an approach to ERTMS deployment coordinated between all Member States and led by the ERTMS Coordinator is the only way to overcome the current patchwork situation, especially with regard to cross-border projects; invites, therefore, the Commission to establish a framework for discussion and coordination among Member States, infrastructure managers and railway undertakings on ERTMS deployment led by the ERTMS Coordinator, with the aim of fostering the exchange of best practices, aligning national deployment plans, encouraging joint actions for ERTMS deployment on cross-border corridors, improving conformity authorisation procedures, and increasing the overall commitment of the Member States;		The role of the European Coordinators, including the ERTMS Coordinator, might be enhanced in the upcoming revision of the TEN-T Regulation by providing him or her with a more decisive role in the selection of projects and oversight responsibilities. In particular, it is considered to grant to the Coordinator a right to assess whether projects submitted for the Connecting Europe Facility (CEF) co-financing are in line with priorities of the work plan or national transport investment plans. Furthermore, in order to increase the coordination among the Member States the Commission envisages establishing an ERTMS Forum to be led by the ERTMS Coordinator, with the aim of fostering the exchange of best practices, aligning national deployment plans and encouraging joint actions for ERTMS deployment on cross-border corridors.			The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
3)	16. [...] calls, moreover, on the Commission to list the cross-border rail connections on the core network where full trackside deployment of the ERTMS has not been achieved and to publish its findings in order to draw attention to the EU added value of fully deploying the ERTMS on these rail connections;		No specific reply provided.			Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	17. [...] calls on the Commission, in this regard, to maintain and reinforce the binding nature of the targets in its revisions of the TEN-T guidelines, the ERTMS EDPs and the CCS TSIs;	<p>The Commission has started the preparatory work for a proposal for the revision of the EU legal framework of key importance for the ERTMS deployment, including the Trans-European Transport Network (TEN-T) Guidelines, the ERTMS European Deployment Plan (EDP) and Control command and signalling Technical Specifications for Interoperability (CCS TSI).</p> <p>It is currently premature to conclude on certain specific aspects and on how these can be best addressed.</p> <p>[...]</p> <p>In addition, the Commission will revise the current provisions of the CCS TSI regarding the National Implementation Plans and possibly render them more detailed and stringent.</p> <p>ERA and the sector are working hard to deliver the package of changes for the Technical Specifications for Interoperability (TSI) revision. From an ERTMS perspective, the 2022 revision will potentially include:</p> <p>As described above, strengthened deployment requirements, in line with the TEN-T revision, and also including tighter obligations to equip new rolling stock, essential to support a successful system-wide change.</p> <p>New functionalities building on ERTMS, for example Automated Train Operation, and 5G readiness.</p> <p>A new and comprehensive transition framework to allow new technologies to be introduced more quickly into deployment, whilst maintaining interoperability and safety.</p>		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
5)	18. Believes that harnessing the full potential of the ERTMS unquestionably depends on the completion of	The role of the European Coordinators, including the ERTMS Coordinator, might be enhanced in the		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the TEN-T core network; therefore calls on the Commission to strengthen the role of the core network coordinators in the upcoming revision of the TEN-T Regulation and includes measures on EU management of the core network infrastructure;		upcoming revision of the TEN-T Regulation by providing him or her with a more decisive role in the selection of projects and oversight responsibilities. In particular, it is considered to grant to the Coordinator a right to assess whether projects submitted for the Connecting Europe Facility (CEF) co-financing are in line with priorities of the work plan or national transport investment plans. Furthermore, in order to increase the coordination among the Member States the Commission envisages establishing an ERTMS Forum to be led by the ERTMS Coordinator, with the aim of fostering the exchange of best practices, aligning national deployment plans and encouraging joint actions for ERTMS deployment on cross-border corridors.			
6)	22. Urges the Commission to come up with an overarching decommissioning strategy for Class B systems, with regulatory deadlines aligned with the binding targets to be set at EU level; believes that the effectiveness of this strategy and its long-term worthiness for investment depend on the involvement of all stakeholders, including railway undertakings and suppliers, and the willingness of Member States to fulfil their obligations under the TEN-T Regulation;		[...] The Commission will consider setting out a binding decommissioning deadline for class B systems.		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
7)	23. Calls on the Commission, moreover, to introduce a regulatory provision to ensure that the ERTMS NIPs are legally aligned – in both regulatory and geographic terms – with the binding ERTMS deployment targets set in EU legislation, in order to complete its introduction within the core network by 2030 and within the comprehensive network by 2040;		The Commission will revise the current provisions of the CCS TSI regarding the National Implementation Plans and possibly render them more detailed and stringent. [...]		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
8)	25. [...] asks the Commission to carefully analyse further changes when updating the TSI for 2030 and to ensure compatibility;		In addition, the Commission will revise the current provisions of the CCS TSI regarding the National		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Implementation Plans and possibly render them more detailed and stringent.</p> <p>ERA and the sector are working hard to deliver the package of changes for the Technical Specifications for Interoperability (TSI) revision.</p>			
9)	<p>26. Deplores the fact that in the five years till mid-2019 almost 80 % of new vehicles put into use in the EU were either subject to a derogation or were exempted from the requirement to fit the ERTMS; believes that given the deployment of the ERTMS in the comprehensive network, no derogations or exemptions from the requirement to fit ERTMS should be granted to new rolling stock; urges the Commission, in this respect, to undertake concrete initiatives to tackle this issue by enacting an appropriate regulatory framework and ensuring that a set of economic incentives are in place to foster the investments of railway undertakings in ERTMS on-board units;</p>	<p>From an ERTMS perspective, the 2022 revision will potentially include:</p> <p>As described above, strengthened deployment requirements, in line with the TEN-T revision, and also including tighter obligations to equip new rolling stock, essential to support a successful system-wide change.</p> <p>New functionalities building on ERTMS, for example Automated Train Operation, and 5G readiness.</p> <p>A new and comprehensive transition framework to allow new technologies to be introduced more quickly into deployment, whilst maintaining interoperability and safety.</p>		<p>The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a></p>	
10)	<p>27. Stresses that the timeframes for authorisation processes for retrofit projects, especially for conformity-to-type authorisation processes for rolling stock for the national area of use only, still differ because of diverging assessments by national safety agencies on the need to re-authorise certain modifications, resulting in it taking up to one month to re-authorise each rolling stock; calls on the Commission to undertake legislative initiatives, including updates of current implementing regulations, to ensure that the authorisation procedures following type authorisation processes, especially conformity-to-type authorisation procedures related to the retrofit of on-board ERTMS subsystems for the national area of use, are streamlined and harmonised by means of fast-tracked control</p>	<p>No specific reply is provided to this particular point.</p>		<p>Not mentioned.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	operations in order to reduce the time needed to grant conformity-to-type certificates;				
11)	31. Calls on the Commission to take account of ERTMS equipment when drawing up the rail connectivity index;	No specific reply is provided to this particular point.		Not mentioned.	
12)	33. Underlines that without standardised interfaces with 'plug and play' technology – both trackside and on-board – the rail system will not be able to introduce and grasp the benefits of ERTMS game changers like automatic train operation, the future radio mobile communication system, satellite positioning or Level 3 technology; calls on the Commission to take into consideration the fact that GSM-R technology, which was state-of-the-art when the ERTMS was first launched, is becoming obsolete owing to the roll-out of 4G and 5G;	From an ERTMS perspective, the 2022 revision will potentially include: [...] New functionalities building on ERTMS, for example Automated Train Operation, and 5G readiness.		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
13)	34. [...] calls on the Commission, moreover, to consider introducing the GNSS in the upcoming ERTMS TSI CCS revision in order to close the remaining technological gaps and embrace innovation; [...]	This approach will additionally consider more flexible and modular systems to support system evolution. Synergies with other initiatives will be supported, including for the use of satellite positioning services. It will ensure that future specifications for ERTMS are complete and will limit divergent national implementation, which hamper interoperability and raise costs.		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
14)	35. Underlines the current inefficiencies and difficulties in public procurement for ERTMS deployment; calls on the Commission to work with the Agency to establish a common EU tender format for procurements, based on the proposal agreed by the sector in 2018, and to address in a legislative proposal all the technical aspects for ensuring successful procurement (e.g. maintenance clauses) and compatibility with the latest ERTMS baseline available;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	36. Recognises that the ERTMS is the flagship of EU industry's innovative power; calls on the Commission to present a legislative proposal for an ERTMS industrial strategy as part of the New Industrial Strategy for Europe, addressing insufficient industrial capacity, the lack of suitable workshops for retrofitting, the lack of an adequate, stable and predictable budget and the shortage of qualified staff and ensuring the transition from the current project-approach to the industrialisation of the ERTMS roll-out;	As regards industrial strategy more generally, the Commission is further supporting the industry through the proposed new Europe's Rail Joint Undertaking. Moreover, strengthening the deployment obligations for ERTMS as discussed above, as well as the strengthened investment provided via the Recovery and Resilience Facility (RRF), should provide the industry with a solid basis to justify further investments.		No further/specific actions proposed/promised to be taken by the Commission.	
16)	37. Calls on the Commission and the Member States to boost, under the European Green Deal, dual vocational training for new jobs created by digitalisation and innovation in relation to the new challenges generated by ERTMS deployment, by providing sufficient support for the re-skilling and upskilling of railway workers, such as training on the new signalling system;	The Commission notes that the continued development and deployment of ERTMS and related technologies depends on the availability of highly skilled staff. For this reason, a skills blueprint project "Staffer" has been underway since February 2020, bringing together stakeholders from across the rail sector to identify the sector's future skills needs and develop programmes to address them.		No further/specific actions proposed/promised to be taken by the Commission.	
17)	42. Recalls that EU financial support is available for both trackside and on-board ERTMS investments, but that this can only cover a limited amount of the overall cost of deployment, leaving individual infrastructure managers and railway undertakings to shoulder most of the costs; believes that it is necessary to improve the financial instruments in place to incentivise large-scale investments in the ERTMS; invites the Commission, in this respect, to draw up all-encompassing guidelines in support of a large-scale strategy for the funding of the ERTMS both trackside and on-board;	No specific reply is provided to this particular point.		Not mentioned.	
18)	43. Calls on the Commission to identify a basket of measures that the Member States and the European Union may undertake to scale up the deployment of the ERTMS on board while ensuring that businesses are	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	viable for the undertakings involved, and taking into due consideration the role of network managers as potential providers;				
19)	44. Recalls the ECA’s finding that, overall in the EU, 50 % of TEN-T funds originally allocated to ERTMS projects have been decommitted and that implementation delays and reductions in project scope were the main reasons for this; calls on the Commission and the Member States to address this problem;	No specific reply is provided to this particular point.		Not mentioned.	
20)	45. Recalls that EU funds are not sufficient to cover all the expected needs and therefore calls on the Commission and the Member States to cooperate closely and to make planning, financial and political commitments to further improve the attractiveness of investing in the ERTMS, and to guarantee legal certainty for private investors; [...]	<p>The Commission notes that Member States have made very good use of the Recovery and Resilience Facility (RRF) to seek funding for investment in rail – including in many cases ERTMS deployment. It expects to work closely with them to ensure that the planned investments can be achieved in a timely fashion and will be appropriately coordinated between Member States.</p> <p>Through all of the activities regarding ERTMS, including technical work, deployment and funding, the Commission considers that it is making strenuous efforts to support the system, but the Commission and ERA activities alone are insufficient. Member States, Infrastructure Managers and Operators must also play their part. The Commission considers that actions suggested to ensure common development of ERTMS prototypes would indeed be welcome, but should be developed by the Member States with rolling stock owners and operators and the supply industry.</p>		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	
21)	46. Stresses the priority nature of funding equipment for cross-border links; takes the view that since EU co-financing rates for the ERTMS are insufficient, they should be increased; calls on the Commission, in this respect, to evaluate the opportunity to grant ERTMS	[...] Support under the Connecting Europe Facility (CEF) that better reflects the real costs in the urban nodes should give the right incentive to infrastructure managers and accelerate the process of closing the ERTMS gaps.		The action of the Commission is ongoing - <a href="#">Revision scheduled for 2022.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	projects a co-financing factor even higher than 50 % under CEF funding when such projects are embedded in ambitious large-scale accelerated plans to scale up ERTMS deployment, in order to incentivise ambitious strategies for the ERTMS in the Member States;				
22)	47. Calls on the Commission and the Member States to ensure, promote and facilitate synergies between all EU financial instruments such as the CEF and its Blending Facility, the Cohesion Funds and InvestEU, and access to Next Generation EU, and  calls on the Commission to encourage the Member States to make the ERTMS one of their main priorities in their national recovery and resilience plans (NRRPs);	Support under the Connecting Europe Facility (CEF) that better reflects the real costs in the urban nodes should give the right incentive to infrastructure managers and accelerate the process of closing the ERTMS gaps.  The Commission notes that Member States have made very good use of the Recovery and Resilience Facility (RRF) to seek funding for investment in rail – including in many cases ERTMS deployment. It expects to work closely with them to ensure that the planned investments can be achieved in a timely fashion and will be appropriately coordinated between Member States.		No further/specific actions proposed/promised to be taken by the Commission.	
23)	48. Recalls the strategic importance of Next Generation EU and the RRF in supporting the ambitious large-scale deployment plan for the ERTMS in the NRRPs of the Member States, and invites the Commission to ensure that ERTMS funding is granted adequate relevance during the preparatory phase of the NRRPs;	The Commission notes that Member States have made very good use of the Recovery and Resilience Facility (RRF) to seek funding for investment in rail – including in many cases ERTMS deployment. It expects to work closely with them to ensure that the planned investments can be achieved in a timely fashion and will be appropriately coordinated between Member States.		No further/specific actions proposed/promised to be taken by the Commission.	

4.1.27.6. TRAN Resolution 6: EP resolution of 14 September 2021 on towards future-proof inland waterway transport in Europe

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Towards future-proof inland waterway transport in Europe</b>	14/9/2021 <a href="#">T9-0367/2021</a> <a href="#">2021/2015(INI)</a> TRAN	<a href="#">SP(2021)709</a>	Final reply (SP) received 18 January 2022	Specific reply			
1)	1. Calls on the Commission to take the initiative on green, efficient and digital leadership and to build on existing programmes such as NAIADES, which should support and incentivise all stakeholders within the waterway transport sector, as well as other transport modes, in particular rail, to work together towards a sustainable and social future, while supporting entrepreneurship, the protection of workers and the competitiveness of the sector as a whole; [...]	The NAIADES III Communication, adopted on June 24 2021, proposes new measures and actions to help exploit the potential of inland waterway transport and boost its contribution to sustainable, smart and resilient transport. The core objectives are: getting more freight onto Europe's rivers and canals, setting the sector on an irreversible path towards zero-emission barges by 2050, underpinned by a paradigm shift towards further digitalisation and measures to allow the sector to provide more attractive and sustainable jobs. The Action Plan also contains measures to facilitate financing to support the transition of the sector, and improve its governance, all in line with the European Green Deal and the Sustainable and Smart Mobility Strategy (SSMS).				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  <a href="#">NAIADES III Action Plan 2021-2027.</a>	
2)	2. Calls on the Commission and the Member States to take better account of the fact that those operating in the inland waterway sector are often families with children on board and to invest in adequate and regular facilities along waterway routes in order to provide decent living conditions en route;	The CEF funding is mainly for transport operations. The Member States are best suited to support adequate and regular en route facilities for families.				No further/specific actions proposed/promised to be taken by the Commission.	
3)	3. Calls on the Commission to present proposals for a governance and regulatory framework in line with the next NAIADES action programme, ensuring harmonisation and standardisation at EU level for quality navigability, vessels and crew qualifications;	NAIADES III foresees providing support to the European Committee for Drawing up Standards in the Field of Inland Navigation (CESNI) for further standardisation in Inland waterways transport.				Follow up foreseen in <a href="#">NAIADES III Action Plan 2021-2027.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	4. Welcomes the Commission's intention expressed in the Sustainable and Smart Mobility Strategy to shift more goods from road to inland waterways and short-sea shipping, including regional, urban and intercity freight transport; stresses, nevertheless, the considerable untapped potential and scope for expansion of inland waterway transport; calls on the Commission, therefore, to regularly evaluate and step up its ambitions for the modal shift goals of inland waterway transport and to reap the benefits of the sector; calls on the Commission, furthermore, to support the uptake of best practices on integrating inland waterway transport services into multimodal logistics chains;	NAIADES III is the ambitious response to the Sustainable and Smart Mobility Strategy objective of increasing modal shift to inland waterway transport.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">NAIADES III</a> ).	
5)	5. [...] Calls on the Commission to facilitate the exchange of best practices across Member States, with particular regard to taking account of fauna and flora needs in infrastructure projects;	No specific reply is provided to this particular point (on facilitating the exchange of best practices).		Not mentioned.	
6)	6. Urges the Member States to fully respect their obligation to complete the TEN-T core inland waterway network by 2030 and calls on the Commission and the TEN-T coordinators to strengthen oversight in this regard;	<p>The Sustainable and Smart Mobility Strategy sets out milestones for the European transport system's path towards achieving the objectives of a sustainable, smart and resilient mobility. One of the objectives is that transport by inland waterways and short sea shipping should increase its market share by 25% by 2030 and by 50% by 2050.</p> <p>The aim of Regulation (EU) No 1315/2013 on Union guidelines for the development of the trans-European transport network (TEN-T network) is to contribute to the creation of a single European transport area which is efficient and sustainable, increases the benefits for its users and supports further economic growth and competitiveness. It establishes guidelines for the development of a trans-European transport network comprising a dual-layer structure consisting of the comprehensive network</p>		On 14 December 2021, the Commission presented a <a href="#">proposal</a> for a revision of the <a href="#">TEN-T Regulation</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and of the core network, the latter being established on the basis of the comprehensive network. The Commission intends to present a proposal revising this Regulation on 14 December 2021. The objective of the revision will be to make all transport modes more sustainable and to make sustainable alternatives widely available and better integrated in a multimodal transport system.</p> <p>The Commission fully agrees with Parliament and is urging the Member States to complete the core network by 2030. EU funds, in particular CEF funds, can certainly contribute to this objective. The European Coordinators have also been instrumental as they act as ambassadors of the TEN-T policy. The TEN-T revision should reinforce the role of the European Coordinators. They should not only foster the priority setting at national level, but also facilitate the monitoring of progress made on the TEN network. To achieve this objective, the work plans of the European Coordinators should be used to promote cooperation between all relevant stakeholders, to strengthen complementarity with actions by the Member States and in particular to set the milestones and priorities for investments.</p> <p>Inland waterways, especially free flowing stretches, may be heavily affected by climate and weather conditions. In order to ensure reliable international traffic, while respecting the hydro-morphology and applicable environmental legislation, TEN-T requirements should better reflect the specific hydro-morphology of each waterway as well as the objectives of environmental and biodiversity policies. The Commission will consider in the proposal revising the TEN-T Regulation a definition of Good Navigation Status, probably at the river basin/ corridor level. It is the intention to translate an obligation to the</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Member States to enable efficient, reliable and safe navigation by ensuring minimum waterway requirements and levels of service and by preventing the deterioration of these minimum requirements.</p> <p>Promoting zero and low emission vessels, and developing measures to improve the environmental performance of inland waterway transport in accordance with the applicable requirements under Union law or relevant international agreements is also essential.</p>			
7)	<p>8. Considers it important to recognise the untapped potential of smaller waterways to enhance direct competition with road transport, by ensuring a detailed, comprehensive and intricate network that is kept up-to-date and navigable; calls on the Commission to not only consider large waterways, but to include smaller waterways in the digital transition;</p>	<p>No specific reply is provided to this particular point (on different scale of waterways concerned by the digital transition).</p>		<p>Not mentioned.</p>	
8)	<p>11. [...] Calls on the Commission and the Member States to draw up action plans to combat low water levels and stresses the need for coordination to this end;</p>	<p>The Commission will assess the need in the TEN-T revision for flexible technical requirements for inland waterway transport infrastructure for taking into account the water level along the TEN-T network. Horizon Europe will also support research projects for climate resilient infrastructure.</p> <p>Increasingly, low water levels in rivers are recognised by the Member States and the Commission as an issue, which needs attention. The extreme droughts over the last years, among others in Central and Western Europe, revealed the breadth of impacts, e.g. on transport of goods through shipping, intake of fresh water for drinking water production, etc. This topic is also on the agenda of an increasing number of (transboundary) river basin organisations, such as the one for the Rhine, the Meuse and the Danube.</p>		<p>On 14 December 2021, the Commission presented a <a href="#">proposal</a> for a revision of the <a href="#">TEN-T Regulation</a>. Article 22 contains provisions on water levels but no reference to any action plan.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Some of them have started to draft action plans for low water. The river basin is an ideal scale for cross-border coordination. The Common Implementation Strategy, in which the Member States and the Commission work together to implement the Water Framework Directive and the Floods Directive will also be instrumental in ensuring coordination at EU-scale.			
9)	14. [...] Calls on the Commission, therefore, to develop a realistic roadmap to further reduce pollutants and greenhouse gas emissions in order to achieve a decarbonised inland waterway sector, while safeguarding competitiveness, reliability and safety;	<p>The Commission agrees that the waterborne sector faces significant challenges to deploy and scale-up climate neutral solutions. In the NAIADES-III Action Plan, the Commission has committed itself to facilitate solutions to overcome the investment challenge (see below).</p> <p>The Horizon 2020 Platina III project will propose a roadmap for decarbonising the inland waterways sector, and will specifically look at ways to improve the funding and financing conditions for investing in green technologies in the inland waterway sector. The Commission, taking account of these studies, will consider under what conditions EU financial instruments can support those technological pathways that are compatible with the ambition of the EU Green Deal.</p>		The action of the Commission is ongoing: <a href="#">Inland waterway transport - NAIADES III action plan 2021-2027 Platform for the implementation of a future inland navigation action programme.</a>	
10)	16. [...] Calls on the Commission, furthermore, to support and substantially incentivise the use of the relevant financial instruments for the take-up of sustainable alternative fuels and technologies;	The European Green Deal emphasises that the EU will 'ramp-up the production and deployment of sustainable alternative transport fuels', through legislative proposals to boost the production and uptake of sustainable alternative fuels for the different transport modes. These proposals have been presented on 14 July 2021, as part of the Fit for 55 package. The package also included the proposal to review the Alternative Fuels Infrastructure		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Proposal</a> for the revision of the Alternative Fuels Infrastructure Directive).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Directive and the TEN-T Regulation to accelerate the deployment of zero- and low-emission vehicles and vessels.</p> <p>The increased deployment and use of renewable and low-carbon fuels must be accompanied by the deployment of recharging and refuelling infrastructure to enable the widespread uptake of low- and zero-emission vehicles and vessels.</p> <p>In addition to revising the regulatory framework, the Commission is also supporting the uptake of zero- and low-emission solutions and the use of renewable and low-carbon fuels in all modes of transport through a set of programmes.</p> <p>In particular, the Alternative Fuels Infrastructure Facility under the Connecting Europe Facility will support the deployment of alternative fuels infrastructure along the TEN-T network.</p> <p>This will complement other funding programme such as the Recovery and Resilience Facility, the Cohesion Policy Funds, InvestEU, Horizon Europe and the Innovation Fund, which all support the goal of achieving climate neutrality by 2050 while focussing on different aspects of the deployment of alternative fuels and relevant technologies.</p>			
11)	17. Calls on the Commission to assess the possibility of devising an EU emissions labelling scheme for inland waterway transport that provides readily available information on the energy performance of ships, promotes energy efficiency, and creates a stable environment for investment decisions, which should lead to a viable business case and return on investment for shippers; highlights that this scheme must aim to effectively reduce emissions and assist the sector by providing improved access to funding,	The Horizon 2020 Platina III project will develop a methodology for a labelling system for inland waterways vessels. The Commission will also establish an EU framework for the harmonised measurement of emissions from logistics and transport, which could subsequently be used to provide businesses and end-users with information on the carbon footprint of their choices, and help increase the demand for more sustainable options, including both inland waterways and short-sea shipping services, where feasible.		The action of the Commission is ongoing: <a href="#">Platform for the implementation of a future inland navigation action programme.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	loans and guarantees based on its emissions performance, improve emissions monitoring, create benefits by incentivising port authorities to differentiate port infrastructure charges and ultimately make the sector more attractive as a whole; calls on the Commission to provide a practical guide and toolbox on the sustainable fuel and technological possibilities for inland waterway and short-sea shipping in order to support ship-owners in their decision-making;				
12)	20. Highlights, in this regard, the importance to the energy transition of ports and their specialised shipyards, which is where the building, conversion and retrofitting of ships takes place; calls on the Commission and the Member States, therefore, to allocate appropriate funding and investment to ensuring sufficient capacity and adequate infrastructure in ports in order to facilitate fleet renewal and the energy transition of the shipping sector;	The Commission adopted on 14 July 2021 the proposal for a regulation on the deployment of alternative fuels infrastructure in the EU, including the targets for shore-side electricity supply in inland waterway ports. <sup>32</sup> According to Article 10 of this proposal the Member States will have to ensure that: (a) at least one installation providing shore-side electricity supply to inland waterway vessels is deployed at all TEN-T core inland waterway ports by 1 January 2025; (b) at least one installation providing shore-side electricity supply to inland waterway vessels is deployed at all TEN-T comprehensive inland waterway ports by 1 January 2030.  In addition, Article 13 of the proposal provides that by 1 January 2024, each Member State is to prepare and send to the Commission a draft national policy framework, including a deployment plan for alternative fuels in inland waterway transport, in particular for both hydrogen and electricity.		<a href="#">Proposal</a> for the revision of the Alternative Fuels Infrastructure Directive.	
13)	21. [...] Calls on the Commission to propose a governance framework to monitor the pollution of	No specific reply is provided to this particular point.		Not mentioned.	

<sup>32</sup> COM(2021) 559 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	river basins, facilitating the coordination of EU and national measures, investments and action programmes;				
14)	24. Calls on the Commission to ensure a harmonised digital use and acceptance of electronic crew and vessel documents throughout the EU as soon as possible, which will strengthen the monitoring of social and employment conditions, improve the efficiency and attractiveness of inland waterway transport and its smooth interaction and integration with other transport modes, and boost the interoperability of data exchange systems throughout the entire logistics chain; [...]	The Commission will assess the need for legislative initiatives for on-board digital tools for recording and exchanging information on crews and vessels, as well as on crewing requirements for better harmonisation at EU level.		Too little time since the adoption of the <a href="#">European Parliament resolution</a> to assess the action (page 13).	
15)	27. Stresses the importance of collecting data on the European logistics system in coordination with the relevant stakeholders in preparation for the proposal for a revised Combined Transport Directive <sup>33</sup> and other measures ensuring more efficient logistics planning and use of physical infrastructure; calls on the Commission, moreover, to come up with an intermodal overview of the flow of goods and containers that enter Europe and the routes taken by the goods to their end destination, which could be beneficial for drawing up an effective modal shift policy; considers that boosting the modal shift should be considered a priority as sea containers are not always transported efficiently from seaports to the hinterland at present, leading to higher costs and longer travel times; calls on the Commission to assess the added value of algorithms and artificial	The Commission agrees that an overview of the flow of goods and containers would greatly benefit efficient business operations as well as policy development. While statistics on container transport by inland waterways are published by Eurostat ( <a href="#">Inland waterways - statistics on container transport - Statistics Explained (europa.eu)</a> ), developing such a comprehensive overview is not, currently, possible due to a lack of statistics on intermodal operations and systematic data on the flows of goods from origin to destination, across different modes. A common European mobility data space, proposed in a European Strategy for data, could, in the future, be a way to overcome this gap by pooling and sharing of data from existing and future transport and mobility databases, including big data-based analytics.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>33</sup> OJL 368, 17.12.1992, p. 38.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	intelligence in the hinterland transport of containers to optimise planning and processing to this end;				
16)	28. Stresses the importance of connecting existing digital transport policy frameworks and making sure that multimodal transport data is available through a single point of access in order to achieve efficiency gains in waterborne freight transport and ensure interoperability of data with other modes of transport; calls on the Commission, in this regard, to come up with an EU action plan for the digital infrastructure of multimodal transport that enables data sharing and interoperability, with the goal of achieving a synchromodal, connected and automated transport system by 2035 at the latest; [...]	Making more and more complete multimodal transport data available and creating a favourable environment for seamless data sharing across countries and modes is important for better integration of inland waterways in the transport system. More generally, digitalisation would render the transport and logistic system more efficient, agile and resilient as well as allow optimising infrastructure, asset and capacity management. Several initiatives are planned in this regard, notably the implementing act on high-value datasets and the revision of the multimodal travel information services Delegated Regulation. As integral part of the NAIADES III action programme, the upcoming revision of EU rules on harmonised river information service (RIS) will take due account of these initiatives. Particular attention can be also drawn to the work of the Digital Transport and Logistics Forum (DTLF) working on a common framework to foster interoperability and facilitate data sharing between all types of supply chain stakeholders. The Mobility Data Space initiative is expected to facilitate the access, sharing and pooling of data from existing and future mobility and transport databases and platforms – ultimately bringing the different initiatives together. It will contribute to create a larger pool of strategic transport data, enabling wider ranges of applications notably for multimodal transport.		To be followed up by the Commission in 2022 and beyond. <a href="#">Multimodal digital mobility services</a> expected in quarter four of 2022. <a href="#">Open data – availability of public datasets</a> expected in 2022. <a href="#">Digital Transport and Logistics Forum (DTLF)</a> .	
17)	30. Stresses the great potential of inland waterway transport for autonomous waterborne travel and highlights that more automation brings the reality of synchromodal transport in Europe closer; calls on the	Training and upskilling is one the InvestEU (Regulation (EU) 2021/523) objectives, which includes as a Key Performance Indicator the number of individuals having acquired new skills. This objective		To be followed up by the Commission in 2022 and beyond.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Commission, on the basis of an impact assessment and broad consultation with all the relevant stakeholders, to consider revising all of the relevant legislation where necessary in order to facilitate the uptake of autonomous shipping, with particular regard to the responsibilities of crew in emergencies or system failure, clarification of liability issues in cases of damage and, more generally, the safety aspects of autonomous vessels, in order to achieve a certain level of harmonisation and increase the uptake of the technology at EU level; [...] ; calls on the Commission to prioritise the digitalisation, harmonisation and quick wins (paperless exchange) of inland waterway transport, laying the foundations for an autonomous sector;</p>	<p>is further delineated and operationalized in InvestEU delegated regulations. The Investment Guidelines (Delegated Regulation (EU) 2021/1078) target inter alia the development and strengthening of skills for the functioning of strategic and critical activities (which may include inland waterways pursuant to Directive 2008/114/EC). In addition, the Scoreboard for operations (Delegated Regulation (EU) 2021/5183) captures this objective for training support, notably in the scoring of operations for small and medium sized enterprises (SMEs).</p> <p>The Commission will launch a study on the impacts that the port activities of selected river and seaports can have on the environment. The study will develop and implement specific tools, such as Environmental Management Systems, as well as port-specific action plans creating a nucleus for wide-scale roll-out of environmentally sustainable port management and operations</p>			
18)	<p>34. Calls on the Commission to ensure that inland ports maintain existing rail connections and that Member States prioritise upgrading their rail freight network in order to ensure intermodal transport flows between inland waterways and rail;</p>	<p>No specific reply provided to this particular point.</p>		<p>Not mentioned.</p>	
19)	<p>35. [...] Calls on the Commission to assess flexible fuel distribution and supply solutions, for example renting schemes for vessels;</p>	<p>Although the follow-up does not mentions point 35, the Commission however states in the reply to point 43 and 49 that:</p> <p>[...] Importantly, support to zero -emission vessels will be eligible if an initial number of vessels is needed to kick-start the use of the alternative recharging/refuelling infrastructure in the inland ports. [...]</p> <p>The increased deployment and use of renewable and low-carbon fuels must be accompanied by the</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>deployment of recharging and refuelling infrastructure to enable the widespread uptake of low- and zero-emission vehicles and vessels.</p> <p>In particular, the Alternative Fuels Infrastructure Facility under the Connecting Europe Facility will support the deployment of alternative fuels infrastructure along the TEN-T network.</p>			
20)	<p>36. Calls on the Commission and the Member States to strengthen the synergies between inland waterways infrastructure and the Trans-European Networks for Energy, which will facilitate the energy transition of inland shipping and support the development of ports as energy hubs; highlights, in this regard, the need to better integrate inland waterways infrastructure into the European energy grid in order to facilitate the use of on-shore power supply; [...]</p>	<p>The Commission recognises the possible role of inland ports as clean energy and circular hubs, and encourages synergies with initiatives like the Clean Hydrogen Strategy, the Batteries Alliance, to reap this potential. As explained above in response to paragraph 20, the Commission has proposed the targets for shore-side electricity supply in inland waterway comprehensive and core ports. The electrification of inland ports, if in combination with projects in seaports and other large infrastructure, could explore synergies with TEN-E.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	
21)	<p>38. Stresses the potential of inland waterways for transporting dangerous goods and waste, which requires investments in adequate and safe infrastructure and vessels and a skilled workforce; highlights the promising role of ports in the circular economy and the special potential of inland waterways to transport commodities originating from new circular markets; calls on the Commission, therefore, to establish a stronger link between its circular economy and inland waterway transport policies; calls on the Commission, moreover, to develop measures to support circular economy activities in ports and to promote the concept of a life cycle assessment with the aim of initiating a dialogue and encouraging inland ports to design integrated management systems for <i>inter alia</i> water, energy, waste, construction sites, spatial planning and urban</p>	<p>In the context of the TEN-T network, high-level standards to ‘green’ transport will be consistent with the “do no significant harm” principle, which also encompasses the transition to the circular economy.</p> <p>The Commission agrees on the potential of inland waterways to transport commodities originating from new circular markets. While stressing that inland ports in the EU are covered by Union waste law, the Commission recognises the importance of modern infrastructure to enable the application of circular principles to the entire waterway transport industry. This includes capacity building and renovation efforts where appropriate, in EU ports and vessels. The Commission confirms that EU funding is available to support such circular economy activities in ports, and to adopt life cycle thinking to implement projects</p>		<p>Ongoing follow-up actions by the Commission, including a European Parliament pilot study on the greening of inland ports.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	green areas in order to unlock their potential to become circular and clean energy hubs;	<p>able to establish local integrated management systems for, inter alia, water, energy, waste, construction sites, spatial planning and urban green areas. For such projects, cohesion policy funds are suited to complement local-level actions. Innovative pilot projects for green and digital solutions in inland waterways are also i.a. eligible under the LIFE Programme and Horizon Europe.</p> <p>The Commission will also carry out a European Parliament pilot study to support the greening of inland ports.</p>			
22)	45. Calls on the Commission to reinforce its internal resources for inland waterway transport and the implementation of the NAIADES action programme, including human resources, bringing them into line with the ambitions for the sector under the Green Deal, the modal shift and the Sustainable and Smart Mobility Strategy;	In the NAIDES III Action Plan, the Commission recognises that the increase of financial support for the transition to a zero-emission fleet is one of the key challenges for the modernisation of the sector.		No further/specific actions proposed/promised to be taken by the Commission on this particular point.	
23)	49. Calls on the Commission, therefore, to set up a dedicated EU inland waterway fund for the sustainable transition, including a one-stop-shop system that is easily accessible for help and assistance and has the possibility to combine projects into a single application, thus increasing the chances for funding;	<p>In the NAIDES III Action Plan, the Commission recognises that the increase of financial support for the transition to a zero-emission fleet is one of the key challenges for the modernisation of the sector.</p> <p>The Commission will facilitate efforts by the stakeholders and the Member States to create a fund to bring together and complement EU and national financial instruments for the deployment of zero-emission vessels, and the associated infrastructure.</p> <p>In this context, CEF is one of the main programmes for the support of the transport infrastructure. The Commission adopted the CEF Transport multiannual</p>		Ongoing follow-up actions by the Commission: <a href="#">NAIADES III Action Plan 2021-2027</a> , <a href="#">CEF Transport multiannual work programme</a> , <a href="#">EU Taxonomy Climate Delegated Act</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>work programme 2021-2027 on 5 August 2021<sup>34</sup> covering calls in 2021-2023. Concerning the inland waterways and ports, actions addressing infrastructure, environmental protection requirements, digitalisation and connections to other modes of transport will be supported, with the possibility to combine the funding with other forms of public and private investment to have greater impact. In particular, the Alternative Fuels Infrastructure Facility within the CEF is set up to support the deployment of such infrastructure in the inland ports. Importantly, support to zero-emission vessels will be eligible if an initial number of vessels is needed to kick-start the use of the alternative recharging/refuelling infrastructure in the inland ports. The CEF also supports actions improving the resilience of the infrastructure to climate change and the natural disasters, and synergies with the energy and digital sectors. Through the Horizon Europe Programme, the Commission will support innovative projects on inland waterway transport infrastructure and fleets. The strengthened Innovation Fund will further incentivise innovation in waterborne transport including the deployment of zero emission vessels.</p> <p>Funding for inland waterways is eligible also under the Cohesion policy funds, addressing both the TEN-T network and rivers beyond the network. The investments will focus on improving the navigability, the connection with other modes, digitalisation and environmental protection measures. Several Member States have envisaged in their National Recovery Plans funding for the inland waterway infrastructure</p>			

<sup>34</sup> [https://ec.europa.eu/transport/themes/infrastructure-ten-t-connecting-europe/reference-documents-work-programmes-selection\\_en](https://ec.europa.eu/transport/themes/infrastructure-ten-t-connecting-europe/reference-documents-work-programmes-selection_en).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>under the RRF. Finally, InvestEU stimulates private investments in transport infrastructures and fleet renewal especially through its Sustainable infrastructure window, Research, innovation and digitisation window and SME window. The Commission will engage with the European Investment Bank to explore the role that their instruments can play in the transition to zero-emission fleets, with particular attention for smaller businesses in the sector.</p> <p>The EU Taxonomy Climate Delegated Act also recognises the potential of low-carbon modes, such as inland waterways, to contribute to modal shift and to the achievement of the objectives in the Climate Law and Sustainable and Smart Mobility Strategy.</p>			
24)	51. Calls on the Commission to assess the viability of including a new European scrapping scheme and fleet renewal as part of the fund, taking due account of the life cycle emissions of the vessels concerned, in order to facilitate a rapid shift to climate neutrality; stresses the need to address the conditions in which scrapping takes place and emphasises that circularity is key;	At EU level there is already existing legislation regulating the recycling of large commercial seagoing vessels flying the flag of a Member State of the EU. The EU Ship Recycling Regulation (SRR - Regulation 1257/2013) requires such vessels to be recycled only in dedicated facilities included in the so-called EU List of ship recycling facilities. During the future review of the EU SRR, the Commission intends to explore whether it would be appropriate to extend the scope of the regulation to cover all seagoing vessels without any size and class limitation and to cover possibly also inland waterway vessels.		No further/specific actions proposed/promised to be taken by the Commission.	
25)	53. Calls on the Commission and the Member States to carefully monitor investments from non-EU countries in European ports, given their role in Europe's strategic infrastructure as multimodal hubs, key energy nodes and clusters of industry;	The EU welcomes foreign investments. At the same time, the EU values its strategic assets and interests – including ports. The EU framework for investment screening is an important tool in this context. Foreign investments in European ports must be transparent; they must respect the European legal framework, standards, norms and rules. On 5 May 2021, the Commission adopted a proposal for a regulation on		Ongoing follow-up actions by the Commission, including: <ul style="list-style-type: none"> <li>- A <a href="#">proposal for a regulation on foreign subsidies distorting the internal market</a> (5 May 2021).</li> <li>- A <a href="#">proposal</a> for a revision of the <a href="#">TEN-T Regulation</a> on compliance with technical standards (14 December 2021).</li> </ul>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>foreign subsidies distorting the internal market. The legislative proposal follows the publication of a White Paper in June 2020 and an extensive consultation process with stakeholders. In recent years, foreign subsidies appear to have distorted the EU's internal market, including by providing their recipients with an unfair advantage to acquire companies or obtain public procurement contracts in the EU, to the detriment of fair competition with other market players. The proposed regulation addresses such distortions and closes a regulatory gap, whereby subsidies granted by non-EU governments go currently unchecked, while subsidies granted by the Member States are subject to close scrutiny and remedies. It proposes new tools to effectively tackle foreign subsidies that cause distortions and undermine the level playing field in the internal market, including investigating market concentration (mergers) and bids in public procurements. The Commission hopes that the proposed regulation will quickly be adopted by the co-legislators. Foreign investments could also distort transport flows on the network by not complying with the standards of the European transport network and hence affect security or public order on critical infrastructure. The risk of non-compliance with technical standards, for instance by using different IT or telematics systems, can be higher when the investment stems from outside the EU. This is a matter that the Commission intends to address in the proposal revising the TEN-T regulation, which is planned to be adopted on 14 December 2021.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
26)	54. Welcomes the recent Commission evaluation of the 2013 Urban Mobility Package <sup>35</sup> ; highlights, in this regard, that the expected results of the Urban Mobility Package, namely a reduction in CO <sub>2</sub> and air pollutant emissions, less congestion and fewer road casualties in urban areas, have not consistently materialised across the EU; calls on the Commission, therefore, to encourage Member States and cities to include, where possible, waterborne public transport, city logistics and local freight distribution as a safe, sustainable and effective mode of transport in their sustainable urban mobility planning and to enhance their urban mobility data collection;	As indicated in the Roadmap on the <a href="#">New EU urban mobility framework</a> , the Commission is envisaging, inter alia, to update and strengthen the EU sustainable urban mobility planning (SUMP) framework, promoting public transport and zero-emission urban logistics. The Commission will take into account waterborne public transport and urban distribution centres in this work. The Commission will also consider the inclusion of inland waterway transport in its work on multimodal travel information services.		To be followed up by the Commission in an upcoming revision of the <a href="#">SUMP framework</a> .	
27)	55. Highlights the untapped potential of inland waterways in urban areas, as illustrated in the Sustainable and Smart Mobility Strategy; stresses that urban areas are becoming more and more congested and that building new road infrastructure is not always cost efficient; calls on the Commission to include waterborne transport in the Sustainable and Smart Mobility Strategy goal of making better use of inland waterways in cities and to come up with concrete proposals that aim to boost logistics over our inland waterways and take into account end delivery via cargo bikes, boosting the modal shift; calls on the Commission, in this regard, to enhance its collection of urban mobility data for waterborne passenger transport and freight and highlights the potential of inland waterway transport for the last mile in urban sustainable logistics;	As indicated in the Roadmap on the <a href="#">New EU urban mobility framework</a> , the Commission is envisaging to support better progress in tracking and monitoring of urban mobility policies and measures with a coherent approach to urban mobility data collection. The Commission will take into account waterborne passenger transport in this work.		To be followed up by the Commission in an upcoming revision of the <a href="#">SUMP framework</a> .	

<sup>35</sup> Commission staff working document of 24 February 2021 (SWD(2021)0047).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
28)	56. [...] Calls on the Commission, therefore, to include inland waterway tourism in its upcoming European Agenda for Tourism 2050 in order to promote a business case for a sustainable, innovative and resilient recovery of river tourism, taking into account the economic benefits of river tourism in port regions in terms of added value, employment creation and port revenues;	The actions included in the ongoing co-creation process for the Tourism Transition Pathway will cover all forms of tourism, including all transport modes, aiming towards a sustainable, innovative and resilient recovery. The final Tourism Transition Pathway expected for early 2022 will feed into the European Agenda for Tourism 2030/2050.		The action of the Commission is ongoing - The <a href="#">Tourism Transition Pathway</a> is expected for 2022.	

4.1.27.7. TRAN Resolution 7: EP resolution of 6 October 2021 on EU Road Safety Policy Framework 2021-2030 – Recommendations on next steps towards "Vision Zero"

<b>EU Road Safety Policy Framework 2021-2030 – Recommendations on next steps towards "Vision Zero"</b>	6/10/2021 <a href="#">T9-0407/2021</a> <a href="#">2021/2014(INI)</a> TRAN	N.A. <sup>36</sup>					
1)	2. Welcomes, in this regard, the adoption of the safe system approach at EU level, based on a performance framework and timed targets for the reduction of casualties and serious injuries; welcomes the setting up of key performance indicators (KPIs) established in cooperation with the Member States to enable a more focused and targeted analysis of the Member States' performances and to identify shortcomings; calls on the Commission to set outcome targets by 2023;						

<sup>36</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	<p>3. Believes, however, that there is room for improvement on the above-mentioned KPIs and urges the Commission to consider extending these indicators and updating them in its EU strategic action plan on road safety; believes that the KPI for protective equipment should be complemented by a KPI that collects exposure data according to travelling distance and time for all road users, broken down by modal share and road type in order to better understand the different risk ratios and dangers involved;</p> <p>Calls on the Commission to continue working closely with the Member States to define a KPI for road infrastructure, indicating the safety quality of a road network independent of road user behaviour or vehicle technology, based on an agreed common rating methodology; regrets the fact that KPIs for vehicle safety disregard the safety of powered two-wheeled vehicles;</p> <p>Calls on the Commission to draw up a vehicle safety index for L-category vehicles and underlines the need to include therein all KPIs for L-category vehicles;</p>				
3)	<p>4. Highlights that EU funding is crucial for investing in sustainable and smart road safety solutions and accelerating the delivery of road safety results across the EU; calls on the Commission to safeguard and increase EU investment in road safety across all the relevant EU financing programmes, including in research and innovation; [...]</p> <p>Calls on the Commission to extend to all Member States the EU Road Safety Exchange programme,</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>which is designed to improve road safety performance but currently focuses on just six Member States;</p>				
4)	<p>6. Calls on the Member States and the Commission to prioritise investments that deliver the greatest benefits in terms of road safety, devoting particular focus to zones with the highest number of accidents, including investments in maintaining existing infrastructure as a priority and in the construction of new infrastructure, where necessary; welcomes the fact that the Connecting Europe Facility for 2021-2027 provides for financing in safe and secure infrastructure and mobility projects, including road safety;</p> <p>Calls on the Commission to further promote EU funding opportunities through the Connecting Europe Facility, regional and cohesion funds, InvestEU and the Safer Transport Platform launched by the European Investment Bank (EIB), especially in Member States with a relatively poor road safety performance; stresses the importance of making the eligibility criteria for those instruments clearer for road safety actions;</p> <p>Calls on the Commission to support and encourage Member States to invest in a safer, more sustainable, resilient and multimodal transport network through their national recovery and resilience plans;</p> <p>Calls on the Commission to set out in the revision of the Trans-European Transport Network (TEN-T)</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Regulation <sup>37</sup> the bases for future road safety investment decisions, including the implementation of a core network monitoring plan on maintenance at EU level;				
5)	7. [...] Calls on the Commission and the Member States to agree as soon as possible on a methodology to carry out systematic network-wide road assessments as mandated by the revision of the above-mentioned act, including any aspects that are important for the safety of active road users;				
6)	8. Calls on the Commission and the Member States to expedite work on EU specifications for the performance of road signs and markings in order to prepare the ground for greater vehicle automation; [...]				
7)	9. Calls on the Commission and the Member States to devise quality requirements for walking and cycling infrastructure in order to address the insufficient level of safety for active road users; Calls on the Commission to draw up common EU curricula for road infrastructure auditors and inspectors, including specific training on the needs of vulnerable road users, as part of its new forum of European road safety auditors;				

<sup>37</sup> OJL 348, 20.12.2013, p. 1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	11. [...]; Calls on the Commission to further improve the safe use of tunnels by, <i>inter alia</i> , organising awareness-raising campaigns and carrying out the relevant studies;				
9)	12. Encourages the Commission and the Member States to establish an expert group for drawing up a road classification framework that better matches speed limit to road design and layout, in line with the safe system approach;				
10)	14. [...] Calls on the Commission and the EIB to launch awareness-raising and information campaigns in order to ensure that all interested parties are well informed about the conditions and consider its use;				
11)	15. Calls for increased synergies between the European cycle route network EuroVelo and the TEN-T to make cycling infrastructure safer and better connected; stresses the importance of ensuring continuous walking and cycling paths in TEN-T projects where feasible; calls on the Commission to encourage the reconversion of disused railway lines and to actively support bike-train projects and intermodality; [...]				
12)	17. Calls on the Commission and the Member States to work closely with regions and cities to complete any missing last-mile infrastructure and intermodal and cross-border connections throughout the TEN-T, thereby ensuring a more seamless and efficient use of infrastructure and services and improving road safety;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	<p>18. Welcomes the recent revision of the General Safety Regulation, which will make new advanced safety features in vehicles such as intelligent speed assistance and emergency lane keeping systems mandatory in the EU as from 2022, with the potential to save around 7 300 lives and avoid 38 900 serious injuries by 2030;</p> <p>Calls on the Commission to adopt ambitious and timely secondary legislation, which should also require high-performing intelligent speed assistance systems to be fitted in all new vehicles;</p> <p>Calls on the Commission, in this regard, to consider the practical application of making it compulsory to equip motorcycles with these systems and the feasibility, acceptability and possible implications for road safety of next-generation intelligent speed assistance for cars, vans, trucks and buses;</p>				
14)	<p>19. Recalls the importance of innovation in vehicle technology, which can help to both mitigate the severity of crashes and reduce the likelihood of crashes through active and passive safety features; calls on the Commission to review future passenger vehicle standards in the light of new technological developments and to take into account factors which may affect road safety such as mass, power, speed and frontal area size;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	20. Calls on the Commission to make it obligatory to fit motorcycles with anti-lock braking systems in the upcoming revision of the type approval of L-category vehicles; calls on the Commission to extend the categories of vehicles for which installation of eCall is mandatory, with particular regard to powered two-wheeled vehicles;				
16)	21. Invites the Commission to further develop the vehicle type approval crashworthiness requirements and include them in future legislative revisions, which should also incorporate the latest criteria of Euro NCAP crash tests that monitor the impact of a collision on other vehicles and vulnerable road users, with the aim of achieving harmonisation of minimum standards and equalising passenger safety;				
17)	22. Calls on the Commission and the Member States to support cities in setting up speed limit databases in order to promote the deployment of intelligent speed assistance technology, as required by the General Safety Regulation;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
18)	23.Stresses that the danger and frequency of accidents between trucks and vulnerable road users could be significantly reduced through the widespread use of turning assistants; highlights that turning assistants will become mandatory for new types of trucks in 2022 and for all new trucks in 2024; calls on the Commission to set up a European action programme on turning assistants to promote the benefits of this technology and encourage stakeholders to voluntarily equip new and existing vehicles with turning assistants as soon as possible; commends initiatives that support the voluntary introduction of mandatory turning assistants; calls on the Commission and the Member States to provide financial support for the installation of turning assistants in new and existing vehicles;				
19)	25. Calls on the Commission to develop crash test dummy standards that are more representative of a variety of aspects such as age, gender, size and stature for users both within and outside vehicles;				
20)	26. [...] Calls on the Commission to revise the legislation on car labelling in order to include additional information at the point of sale and digitally on the safety rating of new vehicles;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	27. Welcomes the requirement for seatbelt reminders for all seats to be made mandatory under the revised General Safety Regulation and calls on the Commission to draw up standards for information requirements on the safety parameters of child restraint systems; [...]				
22)	28. Urges the Commission, in line with Parliament's resolution of 27 April 2021 on the implementation report on the road safety aspects of the Roadworthiness Package, to take due account of the technical progress in vehicle safety features provided for in the new General Safety Regulation and to include advanced safety systems in the scope of the next revision of the Roadworthiness Package to ensure they are checked during periodical technical inspections; [...]				
23)	29. Regrets the fact that the provisions in the Roadworthiness Package relating to the inspection of cargo securing are not mandatory; calls on the Commission to propose strengthening these provisions during the next revision of the package;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	31.Calls on the Commission to propose a new harmonised regulatory framework for automated cars in order to ensure, by means of comprehensive tests, including real driving conditions, that automated cars will operate in an absolutely safe manner for their drivers and other road users, in particular concerning their interaction with conventional vehicles and vulnerable road users;				
25)	32.Requests that the Commission assess, meanwhile, the risks to road safety of the systems currently available, such as driver overreliance and distraction; calls on the Commission to consider introducing a requirement to equip drivers' mobile and electronic devices with a 'safe driving mode' and the standard installation of other technological tools to reduce distractions while driving;				
26)	33. Highlights the fact that, as the Commission's EU strategic action plan on road safety points out, public procurement presents an interesting opportunity to positively influence road safety; calls on the Commission to take explicit account of the fact that the most economically advantageous tenders in the public procurement of road public passenger transport services should be assessed on the basis of the best price-quality ratio, which should also include vehicle safety, innovation, quality, sustainability and social issues;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
27)	<p>34. Notes that new personal mobility devices also raise a number of serious concerns related not only to the safety of the devices themselves, but also to their safe use in traffic; regrets that only a few Member States have introduced legislation on this issue and that the lack of harmonisation in the EU can create confusion and make it difficult for visitors to abide by local rules; calls on the Commission to consider a type approval framework for these new mobility devices and to issue guidelines for Member States on managing safety aspects, including traffic rules for the safe use of such devices;</p> <p>Reminds the Commission and the Member States of the need to implement EU and national awareness-raising and education campaigns on the safe use of micromobility devices, with a particular focus on vulnerable road users such as children, older people or persons with reduced mobility;</p> <p>Calls on the Commission and the Member States to exchange best practices on how to improve the safe use of micromobility devices;</p>				
28)	<p>35. Calls on the Commission to update the requirements of the EU road accidents database (CARE) and to incorporate the identification of collisions of micromobility devices such as e-scooters and other electrically-assisted bicycles; [...]</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
29)	<p>36. Notes that according to a Commission study, alcohol is estimated to be involved in around 25 % of all road fatalities, while drugs are involved in 15 % of road fatalities<sup>38</sup>; notes that the EU recommendation on permitted blood alcohol content dates from 2001;</p> <p>Calls on the Commission to update its recommendations and include a zero-tolerance drink-driving limit framework therein, and to introduce an EU recommendation for zero tolerance regarding illicit psychoactive drugs and standards on roadside drug-driving enforcement; points out that harmonising the permitted blood alcohol levels in the EU for all categories of vehicle will facilitate comparisons under the KPIs relating to sobriety on the roads;</p> <p>Calls on the Commission to draw up guidelines on the labelling of medication which affects people's ability to drive a vehicle and to launch information campaigns to raise awareness of medical services, including family doctors, in this area;</p> <p>Calls on the Commission to also include in the revised recommendations guidance on the fitting of alcohol interlock devices, with a special focus on repeat offenders, high-level first-time offenders and all professional drivers;</p>				

<sup>38</sup> Commission study of 18 February 2014 on the prevention of drink-driving by the use of alcohol interlock devices.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
30)	<p>37. Notes that speeding is a key factor in around 30 % of fatal road crashes and an aggravating factor in most crashes; calls on the Commission to come up with a recommendation to apply safe speed limits, in line with the safe system approach for all road types, such as maximum default speeds of 30km/h in residential areas and areas where there are high numbers of cyclists and pedestrians, with the possibility for higher limits in main arterial roads with appropriate protection for vulnerable road users; [...]</p>				
31)	<p>39. Recalls that the Driving Licence Directive established a harmonised EU licence model and introduced minimum requirements for obtaining licences; notes that the directive will need to be kept up-to-date regarding new technological developments in vehicle and infrastructure technology and vehicle automation and in training curricula, especially for professional drivers;</p> <p>Calls on the Commission to develop minimum standards for driver training and traffic safety education, while gradually aligning the form, content and outcomes of driving courses across the EU, and to consider including in the upcoming revision of the directive the Goals for Driver Education matrix, which has three categories: knowledge and skills, risk-increasing aspects and self-assessment;</p> <p>Calls, in addition, for the introduction of a graduated licencing system that encourages novice drivers to gain more experience in higher-order skills such as traffic in sight, self-assessment</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>and hazard perception and to limit certain high-risk activities such as driving at night and with passengers, while taking into account the mobility needs of people living in remote areas and limited access to public transport;</p> <p>Calls on the Commission, moreover, to further harmonise the minimum standards for driving and riding trainers, including periodic training, hazard perception training, stricter minimum education and communication skills; notes with concern that irregular issuances of driving licences have been reported in several Member States and calls on the Commission to monitor this issue;</p>				
32)	<p>40. Calls on the Commission to assess making theoretical and practical training and tests mandatory to obtaining a driving licence for all categories of powered two-wheeled vehicles;</p>				
33)	<p>41. Calls on the Commission to develop KPIs on the provision of traffic safety and mobility education in the Member States, and to develop EU tools to design, implement and evaluate traffic safety and mobility education; [...]</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
34)	<p>42. Notes that the COVID-19 pandemic has led to the expansion of the home delivery sector and specifically the use of vans and powered two-wheeled vehicles such as mopeds and bicycles, boosting the emergence of new types of platform work and business models;</p> <p>calls on the Commission to ensure that professional van drivers undergo appropriate training and to address the issue of van drivers' fatigue and speeding, particularly as a result of the large increase in the number of home deliveries;</p> <p>Further calls on the Commission to consider tightening the roadworthiness test regime and introducing the obligation of additional checks for vans used by parcel delivery service providers once a specific mileage has been reached, and to consider extending this obligation to other vehicles in these categories used for further commercial purposes as part of the revision of the Roadworthiness Package;</p> <p>Calls on the Commission to come up with a recommendation on the safety of delivery personnel, including requirements for employers and companies to ensure the provision and use of safety equipment and safe vehicles, as well as training in the digital tools they might have to use, such as applications and interactive platforms;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
35)	<p>43. Expresses deep concern over driver fatigue in commercial freight and passenger transport as a cause for road accidents; calls on the Commission, in this regard, to ensure that Council Directive 89/391/EEC on the health and safety of workers<sup>39</sup> is implemented properly with regard to road safety aspects;</p> <p>calls on the Commission to introduce a KPI for driver fatigue in commercial freight and passenger transport;</p> <p>Asks the Commission and the Member States to increase the number of secure parking areas in the TEN-T and ensure they are adapted to drivers' needs, and to provide information on their availability through an updated and user-friendly website;</p> <p>Calls on the Commission to assess whether the installation of air conditioners or equivalent air conditioning systems for cabins in heavy goods vehicles could have a positive impact on driver fatigue and road safety, given that these systems can run independently from the main engine;</p>				
36)	<p>44. [...] Calls on the Commission and the Member States, furthermore, to provide sufficient financing for efficient emergency infrastructure, including air medical services, in particular in remote, mountainous and insular regions;</p>				

<sup>39</sup> OJL 183, 29.6.1989, p. 1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Calls on the Commission to make first aid training compulsory in the future revision of the Driving Licence Directive; [...]				
37)	48. [...] Calls on the Commission to fully assess the impact on traffic in urban areas and on the environment of the greater number of automated vehicles; [...]				
38)	49. Calls on the Member States to set up vehicle scrappage schemes under green conditions in order to incentivise the purchase and use of safer, clean and energy-efficient vehicles and the renewal of public and private vehicle fleets; asks the Commission and the Member States to work with the EIB to study new funding schemes to facilitate investment in safe and sustainable transport services and safe and sustainable vehicle fleets;				
39)	50. Points out that data will play a key role in improving road safety; recalls that in-vehicle data is extremely valuable for traffic management, roadworthiness tests and crash analysis; calls on the Commission to set up a framework to access in-vehicle data beyond the repair market in compliance with the General Data Protection Regulation <sup>40</sup> , solely for the purpose of accident research and roadworthiness tests; [...]				

<sup>40</sup> OJL 119,4.5.2016,p. 1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Calls on the Commission to ensure that all data elements relevant to in-depth crash analysis and road safety research (including location, date and time) are required to be recorded and stored by the EDR;				
40)	51. [...] Calls on the Commission and the Member States to ensure that EU road safety policy objectives apply to all the relevant external programming and to develop an effective system for exchanging information on traffic offences with neighbouring non-EU countries to improve enforcement, while ensuring that any sharing of information should be subject to strict safeguards, audits and oversight conditions, in full compliance with the applicable EU rules;				
41)	52. Calls on the Commission, in view of the upcoming revision of the Urban Mobility Package, to promote synergies between safety and sustainability measures in urban areas; calls, in this regard, for the reprioritisation of transport infrastructure in urban areas, including the repurposing of public spaces, away from individual motorised transport towards sustainable, safer and healthier transport modes such as public transport, walking and cycling, while taking into consideration the special needs of vulnerable road users, such as children, persons with disabilities and older people; encourages greater investments and co-financing via EU funding instruments for parking and other mobility connectivity zones in the entry of urban areas, providing for easy access to different modes				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>of public transport, in view of the need to reduce urban congestion and CO<sub>2</sub> emissions; welcomes the EIB's intention to support ambitious investment programmes to help public authorities foster sustainable mobility at local and regional level, such as sustainable urban mobility plans and public transport projects; calls on the Commission to better integrate the EU road safety targets and actions into the guidelines on the sustainable urban mobility plans by monitoring and promoting best practices, including establishing an indicator on using EU funding for improve urban road safety effectively;</p>				
42)	<p>53. [...] Calls on the Commission to take account of the latter in its upcoming communication on a long-term vision for rural areas;</p>				
43)	<p>55. Calls on the Commission to cooperate with the Member States, civil society and other key stakeholders on developing a Europe-wide road safety culture; welcomes the launch of the EU Urban Road Safety Award as part of European Mobility Week and the revamping of the European Road Safety Charter – the largest civil society platform on road safety; calls on the Commission to organise a European Year of Road Safety initiative in the coming years as part of the EU road safety policy framework for 2021-2030; [...]</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
44)	56. [...] Calls on the European Council and the Commission to do the same by holding an annual event supported by the three institutions;				
45)	57. [...] Calls on the Commission, in this regard, to consider establishing a European road transport agency to support sustainable, safe and smart road transport or – if not feasible – to entrust an existing agency with this task;				

## 4.2. INL Committee cards

### 4.2.1. BUDG

Between July 2019 and December 2021, the **Committee on Budgets (BUDG)** was responsible for one 'ordinary' own-initiative report (INI) and one legislative own-initiative report (INL) leading to an adoption of two Parliament's resolution ('BUDG resolution'). The table below provides a brief summary regarding the data in the adopted INL resolution.

Table 33: Overview on BUDG resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	2
Number of INI parliamentary procedures <sup>1</sup>	1
Number of INL parliamentary procedures	1
Total numbers of the Parliaments' points in all INL procedures	2
Number of Commission reply provided within 3 month deadline <sup>2</sup>	1/1
Number of relevant proposals adopted by the Commission by 31 January 2022	0
The main subjects/policy areas of the resolution	- Financing of the budget, own resources

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

4.2.1.1. BUDG Resolution 1: EP resolution of 13 May 2020 on a safety net to protect the beneficiaries of Union programmes: setting up an MFF contingency plan

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<p><b>Resolution with recommendations to the Commission on a safety net to protect the beneficiaries of Union programmes: setting up an MFF contingency plan</b></p>	<p>13/05/2020 <a href="#">T9-0065/2020</a> <a href="#">2020/2051(INL)</a> BUDG</p>	<p><b><a href="#">Letter</a> from Vice-President Šefčovič received by President Sassoli on 10 September 2020</b></p>	
<p>1)</p>	<p>1. Requests that the Commission submit, by 15 June 2020, based on the relevant legal bases for each expenditure</p>	<p>The Commission fully shares the European Parliament’s concerns on the need to ensure a smooth transition from the 2014-2020 to the 2021-2027 multiannual financial framework, and to avoid any discontinuity of the Union’s actions and programmes. This is all the more important in view of the devastating effects of the Covid-19 crisis. Moreover, the Commission agrees that the response to the crisis must be commensurate with the challenges that we are now facing. It must show that the Union is ready and willing to act decisively to repair the economic and social damage of the crisis, provide security and safety to our citizens, spur recovery, build resilience, and guide our economies along the path of the green and the digital transitions in a fair manner.</p>	<p>As mentioned in its reply, the Commission focused on finalising the negotiations on NextGenerationEU and the new long-term financial framework.</p> <p>On 10 November 2020, Parliament and Council reached an agreement on the next MFF and new Own Resources, that was reaffirmed on 18 November by the Conference of Presidents in the light of a veto placed by some Member States in the Council opposing the agreement reached on the Rule-of-Law mechanism.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	programme <sup>3</sup> and in the light of Article 312(4) TFEU, a proposal for an MFF contingency plan to provide a safety net to protect the beneficiaries of Union programmes, following the recommendations set out in the Annex hereto;		
2)	2. Requests the MFF contingency plan to: <ul style="list-style-type: none"> <li>– Lift or extend the time limits laid down in the basic acts of all relevant MFF expenditure programmes;</li> <li>– Where legally necessary, notably under shared management programmes, update the relevant financial amounts on the basis of a technical prolongation of the 2020 levels;</li> </ul>	In its resolutions P9_TA(2020)0054 of 17 April 2020 and P9_TA(2020)0124 of 15 May 2020, the European Parliament requested proposals for a collective response to the crisis. The European Council made a similar request at its meeting of 23 April 2020. The Commission presented its proposals for a bold and comprehensive European Recovery Plan on 27 May 2020. These proposals reflect to a very large extent the positions of the European Parliament, including on the size, architecture and	

<sup>3</sup> Articles 19(2), 21(2), 33, 42, 43(2), 46(d), 77(2), 78(2), 79(2), 79(4), 81(1), 81(2), 82(1), 84, 87(2), 91(1), 100(2), 113, 114, 149, 153(2)(a), 164, 165(4), 166(4), 167(5), 168(4)(b), 168(5), 169, 172, 173(3), 175, 177, 178, 182(1), 182(4), 183, 188, 189(2), 192(1), 194(2), 195(2), 196, 197, 203, 207(2), 209(1), 212(2), 214(5), 325, 338(1), 349, 352 of the TFUE and Articles 7(1) and 203 of the Euratom Treaty.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	<ul style="list-style-type: none"> <li>- Revise the rules and objectives governing the relevant expenditure programmes so that they can be temporarily refocused on addressing and mitigating the immediate economic and social consequences of the Covid-19 outbreak and on helping in the recovery;</li> <li>- Allow for targeted reinforcements to this end, building on the positive measures already taken under the 2020 budget; and for the setting-up of the most urgent new instruments and initiatives as part of the post-Covid-19 reconstruction and recovery package;</li> </ul>	<p>spending priorities, and on the importance of introducing new own resources.</p> <p>The Commission proposed to create a specific, time limited and powerful recovery instrument – NextGenerationEU – alongside a revamped multiannual financial framework for 2021-2027. NextGenerationEU will channel EUR 750 billion raised on the financial markets through the EU’s spending programmes to repair crisis damage and lay the foundations for a sustained recovery, providing essential financing for immediate needs and for longer-term investments in the green and digital transitions.</p> <p>Following the political agreement at the European Council on 21 July 2020, it is vitally important that the Union is now fully focused on completing the negotiations on these essential proposals swiftly. The European Parliament has a crucial role to play in this process and the Commission takes careful note of the Parliament’s resolution of 23 July 2020 on the conclusions of the extraordinary European Council meeting of 17-21 July 2020. A swift political agreement will allow time for the revised Own Resources Decision to be ratified by Member States and for NextGenerationEU and the new financial framework to be launched on 1 January 2021. Given the deteriorating economic situation and the urgency of the needs, we must do everything in our power to ensure that this timetable is met.</p> <p>The Commission has given careful consideration to the Parliament’s position on possible contingency measures and will continue to keep the situation under review. However, it is clear that prolonging the current framework is no substitute for a comprehensive agreement on NextGenerationEU and a new, modern long-term budget.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>The latter is the only way to equip the Union with the new programmes and tools that will be essential to delivering the recovery plan. The Commission is therefore of the firm view that the full and undivided focus of the interinstitutional work in the coming weeks should be on finalising the negotiations on NextGenerationEU and the new long-term financial framework.</p> <p>The Commission stands behind the commitment made by President von der Leyen in her political guidelines to respond with a legislative act, in full respect of the proportionality, subsidiarity and better lawmaking principles, if the European Parliament adopts a resolution pursuant to Article 225 TFEU. With this in mind, contingency arrangements should be seen strictly as a last resort. The Commission considers that all the conditions are now in place to allow for a swift agreement between the institutions on the full recovery package. We must collectively do everything possible to avoid a contingency scenario that would fall far short of what the Union needs at this critical phase in the response to the Coronavirus crisis. In this context, the Commission agrees that, if contingency arrangements were to become necessary as a last resort, the Commission would then proceed to propose the appropriate measures.</p> <p>The Commission calls on the European Parliament and on the Council to continue to engage intensively with the objective of reaching a timely and comprehensive agreement on NextGenerationEU and the 2021-2027 multiannual financial framework in the autumn. This should be our common focus and goal, and an opportunity for us to show a Union united and determined to act decisively for the benefit of all.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>The Commission is fully committed to a continuous political dialogue with the European Parliament and will work in close cooperation with both the European Parliament and the Council to bring this process to a timely and successful conclusion.</p>	

## 4.2.2. CONT

Between July 2019 and December 2021, the **Committee on Budgetary Control (CONT)** was responsible for seven 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of a eight Parliament's resolutions (CONT resolutions'). The table below provides a brief summary regarding the data in the adopted INL resolution.

Table 34: Overview on CONT resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	8
Number of INI parliamentary procedures <sup>1</sup>	7
Number of INL parliamentary procedures	1
Total numbers of the Parliaments' points in all INL procedures	6
Number of Commission reply provided within 3 month deadline <sup>2</sup>	N/R
Number of relevant proposals adopted by the Commission by 31 January 2022	0
The main subjects/policy areas of the resolutions	<ul style="list-style-type: none"> <li>- Financial services, financial reporting and auditing;</li> <li>- Financial supervision;</li> <li>- Information and communication technologies, digital technologies;</li> <li>- Financial management of undertakings, business loans, accounting;</li> </ul>

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

4.2.2.1. CONT Resolution 1: EP resolution of 23 November 2021 on digitalisation of the European reporting, monitoring and audit

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<b>Digitalisation of the European reporting, monitoring and audit</b>	23/11/2021 <a href="#">T9-0464/2021</a> <a href="#">2021/2054(INL)</a> CONT	Letter not yet available <sup>3</sup>	
1)	1. Requests that the Commission, including as part of the upcoming revision of the Financial Regulation, submit, before the end of 2021, necessary legislative proposals for amendments to the Financial Regulation, following the recommendations set out in the Annex hereto;		
2)	25. Calls on the Commission to develop and make available to financial actors and entities responsible for budget implementation, including competent national and regional authorities under shared management, a system to ensure the digitalisation of European reporting, monitoring and audit for the CAP, cohesion and structural funds policies and other policies;		

<sup>3</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
3)	32. Asks for the Commission to ensure that the necessary funding for such a system is made available in the Union budget together with appropriations for training and technical assistance for staff of national and regional authorities that will be using this system;		
4)	37. [...] Asks the Commission to invest in high level cybersecurity software and run periodic tests to identify potential vulnerabilities also at Member State level;		
5)	39. Asks the Commission to ensure that this system will also, to the furthest possible degree, be used for funds and policies under direct management with the same rules concerning transparency as for recipients of funds from Union programmes;		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
6)	40. [...] Urges the Commission to extend the scope of the EDES in the upcoming revision of the Financial Regulation in order to make it more effective;		

### 4.2.3. ECON

Between July 2019 and December 2021, the **Committee on Economic and Monetary Affairs (ECON)** was responsible for fourteen 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of fifteen Parliament's resolutions ('ECON resolution'). The table below provides a brief summary regarding the data in the adopted INL resolution.

Table 35: Overview on ECON resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	15
Number of INI parliamentary procedures <sup>1</sup>	14
Number of INL parliamentary procedures	1
Total numbers of the Parliaments' points in all INL procedures	19

The main subjects/policy areas of the resolution	<ul style="list-style-type: none"> <li>- Securities and financial markets, stock exchange, CIUTS, investments</li> <li>- Financial services, financial reporting and auditing               <ul style="list-style-type: none"> <li>- Financial supervision</li> </ul> </li> <li>- Information and communication technologies, digital technologies</li> </ul>

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

4.2.3.1. ECON Resolution 1: EP resolution of 8 October 2020 on digital finance: emerging risks in crypto-assets - regulatory and supervisory challenges in the area of financial services, institutions and markets

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<p><b>Digital Finance: emerging risks in crypto-assets - regulatory and supervisory challenges in the area of financial services, institutions and markets</b></p>	<p>08/10/2020  <a href="#">T9-0265/2020</a>  <a href="#">2020/2034(INL)</a>  <b>ECON</b></p>	<p><b><a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President David Sassoli on 3 December 2020</b></p>	<p><a href="#">COM(2020)591</a>; <a href="#">COM(2020)593</a>; <a href="#">COM(2020)594</a>; <a href="#">COM(2020)595</a>; <a href="#">COM(2021)420</a>; <a href="#">COM(2021)421</a>; <a href="#">COM(2021)422</a>; <a href="#">COM(2021)290</a>; <a href="#">COM(2021)205</a>; <a href="#">COM(2021)206</a>;</p>
1)	<p>1. [...] Requests that the Commission take urgent actions in these areas following the recommendations set out in the Annex hereto;</p>	<p>The Commission welcomes the Parliament's recommendations for legislative action and is pleased to underline that it has already delivered with the adoption of a Digital Finance Strategy and two sets of legislative proposals on digital operational resilience and crypto-assets, on 24 September 2020.</p>	<p>On 24 September 2020, the Commission adopted a <a href="#">Digital Finance Package</a>, which includes legislative proposals on Markets in Crypto-assets, a pilot regime for market infrastructures based on distributed ledger technology, and two proposals on digital operational resilience.</p>
2)	<p>5. [...] Calls on the Commission to deploy a proportionate, risk-based, cross-sectorial holistic and outcome focused approach to its work on digital finance;</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>
3)	<p>6. Calls on the Commission to draw upon the knowledge and experience derived from the European Forum for Innovation Facilitators to act as first mover in order to create a favourable and sustainable environment for European FinTech hubs and firms, as well as the established financial industry using digital finance, to scale up, attract foreign investment and increase the Union's presence in global markets;</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
4)	11. [...] Calls on the Commission to establish a common Union framework for a pan-European sandbox for digital financial services, as it would provide additional benefits for financial innovation and stability, and reduced supervisory fragmentation;	<p>Our proposal for a regulation on markets in crypto assets (MiCA) will provide a high degree of legal certainty for issuers and holders of crypto-assets, as well as for cryptoasset service providers. Under this proposal, crypto-assets that stabilise their value by referencing one-single fiat currency (so-called 'stablecoins') will have the same regulatory treatment as electronic money. The proposal relies on both national and EU supervision, based on the type of entity that is supervised. However, for significant 'stablecoin' issuers, with a clear cross-border reach, it will confer direct supervisory powers to the European Banking Authority.</p> <p>As part of this initiative on crypto-assets, the Commission also proposed a regulation on a pilot regime for financial market infrastructures based on distributed ledger technology (DLT). When adopted by the co-legislators, this regime should facilitate the issuance and trading of crypto-assets that qualify as securities under the EU framework for financial services. It will introduce a sandbox-like regime for some type of financial market infrastructures using the DLT. This will enable those firms to benefit from targeted exemptions from EU financial services legislation that could impede the testing of innovative blockchain-based innovative services.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
5)	13. [...] Calls on the Commission and the ECB to engage in dialogue at the international level, assessing potential benefits and implications of broader use of CBDCs globally;	No specific reply is provided to this particular point.	Not mentioned.
6)	18. [...] Calls on the Commission to take this into account in any forthcoming regulatory initiative, having in mind the EU's commitment to the Sustainable Development Goals and to the necessary transition to a climate-neutral society by 2050 at the latest;	The Commission also agrees that investments in and development of digital infrastructures should be compatible with the objectives of the Green Deal and the imperative of carbon neutrality. As announced in the Digital Finance strategy, in order to encourage the development of and investment in low or zero emission 'distributed ledger technology' (i.e. the technology underpinning crypto-assets), the Commission, working with the platform on sustainable finance, will aim to integrate these sectors by 2021 in the sustainable finance taxonomy. Also, while some crypto-assets are already covered by the fifth Anti-Money Laundering Directive, the Commission intends to propose additional requirements as part of the overhaul of the EU anti-money laundering framework in 2021.	On 20 July 2021, the Commission adopted a <a href="#">package of legislative proposals to strengthen the EU's anti-money laundering and countering terrorism financing (AML/CTF) rules</a> .
7)	27. [...] Calls on the Commission, therefore, to establish stringent rules regarding warnings to potential clients and to make sure that competent authorities are attributed the necessary intervention powers to restrict or prohibit operations and activities in those crypto-assets that are predominantly used for illegal purposes;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
8)	33. Calls on the Commission, therefore, to assess the advantages of proposing a legislative framework for ICOs and IEOs with the aim of increasing transparency, legal certainty, investor and consumer protection, and reduce risks stemming from asymmetric information, fraudulent behaviour and illegal activities;	No specific reply is provided to this particular point.	Not mentioned.
9)	38. [...] Calls on the Commission to explore its implications for the crypto-exchange and e-wallet providers within the framework of the Directive (EU) 2015/849 of the European Parliament and of the Council of 20 May 2015 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, amending Regulation (EU) No 648/2012 of the European Parliament and of the Council, and repealing Directive 2005/60/EC of the European Parliament and of the Council and Commission Directive 2006/70/EC <sup>3</sup> ;	No specific reply is provided to this particular point.	Not mentioned.
10)	39. Calls further on the Commission to expand the scope of obliged entities under the AML/CTF framework, in line with the recommendations of the FATF and ESMA, to ensure that all activities involving crypto-assets, with regards to providers of virtual-to-virtual exchanges, other categories of wallet providers and ICOs, are subject to the same AML/CTF obligations	No specific reply is provided to this particular point.	Not mentioned.

<sup>3</sup> OJL 141, 5.6.2015, p.73.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
11)	40. [...] Calls on the Commission and Member States to invest in programmes to enhance digital and financial literacy;	No specific reply is provided to this particular point.	Not mentioned.
12)	48. Calls on the Commission to propose legislative changes in the area of ICT and cyber security requirements for the Union financial sector, taking into account international standards, in order to address any inconsistencies, gaps and loopholes that are found to exist in relevant law;	<p>Our proposal on digital operation resilience is also in line with the European Parliament's resolution. This proposal will ensure that all EU financial services firms are subject to a common set of standards to mitigate Information Communication Technology (ICT) risks for their operations. As financial firms are increasingly dependent on non-financial technology firms for their ICT services, the proposal will also subject critical ICT third-party service providers to a Union Oversight Framework to ensure supervisory convergence. Key contractual aspects between financial firms and such ICT third-party service providers will also be harmonised to ensure the monitoring of ICT risks by the financial sector. The Commission also intends to deliver on standards on cloud computing and outsourcing. It will draw up an EU Cloud Rulebook by the second quarter of 2022, ensuring that contracts between financial institutions and cloud providers comply with minimum standards.</p> <p>The Commission puts as well significant emphasis on regulatory and supervisory convergence, as reflected in the Digital Operational Resilience and the Markets in Crypto-Assets proposals. The digital finance strategy further stresses that the digital transformation of the</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		financial sectors requires regular adjustments to EU financial services legislation and closer supervisory cooperation to ensure a consistent application of rules.	
14)	51. Calls on the Commission to enhance cooperation at international fora in order to facilitate the development of international standards as regards cloud computing and outsourcing; further calls for an analysis on the need for Union-specific measures in order to bring oversight of cloud computing and outsourcing into line with the level of oversight of legacy systems	The Commission shares the view of the Parliament that the work on the digital finance area will not be limited to crypto-assets and digital operational resilience. The Commission's Digital Finance Strategy puts forwards a roadmap for the remaining actions set out in the European Parliament's resolution.	
15)	53. Calls on the Commission and supervisors to put in pace non-legislative actions to bolster the operational preparedness in the financial sector to deal with large-scale cyber and operational incidents, through joint exercises, operational protocols ("playbooks"), secure collaboration tools and investments in reinforcements of critical infrastructures and European redundancy capacities; highlights the need for supervisors to have in-house expertise and adequate resources to carry out such exercises and supervisory actions;	No specific reply is provided to this particular point.	Not mentioned.
16)	54. Calls on the Commission to assess and monitor the risk of trading opportunities on the 'black market' emerging, and of money laundering, the financing of terrorism, tax fraud and evasion and other criminal activities;	No specific reply is provided to this particular point.	Not mentioned.
17)	58. Requests, in this regard, that the Commission ensures that digital finance entities can access on an equitable basis relevant, reliable and useful data in accordance with the GDPR by creating more customer	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	value, fostering the potential of digital finance and providing innovative FinTech businesses with opportunities to grow within the Union and beyond; highlights the importance of respecting competition rules in the internal market and of ensuring that the interests of consumers and innovation are not harmed; calls on the Commission to monitor the offering of financial services by 'BigTech' firms, and also how the competitive advantages inherent to these operators may distort competition in the market, harm the interests of consumers and innovation;		
18)	60. Requests that the Commission consider, based on the existing Union standard under Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC <sup>4</sup> , an infrastructure for digital onboarding and the use of digital financial identities, which would aim to harmonise the existing regulatory requirements across the Union insofar as necessary and facilitate their use to provide for less fragmented operations within the internal market and compliance with the relevant anti-money laundering provisions;	The Commission agrees with the Parliament about the need to help firms to scale up and consumers to tap opportunities across the single market by means of digital onboarding. To that end, the Commission will propose in 2021, as part of a broader initiative on anti-money laundering, to harmonise rules on customer onboarding and will build on the upcoming review of e-IDAS to implement an interoperable cross-border framework for digital identities.	On 3 June 2021, the Commission published a <a href="#">report on the evaluation of Regulation (EU) No 910/2014 on electronic identification and trust services for electronic transactions in the internal market (eIDAS)</a> .
19)	61. [...] Calls on the Commission to address this issue and foster the harmonisation of the KYC data required by Member States;	No specific reply is provided to this particular point.	Not mentioned.

<sup>4</sup> OJL 257, 28.8.2014, p.73.

#### 4.2.4. EMPL

Between July 2019 and December 2021, the **Committee on Employment and Social Affairs (EMPL)** was responsible for twelve 'ordinary' own-initiative reports (INI) and two legislative own-initiatives reports (INL) leading to the adoption of fifteen Parliament's resolutions ('EMPL resolution'). The table below provides a brief summary regarding the data in the adopted INL resolutions.

Table 36: Overview on EMPL resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	14
Number of INI parliamentary procedures <sup>1</sup>	12
Number of INL parliamentary procedures	2
Total numbers of the Parliaments' points in all INL procedures	28
Number of Commission reply provided within 3 month deadline <sup>2</sup>	2
Number of relevant proposals adopted by the Commission by 31 January 2022	1
The main subjects/policy areas of the resolutions	- Health and safety at work, occupational medicine (1)(2)

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

4.2.4.1. EMPL Resolution 1: EP resolution of 21 January 2021 on the right to disconnect

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
The right to disconnect	21/01/2021 <a href="#">T9-0021/2021</a> <a href="#">2019/2181(INL)</a> EMPL	<a href="#">Letter from Vice-President Maroš Šefčovič received by President David Sassoli on 25 March 2021</a>	
1)	7. [...] Calls on the Commission and Member States to improve research and data collection and to conduct a detailed assessment of those problems; stresses that the importance of addressing those issues increases in light of the predicted expansion of teleworking in the longer term;	The Commission welcomes this resolution, which was discussed in the College at its meeting of 24 March 2021. In accordance with the political commitment made by President von der Leyen in her Political Guidelines as regards resolutions adopted by the European Parliament under Article 225 TFEU, the Commission is committed to follow up a legislative act, in full respect of proportionality, subsidiarity and better law making principles.	The Commission adopted a formal reply to Parliament’s resolution, in form of a letter of 25 March 2021 from Vice-President Maroš Šefčovič to President David Sassoli, in which the Commission commits to follow up Parliament’s initiative by - as a first step - inviting social partners “to find commonly agreed solutions to address the challenges raised by telework, digitalisation and the right to disconnect.” Furthermore, the letter stresses that “the Commission will continue to explore the context and implications of the right to disconnect and remote work in order to underpin social partners’ discussions on the matter. The insights gathered would complement ongoing and future exchanges between social partners and the Commission, and would also inform reflections on a potential EU legislative initiative on the right to disconnect, within the broader context of remote work.” In addition, a future implementation report of the Working Time Directive would provide an opportunity to reflect further on the implications of remote work on working time. Only then, based on the evidence collected, the Commission “may proceed with a first stage of the formal Social Partners Consultation under Article 154 TFEU, in view of a possible Commission proposal addressing the requests of the resolution.” On 15 March 2022, a <a href="#">conference</a> on the right to disconnect and telework, organised by the Commission and the European Parliament, took place.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
2)	10. [...] Calls on the Commission and Member States and encourages the social partners to exchange best practices and to ensure a coordinated common approach to the existing working conditions without being detrimental to social rights and mobility within the Union;	<p>It should be noted that all initiatives in the field of social policy must, in accordance with Article 154 TFEU, be subject to a two-phase consultation of the EU social partners, who may decide to act by means of agreements.</p> <p>In line with Parliament's resolution, as a first step, the Commission invites social partners to find commonly agreed solutions to address the challenges raised by telework, digitalisation and the right to disconnect. In particular, it encourages social partners to follow-up on their Autonomous Framework Agreement on Digitalisation, notably in relation to the modalities for connecting and disconnecting, and to explore: 1) measures to ensure fair telework conditions and 2) measures to ensure that all workers can effectively enjoy a right to disconnect.</p> <p>In its concrete follow-up response to the European Parliament's resolution, the Commission will be reaching out to social partners to ensure that they are fully involved, in full respect of social partners' autonomy.</p> <p>The Commission will proactively support social partners in their endeavour, facilitating discussions and the identification of best practices, by assessing existing practices and rules related to the right to disconnect.</p>	
3)	11. Calls on the Commission to evaluate and address the risks of not protecting the right to disconnect;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
4)	<p>13. Recalls the specific needs of and disparities between different sectors in relation to the right of disconnect; calls on the Commission to put forward, on the basis of a thorough assessment, a proper evaluation and a consultation of Member States and the social partners, a proposal for a Union directive on minimum standards and conditions to ensure that workers are able to exercise effectively their right to disconnect and to regulate the use of existing and new digital tools for work purposes, whilst taking into consideration the European Social Partners Framework Agreement on Digitalisation, which includes arrangements for connecting and disconnecting; recalls that the Framework Agreement provides for the social partners to take implementation measures within the next three years and that a legislative proposal before the end of that implementation period would disregard the role of social partners laid down in the TFEU; insists that any legislative initiative respects the social partners' autonomy at national level, national collective agreements, and national labour market traditions and models, and does not affect the right to negotiate, conclude and enforce collective agreements in accordance with national law and practice;</p>	<p>In view of this, the Commission will continue to explore the context and implications of the right to disconnect and remote work in order to underpin social partners' discussions on the matter. The insights gathered would complement ongoing and further exchanges between social partners and the Commission, and would also inform reflections on a potential EU legislative initiative on the right to disconnect, within the broader context of remote work.</p> <p>In addition, the commission intends to call for policy debates with Member States within the EPSCO framework, addressing issues linked to remote work.</p> <p>The future implementation report of the Working Time Directive will also provide an opportunity to reflect further on the implications of remote work on working time.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
5)	14. Calls on the Commission to present a legislative framework with a view to establishing minimum requirements for remote work across the Union ensuring that teleworking does not affect the employment conditions of teleworkers; stresses that such framework should clarify working conditions, including the provision, use and liability of equipment, such as of existing and new digital tools, and should ensure that such work is carried out on a voluntary basis and that the rights, workload and performance standards of teleworkers are equivalent to comparable workers;	<p>The Commission takes note of the European Parliament's concerns on the need to address the challenges posed by digitalisation to the world of work, while seizing the opportunities brought about by the digital transition to our economies and societies.</p> <p>Therefore, when following-up to the resolution, the Commission will acknowledge the importance of advancing the digitalisation of the European economy and of the world of work, while respecting working time arrangements, upholding sound working conditions, ensuring health and safety, and preserving the boundaries between professional and private life.</p>	
6)	15. Is of the opinion that the new directive should particularise, complement and fully respect the requirements laid down in Directive 2003/88/EC concerning certain aspects of the organisation of working time, in particular as regards the right to paid annual leave, in Directive (EU) 2019/1152 on transparent and predictable working conditions, in Directive (EU) 2019/1158 on work-life balance for parents and carers and in Council Directive 89/391/EEC on the safety and health of workers, and in particular the requirements in those directives that relate to maximum working hours and minimum rest periods, flexible working arrangements, and information obligations, and should not have any negative effect on workers; believes that the new directive should provide for solutions to address existing models, the role of the social partners, the responsibilities of employers and the needs of workers regarding the organisation of their working time when they use digital tools; highlights the fundamental importance of the correct transposition, implementation and	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	application of Union rules and recalls that the employment and social acquis of the Union fully applies to the digital transition; calls on the Commission and the Member States to ensure proper enforcement through the national labour inspection authorities;		
7)	20. [...] Calls on the Commission and Member States to ensure that workers are properly informed of their right to disconnect, including across borders;	No specific reply is provided to this particular point.	Not mentioned.
8)	25. Calls on the Commission to include the right to disconnect in its New Occupational Safety and Health Strategy, and to explicitly develop new psychosocial measures and actions within the framework of Occupational Safety and Health;	No specific reply is provided to this particular point.	Not mentioned.
9)	26. Requests that the Commission submit, on the basis of point (b) of Article 153(2), in conjunction with points (a), (b) and (i) of Article 153(1) TFEU, a proposal for an act on the right to disconnect, following the recommendations set out in the Annex hereto;	Finally, based on the evidence collected, the Commission may proceed with a first stage of the formal Social Partners Consultation under Article 154 TFEU, in view of a possible Commission proposal addressing the requests of the resolution.	

## 4.2.4.2. EMPL Resolution 2: EP resolution of 20 October 2021 on protecting workers from asbestos

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
Protecting workers from asbestos	20/10/2021 <a href="#">T9-0427/2021</a> <a href="#">2019/2182(INL)</a> EMPL	<a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President Roberta Metsola on 19 January 2022.	<a href="#">COM 2021 802 (final)</a>
1)	1. [...] Calls on the Commission to propose a corresponding revision of relevant Union waste legislation;	<p>Waste</p> <p>For what concerns EU waste legislation, the Waste Framework Directive (2008/98/EC) and the Landfill Directive (1999/31/EC) already contain provisions to address the environmentally sound management of asbestos waste, once this is generated. However, waste legislation cannot as such address asbestos present in buildings, given that buildings permanently connected with land are excluded from the scope of the Directive.</p> <p>The Commission promotes and follows closely technological developments in asbestos treatment and decontamination, to ensure best available technologies are applied to treating asbestos waste and recovering materials into the circular economy, consistent with European Green Deal objectives, in particular under the Circular Economy and Zero Pollution Action Plans. In addition, the Commission published in 2016 an EU Construction and Demolition Waste Management Protocol and in 2018 Guidelines for the waste audits to assist operators in the safe removal and management of asbestos. These guidelines will be revised as necessary.</p> <p>As regards to the specific areas of action covered by the resolution, the Commission's intended follow-up is described below.</p>	<p>The Commission adopted a formal reply to Parliament's resolution, in form of a letter of 19 January 2022 from Vice-President Maroš Šefčovič to President Roberta Metsola in which the Commission intends to follow-up to the Parliament's resolution with a legislative proposal on the protection of workers from the risks related to exposure to asbestos at work, included in the CWP 2022 in Q3 and with the proposal for a Directive on the energy performance of buildings adopted on 15 December 2021 which responds to the EP's recommendation as regards the screening of buildings for asbestos and hazardous materials before the renovation work.</p> <p>The Commission intends also to present a Communication setting out possible measures to be taken under the existing and new instruments in view of addressing the risks from asbestos.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
2)	<p>3. Calls on the Commission to present a European Strategy for the Removal of All Asbestos: ESRAA, which includes the following elements:</p> <p>(a) A European framework for national strategies for the safe removal of all asbestos in the Member States, which should include a legislative proposal to introduce minimum standards for publicly accessible national asbestos registers;</p> <p>(b) A proposal to update Directive 2009/148/EC in order to strengthen Union measures for protecting workers from the threat of asbestos and to prevent a new wave of asbestos victims in the course of the Renovation Wave;</p> <p>(c) A legislative proposal for: (i) the recognition of occupational diseases, including all known asbestos-related diseases, with minimum standards for recognition procedures, and (ii) minimum standards for the compensation of victims of asbestos-related occupational diseases;</p> <p>(d) A proposal to update Directive 2010/31/EU with a view to introducing a requirement for the mandatory screening and subsequent removal of asbestos and other dangerous substances before renovation works can start, in order to protect the health of construction workers;</p> <p>(e) A legislative proposal that takes into account existing national regulations as well as an impact assessment on the most efficient models for the mandatory screening of buildings, consisting of a surface diagnosis of the presence of asbestos by a professional entity with appropriate qualifications</p>	<p>As regards to the specific areas of action covered by the resolution, the Commission's intended follow-up is described below.</p> <p>a) European Strategy on Asbestos</p> <p>The Commission agrees on the importance to present at this stage a clear European approach to highlight all existing instruments and pursue the new avenues to protect our citizens from asbestos and its dangerous consequences. With this aim the Commission intends to present a Communication setting out possible measures to be taken under the existing and new instruments in view of addressing the risks from asbestos.</p> <p>b) European framework directive for national asbestos removal strategies and c) a legislative proposal for mandatory asbestos screening of buildings before sale or rent and for the establishment of asbestos certificates for buildings constructed before 2005</p> <p>The Commission agrees on the importance of pursuing a comprehensive approach to addressing the risks stemming from asbestos and the coordination of national strategies for its removal. The Commission will examine the possible scope of a European Framework based on a review of national and regional strategies and by convening an expert group to identify best practices in this area. The Commission will also take into account the concerns expressed by the Parliament for the implementation of the Renovation Wave, including by identifying possible gaps in asbestos management, notably its treatment as waste. The Commission will also look at supporting research and dissemination of best practices, better cooperation and awareness raising, including through the direct involvement of local and regional authorities, through actions included in the Renovation Wave Action Plan and the update of the</p>	<p>Regarding the European framework directive for national asbestos strategies and a legislative proposal for mandatory asbestos screening of buildings before sale or rent and for the establishment of asbestos certificates for buildings constructed before 2005, the Commission engages to resort to legislative action as requested by Parliament where feasible and relevant and where not possible, will pursue alternative approaches in order to achieve the goals identified by the EP, while continuing to facilitate research and innovation on the detection and safe handling of asbestos. The Industrial Strategy and the initiative on Digital Building logbook will address the problem of asbestos in the context of sustainability and access to information. As regards waste, asbestos is addressed under the Circular Economy and Zero Pollution Action Plans and by the EU Construction and Demolition Waste Management Protocol and in 2018 Guidelines for waste audits, which will be revised as necessary.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	<p>and permits, before sale or rent and for the establishment of asbestos certificates for buildings constructed before 2005 or before the year of an equivalent national asbestos ban, whichever the earlier;</p>	<p>Governance Regulation (Regulation (EU) 2018/1999 on the Governance of the Energy Union and Climate Action) to correspond to the Fit for 55 package. Furthermore, as set out in the Zero Pollution Action Plan for a Toxic-Free Environment, by 2023 the Commission will assess options to improve indoor air quality, focusing on key determinants and pollution sources and exploring ways to raise greater public awareness and reduce risks. The specific issue of asbestos will be addressed in this context.</p> <p>In terms of national asbestos registers and building screening requirements, the Commission will study the feasibility of Union legislative proposals in both areas, within the respect of the principles of subsidiarity and proportionality and Member States' competences. To ensure consistency and complementarity across policy initiatives, the Commission will examine this together with the call for a European Framework for national strategies for asbestos removal.</p> <p>The Commission engages to resort to legislative actions as requested by Parliament where feasible and relevant. Where not possible, the Commission will pursue alternative approaches in order to achieve the goals identified by Parliament.</p> <p>In parallel, the Commission will continue to facilitate research and innovation on the detection and safe handling of asbestos. Moreover, the transition pathway towards a more sustainable, innovative and resilient construction ecosystem, announced in the Industrial Strategy update and on which a consultation process is ongoing, will contribute to improving the sustainability and the quality of the built environment, including its safety. The already announced initiative on Digital Building Logbook is expected to also</p>	<p>The Commission launched a public consultation on scenarios for the transition pathway for a resilient, greener and more digital construction ecosystem.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>facilitate the access to available information on the presence of asbestos in buildings.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
3)	5. [...] Calls on the Commission and the Member States to use all the tools to support investments in sustainable treatment technologies, including through dedicated Important Projects of Common European Interest;	No specific reply is provided to this particular point.	Not mentioned.
4)	9. [...] Calls on the Commission to assess the possible need for legislation establishing a general liability regime for diffuse pollution to provide compensation to victims for all damages from diffuse pollution, including that caused by asbestos;	No specific reply is provided to this particular point.	Not mentioned.
5)	12. Calls on the Commission to support the dissemination of information on the various systems for the safe and orderly removal or disposal of asbestos products based on best available techniques;	No specific reply is provided to this particular point.	Not mentioned.
6)	15. Calls on the Commission and the Member States to ensure that access to decent, affordable and healthy housing is one of the cornerstones of the Action Plan of the Pillar;	No specific reply is provided to this particular point.	Not mentioned.
7)	17. Reiterates its call on the Commission to set a legal framework for an assessment, in consultation with the relevant stakeholders, including the social partners, of all existing asbestos in buildings and	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	infrastructure in the Member States, and to estimate the costs of its safe removal in each Member State;		
8)	18. Calls on the Commission to present a proposal for a framework directive for Member States to set up national asbestos removal plans that include clear and realistic timelines, including priorities and interim targets, detection and registration of asbestos, financing and support to homeowners and SMEs, protection measures for workers against the risk of asbestos exposure in accordance with Directive 2009/148/EC as well as the safe disposal of asbestos in order to prevent asbestos from entering into recycling processes;	No specific reply is provided to this particular point.	Not mentioned.
9)	22. [...] Calls on the Commission to introduce, as part of a proposal for a framework directive, minimum standards for publicly accessible digital national registers for asbestos and other hazardous substances in public and privately owned buildings;	No specific reply is provided to this particular point.	Not mentioned.
10)	29. Calls on the Commission to update Directive 2009/148/EC, taking into account the latest scientific knowledge and technical developments, including an evaluation of different types of asbestos fibres and their adverse health effects, as well as to start the consultation process for updating the list of fibrous silicates within the scope of the Directive and, in that context, to assess the inclusion of riebeckite winchite, richterite, fluoro-edenite, and	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	erionite in the list which already covers actinolite, anthophyllite, tremolite, grunerite;		
11)	40. [...] Welcomes the Commission's commitment to present a legal proposal to further reduce workers' exposure to asbestos in 2022 and calls on the Commission, as a matter of priority, to update those exposure limits, which should be set at 0,001 fibres/cm <sup>3</sup> (1 000 fibres/m <sup>3</sup> ), taking into account recommendations from different stakeholders and after consulting the Advisory Committee on Safety and Health at Work;	No specific reply is provided to this particular point.	Not mentioned.
12)	43. Calls on the Commission to update its Recommendation of 19 September 2003 concerning the European schedule of occupational diseases <sup>3</sup> to include the latest available scientific medical knowledge regarding occupational diseases, in particular with regard to asbestos-related diseases;	No specific reply is provided to this particular point.	Not mentioned.
13)	45. [...] Calls on the Commission to present, after consulting the social partners, a proposal for a directive on the basis of Article 153(1)(a) and (b) TFEU laying down Union minimum standards for the recognition and compensation of occupational diseases, including asbestos-related diseases;	d) Updating of Directive 2009/148/EC on the protection of workers from the risks related to exposure to asbestos at work and e) Recognition and compensation of asbestos-related diseases.  To protect workers, the EU and its Member States have developed solid legislation that lays down a clear legal obligation for employers to perform a risk assessment and take preventive measures.	

<sup>3</sup> Commission Recommendation C(2003) 3297 of 19 September 2003 concerning the European schedule of occupational diseases (OJ L 238, 25.9.2003, p. 28).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>Tackling work-related exposure to asbestos is one of the priorities under the EU Strategic Framework on Health and Safety at Work 2021-2027, as well as of the cancer prevention pillar of the Europe's Beating Cancer Plan.</p> <p>In the letter of intent accompanying the 2021 State of the Union address, the Commission made a commitment to the European Parliament and the Council to present a legislative proposal on the protection of workers from the risks related to exposure to asbestos at work. This commitment was confirmed in the Commission Work Programme 2022.</p> <p>The Commission is well advanced with the preparatory work to lower the existing occupational exposure limit and strengthen workers' protection and will seek to address the concerns expressed by the Parliament, while respecting the established process for scientific evaluation and consultation with stakeholders and social partners. This process involves a scientific evaluation by the European Chemicals Agency, a two-stage consultation of the social partners under Article 154 TFEU, seeking the opinion of the tri-partite Advisory Committee for Safety and Health at Work (ACSH), in which employers, workers and Member States are represented, as well as an impact assessment. The ACSH adopted an opinion on 24 November 2021 on a new binding occupational exposure limit value for asbestos, which will support the impact assessment of the Commission proposal. The Commission believes that this process guarantees evidence-based policy-making and the Commission will ensure its full transparency by making the outcome of the process publicly available.</p> <p>As regards the occupational diseases and corresponding compensation for workers, the Commission will act within the boundaries of the Treaty, in full respect of the competence of Member States on this domain. Therefore,</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>the Commission is not in the position to propose legislative action in this field. However, the Commission has issued a Recommendation on occupational diseases, where cancer and other diseases caused by asbestos exposure are included. The Commission will consult the tripartite Advisory Committee on Health and Safety at Work on the need to update this Recommendation.</p> <p>To raise awareness of the dangers of asbestos exposure, the Commission has published practical guidelines for the information and training of workers involved with asbestos removal or maintenance work. The Senior Labour Inspectors Committee also issued a practical guide for employers, workers and labour inspectors on best practice to prevent or minimise asbestos risks in work that involves (or may involve) asbestos. In addition, the European Agency for Safety and Health at Work (EU-OSHA) provides valuable information and special links to national websites on health and safety related to asbestos risks. The Commission will support further awareness raising and training activities for workers.</p> <p>To better target awareness-raising campaigns and preventive measures and to contribute to evidence-based policy-making, EU-OSHA is preparing a workers' exposure survey on cancer risk factors in Europe. The survey will also look into the most prevalent exposure situations and the number and characteristics of the workers exposed to a range of cancer risk factors, including asbestos.</p>	
14)	46. Calls on the Commission to put forward a proposal for the Member States to establish a national function or an ombudsperson to assist victims of occupational diseases, and especially	<p>d) Updating of Directive 2009/148/EC on the protection of workers from the risks related to exposure to asbestos at work and e) Recognition and compensation of asbestos-related diseases</p> <p>To protect workers, the EU and its Member States have developed solid legislation that lays down a clear legal</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	<p>asbestos-related diseases which have a long latency period, in recognition procedures;</p>	<p>obligation for employers to perform a risk assessment and take preventive measures.</p> <p>Tackling work-related exposure to asbestos is one of the priorities under the EU Strategic Framework on Health and Safety at Work 2021-2027, as well as of the cancer prevention pillar of the Europe's Beating Cancer Plan.</p> <p>In the letter of intent accompanying the 2021 State of the Union address, the Commission made a commitment to the European Parliament and the Council to present a legislative proposal on the protection of workers from the risks related to exposure to asbestos at work. This commitment was confirmed in the Commission Work Programme 2022.</p> <p>The Commission is well advanced with the preparatory work to lower the existing occupational exposure limit and strengthen workers' protection and will seek to address the concerns expressed by the Parliament, while respecting the established process for scientific evaluation and consultation with stakeholders and social partners. This process involves a scientific evaluation by the European Chemicals Agency, a two-stage consultation of the social partners under Article 154 TFEU, seeking the opinion of the tri-partite Advisory Committee for Safety and Health at Work (ACSH), in which employers, workers and Member States are represented, as well as an impact assessment. The ACSH adopted an opinion on 24 November 2021 on a new binding occupational exposure limit value for asbestos, which will support the impact assessment of the Commission proposal. The Commission believes that this process guarantees evidence-based policy-making and the Commission will ensure its full transparency by making the outcome of the process publicly available.</p> <p>As regards the occupational diseases and corresponding compensation for workers, the Commission will act within</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>the boundaries of the Treaty, in full respect of the competence of Member States on this domain. Therefore, the Commission is not in the position to propose legislative action in this field. However, the Commission has issued a Recommendation on occupational diseases, where cancer and other diseases caused by asbestos exposure are included. The Commission will consult the tripartite Advisory Committee on Health and Safety at Work on the need to update this Recommendation.</p> <p>To raise awareness of the dangers of asbestos exposure, the Commission has published practical guidelines for the information and training of workers involved with asbestos removal or maintenance work. The Senior Labour Inspectors Committee also issued a practical guide for employers, workers and labour inspectors on best practice to prevent or minimise asbestos risks in work that involves (or may involve) asbestos. In addition, the European Agency for Safety and Health at Work (EU-OSHA) provides valuable information and special links to national websites on health and safety related to asbestos risks. The Commission will support further awareness raising and training activities for workers.</p> <p>To better target awareness-raising campaigns and preventive measures and to contribute to evidence-based policy-making, EU-OSHA is preparing a workers' exposure survey on cancer risk factors in Europe. The survey will also look into the most prevalent exposure situations and the number and characteristics of the workers exposed to a range of cancer risk factors, including asbestos.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
15)	53. Calls on the Commission to present a proposal for an amendment to Article 7 of Directive 2010/31/EU in the context of the Renovation Wave introducing a requirement for the mandatory asbestos screening, registering, and removal of asbestos and other dangerous substances before any renovation works can start, while having regard to Article 153(1)(a) TFEU on the improvement, in particular, of the working environment to protect workers' health and safety;	<p>f) Asbestos screening prior to energy renovation works and selling or renting out a building</p> <p>On 15 December 2021, the Commission proposed to align the rules for the energy performance of buildings with the European Green Deal and decarbonise the EU's building stock by 2050. Building on Parliament's recommendation expressed in the resolution as regards to the screening of buildings for asbestos and hazardous materials before the renovation work, in the revised text, the Commission reiterates its commitment to contribute to ensuring a healthy indoor environment, including through the removal of asbestos and other harmful substances, facilitating lawful removal of harmful substances, and compliance with existing legislative acts such as Directives 2009/148/EC (Protection of workers from asbestos Directive) and (EU) 2016/2284 (the National Emissions Ceilings(NEC) Directive). The proposed Directive also includes provisions on major renovations, which not only introduce minimum energy performance standards for specific categories of buildings (e.g. worst energy performing buildings), but also offers an opportunity to address structural improvements, such as adaptation to climate change, accessibility for person with disabilities and removal of hazardous substances including asbestos. It also calls on Member States to ensure that guidance and training to address such structural improvements are given to those responsible for implementing the proposed Directive.</p>	
16)	54. Calls on the Commission to present a legislative proposal that takes into account existing national regulations as well as an impact assessment on most efficient models for the mandatory screening of buildings, consisting of a surface diagnosis of the presence of asbestos by a professional entity with appropriate qualifications and permits, before sale or	<p>f) Asbestos screening prior to energy renovation works and selling or renting out a building</p> <p>On 15 December 2021, the Commission proposed to align the rules for the energy performance of buildings with the European Green Deal and decarbonise the EU's building stock by 2050. Building on Parliament's recommendation</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	rent and for the establishment of asbestos certificates for buildings constructed before 2005 or before the year of an equivalent national asbestos ban, whichever the earlier;	expressed in the resolution as regards to the screening of buildings for asbestos and hazardous materials before the renovation work, in the revised text, the Commission reiterates its commitment to contribute to ensuring a healthy indoor environment, including through the removal of asbestos and other harmful substances, facilitating lawful removal of harmful substances, and compliance with existing legislative acts such as Directives 2009/148/EC (Protection of workers from asbestos Directive) and (EU) 2016/2284 (the National Emissions Ceilings(NEC) Directive). The proposed Directive also includes provisions on major renovations, which not only introduce minimum energy performance standards for specific categories of buildings (e.g. worst energy performing buildings), but also offers an opportunity to address structural improvements, such as adaptation to climate change, accessibility for person with disabilities and removal of hazardous substances including asbestos. It also calls on Member States to ensure that guidance and training to address such structural improvements are given to those responsible for implementing the proposed Directive.	
17)	56. [...] Calls on the Commission to ensure high standards for the protection of workers against asbestos exposure at Union- approved ship recycling facilities in third countries; calls on the Commission to launch a study mapping the scale of illegal imports into the Union of asbestos-containing products and materials, and outlining potential measures to strengthen market surveillance, which could include the possibility of restricting access to docking, port facilities and temporary storage within the Union of vessels that carry asbestos containing products or materials as cargo in transit;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
18)	57. Calls on the Commission to make the listing of chrysotile asbestos in Annex III to the Rotterdam Convention and a global ban on asbestos top priorities; calls on the Union to work with international organisations to pioneer instruments to label the asbestos market as a toxic trade; calls on the Union to integrate the fight against asbestos and asbestos-related diseases into its external policies; calls on the Commission and the Member States to increase their support, including financial, of global actors working against asbestos and asbestos-related diseases, including the WHO; condemns financial investment in global asbestos industries;	<p>Union as a global leader against asbestos</p> <p>Under the Rotterdam Convention the EU promotes the phase-out of asbestos on a global scale through the financial resources given to the Secretariat of the Convention to carry out technical assistance activities that aim at improving the management of asbestos with the ultimate objective to replace it completely with safe, sustainable alternatives.</p>	
19)	59. Calls on the Commission to assess the financial implications of Parliament's requests in accordance with paragraphs 17 and 18 of this Resolution and point 3 of Annex I;	<p>Funding</p> <p>Under the New European Bauhaus, the Commission has committed to dedicate €85 million funds to New European Bauhaus projects from EU programmes in 2021 – 2022, to the sector. Where foreseen in the national recovery and resilience plans, the Recovery and Resilience Fund could also be an important source of funding. In addition, cohesion policy significantly helps Member States and regions to invest in the renovation of buildings to boost energy efficiency and to enhance their overall sustainability in line with the European Green Deal objectives.</p> <p>Member States have the possibility to use the Recovery and Resilience Facility for the removal of asbestos-containing materials from the building in the framework of an energy efficiency renovation foreseen in their Recovery and Resilience Plans.</p> <p>The Commission looks forward to continuing a close and constructive cooperation with the Parliament on this matter.</p>	In its reply, the Commission points out that Member States and regions can benefit from the funding foreseen under the New European Bauhaus projects and the national Recovery and Resilience Plans.

#### 4.2.5. ENVI

Between July 2019 and December 2021, the **Committee on Environmental and Rural Development (ENVI)** was responsible for eight 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of nine Parliament's resolutions ('ENVI resolution'). The table below provides a brief summary regarding the data in the adopted INL resolution.

Table 37: Overview on ENVI resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	9
Number of INI parliamentary procedures <sup>1</sup>	8
Number of INL parliamentary procedures	1
Total numbers of the Parliaments' points in all INL procedures	25
Number of Commission reply provided within 3 month deadline <sup>2</sup>	1/1
Number of relevant proposals adopted by the Commission by 31 January 2022	1
The main subjects/policy areas of the resolutions	- Forestry policy - Protection of natural resources: fauna, flora, nature, wildlife, countryside; biodiversity

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

#### 4.2.5.1. ENVI Resolution 1: EP resolution of 20 October 2021 on an EU legal framework to halt and reverse EU-driven global deforestation

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<b>Recommendations to the Commission on an EU legal framework to halt and reverse EU-driven global deforestation</b>	22/10/2020 <a href="#">T9-0285/2020</a> <a href="#">2020/2006(INL)</a> ENVI	<a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President David Sassoli on 9 December 2020	<a href="#">COM 706 final</a>
1)	9. [...] Calls on the Commission to step up its efforts to address deforestation holistically through a coherent and legally binding policy framework, while ensuring the conservation of ecosystems; [...]	The Commission welcomes the Parliament's support in stepping up action towards halting and reversing deforestation and its efforts to draw attention to this important issue. It also welcomes the Parliament's call for mandatory action, its ambition as regards the product scope, and its recommendation for the envisaged legislation to be scientifically based and regularly updated. We also share the Parliament's concern about threatened ecosystems other than forests.	The College adopted its reply on 9 December 2020 in which it confirms "that it intends to respond to the Parliament's request with a legislative proposal in the second quarter of 2021, as already announced in its Work Programme for 2021". The CWP 2021 indicates a legislative proposal on "Minimising the risk of deforestation and forest degradation associated with products placed on the EU market" during the second quarter 2021 and is expected to respond to Parliament's legislative request as it is also confirmed by a letter of 9 December 2020 from Vice-President.  However, in his letter, the Vice-President indicates that the Commission is also considering alternative options to Parliament's approach on due diligence and bilateral agreements with third countries.  On 17 November 2021, the Commission adopted a <a href="#">proposal for a regulation</a> on deforestation-free products.
2)	18. [...]; Urges the Commission to further integrate deforestation considerations within the EU Ecolabel, Green Public Procurement (GPP) and other initiatives in the context of the circular economy as part of a comprehensive set of actions and initiatives to ensure deforestation-free supply chains; moreover calls on the Commission to include risk of deforestation and	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	ecosystem degradation among the criteria of the green claims in the Directive 2005/29/EC of the European Parliament and of the Council <sup>3</sup> and to set up an EU pre-approval scheme to authorise the use of green claims; [...]		
3)	22. Recalls its resolution of 15 January 2020 on the European Green Deal, and its demand to the Commission to present, without delay, a proposal for an EU legal framework based on due diligence to ensure sustainable and deforestation-free supply chains for products placed on the Union market, with a particular focus on tackling the main drivers of imported deforestation and instead encouraging imports that do not create deforestation abroad, taking into account the economic importance of commodity export for developing countries, especially for smallholders, and taking into consideration feedback from all stakeholders, especially SMEs;	No specific reply is provided to this particular point.	Not mentioned.
4)	24. Welcomes the intention of the Commission to tackle global deforestation and forest degradation but asks for a more ambitious policy approach; calls on the Commission to present a proposal, accompanied by an impact assessment, for an EU legal framework based on mandatory due diligence, reporting, disclosure and third party participation requirements, as well as liability and penalties in case of breaches of obligations	At the same time, the Commission is also working on an impact assessment to support a further legislative proposal on sustainable corporate governance with a view to establishing in EU company law a horizontal due diligence obligation covering human rights, social and environmental impacts.	

<sup>3</sup> Directive 2005/29/EC of the European Parliament and of the Council of 11 May 2005 concerning unfair business-to-consumer commercial practices in the internal market and amending Council Directive 84/450/EEC, Directives 97/7/EC, 98/27/EC and 2002/65/EC of the European Parliament and of the Council and Regulation (EC) No 2006/2004 of the European Parliament and of the Council ('Unfair Commercial Practices Directive') (OJ L 149, 11.6.2005, p. 22).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	for all companies placing for the first time on the Union market commodities entailing forest and ecosystem risks and products derived from these commodities, and access to justice and remedy for victims of breaches of these obligations; [...]		
5)	37. Welcomes the ongoing revision of the Non-Financial Reporting Directive and invites the Commission to step up the quality and scope of non-financial disclosure, in particular on financial institutions' reporting on environmental aspects, and to promote the integration of forest-relevant considerations into corporate social responsibility;	No specific reply is provided to this particular point.	Not mentioned.
6)	39. Calls on the Commission to assess the possible inclusion of commodities covered by the EU Timber Regulation into the scope of the proposal for an EU legal framework to halt and reverse EU-driven global deforestation, taking into account the upcoming fitness check of the EU Timber Regulation, and ensuring the pursuit of the objectives of the FLEGT Action Plan. When doing so, the Commission should also assess the potential implications on current Voluntary Partnership Agreements (VPAs) The partner timber-producing countries of the Union should be closely associated in this undertaking;	The Commission has taken note that the Parliament's resolution assesses and advocates for due diligence and bilateral agreements with third countries. In this context, the Commission would like to mention that the experience with the implementation of the due diligence system of the EU Timber Regulation (EUTR) suggests a number of shortcomings in terms of effectiveness. These will be addressed in an impact assessment.	
7)	41. Urges the Commission to ensure full implementation of the EU FLEGT Work Plan 2018-2022;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
8)	45. [...] Encourages the Commission to establish trade-based partnership agreements with major producer countries of agricultural commodities, in order to tackle supply-side drivers of deforestation;	No specific reply is provided to this particular point.	Not mentioned.
9)	47. [...] Calls on the Commission to ensure that all future trade and investment agreements contain legally binding and enforceable provisions, including illegal logging-related and anti-corruption provisions, to prevent deforestation and forest degradation and ecosystem destruction and degradation;	In line with its Better Regulation principles, the Commission is assessing a variety of options, including due diligence, but not limited to it. The Commission will look at further available options that might be equally or more effective. It will also take into account the experience of the implementation of existing legislation, such as the EUTR and the EU Regulation to prevent, deter and eliminate illegal, unreported and unregulated fishing.	
10)	48. Recommends, in the context of the 'do no harm' principle as highlighted in the communication on the European Green Deal, that the Commission better and regularly assess the impact of existing trade and investment agreements on deforestation, forest and ecosystem degradation, land grabbing and human rights and ensure that more ambitious binding and enforceable provisions on forest and ecosystem protection, biodiversity, on ending land grabbing and sustainable forestry are included in the trade and sustainable development chapters of all free trade and investment agreements;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
11)	<p>50. Considers that trade and international cooperation are important tools for consolidating higher standards of sustainability, especially with regard to sectors that are linked to forests and their derived value chains; calls on the Commission and Member States to strengthen cooperation with third countries through technical assistance, exchange of information and good practices in the preservation, conservation and sustainable use of forests, with a special focus on the linkage between organised crime and commodities associated with deforestation and to promote and facilitate scientific and academic cooperation with third countries, as well as research programmes to promote knowledge and innovation on biodiversity, “green business” and the circular economy; stresses the importance of taking into account the effects of the measures on employment and growth of least developed countries (LDCs) that are reliant on the production of FERCS; calls on the Union to support and cooperate with third country governments and civil society in their work against deforestation, particularly via the GSP+ scheme; calls on the Commission to evaluate whether a new specific aid for trade instrument should be developed to facilitate trade in the context of mitigating the risks related to the production of FERCS;</p>	<p>The resolution also addresses issues, which relate to other policy areas or initiatives. In the future, working with partner countries to reduce pressures on forests and ecosystems will be important.</p> <p>The Commission looks forward to continuing a close and constructive cooperation with the Parliament on this matter.</p>	
12)	<p>51. Asks the Commission that the measures to be adopted have a comprehensive and differentiated approach to deforestation, considering its multiple dimensions and its linkages both with the generation of sustainable ventures and the fight against criminal economies; [...]</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>
13)	<p>55. The proposal should ensure that there is legal certainty for all relevant stakeholders on any new Union-wide measure and framework relating to the</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	current use of FLEGT VPAs and licensing, in order to secure the interest in investing in deforestation-free export to the Union; and encourages the Commission to establish trade-based partnership agreements with major producer countries of agricultural commodities, in order to tackle supply-side drivers of deforestation;		
14)	63. [...] Calls on the Commission to encourage that legal reform processes in producer countries are done with the effective and meaningful participation of all stakeholders, including civil society, indigenous peoples and local communities; calls on the Union and Member States to support, at the next UN General Assembly, the global recognition of the right to a healthy environment;	No specific reply is provided to this particular point.	Not mentioned.
15)	64. Calls on the Commission and Member States to set up a rapid response mechanism at Union level to support environmental and forest defenders in the Union and worldwide;	No specific reply is provided to this particular point.	Not mentioned.
16)	77. Stresses that the methods used to achieve the objectives set out in the Clean Energy for all Europeans package must not lead to deforestation and forest degradation in other parts of the world; calls, therefore, on the Commission to review by 2021 the relevant aspects of the report annexed to Commission Delegated Regulation (EU) 2019/8074 and, if necessary,	No specific reply is provided to this particular point.	Not mentioned.

<sup>4</sup> Commission Delegated Regulation (EU) 2019/807 of 13 March 2019 supplementing Directive (EU) 2018/2001 of the European Parliament and of the Council as regards the determination of high indirect land-use change-risk feedstock for which a significant expansion of the production area into land with high carbon stock is observed and the certification of low indirect land-use change-risk biofuels, bioliquids and biomass fuels (OJ L 133, 21.5.2019, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	to revise this Regulation without undue delay, and in any case before 2023, on the basis of scientific knowledge and in accordance with the precautionary principle; asks the Commission to reassess soy-data and phase out high ILUC risk biofuels as soon as possible and by 2030 at the latest;		
17)	80. Emphasises the importance of ensuring the consumption of products from deforestation-free supply chains in the Union and to continuously assess the impacts of Union consumption of such products; calls on the Commission and Member States to develop information and awareness-raising campaigns about the imported commodities and products and their impact on the world's forests and biodiversity-rich ecosystems, as well as socio-economic consequences of deforestation and ecosystem destruction and forest-related crimes in the Union and in third countries;	No specific reply is provided to this particular point.	Not mentioned.
18)	83. Stresses the need in particular for independent monitoring of production and trading of commodities associated with deforestation; calls on the Commission to enhance its efforts on those issues through Horizon Europe, and to support independent monitoring in producer countries, as well as the exchange of best practices and lessons-learned among them, in order to enhance methodologies used and granularity of information;	No specific reply is provided to this particular point.	Not mentioned.
19)	85. Notes that greater access to customs data on imports entering the Union would increase global value chain transparency and accountability; calls on the Commission to set up a customs partnership within the	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	Union while extending customs data requirements, notably by including the exporter and the manufacturer as mandatory customs data elements, thereby enhancing the transparency and traceability of global value chains;		
20)	88. Asks the Commission to explore the strengthened use of the Copernicus satellite system for forest monitoring and for forest fire and forest damage prevention, including monitoring and identification of the causes of fires and forest damage, deforestation and ecosystem conversion, facilitating access for the relevant authorities in each Member State, and ensuring direct source of open data for SMEs or start-ups;	No specific reply is provided to this particular point.	Not mentioned.
21)	91. Calls upon the Commission to set up a European database collecting ongoing and past projects between the Union and third countries as well as bilateral projects between Member States and third countries in order to assess their impact on the world's forests; underlines the involvement of local and regional authorities in the implementation of these projects;	No specific reply is provided to this particular point.	Not mentioned.
22)	100. Stresses the importance of education and of a skilled and well-trained workforce for the successful implementation of sustainable forest management in practice; calls therefore on the Commission and Member States to implement measures, and use existing partnerships, to facilitate the exchange of best practices in that field;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
23)	106. Calls on the Commission to adopt a climate and environment proof Multiannual Financial Framework; paying particular attention to the impact of external action funds that may contribute to deforestation and ecosystem degradation, as well as certain research and development funds; calls for a Green Deal Check of the MFF and all European budgets;	No specific reply is provided to this particular point.	Not mentioned.
24)	109. In particular, calls on the Commission to take initiatives to forbid the public purchase of imported products resulting in deforestation within the framework of the WTO Plurilateral Agreement on Government Procurement (GPA) and Directive 2014/24;	No specific reply is provided to this particular point.	Not mentioned.
25)	113. [...] Invites the Commission to support the dissemination, use and implementation of the VGGT at global, regional and country level, also through the External Investment Plan;	No specific reply is provided to this particular point.	Not mentioned.

#### 4.2.6. FEMM/LIBE

Between July 2019 and December 2021, the Joint Committees - Committee on Women's right and Gender Equality (FEMM) and Committee on Civil Liberties, Justice and Home Affairs (LIBE) were responsible for one 'ordinary' own-initiative report (INI) and two legislative own-initiative reports (INL) leading to an adoption of three Parliament's resolutions ('FEMM/LIBE resolution'). The table below provides a brief summary regarding the data in the adopted INL resolutions.

Table 38: Overview on FEMM/LIBE resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	3
Number of INI parliamentary procedures <sup>1</sup>	1
Number of INL parliamentary procedures	2
Total numbers of the Parliaments' points in all INL procedures	33
Number of Commission reply provided within 3 month deadline <sup>2</sup>	1/1
Number of relevant proposals adopted by the Commission by 31 January 2022	0
The main subjects/policy areas of the resolutions	- Women condition and rights (1)(2) - Action to combat violence, trafficking in human beings and migrant smuggling (1)(2)

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

#### 4.2.6.1. FEMM LIBE Resolution 1: EP resolution of 16 September 2021 on identifying gender-based violence as a new area of crime listed in Article 83(1) TFEU

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<b>Recommendations to the Commission on identifying gender-based violence as a new area of crime listed in Article 83(1) TFEU</b>	16/9/2021 <a href="#">T9-0388/2021</a> <a href="#">2021/2035(INL)</a> FEMM / LIBE	<b><a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President David Sassoli on 9 December 2021</b>	The <a href="#">tentative agenda</a> for forthcoming Commission meeting of 26 January 2022 mentioned a proposal to prevent and combat specific forms of gender-based violence, planned adoption in March 2022.
1)	16. [...] Urges the Commission to ensure that civil society organisations supported and funded by the Union do not promote gender discrimination;	No specific reply is provided to this particular point.	Not mentioned.
2)	17. Calls on the Commission to increase and secure long-term funding dedicated to preventing and combating violence against women and girls and other forms of gender-based violence through the Citizens, Equality, Rights and Values Programme, including support for shelter organisations and other civil society organisations working in that area; reiterates the importance of using benchmarks and indicators to measure progress;	As to the non-legislative measures requested by the European Parliament, the Commission would like to highlight that the Commission continues to support organisations and projects preventing and combating gender-based violence under the new Citizenship, Equality, Rights and Values Programme (CERV) whose funding has significantly increased.  As to the prevention of harmful practices, the Commission plans to table a Recommendation on the matter, which will acknowledge the importance of education and address the strengthening of public services, prevention and support measures, capacity-building of professionals and victim-centred access to justice.	
3)	21. Stresses that the attack against women's rights and gender equality is often one dimension of a broader deterioration in the situation of democracy, the rule of law and fundamental rights, and therefore calls on the Commission and on the Council to	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	consider women's and LGBTIQ+ rights violations in the context of ongoing Article 7 TEU proceedings; [...]		
4)	23. Calls on the Commission to work together with the Member States to make sure that gender-based violence is effectively tackled throughout national curricula; welcomes the Commission's proposal for a Union-wide campaign on gender stereotypes included in the Gender Equality Strategy and its commitment as regards 'educating boys and girls from an early age about gender equality and supporting the development of non-violent relationships', as key for effective prevention;	The Commission is also preparing an EU-wide communication campaign to tackle gender stereotypes with a budget of about EUR 1 million as such stereotypes are one of the root causes of gender-based violence.	
5)	25. Calls on the Commission and the Member States to improve the regular availability and comparability of quality, disaggregated data on all forms of gender-based violence at Union and national level and for the harmonisation of data collection systems among Member States through cooperation with Eurostat, the European Union Agency for Fundamental Rights and the EIGE; believes that quality data will be essential for clear; [...]	On the collection of data, the Commission's Eurostat service, with the support of the European Institute for Gender Equality (EIGE) and the Agency for Fundamental Rights (FRA), is conducting an EU-wide survey on gender-based violence. Results will be available in 2023. Action is also undertaken to ensure further convergence of administrative data collection.	Information on the European survey on gender-based violence is available on the <a href="#">FRA website</a> .
6)	28. Calls on the Member States and the Commission within their work to combat gender-based violence to ensure that all legislative and non-legislative initiatives aim to eradicate all forms of gender-based violence, specifically including women in all their diversity and violence against LGBTIQ+ persons on the grounds of gender identity, gender expression and sex characteristics; [...]	The Commission welcomes the Parliament's recommendations for legislative action and is pleased to underline that it shares the main objectives set out in the resolution.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
7)	<p>32. Is deeply worried by the nature, extent and gravity of gender-based violence and harassment in the workplace; welcomes in that regard the recent adoption by the International Labour Organisation of Convention No. 190 on violence and harassment in the world of work and calls on the Member States to ratify and implement it without delay; calls also on the Commission and the Member States to adequately complete the existing framework for effective measures to prohibit violence and harassment in the workplace, as well as preventive measures, effective access to gender-responsive, safe and effective complaint and dispute resolution mechanisms, training and awareness-raising campaigns, psychological support services and remedies; [...]</p>	<p>The Commission fully shares the European Parliament's commitment to do all the EU can to fight gender-based violence both online and offline. It agrees that gender-based violence is a widespread violation of fundamental rights, which needs to be addressed on a common basis at EU level. The Commission proposed the EU's accession to the Istanbul Convention on violence against women and domestic violence already in 2016; however, accession remains blocked in the Council. As underlined by President von der Leyen in her political guidelines and, most recently, in her letter of intent sent to the European Parliament at the time of the State of the Union address 2021, preventing and combatting such violence is a key priority for the Commission.</p>	
8)	<p>36. Calls on the Member States and the Commission to adopt specific measures to eradicate all forms of online violence, including through appropriate training for law enforcement officers, which disproportionately affects women and girls, and to specifically address the increase in such violence during the COVID-19 pandemic;</p>	<p>Moreover, the increase in violence against women and domestic violence during the pandemic highlights the need for addressing this key priority. The Gender Equality Strategy 2020-2025 announced the presentation of measures, within the limits of EU competences, to achieve the same objectives as the Istanbul Convention.</p> <p>In order to meet these shared objectives, in early 2022, the Commission intends to adopt a directive on violence against women and domestic violence with a focus on prevention, protection, support and access to justice, which would include criminalisation of specific forms of gender-based violence on the basis of the existing Eurocrimes in Article 83(1) TFEU. In order to address situations which are not covered by the existing legal basis, the Commission has decided to act in two steps. As a first step, the Commission has put forward, on 9 December 2021, an initiative to trigger a Council decision to extend the list of Eurocrimes in Article</p>	<p>The Commission conducted a public consultation on <a href="#">combating gender-based violence - protecting victims and punishing offenders</a>.</p> <p>The Commission has put forward, on 9 December 2021, an <a href="#">initiative</a> to trigger a Council decision to extend the list of Eurocrimes to include hate crime and hate speech.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>83(1) TFEU to include hate crime and hate speech. In a second step, once the decision would be adopted by the Council, the Commission would be able to propose an EU level criminalisation of those specific forms of serious violence against women and girls that can also be defined as misogynous hate speech or hate crime with an objectively identifiable gendered bias.</p> <p>These initiatives will to a large extent achieve the same objectives as those pursued by Parliament. Under the existing Eurocrimes, the proposal for a directive will focus on targeted criminalisation of specific conduct (for example criminalising serious forms of cyber violence). This would meet the objective of filling the most important gaps and ensuring that the most serious forms of violence against women and domestic violence are sanctioned in Europe, both online and offline.</p>	
9)	38. Encourages the Commission to promote regular exchanges of good practice between Member States and stakeholders on sexual and reproductive rights within its proposals for additional measures to prevent and combat forms of gender-based violence;	No specific reply is provided to this particular point.	Not mentioned.
10)	52. Calls on the Member States and the Commission to raise awareness and ensure that information to victims and perpetrators of gender-based violence is available in all Union languages, with the aim of ensuring that the rights of victims are upheld when they exercise their fundamental right to freedom of movement within the Union;	On awareness-raising and victims' access to information, the Commission is currently preparing an EU campaign on victims' rights with a budget of EUR 2 million, which will have a special focus on victims of gender-based violence, domestic violence and LGBTIQ hate crime.	The Commission has set up <a href="#">funding</a> opportunities under the 'rights, equality and citizenship programme' and under the 'justice programme'

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
11)	60. Welcomes the Commission's commitment to extend the areas of crime listed under Article 83(1), second subparagraph, TFEU to encompass hate crime and hate speech; urges the Commission to include sexual orientation, gender identity, gender expression and sex characteristics as discrimination grounds specifically covered by that Article; considers such a measure to be essential to ensure the protection of LGBTIQ+ persons in the Union;	For specific forms of serious forms of gender-based hate crime and hate speech, the extension of the list of Eurocrimes to hate speech and hate crime will provide the basis for additional criminalisation.	
12)	64. Calls for the Union to urgently address the increase in gender-based violence during the COVID-19 pandemic; calls, in that regard, on the Commission to develop a Union protocol on gender-based violence in times of crisis and to include protection services for victims, such as helplines, safe accommodation and health services, as 'essential services' in the Member States in order to prevent gender-based violence and support victims of violence during crises such as the COVID-19 pandemic;	No specific reply is provided to this particular point.	Not mentioned.
13)	67. Requests that the Commission submit, on the basis of Article 83(1), third subparagraph, TFEU, a proposal for a Council decision identifying gender-based violence as a new area of crime that meets the criteria specified in that Article, following the recommendations set out in the Annex hereto and requests the Commission to use that new area of crime as a legal basis for a holistic and victim-centred directive of the European Parliament and of the	As requested by the Parliament, the proposal for a Directive will also cover measures to prevent violence against women and domestic violence, protect and support victims, improve access to justice with a victim-centred and intersectional approach, and better coordination between competent authorities. These measures can be adopted on the basis of existing Treaty provisions and do not require the prior establishment of a new Eurocrime on gender-based violence. In particular,	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	Council to prevent and combat all forms of gender-based violence, both online and offline;	the Commission plans specific measures on the protection of child witnesses and victims of domestic violence as well as on the protection of migrant women that are victims of domestic violence. It also intends to include measures to protect children in parental separation situations at risk of domestic violence in their family.	
14)	<p>68. Calls on the Commission to propose a comprehensive directive on gender-based violence that implements the standards of the Istanbul Convention and other international standards such as the Committee on the Elimination of Discrimination Against Women's recommendations on gender-based violence and includes at least the following elements:</p> <ul style="list-style-type: none"> <li>- prevention measures, including through gender-sensitive and intersectional-responsive education programming directed at both girls and boys, and empowerment of women and girls;</li> <li>- support services and protection and reparation measures for victims;</li> <li>- measures to combat all forms of gender-based violence, including violence against LGBTIQ+ persons on the grounds of gender, gender identity, gender expression and sex characteristics, and online gender-based violence and sexual exploitation and abuse;</li> <li>- minimum standards for law enforcement;</li> <li>- a victim-centred and intersectional approach;</li> <li>- obligations for Member States to ensure that custody and visitation rights as regards children are adequately considered where a case of gender-based</li> </ul>	As to scope, the Eurocrimes list extension initiative intends to cover hate crime and hatespeech on any grounds, including on grounds of sex and sexual orientation in line with the Parliament's request. The scope of the Directive corresponds to that of the Istanbul Convention (within the limits of EU competence) and covers violence against women and domestic violence.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	violence is involved, by putting the rights of the victim at the centre of their laws; - measures ensuring that information is provided in all relevant languages; and - measures to ensure cooperation among Member States and the exchange of best practice, information and expertise;		
15)	69. Calls on the Commission to appoint a coordinator against violence against women and other forms of gender-based violence;	No specific reply is provided to this particular point.	Not mentioned.

## 4.2.6.2. FEMM LIBE Resolution 2: EP resolution of 14 December 2021 on combating gender-based violence: cyberviolence

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<b>Combating gender-based violence: cyberviolence</b>	14/12/2021 <a href="#">T9-0489/2021</a> <a href="#">2020/2035(INL)</a> FEMM/LIBE	<b>Letter not yet available<sup>3</sup></b>	
1)	1. [...] Calls on the Member States and the Commission to formulate and implement legislative and non-legislative measures, to address gender-based cyberviolence and to include the voices of victims of gender-based cyberviolence in the strategies for addressing it, coupling them with initiatives to eradicate gender stereotypes, sexist attitudes and discrimination against women;		
2)	2. [...] Calls, therefore, on the Commission and Member States to define and adopt a common definition of gender-based cyberviolence which would facilitate the work of analysing the various forms of gender-based cyberviolence and countering it and would thus ensure that victims of gender-based cyberviolence in Member States have effective access to justice and specialised support services;		
3)	4. [...] Calls on the Member States and on the Commission to address the root causes of gender-based cyberviolence and to tackle gender roles and		

<sup>3</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	stereotypes that make violence against women acceptable;		
4)	6. Calls on the Commission to ensure cyberviolence is also addressed, including the forms it takes through the sex industry; calls on the Commission and on the Member States to put an end to the pornography industry built based on sex trafficking, rape and other forms of assault and abuse of women and children; calls on the Commission and Member States to include misogyny in the forms of hate speech, and misogynistic assaults in hate crimes;		
5)	9. Underlines the urgency to tackle the root causes of gender-based violence and calls on the Commission to take that approach into account in its future proposal;		
6)	13. Calls on the Commission to carry out a deeper analysis of the effects of the COVID-19 pandemic on all forms of gender-based cyberviolence and calls on the Member States to take effective action with the support of civil society organisations and Union bodies, offices and agencies such as the FRA and Europol <sup>4</sup> ; further encourages the Commission to develop a Union Protocol on gender-based violence in times of crisis and emergency in order to include protection services for victims as 'essential services' in the Member States;		

<sup>4</sup> <https://www.europol.europa.eu/publications-documents/pandemic-profiteering-how-criminals-exploit-covid-19-crisis>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
7)	14. Calls on the Commission and Member States to expand the scope of hate speech to include sexist hate speech;		
8)	18. Encourages the Member States to duly and effectively adopt and implement adequate national law, including criminal justice law, and specific policies to promote awareness-raising and to set up campaigns, training and educational programmes, including on digital education, literacy and skills, which would also target younger generations; encourages the Commission to support the Member States in that regard;		
9)	22. Calls on the Commission and the Member States to provide adequate funding for advocacy organisations and victim support organisations; emphasises the importance of research into the phenomenon of gender-based cyberviolence; further calls on the Commission and the Member States to increase the funds such as the ones devoted to awareness-raising campaigns and combating gender stereotypes;		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
10)	<p>26. Calls on the Commission to promote awareness-raising, information and advocacy campaigns that tackle gender-based cyberviolence in all its forms and help to ensure a safe digital public space for everyone; considers that a Union-wide awareness-raising campaign on gender-based cyberviolence should contain, inter alia, information targeted at educating younger citizens of the Union on how to recognise and report forms of cyberviolence and on digital rights; notes that young women are particularly targeted by gender-based cyberviolence and also calls, in that regard, for the development of specific prevention and awareness-raising initiatives<sup>5</sup>;</p>		
11)	<p>27. Urges the Commission and the Member States to establish a reliable system for regularly collecting Union-wide statistical disaggregated, comparable and relevant data on gender-based violence, including cyberviolence and its prevalence, dynamics and consequences, and to develop indicators to measure progress; reaffirms the need to collect comprehensive disaggregated and comparable data, including scientific data, in order to measure the scale of gender-based violence, find solutions and measure progress; calls on the Member States to collect and provide the relevant data; recommends that the Commission and the Member States make use of the capacity and expertise of the EIGE, Eurostat, the FRA, Europol, Eurojust and ENISA;</p>		

<sup>5</sup> FRA report of 3 March 2014 entitled 'Violence against women: an EU-wide survey'.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
12)	32. Calls on the Commission and the Member States to pay particular attention to the intersectional forms of gender-based cyberviolence which can affect women and girls belonging to groups put in a vulnerable situation, such as those belonging to ethnic minorities, those with disabilities and LGBTIQ people;		
13)	33. Calls on the Member States to develop specific free and accessible support services for groups put in a vulnerable situation, including emergency and long-term support, such as psychological, medical, legal, practical and socio-economic support, and programmes, particularly on digital education, literacy and skills; calls on the Commission to support the Member States in that regard;		
14)	38. [...] Calls on the Commission and the Member States to step up measures to address such biases, specifically by tackling the gender gap in the sector and ensuring the full protection of fundamental rights;		
15)	39. [...] Urges the Commission and the Member States to tackle the gender gap in the ICT and science, technology, engineering and mathematics (STEM) sectors through education, awareness-raising campaigns, professional training, appropriate funding, the promotion of the representation of women in those sectors, in particular in decision-making positions, improved work-life balance, equal opportunities, safe and enabling working environments, including zero tolerance sexual and moral harassment policies;		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
16)	40. Calls on the Commission and Member States to ensure a proper application of the Directive 2011/93/EU in order to raise awareness and reduce the risk of children becoming victims of online sexual abuse or exploitation;		
17)	54. Urges the Commission to use the upcoming directive to criminalise gender-based cyber violence, as a cornerstone for the harmonisation of existing and future legal acts;		
18)	56. Requests that the Commission submit, without undue delay, as a part of its upcoming legislative proposal and on the basis of Article 83(1), first subparagraph, TFEU, a proposal for an act establishing measures to combat gender-based cyber violence following the recommendations set out in the Annex hereto;		

### 4.2.7. IMCO

Between July 2019 and December 2021, the **Committee on Industry, Research and Energy (IMCO)** was responsible for six 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to an adoption of seven Parliament's resolutions ('IMCO resolution'). The table below provides a brief summary regarding the data in the adopted INL resolution.

Table 39: Overview on IMCO resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	7
Number of INI parliamentary procedures <sup>1</sup>	6
Number of INL parliamentary procedures	1
Total numbers of the Parliaments' points in all INL procedures	36
Number of Commission reply provided within 3 month deadline <sup>2</sup>	1/1
Number of relevant proposals adopted by the Commission by 31 January 2022	3
The main subjects/policy areas of the resolutions	<ul style="list-style-type: none"> <li>- Internal market, single market</li> <li>- Free movement of services, freedom to provide</li> <li>- Information and communication technologies, digital technologies</li> <li>- Consumers' economic and legal interests</li> <li>- EU law</li> </ul>

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

#### 4.2.7.1. IMCO Resolution 1: EP resolution of 20 October 2020 on the Digital Services Act: Improving the functioning of the Single Market

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<b>Resolution with recommendations to the Commission on the Digital Services Act: Improving the functioning of the Single Market</b>	20/10/2020 <a href="#">T9-2020/0272</a> <a href="#">2020/2018(INL)</a> IMCO	<b><a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President David Sassoli on 15 December 2020</b>	<a href="#">COM(2020)825</a> ; <a href="#">COM(2021)842</a> ; <a href="#">COM/2021/346</a>
1)	1. [...] Calls on the Commission to submit such a package on the basis of Articles 53(1), 62 and 114 TFEU, following the recommendations set out in the Annex to this resolution, on the basis of a thorough impact assessment which should include information on the financial implications of the proposals and be based on relevant data, statistics and analyses;	<p>The Commission welcomes the Parliament's recommendations for legislative action. In the preparation of its proposals, the Commission has given careful consideration to the Parliament's recommendations contained in its resolution, and I am glad to note a high degree of convergence between the main objectives set out in the resolution and the objectives of the Commission's proposals. It is also worth noting that the Commission engaged with the European Parliament from the very beginning of the development of the resolution.</p> <p>Please allow me to outline here in broad terms how the proposals take into account the principles and recommendations of the resolution. Information in this respect is also included in the Impact Assessments accompanying the proposals.</p>	<p>Already in 2019, the von der Leyen Commission pledged to propose a new digital services act and in 2020 two communications were adopted: 'Shaping Europe's digital future' and 'A European strategy for data'. The Commission followed up to the resolution with the two legislative proposals for a Digital Services Act and a Digital Markets Act that the College adopted on 15 December 2020. The proposed Digital Services Act lays down the frame the accountability and responsibilities of digital services in Europe, in order to protect their users from illegal content and to safeguard their fundamental rights. The proposed Digital Markets Act sets out obligations for systematic platforms designated as 'gatekeepers' when engaging with their business users and end users. In its reply to Parliament's resolution, as submitted by letter of Vice President Šefčovič from 15 December, the Commission sets out to which extend the proposals correspond to major EP requests, such as maintaining the core principles of the e-Commerce Directive, introducing minimum standards for contract terms and general conditions, a notice and action system or regarding specific recommendations for the regulation of online marketplaces.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
2)	3. [...] Asks the Commission to evaluate in addition whether there is a risk of retaliatory measure by third countries, while raising awareness on how Union law applies to service providers from third countries targeting the Union market;	No specific reply is provided to this particular point.	Not mentioned.
3)	7. [...] Calls on the Commission, following a consultation with all relevant stakeholders to initiate a more comprehensible sharing of non-personal data and coordination framework between platforms and national, regional and local authorities, aiming especially at sharing best practices and establishing a set of information obligations, in line with the EU Data Strategy	The proposed Digital Services Act introduces the conditions for the proper functioning of the single market for digital services, by laying down clear rules that frame the accountability and responsibilities of digital services in Europe, in order to protect their users from illegal content and to safeguard their fundamental rights. The newly proposed rules include a reinforced system of cooperation among Member State authorities in the Union for the supervision of providers of intermediary services and to guarantee effective enforcement.	
4)	9. [...] Asks the Commission to encourage service providers to develop technical tools that allow persons with disabilities to effectively access, use and benefit from information society services;	No specific reply is provided to this particular point.	Not mentioned.
5)	14. [...] Asks the Commission to ensure that any revisions continue to be technology-neutral in order to guarantee long-lasting benefits to businesses and consumers;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
6)	30. Calls on the Commission to reinforce the information requirements set out in Article 5 of the E-Commerce Directive and to require hosting providers to compare the information and identity of the business users with whom they have a direct commercial relationship, with the identification data by the relevant existing and available Union databases, in compliance with data protocol legislation	<p>The proposed Digital Markets Act sets out clear obligations for platforms designated as ‘gatekeepers’ when engaging with their business users and end users. To ensure that the proposed Digital Markets Act only applies to systemic platforms, i.e. those that serve as gateways for business users and end users, the proposed rules set out clear conditions for the designation of providers of core platform services as ‘gatekeepers’. The proposed rules by means of obligations addressed to designated gatekeepers ensure that the core platform services remain contestable and that business users and end users benefit from a fair platform environment.</p> <p>I would like to stress that the proposed Digital Services Act builds upon the valid principles of the e-Commerce Directive.</p>	
7)	31. Calls on the Commission to introduce enforceable obligations on information society service providers aiming at increasing transparency, information and accountability; calls on the Commission to ensure that enforcement measures are targeted in a way that takes into account the different services and does not inevitably lead to a breach of privacy and legal process;	<p>The latter, together with the two pieces of legislation, are intended to provide for a comprehensive framework covering the whole digital ecosystem in the Union. In line with the Parliament’s resolution, the proposed rules of the Digital Services Act primarily focus on illegal content, but also include some transparency provisions that apply to all measures taken by providers of intermediary services, including as regards the exploitation and manipulation of the service for spreading harmful content. While addressing new challenges arising from the systemic nature of, and behaviour by very large platforms, these new rules should help smaller companies in particular to scale up, grow and benefit from the single market, especially in the recovery phase after the COVID-19 crisis.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
8)	33. [...] Notes the potential negative impact of personalised advertising, in particular micro-targeted and behavioural advertisement; calls, therefore, on the Commission to introduce additional rules on targeted advertising and micro-targeting, based on the collection of personal data and to consider regulating micro- and behavioural targeted advertising more strictly in favour of less intrusive forms of advertising that do not require extensive tracking of user interaction with content; urges the Commission to also consider introducing legislative measures to make online advertising more transparent;	In its resolution the European Parliament is also concerned with the important issue of transparency for advertising and targeted advertising, and accountability and fairness criteria for algorithms used in advertising, including when it comes to access to advertising data and allowing for external regulatory audits. According to the resolution, users should by default not be tracked or micro-targeted, and should rather have the possibility to opt in for the use of their data for advertising purposes. The Commission's proposal for the Digital Services Act provides for a high standard of transparency for users, and a real step-change in the public supervision of online advertising systems run by very large online platforms. These specific provisions are intended to address the information asymmetries at the basis of business incentives and malicious behaviours that affect legitimate interests and European values in this area. The Commission is also proposing further targeted measures on online advertising in the proposed Digital Markets Act. The enhanced transparency proposals aim at complementing the provisions on commercial communications in the e-Commerce Directive and supporting more effective enforcement of the General Data Protection Regulation. The Commission also stresses the importance and urgency of adopting new rules on e-privacy in this regard and points to the complementarity with the forthcoming initiative on political advertising announced in the context of the European Democracy Action Plan.	The Commission launched a <a href="#">public consultation on the initiative on political advertising</a> in January 2021.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
9)	<p>34. [...] Invites the Commission to review the existing requirements on contracts concluded by electronic means, including as regards notifications by Member States, and to update them if necessary; notes, in that context, the rise of “smart contracts” such as those based on distributed ledger technologies and asks the Commission to assess the development and use of distributed ledger technologies, including “smart contracts”, such as regards questions of validity and enforcement of smart contracts in cross-border situations, to provide guidance thereon, in order to ensure legal certainty for businesses and consumers, and to take legislative initiatives only if concrete gaps are identified following that assessment;</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>
10)	<p>35. Calls on the Commission to introduce minimum standards for contract terms and general conditions, in particular with regard to transparency, accessibility, fairness and non-discriminatory measures, and to further review the practice of pre-formulated standard clauses in contract terms and conditions, which have not been individually negotiated in advance, including End-User Licensing Agreements, to seek ways of making them fairer and to ensure compliance with Union law, in order to allow easier engagement for consumers, including in the choice of clauses, to make it possible to obtain better informed consent;</p>	<p>The resolution also asked the Commission to introduce minimum standards for contract terms and general conditions, in particular with regard to transparency, accessibility, fairness and non-discrimination, and for transparency and accountability requirements regarding automated decision-making processes and content moderation procedures. In this respect, the proposal for a Digital Services Act provides for transparency and reporting obligations concerning the content moderation policies and tools that providers have in place, including as concerns automated decision-making processes and human review. It also provides for external audits and recurrent risk assessments, in a way that is proportionate to the size and impact of a given provider in society. The Commission is also working in parallel on initiatives on Artificial Intelligence, including on fundamental rights and safety and on liability, and initiatives on data.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
11)	36. Stresses the need to improve the efficiency of electronic interactions between businesses and consumers in light of the development of virtual identification technologies; considers that in order to ensure the effectiveness of the DSA, the Commission should also update the regulatory framework on digital identification, namely Regulation (EU) No 910/2014 <sup>3</sup> ("the eIDAS Regulation"); (...) calls on the Commission to carry out a thorough impact assessment with regard to the creation of a universally accepted public electronic identity as an alternative to private single sign-in systems and underlines that this service should be developed so that data gathered is kept to an absolute minimum; consider that the Commission should assess the possibility to create an age verification system for users of digital services, especially in order to protect minors;	No specific reply is provided to this particular point.	Not mentioned.
12)	41. Calls on the Commission to introduce transparency and accountability requirements regarding automated decision-making processes, while ensuring compliance with requirements on user privacy and trade secrets;	No specific reply is provided to this particular point.	Not mentioned.
13)	44. Underlines the importance to strengthen consumer choice, consumer control and consumer trust in AI services and applications; believes, therefore, that the set of rights of consumers should be expanded to better protect them in the digital world and calls on the Commission to consider in particular accountability and fairness criteria and control and the right to non-discrimination and unbiased AI datasets;	No specific reply is provided to this particular point.	Not mentioned.

<sup>3</sup> Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (OJ L 257, 28.8.2014, p. 73).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
14)	50. Calls on the Commission to ensure that online intermediaries, who, on their own initiative, take allegedly illegal content offline, to do so in a diligent, proportionate and non-discriminatory manner, and with due regard in all circumstances to the fundamental rights and freedoms of the users;	The resolution calls for maintaining the core principles of the e-Commerce Directive as regards the liability regime for user-generated content and its prohibition of general monitoring obligations, as pivotal for the free movement of digital services, for ensuring the availability of content online and for protecting the fundamental rights of users. The proposed Digital Services Act follows this approach, while clarifying that providers of intermediary services should not be ineligible for the exemptions from liability solely because they take voluntary measures to address illegal content. The proposal does not harmonise the liability of intermediary services providers, but the exemptions from their liability under certain conditions.	
15)	51. Asks the Commission to present a study on the removal of content and data before and during the COVID-19 pandemic by automated decision-making processes and on the level of removals in error (false positives) that were included in the number of items removed;	No specific reply is provided to this particular point.	Not mentioned.
16)	52. Calls on the Commission to address the increasing differences and fragmentations of national rules in the Member States and to adopt clear and predictable harmonised rules and a transparent, effective and proportionate notice-and-action mechanism; it should provide sufficient safeguards, empower users to notify online intermediaries of the existence of potentially illegal online content or activities and help online intermediaries react quickly and be more transparent with the actions taken on potentially illegal content;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
17)	53. Stresses that such a 'notice-and-action' mechanism must be human-centric; underlines that safeguards against the abuse of the system should be introduced, including against repeated false flagging, unfair commercial practices and other schemes; urges the Commission to ensure access to transparent, effective, fair, and expeditious counter-notice and complaint mechanisms and out-of-court dispute settlement mechanisms and to guarantee the possibility;	The proposed Digital Services Act is fully aligned with the Parliament's recommendations as regards the notice and action system.	
18)	54. Welcomes efforts to bring transparency to content removal; calls on the Commission to ensure that reports with information about the notice-and-action mechanisms, such as the number of notices, type of entities notifying content, nature of the content subject of complaint, response time by the intermediary, the number of appeals as well as the number of cases where content was misidentified as illegal or as illegally shared should be made publicly available;	No specific reply is provided to this particular point.	Not mentioned.
19)	59. Calls on the Commission to consider a requirement for hosting service providers to report illegal content, which may constitute a serious crime to the competent law enforcement authority, upon becoming aware of it;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
20)	61. [...] Calls on the Commission to reinforce the liability regime on online marketplaces;	The resolution also makes specific recommendations for the regulation of online market places and invites the Commission to consider a specific liability regime for online marketplaces under certain circumstances. In this area, the proposed Digital Services Act introduces, among other measures, a comprehensive know-your-business customer scheme, while preserving anonymity for non-traders. It also provides that under certain circumstances, hosting service providers cannot benefit from their exemption in respect of the liability under consumer protection law. The Commission considers this set of measures appropriate and proportionate, especially with regard to smaller companies, while they do not compromise the core principles of the current framework. The Commission is also preparing a proposal to revise the General Product Safety Directive, scheduled for 2021, to tackle the safety issues of products sold on online marketplaces, inter alia through an update of the general legal framework and other elements that would further improve the safety of products sold online.	On 30 June 2021, the Commission adopted a <a href="#">proposal to revise the General Product Safety Directive</a> .

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
21)	62. Stresses the importance of the rules of Regulation (EU) 2019/1020 on market surveillance and compliance of products about conformity of products entering the Union from third countries; calls on the Commission to take measures to improve compliance with legislation by sellers established outside the Union where there is no manufacturer, importer or distributor established in the Union and to remedy any current legal loophole which allows suppliers established outside the Union to sell online to European consumers products which do not comply with Union rules on safety and consumer protection, without being sanctioned or liable for their actions and leaving consumers with no legal means to enforce their rights or being compensated by any damages;	No specific reply is provided to this particular point.	Not mentioned.
22)	66. Calls on the Commission to urge Member States to undertake more joint market surveillance actions and to step up collaboration with customs authorities in order to check the safety of products sold online before they reach consumers; asks the Commission to explore the possibility of the creation of an international network of consumer centres to help EU consumers in handling disputes with traders based in non-EU countries;	No specific reply is provided to this particular point.	Not mentioned.
23)	67. Asks the Commission to ensure that where online marketplaces offer professional services, a sufficient level of consumer protection is achieved through adequate safeguards and information requirements;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
24)	68. [...] Calls on the Commission to further remove unjustified barriers by devising a sector-specific EU-coordinated effort involving all stakeholders to agree on sets of criteria, such as permits, or licenses, or, where applicable, a local or national registration number of a service provider, in line with Single Market rules, necessary to offer a service on a short term rental or mobility platform;	No specific reply is provided to this particular point.	Not mentioned.
25)	70. Invites the Commission to examine thoroughly the clarity and consistency of the existing legal framework applying to the online sale of products and services in order to identify possible gaps and contradictions and lack of effective enforcement; asks the Commission to conduct a thorough analysis of the interaction between the DSA and the Union product safety and chemicals legislation; asks the Commission to ensure consistency between the new rules on online marketplaces and the revision of Directive 2001/95/EC <sup>4</sup> (“the General Product Safety Directive”) and Directive 85/374/EEC <sup>5</sup> (“the Product Liability Directive”);	No specific reply is provided to this particular point.	Not mentioned.
26)	71. Notes the continued issues of the abuse or wrong application of selective distribution agreements to limit the availability of products and services across borders within the Single Market and between platforms; asks the Commission to act on this issue within any wider review of Vertical Bloc Exemptions and other policies under Article 101 TFEU, while refraining from its inclusion in the DSA;	No specific reply is provided to this particular point.	Not mentioned.

<sup>4</sup> Directive 2001/95/EC of the European Parliament and of the Council of 3 December 2001 on general product safety (OJ L 11, 15.1.2002, p.4).

<sup>5</sup> Council Directive 85/374/EEC of 25 July 1985 on the approximation of the laws, regulations and administrative provisions of the Member States concerning liability for defective products (OJ L 210, 7.8.1985, p.29).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
27)	72. [...] Asks the Commission to conduct a thorough analysis of the different issues observed in the market so far and its consequences including on consumers, SMEs and the internal market	No specific reply is provided to this particular point.	Not mentioned.
28)	75. Calls on the Commission to define 'systemic operators' on the basis of clear indicators;	In line with the Parliament's call to define 'systemic operators' on the basis of clear indicators, the proposed Digital Markets Act contains clear quantitative and qualitative criteria that a provider of core platform services would need to meet to be designated as a 'gatekeeper' by the Commission as a competent enforcement authority.	
29)	77. Calls on the Commission to analyse in particular the lack of transparency for recommendation systems of systemic operators including for the rules and criteria for the functioning of such systems and whether additional transparency obligations and information requirements need to be imposed;	No specific reply is provided to this particular point.	Not mentioned.
30)	81. Underlines that interoperability is key to enable competitive market, as well as users' choice and innovative services, and to limit the risk of users' and consumers' lock-in effect; calls on the Commission to ensure appropriate levels of interoperability for systemic operators and to explore different technologies and open standards and protocols, including the possibility of a technical interface (Application Programming Interface);	No specific reply is provided to this particular point.	Not mentioned.
31)	82. [...] Calls on the Commission to address those in close cooperation with Member States;	No specific reply is provided to this particular point.	Not mentioned.
32)	83. Asks the Commission to ensure that Member States provide national supervisory authorities with the adequate financial means and human resources and enforcement powers to carry out their functions effectively and to contribute to their respective work;	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
33)	85. Calls on the Commission to assess the most appropriate supervision and enforcement model for the application of the provisions regarding the DSA, and to consider the setup of a hybrid system, based on coordination and cooperation of national and Union authorities, for the effective enforcement oversight and implementation of the DSA;	The resolution refers to the broad political idea that 'what is illegal offline should also be illegal online' but also highlights that the specific nature of the online environment should be taken into account. In line with this, the Commission's proposal for a Digital Services Act makes clear that illegal content online should be defined in accordance with EU and national laws, but the measures to fight against it should take into account the particularities of the digital ecosystem.	
34)	87. [...] Calls on the Commission to build such tool upon existing best practices and initiatives such as the Platform observatory or the EU Blockchain Observatory;	No specific reply is provided to this particular point.	Not mentioned.
35)	88. [...] Calls on national regulators and the Commission to provide further advice and assistance to Union SMEs about their rights;	No specific reply is provided to this particular point.	Not mentioned.
36)	89. Calls on the Commission to strengthen and modernise the existing Union framework for out-of-court settlement under the E-Commerce Directive, taking into account developments under Directive 2013/11/EU <sup>6</sup> , as well as court actions to allow for an effective enforcement and consumer redress;	No specific reply is provided to this particular point.	Not mentioned.

<sup>6</sup> Directive 2013/11/EU of the European Parliament and of the Council of 21 May 2013 on alternative dispute resolution for consumer disputes and amending Regulation (EC) No 2006/2004 and Directive 2009/22/EC (Directive on consumer ADR) (OJ L 165, 18.6.2013, p. 63).

#### 4.2.8. JURI

Between July 2019 and December 2021, the **Committee on Legal Affairs (JURI)** was responsible for seven 'ordinary' own-initiative reports (INI) and five legislative own-initiatives reports (INL) leading to an adoption of twelve Parliament's resolutions ('JURI resolution'). The table below provides a brief summary regarding the data in the adopted INL resolutions.

Table 40: Overview on JURI resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	12
Number of INI parliamentary procedures <sup>1</sup>	7
Number of INL parliamentary procedures	5
Total numbers of the Parliaments' points in all INL procedures	52
Number of Commission reply provided within 3 month deadline <sup>2</sup>	5/5
Number of relevant proposals adopted by the Commission by 31 January 2022	8
The main subjects/policy areas of the resolutions	<ul style="list-style-type: none"> <li>- Free movement of services, freedom to provide (1)</li> <li>- Information and communication technologies, digital technologies (1)(2)(3)(5)</li> <li>- Electronics, electrotechnical industries, ICT, robotics (1)(2)(3)</li> <li>- Business policy, e-commerce, after-sales service, commercial distribution (1)</li> <li>- Ethical information policy (2)</li> <li>- Company law (4)</li> <li>- Sport (5)</li> </ul>

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

#### 4.2.8.1. JURI Resolution 1: EP resolution of 20 October 2020 on a Digital Services Act: adapting commercial and civil law rules for commercial entities operating online

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<p><b>Resolution with recommendations to the Commission on a Digital Services Act: adapting commercial and civil law rules for commercial entities operating online</b></p>	<p>20/10/2020 <a href="#">T9-0273/2020</a> <a href="#">2020/2019(INL)</a> JURI</p>	<p><b>Letter from Vice-President Maroš Šefčovič received by President David Sassoli on 15 December 2020</b></p>	<p><a href="#">COM (2020)825</a>; <a href="#">COM(2020)842</a></p>
<p>1)</p>	<p>1. Requests that the Commission submit without undue delay a set of legislative proposals constituting a Digital Services Act with an adequate material, personal and territorial scope, defining key concepts and including the recommendations as set out in the Annex to this resolution;</p>	<p>The Commission welcomes the Parliament’s recommendations for legislative action. In the preparation of its proposals, the Commission has given careful consideration to the Parliament’s recommendations contained in its resolution, and I am glad to note a high degree of convergence between the main objectives set out in the resolution and the objectives of the Commission proposals. It is also worth noting that the Commission engaged with the European Parliament from the very beginning of the development of the resolution.</p> <p>Please allow me to outline here in broad terms how the proposals take into account the principles and recommendations of the resolution. Information in this respect is also included in the Impact Assessments accompanying the proposals.</p>	<p>The Commission followed up to the resolution with the two legislative proposals for a Digital Service Act and a Digital Markets Act that the College adopted on 15 December 2020.</p>
<p>2)</p>	<p>8. Recommends that the application of the regulation should be closely monitored by a European entity tasked with ensuring compliance by content hosting platforms with the provisions of the regulation, in particular by monitoring compliance with the standards laid down for content management on the basis of transparency reports and monitoring</p>	<p>The Commission agrees with the Parliament that the rules in the proposed Digital Services Act require supervision at European level. This is why the Commission’s proposal provides for a mechanism of governance for intermediary services relying on a Board of Digital Services Coordinators and the Commission’s intervention, when necessary.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	algorithms employed by content hosting platforms for the purpose of content management; calls on the Commission to assess the options of appointing an existing or new European Agency or European body or of coordinating itself a network of national authorities to carry out these tasks (hereinafter referred to as "the European entity");		
3)	14. Considers that the user-targeted amplification of content based on the views or positions presented in such content is one of the most detrimental practices in the digital society, especially in cases where the visibility of such content is increased on the basis of previous user interaction with other amplified content and with the purpose of optimising user profiles for targeted advertisements; is concerned that such practices rely on pervasive tracking and data mining; calls on the Commission to analyse the impact of such practices and take appropriate legislative measures;	No specific reply is provided to this particular point.	Not mentioned.
4)	17. Recommends, therefore, that the Digital Services Act set clear boundaries and introduce transparency rules as regards the terms for accumulation of data for the purpose of offering targeted advertisements as well as regards the functioning and accountability of such targeted advertisement, especially when data are tracked on third-party websites; maintains that new measures establishing a framework for Platform-to-Consumers relations are needed as regards transparency provisions on advertising, digital nudging and preferential treatment; invites the Commission to assess options for regulating targeted advertising, including a phase-out leading to a prohibition;	The resolution calls for the user's empowerment vis-à-vis targeted advertising and detailed information and transparency requirements with regard to advertisements placed on a platform. The resolution stresses the importance of users' consent and the choice to opt in or out. The resolution invites the Commission to assess a phase-out leading to a prohibition of targeted advertising. The Commission's proposal for the Digital Services Act provides for a high standard of transparency for users, and a real step-change in the public supervision of online advertising systems run by very large online platforms. These specific provisions are intended to address the information asymmetries at the basis of business incentives and malicious behaviours that affect legitimate interests and	The Commission launched a <a href="#">public consultation on political advertising</a> in January 2021.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>European values in this area. The Commission is also proposing further targeted measures on online advertising in the proposed Digital Markets Act. The enhanced transparency proposals aim at complementing the provisions on commercial communications in the e-Commerce Directive and supporting the more effective enforcement of the General Data Protection Regulation. The Commission also stresses the importance and urgency of adopting new rules on e-privacy in this regard and points to the complementarity with the forthcoming initiative on political advertising announced in the context of the European Democracy Action Plan<sup>2</sup>.</p>	
5)	<p>18. Stresses that in line with the principle of data minimisation and in order to prevent unauthorised disclosure, identity theft and other forms of abuse of personal data, the Digital Services Act should provide for the right to use digital services anonymously wherever technically possible; calls on the Commission to require content hosting platforms to verify the identity of those advertisers with which they have a commercial relationship to ensure accountability of advertisers in the event content promoted is found to be illegal;</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>
6)	<p>20. [...] Asks the Commission to propose common Union standards for national systems provided by Member States, especially as regards data protection standards and cross-border interoperability;</p>	<p>The proposed Digital Services Act introduces the conditions for the proper functioning of the single market for digital services, in particular online intermediaries, by laying down clear rules that frame the accountability and responsibilities of digital services in Europe, in order to protect their users from illegal content and to safeguard their fundamental rights. The newly proposed rules include a reinforced system of cooperation among Member State authorities in the Union for the supervision of providers of intermediary services and to guarantee effective enforcement.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		The proposed Digital Markets Act sets out clear obligations for platforms designated as 'gatekeepers', when engaging with their business users and end users. To ensure that the Digital Markets Act only applies to systemic platforms, i.e. those that serve as gateways for business users and end users, the proposed rules set out clear conditions for the designation of providers of core platform services as 'gatekeepers'. The proposed rules ensure that the core platform services remain contestable and that business users and end users benefit from a fair platform environment.	
7)	21. Calls on the Commission to assess the possibility of defining fair contractual conditions to facilitate data sharing and increase transparency with the aim of addressing imbalances in market power;	<p>The proposed Digital Services Act introduces the conditions for the proper functioning of the single market for digital services, in particular online intermediaries, by laying down clear rules that frame the accountability and responsibilities of digital services in Europe, in order to protect their users from illegal content and to safeguard their fundamental rights. The newly proposed rules include a reinforced system of cooperation among Member State authorities in the Union for the supervision of providers of intermediary services and to guarantee effective enforcement.</p> <p>The proposed Digital Markets Act sets out clear obligations for platforms designated as 'gatekeepers', when engaging with their business users and end users. To ensure that the Digital Markets Act only applies to systemic platforms, i.e. those that serve as gateways for business users and end users, the proposed rules set out clear conditions for the designation of providers of core platform services as 'gatekeepers'. The proposed rules ensure that the core platform services remain contestable and that business users and end users benefit from a fair platform environment.</p>	
8)	27. Asks the Commission to ensure that, in the same spirit, consumers can still use a connected device for all its functions, even if consumers withdraw or do	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	not give their consent to share non-operational data with the device manufacturer or third parties;		
9)	33. Calls on the Commission to assess the development and use of distributed ledger technologies, including block chain and, in particular, of smart contracts, provide guidance to ensure legal certainty for business and consumers, in particular regarding questions of legality, enforcement of smart contracts in cross border situations, and notarisation requirements where applicable, and make proposals for the appropriate legal framework;	With regard to smart contracts, the Commission plans a public consultation to gain a more detailed view on the issues surrounding smart contracts, as well as studies to analyse questions on the use of smart contracts on a large scale, with the objective of overcoming obstacles as well as enabling their use across Member States. Moreover, the Commission will support the development of common standards for smart contracts to foster interoperability and cross-border use cases.	On 20 October 2021, the Commission released a study on the <a href="#">smart contracts and the digital single market through the lens of a "law+technology" approach</a> .
10)	35. Requests that the Commission examine modalities to ensure appropriate balance and equality between the parties to smart contracts by taking into account the private concerns of the weaker party or public concerns such as those related to cartel agreements; emphasises the need to ensure that the rights of creditors in insolvency and restructuring procedures are respected;	No specific reply is provided to this particular point.	Not mentioned.
11)	36. Requests the Commission to, in particular, update its existing guidance document on Directive 2011/83/EU of the European Parliament and of the Council of 25 October 2011 on consumer rights <sup>3</sup> in order to clarify whether it considers smart contracts to fall within the exemption in point (l) of Article 3(3) of that Directive, and, if so, under which circumstances, and to clarify the issue of the right of withdrawal;	No specific reply is provided to this particular point.	Not mentioned.

<sup>3</sup> OJL 304, 22.11.2011, p. 64.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
12)	38. Considers that standard terms and conditions should not prevent effective access to justice in Union courts or disenfranchise Union citizens or businesses; calls on the Commission to assess whether the protection of access rights to data under private international law is uncertain and leads to disadvantages for Union citizens and businesses;	No specific reply is provided to this particular point.	Not mentioned.

#### 4.2.8.2. JURI Resolution 2: EP resolution of 20 October 2020 on a framework of ethical aspects of artificial intelligence, robotics and related technologies

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<p><b>Resolution with recommendations to the Commission on a framework of ethical aspects of artificial intelligence, robotics and related technologies</b></p>	<p>20/10/2020 <a href="#">T9-0275/2020</a> <a href="#">2020/2012(INL)</a> JURI</p>	<p><b><a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President David Sassoli on 15 December 2020</b></p>	<p><a href="#">COM(2020)65 final</a>, <a href="#">COM(2021)206</a>; <a href="#">COM(2021) 205</a></p>
<p>1)</p>	<p>9. Expects the Commission to integrate a strong ethical approach into the legislative proposal requested in the annex to this resolution as a follow up to the White Paper on Artificial Intelligence, including on safety, liability and fundamental rights, which maximises the opportunities and minimises the risks of AI technologies; expects that the legislative proposal requested will include policy solutions to the major recognised risks of artificial intelligence including, amongst others, on the ethical collection and use of Big Data, the issue of algorithmic transparency and algorithmic bias; calls on the Commission to develop criteria and indicators to label AI technology, in order to stimulate transparency, explainability and accountability and incentivise the taking of additional precautions by developers; stresses the need to invest in integrating non-technical disciplines in AI study and research, taking into account the social context;</p>	<p>The Commission welcomes the Parliament’s recommendations for legislative action and is pleased to underline that it shares the main objectives set out in the resolution. It is also worth noting that the Commission engaged with the European Parliament from the very beginning of the development of the resolution.</p> <p>1. As reflected in the Parliament’s resolution, an important issue for the future regulatory framework on artificial intelligence is its scope of application. The view of the Parliament is that it should extend to artificial intelligence, robotics and related technologies - including software, algorithms and data used or produced by such technologies, and developed, deployed or used in the Union. The working assumption in the Commission’s White Paper of February 2020 is that the regulatory framework would apply to products and services relying on artificial intelligence and that only artificial intelligence that displays specific features, like high complexity or opacity (the ‘blackbox’ effect), justifies specific regulation. The Commission considers that, in any new legal instrument, the definition of the technologies concerned will need to be precise enough to provide the necessary legal certainty, while leaving some flexibility to accommodate technical progress. The Commission therefore is very carefully examining the</p>	<p>In its reply, in form of a letter of 15 December 2020 from Vice-President Maroš Šefčovič to David President Sassoli, the Commission confirms, “that it intends to follow-up to the resolution in full respect of proportionality, subsidiarity and better law making principles and also its International Commitments, with a legislative proposal scheduled for early 2021. The <a href="#">Commission Work Programme 2020</a> announced legislative proposals following-up to the <a href="#">White Paper on Artificial Intelligence</a>, including on safety, liability, fundamental rights and data (incl. impact assessment, Article 114 TFEU) to be presented during the first quarter of 2021.</p> <p>On 21 April 2021, the Commission adopted a <a href="#">proposal for a regulation on the Artificial Intelligence Act (2021/0106 (COD))</a>, the first ever legal framework on AI, which addresses the specific risks posed by AI systems. The proposal is accompanied by a <a href="#">Coordinated Plan on Artificial Intelligence 2021</a> outlining the necessary policy changes and investment at Member States and proposing concrete joint actions to ensure all efforts are aligned with the European Strategy on AI and the European Green Deal.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		possible scope of application of potential regulation and it agrees with the European Parliament that regulation should not go beyond what is strictly necessary to address the risks posed to fundamental rights and safety, while ensuring a stable regulatory environment that supports innovation.	
2)	26. [...] Calls on the Commission and Member States to ensure that Union values and respect for fundamental rights are observed at all times when developing and deploying AI technology in order to ensure the security and resilience of the Union's digital infrastructure;	No specific reply is provided to this particular point.	Not mentioned.
3)	27. [...] Calls on the Commission and the Member States to take any possible measure to avoid such biases and to ensure the full protection of fundamental rights;	<p>3. The resolution proposes to make high-risk products and services subject to an assessment of compliance and subsequent monitoring by national supervisory authorities. A similar approach was proposed by the Commission in its White Paper on Artificial Intelligence.</p> <p>4. The Parliament recommends a number of requirements that would be applicable to artificial intelligence: human oversight, safety, transparency and accountability, non-bias and non-discrimination, social responsibility and gender equality, environmental sustainability; privacy, criteria for and limits to the use of biometric recognition and the right to seek redress. The Commission's White Paper had proposed requirements for high-risk artificial intelligence applications in certain areas: training data, data and record-keeping, information provision, robustness and accuracy, human oversight. The Commission is currently analysing the content of these possible requirements and the possible corresponding obligations for providers and users of high-risk artificial intelligence systems, in line with the objective of ensuring that compliance by artificial intelligence-enabled products and services in high-risk fields with the existing legal rights of users and other persons affected by such artificial intelligence applications can be effectively</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>monitored and enforced. The Commission will carefully examine the various requirements proposed by the Parliament. It should be considered that for some of them, notwithstanding their importance, it may be practically difficult to carry out a meaningful assessment and establish their proportionality to achieve the objectives of regulatory intervention.</p> <p>As regards the gathering and use of biometric data for remote identification purposes in public areas, such as facial recognition, the Commission, is currently assessing the issue, taking account of the identified specific risks and of fundamental rights, notably the data protection rules, and of the views expressed in the resolution.</p>	
4)	35. [...] Asks the Commission and the Member States to ensure that national and Union consumer organisations have sufficient funding to assist consumers in exercising their right to a remedy in cases where their rights have been violated;	No specific reply is provided to this particular point.	Not mentioned.
5)	42. Stresses that the deployment of any artificial intelligence system should not unduly restrict users' access to public services such as social security; therefore calls on the Commission to assess how this objective can be achieved;	No specific reply is provided to this particular point.	Not mentioned.
6)	49. Calls on the Commission to further support the development of trustworthy AI systems in order to render transport safer, more efficient, accessible, affordable and inclusive, including for persons with reduced mobility, particularly persons with disabilities, taking account of Directive (EU) 2019/882 of the	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	European Parliament and of the Council <sup>4</sup> and of Union law on passenger rights;		
7)	58. Calls on the Commission to carry out a study on the impact of AI technology's carbon footprint and the positive and negative impacts of the transition to the use of AI technology by consumers;	7. As regards environmental sustainability, the Commission would like to stress that this topic could also be dealt with in the context of the 2021 revision of the 2018 Coordinated Plan on Artificial Intelligence, which will update on progress of actions and introduce new measures, and is expected to include a new action area dedicated to sustainability. Artificial intelligence, like all digital technologies, may have a significant environmental impact but at the same time can be used to enable applications that address environmental challenges. Artificial intelligence can be used to support the European Green Deal in different ways, either by optimizing existing technologies or by making completely new solutions possible, for example as a result of synergies with EU flagship programmes like Copernicus. Energy consumption of artificial intelligence application scan be notable, especially in the so-called training phase in which machine learning applications 'learn' from very large datasets. The proposed Horizon Europe programme will have a key role in this area. The Commission looks forward to continuing engaging further with the Parliament on this matter.	On 15 December 2021, the Commission published the <a href="#">Horizon Europe Work Programme 2021 - 2022 on Climate, Energy and Mobility</a> .
8)	62. Highlights the benefits of AI for disease prevention, treatment and control, exemplified by AI predicting the COVID19 epidemic before the WHO; urges the Commission to adequately equip ECDC with the regulatory framework and resources for gathering necessary anonymised real-time global health data independently in conjunction with the Member States, so	No specific reply is provided to this particular point.	Not mentioned.

<sup>4</sup> Directive (EU) 2019/882 of the European Parliament and of the Council of 17 April 2019 on the accessibility requirements for products and services (OJ L 151, 7.6.2019, p. 70).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	as, among other purposes, to address issues revealed by the COVID19 crisis;		
9)	80. Recalls that the Commission should examine the existing legal framework and its application, including the consumer law <i>acquis</i> , product liability legislation, product safety legislation and market surveillance legislation, in order to identify legal gaps, as well as existing regulatory obligations;	No specific reply is provided to this particular point.	Not mentioned.
10)	84. Calls on the Commission to propose measures for data traceability, having in mind both the legality of data acquisition and the protection of consumer rights and fundamental rights, while fully respecting Union law such as that concerning data protection, privacy, intellectual property rights and trade secrets;	No specific reply is provided to this particular point.	Not mentioned.
11)	96. [...] Calls on the Commission to present as soon as possible its 'Reinforcement of the Skills Agenda', announced in the White Paper on Artificial Intelligence on 19 February 2020;	No specific reply is provided to this particular point.	Not mentioned.
12)	100. Calls on the Commission to embed cybersecurity capacity-building in its industrial policy in order to ensure the development and deployment of safe, resilient and robust AI-enabled and robotic systems; calls on the Commission to explore the use of blockchain-based cybersecurity protocols and applications to improve the resilience, trustworthiness and robustness of AI infrastructures through disintermediated models of data encryption;	No specific reply is provided to this particular point.	Not mentioned.
13)	113. [...] Calls on the Commission to consult with social partners, AI-developers, researchers and other stakeholders in this regard;	5. The Commission agrees with the Parliament that coordination concerning the governance of artificial intelligence technologies should take place at Union level. In the White Paper, the Commission set out a possible European governance structure in the form of a European	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		framework for cooperation of national competent authorities, in order to avoid fragmentation of responsibilities, increase capacity in Member States, and make sure that Europe equips itself with the capacity needed. The Commission is indeed currently examining the best options for implementation.	
14)	134. Takes note of the Commission's White Paper of 19 February 2020 on Artificial Intelligence and regrets that military aspects were not taken into account; calls on the Commission and on the HR/VP to present, also as part of an overall approach, a sectorial AI strategy for defence-related activities within the Union framework, that ensures both respect for citizens' rights and the Union's strategic interests, and that is based on a consistent approach spanning from the inception of AI-enabled systems to their military uses, and to establish a working Group on security and defence within the High-Level Expert Group on Artificial Intelligence that should specifically deal with policy and investment questions as well as ethical aspects of AI in the field of security and defence; calls on the Council, the Commission and on the VP/HR to enter into a structured dialogue with Parliament to that end;	No specific reply is provided to this particular point.	Not mentioned.
15)	139 [...] Calls on the Commission to take the initiative to assess which bilateral and multilateral treaties and agreements should be adjusted to ensure a consistent approach and promote the European model of ethical compliance globally;	No specific reply is provided to this particular point.	Not mentioned.
16)	144. Stresses the importance of the creation of an ethical code of conduct underpinning the deployment of weaponised AI-enabled systems in military operations, similar to the existing regulatory framework prohibiting the deployment of chemical and biological weapons; is of	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	<p>the opinion that the Commission should initiate the creation of standards on the use of AI-enabled weapons systems in warfare in accordance with international humanitarian law, and that the Union should pursue the international adoption of such standards;</p>		
17)	<p>146. In accordance with the procedure laid down in Article 225 of the Treaty on the Functioning of the European Union, requests the Commission to submit a proposal for a Regulation on ethical principles for the development, deployment and use of artificial intelligence, robotics and related technologies on the basis of Article 114 of the Treaty on the Functioning of the European Union and based on the detailed recommendations set out in the annex hereto; points out that the proposal should not undermine sector-specific legislation but should only cover identified loopholes;</p>	<p>2. The resolution includes a list of high-risk sectors and of high-risk uses or purposes, proposes that the Commission should regularly update it via delegated acts, proposes a 'high-risk' classification based on certain criteria and that those offering products and services that are not considered high-risk can seek a compliancy certification on a voluntary basis. The Commission agrees that there should be a list of use cases that are considered as 'high-risk' and that use cases will have to be identified on the basis of common criteria and of a methodology defined by the legislator. The Commission also agrees that sufficient flexibility should be provided to take into consideration fast technological developments. In light of the Parliament's recommendations, the Commission is examining the exact criteria to determine whether an artificial intelligence application should be considered 'high-risk'. In this context, the exhaustive list of high risk areas proposed in the resolution is a valuable contribution. The Commission believes that in-depth examination and clear evidence are needed to conclude which use cases should fall within a high-risk classification. The Commission doubts that the use of artificial intelligence for military purposes can be regulated under Article 114 TFEU due to its implications for the Common Foreign and Security Policy regulated under Title V of the Treaty on European Union. For products and services that are not considered high risk, the Commission is weighing up possible alternative approaches, such as compliancy label on a voluntary basis as proposed by the Parliament in its resolution.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
18)	147. Recommends that the European Commission, after consulting with all the relevant stakeholders, review, if necessary, existing Union law applicable to artificial intelligence, robotics and related technologies in order to address the rapidity of their development in line with the recommendations set out in the annex hereto, avoiding over-regulation, including for SMEs;	2. The resolution includes a list of high-risk sectors and of high-risk uses or purposes, proposes that the Commission should regularly update it via delegated acts, proposes a 'high-risk' classification based on certain criteria and that those offering products and services that are not considered high-risk can seek a compliancy certification on a voluntary basis. The Commission agrees that there should be a list of use cases that are considered as 'high-risk' and that use cases will have to be identified on the basis of common criteria and of a methodology defined by the legislator. The Commission also agrees that sufficient flexibility should be provided to take into consideration fast technological developments. In light of the Parliament's recommendations, the Commission is examining the exact criteria to determine whether an artificial intelligence application should be considered 'high-risk'. In this context, the exhaustive list of high risk areas proposed in the resolution is a valuable contribution. The Commission believes that in-depth examination and clear evidence are needed to conclude which use cases should fall within a high-risk classification. The Commission doubts that the use of artificial intelligence for military purposes can be regulated under Article 114 TFEU due to its implications for the Common Foreign and Security Policy regulated under Title V of the Treaty on European Union. For products and services that are not considered high risk, the Commission is weighing up possible alternative approaches, such as compliancy label on a voluntary basis as proposed by the Parliament in its resolution.	

#### 4.2.8.3. JURI Resolution 3: EP resolution of 20 October 2020 on a civil liability regime for artificial intelligence

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<p><b>Resolution with recommendations to the Commission on a civil liability regime for artificial intelligence</b></p>	<p>20/10/2020 <a href="#">T9-0276/2020</a> <a href="#">2020/2014(INL)</a> <b>JURI</b></p>	<p><b><a href="#">Letter</a> from Vice-President Maroš Šefčovič received by President David Sassoli on 15 December 2020</b></p>	<p><a href="#">COM(2020)65 final</a>, <a href="#">COM(2021)206</a></p>
<p>1)</p>	<p>8. [...] Urges the Commission to assess whether the PLD should be transformed into a regulation, to clarify the definition of 'products' by determining whether digital content and digital services fall under its scope and to consider adapting concepts such as 'damage', 'defect' and 'producer'; is of the opinion that, for the purpose of legal certainty throughout the Union, following the review of the PLD, the concept of 'producer' should incorporate manufacturers, developers, programmers, service providers as well as backend operators;</p> <p>[...] Calls on the Commission to consider reversing the rules governing the burden of proof for harm caused by emerging digital technologies in clearly defined cases, and after a proper assessment;</p>	<p>The Commission welcomes the European Parliament's resolution, which reflects the importance of EU action on AI. The Commission shares the objectives set out in the resolution, including the endeavour to follow a risk-based approach. It also agrees with the need of providing adequate compensation to victims of AI systems and promoting the roll out of AI. Victims of AI systems should not be less protected than victims of traditional products and services. Victim compensation also influences trust and trust is key for the uptake of these systems. The Commission also agrees that, for promoting the roll out of AI, we should achieve legal certainty and avoid fragmentation of the market through diverging national approaches.</p>	<p>In its reply, in form of a letter of 15 December 2020 from Vice-President Maroš Šefčovič to President David Sassoli, the Commission indicates a legislative response but the "legal form of the future instrument as proposed in the resolution, namely a regulation, might require due reflection in light of the principle of subsidiarity". The Commission recalls that it "is working on a horizontal framework on artificial intelligence that focuses on fundamental rights and safety. In this context, it will ensure consistency and coherence between the various legislative initiatives."</p> <p>The <a href="#">Commission Work Programme 2020</a> announced legislative proposals following-up to the White Paper on Artificial Intelligence, including safety, liability, fundamental rights and data (incl. <a href="#">impact assessment</a>, Article 114 TFEU) to be presented during the first quarter of 2021.</p> <p>On 21 April 2021, the Commission adopted a <a href="#">proposal for a regulation on the Artificial Intelligence Act (2021/0106(COD))</a>, the first ever legal framework on AI, which addresses the specific risks posed by AI systems.</p>
<p>2)</p>	<p>16. [...] The Commission should review that Annex without undue delay, but at least every six months, and if necessary, amend it through a delegated act; believes that the Commission should closely cooperate with a newly formed standing committee,</p>	<p>In line with its better regulation policy, the Commission will ensure adequate consultation of stakeholders as well undertake impact assessment work in order to identify the most appropriate legislative response. Due consideration will be given in particular to avoiding administrative</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	similar to the existing Standing Committee on Precursors or the Technical Committee on Motor Vehicles, which includes national experts of the Member States and stakeholders;	burden, ensuring proportionate obligations in line with the set objectives and avoiding impact on innovation.	
3)	18. Notes that the Commission should assess how the data collected, recorded or stored on high-risk AI-systems for the purposes of gathering evidence in case of harm or damage caused by that AI-system could be accessed and used by the investigating authority and how the traceability and auditability of such data could be improved, while taking into account fundamental and privacy rights;	No specific reply is provided to this particular point.	Not mentioned.
4)	19. [...] Urges the Commission to re-evaluate and to align the thresholds for damages in Union law; is of the opinion that the Commission should analyse in depth the legal traditions in all Member States and their existing national laws that grant compensation for immaterial harm, in order to evaluate if the inclusion of immaterial harm in AI-specific legislative acts is necessary and if it contradicts the existing Union legal framework or undermines the national law of the Member States;	<p>The legal form of the future instrument as proposed in the resolution, namely a regulation, might require due reflection in light of the principle of subsidiarity. In particular, the European Parliament's text proposes strict liability of the operator for the operation of AI-systems with a particular risk profile. That proposal corresponds to one of the elements of the risk-based approach submitted for consultation by the Commission's Report on AI liability. Such an approach is often found in national liability regimes and it is based on the idea that it is the operator who usually decides on the use of a given system and draws a direct benefit from it. The Commission is currently analysing the various options to best achieve the objectives set in the White Paper.</p> <p>As regards the European Parliament's proposal for a broad definition of operator the Commission will assess this in light of the principle of proportionality.</p>	The <a href="#">public consultation</a> took place between 18 October 2021 and 10 January 2022.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
5)	21. [...] The Commission should also assess, without undue delay, the need to revise that Annex to add the AI-system in question to the list;		No specific reply is provided to this particular point.	Not mentioned.
6)	22. Requests the Commission to evaluate the need for legal provisions at Union level on contracts to prevent contractual non-liability clauses, including in Business-to-Business and Business-to-Administration relationships;		No specific reply is provided to this particular point.	Not mentioned.
7)	25. [...] Considers that the Commission should work closely with the insurance sector to see how data and innovative models can be used to create insurance policies that offer adequate coverage for an affordable price;		The Commission takes note of the European Parliament's proposal to couple strict liability with an insurance obligation, for AI applications with a specific risk profile and, concerning non-high-risk AI-systems, to change the burden of proof. These proposals build on some of the elements of the approach submitted for consultation in the White Paper and the Commission Report on AI liability. The Commission will carefully explore these ideas further, taking into account existing frameworks.	
8)	26. Requests the Commission to submit, on the basis of Article 225 of the Treaty on the Functioning of the European Union, a proposal for a Regulation on liability for the operation of Artificial Intelligence-systems, following the recommendations set out in the Annex hereto;		The European Parliament also requests a revision of the Product Liability Directive to adapt it to the digital world. The Commission favours a coherent approach to all questions related to liability in this field and will launch coordinated public consultation and impact assessment work on harmonising national liability laws for AI and on the revision of the Product Liability Directive with a view to adaptations to the digital world and to address the challenges posed by emerging digital technologies. It is also important to stress that the Commission is working on a horizontal framework on artificial intelligence that focuses on fundamental rights and safety. In this context, it will ensure consistence and coherence between the various legislative initiatives.	

## 4.2.8.4. JURI Resolution 4: EP resolution of 10 March 2021 on corporate due diligence and corporate accountability

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
Corporate due diligence and corporate accountability	10/03/2021 <a href="#">T9-073/2021</a> <a href="#">2020/2129(INL)</a> JURI	<a href="#">Letter from Vice-President Maroš Šefčovič received by President David Sassoli on 8 June 2021</a>	The <a href="#">tentative agenda</a> for forthcoming Commission meetings of 26 January 2022 mentioned a proposal on sustainable corporate governance, planned adoption in February 2022. <a href="#">COM(2021)189 final</a>
1)	3. Calls on the Commission to always include, in the external policy activities, including in trade and investment agreements, provisions and discussions on the protection of human rights;	<p>The Commission welcomes the Parliament's recommendations for legislative action and is pleased to underline that it shares the main objectives set out in the resolution. The Commission engaged with the European Parliament from the very beginning of the development of the resolution.</p> <p>The European Parliament proposes a concept of mandatory due diligence in line with the 2011 UN Guiding Principles on Business and Human Rights as well as other relevant international standards that the Commission supports.</p>	<p>The College discussed the EP resolution on 8 June 2021 and Vice-President Maroš Šefčovič confirmed by letter to President David Sassoli that the Commission intends to follow-up on the resolution with a legislative proposal scheduled for 2021 stressing that the Commission has been engaged with the EP from the beginning of its work on the resolution.</p> <p>The Commission takes due note of the initiative scope requested by the EP, mainly the inclusion of SMEs next to large companies, sectors with high sustainability impact and companies operating in the internal market but established outside the EU. The Commission will be attentive to ensure coherence with the proposal foreseen as a response to EP INL to minimise the risk of deforestation, which is in certain aspects complementary to the present one. In addition, the Commission plans to review its decent work agenda and update the 2006 Communication on Decent work for all. It takes note of the EP recommendation for supervision by designated national authorities, of the proposal to harmonise the liability regime across the EU and of making the diligence strategy and risk statement publicly available. The Commission will consider the EP recommendation on stakeholders' involvement in its preparatory work and the private international law aspects will be examined when the Commission evaluates by 2022 the Brussels Ia and Rome II Regulations.</p>

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
2)	4. Asks the Commission to conduct a thorough review of undertakings based in Xinjiang that export products to the Union in order to identify potential breaches of human rights, especially those related to the repression of Uighurs;			
3)	12. Underlines that due diligence strategies should be aligned with the SDGs and Union policy objectives in the field of human rights and the environment, including the European Green Deal, and the commitment to reduce greenhouse gas emissions by at least 55% by 2030, and Union international policy, especially the Convention on Biological Diversity and the Paris Agreement and its goals to hold the increase in the global average temperature to well below 2°C above pre-industrial levels and pursue efforts to limit the temperature increase to 1,5°C above pre-industrial levels; asks the Commission to develop, with the meaningful participation of relevant Union bodies, offices and agencies, a set of due diligence guidelines, including sector-specific guidelines, on how to comply with existing and future Union and international mandatory legal instruments and be in line with voluntary due diligence frameworks, including coherent methodologies and clear metrics to measure impacts and progress, in the areas of human rights, the environment and good governance, reiterates that such guidelines would be especially useful for small and medium-sized undertakings;		<p>As reflected in the resolution, an important issue when designing the Parliament's initiative is its scope. The Commission takes note that the resolution of the European Parliament proposes inclusion of listed and high-risk small and medium-sized enterprises (SMEs) next to large companies, and asks the Commission to identify sectors with high sustainability impact with regard to including SMEs active in such sectors in the scope of the proposal. The impact assessment work will duly consider of the companies to be covered, including as regards SMEs and ways of limiting and alleviating the burden (be it direct or indirect) in particular for SMEs (SME test). Considerations include limiting the scope (e.g. according to size and level of risk of the sector) or limiting certain requirements in line with the proportionality principle as well as providing targeted support (e.g. guidance, tools, funding, technological solutions for traceability). The Commission also notes that the European Parliaments suggests to cover companies that are established outside the European Union when they operate in the internal market.</p> <p>Also, in terms of material scope, the Commission takes note of the broad coverage proposed by the European Parliament resolution, in particular as regards environmental impacts. It will be important to consider how to base requirements on international</p>	The Commission conducted a <a href="#">public consultation</a> on Sustainable Corporate Governance from 26 October 2020 to 8 February 2021.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>environmental agreements and conventions. The Commission will assess thoroughly how those elements can be included in the due diligence requirements while taking into account the development of other instruments addressing in detail obligations in specific areas. With regard to the issue of deforestation, for example, the Commission committed to put forward also in 2021 a legislative proposal to minimise the risk of deforestation and forest degradation associated with products placed on the EU market. The deforestation initiative is complementary to the work on sustainable corporate governance and has also been subject to a legislative own-initiative resolution by the European Parliament (2020/2006 (INL)), to which the Commission committed to follow up. The Commission will be duly attentive to ensuring coherence between the two proposals. As regards human rights, including labour and social rights, the Commission welcomes the references to the International Bill of Human Rights and the ILO fundamental principles and rights at work in line with the UN Guiding Principles on Business and Human Rights.</p> <p>In addition, the Commission plans to review its decent work agenda and update the 2006 Communication on Decent work for all, which will strengthen the role of the EU as responsible global leader in ensuring a just transition and sustainable recovery.</p>	<p>On 21 November 2021, the Commission adopted a <a href="#">proposal</a> for a regulation on deforestation-free products.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
4)	<p>14. Calls on the Commission to honour the principle of policy coherence for development, enshrined in Article 208 TFEU, in future legislation; stresses that it is important to minimise the possible contradictions and build synergies with development cooperation policy to the benefit of developing countries and to increase the effectiveness of development cooperation; considers that, in practical terms, this means actively involving the Commission's Directorate-General for International Cooperation and Development in the ongoing legislative work and conducting a thorough assessment of the impact of the relevant future Union legislation on developing countries from an economic, social, human rights and environmental perspective, in line with the Better Regulation Guidelines<sup>5</sup> and Tool 34 of the Better Regulation Toolbox<sup>6</sup>; notes that the results of that assessment should inform the future legislative proposal;</p>	<p>No specific reply is provided to this particular point.</p>	<p>Not mentioned.</p>

<sup>5</sup> SWD(2017)0350.

<sup>6</sup> [https://ec.europa.eu/info/files/better-regulation-toolbox-34\\_en](https://ec.europa.eu/info/files/better-regulation-toolbox-34_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
5)	21. [...] Calls on the Commission to cooperate with Member States' chambers of commerce and national human rights institutions in providing online tools and information to support implementation of the future due diligence legislation;	<p>The Commission also takes note of the European Parliament's proposals to make the due diligence strategy and the risk statement publicly available. The recent proposal for a Corporate Sustainability Reporting Directive (CSRD) and the work on the proposal on sustainable corporate governance have been coordinated closely in order to avoid duplication of reporting obligations. The Commission notes that the European Parliament's recommendations on publication requirements concern a larger scope of companies than covered by the CSRD proposal (large companies and listed SMEs). The Commission will consider the Parliament's proposals, noting nevertheless that the CSRD also provides for simplified sustainability reporting standards for SMEs within its scope.</p> <p>As regards the recommendations on stakeholder involvement, the Commission considers this issue in its preparatory work, as reflected also in the open public consultation.</p>	The Commission adopted a <a href="#">proposal</a> for a Corporate Sustainability Reporting Directive on 21 April 2021.
6)	24. [...] Calls on the Commission to investigate new technological solutions supportive of establishing and improving traceability in global supply chains; recalls that sustainable blockchain technology can contribute to this goal;	No specific reply is provided to this particular point.	Not mentioned.
7)	27. [...] Calls on the Commission to evaluate and propose tools in order to help undertakings with the traceability of their value chains; [...]	No specific reply is provided to this particular point.	Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
8)	30. Calls on the Commission to propose a negotiating mandate for the Union to constructively engage in the negotiation of a UN international legally binding instrument to regulate, in international human rights law, the activities of transnational corporations and other businesses;	On the elements of the resolution linked to private international law, the Commission will carefully consider them. More generally, relevant private international law aspects of business-related civil claims for human rights violations can appropriately be examined when the Commission evaluates - by 2022 - the Brussels Ia and Rome II Regulations where issues concerning, respectively, international jurisdiction and applicable law are being addressed horizontally. The Commission will consider whether including a possible ancillary measure on overriding mandatory provisions in the sustainable corporate governance initiative, as recommended by the European Parliament, is necessary and compatible with the described overall approach.	
9)	32. Requests that the Commission submit without undue delay a legislative proposal on mandatory supply chain due diligence, following the recommendations set out in the Annex hereto; [...]	No specific reply is provided to this particular point.	Not mentioned.

## 4.2.8.5. JURI Resolution 5: EP resolution of 19 May 2021 on challenges of sports events organisers in the digital environment

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
Resolution on challenges of sports events organisers in the digital environment	19/05/2021 <a href="#">T9-236/2021</a> <a href="#">2020/2073(INL)</a> JURI	<a href="#">Letter from Vice-President Maroš Šefčovič received by President David Sassoli on 22 July 2021</a>	
1)	1. Requests that the Commission, after carrying out the necessary impact assessment, submit without undue delay, on the basis of Article 114 TFEU, a proposal for legislative acts, following the recommendations set out in the Annex hereto;	<p>The Commission shares the view of the European Parliament that sport plays an important role for society and promotes common values of solidarity, diversity and social inclusion. It agrees that the issue of illegal transmissions of live sports events needs to be tackled more efficiently. The Commission highlighted in its Action Plan on Intellectual Property and in its Media and Audiovisual Action Plan, adopted in November and December 2020 respectively, the need to better address the fight against piracy on creative and sport content. The Commission supports the conclusion of the Parliament that any action to fight the illegal transmission of live sports events online should focus on where illegal content streams originate, and not on individual users. Moreover, the Commission also shares the view that illegal transmissions of sport content online are to be distinguished from content legally shared under limitations and exceptions provided for in copyright law, or content shared by journalists for the purpose of informing the general public.</p> <p>Following the statement that the Commission made on the conclusion of negotiations on the Directive on copyright and related rights in the Digital Single Market, the Commission tasked the European Audiovisual Observatory to carry out a mapping study on the existing remedies against online piracy of sport content. The aim is to gather information on the procedures and remedies available in each Member State for sport right owners and broadcasters, as well as on the existing voluntary initiatives. Building on this study, the conclusions of</p>	<p>In its reply in form of letter of 20 July 2021 Vice-President Maroš Šefčovič confirmed to President David Sassoli that the Commission intends to follow-up to the EP resolution after an in-depth analysis of the need for specific rules to better address piracy of sport content with a legislative or any other action in the first half of 2022. A study mapping the <a href="#">existing remedies against online piracy of sport content by the European Audiovisual Observatory</a> was published in 2021, which will serve as a basis for further Commission analysis on the piracy of live sport events and other illegal live streaming contents and on initiatives to be foreseen.</p> <p>Commission considers that any new initiative will have to build on the horizontal provisions on illegal content online in the Digital Service Act in order to ensure complementarity and coherence.</p> <p>Commission will assess also the need to amend the Directive on the enforcement of intellectual property rights as requested by the EP and the possible added value of appointing an independent administrative authority in each Member State for the fight against piracy on the basis of the existing schemes.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>which are expected in autumn 2021, the Commission will complete its assessment of the challenges faced by sport event organisers in relation to the illegal transmissions of live sport events, as a follow-up to its statement. While the Commission's analysis will focus on the piracy of live sport events, it will also take into account the illegal 'live streaming' of other types of content (for example music and other audiovisual content). On this basis, as a next step, the Commission will set out, in the first half of 2022, the legislative or any other concrete actions that it intends to take to address online piracy of live content, including live sport events. For the reasons set out below, these actions will have to build on the horizontal provisions on illegal content online included in the proposal for a Digital Services Act, which the Commission hopes to see adopted rapidly. It is necessary to ensure that the actions that will be proposed complement the Digital Services Act in a coherent manner and respond in the most appropriate way to the proposals contained in the resolution.</p>	<p>From 10 January to 14 February 2022, the Commission carried out a <a href="#">public consultation on the Counterfeit and Piracy Watch List</a>.</p>
2)	<p>10. Underlines that the legal provision of sports content should be better promoted in the Union and calls on the Commission to take measures that make it easier for consumers to find legal means of accessing sports content online; calls on the Commission to regularly update the list of such means of access on Agorateka.eu and to ensure that the platform is further developed; stresses that liability for the illegal broadcasting of sports events rests with the providers of</p>	<p>Furthermore, the Parliament's resolution requests the Commission to promote the findability of legal offers of sports content online, referring in particular to the Agorateka.eu platform. The resolution also underlines the need to ensure that viewers are informed of such legal means and how to use such means to access content when the blocking measures are enforced. The Commission agrees with the European Parliament that the promotion of both the availability and findability of legal offers is an important objective. Agorateka already contains information about legal offers of sport</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	streams and platforms and does not lie with fans or consumers, who often unintentionally come across illegal online content and should be further informed on the legal options available;	content. The Commission will explore together with European Union Intellectual Property Office ways to better promote the offer of sport content through this portal.	
3)	17. Recalls Parliament’s resolution on a Digital Services Act: adapting commercial and civil law rules for commercial entities operating online <sup>7</sup> , which requests the Commission to ensure that content hosting platforms act expeditiously to make unavailable or remove content; is of the view that a mechanism involving certified trusted flaggers, through which an illegal broadcast of a live sports event notified by a certified trusted flagger is immediately removed or access to such a broadcast is disabled, without prejudice to the implementation of a complaint and redress mechanism, should be set up;	<p>Please allow me to outline below in broad terms the Commission’s preliminary views on the specific recommendations included in the resolution.</p> <p>In view of ensuring a better legal framework for ‘notice-and-take-down’ procedures, the resolution calls for a clarification of the meaning of ‘expeditious’ takedown in the Directive on electronic commerce to require the removal of illegal content immediately or as fast as possible and in any event within thirty minutes of the receipt of a notice. In this regard, the Parliament suggests setting up a certification system for ‘trusted flaggers’ whose notices would be deemed accurate and reliable. In addition, the resolution asks the Commission to assess the appropriateness of creating an obligation for online services to perform immediate take-downs, to remove or disable access to illegal sport event broadcasts available on their services. At the same time, it acknowledges that real-time blocking could affect fundamental rights and emphasises the need for safeguards, including respect for the general legal principle of not imposing a general obligation to monitor content.</p> <p>The Commission would like to stress that the proposal for a Digital Services Act harmonises ‘notice-and-take-down’ procedures and creates a certification scheme for ‘trusted flaggers’. These provisions are not intended to cater for the</p>	

<sup>7</sup> Texts adopted, P9\_TA(2020)0273.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>specific needs of the sport sector, as the proposed Digital Services Act aims to create a horizontal framework. Once in force, they could serve as a basis for more specific policy action aimed at ensuring timely removal of illegal live sport content.</p> <p>The Commission will carefully assess the need for additional measures pending the adoption of the proposal for a Digital Services Act. In particular, it will consider whether it is appropriate and proportionate to provide for a specific timeframe to remove illegal live sport content, especially when identified by certified trusted flaggers. In this context, it is important to keep in mind the conditions and circumstances of specific timeframes discussed for other types of illegal content, and in particular the new provisions on removal orders for terrorist content online included in the Regulation on addressing the dissemination of terrorist content online<sup>7</sup>. As regards trusted flaggers, the Commission will look at existing agreements between right holders and online service providers and assess the need for a specific certification scheme. In this context, the Commission reiterates the importance of ensuring the respect of fundamental rights, as mentioned in the Parliament’s resolution.</p>	
4)	<p>20. Notes that injunction procedures are relatively long and usually come into effect after the broadcast has ended; points to the existence of practices developed at national level, such as live injunctions and dynamic injunctions, that have proved to be a means of tackling piracy of sports event broadcasts more efficiently; calls on the Commission to assess the impact and appropriateness of introducing injunction procedures aimed at allowing real-time disabling</p>	<p>The resolution also calls on the Commission to amend the Directive on the enforcement of intellectual property rights by explicitly granting judicial and administrative authorities the power to issue live blocking injunctions and by harmonising the use of dynamic injunctions. The resolution indicates that such measures should be targeted and proportionate and should not lead to arbitrary and excessive blocking of content.</p> <p>As expressed in the Media and Audiovisual Action Plan, the Commission agrees with the Parliament on the need to make</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	of access to, or removal of, illegal online live sports event content, based on the model of “live” blocking orders and “dynamic injunctions”;	<p>injunctions more efficient and easier to obtain. The Directive on the enforcement of intellectual property rights harmonises the use of injunctions across Member States. As explained in the 2017 Guidance on certain aspects of Directive 2004/48/EC, dynamic injunctions – which, along with live injunctions, can already be introduced in their legislation by Member States under the current EU legal Framework – can be an effective means to prevent the continuation of infringements, under the condition that necessary safeguards are provided.</p> <p>Looking ahead, the Commission will assess if there is a need for further measures in this area, on the basis of the results of the above-mentioned study of the European Audiovisual Observatory, in light of the proportionality and subsidiarity principles, and considering the possible impacts on the national judicial systems. In particular, the Commission will look at the effectiveness of dynamic and live blocking injunctions currently used in certain Member States, and at the procedural safeguards.</p>	
5)	25. Calls for cooperation between Member States authorities, right holders and intermediaries to be reinforced; further calls on the Commission, within its remit, to support Member States in their endeavours to improve existing infrastructure and measures;	<p>The resolution also asks the Commission to reinforce the cooperation between Member States’ authorities and between right holders and intermediaries in this area. In particular, in view of creating a network of national authorities responsible for the fight against piracy, the resolution asks the Commission to assess the added value of appointing an independent administrative authority in each Member State for the fight against piracy.</p> <p>As stated in the Media and Audiovisual Action Plan, the Commission believes that national enforcement authorities play an important role in the fight against piracy and that their cooperation can help address the cross-border nature of infringements. However, such national enforcement</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
		<p>authorities only exist in a few Member States. The Commission will look at the experience of those national authorities that already today are entrusted with powers in this area and will consider how to encourage further cooperation and exchange of information between national authorities and courts. As regards the cooperation between sport right owners and online services or intermediaries, the Commission will assess the need for further measures, which could build on the Memorandum of Understanding on online advertising and intellectual property rights. In addition, any approach will need to be coherent with and complement the actions that will be proposed in the context of the EU Toolbox against counterfeiting announced in the IP Action Plan of November 2020.</p>	

#### 4.2.9. LIBE

Between July 2019 and December 2021, the **Committee on Civil Liberties, Justice and Home Affairs (LIBE)** was responsible for fifteen 'ordinary' own-initiative reports (INI) and one legislative own-initiatives report (INL) leading to an adoption of sixteen Parliament's resolutions ('LIBE resolution'). The table below provides a brief summary regarding the data in the adopted INL resolution.

Table 41: Overview on LIBE resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	16
Number of INI parliamentary procedures <sup>1</sup>	15
Number of INL parliamentary procedures	1
Total numbers of the Parliaments' points in all INL procedures	11
Number of Commission reply provided within 3 month deadline <sup>2</sup>	N/R
Number of relevant proposals adopted by the Commission by 31 January 2022	N/R
The main subjects/policy areas of the resolution	- Company law

<sup>1</sup> For more details on INI please see chapter 4.1.

<sup>2</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

4.2.9.1. LIBE Resolution 1: EP resolution of 25 November 2021 on legal migration policy and law

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
<b>Legal migration policy and law</b>	25/11/2021 <a href="#">T9-0472/2021</a> <a href="#">2020/2255 (INL)</a> <b>LIBE</b>	<b>Letter not yet available<sup>3</sup></b>	
1)	2. Requests that the Commission submit, by 31 January 2022, on the basis of Article 79(2) TFEU, in particular points (a) and (b) thereof, a proposal for an act that would serve as a package of proposals to facilitate and promote entry into and mobility within the Union for legally migrating third-country nationals applying for work or already holding a work permit and that, by aligning provisions across the existing legal migration directives, would serve to reduce bureaucracy, enhance harmonisation, promote fundamental rights, such as equal treatment, and prevent labour exploitation, following the recommendations set out in the Annex to this Report; notes that such a new act supporting legal labour migration from third countries and a greater degree of mobility remains one of the main answers to the current mismatches between labour supply and demand;		

<sup>3</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
2)	3. Considers that the creation of a Union talent pool for third-country nationals who wish to apply for work with a view to migrating legally to a Member State, as well as for Union-based employers to search for potential employees in third countries, would be an essential tool for achieving the purpose of the proposed act and calls on the Commission to include the creation of such a talent pool in its proposal; proposes that the Commission include, within the talent pool, a Union talent remote network that would allow third-country nationals to work remotely in a Member State other than the one in which they are residing and the Commission and the Member states to work together to better understand the benefits and challenges of hiring third-country nationals talent remotely, and promote fair remote hiring of international talent; points out that such a network would be optional for Member States to use;		
3)	5. Asks the Commission to take into account Article 15 (1) of the Parliament and Council partial provisional agreement on the Reception Conditions recast Directive, thus reducing the negative impact of forced inactivity until the finalisation of the asylum procedure;		
4)	6. [...] Calls, therefore, on the Commission to make it a priority to include in its proposal an ambitious admission scheme for low and medium-skilled third-country workers in consultation with social partners and civil society, while reflecting the needs of the Member States; calls on the Commission to include the creation of a framework for validation and recognition		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	<p>of the skills and qualifications of third-country nationals, including vocational training, based on objective and uniform criteria, to facilitate their early integration into the labour market; requests that the framework for validation and recognition of skills and qualification ensure that third-country nationals are consistently treated fairly during the validation and recognition process, enable efficient schemes and procedures, and facilitate obtaining information in an efficient and easy way; encourages the Commission to insist that national authorities continue to share information and best practices with one another; calls on the Commission, moreover, to promote by all means possible, including by means of targeted campaigns, the revised Blue Card Directive, including in start-ups and in the IT sector, where skills are recognised equivalently to qualifications as set out in Article 26, read jointly with Annex I, of that Directive; recalls, however, that Article 79(5) TFEU states that that Article “shall not affect the right of Member States to determine volumes of admission of third-country nationals coming from third countries to their territory in order to seek work, whether employed or self-employed”:</p>		
5)	<p>7. [...] Calls on the Commission to include in its proposal a Union-wide admission scheme for the entry and residence of self-employed persons and entrepreneurs based on objective and uniform criteria, in particular for those working to establish small and medium-sized enterprises and start-ups, and of highly mobile self-employed third-country nationals, such as artists and cultural professionals; insists that the schemes proposed must include measures that</p>		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	enhance fundamental rights and promote equal treatment for third-country workers;		
6)	8. Requests that the Commission include in its proposal a framework for talent partnerships with third countries that Member States could opt into on a voluntary basis, tailored to the situation and the benefit of both the sending and receiving countries in question, which should include vocational training programmes based on skills, in particular aptitude tests, workplace observation and simulations; calls on the Commission to ensure that that framework allows for Parliament to be able to fully exercise its scrutiny and evaluation role and that the proposal includes adequate mechanisms to prevent labour exploitation and ensure equal treatment; highlights that inspiration for the talent partnerships can be found in existing skills-based agreements in Member States and that the talent partnerships should be developed in consultation with relevant organisations both in the Member States and in third countries;		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
7)	<p>10. Welcomes the Commission’s planned review of Directive 2011/98/EU; notes that one of the objectives of that Directive is to simplify and harmonise the rules on permits currently applicable in the Member States and to promote equal treatment and that those objectives have not been fully achieved with some of the provisions of that Directive having been implemented in different ways across the Union; considers further that that the Commission should take the necessary steps to ensure first and foremost that that Directive be properly implemented by Member States, secondly that it be amended to allow applications for a single permit to be lodged both from within a Member State and from a third country, and thirdly, in order to further simplify and harmonise the rules, that the procedure for obtaining an entry visa be clearly regulated so as to avoid the situation where applicants would have to submit the documents needed to obtain a single permit twice and to reduce the dependency of workers and the risk of exploitation; points out that the lodging of an application from within a Member State should only be available if the third-country national holds a residence permit at the time the application is lodged; calls on the Commission to include such amendments to that Directive in its proposal;</p>		
8)	<p>11. Requests that the Commission include in its proposal the establishment of a transnational advisory service network, to be managed by the Commission, for legally migrating third-country workers, with each Member State designating a lead authority to process applications and to coordinate the advice and information provided to third-country nationals</p>		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
	applying for work in the Union or already holding a work permit;		
9)	12. Calls on the Commission to include in its proposal an amendment to Directive 2014/36/EU to allow holders of work permits under that Directive a period of three months to seek new employment after having left their previous employer without having their work permit revoked, allowing them to reside legally within the Member State in question until the end of the period they are allowed to stay, but no longer than nine months, as set out in that Directive, provided that they are applying for work at another employer throughout that period; furthermore, in order to avoid labour exploitation, calls on the Commission to encourage Member States to fully apply that provision, thereby delinking residence permits from the employer and the job; calls on the Commission to include in its proposal an amendment to that Directive to allow Member States to renew work permits for the purposes of seasonal work up to a total period of five years;		
10	13. Requests the Commission to include in its proposal an amendment to Directive 2009/52/EC to adapt its scope to include exploited legally residing third-country nationals working in the Union who are victims of conditions that affect their health and safety and violate their human dignity and to improve the enforcement of equal treatment provisions, such as accessible and effective complaints mechanisms and access to justice for all workers in case of exploitation and other criminal offences;		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	Action of the Commission
11)	<p>14. Is of the view that Directive 2003/109/EC, which is currently under used and does not provide an effective right to intra-Union mobility, should be amended to allow third-country nationals who are long-term residents of a Member State to reside permanently within another Member State from the day their permit is issued on terms similar to the terms applicable to Union citizens and to reduce the number of years of residence required to acquire EU long-term resident status from five to three years, and requests the Commission to include those amendments in its upcoming revision of that Directive; acknowledges that continuous residence in one Member State is one of the aspects that promotes the proper integration of a person in a community before that person decides to reside in another Member State; calls on the Commission to include those amendments in its proposal;</p>		

---

This study seeks to present a comprehensive overview of non-legislative resolutions adopted by the Parliament between July 2019 and December 2021 on the basis of own-initiative reports, in the light of the response provided by the Commission, the subsequent follow-up documents and related actions undertaken by the Commission up to 31 January 2022. The publication is part of Parliament's Strategic Execution Framework (2019-2021). The aim of this joint DG PRES and DG EPRS project on 'Improved reporting on European Commission follow-up to European Parliament resolutions' is to facilitate monitoring of the Commission's follow-up to those resolutions.
