# European Commission follow-up to European Parliament requests 2019–2021

---

## Study

This study seeks to present a comprehensive overview of non-legislative resolutions adopted by the European Parliament between July 2019 and December 2021 on the basis of own-initiative reports, in the light of the response provided by the European Commission, the subsequent follow-up documents and related actions undertaken by the Commission up to 31 January 2022. The publication is part of the Parliament's Strategic Execution Framework (2019-2021). The aim of this joint DG PRES and DG EPRS project on Improved reporting on European Commission follow-up to European Parliament resolutions is to facilitate the monitoring of the Commission's follow-up to those resolutions.

## Executive summary

This is the second edition of the study on the European Commission's follow-up to European Parliament requests. While the overall structure of the study remains the same, there are some **noteworthy changes**. First, as this publication covers the first half of the ongoing ninth parliamentary term – from 2 July 2019 to 31 December 2021 – there was a need to set **a cut-off date for all information** that could be used for its purposes. Therefore, only information that was available as of **31 January 2022** was used. More specifically, this information is sourced from the final versions of the Commission's replies to Parliamentary requests and from the **'ordinary' own-initiative reports (INI) and legislative-initiative reports (INL), which are dealt with in separate chapters**. Since the beginning of the ninth parliamentary term, the Commission's replies to INLs are in the form of letters sent by the Commission to the Parliament. These letters are not structured in the same way as the Commission follow-up documents on INIs. Third, this edition also uses a **simplified approach to the types of Commission replies** and uses an updated version for the colour codes used in the tables for INIs. The details on these changes are described in the relevant chapters.

While exercising its scrutiny function, the European Parliament supervises the work of the European Commission in order to uphold the Commission's accountability and foster democratic legitimacy in the European Union. One of the tools allowing Parliament to carry out its scrutiny power is to use resolutions adopted in plenary. Pursuant to point 16 in [the 2010 Framework Agreement](#) on relations between the European Parliament and the European Commission, the Commission agrees to inform the Parliament, in writing, within three months after the adoption of a parliamentary resolution, on action taken in response to specific requests addressed to it in that resolution. Paragraph 10 in [the 2016 Interinstitutional Agreement](#) between the European Parliament, the Council of the European Union and the European Commission on Better Law-Making reinforces that provision with regard to legislative-initiative reports, by stating that the Commission has to reply within three months by adopting a specific communication laying out its proposed mode of action. If the Commission decides not to submit a proposal in response to such a request, it has to inform the institution concerned of the detailed reasons and provide, where appropriate, an analysis of possible alternatives. The Commission also has to respond to any issues raised by the co-legislators in relation to analyses on the European added value and the cost of non-Europe.

It should be stressed that none of the above-cited agreements provides a specific designation for the document by which the Commission should respond to a request by the Parliament. **This study uses the terms 'follow-up' or 'follow-up document'**, borrowed from the response document itself. As already mentioned above, the Commission has also started sending **letters** to the Parliament in reply to its INLs.

This document provides an analysis of Commission follow-up documents, its aim being to **support the European Parliament's scrutiny power over the Commission** and to **facilitate the monitoring of the European Commission follow-up to Parliamentary resolutions**. The study analyses how and to what extent the Commission has reacted to Parliament resolutions and initiatives in its follow-up documents and whether it has fulfilled its promises made in these documents. In addition, the study aims to establish whether Parliament resolutions make reference to European implementation assessments (ex-post evaluations) and European added value assessments prepared by the Parliament's DG EPRS, as background studies supporting implementation reports and legislative own-initiative reports, respectively.

This study covers **193 non-legislative resolutions adopted by the European Parliament between October 2019 and December 2021**, of which 178 are based on ordinary own-initiative reports (INI) and 15 on legislative-initiative reports (INL). The European Parliament's resolutions vary substantially with regard to their content and volume, especially concerning the coverage of policy

areas and the length and number of the requests. Resolutions mostly refer to four main addressees: the European Commission, the EU Member States, the High Representative/Vice President, and the EU as a whole. The study focuses only on the European Parliament's requests **directly and explicitly** addressed to the **European Commission** and the High Representative/Vice President.

In response to the 178 INI resolutions, the **European Commission submitted 102 replies in the form of formal written follow-up documents**, while in 50 cases it informed that it would not be responding formally to the requests addressed in the INI resolutions, as it considered they were comprehensively addressed in plenary. There is no consistent or systematic approach in the way in which the Commission deals with requests for actions by the Parliament. In concrete terms, this means that some Commission follow-up documents are more detailed and structured than others, providing more information, more content and more promises for action. In addition, a better-structured document makes it easier to allocate a specific Commission reply to an individual Parliamentary request. Conversely, some follow-up documents from the Commission do not contain such a structure and are kept rather short, thus providing less information, less content and fewer commitments.

**Of the 15 INLs that the Parliament adopted since the beginning of the ninth Parliamentary term, the Commission replied to 12 in the form of letters** by the cut-off date for this study. The Commission had not yet replied to the remaining three INLs adopted in November and December 2021; nevertheless, it was still within the deadline for replying.

Based on an analysis of the Parliament's non-legislative resolutions adopted between July 2019 and December 2021, and the Commission follow-up documents, the following findings deserve particular attention:

### European Parliament resolutions

- 178 European Parliament resolutions were based on ordinary own-initiative reports (INI) and 15 resolutions on legislative-initiative reports (INL);
- the INIs contained a total of 3 301 Parliamentary requests put to the Commission;
- the INLs contained a total of 212 Parliamentary requests put to the Commission;
- occasionally, the Parliamentary requests concerned issues falling beyond the scope of the Commission's competence, which were consequently, by definition, not to be acted upon by the Commission;

### Commission follow-up documents

- the Commission provided a written answer to 152 out of 178 parliamentary INI resolutions included in this research;
- in 102 cases in the form of a formal follow-up document;
- in approximately 28 % of all INI cases (50 out of 178 documents), the Commission sent its final written reply within the three-month period agreed, whereas in the other cases this period was exceeded;
- in these 50 cases, the Commission sent the European Parliament a document informing that it would not be responding formally to the requests addressed in the INI resolutions.
- the average rate at which the Commission replied to individual Parliamentary requests was approximately 53 % of the total number of requests;
- the study identified three main types of replies provided by the Commission, namely, specific replies, general replies and a combination (mixed type) of the two; specific replies accounted for approximately 55 % of all three types of replies;
- in 57 % of the cases, the Commission provided its reply without proposing or promising to take further action;
- in 43 % of the cases, the Commission promised or proposed to take action;

- the Commission provided a written answer (in the form of a letter) to 12 out of the 15 parliamentary INL resolutions included in this research;
- as regards 26 INI procedures and 3 INL procedures, the replies by the Commission were not available by 31 January 2022 (cut-off date for this publication).

#### European added value assessment and European implementation assessment

- eight out of 11 European added value assessments supporting legislative reports and one exceptional ordinary own-initiative report (which was initiated on the basis of INL procedure authorisations) adopted between October 2020 and October 2021 were referred to in Parliament's resolutions;
- ten out of 16 European implementation assessments and ex-post evaluations supporting own-initiative reports adopted between September 2020 and November 2021 were referred to in Parliament's resolutions, while only 1 European implementation assessment (ex-post evaluation) was mentioned in Commission follow-up documents.

The data for the analysis, the analysis and the database were jointly produced by the Interinstitutional Relations Unit (IRU), DG PRES and the Ex-Post Evaluation Unit of the European Parliamentary Research Service (EPRS).

# 1. Introduction and methodology

## 1.1. General introduction

One of the European Parliament's scrutiny functions is to oversee the work of the European Commission in order to uphold the Commission's accountability and foster democratic legitimacy in the European Union. There are several instruments that allow the European Parliament to exercise these powers given to it by the Treaties.<sup>1</sup> An important instrument is the one enabling the Parliament to use the **resolutions adopted in plenary and request the Commission to provide explanations, carry out actions or start legislative procedures**.

The European Parliament uses its resolutions to convey its political positions and call on the Commission to take new legislative or political initiatives. The Parliament adopts **legislative and non-legislative resolutions**. Legislative resolutions concern its position in relation to proposed legislation, whereas non-legislative resolutions are based on own-initiative reports and topical resolutions. While both the latter types of resolutions are non-binding, they can include requests by the Parliament to the Commission to take specific action and to inform the Parliament whether and to what extent the Commission intends to take action.<sup>2</sup>

**Despite the fact that non-legislative resolutions are not binding**, pursuant to point 16 of the Framework Agreement on relations between the European Parliament and the European Commission (FA) and paragraph 10 of the Interinstitutional Agreement between the European Parliament, the Council of the European Union and the European Commission on Better Law-Making (IIA BLM) (Article 225 TFEU (INL)), **the Commission has agreed to inform the Parliament in writing, within three months of the adoption of a Parliamentary resolution, on action taken in response to specific requests addressed to it in Parliamentary resolutions**. According to these provisions, the Commission is to reply to the cases where it has not been able to act according to the positions adopted by the Parliament. In case of urgent requests, both provisions allow for a shortening of this period. At the same time, this period can be extended by a month. The FA does not include any further specifics regarding the character of this follow-up document. Point 16 of the FA notes that such follow-up communication is to be in written form. The Parliament should endeavour to avoid asking oral or written questions concerning issues on which the Commission has submitted a written follow-up document.

Furthermore, paragraph 10 IIA BLM requires the Commission, pursuant to Article 225 of the Treaty on the Functioning of the European Union (TFEU), to give 'prompt and detailed consideration to requests for proposals for Union acts' made by Parliament. In this case, the Commission should reply to these requests within three months, while it should also adopt a specific communication explaining the intended follow-up. Moreover, if the Commission decides not to submit a proposal, it needs to provide detailed reasons for its decision and, where appropriate, also an analysis of possible alternatives. It should also reply to issues raised by the Parliament concerning European added value and the cost of non-Europe. In addition, the Commission has to present its reply before the Parliament or the Council, if so requested. The provisions of both agreements have to be read in conjunction (paragraph 10 of IIA-BLM and point 16 of the FA, the last covering both legislative and non-legislative resolutions of the EP). Rule 46 of the Rules of Procedure of the European Parliament (ROP), sets specific procedural rules for requesting that the Commission submit a legislative proposal amending an existing act or leading to a new legislative act. Parliament does this by means

---

<sup>1</sup> See, for example, Remáč M., [Parliamentary scrutiny of the European Commission: Implementation of Treaty provisions](#), EPRS, European Parliament, July 2019.

<sup>2</sup> Remáč M. and Zana-Szabo G., [European Commission follow-up to European Parliament requests 2017-2019](#), EPRS, European Parliament, June 2020.

of a resolution (on the basis of an own-initiative report), adopted by a majority of its component Members.<sup>3</sup>

**Non-legislative Parliament resolutions are generally based on own-initiative reports prepared by one or several parliamentary committees.** Currently, the Decision of the Conference of Presidents of December 2002<sup>4</sup> recognises **five types of own-initiative reports**:

- legislative-initiative reports;<sup>5</sup>
- strategic reports;<sup>6</sup>
- non-legislative own-initiative reports;<sup>7</sup>
- annual activity and monitoring reports as listed in Annex 1 of the 2002 Decision;
- implementation reports on transposition into national law, implementation and enforcement of the Treaties and other Union legislation, soft law instruments and international agreements in force or subject to provisional application.<sup>8</sup>

Rules concerning these reports are included in the Parliament's Compendium of Rules and in the amended version of the 2002 Decision.

The present study covers **European Parliament non-legislative resolutions adopted between July 2019 and December 2021** and based either on **ordinary own-initiative reports (INI)** or on **legislative-initiative reports (INL)**. The latter correspond to the first type of own-initiative reports listed above, while ordinary own-initiative reports can take the form of the remaining types of own-initiative reports listed above.

<sup>3</sup> A proposal for a Union act on the basis of Article 225 TFEU can be tabled by any Member but also jointly by up to ten Members. It has to include the legal basis and can contain an explanatory statement of a maximum of 150 words. The President of Parliament, to whom such a proposal should be submitted, can refer it to the committee responsible for an opinion. The proposal is announced in the plenary and referred to the responsible committee if the President declares it admissible. The proposal has to be translated into those official EU languages that are considered necessary in order for a summary consideration to be possible. The responsible committee should then take its decision within three months of the referral, during which the authors of the proposal can address the committee. According to this rule, the Conference of Committee Chairs (CCC) has to monitor whether the Commission fulfils its obligations according to point 10 IIA BLM regularly. The CCC has to report to the Conference of Presidents regularly.

<sup>4</sup> See in this case, Decision of the Conference of Presidents of 12 December 2002, which sets out the procedures for the authorisation of own-initiative reports. This decision was originally annexed to the Parliament's Rules of Procedure as Annex XVII – procedure for granting authorisation to draw up own-initiative reports. In 2020, this annex was no longer part of the Rules of Procedure. However, the 2002 Decision was amended by a decision of the Conference of Presidents of 26 June 2003 and was consolidated on 3 May 2004. It was further amended as a result of decisions adopted in plenary on 15 June 2006 and 13 November 2007 and by decisions of the Conference of Presidents of 14 February 2008, 15 December 2011, 6 March 2014 and 7 April 2016, by corrigendum of 15 July 2016 and by a Decision of the Conference of Presidents of 3 April 2019.

<sup>5</sup> These own-initiative reports are based on Article 225 TFEU and are presently discussed in Rule 46 of Parliament's Rules of Procedure. According to this TFEU provision, Parliament can request the Commission to submit any appropriate proposal on matters on which it considers that a Union act is required for the purpose of implementing the Treaties. For further reading see, for example:

Vavrik P., [Contribution of the European Parliament to multilevel governance Building on a potential for a fuller right of legislative initiative for the European Parliament](#), DG ERPS, European Parliament, March 2017.

[The European Parliament's right of initiative](#), Policy Department for Citizens' Rights and Constitutional Affairs, European Parliament, July 2020.

<sup>6</sup> These reports are drawn up on the basis of non-legislative strategic and priority initiatives included in the Commission work programme.

<sup>7</sup> These reports are not drawn up on the basis of a document of another Institution or body of the European Union, nor are they drawn up on the basis of a document forwarded to Parliament for information, without prejudice to Article 2(3) of the 2002 Decision.

<sup>8</sup> Annex 3 of the 2002 Decision includes description of specific rules on implementation reports.

The goal of this joint DG EPRS and DG PRES study is to **support the European Parliament's scrutiny of the Commission, by facilitating the monitoring of the European Commission's follow-up to European Parliament resolutions**. This study thus analyses how and to what extent the Commission has reacted to Parliament resolutions and initiatives in its follow-up documents and whether it has fulfilled its commitments or promises made in these documents. A first edition of this study, covering the second half of the eighth parliamentary term, was published in 2020<sup>9</sup> and builds on the experience of a previous pilot project whose results were published in 2017.<sup>10</sup>

In addition, the study aims more specifically to establish whether the Parliament in its resolutions and the Commission in its follow-up documents refer to two specific kinds of research publications prepared by the Parliament's DG EPRS: European implementation assessments (ex-post evaluations) and European added value assessments or similar publications.

However, it is worth mentioning that the findings and results reported in this publication should be considered in the light of some limitations. It should be stressed that **the main data and information are derived exclusively from European Parliament resolutions and Commission follow-up documents**. Moreover, the verification of Commission commitments mentioned in the Commission follow-up documents is subject to a cut-off date (31 January 2022). In addition to that, the study merely looks at **references to EPRS studies** made in European Parliament resolutions and Commission follow-up documents. Analysing **to what extent EPRS products influence and feed into the work of the Commission beyond its follow-up documents would exceed the scope of this study**.

This study can be used as a **tool for monitoring the Commission's commitments and intentions**, and – depending on the reader's interests and objectives – also together with the other rolling check-lists produced by the Ex-Post Evaluation Unit of EPRS, in particular:

- [Review Clauses in EU Legislation: A Rolling Check-List](#) provides a comprehensive overview of review clauses, i.e. review, evaluation and reporting provisions, contained in recent EU legislative acts and programmes.
- [Evaluation in the European Commission: Rolling Check-List and State of Play](#) provides a comprehensive overview of on-going and planned ex-post evaluations of EU legislation and spending programmes conducted by the Commission, as well as of the mechanisms underpinning them.<sup>11</sup>

These research and analysis tools complement each other and allow the reader to get an overview of the relevant information available in a given policy area or on a specific legislative act with regard to reporting, monitoring and evaluation. They therefore constitute a comprehensive toolbox at the service of Parliamentary committees and Members.

## 1.2. Methodology, research approach and explanation of terminology

The study is based on desk research. All the data included in the research and in the annexed database are publicly available.<sup>12</sup> The majority of the data are published on the websites of the

---

<sup>9</sup> Remáč M. and Zana-Szabo G., [European Commission follow-up to European Parliament requests 2017-2019](#), EPRS, European Parliament, June 2020.

<sup>10</sup> Osiac R. and Huber S. with Zana G. and Malmersjo G., [European Commission follow-up to European Parliament requests – A Rolling Check-List](#), EPRS, European Parliament, January 2017.

<sup>11</sup> A revised version of this publication is planned for 2022.

<sup>12</sup> For explanations on the database, see point 1.3.1.

European Parliament (mainly the **Legislative Observatory (OEIL)** website) and on the **websites of the European Commission**.

### 1.2.1. Time limitations of the study

Both general and specific analyses made in this study are based on European Parliament resolutions adopted between **July 2019 and December 2021**.

Furthermore, a cut-off date for an assessment of the Commission's promised or intended actions had to be applied. In order to provide a consistent picture of these actions while delivering the study, only those actions that were taken by the Commission by **31 January 2022** were included in the assessment (see the annexes). It is duly noted that the Commission might possibly not have had enough time to fulfil all the actions it had proposed in the last months of 2021.

### 1.2.2. Selection of resolutions

The starting point for this analysis is a data collection exercise carried out by the DG PRES IRU between 2019 and 2021. For the purposes of this particular assessment and study, specific databases linked with individual committees of the European Parliament are prepared by the DG EPRS EVAL unit on the basis of an assessment of all the documents provided by IRU. Furthermore, the validity of all the data, i.e. 1) the text of the Parliament resolutions and 2) the text of Commission follow-up documents, is checked against the information published on the [Legislative Observatory \(OEIL\)](#).

The present publication focuses on **193** Parliament resolutions adopted between **July 2019 and December 2021** and to which the Commission replied **before the cut-off date of 31 January 2022**.<sup>13</sup>

The study exclusively focuses on two main types of Parliament own-initiative reports, as the remaining types of resolutions do not fall within the scope of either EVAL's or the IRU's competences:

- the legislative-initiative reports (INL) and
- the other types of own-initiative reports (INI).

At the same time, the study does not analyse or include resolutions for which no **'formal follow-up document'** was provided. These are resolutions to which the Commission decided not to reply formally, either because the Commissioner or the High Representative/Vice President present during the Parliament's debate had already answered the points raised by Parliament, or the Commission was preparing new measures or Parliament had not requested any specific action.

Furthermore, the study only takes into account the **English language version of Parliament's resolutions** and **the English language version of the Commission follow-up documents**.

### 1.2.3. Parliamentary requests

#### Selection and typology of Parliamentary requests

The European Commission has been addressed in various ways by the European Parliament's resolutions. The Parliament's approach to the Commission covers a wide range of different views, as it ranges from appraisal of the Commission's actions to deploring some of them. Parliamentary resolutions however also include various types of wording in which Parliament addresses its requests to the Commission. In this regard, the wording of the resolutions includes different variations of the Parliament's requests. Because of that, as noted above, only those **Parliamentary requests which directly and explicitly require the European Commission (the Commission, the**

---

<sup>13</sup> This is not a total number of resolutions adopted by Parliament during this period. For the reasons for this number please see the following section.

**European Commissioner, the Commissioner and the High Representative of the Union for Foreign Affairs and Security Policy) to take a certain action** are included in the research. This includes the cases in which the Parliament:

- CALLS ON the Commission;
- REITERATES / REPEATS / RENEWS / REAFFIRMS ITS CALL on the Commission;
- RECALLS to the Commission;
- REQUESTS the Commission;
- URGES the Commission;
- INSISTS that the Commission;
- ASKS the Commission;
- DEMANDS that the Commission;
- EXPECTS that the Commission;
- INVITES the Commission;
- ENCOURAGES the Commission.

Compared with the previous edition, which covered Parliamentary resolutions of the second half of the 8th parliamentary term, the wording used in Parliamentary requests changed slightly during the 9th parliamentary term. This updated framework provides **minimum standards** for the analysis of Parliament resolutions in order to distinguish urgent requests from mere remarks or comments.

The preliminary research shows that the Commission as a collegiate body also replies in a form of follow-up documents to the requests addressed to the High Representative. In some cases, parliamentary requests are directed to a number of other actors, such as, for instance, the European Investment Bank, the European Central Bank, European agencies or supervisory authorities, which are mostly related to the main subject or policy area of the resolution. It also occurs that a Parliament request does not contain any information on the addressee, which makes it often difficult to identify the responsible party.

**All** abovementioned requests and their assessments were included and analysed for the purposes of this study. Hence, the study does not cover those Parliamentary requests that are:

- not addressed to anybody in particular;
- addressed to 'the EU';
- addressed to 'the EU institutions' in general;
- addressed to Member States only;
- addressed to other EU bodies or institutions;
- addressed to other stakeholders.

### 1.2.4. The Commission follow-up documents

According to point 16 in the FA and paragraph 10 IIA BLM (Article 225 TFEU (INL)), upon the adoption of a Parliament resolution, the Commission is **committed to provide written information** to Parliament. In cases covered by paragraph 10 IIA BLM (Article 225 TFEU (INL)), a formal communication is required. This information should propose actions envisaged to be taken on the individual requests raised in a Parliament resolution. Typically, this document should be **submitted within three months after the adoption of a resolution**. However, that period can be shortened for urgent reasons; whenever there is an intensive workload involved, it can also be extended by a month.

A Commission follow-up document is structured in three main parts. The first part contains key information about the resolution, which identifies the title and reference number of the resolution, the date of adoption and the responsible parliamentary committees. The second part sets out a brief analysis or assessment of the resolution and requests made in it. This provides an overview of the Commission's interpretation of the Parliament resolution and specifies the main Parliamentary requests that the Commission is addressing. In the third part, the Commission provides its responses to Parliamentary requests, as well as actions taken or intended to be taken.

Commission follow-up documents are published on the [Legislative Observatory \(OEL\)](#) in the documentation gateway of Commission documents in the relevant procedure file.

This study takes into account all Commission follow-up documents sent to Parliament after the adoption of a European Parliament resolution. It should be mentioned that follow-up documents submitted later than the agreed deadline of three months are, irrespective of their delay, still included in this research, as long as they had arrived before the cut-off date for the study (31 January 2022).

### 1.2.5. Follow-up commitments and actions by the Commission

Commission commitments included in the follow-up documents as a reaction to Parliamentary requests and potential subsequent Commission actions are another important issue that needs to be explained from the standpoint of this study.

When replying to Parliamentary requests, the Commission often issues remarks or points towards already existing initiatives, studies or other such actions or publications. In some cases, the Commission also offers promises or expresses its intentions to take a specific action or explains why it does not intend to take any further actions. This study starts with a hypothesis that not all the replies of the Commission included in follow-up documents contain commitments.

The study considers a **promise by the Commission as an assurance and expression of a commitment to implement a certain action in order to fulfil a specific request of the Parliament**. A commitment undertaken by the Commission to a certain request of the Parliament gives the responsible Parliamentary committee a reason to expect the practical implementation of the promise in question. Thus, if the Commission in its follow-up document promises to carry out a certain action, it is up to the Parliament to assess whether the Commission has fulfilled its promise.

Similarly, concerning the nature of the promise itself, because of ambiguity or insufficient access to relevant information, it is sometimes unclear whether the Commission has actually implemented a promised action.

Furthermore, the study considers that a Commission action is the process whereby the Commission fulfils the promise it made to the Parliament in its follow-up document, within a certain (specified or not) point in time. The result of this action would typically be identical or at least related to the intention behind Parliament's initial request.

## 1.2.6. European implementation assessments and European added value assessments

DG EPRS supports the work of the Parliamentary committees through its specialised publications. Two of these publications are published as a reaction to Parliament's intentions to adopt implementation reports and legislative-initiative reports. These publications are usually European implementation assessments and European added value assessments.

A **European implementation assessment** is a core background document for committees when they prepare an implementation report on the national transposition of an EU policy or law and its implementation into national law and enforcement in Member States. It gives committees an evidence-based evaluation of the relevance, impact, effectiveness and efficiency of the EU action they scrutinise. A European implementation assessment ideally feeds into the design of modified proposals and is therefore a key component in the process of improving existing legislation.

**European added value assessments** are drawn up by the European Added Value Unit (EAVA) of the European Parliament's DG EPRS. They automatically accompany all legislative-initiative reports (INL reports) authorised by the Parliament's Conference of Presidents and tabled by committees under Article 225 TFEU. They evaluate potential impacts and identify the costs and benefits of proposals made in INL reports.

Over the period covered by the study, EPRS published several **ex-post evaluations** and **implementations in action** to support the work of Parliamentary committees on implementation reports.<sup>14</sup>

## 1.3. The database and how to read it

### 1.3.1. Committee cards

The prevalent part of the information in this study is presented in the form of a database organised in annexes. The annexes are organised into individual 'committee cards'. Each committee card contains resolutions that were adopted by the plenary, while the respective committee prepared a report leading to such a resolution. Thus, the resolutions included in individual committee cards were grouped according to the committees' remit, i.e. all the resolution for which a particular committee delivered a report were grouped together. Similarly, in cases where two committees were responsible for a report, these resolutions were included in one committee card. The committee cards contain the data found on the basis of an analysis of three main datasets:

- 1 the **Parliament's requests** included in 193 resolutions adopted between July 2019 and December 2021;
- 2 the 102 **Commission follow-up documents** adopted as a consequence of the Commission's promise given in the FA or in IIA BLM and the Parliament resolutions; the 50 **documents informing that the Commission would not be responding formally** to the requests addressed in the INI resolutions,<sup>15</sup> and the **Commission replies by letter** to 12 INLs;
- 3 the **actions proposed by the Commission** in its follow-up documents as a consequence of the Commission's reply to the request and the present status of these actions.

<sup>14</sup> For more information about other EPRS publications, see Hiller W., [European Parliament work in the fields of Impact Assessment and European Added Value – Activity Report for July 2019 to December 2020](#), DG EPRS, European Parliament, March 2021.

<sup>15</sup> The study does not cover the responses to 26 resolutions due to the cut-off date (31 January 2022).

**The present study includes 27 committee cards for 'ordinary' own-initiative reports (INI).** In the majority of cases, the resolutions are based on a report of a single standing Parliamentary committee (20). In seven cases, the committee card includes an analysis of the reports of a configuration of two committees that were jointly responsible.

The cards included in the annexes are organised alphabetically.

In addition to the replies to the INIs, this study also contains separate **committee cards on the legislative-initiative reports**. In her [political guidelines](#) for the 2019-2024 term of the Commission, Commission President Ursula von der Leyen committed to responding with legislative acts whenever the European Parliament adopts resolutions requesting that the Commission submit legislative proposals, in full respect of the proportionality, subsidiarity and better law-making principles. From the beginning of the ninth parliamentary term in 2019, the Commission replied to these INIs in the form of letters sent to the European Parliament. These letters are not structured in the same way as the Commission follow-up documents on INIs. Due to the different approach taken by the Commission, INIs have been treated differently in the present study: while the tables on INIs have the same structure as for INIs (three columns with the Parliament request, Commission reply and Commission action), they contain no colour coding and are presented in a separate chapter.

### 1.3.2. How to read individual committee cards

Each committee card for INIs includes two types of information:<sup>16</sup>

1) a **table** providing an overview of the text contained in Parliamentary requests, Commission follow-up documents and Commission actions; and 2) an analysis of the Commission follow-up documents and Commission actions, which is further elaborated on below.

Both parts of the individual committee cards (table and analysis) are to be read together, since very often the information included in the analysis refers to particular issues linked to individual resolutions or follow-up documents. Within the tables, access to the texts of both Parliament resolutions and Commission follow-ups is ensured through active internet links to the [Legislative Observatory \(OEIL\)](#).

In addition, every committee card contains a small section providing a key interpretation of the colour coding applied in the subsequent larger analysis of each resolution adopted by the respective committee and the corresponding Commission follow-up document.

#### Overview table

In its table, each committee card includes information about:

- the number of relevant Parliamentary resolutions adopted between July 2019 and December 2021;
- the number of INI Parliamentary procedures;
- the number of INL Parliamentary procedures;
- the number of Commission written follow-up documents;
- the number of INI procedures to which the Commission did not send a formal written response;
- the number of INI procedures to which the Commission did not respond before 31 January 2022;
- the number of Commission written follow-up documents provided within the three-month deadline;
- the total number of requests by the Parliament in all INI procedures;

---

<sup>16</sup> Committee cards for INIs and INLs in principle follow the same structure, but those for INLs are shorter and do not contain charts or written analyses, due to the low number of INLs adopted during the studied period.

- the number of Parliament's points not replied to by means of a written follow-up document;
- the number of the Parliament's points that were not replied to because of the cut-off date.

In addition to that, the table contains charts informing about:

- type of written follow-up document (specific, general, mixed);
- type of the reply to each particular request by the Parliament;
- action taken by the Commission;
- the number of Commission follow-up replies;
- the actions proposed by the follow-up documents.

Furthermore, the analysis informs about the main policy areas addressed by the resolutions or their subject.

### Specific analysis

Each committee card also contains a short **written analysis of the main specific findings**. In order to increase the legibility and comparability of different committee cards, the specific analysis included in individual committee cards is laid out in the same way in all the committee cards. This part of the committee cards includes **an assessment of the Commission follow-up and Commission actions**.

The information included in the analysis cannot be perceived as an official position of the European Parliament.

#### The first column – Resolution

The first two rows of this column provide the **main information about the resolution** – name, date of adoption, number of the resolution and procedure number. The latter two include, in the electronic version of the study, a web link to the publicly accessible European Parliament websites, with the text of the resolution in question and information about the file.

Furthermore, this column includes the text of **the Parliamentary requests addressed to the Commission** as included in the resolution (see section 1.2.3).<sup>17</sup>

#### The second column – Commission follow-up, Commission reply/commitment

The first two rows of the second column provide the **main information about the Commission's follow-up document** that was adopted as a reply to the Parliament resolution. It includes its number and the date of its adoption by the Commission. In the electronic version of the study, the number is hyperlinked to the publicly accessible European Parliament website with the text of the follow-up document in question. This column also identifies the type of reply provided by the Commission to the Parliament.<sup>18</sup>

Furthermore, when possible, **this column lists the Commission's reply to a particular Parliament request**. It directly quotes the text from within the follow-up document that addresses the Parliament request. If no particular reply was provided to a specific Parliament request, this circumstance is highlighted in this column by means of a 'traffic lights' system:

- **red colour** means that no specific reply for a particular request was identified;

<sup>17</sup> To find out more about the specific conditions under which requests were included into the database, please refer to the methodology of this study.

<sup>18</sup> To find out more about the analysis of specific characteristics and the grouping of the Commission's replies that were included in the database, please refer to the methodology of this study.

- **green colour** means that it was possible to identify a specific Commission reply;
- **orange colour** means that it was possible to identify a Commission reply, although the reply did not mention the specific point of the Parliament's request;

### The third column – Action of the Commission

In some cases it is possible to identify in the Commission reply a **specific action the Commission promised, proposed or announced in direct connection with the Parliament's request**.<sup>19</sup> These actions are shown in this column as it assesses whether the Commission complied with its promises or not. Occasionally, this column includes several actions to commitments that were identified in the Commission follow-up document.

Similarly, as in the previous column, this is highlighted by means of a 'traffic lights' system, where:

- **green colour** signals that the Commission action has been performed;
- **dark blue colour** informs that no further specific Commission commitments were identified;
- **light blue colour** means that no further specific Commission commitments were identified as, according to the Commission, it had already been working on action falling within the scope of the Parliament request;
- **yellow colour** means that the Commission is currently performing the specific action;
- **purple colour** means that the wording of the commitment and /or the information found were too general in character, making it unclear whether the promise had actually been fulfilled or not;
- **black colour** when no action is mentioned. This corresponds to the red colour of the second column.

The Commission commitments to a certain action were checked against the information included on its official websites, website of the European External Action Service, the EUR-Lex database and, when necessary, also the EU agencies. Only publicly available documents were reviewed. This exercise thus also considered the transparency of information provided on the Commission websites.

---

<sup>19</sup> For more about the actions see the methodology.

## 2. Main findings

### 2.1. General findings

Some 152 out of 178 Parliamentary resolutions on INIs included in the study received a follow-up document from the Commission, 102 in the form of follow-up documents and 50 in the form of a document informing that the Commission would not be responding formally to the requests made in the INI resolutions. The study does not cover the responses to 26 resolutions due to the cut-off date of this study (31 January 2022). By the cut-off date, the Commission had also replied to 12 out of 15 INIs. The remaining three INIs were adopted in November and December 2021; the Commission was therefore still within the three-month period for replying to them.

#### 2.1.1. Requests included in Parliamentary resolutions

In total, **3 301 Parliamentary requests were put to the Commission in INIs and 212 in INLs**. Although the role of this study is not to assess the quality or character of the requests included in Parliamentary resolutions, this study picked up several recurring points that deserve a comment. Below are examples of these points, which could possibly improve the Commission's reply rate to specific Parliamentary requests.

#### Types of resolutions

The main findings of this analysis related to Parliament requests are based on **193 European Parliament resolutions adopted between July 2019 and December 2021**, based on ordinary own-initiative reports (INI) or on legislative-initiative reports (INL). With **178 files**, the majority of the resolutions covered were based on **ordinary own-initiative reports (INI)**, while only about 8% (**15 resolutions**) were subject to **legislative-initiative reports (INL)**. Due to the low number of INL reports and the different way the Commission reacted to the resolutions, it is difficult to draw reliable and replicable conclusions from a comparison between the two different procedures.

#### Character of Parliamentary requests

As in the case of the previous edition, it could be observed in general that the overall structure of Parliamentary requests stemming from different resolutions is rather similar. Although the amount of requests sometimes (considerably) varies, it typically **starts with an instructing verb**, followed by **the recipient to whom the request is addressed**.

Based on the verb used, the various phrases differ to some extent in the '**degree of command**' they convey. For example, when the Parliament 'welcomes' a Commission decision, the expression of its political position and request appears to be much weaker, as opposed to when employing verbs such as 'urging', 'requesting', 'insisting' or 'expecting'. Therefore, only the wording used in Section 1.2.3 (Parliamentary requests) was considered for the purposes of this study.

Similarly, when addressing a request to the Commission, it seems relevant to **explicitly refer to the Commission as the addressee of the request**. The requests made in some resolutions are not phrased in a way that refers to a specific addressee, or are addressed to the European Union as a whole. Such requests were consequently excluded from the analysis of the present study.

Overall, resolutions based on the reports of joint committees (e.g. AGRI/ENVI, LIBE/FEMM) contain a higher number of Parliamentary requests than the resolutions based on reports coming from a single standing committee. This discrepancy seems to be explained by the fact that joint committees usually prepare a single report yet have to consider requests coming from each of the committees involved. Resolutions by some single committees (e.g. ENVI, INTA) also contain a relatively high number of requests on average.

Occasionally, **one point raised by the Parliament contains several requests to the Commission**. The following example, taken from a resolution by the IMCO committee,<sup>20</sup> illustrates this characteristic. This resolution contains a point 6 with seven different requests, which are all directly addressed to the Commission. In such cases, when referring to the individual requests within one point, this study confers an **additional alphabetical reference to the requests** in order to distinguish between multiple calls on the Commission. In practice, the abovementioned example is referred to as 'point 6a' to 'point 6g'.

### Requests going beyond the Commission's competences

At times the Parliament made requests about issues within the competences of the Member States or some other EU body or institution or other stakeholder. The **actions to be taken were beyond the Commission's remit**, and could not therefore, by definition, be tackled by the Commission. In these cases, the Commission usually pointed to this fact in its follow-up document.

Another observation concerns **requests for documents (publications) that already exist or for actions that have already been taken**. However, due to the time lapse between the adoption of a resolution and the publication of a follow-up document (see the following section), it can happen that when the Parliament made its request, no such publication existed. Although these cases are kept to a minimum, they are important elements to be addressed when expecting the Commission to give a detailed and specific reply to a Parliamentary request.

### 2.1.2. Follow-up documents

The following section provides the main analytical findings concerning the 102 Commission follow-up documents and the 50 references to the Parliamentary debates in reply to INIs and 12 Commission letters in reply to INLs.

#### Reply time

Pursuant to FA and IIA BLM, the Commission agreed to submit a follow-up document to each European Parliament resolution. Both agreements stipulate that within three months of the adoption of a Parliamentary resolution, the Commission should submit a written response to Parliament, setting out potential reactions or actions taken in response to specific Parliamentary requests. In cases covered by paragraph 10 IIA BLM (Article 225 TFEU (INL), a formal communication is required. **Between October 2019 and January 2021, the Commission provided a written reply (entitled 'follow-up to the European Parliament non-legislative resolution') to 102 out of 178 parliamentary INI resolutions** included in this research. Additionally, in 50 cases, the Commission sent the Parliament, within the three-month period, a document informing that it would not be responding formally to the requests addressed in the INI resolutions. In many cases the Commission added that the requests were comprehensively addressed in plenary during the debate the day before the adoption of the resolution, by the Commissioner or HR/VP attending the plenary. Finally, in 26 cases, the Commission had not sent its official reply by the cut-off date for the present study.<sup>21</sup> **In approximately 33 % of the cases** (50 out of 152 documents received by the Parliament by 31 January 2022), **the Commission sent a reply within the agreed three-month period**. However, these 50 cases concern only the above-mentioned references to Parliamentary debates. This means that **none of the final versions of the Commission follow-up documents with written replies arrived within the three-month period. However, the Commission sent the Parliament advance copies of the replies (before the College's official adoption) as soon**

---

<sup>20</sup> European Parliament resolution of 25 November 2020 on Towards a more sustainable single market for business and consumers ([P9\\_TA\(2020\)0318](#)), point 6.

<sup>21</sup> It should be noted that in the case of resolutions adopted in November and December 2021, the three-month period for the Commission replies went beyond the cut-off date for this study (31 January 2022), so it was not possible to establish how or whether these replies were addressed.

**as the English version was available.** This practice differs from the second half of the eighth parliamentary term, during which the Commission used to send the follow-up documents in batches per plenary session. The final versions of the follow-up documents arrived later, due to the need to provide translated versions in English and French. Yet, for the purpose of the present analysis, only the final versions have been considered.

### Commission's reply rate

Based on the analysis of the follow-up documents, **the Commission's average reply rate to individual Parliamentary requests is approximately 53 %.**<sup>22</sup> The current research shows that for the Commission it is common practice to reply to some Parliamentary requests while ignoring or overlooking others. Due to this practice, 11 % of the Parliament's numerous requests remained answered, whether deliberately or not. For 21 % of the Parliamentary requests, the Commission did not provide a detailed follow-up document, but referred in its reply to Parliamentary debates during which the Commissioners or the High Representative/Vice President attending the Parliamentary debate had already answered the points raised by Parliament. Finally, in 15 % of the cases, the Commission had not provided any reply before the cut-off date for this study (31 January 2022), either due to the adoption date of the resolutions in late 2021 or because the Commission did not reply within three months of the adoption of a parliamentary resolution.

### Character of follow-up documents and their content

As noted in the introduction to this study, every **formal written follow-up document** has the same basic structure. In addition to general information about the parliamentary resolution, these documents often include the Commission's short assessment of the Parliamentary requests and the individual replies to them. The replies usually highlight actions that had already been taken by the Commission, other EU bodies and institutions, Member States or other stakeholders. Occasionally, these replies include additional Commission commitments or intentions.<sup>23</sup> These can include various actions that are specified to a greater or lesser extent. In concrete terms, this means that the character of commitments ranges from a specific one, such as submitting a report<sup>24</sup> or delivering a study,<sup>25</sup> to a general one, such as improving links with other legislation<sup>26</sup> or supporting discussions.<sup>27</sup> The more specific the Commission reply and action, the easier it is to identify them.

### Typology of replies included in the Commission follow-up documents

The current research reveals that the Commission does not always reply to the Parliament in the same fashion, on account of the fact that the replies are handled by different services. Commission replies also differ in their level of detail and quality. Nonetheless, these replies generally have two main parts – 1) a **'brief analysis / assessment of the resolution and requests made in it'** and 2) a **'response to requests and overview of action taken, or intended to be taken, by the**

<sup>22</sup> The reply rate (53 %) corresponds to all green and orange replies as defined in Section 1.3.2, divided by the total number of Parliamentary requests. The rate of unanswered requests (11 %) corresponds to all red replies as defined in Section 1.3.2, divided by the total number of Parliamentary requests. The same calculation method applies to the cases for which the Commission did not provide a detailed follow-up document (21 %) and for cases to which the Commission did not provide any reply before the cut-off date (15 %).

<sup>23</sup> Regarding the character of the Commission promise, see Section 1.2.5.

<sup>24</sup> European Parliament resolution of 27 April 2021 on technical and operational measures for more efficient and cleaner maritime transport ([P9\\_TA\(2021\)0131](#)), point 20.

<sup>25</sup> European Parliament resolution of 14 September 2021 towards a stronger partnership with the EU outermost regions ([P9\\_TA\(2021\)0368](#)), point 46.

<sup>26</sup> European Parliament resolution of 25 March 2021 on the impact on fisheries of marine litter, ([P9\\_TA\(2021\)0096](#)), point 13.

<sup>27</sup> European Parliament resolution of 25 November 2020 on a New Industrial Strategy for Europe ([P9\\_TA\(2020\)0321](#)), point 42.

**Commission**'.<sup>28</sup> While the first part provides the Commission's analysis of the main issues raised in the resolution, the second part contains replies to Parliamentary requests.

In general, the current research established that the Commission provides **three main types of replies**:

- specific replies,
- general replies, and
- a combination (mixed type) of the above.

The following table shows the percentage of replies provided by the Commission in its follow-up documents.

Table 1 – Types of Commission replies

Type of reply	Specific reply	General reply	Mixed type
Frequency	55 %	13 %	32 %

### Specific replies

With regard to transparency, clarity and the structure of a follow-up document, the **specific reply** is certainly the most desirable type of reply. It is therefore a positive fact that 55 % of the Commission follow-up documents were structured in the form of specific replies. Some documents not only **numerically refer to the individual requests put by the Parliament**, but also assign very **specific additional headings or even quote the individual Parliamentary requests** before providing an answer to them. This brings even more clarity and transparency when linking a Commission reply to the respective Parliamentary request. It also allows Parliament to better scrutinise the Commission's activities and promises. It is worth mentioning that the percentage of specific replies is higher than in the first edition of the study (January 2017-May 2019).

Although the Commission sometimes clearly mentions a paragraph or even quotes it in its entirety, it does not mean that the Commission actually replies to the Parliamentary request. There are numerous cases where, despite specifying the number of the request at hand, the Commission does not provide a specific reply to the request.

### General replies

Commission follow-up documents with general replies can be characterised as **thematic replies**, structured by thematic headings that are either taken over or aligned with the headings contained in the Parliamentary request they are referring to,<sup>29</sup> or are rather loosely linked to the structure of the resolution.<sup>30</sup> As such, thematic replies provide a clear and concise overview of the Commission's comments, intentions and actions within the general topics or themes of the resolutions. However,

<sup>28</sup> Different responses might call this part differently, although the actual difference is only in the wording. In addition to the abovementioned title, one can find, for example, 1) responses to the requests and overview of actions by the Commission: Commitment and coordinated policy response at Commission level, 2) responses to the requests and outlook regarding the action that the Commission has taken or intends to take.

<sup>29</sup> See, for instance, European Parliament resolution of 26 November 2020 on the situation of Fundamental Rights in the European Union ([P9\\_TA\(2020\)0328](#)), and accordingly, follow-up to the European Parliament non-legislative resolution on the situation of Fundamental Rights in the European Union ([SP\(2021\)129](#)).

<sup>30</sup> See, for instance, European Parliament resolution of 7 July 2021 on railway safety and signalling: assessing the state of play of the European Rail Traffic Management System (ERTMS) deployment ([P9\\_TA\(2021\)0327](#)), and accordingly, follow-up to the European Parliament resolution on railway safety and signalling ([SP\(2021\)558](#)).

they do not contain any reference, either in terms of numbers or citations, to individual requests made by the Parliament.

In other cases, general replies are rather concise, **generally vague and broad-ranging**, which makes it impossible to directly link them to the individual Parliamentary requests at hand.<sup>31</sup> They offer limited specificity with regard to requests included in resolutions and do not contain any divisions according to numeric points or headings, which negatively impacts their transparency. The absence of any linkage to the specific points raised by the Parliament, as well as the lack of headings to provide structure to the text impedes the retrieval of actual or accurate answers and allocating them to the various Parliamentary requests.

### Mixed replies

Follow-up documents characterised as mixed replies are structured in a way that makes it impossible to exclusively attribute them to one of the categories described above. Mixed replies therefore contain replies that can be both **specific and general**.

### Commission actions

When replying to the Parliament in its follow-up document, the Commission sometimes promises to undertake action. Such action is either directly requested by the Parliament (this could be a launch or submission of a report, an analysis, or an assessment), or is at least closely linked with a Parliamentary request. However, the Commission also provides answers without further actions proposed or promised to be taken. **It has been observed that the latter situation occurred in 57 % of the cases.** In 43 % of cases the Commission promised or proposed to take action.<sup>32</sup>

The analysis further showed that the Commission has performed 33 % of its promised actions, while in 46 % of cases the implementation of the promise or action is still ongoing. In some of the cases, it remains unclear whether the Commission has fulfilled its promise. This is partly because some of its promises/replies are too general. According to the findings of this analysis, this applies to 21 % of the cases, where it could not be established whether the action had been completed either because of a lack of clarity, or because of ambiguity.

The table below provides a statistical overview of how the Commission addresses Parliamentary requests on average:

Table 2 – Commission actions

Commission reply without proposed action	Commission reply with one or more proposed actions	Percentage of completed actions	Percentage of pending actions	Percentage of unclear status as regards the completion of an action
57 %	43 %	33 %	46 %	21 %

<sup>31</sup> See, for instance, European Parliament resolution of 21 January 2021 on More fish in the seas? Measures to promote stock recovery above the maximum sustainable yield ([P9\\_TA\(2021\)0017](#)), and accordingly, follow-up to the European Parliament non-legislative resolution on More fish in the seas? Measures to promote stock recovery above the maximum sustainable yield ([SP\(2021\)223](#)).

<sup>32</sup> This part of the analysis excludes the resolutions to which the Commission did not reply by the cut-off date (31 January 2022).

### 2.1.3. European implementation assessment and European added value assessment

Both the **European implementation assessments** and the **European added value assessments** support the work of Parliamentary committees when preparing their reports. These research publications are provided automatically by EPRS and are prepared in-house or are outsourced through transparent procedures.

During the first half of the ninth parliamentary term, the EPRS EAVA Unit prepared 16 **European added value assessments** that were published between July 2020 and June 2021. Some 11 of them accompanied INLs to which the Commission replied before the cut-off date of the present study (see the table below). These 11 EAVA studies supported a number of legislative-initiative reports (INL) and one ordinary own-initiative report (INI),<sup>33</sup> all of them adopted between October 2020 and October 2021.

The following table shows publications by their specific title. It also identifies the reports that the publications supported, whether these publications were quoted in the resolution or not, and the respective follow-up document of the Commission. Contrary to the previous parliamentary term, the Commission replied to INLs by letter and not in the format of SP (*Suites données aux résolutions du Parlement européen*) documents.

---

<sup>33</sup> In principle, European added value assessments are prepared exclusively to support legislative-initiative reports (INL). In one exceptional case (On the EU mechanism on democracy, the rule of law and fundamental rights), the report started being drafted according to the INL procedure and was later re-classified as an INI report. The EAVA Unit thus prepared this study on the basis of the INL authorisation.

Table 3 – EAVA publications

EAVA publication	Parliamentary resolution	Directly quoted in the resolution	Commission follow-up
<a href="#">The right to disconnect (July 2020)</a>	<a href="#">Resolution of 21 January 2021 on the right to disconnect</a>	Yes	Commission reply by letter

During the first half of the ninth parliamentary term, the EVAL Unit prepared 18 **European implementation assessments**, two **ex-post evaluations** and two **implementation in action** documents that were published between February 2020 and September 2021 and supported implementation reports (INI) adopted between September 2020 and November 2021. The following table gives the titles of the 14 European implementation assessments and two ex-post evaluations and the respective INIs to which the Commission replied before the cut-off date of the present study (31 January 2022). It also identifies the resolution that these publications supported, whether these publications were quoted in the resolution or not, and the respective follow-up document of the Commission.

## Conclusion

From among the 11 European added value assessments, eight have been directly quoted in Parliamentary resolutions. The findings also show that 10 European implementation assessments and ex-post evaluations prepared by the Ex-Post Evaluation Unit have been mentioned in Parliamentary resolutions adopted between September 2020 and November 2021. The resolution on preventing and combating trafficking in human beings and protecting its victims<sup>39</sup> was supported by a European implementation assessment and an ex-post evaluation. Yet, only one study, the [European implementation assessment on the EU Defence Package](#) has been referred to in the follow-up documents of the Commission.

<sup>38</sup> [Debate 11 November 2021](#)

<sup>39</sup> European Parliament [resolution](#) of 10 February 2021 on the implementation of Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims (2020/2029(INI))

Overall, **European added value assessments and European implementation assessments have been referred to in Parliamentary resolutions in almost 67 % of the cases.** While it should be underlined that European added value assessments and European implementation assessments are primarily produced as background documents for individual Parliamentary committees in specific cases, they sometimes serve more than just those individual committees. Through these two types of publications, the EPRS provides support to the work of Parliamentary committees when preparing their implementation or legislative-initiative reports.

**European added value assessments** accompany all INL reports and **put forward solid arguments on topics where coverage by European legislation is considered reasonable and appropriate.** To this end, the European Added Value Unit evaluates the potential costs and benefits of proposals made in INL reports, to ensure that European legislation is of the highest quality, in terms of simplicity, clarity, consistency and effectiveness, for the benefit of European citizens.<sup>40</sup>

**European implementation assessments** on the other hand **substantiate how legislation has performed in relation to its intended purposes and objectives.**

The Ex-Post Evaluation Unit follows the evaluation criteria of the Commission's Better Regulation Guidelines and draws mainly on publicly available data and information. With its impartial and factual research, the unit contributes to evidence-based policy-making in the European Parliament.<sup>41</sup>

Making full use of this support is therefore highly recommended for the pursuit of the objectives set out in the current [Interinstitutional Agreement on Better Law-Making](#). The joint responsibility for better-law making yields **evidence-based policy-making** and EU legislation of the **highest possible quality**, goals that are inherent to both European added value and European implementation assessments.

## 2.2. Findings related to individual committees

Specific findings relating to individual committees are included in the annexes of this document. The annexes are divided alphabetically. Each annex includes an individual analysis linked to the specific resolutions and table containing requests included in Parliamentary resolutions, Commission replies to the requests and potential actions by the Commission.

The annexes differ in their length and degree of specificity depending on the committee in focus, and the structure and content of Commission follow-up documents also vary greatly. That said, certain characteristics across Parliamentary committees were found.

### 2.2.1. Findings related to Parliamentary resolutions

Between July 2019 and December 2021, the AFET, LIBE, ECON Committees adopted the **highest number of resolutions in the form of INIs**, while ENVI, AFET EMPL, ITRE and ECON issued the **greatest number of requests** to the Commission, making up more than half of the overall number of all parliamentary calls on the Commission in INIs. In total, 178 resolutions took the form of INIs.

During the same period, the BUDG, CONT, ECON, EMPL, ENVI, FEMM/LIBE, IMCO, JURI and LIBE Committees adopted a total of 15 **legislative-initiative reports (INL)**. Most of these committees adopted only one INL, while JURI (5), EMPL and FEMM/LIBE (both 2) adopted several INLs. The findings related to INLs are summarised in a subsequent chapter.

<sup>40</sup> Hiller W., [European Parliament work in the fields of Impact Assessment and European Added Value – Activity Report for July 2019 to December 2020](#), DG EPRS, European Parliament, March 2021.

<sup>41</sup> *ibid.*

## 2.2.2. Findings related to Commission follow-up documents to INIs

**Between October 2019 and January 2021, the Commission provided a written reply ('Follow-up to the European Parliament non-legislative resolution') to 102 out of 178 parliamentary INI resolutions** covered by this research. Additionally, in 50 cases, the Commission sent the European Parliament within the three-month period a document informing that it would not be responding formally to the requests tabled in the INI resolutions. In many cases the Commission added that the requests were comprehensively addressed in plenary during the debate the day before the adoption of the resolution by the attending Commissioner or HR/VP. Finally, in 26 cases, the Commission had not sent its official reply before the cut-off date for the present study.

### Reply time

As already mentioned, pursuant to point 16 of the 2010 FA and paragraph 10 IIA BLM (Article 225 TFEU (INL)) within three months of the adoption of a Parliamentary resolution, the Commission should submit a written response to the Parliament.

However, between October 2019 and January 2022, none of the final versions of the Commission formal written follow-up documents arrived within the three-month period. The Commission follow-up documents were received by the Parliament mostly around five months after the adoption of the Parliamentary resolutions. Only in the 50 cases described in the previous section, did the information (informing that the Commission would not be responding formally to the requests made in the INI resolutions) arrive within the three-month period. This concerns INI resolutions by the AFCO, AFET, AFET/INTA, AGRI/ENVI, DEVE, ECON, ENVI, FEMM, FEMM/JURI, ITRE, JURI, LIBE, and PECH committees or joint committees.<sup>42</sup>

### Commission's reply rate

The Commission's reply rate is a fraction calculated by dividing the total number of points raised in the resolution(s) of a committee, to which the Commission has given specific replies in its follow-up document(s), by the total number of Parliamentary requests made by that committee in all of its resolutions.

Among the committees with the **highest rate of reply to their requests** are BUDG (100%), FEMM/LIBE (94%), IMCO (93%) and REGI (91%). On the contrary, committees receiving a **relatively low number of Commission replies** are AFET (9%), FEMM (17%), and AFCO (22%). In addition to that, resolutions under the shared responsibility of AFET/INTA, AGRI/ENVI, FEMM/JURI and JURI/LIBE had a reply rate of 0%.<sup>43</sup>

### Typology of replies included in the Commission follow-up documents

Based on the three main types of replies provided by the Commission, it is possible to identify the predominant type of reply included in the Commission follow-up documents sent to each committee. This prevalence, as well as the findings on the following page, are highlighted in a summary table (Table 6) below.

**Specific Commission replies** were predominantly sent to more than half of the committees or committee configurations (AFCO, AFET, AGRI, BUDG, BUDG/ECON, CONT, CULT, DEVE, EMPL, FEMM, FEMM/LIBA, INTA, JURI, PETI, REGI). ECON was the only committee that received mainly **general Commission replies**. The main addressees of **mixed replies** were the BUDG/CONT, IMCO, ITRE and

<sup>42</sup> The term 'joint committees' is linked to own-initiative reports – later adopted as Parliament resolutions – that are under the joint responsibility of several parliamentary committees. In the annex, these cases are treated as separate units of analysis. Examples include AFET/INTA, AGRI/ENVI or BUDG/ECON.

<sup>43</sup> The 0% reply rates concern cases in which the Commission sent the Parliament within the three-month period a document informing that it would not be responding formally to the requests made in the INI resolutions.

LIBE committees. The other committees received mainly **combinations of different types of replies**, i.e. general/mixed replies (ENVI and PECH) or specific/general/mixed replies (TRAN). Finally, as already mentioned earlier, resolutions under the shared responsibility of AFET/INTA, AGRI/ENVI, FEMM/JURI and JURI/LIBE only received documents informing them that the **Commission would not be responding formally** to the requests made in their INI resolutions.

### Commission actions

When replying to the Parliament in its follow-up document, the Commission sometimes **promises to undertake action**. The extent to which the Commission proposes such action varies greatly among the committees. In some cases, the Commission follow-up documents contain many such ambitious replies. In others, the Commission mainly provides an answer without proposing or promising to take further action.

In relative terms, calculated by dividing the number of actions the Commission promised to a committee by the total number of replies to all the Parliamentary requests made by that same committee, resolutions under the common responsibility of AGRI (39 %), IMCO (36 %), ITRE and EMPL (both 35 %) were **promised the highest number of Commission actions**.

In absolute numbers, ENVI, EMPL and ITRE received the highest number of actions by being promised a total of 128, 102 and 98 actions respectively.

Immediate implementation of the proposed actions is not always offered. In some circumstances, the **fulfilment of a promise is still ongoing**, which can be due to the short period between the adoption of some resolutions and the cut-off date. In other cases, **the Commission has already carried out its promise**. The frequency of occurrence of these varying levels of implementation of actions can be calculated by dividing the number of implemented and ongoing actions by the total number of Commission promises.

The Commission **fulfilled most of its promises** to the requests in the resolutions under the responsibility of BUDG/ECON (88 %) and ITRE (81 %) and AFCO (75 %). In the case of BUDG (100 %) only one Commission action was offered. Looking at absolute numbers, most of the 79 actions that were implemented altogether were linked to INIs of the ITRE committee.

With regard to **ongoing Commission actions**, promises made to requests made by JURI, BUDG/CONT and INTA are 100 %, 100 % and 94 % still ongoing. However, when considering resolutions with a higher total number of Parliamentary requests, the absolute number of ongoing actions is largest for ENVI, TRAN, EMPL and ECON.

The following table provides a general overview of the most relevant data generated from the 178 Parliamentary INI resolutions and the corresponding Commission follow-up documents.

Table 5 – General overview of Parliamentary resolutions and Commission replies to INIs

Committee	Resolutions	Requests	Predominant type of reply	Commission reply	Commission action	Fulfilled action rate
AFCO	4	18	Specific	22 %	22 %	75 %
AFET	38	297	Specific	9 %	3 %	67 %
AFET/INTA	1	19	No formal reply	0 %	0 %	-
AGRI	1	18	Specific	78 %	39 %	14 %
AGRI/ENVI	1	62	No formal reply	0 %	0 %	-
BUDG	1	5	Specific	100 %	20 %	100 %
BUDG/CONT	2	37	Mixed	41 %	27 %	0 %
BUDG/ECON	1	28	Specific	82 %	29 %	88 %
CONT	7	135	Specific	64 %	10 %	21 %
CULT	8	189	Specific	51 %	20 %	32 %
DEVE	5	75	Specific	32 %	5 %	25 %
ECON	14	226	General	64 %	29 %	35 %
EMPL	13	295	Specific	88 %	35 %	49 %
ENVI	8	422	General/Mixed	51 %	30 %	36 %
FEMM	7	174	Specific	17 %	6 %	27 %
FEMM/JURI	1	24	No formal reply	0 %	0 %	-
FEMM/LIBE	1	36	Specific	94 %	17 %	33 %

REGI	6	75	Specific	91 %	20 %	13 %
TRAN	7	214	Specific/General/Mixed	60 %	34 %	24 %

### 2.2.3. Findings related to the Commission replies to INLs

The Commission's follow-up to legislative-initiative reports has become increasingly politically relevant, as has the debate on the right of initiative of the European Parliament. The Commission is committed to responding 'with a legislative act, in full respect of the proportionality, subsidiarity and better law-making principles' whenever the Parliament adopts a resolution requesting a legislative initiative.<sup>44</sup> The present study is consistent with all political monitoring exercises in this framework and can be considered to be an objective and factual tool.

The study examines legislative-initiative reports (INL) separately from ordinary own-initiative reports (INI), because the Commission followed up on them in a different manner. During the eighth parliamentary term, the Commission used the same follow-up document for both types of reports. Since the beginning of the ninth term in 2019, the Commission has been replying to INLs in the form of letters that are structured differently from its follow-up documents on INIs. It is because of this different approach that the present study treats INLs separately from INIs. To highlight this difference, the tables on INLs contain no colour coding, yet they have the same structure as the tables for INIs (three columns with the parliamentary request, Commission reply and Commission action).

Some findings on the Commission replies are summarised in the following sections. These findings are however limited by the low number of INLs that were adopted since the beginning of the ninth parliamentary term. In fact, only 15 INLs were adopted between May 2020 and December 2021. The number of committees that adopted INLs is limited too. By the end of December 2021, only BUDG (1), CONT (1), ECON (1), EMPL (2), ENVI (1) FEMM/LIBE (2), IMCO (1), LIBE (1) and JURI (5) had adopted INLs.

#### Reply time

As already mentioned, pursuant to point 16 of the 2010 FA and paragraph 10 IIA BLM (Article 225 TFEU (INL)), the Commission should submit a written response to the Parliament within three months of the adoption of a Parliamentary resolution.

By the cut-off date for the present study (31 January 2022), the Commission had sent 11 letters within the three-month period. Only for the INL initiated by the BUDG committee,<sup>45</sup> did the Commission send the letter almost four months after the adoption of the resolution. By the cut-off date for this study, the Commission had not yet replied to three of the INLs that had been adopted in November and December 2021.

#### Replies by the Commission

The analysis of the Commission replies on INLs shows that, with the exception of the above-mentioned case of the BUDG committee INL, the Commission is or was working on actions related to the requests made by the Parliament. In the cases for which the Commission has already proposed legislation or will do so soon in reaction to the requests made in the INLs, the tables refer to these proposals in the first row of each table.

The different structure of the Commission replies to INLs (compared to INIs) in the forms of letters required an adaptation of the tables on INLs in the present study. In fact, the letters do not have the same structure as the formal Commission follow-up documents, but rather take the form of general or thematic replies. As the INLs also contain requests that go beyond a request for legal action, the tables on INLs do not contain any colour coding for the Commission replies and actions.

<sup>44</sup> [Political guidelines for the next European Commission 2019-2024](#), By candidate for President of the European Commission Ursula von der Leyen, July 2019.

<sup>45</sup> European Parliament [resolution](#) of 13 May 2020 with recommendations to the Commission on a safety net to protect the beneficiaries of Union programmes: setting up an MFF contingency plan ([2020/2051 \(INL\)](#)). At the same time, this request became obsolete once negotiations on NextGenerationEU were finalised and the new long-term financial framework was adopted.

### 3. Conclusions

By carrying out its scrutiny and oversight function, the European Parliament can adopt resolutions in plenary, requesting the European Commission to provide explanations, perform actions and initiate legislation. The present analysis of the **Parliament's non-legislative resolutions adopted between October 2019 and December 2021**, based on ordinary own-initiative reports (INI) and legislative-initiative reports (INL), and the subsequently submitted **follow-up documents by the Commission**, leads to several conclusions.

In terms of their overall **structure, the Parliament's resolutions** and the way they lay out their requests, are rather similar. They typically start with an instructing verb, followed by a mention of the addressee of the request. Yet, several distinctions can be noticed. This study focuses on requests containing rather **strong imperative** verbs such as 'urging', 'requesting', 'insisting' or 'expecting'. Conversely, it does not cover parliamentary requests with verbs of a weaker degree of command, such as 'to welcome', 'to note' or 'to encourage'.

The present analysis only covers requests that explicitly refer to the **Commission (European Commission, Commissioners, HR/VP) as the addressee of a request**. However, paragraphs in the resolutions also sometimes direct the calls to the European Union as a whole. In addition, some requests do not address any particular institution at all. Such anonymity makes it difficult to **identify the body responsible for addressing the request**. At the same time, it allows the Commission to overlook or disregard such requests. This study thus shows the clear advantages in always explicitly indicating the body or institution to which a request is addressed.

In general, **the Commission provided a reply in slightly more than half (approximately 53 %) of the cases of requests in INIs**. The Parliamentary committees that received the highest rates of reply to their requests are the Committee on Budgets (BUDG), the joint committees on Women's Rights and Gender Equality and on Civil Liberties, Justice and Home Affairs (FEMM/LIBE), the Committee on Internal Market and Consumer Protection (IMCO) and the Committee on Regional Development (REGI).

**Between October 2019 and January 2021, the Commission provided a written reply ('follow-up to the European Parliament non-legislative resolution') to 102 out of 178 parliamentary INI resolutions. None of the final versions of the Commission follow-up documents with written replies arrived within the three-month period.** However, the Commission sent the Parliament advance copies of the replies (before their official adoption by the College) as soon as the English version was available. This is different from what was observed during the second half of the eighth parliamentary term, when the Commission sent follow-up documents in batches per plenary session. The final versions of the follow-up documents arrived later, due to the need to provide translated versions in English and French.

Additionally, in **approximately 33 % of the cases** (50 out of 152 documents received by the Parliament by 31 January 2022), **the Commission sent written documents** informing that it would not be responding formally to the requests addressed in the INI resolutions. In many cases, the Commission added that the requests had been comprehensively addressed in plenary during the debate the day before the adoption of the resolution by the attending Commissioner or HR/VP. These documents were received within the three-month period. Finally, in 26 cases, the Commission did not send its official reply before the cut-off date for the present study.<sup>46</sup>

---

<sup>46</sup> It should be noted that in the case of resolutions adopted in November and December 2021, the three-month period for the Commission replies went beyond the cut-off date for this study (31 January 2022), so it was not possible to establish how or whether these replies were addressed.

The **Commission follow-up documents are not drafted in a uniform and pre-defined manner**. The analysis in this study identified three different types of Commission replies, with various characteristics.

The **specific reply** appears to be the optimal type of reply as it refers numerically to individual requests made by Parliament and sometimes even inserts a quote taken from the Parliament's request before providing an answer to it, which increases clarity and transparency. Although, in theory, the **specific reply is the most desired type of reply**, cases in which merely the number of a request is indicated, while an actual reply to the relevant issue is missing, are less pertinent.

**General replies**, which can take the form either of thematic replies structured by thematic headings, or very general and broad texts consisting of rather concise, vague texts, are **less transparent and informative** than specific replies. They can occasionally be characterised as a formal reply by which the Commission fulfils its obligation based on 2010 FA and 2016 IIA BLM, but beyond that, they do not, at least in the case of broad texts, have much value in terms of the information they contain.

Lastly, the study identified the presence of **mixed replies**. Follow-up documents characterised as mixed replies are structured in a way that cannot be exclusively attributed to one of the categories described above. Mixed replies therefore contain replies that can be both specific and general.

During the first half of the ninth parliamentary term, the Parliament adopted **15 INLs**. Until the cut-off date for this study, the Commission had replied to 12 of them in the form of letters. Due to the different approach taken by the Commission, it was necessary to treat INLs differently in the present study. While the tables on INLs have the same structure as the tables for INIs (three columns with the parliamentary request, Commission reply and Commission action), they contain no colour coding and are presented in a separate chapter.

## 4. Annexes: Committee cards

### 4.1. INI Committee cards

#### 4.1.1. AFCO

Between July 2019 and December 2021, the **Committee on Constitutional Affaires (AFCO)** was responsible for four ‘ordinary’ own-initiative reports (INI) and no legislative own-initiative reports (INL) leading to the adoption of four Parliament’s resolutions ('AFCO resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022, <sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent three written replies to the Parliament's four AFCO resolutions. In one case, the Commission provided its written reply after the 3-month period prescribed by the Framework Agreement (point 16). The other two replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to the one AFCO resolution. Nevertheless, the Commission was still in the

deadline to respond formally to this resolution. In total, the Commission submitted one specific reply. The Commission has not replied with written follow-up documents to 13 of Parliament's 18 requests. At the cut-off date of this study, the Commission had not yet replied to one of Parliament's 18 requests.

### Analysis of the Commission actions

The Commission proposed/promised four genuine actions. In 13 cases no further specific actions proposed/promised to be taken by the Commission and in one case, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the four actions proposed/promised by the Commission, the Commission already carried out the action in three cases. In the one remaining case, the implementation of the action is still pending and needs to be followed at a later stage.

4.1.1.1. AFCO Resolution1: EP resolution of 26 November 2020 on stocktaking of European elections

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Stocktaking of European elections	26/11/2020 <a href="#">T9-0327/2020</a> <a href="#">2020/2088(INI)</a> AFCO	<a href="#">SP(2021)129</a> -	Final reply (SP) received 2 June 2021	Specific reply			
1)	3. Welcomes the substantial increase of youth participation in the elections; reiterates its call on the Council and the Commission to take into account their concerns, which are critical for the lives of the next generations, by means of public consultation procedures and the Conference on the Future of <a href="#">Europe</a> ;	Regarding the call to take account of the concerns of young people, and their participation, the Commission stressed in its report on the 2019 European elections that it is important to develop innovative techniques suitable for different ages and needs to support democratic participation. For the 2024 elections, efforts must continue to engage all citizens in European democracy and support long-term high turnout. No one should be left behind and the participation in and outcomes of European Parliamentary elections should reflect the population and the diversity of the Union. For the 2024 elections, a specific focus will be on younger and older people, women, mobile EU citizens and people with disabilities. In its 2020 Citizenship Report, the Commission has taken a number of commitments, including that it would support the active participation of citizens in the democratic process, and will take innovative approaches to involving them in the legislative process to ensure that EU laws are fit-for-purpose and align with EU values. It will lead by example by funding projects that support European citizens' engagement, via the Citizens, Equality, Rights and Values programme, deliberation and participation in the Horizon Europe programme and in the European Green Deal transitions and in particular through the Conference on the Future of Europe that aims at involving citizens of all EU regions and of all walks of life in a participative democracy trajectory. The Commission will also explore the possibility of creating a dedicated shared resource to support EU citizens in				The Commission adopted on 25 November 2021 a <a href="#">communication on protecting election integrity and promoting democratic participation</a> , COM (2021) 730.  On 6 October 2021, the Commission launched a new <a href="#">Competence Centre on Participatory and Deliberative Democracy</a> (Joint Research Centre).  <a href="#">Citizens, Equality, Rights and Values programme</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>exercising their electoral rights. The Commission will continue to work with the Member States through the European Cooperation Network on Elections to facilitate and improve the ability of EU citizens to exercise their voting rights including by supporting the exchange of best practices and mutual assistance to ensure free and fair elections.</p> <p>In reference to the call on the Commission to take into account young people's concerns, which are critical for the lives of the next generations, by means of public consultation procedures, the Commission stresses that the EU Youth Strategy 2019-2027 already sets out a Framework for European cooperation in the youth field, based on the Commission's Communication of 22 May 2018 on 'Engaging, Connecting and Empowering young people'. Under the core area 'Engage', the EU Youth Strategy aims for a meaningful civic, economic, social, cultural and political participation of young people. The Strategy fosters youth participation in democratic life, supports social and civic engagement and aims to ensure that all young people have the necessary resources to take part in society. As part of the EU Youth Strategy, young people's opinions are taken into account, notably through the EU Youth Dialogue, a key tool for youth participation that brings together young people, youth organisations and decision makers, supported by experts and evidence. It is organised into 18-month work cycles and National Youth Councils from each Member State play a crucial role. The EU Youth Dialogue reaches in every cycle more than 50 000 young people. As such, it is one of the biggest single participatory process for citizens in the EU thanks to its capacity to mobilise young people via national platforms and youth organisations. In preparation for the current EU Youth Strategy, young people from all over Europe discussed together on the topic "Youth in Europe: What's next?" (as part of the 6th cycle of</p>		<p>The Commission reiterated in <a href="#">COM(2021) 730</a> that it will establish a contact point on electoral rights as part of the dedicated 'shared resource'.</p> <p><a href="#">European cooperation network on elections</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the EU Youth Dialogue). This resulted in 11 European Youth Goals that are annexed to the EU Youth Strategy. European Youth Goals No 1 (Connecting EU with Youth) and No 9 (Space and Participation for All) are particularly relevant in terms of the democratic participation of young people. EU youth participation is also encouraged via youth programmes such as Erasmus+ and the European Solidarity Corps. Erasmus+ supports projects around participation and dialogue, and will include from 2021 onwards new “participation projects”, dedicated to educating and involving more young people in democracy. Moreover, in the framework of the Conference on the Future of Europe specific events on a European level will be organised bringing together young Europeans for debates on the future of Europe. EU citizens of all ages will also be invited to participate in an interactive digital platform. The proposals on this platform will be followed up upon and serve as input for European citizens’ panels debates.</p>			
2)	<p>4. [...] Calls on the Commission, in cooperation with Parliament and other bodies such as the Venice Commission, to formulate recommendations to Member States with a view to increasing the representation of women in the European Parliament, and calls for the introduction of lists of candidates with an equal number of male and female candidates on electable places, for example through the use of zipped lists or other equivalent methods, as in many Member States there is no legislation ensuring political parity for election;</p>	<p>Regarding the call to formulate recommendations to the Member States with a view to increasing the representation of women in the European Parliament, the Commission notes that the persistent under-representation of women in politics remains a critical issue that undermines the full functioning of democratic processes. Specific measures to ensure women have an adequate opportunity to compete in elections and be represented in elected bodies should be considered for internal party rules. The Commission will promote the participation of women as voters and candidates in the 2024 European Parliament elections, in collaboration with the European Parliament, national parliaments, Member States and civil society, including through funding and promoting best practices, as referred in the Gender Equality Strategy 2020-2025 (COM(2020) 152). The Commission will continue to work with the Member States through the European Cooperation Network on</p>		<p>The Commission’s <a href="#">proposal for a regulation on the statute and funding of European political parties and European political foundations (recast)</a> (COM (2021) 734), includes a gender dimension. EU funding of European political parties should be made conditional on the promotion of gender balance in the internal rules of the parties. Moreover, European political parties should be transparent about the gender balance of their national member parties as regards candidates and members of the European Parliament.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Elections to facilitate and improve the ability of EU citizens to exercise their voting rights including by supporting the exchange of best practices and mutual assistance to ensure free and fair elections.			
3)	23. [...] Urges the Commission and the Member States to raise financing for the fight against foreign interference significantly;	<p>The Commission declares that it announced a number of measures in the European Democracy Action Plan. In 2021, the Commission will propose a review of the legislation on the funding of European political parties with a view to addressing the financing of European political parties from outside the EU, revising the audit requirements, strengthening the links between European financing and national campaigns, and facilitating transparency and auditing. The goal is to have the new rules in place in sufficient time ahead of the May 2024 European Parliament elections.</p> <p>As set out in the European Democracy Action Plan, the Commission will also step up actions against online disinformation by issuing guidance on how to strengthen the Code of Practice on Disinformation signed by major online platforms. The strengthened Code will be accompanied by a more robust monitoring system increasing public scrutiny and accountability of the platforms. In addition, with the proposed Digital Services Act (DSA), we will move from self-regulation to co-regulation in this important area. The DSA clarifies the obligations of online platforms, not least in what concerns the risk mitigation framework in the manipulation of their systems for disseminating disinformation, as well as in ensuring transparency and due process in the platforms' content moderation actions. This framework will be complemented by supporting civil society initiatives to promote media literacy, digital literacy and critical thinking, which are also key elements in fighting disinformation.</p>		<p>The Commission published a legislative proposal on 25 November 2021: <a href="#">proposal for a regulation on the statute and funding of European political parties and European political foundations (recast)</a>, (COM (2021) 734).</p> <p>The Commission published <a href="#">guidance on strengthening the code of practice on disinformation</a> on 26 May 2021.</p> <p>The Commission published a legislative proposal on 18 December 2021: <a href="#">proposal for a regulation on a single market for digital services (Digital Services Act) and amending Directive 2000/31/EC</a>, COM (2020) 825.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>26. Urges the Commission and the Council to take all necessary measures to combat foreign interference and the internal and external dimensions of disinformation effectively, to fully engage with Parliament's new Special Committee on Foreign Interference in all Democratic Processes in the European Union, including Disinformation (INGE), and to fully take into account its recommendations as soon as its conclusions are delivered and before the next European elections; encourages the Commission and the Council to work much more closely with Parliament on these matters, as the protection of our democratic institutions is a core competence of the European Parliament;</p>	<p>Regarding the call to [...] combat it and internal and external disinformation, before the next European elections, the Commission announced a number of measures in the European Democracy Action Plan. In 2021, the Commission will propose a review of the legislation on the funding of European political parties with a view to addressing the financing of European political parties from outside the EU, revising the audit requirements, strengthening the links between European financing and national campaigns, and facilitating transparency and auditing. The goal is to have the new rules in place in sufficient time ahead of the May 2024 European Parliament elections. The Commission will propose, in 2021, measures to ensure greater transparency in the area of sponsored content in a political context ('political advertising') and adopt support measures and guidance for political parties and Member States. The Commission will also set up a new joint operational mechanism and other support measures, building on the work of the European Cooperation Network on Elections and of the Cooperation Group established under Directive (EU) 2016/1148 on the security of network and information systems, to promote resilient electoral processes and take further practical measures to protect election infrastructure against threats, including against cyber-attacks. The Commission, in close cooperation with the European External Action Service (EEAS), will also facilitate cooperation between EU networks and partner countries and international organisations to build capacity and exchange best practices in countering electoral threats and promote high international standards in the use of new technologies. The Commission and the EEAS will look into the more systematic use and further development of the EU's existing toolbox for countering disinformation, influence operations and foreign interference. This will allow the EU to raise costs of disinformation, influence operations and foreign interference, in full respect of</p>		<p><a href="#">European democracy action plan</a></p> <p>The Commission published a legislative proposal on 25 November 2021: <a href="#">proposal for a regulation on the statute and funding of European political parties and European political foundations (recast)</a>, (COM (2021) 734).</p> <p>The Commission published a legislative proposal on 25 November 2021: <a href="#">proposal for a regulation on the transparency and targeting of political advertising</a>, (COM (2021) 731).</p> <p><a href="#">European cooperation network on elections</a></p> <p>The Commission <a href="#">announced</a> that a joint mechanism for electoral resilience, a tool to support Member States in capacity building for election process resilience to various threats, would be operational in early 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>fundamental rights and freedoms. An important step is the development of a common framework and methodology for collecting systematic evidence on foreign interference – the Commission will take this forward through the EEAS in close cooperation with all relevant stakeholders, including EU Member States, international partners like NATO and the G7 as well as civil society and private industry. A common framework and methodology will be developed for collecting systematic evidence on foreign interference and a structural dialogue with civil society, private industry actors and other relevant stakeholders to regularly review the threat situation.</p> <p>As set out in the European Democracy Action Plan, the Commission will also step up actions against online disinformation by issuing guidance on how to strengthen the Code of Practice on Disinformation signed by major online platforms. The strengthened Code will be accompanied by a more robust monitoring system increasing public scrutiny and accountability of the platforms. In addition, with the proposed Digital Services Act (DSA), we will move from self-regulation to co-regulation in this important area. The DSA clarifies the obligations of online platforms, not least in what concerns the risk mitigation framework in the manipulation of their systems for disseminating disinformation, as well as in ensuring transparency and due process in the platforms' content moderation actions. This framework will be complemented by supporting civil society initiatives to promote media literacy, digital literacy and critical thinking, which are also key elements in fighting disinformation.</p>		<p>No progress yet on a common framework and methodology.</p> <p>The Commission published <a href="#">guidance on strengthening the code of practice on disinformation</a> on 26 May 2021.</p> <p>The Commission published a legislative proposal on 18 December 2021: <a href="#">proposal for a regulation on a single market for digital services (Digital Services Act) and amending Directive 2000/31/EC</a>, COM (2020) 825.</p>	

## 4.1.1.2. AFCO Resolution 2: EP resolution of 7 July 2021 on citizens' dialogues and Citizens' participation in the EU decision-making

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Citizens' dialogues and Citizens' participation in the EU decision-making</b>	7/07/2021 <a href="#">T9-0345/2021</a> <a href="#">2020/2201(INI)</a> AFCO	On 9 August 2021, the Parliament received from the Commission ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – July 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as the key questions were addressed in plenary by Commissioner Šuica on behalf of Vice-President JOUROVA. The <a href="#">plenary debate</a> took place on 5 July 2021.			
1)	5. [...] Parliament could, in line with Rule 222 of its Rules of Procedures, decide to follow up on the ECI with a legislative own-initiative report (INL); urges the Commission to commit itself to submitting a legislative proposal following Parliament's adoption of such an INL [...]				
2)	15. [...] calls on the Commission to ensure sufficient funding for that purpose through the 'Citizens' engagement and participation' strand of the Citizenship, Equality, Rights and Values programme;				
3)	20. Highlights the necessity of engaging with educational institutions and civic education organisations to ensure that active European citizenship becomes part of the curriculum across the EU; calls on the Commission to provide support in order to complement educational programmes in all Member States, notably by supporting the development of a common curriculum on European and global civic education, fostering a better understanding of the existing EU institutions and of the history and cultures of Member States, and encouraging objective and				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	critical thinking of the benefits of the European Union; suggests the inclusion of modules on EU functioning and history in educational curricula and calls on the Commission to propose guidelines for such modules;					
4)	22. Calls on the Commission to launch an annual European Union Olympiad competition on EU functioning and history for young people in high schools, vocational training and other educational structures, in order to boost interest, participation and debate on EU affairs;					
5)	25. [...] calls on the Commission to develop a comprehensive European strategy to enhance citizenship competences in the EU and develop supportive measures aimed at providing equal access to citizenship education to all people residing in the EU in order to enable them to exercise their political rights;					
6)	29. [...] invites the Commission to further develop this area under the EDAP;					
7)	30. Recognises the right of all EU citizens to request and receive information from the EU institutions in one of the official EU languages; points out that genuine dialogue and the active and informed participation of EU citizens in EU decision-making is only possible if there is no language barrier, and therefore calls on the Commission to make much greater efforts to communicate with citizens in all the official EU languages; notes that in order to strengthen inclusiveness, awareness and visibility, there is a need to improve the accessibility of online content [...]					
8)	44. Calls on the Commission and the Member States to develop accessible, innovative and inclusive tools for citizens' participation and dialogues, making better use of digital technologies to allow all citizens (such as					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	younger and older people, people with disabilities, mobile EU citizens, people living in rural or less populated areas) to play an effective part in EU decision-making, building on the lessons from the way the COVID-19 pandemic has acted as an accelerator for the use of digital tools [...]				
9)	50. [...] calls on the Commission to embrace further digital possibilities for citizens' participation, in all official EU languages, including tutorials, past examples and information on relevant legislation; believes that provisions should be made for persons who are blind, visually impaired or otherwise print-disabled;				
10)	55. Calls on the Commission to present a proposal for an interinstitutional agreement on civil dialogue on the basis of Article 11(2) TEU, stating that institutions must maintain an open, transparent and regular dialogue with representative associations and civil society;				

#### 4.1.1.3. AFCO Resolution 3: EP resolution of 16 September 2021 on strengthening transparency and integrity in the EU institutions by setting up an independent EU ethics body

## 4.1.1.4. AFCO Resolution 4: EP resolution of 11 November 2021 on statute and funding of European political parties and foundations

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Statute and funding of European political parties and foundations</b>	11/11/2021 <a href="#">T9-0454/2021</a> <a href="#">2021/2018(INI)</a> AFCO	On 1 December 2021, the Parliament received from the Commission ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – November I 2021 part-session'. The Commission will not be responding formally to the requests addressed in the resolution as most of the relevant points were addressed in plenary by Vice-President Věra Jourová. Furthermore, the Commission also contributes to the process on the revision of Regulation 1141/2014 by an evaluation report pursuant to Article 38 of Regulation on the statute and funding of European political parties and European political foundation (COM (2021) 717) accompanied by a legislative proposal on the statute and funding of European political parties and European political foundations (recast) (COM (2021) 734), both of which were adopted on 25 November. The <a href="#">plenary debate</a> took place on 11 November 2021.			
1)	29. Calls on the Commission to provide clear requirements and detailed guidelines related to the visibility of the European political party of affiliation in order to ensure enforcement of Article 18(2)(a) of the Regulation on displaying European political parties' logos alongside the logos of national or regional parties;				
2)	54. Urges the Commission to review the Regulation with a view to updating the rules on registration, financing, political and electoral campaigning and membership in order to make European political parties the mouthpiece for citizens in EU politics and policymaking and to bring EU citizens closer to EU decision-making;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	61. Calls on the Commission to take due account of these proposals when drafting and putting forward its proposal for a regulation amending Regulation (EU, Euratom) No 1141/2014;				

### 4.1.2. AFET

Between July 2019 and December 2021, the **Committee on Foreign Affairs (AFET)** was responsible for 39 ‘ordinary’ own-initiative reports (INI) and no legislative own-initiative reports (INL) leading to the adoption of 39 Parliament’s resolutions (‘AFET resolution’). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website<sup>2</sup>. Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent 37 written replies to the Parliament’s 39 AFET resolutions. In nine cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other 28 replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to two AFET resolutions. Nevertheless, the Commission was still in the deadline to respond formally to these two resolutions. In total, the Commission submitted five specific and three general replies as well as one mixed reply. The Commission has not replied with written follow-up documents to 261 of Parliament’s 297 requests. At the cut-off date of this study, the Commission had not yet replied to two of Parliament’s 297 requests.

### Analysis of the Commission actions

The Commission proposed/promised nine genuine actions. In ten cases, no further specific actions were proposed/promised to be taken by the Commission and in five cases it remained unclear if an action was carried out. In seven cases, due to the lack of reply to the Parliament’s request, no action was mentioned.

Among the nine actions proposed/promised by the Commission, the Commission already carried out the action in six cases. In the three remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

4.1.2.1. AFET Resolution 1: EP resolution of 15 January 2020 on human rights and democracy in the world and the European Union’s policy on the matter – annual report 2018

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>Human rights and democracy in the world and the European Union’s policy on the matter – annual report 2018</b></p>	<p>15/01/2020 <a href="#">T9-0007/2020</a> <a href="#">2019/2125(INI)</a> AFET</p>	<p>On 19 February 2020 the Parliament received a ‘Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – January I 2020 part-session’ informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by the High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 14 January 2020.</p>			
1)	<p>16. Calls on the Commission and the Member States to adopt a new, ambitious, comprehensive and binding Action Plan on Human Rights and Democracy for the next five years; insists that all human rights challenges, including digital rights, environmental rights, the rights of the elderly, sports and human rights, and the rights of migrants be adequately addressed in the future Action Plan;</p>				
2)	<p>18. Urges the Commission and the EEAS to make effective use of human rights clauses in international agreements, not only via political dialogue, regular progress assessments and recourse to consultation procedures upon request, but also by creating an effective mechanism for monitoring serious human rights violations which might occur through business activities [...]</p>				
3)	<p>19. Calls on the Commission and the EEAS, with stronger involvement of civil society groups and relevant international organisations, to join forces to address human rights and related obligations in dialogues or negotiations in any political and</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	economic areas, with the governments of non-EU countries, in order to reinforce the impact of human rights dialogues; recommends that the concerns being voiced about the human rights situation in those countries be heeded and that appropriate action be taken, including by raising individual cases in the context of human rights dialogues; [...]				
4)	26. Calls further on the Commission to keep Parliament properly informed about the use of EU funds for all research and development projects associated with the construction of drones [...] Urges the VP/HR to ban the development, production and use of fully autonomous weapons, which enable strikes to be carried out without human intervention;				
5)	27. Reiterates its call for the VP/HR to appoint an EU Special Representative on International Humanitarian Law and International Justice with a mandate to promote, mainstream and represent the EU's commitment to the fight against impunity;				
6)	28. Calls on the Commission and the EEAS to explore ways and present new tools to help the victims of violations of international human rights law and of international humanitarian law to access international justice and obtain remedy and reparation, including through building the capacity of non-EU countries to apply the principle of universal jurisdiction in their domestic legal systems;				
7)	29. Calls on the VP/HR and the Council to pay special attention to the human rights situation in illegally occupied territories; reiterates that illegal occupation of a territory or part of it is an ongoing violation of international law;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	32. Calls on the Council and the Commission to establish a coordinated procedure for granting visas to HRDs, and where appropriate, facilitating temporary shelter [...] Calls on the Commission and the Member States to ensure sufficient funding for the protection of HRDs in the relevant thematic programmes of the Neighbourhood, Development and International Cooperation Instrument (NDICI), and to ensure it is accessible and reaches those most in need, who are most marginalised [...] Calls on the Commission to make full use of this instrument in the future and insists that EU Delegations and Member States should increase their funding and capacity for emergency protection and support for HRDs at risk;				
9)	33. Calls on the Commission to prepare and adopt a communication to renew the Gender Action Plan after 2020, as an important EU tool to contribute to women's and girls' rights worldwide [...] Calls on the Commission and the EEAS to further contribute to gender equality and girls' and women's empowerment by working closely with international organisations, non-EU countries and civil society, in order to develop and implement new legal frameworks regarding gender equality;				
10)	42. Urges the Commission, the EEAS and the Member States to step up advocacy in relation to FoRB, and to initiate dialogue with states and representatives of civil society and faith, non-confessional, humanistic and philosophical groups and churches, religious associations and communities in order to prevent acts of violence, persecution, intolerance and discrimination against persons on the grounds of thought, conscience,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	philosophical opinions, and religion or belief [...] Urges the Commission, the EEAS and the Member States to fully implement the EU Guidelines on FoRB;				
11)	44. Reiterates its calls on the Council and Commission to carry out a transparent and comprehensive assessment of the effectiveness and added value of the position of the Special Envoy in the process of the renewal and reinforcement of their mandate and position by the Commission [...] reminds the Council and Commission of the need to adequately support, in permanent consultation with religious and philosophical organisations, the institutional mandate, capacity and duties of the Special Envoy for the promotion of FoRB outside the EU, by exploring the possibility of a multi-year term subject to annual review, and by developing working networks within all relevant EU institutions, in line with its resolution of 15 January 2019 on the EU Guidelines and the mandate of the EU Special Envoy on the promotion of FoRB outside the EU;				
12)	53. Urges the Commission to ensure that the projects supported by the European Investment Bank (EIB) and European Bank for Reconstruction and Development (EBRD) are in line with EU policy and commitments on human rights and that there are accountability mechanisms for individuals to make public violations related to the activities of the EIB and EBRD; calls on the Commission to systematically monitor the implementation of these clauses to ensure that they are respected by the beneficiary countries, and to report regularly to Parliament on the respect of human rights by the partner countries;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	59. Calls on the Commission and the EEAS to work towards a EU strategy to protect a healthy environment by working closely with third countries and international organisations such as the UNHCR, which has recently launched a joint strategy with the UN Environment Programme (UNEP);					

## 4.1.2.2. AFET Resolution 2: EP resolution of 15 January 2020 on the implementation of the common foreign and security policy – annual report

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>The implementation of the common foreign and security policy – annual report</b>	15/01/2020 <a href="#">T9-0008/2020</a> <a href="#">2019/2136(INI)</a> AFET	On 19 February 2020 the Parliament received a 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – January I 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by the High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 14 January 2020.			
1)	11. Calls, as a result, on the VP/HR to begin a process of all-around inclusive consultations, starting with the Member States and leading experts in EU foreign policy from outside the EU institutions, and by including civil society organisations;				
2)	23. Calls for the effective and comprehensive sharing of information by the Commission and the EEAS, so that Parliament is able to exercise its role of scrutiny in an efficient and timely manner, including in the field of the CFSP;				
3)	35. Calls on the Commission and the EEAS to continue strengthening economic and connectivity ties, using trade and association agreements, access to the single market and deepened people-to-people contacts, including through visa facilitation and liberalisation when all requirements are fulfilled;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	56. Urges the VP/HR to use all available political and diplomatic means to safeguard the joint comprehensive plan of action (JCPOA) and new strategic arms reduction treaty (New START) and to launch a coherent and credible strategy for multilateral negotiations on regional de-escalation and confidence-building measures in the Gulf that involves all the actors in the region;				
5)	57. Calls on the VP/HR to treat this dossier as a priority;				
6)	58. Calls on the VP/HR to promote a multidimensional biregional cooperation strategy with Latin America and the Caribbean in the area of security and defence, to advocate the joint defence of the multilateral order, the strengthening of cooperation in combating terrorism and organised crime and in combating climate change and its effects on social, political and economic stability, and to foster dialogue as a tool for achieving negotiated, peaceful settlements to the political conflicts we are witnessing;				
7)	71. Calls on the VP/HR, on the Commission and on the Member States to step-up their efforts in the field of CFSP cooperation, in order to make CSDP civil and military missions more robust, to improve their operational capacity by means of increased flexibility, to increase efficiency and effectiveness on the ground, and to make their mandates more encompassing, streamlined and clear;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	72. Calls, therefore, on the Commission to provide for the structural inclusion of women, youth, human rights defenders, and religious, ethnic and other minorities in all its conflict management-related activities;				
9)	74. Calls on the new Commission to present an EU action plan against terrorism;				

4.1.2.3. AFET Resolution 3: EP resolution of 15 January 2020 on implementation of the common security and defence policy – annual report

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Implementation of the common security and defence policy – annual report	15/01/2020 <a href="#">T9-0009/2020</a> <a href="#">2019/2135(INI)</a> AFET	On 19 February 2020 the Parliament received a 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – January I 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by the High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 14 January 2020.			
1)	17. Calls on the Council and the Commission to develop further the Union's capacity to act as a global partner, representing the interests of European citizens and acting as a positive force in international relations;				
2)	36. Urges the VP/HR to make sure that the EU's partners strictly comply with international humanitarian and human rights law, in addition to legally binding EU regulations, and that those cases are brought to justice without delay;				
3)	45. Calls on the VP/HR to explain to Parliament the thinking behind what is clearly a new crisis-management tool, namely the launching of mini-missions under Article 28 of the TEU;				
4)	47. Calls on the EEAS and the Commission to draw up mandates, budgets and rules of engagement and operational procedures				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	which are appropriate to the operations concerned, and to provide for an exit strategy;				
5)	54. Calls on the Member States and the Commission to consider a flexible mechanism to help Member States wishing to participate in a CSDP mission to bear the cost of doing so, thereby facilitating their decision to launch or strengthen a mission; notes that this instrument would be wholly consistent with the Union's strategic autonomy objectives in the operational field;				
6)	55. Calls on the VP/HR to regularly consult the European Parliament on all aspects of and the fundamental choices surrounding the common security and defence policy;				
7)	60. Calls on the Member States and the Commission to follow this example of flexible and operational cooperation, which has already proved valuable and effective;				
8)	63. Calls on the VP/HR to regularly consult Parliament on urgent matters pertaining to the implementation of the CSDP; believes that the VP/HR, or an appropriate EEAS official with direct oversight over CSDP command structures and involved in the design, implementation and appraisal of current civilian and military operations, should promptly inform Parliament of important changes to the structure of any such operations, particularly with regard to their				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	overall nature, mandate, length or early termination;				
9)	64. Calls on the VP/HR to enter into dialogue with Parliament on the instruments to be introduced and action to be taken;				
10)	74. Calls, in this regard, on the Council and the Commission, jointly with the European Parliament, to draw up an EU white paper on security and defence as a form of interinstitutional agreement and a strategic paper on the defence industry for the period 2021-2027;				
11)	76. Calls on the VP/HR to immediately inform Parliament about which PESCO projects are to be terminated early and of the grounds for terminating them; notes that the desired inclusion of participation in PESCO projects should not jeopardise a high level of ambition on the part of the participating Member States;				
12)	113. Calls on the Commission to provide further details on the role and responsibilities [...];				
13)	114. Calls on the VP/HR, the Council and the various European structures concerned to report to the Subcommittee on Security and Defence on a regular basis on the fulfilment of their mandate;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	118. Calls on the Council and the VP/HR to draw up such a tool, with a view to including it in, inter alia, the planning for the MFF, and with the further objective of ensuring consistency between the EU Global Strategy Implementation Plan on Security and Defence, the CARD and PESCO;				

4.1.2.4. AFET Resolution 4: EP resolution of 19 June 2020 on recommendation to the Council, the Commission and the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy on the Eastern Partnership, in the run-up to the June 2020 Summit

4.1.2.6. AFET Resolution 6: EP resolution of 16 September 2020 on EU-African security cooperation in the Sahel region, West Africa and the Horn of Africa

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>EU-African security cooperation in the Sahel region, West Africa and the Horn of Africa</b>	16/09/2020 <a href="#">T9-0213/2020</a> <a href="#">2020/2002(INI)</a> <b>AFET</b>	On 15 October 2020, the Parliament received a 'Commission communication on the action taken on positions and resolutions adopted by the European Parliament – September 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution.			
1)	15. Calls on the Commission and the Council to ensure that the use of all funding instruments is explored with a view to addressing the underlying causes of the conflicts and supporting the development of security capabilities in the affected African countries, as per Articles 209 and 212 of the Treaty on the Functioning of the European Union (TFEU) and in the light of the very serious security crises in the Sahel-Saharan region and East Africa;				
2)	16. Calls on the Commission, especially the VP/HR, to launch tailor-made bilateral partnerships for transformation covering a broad set of areas with security and defence as a priority; [...] calls on the VP/HR to pay tribute to advanced countries in the area of consolidating democracy and human security and to invite them to join bilateral partnerships under the 'more for more' principle;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	25. Calls on the VP/HR and the EEAS to come back to Parliament regarding the CSDP annual report 2019 <sup>7</sup> and Parliament's evaluation of missions in Africa; [...] calls on the VP/HR and the EEAS to come back to Parliament's evaluation of the force generation of EUTM Somalia;				
4)	48. [...] calls on the Commission and the Member States to coordinate their policies in this respect and to employ joint programming for the various countries and the region as soon as possible;				
5)	56. [...] calls on the Commission to improve public diplomacy efforts and the dialogue with the African Union, governments, parliaments, and civil societies in order to explain EU security support in Africa more effectively as a contribution to the African development strategy 2063;				

<sup>7</sup> European Parliament resolution of 15 January 2020 on the implementation of the common security and defence policy – annual report (Texts adopted, P9-TA(2020)0009).

4.1.2.7. AFET Resolution 7: EP resolution of 16 September 2020 on implementation of the EU Association Agreement with Georgia

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>Implementation of the EU Association Agreement with Georgia</b></p>	<p>16/09/2020  <a href="#">T9-0221/2020</a>  <a href="#">2019/2200(INI)</a>                      AFET</p>	<p>On 15 October 2020, the Parliament received a ‘Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – September 2020 part-session’ informing that the Commission will not be responding formally to the requests addressed in the resolution. The concerns raised in the resolution are fully shared by the Commission and the European External Action Service and were addressed by High Representative / Vice-President Josep Borrell in plenary. They are continuously addressed in the policy dialogue with the Georgian authorities and will also be taken up in the next Association Implementation Report, jointly prepared by the EEAS and the Commission to be published early next year and to be discussed at the next Association Council.</p> <p>The <a href="#">plenary debate</a> took place on 14 September 2020.</p>			
<p>1)</p>	<p>2. [...] calls on the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy and the Member States to denounce this process; emphasises that the AA covers the entire territory of Georgia, including its occupied regions, and aims to benefit its whole population; [...] asks the Commission and the EEAS to enhance their efforts to resolve the conflict peacefully by using all diplomatic instruments, including through the EUMM and the EU Special Representative for the South Caucasus and the crisis in Georgia, and to continue to support the Georgian Parliament’s ‘A Step for a Better Future’ package and foster people-to-people contact and confidence-building measures;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	17. Calls on the Council and the EEAS, therefore, to step up cooperation on cyber security in order to strengthen Georgia's resilience in this sphere, on the Commission to support reforms on media and information literacy, and on the Georgian Government to cooperate with EU institutions on best practices against disinformation;				
3)	19. [...] requests that the Commission mainstream gender equality into all its policies, programmes and activities in relation to Georgia;				
4)	25. [...] calls on the Commission to explore increased sectoral cooperation in the digital economy, education, research and innovation, to enhance the ICT sector, digitalisation and green technologies, and to share know-how and best practices;				
5)	26. [...] calls on the Commission to be more vocal in setting a target of securing single market access for Georgia and to step up initiatives aimed at deeper sectoral integration with a view to achieving more policy convergence with the EU and making the deliverables of bilateral cooperation more visible and tangible for both sides;				
6)	28. Calls on the Commission to support the full implementation of the DCFTA through coordinated assistance, with a focus on sustainable economic development in line with the European Green Deal and on support for SMEs and structural reforms in cooperation with business and civil society, including a major reform of the banking and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	financial sector aimed at combating money laundering and tax evasion;				
7)	31. [...] calls on the Commission to facilitate Georgia's participation in the European Green Deal and to ensure that the DCFTA does not contradict the environmental objectives and initiatives set out therein;				

## 4.1.2.8. AFET Resolution 8: EP resolution of 17 September 2020 on arms export: implementation of Common Position 2008/944/CFSP

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Arms export: implementation of Common Position 2008/944/CFSP</b>	17/09/2020 <a href="#">T9-0224/2020</a> <a href="#">2020/2003(INI)</a> AFET	On 15 October 2020, the Parliament received a 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – September 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 14 September 2020.			
1)	33. Calls, therefore, on the Commission, the Council and the Member States to provide an adequate level of funding to enable the reduction of market fragmentation and industrial consolidation while ensuring that the EU and its Member States will have the military capabilities they need; calls on the Commission to ensure the effective implementation of Directives 2009/81/EC and 2009/43/EC, including enforcement actions as regards procurement;				
2)	41. Calls on the Commission to keep Parliament properly informed about the use of EU funds for all research and development projects associated with the construction of drones; [...] Urges the VP/HR to ban the development, production and use of fully autonomous weapons which enable strikes to be carried out without human intervention;

## 4.1.2.10. AFET Resolution 10: EP resolution of 20 October 2020 on implementation of the EU Association Agreement with the Republic of Moldova

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Implementation of the EU Association Agreement with the Republic of Moldova</b>	20/10/2020 <a href="#">T9-0279/2020</a> <a href="#">2019/2201(INI)</a> AFET	On 10 December 2020, the Parliament received 'Commission <a href="#">replies</a> on the action taken on positions and resolutions adopted by the European Parliament – October II 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by the High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 19 October 2020.			
1)	9. Welcomes the Republic of Moldova's constructive contribution to the cooperation within the Eastern Partnership and encourages a permanent and intensified political exchange among countries part of AA/DCFTAs and the Commission on association-related reforms; calls on the Commission to make a proper use of existing mechanisms to continue monitoring the concrete implementation of reforms and develop a conditionality mechanism, including clear benchmarks, with the meaningful involvement of civil society, particularly at local level [...]				
2)	24. [...] calls on the Commission to increase support to the independent media, including in the regions [...]				
3)	31. [...] calls on the Commission and the Member States to provide political, technical and financial support to the civil society and urges EU Institutions to establish clear rules helping to avoid the provision of grants to "GONGO's" (NGOs established				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and financed by governments through informal channels);				
4)	34. Points out that the COVID-19 crisis has brought to light the fact that the health system of the Republic of Moldova is underdeveloped and is struggling to cope with the recent surge in the number of cases; urges the Commission, Member States and the Republic of Moldova to increase cooperation on public health resilience, exchange best practices and work with the civil society, the business and SME communities on establishing epidemic strategies focusing on the most vulnerable groups in society [...]				
5)	48. In this regard, points out that a lack of resources and a lack of knowledge about good governance, the rule of law and human rights is permeating and adversely affecting the effective functioning of the Moldovan administration and calls on the Commission to increase funding through the available budget support and technical assistance instruments, aimed at strengthening the justice and law enforcement authorities' capacity and efficiency, taking into account progress in the implementation of the reforms;				
6)	50. [...] calls on the Commission to provide much more consistent support to civil society organisations monitoring fraud and money laundering activities;				
7)	55. [...] calls on the Commission to monitor carefully how this will be done;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	58. Expresses deep concern at the situation of Moldovans stranded in EU Member States due to the COVID-19 crisis without social protection; calls on the Commission and the Member States to ensure, in the context of COVID-19, the equal treatment of third-country seasonal workers with EU nationals, as stated in Directive 2014/36/EU <sup>8</sup> , recalling that such workers have the same labour and social rights as EU citizens [...]				
9)	60. Underlines that the Union must hold the Republic of Moldova accountable for its commitments with regards to the social dimension of the AA; calls on the Commission to provide a detailed annual progress reports on the implementation of social and labour-related issues of the Association Agreement which does not only analyses the transposition of relevant Union directives and norms, but also their actual implementation; calls on the Commission to embrace proposals of labour experts to introduce a mechanism to sanction the violations of the standards agreed upon [...]				
10)	62. Calls on the Commission to upgrade neglected areas of AAs, which include important policy areas such as gender, the European Green Deal and the prevention of health crises;				

<sup>8</sup> Directive 2014/36/EU of the European Parliament and of the Council of 26 February 2014 on the conditions of entry and stay of third-country nationals for the purpose of employment as seasonal workers (OJ L 94, 28.3.2014, p. 375).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	63. Underlines that gender equality is a key precondition for sustainable and inclusive development; urges the Moldovan government and authorities to implement measures to further improve women’s representation and equal treatment at all levels of political and societal life; requests the Commission to mainstream gender equality in all its policies, programmes and activities in relation to the Republic of Moldova and encourages the authorities of the Republic of Moldova to promote programs that include consistent gender equality dimension, offer more support to the most disadvantaged and vulnerable groups in society, implement legislation to fight hate speech and physical violence perpetrated against the more vulnerable groups;				
12)	74. Calls on the Commission to contribute to addressing the economic challenges faced by young people in the Republic of Moldova by investing in programmes favouring youth and social entrepreneurship and to strengthen the connection between the education system’s reform and labour market demands [...]				
13)	75.[...] calls on the Commission to focus on this issue in its programmes;				
14)	79. Welcomes the regulatory approximation with the EU acquis, and encourages the Commission to provide to the Moldovan institutions and public				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	administration technical and financial help for this endeavour and the subsequent implementation [...]				
15)	80. Welcomes the National Strategy 'Digital Moldova 2020', but demands the Commission to support and assist programmes and reforms concerning media and information literacy to reflect the current digital age, as well as to upgrade sectoral cooperation in the digital economy [...]				
16)	81. Calls on the Commission to support investment in sectors with potential for development, growth and competitiveness in the EU, notably in the three sectors of strategic significance (i.e. sustainable energy and climate, the digital single market and cyber security, and transport);				
17)	89. [...] invites the Commission to include the Republic of Moldova in the stress tests conducted for the internal energy market ;				
18)	95. Encourages the Commission to perform a consultation, prepare and create tailored programs for citizens including a direct contact with beneficiaries through the on-line platform for applying and reporting the use of the funds made available by those programs; calls in this regard to consider the Green Deal purposes, as well as the day-to-day needs of citizens in the Republic of Moldova;				
19)	98. Calls on the Commission to strengthen the Delegation of the European Union to the Republic of Moldova, reinforce monitoring and strengthen the project team in Chişinău, so as to help the

## 4.1.2.13. AFET Resolution 13: EP resolution of 25 November 2020 on foreign policy consequences of the COVID-19 outbreak

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Foreign policy consequences of the COVID-19 outbreak	25/11/2020 <a href="#">T9-0322/2020</a> <a href="#">2020/2111 (INI)</a> AFET	On 8 January 2021, the Parliament received a 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – November II 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Mairead McGuinness on behalf of High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 23 November 2020.			
1)	7. Calls on the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy (VP/HR) to review the 2016 Global Strategy in the light of the global impact of the crisis, reflecting these geopolitical shifts, to ensure more strategic EU action and that the EU plays its part in defending, promoting and developing the rules-based multilateral world order that has been created since the Second World War, and to include democracy support and protection of human rights as a Team Europe priority, involving the European Parliament in this task through its existing democracy and rule of law support tools and mechanisms;				
2)	24. [...] calls on the Commission to increase its efforts and funding dedicated to combating Russian fake news;				
3)	46. [...] calls on the Commission to ensure that the consequences of COVID-19 do not undermine the implementation of the EU values and commitments				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	on human rights already established in the EU Action Plan on Human Rights and Democracy 2020-2024;				
4)	52. [...] calls on the Commission to keep engaging with Latin American countries, establish enhanced cooperation to tackle COVID-19, help with the recovery plans and support these countries politically with a view to preventing their excessive dependence on aid from other geopolitical players [...]				
5)	54. Calls on the EEAS, the Commission and the Member States to integrate gender equality, gender mainstreaming, and an intersectional perspective, including equal and diverse representation, into the EU's foreign and security policy, and to acknowledge the diverse experiences of women and other marginalised groups on whom this pandemic has had detrimental effects;				
6)	58. [...] calls on the Commission to work with its international partners to ensure that no one will be left behind once a vaccine has been made available;				

## 4.1.2.14. AFET Resolution 14: EP resolution of 20 January 2021 on implementation of the Common Foreign and Security Policy – annual report 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Implementation of the Common Foreign and Security Policy – annual report 2020</b>	20/01/2021 <a href="#">T9-0012/2021</a> <a href="#">2020/2206(INI)</a> AFET	On 2 March 2021, the Parliament received a 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – January 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 19 January 2021.			
1)	6. [...] recalls in this regard that the Commission should monitor and report regularly to Parliament on the human rights situation in the third countries which are beneficiaries of the visa waiver and should suspend this waiver in the event of violations in the country concerned; calls on the Commission and the Council to strengthen the Union's democracy support programmes globally by fostering pro-democratic bottom-up processes and building institutional resilience, and by supporting the work of European political foundations in strengthening democratic processes; reiterates its call, made in its recommendation of 13 March 2019, for a reform and review of the EU Special Representatives and Special Envoys;				
2)	10. [...] calls on the VP/HR and the Commission and Council presidents to continuously inform Parliament and involve it in the EU's external action;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	12. [...] calls furthermore, for an examination of how the quality, scope and format of committee meetings and exchanges with the EEAS and the Commission can be improved; considers that the 2010 'declaration on political accountability' is no longer an appropriate basis for relations between Parliament and the VP/HR and should be replaced by an interinstitutional agreement to enhance the democratic scrutiny rights of Parliament, in accordance with the Treaties;				
4)	20. Reiterates its commitment to enlargement as a key transformative EU policy and welcomes the revised methodology from the Commission and its stronger emphasis on the political nature of the enlargement process; [...] calls on the Council and the Commission to launch the intergovernmental conferences with these two countries without delay and more generally to accelerate the accession process, as Western Balkan countries are geographically, historically and culturally part of Europe [...]				
4)	21. Welcomes the results of the EU summit with the Eastern Partnership (EaP) countries and hopes that the six countries will genuinely commit to the reform processes needed for building societies which are more democratic, more prosperous, fairer, more stable and closer to fundamental values and principles; underlines that cooperation with EaP countries and other EU neighbourhood countries should be a priority for the CFSP owing to the vital interest of the EU in the development and democratisation of these countries; calls on the Commission and the EEAS to continue strengthening economic and connectivity ties,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	using trade and association agreements, access to the single market and deepened people-to-people contacts, including through visa facilitation and liberalisation when all requirements are fulfilled [...]				
5)	30. [...] urges the VP/HR to use all available political and diplomatic means to safeguard the JCPOA; calls on the VP/HR, in view of the existing rivalries in the Gulf region, to intensify political dialogue with the countries of the region with the aim of promoting de-escalation and an inclusive regional security architecture, in line with the Foreign Affairs Council conclusions of 10 January 2020; calls on the VP/HR, in this respect, to consider appointing a Special Envoy for the Gulf region to facilitate that task;				
6)	36. Reiterates that the Union is ready to use all instruments and options at its disposal, including those provided for in Article 29 TEU and Article 215 of the Treaty on the Functioning of the European Union for the defence of its interests and those of its Member States; recalls the Council conclusions of 14 October 2019 calling on the Member States to take strong national positions regarding their arms export policy to Turkey on the basis of the provisions of Common Position 2008/944/CFSP, including the strict application of criterion 4 on regional stability and calls on the VP/HR and the Council to consider introducing an initiative to oblige all Member States to halt arms export licensing to Turkey in accordance with this Common Position; [...] reiterates its call on the VP/HR for as long as Turkey continues with its current illegal, unilateral actions in the Eastern				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Mediterranean that run counter to the sovereignty of any EU Member State and international law, and does not engage in dialogue based on international law [...]				
7)	54. Calls on the Commission, the Council and the VP/HR to continue to communicate to the PRC that the EU will not tolerate its continued human rights violations in Hong Kong, Tibet and Xinjiang, nor its treatment of people belonging to minorities, and to play a decisive role on the international stage to secure Hong Kong's autonomy; condemns the violation of the 'one country, two systems' model by the adoption of the National Security Law in China, which seriously undermines the high degree of autonomy of Hong Kong and has a detrimental impact on the independence of the judiciary and on the freedom of expression in Hong Kong; expresses concerns about the impact of the imposition of the National Security Law in Hong Kong on the relationship between China and Taiwan; [...] requests that the Commission and the Member States actively push back against the brutal persecution of Uighurs in Xinjiang, as well as of other ethnic and religious minority groups, particularly Christians and Tibetans; calls on the Member States and the VP/HR to adopt sanctions under the EU Global Human Rights Sanctions Regime against the Chinese officials and state-led entities responsible for orchestrating the policy of mass detention of Uyghurs and forced labour in China;				

## 4.1.2.15. AFET Resolution 15: EP resolution of 20 January 2021 on implementation of the Common Foreign and Security Policy - annual report 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Implementation of the Common Security and Defence Policy - annual report 2020</b>	20/01/2021 <a href="#">T9-0013/2021</a> <a href="#">2020/2207(INI)</a> AFET	On 2 March 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – January 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 19 January 2021.			
1)	5. Calls on the VP/HR and the Council to provide a common formal definition of strategic autonomy and to define its objectives, means and resources for implementation very clearly;				
2)	26. Is concerned about the ongoing disinformation campaign towards the EU in the Central African Republic; calls on the VP/HR to take action in order to efficiently identify the origin of the disinformation campaign and to counter such attacks [...]				
3)	30. [...] specifically urges the Member States to urgently assign the intelligence, surveillance, reconnaissance constabulary and naval assets needed to boost Operation Irini's up until now limited capabilities and encourages stronger cooperation with NATO's ongoing maritime operation Sea Guardian, as well as cooperation with regional partners; recalls international obligations regarding search and rescue at sea; calls on the VP/HR to make full use of EU assets in				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	this domain, in particular the EU satellite centre and the EU intelligence centre;				
4)	33. Notes that the strategic review of the Military Planning and Conduct Capability (MPCC) is to be initiated in 2020; calls, given the impact of this review on the planning, command and control of military missions and operations, on the VP/HR to keep Parliament informed of the available and chosen options in a timely manner; reiterates that the EU requires a permanent and fully-fledged military command structure in order to be able to act autonomously and therefore calls on the Council to implement such a structure;				
5)	44. Welcomes the agreement reached on the EDF regulation, and calls for the swift adoption and setting-up of the EDF, which will address and speed up the common agreed defence capability development priorities in the air, land, maritime, and cyber domains and thus foster the EU's ability to operate as a global actor and an international security contributor and provider; calls on the Member States, the Council and the Commission to provide adequate funding to the EDF and to focus on structural projects with high added value, thus facilitating industrial cooperation between Member States and the consolidation of a strong European Defence Technological and Industrial Base (EDTIB), strengthening technical, industrial and strategic capabilities in order to reinforce EU's ability to produce and dispose of military capabilities autonomously and to maintain Europe's technological autonomy in the long-term; encourages defence capability				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	initiatives to facilitate the engagement of small and medium-sized enterprises;				
6)	44. [...] calls on the Member States, the Council and the Commission to provide adequate funding to the EDF and to focus on structural projects with high added value, thus facilitating industrial cooperation between Member States and the consolidation of a strong European Defence Technological and Industrial Base (EDTIB), strengthening technical, industrial and strategical capabilities in order to reinforce EU's ability to produce and dispose of military capabilities autonomously and to maintain Europe's technological autonomy in the long-term; encourages defence capability initiatives to facilitate the engagement of small and medium-sized enterprises;				
7)	79. [...] urges the Council and the VP/HR to launch an EU-led initiative with a view to pushing for the conversion of the INF Treaty into a multilateral treaty;				
8)	85. Asks the VP/HR to bring forward proposals to strengthen the available expertise in non-proliferation and arms control in the EU and to ensure that the EU plays a strong and constructive role in developing and reinforcing the global rules-based non-proliferation efforts and arms control and disarmament architecture [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	88. Urges the Member States to comply with the EU Code of Conduct on Arms Exports; reiterates the need for the strict application by all Member States of the rules laid down in Council Common Position 2008/944/CFSP; recalls that Member States committed to strong national positions regarding their arms export policy to Turkey on the basis of the provisions of Common Position 2008/944/CFSP, including the strict application of criterion 4 on regional stability; reiterates its calls on the VP/HR, for as long as Turkey continues with its current illegal, unilateral actions in the Eastern Mediterranean that run counter to the sovereignty of any Member State (notably Greece and Cyprus) and international law, and does not engage in dialogue based on international law, to introduce an initiative in the Council for all Member States to halt arms export for all types of military equipment, including weapons, weapons for dual-use goods and know-how, to Turkey in accordance with the Common Position;				
10)	90. [...] calls on the VP/HR, the Member States and the European Council to adopt a joint position on autonomous weapons systems that ensures meaningful human control over the critical functions of weapons systems [...]				
11)	93. Welcomes the regular exchanges of views with the VP/HR on CSDP issues and calls on the VP/HR to ensure that Parliament's views are duly taken into consideration; stresses the need to ensure regular briefings from EU Special Representatives, Special Envoys, and mission and operation commanders;				

## 4.1.2.16.AFET Resolution 16: EP resolution of 20 January 2021 on human rights and democracy in the world and the EU's policy on the matter – annual report 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Human rights and democracy in the world and the EU's policy on the matter – annual report 2019</b>	20/01/2021 <a href="#">T9-0014/2021</a> <a href="#">2020/2208(INI)</a> AFET	On 2 March 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – January 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 19 January 2021.	•		
1)	40. [...] recalls, in this context, that according to Regulation (EU) 2018/1806, the Commission should monitor and report regularly to Parliament, including on the human rights situation in the third countries which are beneficiaries of the visa waiver and should suspend the visa exemption in the case of violations in the country concerned;				
2)	42. Calls on the Commission to monitor and include as part of its annual report on the achievement of the objectives of the NDICI a chapter on respect for human rights and compliance with Article 8 – General principles of the Instrument by the partner countries that benefit from its funding; calls on the Commission to propose appropriate measures, including the suspension of EU funding to state actors and the redirection of aid towards civil society, in the event of a serious violation of human rights or of the principles of the NDICI by its beneficiaries; calls for greater transparency regarding human rights-related provisions in financing agreements				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and a clarification of the mechanism and criteria for the suspension of such agreements in the event of a breach of human rights, democratic principles and the rule of law and in serious cases of corruption; calls on the Commission to strictly refrain from using budget support to third countries' governments as an operational modality in countries witnessing widespread violations of human rights and repression of HRDs;				
3)	45. Calls on the Commission to establish, in cooperation with the EEAS, a framework for annual reporting by the European Investment Bank (EIB) on its operations outside of the EU with regard to compliance with the general principles guiding the Union's external action as referred to in Article 21 TEU and the EU strategic framework and action plan for human rights; urges the Commission to ensure that the projects supported by the EIB are in line with EU policy and commitments on human rights, and that accountability mechanisms exist for individuals to report violations related to the activities of the EIB [...]				
4)	47. Calls on the EEAS and the Commission to hold regular consultations with civil society and to engage in a structured and regular dialogue with Parliament's competent bodies on the implementation of the new action plan in order to allow Parliament to play its part in the action plan's activities, in particular through parliamentary diplomacy, and to effectively fulfil its scrutiny role; recommends that a set of benchmarks and progress indicators be established in order to effectively monitor the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	implementation of the action plan; calls on the EEAS to report on the progress made in achieving the objectives of the action plan against these benchmarks; requests that the EEAS follow up regularly on Parliament's resolutions and debates which are relevant for the implementation of the action plan [...]				
5)	57. [...] calls on the Commission and the EEAS to explore ways and present new tools to contribute to the fight against international crimes, to help the victims of violations of international human rights law and of international humanitarian law to access international justice and obtain remedy and reparation, including through building the capacity of Member States and non-EU countries to apply the principle of universal jurisdiction in their domestic legal systems;				
6)	58. Reiterates its call for the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy (VP/HR) to appoint an EU Special Representative on International Humanitarian Law and International Justice with a mandate to promote, mainstream and represent the EU's commitment to the fight against impunity;				
7)	78. Calls on the Commission and the Member States to implement the gender equality strategy in a coherent manner both within and outside the EU, and to take effective and concrete actions to counter the backlash against women's rights, gender equality and SRHR;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	84. [...] calls on the Commission to include commitments and benchmarks to eradicate female genital mutilation in its cooperation negotiations and agreements with the countries concerned;				
9)	87. Commends the progress on the EU-UN Spotlight Initiative; calls on the Commission to ensure that projects sponsored by the initiative work towards addressing the root causes of women's rights violations, including the perpetuation of harmful gender-based stereotypes;				
10)	89. Welcomes the attention given to the EU actions on protecting and promoting the rights of the child on the occasion of the 30th anniversary of the UNCRC and reiterates its call on the Commission to explore how the EU as a body can accede to the UNCRC;				
11)	106. Calls on the Commission, the EEAS and the Member States to implement the EU Guidelines on the promotion and protection of freedom of religion or belief; reiterates its calls on the Council and the Commission to carry out a transparent and comprehensive assessment of the effectiveness and added value of the position of the Special Envoy prior to launching the process of the renewal of this mandate and position by the Commission; insists that following the assessment, its work should be provided with adequate resources to enhance the EU's effectiveness in this area; laments the delay in carrying out this assessment; calls on the Commission to guarantee transparency in the

	<p>nomination, mandate, activities and reporting obligations of the next Special Envoy and to ensure their commitment to the universality, indivisibility and interdependence of all human rights and to European values; reminds the Commission of the need to adequately support the institutional mandate, capacity and duties of the Special Envoy;</p>				
12)	<p>108. Reiterates the importance it attaches to academic freedom and urges the EU and the Member States to step up their diplomatic efforts through bilateral and multilateral engagement in relation to threats or attacks on academic freedom by state and non-state actors, in particular violent attacks on institutions and members of the higher education community, as well as discriminatory policies or practices, undue restrictions or pressure on research or expression, and wrongful prosecution or detention; calls on the EEAS and the Commission to revisit existing support and protection mechanisms for HRDs, in order to develop the capacity to identify and provide assistance, including emergency protection and support, in cases involving attacks on academic freedom; calls on the Commission to ensure continued high-level support to the European Inter-University Centre for Human Rights and Democratisation and the Global Campus of Human Rights and Democracy, as a flagship of the EU's support to human rights education worldwide;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	117. Highlights the continuing change in media landscapes and the increasing use of social networks worldwide; underlines the challenges and risks that this evolution poses regarding violations of freedom of offline and online expression, censorship, data protection, hate speech, harassment and the safety of journalists and whistle-blowers, among others; calls on the Commission to monitor social media companies' policies and practices, in particular their self-regulatory tools, which have implications for the exercise of freedom of expression worldwide, and present proposals for policy or legislation changes where appropriate;				
14)	125. Calls for the setting up of an EU mandatory human rights and environmental due diligence instrument that requires companies to engage actively in the identification, assessment, mitigation, prevention and notification of any adverse impacts of their businesses and supply chains on human rights, applicable to corporate bodies, business leaders and executives in the event of a breach and providing victims with access to justice and remedy; welcomes the announcement that the Commission proposal will include a liability regime; calls on the Commission to consider exploring the possibility of incorporating further liabilities, including criminal liability, for the most severe violations;

## 4.1.2.17. AFET Resolution 17: EP resolution of 20 January 2021 on connectivity and EU-Asia relations

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Connectivity and EU-Asia relations</b>	20/01/2021 <a href="#">T9-0016/2021</a> <a href="#">2020/2115(INI)</a> AFET	On 2 March 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – January 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Olivér Várhelyi on behalf of High Representative / Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 19 January 2021.			
1)	2. Encourages the Commission and the European External Action Service (EEAS) to create a global EU Connectivity Strategy as an extension of the current EU-Asia Connectivity Strategy in order to align our connectivity philosophy and connectivity policies with the goal of strengthening the EU's role as a true and indispensable geopolitical and geo-economic actor with a single narrative and as a cross-cultural enabler, and to strengthen partnerships with democracies around the world which share our fundamental values;				
2)	8. Invites economic and societal stakeholders and relevant experts in the field at EU level and in the Member States to participate in the development and implementation of the Strategy; calls on the Commission to create suitable forums for such involvement; insists that parliaments must play an active role in shaping and overseeing connectivity policy;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	14. Underlines the multidimensional nature of the Strategy, which will require effective coordination of existing strategies, policies and projects for international connectivity and interoperability; expects existing coordination between the EEAS and the Commission Directorates-General to be enhanced and streamlined in this regard;				
4)	15. Recommends that the EEAS should provide the secretariat of the connectivity coordination body, while the corresponding working level should include all relevant Directors-General and be co-chaired by the Secretaries-General of the Commission and the EEAS in order to maximise synergies and efficiency;				
5)	17. Underlines the importance of involving Parliament, the Council, the Member States and national parliaments in the Strategy; insists that the Commission undertake regular reporting outlining the achievements in implementing the Strategy, to be discussed in detail by Parliament and the Council [...]				
6)	18. [...] recommends the creation of a high-level expert group on international connectivity as an advisory body to the Commission, including business representatives, as envisioned in the proposal for a business advisory group outlined in the joint communication of 19 September 2018, plus civil society and other stakeholders, including from the fields of human rights, the environment and labour rights, and international financial institutions, with a particular emphasis				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	on the European Investment Bank (EIB) as the EU bank and in accordance with the criterion of gender parity;				
7)	24. [...] emphasises the importance of identifying flagship projects for the relevant sectors, which should have strong European added value, represent a strategic public interest, and demonstrate the EU's unique valuesbased approach; calls on the Commission and the EEAS to propose criteria for identifying such projects;				
8)	25. Welcomes initiatives such as the G20 Principles for Quality Infrastructure Investment and the resolution of the UN Environmental Assembly on sustainable infrastructure; encourages the Commission, the EEAS and the Member States to promote the EU's strategic approach to international connectivity in all multilateral and plurilateral forums, such as the UN General Assembly, ASEM or the G7;				
9)	31. Calls on the Commission to pursue further progress in its maritime transport initiatives to digitalise and simplify administrative formalities and strengthen maritime security at ports in Asia via the International Maritime Organization and maritime transport agreements; highlights the importance of further engaging with third countries in Asia through pertinent maritime transport agreements, which would help to regulate, facilitate and make more sustainable maritime traffic;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	32. Stresses that the Strategy must ensure that hauliers from Asia must adhere to EU standards in the road transport sector; calls for cooperation between the Commission and Member States with regard to the enforcement of EU and national legislation in the sector;					
11)	33. Places particular emphasis on the fact that digitalisation is a key dimension for the 21st century and underlines its impact on the everyday lives of every single person worldwide; calls on the Commission and the Member States, therefore, to step up their ambitions for the digital transformation; expects the EU to become a competitive global actor on a par with the US and China in digitalisation; considers, in this context, that the promotion of digital connectivity and digital access through very high capacity networks based on fibre and 5G is a matter of great priority for the EU; believes that the development of open strategic autonomy in this sector must include diversification of the supply chain of equipment manufacturers through the promotion of open and interoperable network architectures and digitalisation partnerships with third countries and regions who share our values and utilise technology in complete compliance with fundamental rights; urges the Commission to condition connectivity projects with third countries on the ethical use of technology both domestically and abroad; emphasises, in this connection, that the security aspect is paramount;					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	<p>36. Stresses that 5G infrastructure is an element of Europe's strategic resilience; calls on the Commission to devise a plan for developing European 5G and phasing-out 5G technology built by third countries which do not share European values and standards; urges the Commission to strongly condition connectivity projects with third countries on the ethical use of technology, both domestically and abroad; welcomes the provisions for cybersecurity in the Digital Europe Programme as regards the tender process; advocates the inclusion of the 5G toolbox approach in the promotion of digital connectivity, given its possibilities for extraterritorial application; encourages the Commission to work towards replicating the EU's international mobile roaming agreements with connectivity partners; welcomes the Next Generation Internet initiative and investment in digital infrastructure projects, such as the Building Europe Link to Latin America deep sea cable; recommends that the Commission identify real needs for targeted digital Official Development Assistance; proposes that the Commission promote 6G development cooperation with like-minded countries as a flagship project;</p>				
13)	<p>41. Calls on the Commission to align the Strategy with the forthcoming EU Strategy on Cooperation in Research and Investment; calls on the Commission to pursue its strategic approach to cooperation in research and innovation (R&amp;I) by upgrading relations with like-minded partners, including by considering associated partner status, and by basing cooperation on such</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	universal principles as academic freedom, open access, the protection of intellectual property, a level playing field, the integrity of research and the protection of personal data [...]				
14)	45. Stresses, in this connection, the central role of international environmental, sustainability and social standards in trade and investment agreements; recalls the review of the Commission's 15-point action plan and discussions in the Council on trade and sustainable development; calls on the Commission to implement trade defence instruments in full to ensure that European businesses are not subjected to unfair trading practices, and to implement trade and sustainable development chapters effectively in line with the Paris Agreement, the Sustainable Development Goals and ILO conventions, with a view to developing the Strategy and pursuing sustainable integration; is of the view that the Commission and the EEAS should employ a more strategic approach to the Generalised Scheme of Preferences, including by stepping up action at the highest political level to strengthen its effectiveness vis-à-vis standards on human rights, international labour the environment and good governance;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	47. Emphasises the role of international trade agreements negotiated by the EU and the importance of their proper implementation; is of the view that connectivity should be included in the Commission communication on the trade policy review; emphasises international norms and transparent standards to promote quality infrastructure and network interoperability; calls on the Commission to make existing agreements more ambitious by systematically including standardisation policy in bilateral partnerships and trade agreements in order to promote multilateral standard setting and the broad uptake of internationally agreed standards and transparent regulatory cooperation in full compliance with the right to regulate;				
16)	48. Is of the view that the EU model of standardisation policy has the advantage of being innovative, open and inclusive, and must be enabled to continue to cope with the global competition between different standardisation paradigms; expects the Commission to play a proactive role in promoting standardisation policy; recommends, therefore, that coordinating responsibility for EU standardisation policy should be given to a high-ranking Commission official, ideally the Commissioner for the internal market; calls on the Commission and the EEAS to coordinate more closely with like-minded democratic partners in international standard-setting forums in order to promote international standards that support democracy, the rule of law and fundamental rights;				

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	61. Calls on the Commission to assess the Regional Comprehensive Economic Partnership agreement and China's role therein;					
18)	62. Expresses its firm belief that the EU should strengthen cooperation with the US; welcomes the US-initiated Blue Dot Network (BDN) concept; calls on the Commission and the EEAS to engage with the US on the BDN in order to strengthen transatlantic cooperation on rules-based and sustainable connectivity, while also highlighting concerns with regard to the latter; hopes for future cooperation with particular regard to upholding high quality standards for connectivity projects and fostering private sector involvement;					
19)	67. Underlines the importance of Europe's outermost regions, especially those closer to Asia, and highlights their economic potential; encourages the Commission to facilitate investments in those territories in order to strengthen their connectivity and boost their economies;					
20)	68. Calls on the Commission and the EEAS to develop robust monitoring capabilities in the connectivity strategies of other countries and regions, including as regards the financial resources actually deployed, the effects on financial stability, sustainable development, and adherence to human rights, the rule of law, good governance, and the principles of multilateralism [...]					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	72.Expects the Commission to present a new communication approach with a clear narrative in order to create adequate visibility and sufficient accountability for EU connectivity policies and their results;				

4.1.2.18. AFET Resolution 18: EP resolution of 11 February 2021 on annual implementing report on EU Association Agreement with Ukraine

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Annual implementing report on EU Association Agreement with Ukraine</b>	11/02/2021 <a href="#">T9-0050/2021</a> <a href="#">2019/2202(INI)</a> AFET	On 23 March 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – February 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Vice-President Valdis Dombrovskis on behalf of High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 9 February 2021.			
1)	6. Stresses the importance of pro-democratic reforms and trust in institutions as the most efficient security mechanisms; of calls on the Commission to use the mechanisms in place to facilitate and support Ukraine's implementation reforms [...]				
2)	9. invites the Commission to propose for Ukraine and other countries associated with the EU, in coordination with international financial institutions, a detailed, conditional and tailor-made economic and investment proposal in the context of addressing the consequences of the COVID-19 pandemic by the end of 2020 [...]				
3)	11. Calls on the Commission to upgrade neglected areas of the AA/DCFTAs with regard to important policy areas such as gender mainstreaming and dealing with health crises, while ensuring that they do not run counter to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the imperative for environmental and climate action or the European Green Deal initiatives;				
4)	12. Calls on the Commission to support investments in sectors with potential for development, growth and competitiveness in the EU, and which could further foster economic diversification, such as sustainable energy and climate, the digital single market and cyber security, and transport;				
5)	16.[...] and encourages the Commission to provide adequate technical and financial support;				
6)	17. Welcomes the achievements of the reform on decentralisation and the empowerment of municipalities initiated in 2014, which has proven to be one of the most successful reforms so far; acknowledges the support of the U-LEAD project, resulting in the formation of almost 1 000 voluntarily amalgamated local communities with around 11.7 million citizens; assesses positively the steps taken so far with a view to decentralising public authority and public finances through a package of legal acts and their practical implementation; calls on the Commission to study the details of the decentralisation reform closely and to potentially use it as a successful case study for other countries;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	29. Emphasises the need for a political solution to the conflict in eastern Ukraine; asks the Commission and the European External Action Service (EEAS) to enhance their efforts in peaceful conflict resolution, by supporting the efforts of all sides in the peace process, as well as increasing confidence-building measures and backing a mandate for deploying a UN peacekeeping mission throughout the occupied territory of Ukraine;				
8)	30. [...] calls on the EEAS and the Commission to better supervise the implementation of EU sanctions, including the better supervision of the activities of the authorities in the Member States charged with implementing the common EU rules;				
9)	32. [...] calls on the VP/HR, the Commission and the Member States to provide all necessary support for the establishment of a Crimea International Platform that would allow the efforts aimed at the restoration of the territorial integrity of Ukraine to be coordinated, formalised and systematised;				
10)	46. Calls on the Commission to develop existing and new tools in the area of the rule of law and good governance to monitor and assess progress by Ukraine, in particular the EU Justice Scoreboard and the Rule of Law Mechanism, in order to ensure close scrutiny of the ongoing reforms and the proper identification and correction of possible shortcomings in these reforms;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	49. [...] calls on the Commission to continue assisting Ukraine in the elaboration of new draft laws on IPR;					
12)	56. Underlines that in eastern Ukraine more than 3,5 million people on both sides of the line of contact are still dependent on humanitarian assistance and protection, facing water cuts and electricity blackouts; notes that the current COVID-19 pandemic has exacerbated the challenges these people are facing; encourages the Commission, in coordination with the UN bodies, to step up its efforts to provide assistance during this humanitarian crisis, in line with the Humanitarian Needs Overview;					
13)	61. Calls on the EEAS and the Commission to swiftly operationalise the EU global human rights sanctions regime (a European Magnitsky-type legislation), allowing sanctions to be applied against individuals and companies involved in grave human rights violations, paying particular attention to the situation in the temporarily occupied territories of Ukraine in Crimea and in parts of the Donetsk and Luhansk regions, and sanctions against those responsible for other crimes, including corruption;					
14)	65. [...] calls on the Commission to invite Ukraine to participate in the Europe for Citizens programme;					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	75. [...] requests that the Commission and the EEAS mainstream gender equality in all their policies, financial support, programmes and activities in relation to Ukraine, particularly when aimed at mitigating the negative effects caused by COVID-19, as women, including women entrepreneurs, have been among those most impacted by the strict confinement;				
16)	81. Encourages the Commission to support Ukraine in identifying the areas that could further foster economic diversification and in prioritising them in the process of the full implementation of the DCFTA;				
17)	88. [...] encourages the Commission to further support Ukraine's efforts concerning media and information literacy, e-governance and the digital economy to reflect the current digital age and gradual integration into the EU's digital single market, as well as to explore ways of reducing roaming fees between the EU and Ukraine [...]				
18)	89. Calls on the Commission and the EEAS to conduct a credible needs assessment for the Donbas region to establish a strategy for its socio-economic recovery and suggests the creation of an appropriate international framework for the reconstruction of Donbas;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	91. [...] urges the Commission, the Member States and Ukraine to step up cooperation on public health resilience and to exchange best practices and work with civil society on establishing epidemic strategies focusing on the most vulnerable groups; urges the Commission to provide support to the Government of Ukraine in gaining access to COVID-19 vaccines;				
20)	101. Recalls that poultry meat is a sensitive product in the EU; acknowledges the solution found for the export of 'other' cuts of poultry by amending the trade preferences for poultry meat and poultry meat preparations and thereby closing the loophole in the agreement; calls on Ukraine to abstain from similar practices and to fully respect and implement all provisions of the DCFTA in good faith; calls on the Commission to conduct a thorough monitoring of the implementation of the DCFTA and to use all available measures to overcome any market-distorting practices and the potential exploitation of legal loopholes;				
21)	104. Calls on the Commission to provide technical support for regional employment centres in order to stimulate employment, to support and invest in young people and sustainable economic development programmes favouring social entrepreneurship, and to focus on young people from rural areas in order to strengthen the education system through labour market demand so as to protect the most vulnerable and prevent a lack of socio-economic opportunities;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
22)	105. Encourages the Commission to monitor the effects of the DCFTA on the labour and freedom of association rights connected to trade with the EU;				
23)	106. Calls on the Commission to ensure that trade unions, as well as civil society in all its diversity, are involved in the monitoring of the implementation of the Association Agreement; calls on the Government of Ukraine and the Commission to support NGOs which investigate violations of the DCFTA, in particular in the social sphere;				
24)	114. Requests that the Commission screen Ukraine's compliance with European Union acquis in the energy sphere with a view to the further integration of energy markets [...]				
25)	125. Welcomes Ukraine's ambition to contribute to the European Green Deal's goals and calls on the Commission to adequately support Ukraine's efforts, inter alia by establishing a relevant structured dialogue, a roadmap and an exchange of information; calls on the Commission to ensure that the DCFTA does not contradict the environmental objectives and initiatives set out therein;				
26)	129. [...] appeals to the Commission to launch a dialogue with the aim of ensuring that border crossing procedures are prompt and free of corruption through, inter alia, investments, the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	training of personnel and an effective mechanism for border crossing complaints [...]				
27)	136. Stresses the importance of continued support to the European Union Advisory Mission (EUAM) Ukraine and its role in the reform of the civilian security sector; welcomes the opening of its field office in Mariupol, and hopes for tangible results, in keeping with the Mission's mandate; requests that the Commission step up its efforts in strengthening the capacities of the Ukrainian authorities involved in AA/DCFTA implementation; requests that the Commission design the tools necessary for supporting Ukraine's continuous alignment with the EU acquis, in line with the relevant decisions of the 22nd Ukraine-EU Summit;				
28)	140. Commends Ukrainian civil society, young people and NGOs for their activities in all areas of public and political life, and, in particular, for their support to the implementation of the AA/DCFTA, for addressing the challenges of the COVID-19 pandemic, for combating disinformation campaigns, for providing assistance and relief to IDPs and other vulnerable groups and bolstering societal resilience and media literacy among the Ukrainian people; [...] calls on the Commission to prioritise support to these NGOs and civil society organisations [...]				

4.1.2.19. AFET Resolution 19: EP resolution of 25 March 2021 on 2019-2020 Commission Reports on Albania

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
2019-2020 Commission Reports on Albania	25/03/2021 <a href="#">T9-0112/2021</a> <a href="#">2019/2170(INI)</a> AFET	<a href="#">SP(2021)409</a>	Final reply (SP) received 1 September 2021	General reply			
1)	51. [...] calls on the European External Action Service (EEAS) and the Commission to improve coordination and address disinformation and hybrid threats that seek to undermine the EU perspective by more strategically underscoring the EU's relevance to citizens in the Western Balkans, and urges them to foster the creation of a Balkan-focused centre of excellence to counter disinformation;	<p>The Commission and the EEAS will continue to coordinate and strategically address issues related to disinformation and hybrid threats, including by supporting initiatives to enhance media literacy in the country. In its 2020 Report, the Commission encouraged the national authorities to increase efforts to fight disinformation and build up the resilience of media outlets. The Commission will continue to monitor the development in these areas, including in its annual reports.</p> <p>The fight against disinformation and hybrid threats are in particular important during the COVID-19 pandemic, for which the Commission also is focusing on providing vaccines to the region as soon as possible. The COVAX mechanism, to which the EU has contributed over EUR 3 billion delivered the first doses to the Western Balkans. In addition, the Commission is working with EU Member States and vaccine manufacturers to operationalise the resale of vaccine doses to the Western Balkans under the Advance Purchase Agreements for which the EU has made available EUR 70 million in grants to the Western Balkans. A first success was the conclusion of agreements announced on 20 April 2021 for the delivery of 651 000 doses of BioNTech/Pfizer COVID-19 vaccines to all the Western Balkans. These are funded by the grants and shared with the facilitation of Austria. The first delivery to all the partners in the region took place in early May, with regular deliveries to continue until August.</p>				<p>The <a href="#">2021 Commission communication on EU enlargement</a> notes that:</p> <p>'in line with EU priorities under the Joint Framework on countering hybrid threats, the Western Balkans Strategy and the Zagreb Declaration, the EEAS and the Commission have deepened their policy dialogue with enlargement partners on countering hybrid threats, in particular on cyber-resilience, the protection of critical infrastructures, strategic communication and addressing disinformation. Strategic communication continued to focus on thematic communication campaigns highlighting the benefits of the EU support for citizens and for economies, and on public diplomacy actions with direct outreach to citizens, notably the youth, to stimulate debate about the common European future. In parallel, the EU continued to communicate the political and policy developments in EU – Western Balkans relations through web and social media channels. Promoting freedom of expression and independent journalism in the enlargement region remains a priority, while cybersecurity capacity building is a crucial part of the Digital Agenda for the Western Balkans and a priority in the new EU cybersecurity strategy'.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	80. [...] calls on the EEAS and the Commission to enhance support to Albania in countering malicious foreign interference from countries such as Russia, China and Iran [...]	Although the follow-up mentions point 80, no specific reply is provided for this particular point.		No specific action identified.	

4.1.2.20. AFET Resolution 20: EP resolution of 25 March 2021 on 2019-2020 Commission Reports on Kosovo

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
2019-2020 Commission Reports on Kosovo		25/03/2021 <a href="#">T9-0113/2021</a> <a href="#">2019/2172(INI)</a> AFET	<a href="#">SP(2021)409</a>	Final reply (SP) received 1 September 2021	Specific reply			
1)	8. [...] calls on the Commission and the EU Office in Kosovo to step up their efforts in promoting the role, requirements and benefits of a closer partnership between the EU and Kosovo;		No specific reply is provided to this particular point.				Not mentioned.	
2)	26. [...] urges Kosovo to address online radicalisation and external extremist influences, and calls on the Commission and the Member States to assist Kosovo in this important endeavour;		On promoting regional cooperation, greater coordination and exchange of information between the security services of Kosovo and the EU and its Member States in countering potential terrorist activities (paragraph 26), the Commission agrees on the importance of cooperation with Kosovo on countering terrorism and noted that progress was made in this area, in line with the objectives set out in the EU-Kosovo implementing arrangement for the Joint Action Plan on counter-terrorism for the Western Balkans, especially with regard to the rehabilitation and reintegration of foreign terrorist fighters and their families. The Kosovo authorities should improve their capacity to address terrorist content online, including by efforts to refer terrorist content to internet companies, and enhancing efforts to empower civil society to develop effective alternative narratives online. The Kosovo authorities need to be more effective in their efforts to fight money laundering and the relevant law should be brought in line with the EU <i>acquis</i> and international standards.				No further specific actions proposed/promised to be taken by the Commission.	
3)	47. Reminds of the strong link between weaknesses in media freedom and opportunities		On addressing disinformation (paragraph 47), the Commission services and the European External Action				The general nature of the commitment's wording makes it unclear to what extent the action(s) was	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	for local and foreign actors to manipulate facts and spread disinformation; calls on the Commission and the EEAS to cooperate closely on those links and overlapping challenges, as well as to foster the creation of a Balkan-focused centre of excellence on disinformation;	Service (EEAS) will continue to coordinate and strategically address issues related to disinformation and hybrid threats, including by supporting initiatives to enhance media literacy in the country. In its 2020 Report, the Commission encouraged the national authorities to increase efforts to fight disinformation and build up the resilience of media outlets. The Commission will continue to monitor the developments in these areas, including in its annual reports.		carried out. To date, a Balkan-focused centre of excellence on disinformation has not been created.	
4)	66. [...] calls on the Commission, EEAS and the Council to support the Prime Minister and his team in the internal reconciliation dialogue with Kosovo Serbs which will provide concrete security guarantees and opportunities for socio-economic integration;	No specific reply is provided to this particular point (on helping PM in the internal reconciliation dialogue).		Not mentioned.	
5)	76. Calls on Kosovo's authorities and the Commission to further support SMEs in order to develop a viable economy for Kosovo;	On further support to small and medium sized enterprises (SMEs) (paragraph 76), the Commission has been providing substantial IPA funds for supporting SMEs in Kosovo. EUR 10 million have been blended with funds of the European Bank for Reconstruction and Development (EBRD) to create an overall package of EUR 30.5 million for enterprises in Kosovo. The Commission has also committed EUR 3 million to support SME development in Kosovo with a specific focus on improving the business environment and entrepreneurship capacities through the enhancement of start-ups and innovation. Moreover, as part of its support to Kosovo to recover from the economic and social impact of the COVID-19 crisis, the Commission has committed substantial financial support to SMEs to ensure their survival in the short-term and recovery in the medium-term, including, among others, EUR 5.2 million for "EU4 small business recovery following the COVID-19 crisis".		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Commission has been providing substantial IPA funds in support of SMEs in Kosovo</a> ).	
6)	78. [...] calls on the Commission and the Western Balkans countries to develop a regional strategy to address persistent youth unemployment by tackling the skills mismatch between the	On developing a regional strategy to address persistent youth unemployment (paragraph 78), the Commission recalls that tackling youth unemployment is one of the key priorities of the EU in Kosovo. Youth unemployment and		No further specific actions proposed/promised to be taken by the Commission.

	education system and the labour market, improving the quality of teaching, and ensuring adequate funding for active labour market measures and vocational training schemes, along with adequate childcare and pre-school education facilities;	brain drain is an issue across the Western Balkans region, however, the Commission considers that regional ownership is important for the creation of any regional initiative or strategy. The Commission can support the region in addressing the issue, as it already does through several cooperation paths, e.g. Alliance for Apprenticeships, or European Training Foundation.			
7)	86. Underlines the importance of European solidarity, and calls on the Commission to further support Kosovo and the other Western Balkan states in their efforts to curb the pandemic; calls on the Commission and the Council to include Kosovo in the joint EU procurement of vaccinations, and allocate a sufficient amount of COVID-19 vaccines to the citizens of all Western Balkan countries;	On supporting Kosovo and the other Western Balkan states in their efforts to curb the pandemic (paragraph 86), the Commission continues its support to the Western Balkans during the pandemic. A EUR 3.3 billion emergency support package was approved in spring 2020 and the EUR 9 billion Economic and Investment plan for the longer-term economic recovery of the Western Balkans in October 2020. The Commission is focusing on providing vaccines to the region as soon as possible. The COVAX mechanism, to which the EU has contributed over EUR 3 billion delivered the first doses to the Western Balkans. In addition, the Commission is working with EU Member States and vaccine manufacturers to operationalise the resale of vaccine doses to the Western Balkans under the Advance Purchase Agreements for which the EU has made available grants totalling EUR 70 million to the Western Balkans. A first success was the conclusion of agreements announced on 20 April 2021 for the delivery of 651 000 doses of BioNTech/Pfizer COVID-19 vaccines to all the Western Balkans. These are funded by the grants and will be shared with the facilitation of Austria. The first delivery to all the partners in the region arrived in early May, with regular deliveries to continue until August.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Commission has been providing substantial IPA funds in support of SMEs in Kosovo</a> ).	
8)	100. Welcomes the adoption of the 2020 IPA Annual Action Programme for Kosovo of a total value of EUR 90 million, and insists that IPA funds are used inter alia to promote the green agenda by reinforcing environmental protection,	No specific reply is provided to this particular point (on monitoring of the EU funds).		Not mentioned.

	contributing to mitigation, increasing resilience to climate change, and accelerating the shift towards a low-carbon economy; calls for increased transparency and closer parliamentary scrutiny of the funds allocated to Kosovo, and asks the Commission to better monitor the use of EU funds and report any misuse;				
9)	101. Calls on the Commission to focus IPA III funds on the ongoing democratic transition of Kosovo, in addition to infrastructure projects, especially in light of persistent problems with the investment climate, absorption capacity, and environmental standards in Kosovo;	On focusing IPA III funds on the ongoing democratic transition of Kosovo in addition to infrastructure projects (paragraph 101), the Commission notes that IPA III presents a solid policy-driven approach, putting the fundamental requirements for membership – in particular the rule of law, respect for fundamental rights and public administration reform – at the core of the assistance. IPA III will also support the long-term economic recovery and integration, by mobilising up to EUR 9 billion of funding, in areas such as sustainable transport, energy, environment, digital and human capital. The Economic and Investment Plan is an integral part of the support to the Western Balkans on the path to the EU.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Commission has been providing substantial IPA funds in support of SMEs in Kosovo</a> ).	

4.1.2.21. AFET Resolution 21: EP resolution of 25 March 2021 on 2019-2020 Commission Reports on North Macedonia

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
2019-2020 Commission Reports on North Macedonia	25/03/2021 <a href="#">T9-0114/2021</a> <a href="#">2019/2174(INI)</a> AFET	<a href="#">SP(2021)409</a>	Reply received on 1 September 2021	Specific reply			
1)	57. Notes the significance of ensuring media freedom and promoting quality journalism and media literacy for tackling widespread disinformation, fake news, nationalist rhetoric and hate speech; underlines the need to investigate the origins of disinformation campaigns and foreign interference in the media; calls on the European External Action Service (EEAS) and Commission to improve coordination and strategically address disinformation and hybrid threats that seek to undermine the European perspective across the region; calls for the creation of a Balkan-focused Centre of Excellence to counter disinformation;	The resolution calls on the European External Action Service (EEAS) and the Commission to improve coordination and strategically address disinformation and hybrid threats that seek to undermine the European perspective across the region (paragraph 57). The Commission services and the EEAS will continue to coordinate and strategically address issues related to disinformation and hybrid threats, including by supporting initiatives to enhance media literacy in the country. In its 2020 Report, the Commission encouraged the national authorities to increase efforts to fight disinformation and build up the resilience of media outlets. The Commission will continue to monitor the developments in these areas, including in its annual reports.				The <a href="#">2021 Commission communication on EU enlargement</a> notes that:  'in line with EU priorities under the Joint Framework on countering hybrid threats, the Western Balkans Strategy and the Zagreb Declaration, the EEAS and the Commission have deepened their policy dialogue with enlargement partners on countering hybrid threats, in particular on cyber-resilience, the protection of critical infrastructures, strategic communication and addressing disinformation. Strategic communication continued to focus on thematic communication campaigns highlighting the benefits of the EU support for citizens and for economies, and on public diplomacy actions with direct outreach to citizens, notably the youth, to stimulate debate about the common European future. In parallel, the EU continued to communicate the political and policy developments in EU – Western Balkans relations through web and social media channels. Promoting freedom of expression and independent journalism in the enlargement region remains a priority, while cybersecurity capacity building is a crucial part of the Digital Agenda for the Western Balkans and a priority in the new EU cybersecurity strategy.'	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	59. Welcomes the package of grants worth EUR 70 million from the Instrument for Pre-Accession Assistance II (IPA II) to fund the access of Western Balkans partners to COVID-19 vaccines; calls on the Commission and the Member States to allocate a sufficient amount of COVID-19 vaccines to the citizens of all Western Balkan countries [...]	On the allocation of a sufficient amount of COVID-19 vaccines to the citizens of all Western Balkan countries (paragraph 59), the Commission is focusing on providing vaccines to the region as soon as possible. The COVAX mechanism, to which the EU has contributed over EUR 3 billion, delivered the first doses to the Western Balkans. In addition, the Commission is working with EU Member States and vaccine manufacturers to operationalise the resale of vaccine doses to the Western Balkans under the Advance Purchase Agreements for which the EU has made available EUR 70 million in grants to the Western Balkans. A first success was the conclusion of agreements announced on 20 April 2021 for the delivery of 651 000 doses of BioNTech/Pfizer COVID-19 vaccines to all the Western Balkans. These are funded by the grants and shared with the facilitation of Austria. The first delivery to all the partners in the region took place in early May, with regular deliveries to continue until August.		The action is ongoing under <a href="#">COVAX</a> .	
3)	68. Calls on the Commission to implement the 'more for more' principle rigorously, in particular in relation to North Macedonia for IPA III or the Western Balkans Economic and Investment Plan, given the significant progress by the country over the reporting period and as a sign of solidarity from our Union;	On the implementation of the 'more for more' principle rigorously, in particular in relation to North Macedonia for IPA (Instrument for Pre-accession Assistance) III or the Western Balkans Economic and Investment Plan (paragraph 68), the Commission implemented the 'performance reward' mechanism under IPA II, given notable progress made towards meeting the membership criteria and particularly good results achieved through the implementation of pre-accession assistance. Under IPA III, the entire programming mechanism is based on rewarding performance, both in terms of selection of the most relevant and mature projects and in terms of measurement of the overall progress made by the countries towards accession and commitments to reforms.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">IPA III North Macedonia</a> ).	

4.1.2.22. AFET Resolution 22: EP resolution of 25 March 2021 on 2019-2020 Commission Reports on Serbia

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>2019-2020 Commission reports on Serbia</b>		25/03/2021 <a href="#">T9-0115/2021</a> <a href="#">2019/2175(INI)</a> AFET	<a href="#">SP(2021)409</a>	Final reply (SP) received 1 September 2021	Specific reply		
1)	4. Calls on the Commission and the Council, where appropriate with the inclusion of the Serbian partners, to take the necessary steps in order to implement the provisions of the revised enlargement methodology, especially those concerning the thematic negotiation clusters, as well as to use this new methodology as an opportunity to accelerate the enlargement process of the Western Balkans and to define, together with Serbia, new steps in Serbia's negotiation process;	Following the adoption of the revised enlargement methodology last year, both Montenegro and Serbia confirmed their acceptance of the revised methodology. On this basis, the Commission presented on <b>17 March 2021</b> to the Member States a non-paper on the application of the revised methodology to Montenegro and Serbia. The non-paper follows the four main principles of the revised methodology: credibility, stronger political steer, dynamism and predictability. The Member States have reached agreement on the issue in the Council on 11 May.				Commission has fulfilled its promise with respect to the <a href="#">application of a revised methodology to Montenegro and Serbia</a> .	
2)	7. [...] calls on the Commission to change its reporting methodology in order to take account of significant backsliding and send a clear message to accession countries, including Serbia;	The methodology of the Commission's country reports already allow it to take stock of both progress and backsliding, if relevant, on reforms by the Western Balkans, including Serbia. Under Serbia's negotiating framework, progress on the rule of law and the normalisation of relations with Kosovo is decisive for the overall pace of its EU accession negotiations. Under the revised methodology, credibility will be reinforced through an even stronger focus on fundamental reforms, starting with the rule of law, the functioning of democratic institutions and the public administration as well as the economy.				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Country reports - <a href="#">revised methodology</a> ).	
3)	11. Notes the disproportionate visibility given by Serbia to third countries; calls on Serbia, the Commission and the EU Delegation to Serbia to step up their efforts in promoting the role and benefits of the close partnership between the EU and Serbia, including through the promotion of EU funded projects and reforms [...]	In the past years, the Commission has substantially upgraded its communication in all candidate countries, including Serbia. This also includes the visibility of EU-funded projects. The Commission will maintain its strong focus on further promoting the benefits of Serbia's EU relations.				The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	46. Calls on the Commission and the EEAS to strengthen their cooperation with and support for civil society, NGOs and independent media on the ground; reiterates its support for the work of democratic European political foundations in strengthening Serbia's democratic processes and fostering a new generation of political leaders;	The EU has been providing substantial support to strengthening civil society in Serbia. This has included projects supporting the rule of law as well as civil society's participation in the EU accession process. In addition, the Commission services and the EEAS meets regularly with civil society and independent media representatives as part of its monitoring of developments in the Western Balkans, which is based on a variety of sources, including civil society organisations. The Commission services and the EEAS will continue its efforts in this respect.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (support to civil society).	
5)	92. [...] and calls on Serbia, the Commission and the EEAS to support measures aiming at reinforcing media pluralism and quality journalism [...]	The EU has been providing substantial support to strengthening media pluralism in Serbia. This has included grants to media and media organisations, with support for operational costs as well as productions. This has been particularly important in the context of the COVID-19 pandemic, in times of falling advertising and other revenues. The EU has also been supporting the Press Council of Serbia in order to raise the ethical standards of the media.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (grants to media and media organisations).	
6)	106. Calls on the Commission and the Members States to allocate sufficient COVID-19 vaccines to the citizens of all Western Balkan countries;	The Commission is focusing on providing vaccines to the region as soon as possible. The COVAX mechanism, to which the EU has contributed more than EUR 3 billion delivered the first doses to the Western Balkans. In addition, the Commission is working with EU Member States and vaccine manufacturers to operationalise the resale of vaccine doses to the Western Balkans under the Advance Purchase Agreements for which the EU has made available EUR 70 million in grants to the Western Balkans. A first success was the conclusion of agreements announced on 20 April 2021 for the delivery of 651 000 doses of BioNTech/Pfizer COVID-19 vaccines to all the Western Balkans. These are funded by the grants and will be shared with the facilitation of Austria. The first delivery to all the partners in the region arrived in early May, with regular deliveries to continue until August.		The EU allocated €15 million for immediate needs such as medical equipment, support to vulnerable groups in society, and exceptionally, the hiring of 200 medical workers to alleviate the pressure on medical personnel. In addition, almost €12 million was allocated to Serbia as part of the EU Solidarity Fund. The EU provided a grant of over €27 million to Serbia so it could purchase vaccines from EU Member States, as well as equipment related to the ongoing vaccination campaign. Serbia could also benefit from a €7 million EU-funded project implemented by the World Health Organization, to support safe and effective vaccination in the Western Balkans. By October 2021, Serbia received around 8.3 million vaccines from different suppliers. It had fully vaccinated around

	<p>rhetoric, particularly towards the EU and its Member States, are unacceptable and unseemly for an EU candidate country; calls, in this regard, on the Commission and the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy (VP/HR) to take a firm stance on any abusive language against the EU and its Member States expressed by representatives of the Turkish Government;</p>	<p>‘State of play of EU-Turkey political, economic and trade relations’, points out that “Should Turkey, however, not move forward constructively in developing a genuine partnership with the EU, but instead return to renewed unilateral actions or provocations <i>in breach of international law, aimed at causing prejudice to the interests of the EU and its Member States, in particular in the Eastern Mediterranean, it should be made clear that this would bear political and economic consequences, as spelled out in the report. Further EU measures should be focused, proportionate and reversible, in order to adapt to the situation and the level of threat or challenge in the best possible manner, incentivise a return to a cooperative track and avoid a negative escalation dynamic. In addition to suspending the elements of the constructive cooperation offer set out above, we should foresee smart, scalable yet reversible restrictive measures, building on those in place.”</i></p>		<p>working on action falling under the scope of the EP request (<a href="#">joint communication</a>).</p>	
4)	<p>76. Believes that the EU should not confuse Turkey with the policies of its current government, and therefore underlines that the EU should remain committed to supporting Turkey’s civil society with the objective of protecting and promoting democratic values and principles, human rights and the rule of law, taking into account the strong pro-European vocation and European identity of Turkish society at large; calls in this sense on all EU institutions, particularly the Council, to place the human rights dimension and the situation of fundamental freedoms and rule of law in Turkey at the core of their actions towards the country; takes note of the recent joint communication on the state of play of EU-Turkey political, economic and trade relations (JOIN(2021)0008) as a succinct summary of the current situation; regrets that the backsliding of democracy, the rule of law and</p>	<p>[...] the Commission has refocused the EU’s financial support to sectors that reflect core EU principles and priorities, such as democracy and rule of law, support to civil society (€34 million in 2020) and human rights [...]</p>		<p>According to the Commission, the new <a href="#">instrument for pre-accession assistance</a> (IPA III) for the 2021-2027 Multiannual Financial Framework, presents a solid policy-driven approach, with strategic and dynamic deployment of assistance. It puts the ‘fundamentals’ at its core and it is aimed at focusing on rule of law and respect of fundamental values; strengthening democratic institutions and public administration reform; promoting economic governance and reforms towards competitiveness. However, the action itself, or the implementation of the action is unclear – especially since we are at the start of the implementation period for IPA III.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>fundamental rights in Turkey was not sufficiently addressed in the European Council conclusions of March 2021; underlines that the rule of law and human rights dimension should be at the core of the assessment of our policy towards Turkey; therefore calls on the Commission and the Council to introduce the human rights and rule of law dimension as one of the key criteria when designing the next possible steps in EU-Turkey relations; highlights that doing so could help to reverse the backsliding in fundamental freedoms observed lately in Turkey and would send an encouraging message to the large pro-European and pro-democratic part of Turkish society;</p>				
5)	<p>77. Takes the view that both the EU and Turkey are aware that it is necessary and vital to develop a constructive and respectful attitude in their relations and that enhancing communication and dialogue at all levels are key to restoring a relationship of mutual trust between the EU and Turkey that can form a solid and lasting foundation for further constructive development, the constant improvement of people's lives and the maintenance of peace; believes that other channels of communication should be strengthened, including among municipalities – supporting the relevant work done by the Committee of the Regions – and in the realm of academia, culture and journalism; calls for a common effort by all EU institutions and for the Member States to take concrete steps in this respect and calls on the Commission to report on such steps in its next report on EU-Turkey relations; notes that the last EU-Turkey Joint Parliamentary Committee (JPC) held its 78th meeting in Ankara</p>	<p>The Commission intends to continue a close monitoring of the internal developments in Turkey, notably in the context of the annual enlargement package and the accompanying country report on Turkey;</p> <p>[...]</p> <p>The Commission will continue to carry out consultations with a very large number of stakeholders, including from the academia, local authorities, journalists, human rights defenders and others, also in the framework of the next annual country report on Turkey.</p>		<p>The Commission published a <a href="#">report on Turkey</a> in October 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>on 19 and 20 December 2018; regrets this period of unjustified inactivity of the EU-Turkey JPC and expresses its hope, therefore, for a swift resumption of the meetings between the Grand National Assembly of Turkey and the European Parliament under the EU-Turkey JPC, as an important framework for discussion and de-escalation ;</p>				
6)	<p>79. Considers that, as a necessary step in order to improve the overall state of the relations, both sides need to use respectful language, make efforts to fight existing prejudices and misconceptions, and allow for a more objective and complete consideration of the other side's image in the respective public opinion, reversing the mutually deteriorating perceptions; calls, in this view, on the Commission to launch a communication policy towards Turkish society aimed at raising awareness about the EU, providing objective information on its policies and restoring Turkish citizens' perception of the EU; stresses that a belligerent and aggressive rhetoric only reinforces extreme positions on both sides and that a purely confrontational approach plays into the hands of those who are aiming to pull Turkey and the EU apart;</p>	<p>The Commission will also continue carrying out information campaigns, detailing the EU - Turkey relations, areas of common interests and the EU's work in the country.</p>		<p>In October 2021, the Commission and Turkey signed three agreements granting association status to EU programmes for the period 2021-2027: <a href="#">Horizon Europe</a>, <a href="#">EU research and innovation programme</a>, <a href="#">Erasmus+</a>, <a href="#">EU programme for education, training, youth and sport</a> and the <a href="#">European Solidarity Corps</a>.</p>	

## 4.1.2.26. AFET Resolution 26: EP resolution of 19 May 2021 on Commission Reports on Montenegro

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Commission Reports on Montenegro</b>	19/05/2021 <a href="#">T9-0244/2021</a> <a href="#">2019/2173(INI)</a> AFET	<a href="#">SP(2021)507</a>	Final reply (SP) received 22 September 2021	Specific reply			
1)	35. Calls for the strengthening of European cooperation with Montenegro on addressing disinformation, and cyber and hybrid threats that seek to undermine the European perspective of the region; is concerned about the growing vulnerability of Montenegro owing to the increase of its public debt, in particular to China;  calls in this context on the Commission and the Montenegrin Government to cooperate on finding a solution for the highly controversial Chinese Bar-Boljare highway loan taken out by the previous government, in order to avoid debt dependency and Montenegro having to turn over collateral to the Chinese creditors; [...] calls on the Commission to find, together with international financial institutions, a reasonable solution to support Montenegro's fiscal sustainability and reforms in line with the country's European perspective;	No specific reply is provided to this particular point.  No specific reply is provided to this particular point.				Not mentioned.  Not mentioned.  The Commission <a href="#">2021 Montenegro Report</a> only mentions that the previous government secured funds from the IMF, the EU, the World Bank and other international financial institutions to tackle the large budget deficit and the contraction of GDP in 2020 that led to a substantial increase in the debt ratio. However, no particular measures are mentioned regarding support to Montenegro's fiscal sustainability and reforms in line with the country's European perspective.	
2)	36. Calls on Montenegro, the EU Member States and the Delegation of the European Union to Montenegro to continue pursuing a more active and effective communication policy on the European perspective, aimed at both local and EU citizens, and to continue their coordinated efforts to increase the visibility of EU-funded projects;	In the past years, the Commission has substantially upgraded its communication in all candidate and potential candidate, countries, including Montenegro. This also includes the visibility of EU-funded projects. The Commission will maintain its strong focus on further promoting EU- Montenegro relations and stands ready to assist Montenegro in fighting disinformation. Commission services and the EEAS will continue to coordinate				The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	calls on the Commission and the European External Action Service to support the creation of a Balkan-focused centre of excellence on disinformation;	and strategically address issues related to disinformation and hybrid threats, including by supporting initiatives to enhance media literacy. The Commission will continue to monitor developments in these areas, including in its annual reports.		To date, a Balkan-focused centre of excellence on disinformation has not been created.	
3)	65. Calls on the Commission to support Montenegro's efforts to reduce unemployment, which was seriously exacerbated by the COVID-19 pandemic, in particular in the tourism sector, which accounts for more than 20 % of Montenegro's gross domestic product, taking into account the large decline in the number of tourists;	No specific reply is provided to this particular point.		Not mentioned.	
4)	70. Calls on the Commission and the Council to show their solidarity with Western Balkan countries by helping them to receive COVID-19 vaccines and to include Montenegro in joint EU procurement for vaccinations; welcomes the actions taken by the Commission and the Council to help Montenegro procure vaccines against COVID-19 via COVAX and by other means such as coordinating donations by EU Member States; calls for further assistance to ensure that a sufficient amount of COVID-19 vaccines are available to people in all Western Balkan countries as soon as possible, taking into consideration each country's pandemic situation; strongly believes that vaccine policies in general should be humanitarian and should not serve geopolitical interests of any kind;	The Commission has worked hard on providing vaccines to the region. The COVAX mechanism, to which the EU has contributed €2.2 billion, has delivered the first doses to the Western Balkans. Under the Advance Purchase Agreements, for which the EU has made available grants totalling €70 million to the Western Balkans, the delivery of 651,000 doses of BioNTech/Pfizer COVID-19 vaccines to all the Western Balkans (including 42,077 doses for Montenegro) started in May, with the facilitation of Austria, and regular weekly deliveries are planned to continue until August.		'The EU continued to provide essential and unparalleled support. This includes financial support: a substantial package of EUR 53 Million of non-repayable financial aid and EUR 60 Million of favourable loans as macrofinancial assistance to address the immediate health crisis, in addition to delivering vast quantities of health supplies and equipment, as well as EUR 200,000 allocation under the EU Solidarity Fund. The EU and its Member States have also supported the country's vaccination campaign by providing over 262,000 doses by early September, which is a sign of concrete EU solidarity.' [...] 'Montenegro continued to participate in the EU Health Security Committee as an observer, with also access to the EU Early Warning and Response System. Montenegro continued to make use of the EU Joint Procurement Agreement on medical counter-measures to which it is a signatory and joined the European COVID-19 Surveillance Network, reporting COVID-19 data to the European Surveillance System (TESSy) managed by the European Centre for Disease Prevention and Control (ECDC). (Commission <a href="#">2021 Montenegro Report</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				See EPRS briefing ' <a href="#">EU support for vaccination efforts in the Western Balkans</a> ' (May 2021).	
5)	72. Notes the equal importance of all investment targets of IPA III; calls on the Commission, in this respect, to focus an appropriate share of the IPA III funds on the ongoing democratic transition of Montenegro, especially in the light of persistent problems with the investment climate, absorption capacity and environmental standards in the country;	The Commission agrees with the statement. Under the previous financial framework 2014-2020 (IPA II) nearly €50 million was invested in the category Democracy and Governance and this sector will remain a priority under the IPA III programme.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

4.1.2.27. AFET Resolution 27: EP resolution of 19 May 2021 on the effects of climate change on human rights and the role of environmental defenders on this matter

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>The effects of climate change on human rights and the role of environmental defenders on this matter</b></p>	<p>19/05/2021 <a href="#">T9-245/2021</a> <a href="#">2020/2134(INI)</a> AFET</p>	<p>On 24 June 2021, the Parliament received '<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – May 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Olivér Várhelyi on behalf of High Representative / Vice-President Josep Borrell.</p> <p>The <a href="#">plenary debate</a> took place on 18 May 2021.</p>			
1)	<p>2. Calls on the Union and its Member States to strengthen the linkage between human rights and the environment throughout their external action as well as to assist and support international, regional and local human rights mechanisms in addressing environmental challenges, notably the impact of climate change on the full enjoyment of human rights; calls on the Commission to ensure the integration of the issues of climate change and human rights within all relevant EU policies and to ensure the coherence of these policies; notes the importance of supporting activities that raise awareness of the consequences for human rights impacts of climate change, environmental degradation and biodiversity loss; calls on the Union, furthermore, to support and strengthen collaboration with third countries in order to integrate a human rights-based approach in environmental laws and policies;</p>				
2)	<p>3. Highlights the indispensability of human development opportunities for all; stresses the risks of human rights violations in international</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	commodity supply chains for both conventional and 'green tech' renewable energy, such as child labour in cobalt mines catering to the global lithium-ion battery chain; calls on the Commission to take human rights implications into account when assessing the Union's energy and transport technology pathways;				
3)	6. Calls on the Commission to ensure that the concrete commitments on human rights, environment and climate change already established in the EU Action Plan on Human Rights and Democracy 2020-2024 are effectively implemented and monitored, and that a gender perspective is included in the plan's implementation;				
4)	8. Urges the Commission to continue to monitor the situation of human rights and climate change and to assess the progress in integrating and mainstreaming human rights into all aspects of climate action at domestic and international level in close cooperation with the UN Human Rights Council / UN High Commissioner on Human Rights;				
5)	11. Encourages the EU and its Member States to take a bold initiative with the active support of the EU Special Representative for Human Rights to fight impunity for the perpetrators of environmental crimes at global level and to pave the way within the International Criminal Court (ICC) towards new negotiations between the parties with a view to recognising 'ecocide' as an international crime under the Rome Statute; calls on the Commission and the Vice-President of the Commission / High Representative of the Union for				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Foreign Affairs and Security Policy (VP/HR) to establish a programme to build the capacity of national jurisdictions of Member States in these fields;				
6)	12. calls for the establishment of climate focal points within the relevant services of the Commission and the European External Action Service (EEAS), whose tasks would include climate-proofing all of the EU's external dealings;				
7)	14. Calls on the Commission to increase financial and technical assistance and capacity building activities to support third countries in the integration of human rights in their national climate actions and programmes and in complying with international environmental regulations in order to ensure that climate change objectives do not interfere with the exercise of human rights in those countries;				
8)	17. Acknowledges the impact of the nexus of climate change, environmental degradation and natural disasters as a driver of migration and climate-induced displacement and regrets the lack of human rights protection at international level for individuals who are suffering as a result; considers that such displacement should be addressed at international level; calls on the Commission and the Member States to cooperate on the development of an international framework for addressing climate-induced displacement and migration both at international forums and in the EU's external action; encourages the Commission and the Member States to work together on increasing their support for resilience measures in regions prone to the detrimental effects of climate				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	change and to support people who have been displaced due to climate change and who are no longer able to live in their places of residence;				
9)	21. Calls on the Commission and the Member States to strengthen the role and capacity of regional human rights bodies and other mechanisms in addressing the nexus of climate change and human rights, promoting environmental rights and protecting environmental rights defenders; calls on the Commission, in particular, to initiate a programme in support of the Escazu Agreement, with the aim, inter alia, of assisting state parties in ratifying and implementing the Agreement, assisting civil society in engaging with the Agreement and contributing to its implementation, and providing support for the voluntary fund established under the Agreement;				
10)	22. Stresses that the global COVID-19 pandemic perfectly illustrates the impact of environmental degradation in creating the conditions for an increase of zoonosis with severe health, social, economic and political consequences; calls on the Commission and the Member States to commit to including environmental rights, and the defence of those who protect them, in any response to the COVID-19 pandemic; encourages the Member States and other stakeholders to take account of the Commission's Global Monitor of COVID-19's Impact on Democracy and Human Rights;				
11)	24. Urges the VP/HR, the Commission and the Member States to advocate for an effective response to the COVID-19 crisis which fully takes into consideration the importance of respecting,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	protecting and fulfilling the right to a safe, clean, healthy and sustainable environment, as a bulwark to prevent future environmental and health crises which have the potential to put basic human rights at risk; calls on the Commission and the EEAS to increase their climate and environment ambition in the light of the COVID-19 crisis and to shape an ambitious strategic approach to climate diplomacy;				
12)	27. [...] encourages the Commission to continue to promote dialogue and collaboration between indigenous peoples and the European Union as well as with international forums, notably in relation to climate change;				
13)	28. [...] reiterates its call on the Commission, given the seriousness of the human rights violations in the country and in the absence of any substantial improvement or willingness to cooperate on the part of the Philippines authorities, to initiate the procedure that could lead to the temporary withdrawal of preferences under the Generalised Scheme of Preferences Plus (GSP+);				
14)	30. Calls on the Commission to ensure that the EU does not support initiatives and projects that would lead to illegal land grabs, illegal logging and deforestation or other such damaging impacts on the environment; condemns any attempts to deregulate environmental and human rights protections in the context of the COVID-19 pandemic and other crises;				
15)	33. [...] reiterates its position on the need for the EEAS, the Commission and the Member States to invest in and strengthen specific gender-				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	responsive accessible protection mechanisms and programmes for environmental rights defenders, including local and indigenous defenders, and to involve them in any investigations into violations;				
16)	34. [...] calls on the Commission, in this context, to monitor the transposition and guarantee the full application by the Member States of Directive (EU) 2019/1937 <sup>11</sup> ; regards freedom of information as an important instrument for people who may be affected by the consequences of climate change to be properly informed at an early stage about the harmful effects of climate change and adaptation measures; demands respect for freedom of information;				
17)	36. Calls on the Commission to pay specific attention to the differentiated protection needs of women human rights defenders, acknowledging their role as powerful agents of change, in particular for climate action;				
18)	38. Calls on the Commission and the Council to use all instruments at their disposal, along with the provisions concerning the implementation and enforcement of human rights in the framework of the Union's foreign policy and Association Agreements, to effectively support and protect human and environmental rights defenders in the EU's neighbourhood, as well as to encourage EU candidate countries to effectively converge with European values and standards;				

<sup>11</sup> Directive (EU) 2019/1937 of the European Parliament and of the Council of 23 October 2019 on the protection of persons who report breaches of Union law (OJ L 305, 26.11.2019, p. 17).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	40. Calls for the adoption of an EU list of priority countries in which the EEAS, the Commission and the Member States would step up their action in support of environmental rights defenders and engage with local authorities in introducing or improving protection mechanisms and specific legislation that defines environmental defenders, recognises their work and guarantees their protection; insists that this priority list should be prepared by the EEAS, in close consultation with stakeholders and with Parliament, and updated on an annual basis; also calls on the VP/HR to provide an annual public report on actions carried out in the priority countries, as well as on the protection of environmental defenders worldwide;				
20)	42. Calls on the Commission and the Member States to promote, through policy dialogue, the adoption of national action plans that guarantee a safe and free environment for environmental defenders by integrating a wider perspective of collective protection, including political measures to legitimise communities and groups involved in the protection of the environment; calls on the Commission to address explicitly the human rights of indigenous peoples and local communities under forest law, governance and trade voluntary partnership agreements (FLEGT VPAs);				
21)	49. Calls on the Commission to draft eligibility criteria for EU grants that would enable environmental NGOs, which may otherwise not be eligible for funding due to their size, to gain more inclusive access to funds;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
22)	61. Encourages the Commission and the Member States to be active players in the design, establishment and promotion of safeguards and accountability processes within the internationally recognised bodies to ensure that the structural changes made in order to achieve the drastic cut in emissions by 2030, as provided for by climate policies, are designed, implemented and monitored in a manner that protects the rights of the people and communities affected, including the right to work and to promote fair and equitable working conditions; emphasises that the green transition should be fair and leave no-one behind;				

4.1.2.28. AFET Resolution 28: EP resolution of 9 June 2021 on 75th and the 76th sessions of the United Nations General Assembly

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
75th and the 76th sessions of the United Nations General Assembly	09/06/2021 <a href="#">T9-0278/2021</a> <a href="#">2020/2128(INI)</a> AFET	On 22 July 2021, the Parliament 'Replies of the Commission to positions and resolutions adopted by the European Parliament – June I 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 8 June 2021.			
No calls falling under the methodology of this publication.					

## 4.1.2.29. AFET Resolution 29: EP resolution of 24 June 2021 on 2019-2020 Commission reports on Bosnia and Herzegovina

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>2019-2020 Commission reports on Bosnia and Herzegovina</b>		24/06/2021 <a href="#">T9-0317/2021</a> <a href="#">2019/2171(INI)</a> AFET	<a href="#">SP(2021)581</a>	Final reply (SP) received 29 September 2021	Specific reply			
1)	13. Calls on the Commission to develop a programme to support sustainable reform of BiH's education system; stresses that quality education gives young people a vision and perspective of a positive future, contributing to tackling the brain drain and youth unemployment [...]		As regards the request to develop a programme to support the sustainable reform of BiH's education system (paragraph 13), the Commission is working with the Council of Europe (Horizontal Facility) to foster inclusive education for all in BiH. The 'policy recommendation with a roadmap on quality education for all in BiH', developed through this programme, was adopted by the Council of Ministers in September 2020. The Commission and the Council of Europe will continue to support its implementation.				The Commission is working with the <a href="#">Council of Europe (Horizontal Facility)</a> to foster inclusive education for all in BiH.  No further specific actions proposed/promised to be taken by the Commission.	
2)	22. Urges the Commission to put more emphasis on constitutional reform in its next annual report;		No specific reply is provided to this particular point.				Not mentioned.	
3)	23. Calls on the Commission and the European External Action Service (EEAS) to step up their facilitation activities in BiH, in order to strengthen political dialogue and reconciliation and to provide a framework for dealing with the legacies from the past and for overcoming the divisions in the society; calls for a coordinated involvement of EU actors and institutions in BiH and a reinforced transatlantic approach;		As regards the request to step up facilitation activities in BiH and the call for a coordinated involvement of EU actors and institutions in BiH and a reinforced transatlantic approach (paragraph 23), the Commission, the European External Action Service and the EU Delegation / EU Special Representative office in Sarajevo are working together via policy dialogue and financial assistance to foster reconciliation. 'Take concrete steps to promote an environment conducive to reconciliation in order to overcome the legacies of the war' is also one of the key priorities for BiH as outlined in the Commission's opinion on its EU membership application.				No further / specific actions proposed/promised to be taken by the Commission.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	55. Calls on the EEAS and Commission to improve coordination and address disinformation and hybrid threats that seek to undermine the European perspective of the region by more strategically underscoring the EU's relevance to citizens in the region;		No specific reply is provided to this particular point.		Not mentioned.	
5)	<p>57. Calls on BiH and the EU to further strengthen cooperation on the international protection of those in need, to work on solidarity-based solutions and prevent reported violations of international law and fundamental rights, such as reported pushbacks at BiH borders;</p> <p>Calls on the Commission to put in place an independent monitoring and investigation mechanism; supports the work of the European Parliament Frontex Scrutiny Working Group;</p> <p>Calls on the Commission, EU agencies and international organisations to engage actively with Bosnian authorities in order to develop a functioning and sustainable migration and asylum system;</p> <p>Calls on the Commission, EU agencies and international organisations to provide further operational, technical, logistical and financial assistance to BiH for ensuring appropriate reception capacities and conditions across the country, preferably at migrants' entry points to the country, access to an effective asylum procedure, to boost</p>		<p>Regarding the request to put in place an independent monitoring and investigation mechanism (paragraph 57), the Commission has worked with Croatia to ensure the establishment of an independent monitoring mechanism on the Croatian side of the border, in line with the New Pact on Migration and Asylum. On 8 June 2021, the agreement on the establishment of the Independent Monitoring Mechanism between the Croatian authorities and Croatian stakeholders entered into force. The mechanism is expected to be operational soon.</p> <p>As regards the call to the Commission, EU agencies and international organisations to engage actively with Bosnia and Herzegovina authorities and provide further operational, technical, logistical and financial assistance, in order to develop a functioning and sustainable migration and asylum system (paragraph 57), the Commission continues to support BiH with policy dialogue, technical and financial assistance to establish a sustainable migration and asylum system. The Commission has invested over €89 million in supporting BiH in managing migration since 2018. A new multipurpose reception and identification centre will open in Lipa, near Bihac, to provide adequate living conditions, including shelter and</p>		<p>As declared by the Commission, the agreement on the Independent Monitoring Mechanism between the Croatian authorities and Croatian civil society was signed on 8 June 2021.</p> <p>More info: <a href="#">New Pact on Migration and Asylum</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>capacity for processing incoming migrants and asylum claims, and, where applicable, conduct return procedures in line with international and European standards;</p> <p>Calls for an assessment of the relevant funding so as to ensure that transparent, conditional and credible EU assistance for migration needs serves its purpose and reaches the intended beneficiaries;</p>	<p>basic services and access to rights for up to 1,500 migrants and asylum seekers until a final decision on their asylum, other protection status or return is taken.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p> <p><a href="#">Bosnia and Hercegovina Report 2021</a> confirms that a permanent multi-purpose reception centre would be built in Lipa in the course of 2021 (page 6).</p>	
6)	<p>61.[...] calls on the Commission and the Member States to allocate a sufficient number of COVID-19 vaccines to the Western Balkan countries and to support their vaccination preparedness and implementation [...]</p>	<p>Concerning the request to the Commission and the Member States to allocate a sufficient number of COVID-19 vaccines to the Western Balkan countries and to support their vaccination preparedness and implementation (paragraph 61), the Commission delivered 214,110 Pfizer doses to BiH by August 2021 via the EU4health programme, with the support of Austria. COVAX, with EU financial support, also delivered over 232,000 doses so far for BiH. The country also received 500,000 doses from Austria, 170,000 doses from Croatia, 120,000 from Greece, and over 50,000 doses from Slovenia. The Commission will continue to work with more EU Member States to share further doses of vaccines, as soon as they become available. Several more Member States have announced further donations and/ or re-sales of vaccines to the Western Balkans.</p>		<p>As <a href="#">declared by the Commission in April 2021</a> and confirmed in <a href="#">the Bosnia and Hercegovina Report 2021</a>, the EU and its Members States provided 1.3 million vaccine doses by September 2021.</p>	

4.1.2.30. AFET Resolution 30: EP resolution of 7 July 2021 on EU-NATO cooperation in the context of transatlantic relations

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>EU-NATO cooperation in the context of transatlantic relations</b></p>	<p>7/07/2021  <a href="#">T9-0346/2021</a>  <a href="#">2020/2257(INI)</a>  <b>AFET</b></p>	<p>On 4 August 2021, the Parliament received '<a href="#">Replies</a>' of the Commission to positions and resolutions adopted by the European Parliament – July 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Vice-President Dubravka Šuica on behalf of High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 5 July 2021.</p>			
1)	<p>5. [...] urges the Commission to commit itself to submitting a legislative proposal following Parliament's adoption of such an INL;</p>				
2)	<p>15. [...] calls on the Commission to ensure sufficient funding for that purpose through the 'Citizens' engagement and participation' strand of the Citizenship, Equality, Rights and Values programme;</p>				
3)	<p>20. Highlights the necessity of engaging with educational institutions and civic education organisations to ensure that active European citizenship becomes part of the curriculum across the EU; calls on the Commission to provide support in order to complement educational programmes in all Member States, notably by supporting the development of a common curriculum on European and global civic education, fostering a better understanding of the existing EU institutions and of the history and cultures of Member States, and encouraging objective and critical thinking of the benefits of the European Union; suggests the inclusion of modules on EU functioning and history in educational curricula and calls on the</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Commission to propose guidelines for such modules;				
4)	22. Calls on the Commission to launch an annual European Union Olympiad competition on EU functioning and history for young people in high schools, vocational training and other educational structures, in order to boost interest, participation and debate on EU affairs;				
	25. [...] calls on the Commission to develop a comprehensive European strategy to enhance citizenship competences in the EU and develop supportive measures aimed at providing equal access to citizenship education to all people residing in the EU in order to enable them to exercise their political rights;				
5)	29. [...] invites the Commission to further develop this area under the EDAP;				
6)	30. [...] and therefore calls on the Commission to make much greater efforts to communicate with citizens in all the official EU languages; notes that in order to strengthen inclusiveness, awareness and visibility, there is a need to improve the accessibility of online content [...]				
7)	44. Calls on the Commission and the Member States to develop accessible, innovative and inclusive tools for citizens' participation and dialogues, making better use of digital technologies to allow all citizens (such as younger and older people, people with disabilities, mobile EU citizens, people living in rural or less populated areas) to play an effective part in EU decision-making, building on the lessons from the way the COVID-19 pandemic				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	has acted as an accelerator for the use of digital tools [...]				
8)	50. [...] calls on the Commission to embrace further digital possibilities for citizens' participation, in all official EU languages, including tutorials, past examples and information on relevant legislation; believes that provisions should be made for persons who are blind, visually impaired or otherwise print-disabled;				
9)	55. Calls on the Commission to present a proposal for an interinstitutional agreement on civil dialogue on the basis of Article 11(2) TEU, stating that institutions must maintain an open, transparent and regular dialogue with representative associations and civil society;				

## 4.1.2.31. AFET Resolution 31: EP resolution of 16 September 2021 on a new EU-China strategy

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>A new EU-China strategy</b>	16/9/2021 <a href="#">2021/2037(INI)</a> <a href="#">T9-0382/2021</a> AFET	On 3 November 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – November I 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Jutta Urpilainen on behalf of the High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 14 September 2021.			
1)	2. Calls on the VP/HR to ensure that the new EU-China strategy involves China in a principled and interest-oriented dialogue on global challenges, such as human rights, by developing an ambitious, holistic and results-oriented EU strategy for human rights in China as part of this new EU-China strategy, the environment and climate change, nuclear disarmament, the promotion of the economic recovery from COVID-19, the fight against global health crises, and the reform of specific multilateral organisations;				
2)	11. Highlights, in this context, its resolution of 20 May 2021 on Chinese countersanctions; calls on the Commission, in line with Parliament's resolution of 20 May 2021 on Chinese countersanctions and with Article 21(1) of the Treaty on European Union (TEU), to use all the tools at its disposal and the debate around the CAI as leverage to improve the protection of human rights and support for civil society in China;				
3)	13. [...] reiterates its request for the Commission and the European External Action Service (EEAS) to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	swiftly finalise a supply chain business advisory with guidance for companies on the exposure to risks of using Uyghur forced labour and providing support in urgently identifying alternative sources of supply;				
4)	15. Urges the UN High Commissioner for Human Rights to launch independent legal investigations into alleged genocide, alleged crimes against humanity and human rights violations, including forced labour programmes taking place in several regions in China, and calls for the EU and its Member States to provide their political backing and garner international support for such an investigation;				
5)	17. Calls on the Commission to bring forward the proposed Mandatory Human Rights Due Diligence Framework as a matter of urgency and to support efforts to achieve the adoption of a similar instrument in the framework of the United Nations;				
6)	18. Calls on the Commission to express its concern over the new Order 15, further constraining religious people and their leaders, to the Chinese authorities;				
7)	19. [...] urges the VP/HR and the Council to assess and update the conclusions on Hong Kong [...]				
8)	23. Calls on the Commission to commission an EU-wide audit, broken down by Member State, of EU dependency on China in certain strategically important and critical sectors, including pharmaceutical supplies, if possible at both national and subnational level, building on its recent comprehensive analysis entitled 'Strategic dependencies and capacities' (SWD(2021)0352),				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>which sets out plans to reduce risks related to undesired dependencies, while maintaining overall relations with China, which should be as reciprocal and balanced as possible and aligned with the EU's values and strategic priorities;</p>				
9)	<p>24. Calls on the Commission and the Council to elaborate mechanisms to address these threats coherently, in particular by:</p> <p>(a) ensuring the EU's unity at Member State level, which is needed to be able to properly implement the new EU-China strategy; calling on all Member States to uphold the EU's core values;</p> <p>(b) building on the EU toolbox for national, regional and local risk-mitigating measures to develop global standards in partnership with like-minded partners for the new generation of technologies in accordance with democratic values, such as 5G and 6G networks, and ensuring that companies that do not fulfil security standards are excluded from 5G and 6G network development;</p> <p>(c) strengthening the EU's capabilities in pursuit of global leadership, including through cooperation with like-minded partners;</p> <p>(d) ensuring institutional coordination between the Commission, the Council and the EEAS before BRI-related events, and cooperating with Member States to ensure that the decisions taken by those involved in the initiative are in line with EU policies and interests and respect fundamental EU values; stresses that consultations must take place at EU level, for example through a joint Trade Policy Committee-Political and Security Committee meeting at Council level, before BRI-related events in order to ensure that Member States speak with</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>one voice; stresses that the BRI must meet international standards; underlines that BRI projects must be closely monitored, including with regard to their negative political effects in the EU;</p> <p>(e) monitoring key infrastructure contracts in Member States and accession countries to ensure their conformity with EU legislation, as well as their alignment with the EU's strategic interests, as defined by the EU-China strategy; protecting critical infrastructure from the influence of third countries, which could be detrimental to the EU and its Member States' economic and security interests;</p>				
10)	<p>28. Calls on the Commission to encourage and coordinate actions aimed at countering China's foreign financing of our democratic processes, including the strategy of elite capture and the technique of co-opting top-level civil servants and former EU politicians;</p>				
11)	<p>30. Calls on the VP/HR to coordinate the Union's actions with like-minded partners on the protection of human rights and support for people in China, Hong Kong and Macau, and for the Chinese diaspora around the world, as well as the defence of liberal democracy in the world, notably in Hong Kong and Taiwan, and with a view to engaging China to respect international law, the right to public demonstrations as an exercise of freedom of expression and freedom of assembly, the freedom of navigation, including in the South China and East China Seas, overflight and the peaceful resolution of disputes [...]</p>				
12)	<p>39. [...] reiterates its call on and urges the Commission and the Council to move towards a</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	bilateral investment agreement with Taiwan and to urgently begin the impact assessment, public consultation, and scoping exercise with the Taiwanese authorities;				
13)	40. Urges the Commission to come up with concrete proposals and action to facilitate Taiwan's full participation as an observer in the meetings, mechanism and activities of the WHO, the ICAO and the UNFCCC;				
14)	43. [...] urges the Commission and the Council to maintain frequent dialogue and carry out comprehensive reporting, reflecting developments on the EU-China bilateral trade and investment agenda;				
15)	45. Calls on the Commission to analyse the EU's economic dependencies in strategic sectors, such as critical raw materials, some of which are located exclusively in China, and highlights the urgent need to boost the resilience of European supply chains [...]				
16)	47. [...] calls on the Commission and the Chinese authorities to cooperate closely to reform the WTO rulebook in order to foster a more sustainable development, promote the green transition and digital revolution, and bring stability and legal certainty to the international trade arena;				
17)	49. [...] calls on the Commission and the Member States to step up their cooperation with like-minded partners at the WTO to develop a joint approach to tackle these unfair Chinese trading practices				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
18)	51. [...] and urges the Commission to step up its efforts to protect the EU's intellectual property, including patents [...]; asks the Commission to engage with the Chinese authorities on this matter;				
19)	54. Calls on the Commission to consult with Parliament before taking any steps towards the conclusion and signature of the CAI [...]				
20)	66. [...] encourages the Commission to develop an EU-wide regulatory system to prevent media companies either funded or controlled by third-country governments from acquiring European media companies, in order to preserve independent and free media reporting in the EU; suggests diversifying Chinese-language media in Europe by encouraging cooperation between European media and international partners, such as Taiwan; stresses further the urgent need to significantly boost expert capacity on China in the EEAS and the Commission in general;				
21)	69. Calls on the Commission to take into account and include in its strategy China's rapidly growing interest and involvement in the Arctic [...]				

## 4.1.2.32. AFET Resolution 32: EP resolution of 16 September 2021 on direction of EU-Russia political relations

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Direction of EU-Russia political relations</b>	16/09/2021 <a href="#">T9-0383/2021</a> <a href="#">2021/2042(INI)</a> AFET	On 3 November 2021, the Parliament ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – September 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Jutta Urpilainen on behalf of the High Representative / Vice-President Josep Borrell. 4.1.2.33. AFET Resolution 33: EP resolution of 6 October 2021 on the future of EU-US relations

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
The future of EU-US relations	6/10/2021 <a href="#">T9-0410/2021</a> <a href="#">2021/2038(INI)</a> AFET	On 5 November 2021, the Parliament received <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament, October I session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 5 October 2021.			
1)	3. Calls on the Council, the Commission and the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy (VP/HR) to reassert the continued relevance of the strategic transatlantic relationship for the rebuilding and reinvigoration of the multilateral rules-based international order, with the UN system and international law at its centre, the global strengthening of democracy and democratic values and the promotion of human rights, for addressing the malign influence and disinformation of authoritarian regimes, and for shaping the rules of the digital and technological future according to shared values, sustainable economic development and inclusive economic growth and jobs worldwide, a coordinated position vis-à-vis Russia and China and a common offer of investing in global infrastructure initiatives in line with the EU's connectivity strategy [...]				
2)	36. [...] urges the Commission to set up an efficient and inclusive structure on the EU side for the Trade & Technology Council as soon as possible [...]				
3)	53. [...] urges the Commission and the Member States to speed up and conclude as soon as

	possible the negotiations in the framework of the OECD proposal on digital taxation and pursue all possible ways to avoid further economic damage to EU companies, particularly small and medium-sized enterprises, especially in the context of the COVID-19 recovery strategies [...]				
4)	56. Calls on the Commission and the Biden administration to actively support the new WTO DG's initiatives concerning, in particular, health [...]				
5)	67. Calls on the Commission, while promoting dialogue and common action, to assertively promote the EU's interests and its open strategic autonomy and respond to unwarranted US duties, the extraterritorial application of sanctions, which is contrary to international law, and market barriers; emphasises the need to strengthen the EU's autonomous trade measures;				
6)	69. Calls on the Commission to draft its proposal on an instrument to deter and counteract coercive actions by third countries and legislation to support European companies targeted by these sanctions and that are operating in compliance with international law;				
7)	76. [...] calls on the Commission to also address these possibilities and challenges in its upcoming Arctic Strategy;				
8)	77. Urges the Commission, as common practice, to be transparent in its cooperation with the United States by, inter alia, publishing all proposals sent to the US and by guaranteeing the involvement of Parliament and civil society in the development of these proposals so as to enhance consumers' and citizens' trust;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	91. [...] calls on the Commission and the Council to support the initiative of the Summit both politically and practically [...]				
10)	92. [...] recalls its suggestion to create a Transatlantic Political Council (TPC) for systematic consultation and coordination on foreign and security policy, which would be led by the VP/HR and the US Secretary of State and underpinned by regular contact with political directors [...]				
11)	106. Calls on the VP/HR and the Council to devise a new strategic approach for the EU's relations with Russia, which must better support civil society, strengthen people-to-people contacts with the citizens of Russia, draw clear red lines for cooperation with Russian state actors, use technological standards and the open internet to support free spaces and restrict oppressive technologies, and demonstrate solidarity with the EU's Eastern Partners, including on security issues and peaceful conflict resolution [...]				

## 4.1.2.34. AFET Resolution 34: EP resolution of 7 October 2021 on implementation report on the EU Trust Funds and the Facility for Refugees in Turkey

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Implementation report on the EU Trust Funds and the Facility for Refugees in Turkey</b>	7/10/2021 <a href="#">T9-0411/2021</a> <a href="#">2020/2045(INI)</a> AFET	On 5 November 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament, October I session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 5 October 2021.			
1)	7. [...] and calls on the Commission to provide in good time detailed information on the decisions taken in those Committees [...]				
2)	27. [...] calls in this regard on the Commission and the Member States to review and conduct a specific risk assessment, in consultation with CSOs, of the cooperation activities with the competent authorities in maritime and border surveillance and management, funded under the EUTF for Africa, to ensure an objective assessment of the respect for human rights;				
3)	28. Underlines the importance of cooperation and dialogue with local partners; hails the consultations and studies carried out to identify priority needs; strongly calls on the Commission to properly involve local authorities and CSOs in projects supported by the EUTF for Africa;				
4)	42. [...] calls on the Commission to improve monitoring and obtain the data on beneficiaries of all FRT programmes and projects; stresses that in order to achieve full accountability and to avoid double funding, the Commission should make the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	resources available on the basis of targets achieved by implementing partners on the ground and after the implementation assessment has been carried out in accordance with the Financial Regulation rules; calls, therefore, on the Commission to ensure that the objectives and the implementation of the FRT are consistent with the EU's general principles, policies and objectives, including democracy, the rule of law and human rights, and expresses its concern over the degradation of these principles in Turkey;				
5)	43. Stresses the importance of transition from humanitarian relief to development cooperation, and calls on the Commission to develop and implement a transition strategy, focused on helping to create livelihood opportunities for refugees so as to improve their self-reliance and social inclusion in their host communities;				
6)	44. [...] urges the Commission to ensure close monitoring of the implementation of the EU-Turkey Statement, including in relation to the human rights situation of asylum seekers and migrants returned to Turkey as part of the EU-Turkey Statement, and to report back to Parliament thereon; calls on the Turkish authorities to grant the UNHCR full access to the removal centres at the Turkish-Syrian border to be able to monitor the respect for the principle of non-refoulement; stresses that the financial support to Turkey in the management of refugee flows must respect full budgetary transparency, as well as unrestricted involvement of civil society organisations; calls on the Commission to call upon the Turkish authorities to improve the working environment for international NGOs; calls on the Commission to build upon its experience in special				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	third-party verification systems to strengthen the oversight of spending;				
7)	49. [...] urges the Commission to present the final comprehensive review on the implementation of the EUTFs, evaluating its alignment with the EU's development, human rights and humanitarian objectives; insists further that, should the need for any new EUTF or ad hoc instrument arise in the future, the contribution mechanism from the Union budget must be clearly defined and negotiated from the outset with the full involvement of Parliament; believes also that the impact and visibility of EU external assistance should be further increased, highlighting the EU's and its Member States' role as the biggest donors of global development financing;				
8)	50. Calls on the Commission to ensure a transparent impact assessment, carried out by independent EU bodies and experts, on the impact of EU-funded projects on the human rights of migrants and refugees, as well as on the wider population in the country concerned; calls for the establishment of an effective and independent monitoring mechanism to fully monitor and evaluate the final destination of these funds and protocols for action in the event of violations of fundamental rights; deems it necessary to fully involve regional and local authorities and civil society actors in their design and implementation; calls on the Commission and Member States to establish a complete and clear overview of the funds used to finance cooperation with third countries in the field of migration management across all financial instruments, and their implementation; underlines the importance of				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	sharing the audit data with the EU financial scrutiny framework, including the ECA, OLAF and EPPO;				
9)	52. Notes that gender equality and social inclusion are two of the main spending targets of the NDICI-Global Europe programming; reiterates the EU's commitment to empowering women and girls, and calls on the Commission to integrate gender equality, along with resilience building and climate change adaptation, into planning and implementation of the Trust Funds and the FRT [...]				
10)	53. Calls on the Commission to withhold or review the cooperation with third countries that do not fully respect fundamental rights, including suspending specific funding and projects which endanger or undermine human rights;				
11)	62. Calls on the Commission to prioritise the nexus approach in the implementation of the NDICI-Global Europe, and calls for the cooperation between EU humanitarian and development actors, notably in post-crisis settings and in protracted crises, to be increased in order to better adapt to local needs and deliver more efficient results;				
12)	64. Notes that NDICI-Global Europe envisages mid-term and final evaluations and detailed annual reporting by the Commission to Parliament and the Council on the ongoing activities, results delivered, effectiveness, and progress towards the thematic targets and objectives of the Regulation; calls on the Commission to develop and implement a precise methodology for tracking the 10 % expenditure earmarked for migration and forced displacement to effectively ensure proper transparency and accountability regarding this expenditure, as required by the Regulation;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	66. [...] and calls on the Commission to engage with them, notably regarding the delivery of direct support to hard-to-reach communities in developing countries;				
14)	68. Calls on the Commission to adapt the programming methods to the local realities and emerging local challenges and to support local ownership in the implementation of the new EU development instruments; calls further on the Commission to carry out a needs assessment and adapt the EU's response to local needs;				
15)	69. Calls on the Commission to examine the possibilities of involving third country partners in joint initiatives and financing to address common challenges such as migration, forced displacement, climate change, empowerment of women and protection of vulnerable groups;				
16)	70. Calls on the Commission to prioritise investments in education and job creation to provide possibilities for people in partner countries to engage in local income-generating activities;				

4.1.2.35. AFET Resolution 35: EP resolution of 7 October 2021 on state of EU cyber defence capabilities

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>State of EU cyber defence capabilities</b>	7/10/2021 <a href="#">T9-0412/2021</a> <a href="#">2020/2256(INI)</a> AFET	On 5 November 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament - October I session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Jutta Urpilainen on behalf of High Representative/ Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 5 October 2021.			
1)	4. Calls on the EEAS and the Commission to further develop, in cooperation with the Member States, a comprehensive set of measures and a coherent IT security policy to strengthen resilience, but also military cyber defence coordination [...]				
2)	17. [...] urges the VP/HR and/or the Member States to increase financial and cyber defence personnel resources, in particular cyber intelligence analysts and experts in cyber forensics, and their training in the areas of decision and policy making, policy implementation, cyber incident response and investigations, including the development of cyber skills to strengthen the EU's ability to characterise and attribute cyberattacks and hence provide an adequate political, civilian and military response within a short time frame [...]				
3)	20. [...] calls on the VP/HR and Commission, therefore, to develop an integrated policy approach and promote synergies and close cooperation between the Military CERT-Network, CERT-EU and the CSIRT Network [...]				
4)	23. [...] calls on the Commission and the Member States to activate several key levers, such as				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	certification and the supervision of the responsibility of private actors [...]				
5)	41. Underlines the importance of having a strong partnership in the cyber domain with the UK, which is a leading nation in terms of its cyber defence arsenal; calls on the Commission to investigate the possibility of relaunching a process aiming to conclude a formal and structured framework for cooperation in this field in the future;				
6)	43. Recalls its position on a ban on the development, production and use of fully autonomous weapons enabling strikes to be carried out without meaningful human intervention; calls on the VP/HR, the Member States and the European Council to adopt a common position on autonomous weapons systems that ensures meaningful human control over the critical functions of such weapons systems; demands that international negotiations be launched on a legally binding instrument that would prohibit fully autonomous weapons;				

4.1.2.36. AFET Resolution 36: EP resolution of 7 October 2021 on the Arctic: opportunities, concerns and security challenges

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>The Arctic: opportunities, concerns and security challenges</b>	7/10/2021 <a href="#">T9-0413/2021</a> <a href="#">2020/2112(INI)</a> AFET	On 5 November 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament - October I session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Thierry Breton on behalf of High Representative/ Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 5 October 2021.			
1)	23. Calls on the Commission and the Member States to take a stronger role in promoting the effective implementation of international conventions such as the Paris Agreement, the Minamata Convention, the Convention on Long-Range Transboundary Air Pollution, the Gothenburg Protocol, the Stockholm Convention, the Polar Code, the Aarhus Convention and the Convention on Biological Diversity;				
2)	28. Underlines that the development of northern transport passages should be sustainable and contribute to a greener transition; notes that, specifically, new northern rail links would stimulate the economies of the northern and Baltic states and improve the North-South dimension of market access; calls on the Commission, therefore, to address northern transport issues and identify opportunities in the context of the Northern Dimension Partnership for Transport and Logistics (NDPTL); underlines that better links are needed within the Northern Dimension region to reduce remoteness and ensure connectivity in response to global development;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	41. Notes the role of the private sector in developing sustainable solutions for the Arctic; calls on the Commission to support European companies' investments in key sectors such as renewable energy production, logistics and the development of the power grid, while identifying investment opportunities under the EU's investment and funding instruments in order to facilitate European companies' access to the Arctic market [...]				
4)	54. [...] calls on the Commission to provide a comprehensive overview of EU funding dedicated to the region and the Arctic components of horizontal EU programmes and urges the EU to implement an ambitious, forward-looking and environmentally sustainable investment plan for the Arctic [...]				
5)	56. Welcomes the creation of a Special Envoy for Arctic Matters in 2017; supports the continuation of his mandate and commends the work carried out by the current Special Envoy; calls on the Commission and the European External Action Service (EEAS) to improve inter-service cooperation and coherence between different programmes and investments in the Arctic and urges them to allocate adequate resources to reflect the ambition of the EU's Arctic policy; urges the Commission to establish a specific working group covering northern Europe and the Arctic in a comprehensive manner; notes that the EU's internal coordination on Arctic matters should be strengthened both at Commission working group level and between the relevant EU agencies; encourages the Commission to entrust a coordinating role for Arctic policies to

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one reply, within the 3-month period, in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions.

### Analysis of the Commission actions

No analysis possible, due to the lack of a written Commission reply.

## 4.1.3.1. AFET/INTA Resolution 1: EP resolution of 18 June 2020 on negotiations for a new partnership with the United Kingdom of Great Britain and Northern Ireland

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Negotiations for a new partnership with the United Kingdom of Great Britain and Northern Ireland</b>	18/06/2020 <a href="#">T9-0152/2020</a> <a href="#">2020/2023(INI)</a> AFET INTA	On 4 August 2020, the Parliament received a 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – June 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Olivér Várhelyi on behalf of High Representative / Vice-President Josep Borrell. The <a href="#">plenary debate</a> took place on 17 June 2020.			
1)	7. Calls on the Commission to continue conducting negotiations transparently as this benefits the negotiation process and is also beneficial for citizens and businesses as it allows them to better prepare for the post-transition phase; Urges the Commission to ensure, in that respect, public consultation and constant dialogue with social partners and civil society, as well as with national parliaments; welcomes the Commission's practice of providing regular and timely information to the Parliament on the negotiations, and expects that practice to continue, in line with the information that is shared with the Member States;				
2)	13. Calls on the Commission and Member States to enhance their efforts in order to fully inform EU citizens and businesses of the risks that the transition period might end before an agreement is reached, in order to allow for adequate preparedness;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	19. Recalls, in that context, the commitment made by the President of the European Commission to Parliament's plenary on 16 April 2019 as well as the obligations stemming from Council Decision (EU) 2020/135 of 30 January 2020 [...]				
4)	28. Calls on the Commission to carry out regular and efficient checks and controls and regularly report back to Parliament regarding the border control situation;				
5)	36. Encourages in this regard the Commission to seize the momentum caused by these negotiations to enhance competitiveness for European companies and SME;				
6)	37. [...] the Commission should evaluate the need for safeguard clauses to protect the integrity and stability of the EU internal market such as from unexpected import surges, fraud and circumvention of trade defence measures;  Calls on the Commission and the Member States to take all necessary preparations and precautions for the case of an expiration of the Withdrawal Agreement without an agreement on the future relations, and in particular the trade and economic relations, entering into force on the 1st of January 2021, including contingency measures to reduce as much as possible the harm for workers and enterprises effected;  Calls on the Commission to propose measures to reduce the impact on third country trading partners of the Union, in particular developing countries, in case no agreement can be found with Britain, as				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	British imports may have constituted a sizeable share of their exports to the European Union;				
7)	47. Calls on the Commission to guarantee that existing and future principles and tools in the framework of the social, environmental and climate policies of the EU (e.g. anti-dumping measures, European industrial policy, mandatory due-diligence legislation, EU taxonomy for sustainable investment, do-no-significant-harm principle, carbon border adjustment mechanism, sustainability-related disclosures in the financial services sector) cannot be legally disputed in the framework of the EU-UK FTA and in future trade agreements;				
8)	68. Urges the Commission to include provisions on preventing and combating illegal, unreported and unregulated (IUU) fishing activities within EU and UK waters;				
9)	81. Calls on the Commission to pay particular attention to the UK legal framework when assessing its adequacy under EU law; advocates taking into consideration CJEU case-law in this field, such as the <i>Schrems</i> case, as well as ECHR case-law;				
10)	83. Calls on the Commission to take the above-mentioned elements into consideration when assessing the adequacy of the UK legal framework as regards the level of protection of personal data, and to ensure that the UK has resolved the problems identified in this resolution prior to possibly declaring UK data protection law adequate in line with EU law as interpreted by the CJEU;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Calls on the Commission also to seek the advice of the European Data Protection Board and the European Data Protection Supervisor;				
12)	108. Urges the Commission to represent the interests of each Member State in the final comprehensive agreement;				
13)	119. Calls on the Commission to take into account the specific nature of the cultural sector when negotiating relevant mobility provisions;				
14)	120. Supports unreservedly the clarity in the negotiating directives that audiovisual services should be excluded from the scope of the economic partnership and urges the Commission to remain steadfast in its position;				
15)	159. Calls on the Commission and the European External Action Service to regularly inform Parliament concerning the process of political dialogue with the UK and on the main aspects of the information exchanges on CSDP and crisis management;				
16)	169. Reiterates its call on the Commission, taking into account the status of the UK as a non-Schengen third country and as a key partner in the fight against terrorism and organised crime, to consider potential future practical cooperation between the UK authorities and the EU agencies in the field of Justice and Home Affairs;				

#### 4.1.4. AGRI

Between July 2019 and December 2021, the **Committee on Agriculture and Rural Development (AGRI)** was responsible for one 'ordinary' own-initiative report (INI) and no legislative own-initiative report (INL) leading to the adoption of a one Parliament's resolution ('AGRI resolution'). The table below provides a summary of the analysis based on the data contained in the resolution and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one written reply to the Parliament's AGRI resolution after the 3-month period prescribed by the Framework Agreement (point 16). In total, the Commission submitted five specific and three general replies as well as one mixed reply.

### Analysis of the Commission actions

The Commission proposed/promised seven genuine actions. In 11 cases, no further specific actions were proposed/promised to be taken by the Commission. In four cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the seven actions proposed/promised by the Commission, the Commission already carried out the action in one case. In the six remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

4.1.4.1. AGRI Resolution 1: EP resolution of 8 October 2020 on the European Forest Strategy - The Way Forward

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>The European Forest Strategy - The Way Forward</b>	08/10/2020 <a href="#">T9-0257/2020</a> <a href="#">2020/2157(INI)</a> AGRI	<a href="#">SP(2020)686</a>	Final reply (SP) received 3 March 2021	Specific reply			
1)	<p>5. [...] notes that there is no EU definition of old growth forests and calls on the Commission to introduce a definition, to be prepared in the Standing Forestry Committee, in the process of drafting the future EU Forest Strategy;</p> <p>[...] urges the Commission and the Member States to take urgent action on these issues, through close monitoring and through the enforcement of existing EU laws;</p>	<p>The Commission is currently working, in close cooperation with the Member States under the Co-ordination Group for Biodiversity and Nature (CGBN), to define and map old-growth forests. The Standing Forestry Committee and other relevant expert groups will be consulted in the preparation of these definitions.</p> <p>The Commission welcomes the call to address the cases of unsustainable practices and illegal logging, and to fully implement and, where relevant, strengthen national legislation. Moreover, while Member States' authorities are responsible for the protection of forests and their biodiversity, including by enforcing the EU legislation relevant for forests, the Commission is carefully monitoring the implementation of this legislation within the EU.</p> <p>Moreover, the EU Biodiversity Strategy 2030 states that 'the full implementation and enforcement of EU environmental legislation is therefore at the heart of this strategy, for which political support and financial and human resources will need to be prioritised. As regards the Birds and Habitats Directives, enforcement will focus on completing the Natura 2000</p>				<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>Ongoing follow-up activities by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>and calls on the Commission to swiftly pursue infringement procedures when breaches occur, as well as to follow through on illegal logging cases through all competent bodies;</p> <p>calls on the Commission to finalise, without delay, the fitness check of EU rules against illegal logging;</p>	<p>network, the effective management of all sites, species-protection provisions, and species and habitats that show declining trends. The Commission will also ensure that environment-related legislation with an impact on biodiversity is better implemented, enforced and – where necessary – reviewed and revised.'</p> <p>Commission is carefully monitoring the implementation of this legislation and decides, when appropriate, to open infringement procedures.</p> <p>The Commission has already started preparatory work (impact assessment, open public consultation) on a new legislative proposal, planned in 2021, to curtail the placing of products associated with deforestation and forest degradation on the European market. In parallel, the Commission is also conducting a fitness check of the rules in place to fight illegal logging, namely the EU Timber Regulation and the European Union Forest Law Enforcement, Governance and Trade (FLEGT) Action Plan. The Commission will continue working in partnership with producing countries to reduce the pressure on forests and help them implement sustainable forest-based value chains.</p>		<p><a href="#">Biodiversity strategy for 2030</a> <a href="#">Nature and biodiversity</a></p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>Fitness check finalised and <a href="#">presented</a> on 11 November 2021.</p>	
2)	7. [...] calls on the Commission and the Member States to combat corruption and to fully implement the existing legislation;	The Commission does not have competence to conduct investigations on corruption cases that might occur when national authorities implement EU environmental legislation protecting forests unless the use of EU funds is involved. Yet, the Commission is carefully monitoring the implementation of this legislation and decides when appropriate, to open infringement procedures.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	9. [...] calls on the Commission and the Member States to explore options to incentivise and remunerate climate, biodiversity and other ecosystem services appropriately in order to permit an economically viable forest conversion;	The Commission takes note of the Parliament's call to explore options to incentivise and remunerate forest owners and managers for the provision of ecosystem services, in particular carbon sequestration, including market-based mechanisms in order to incentivise substitution of fossil fuels by renewable raw materials, biodiversity conservation and soil fertility improvements [...].		No further specific actions proposed/promised to be taken by the Commission.	
4)	10. [...] calls on the Commission to include the need for support to forest owners, including financial support, in the new EU Forest Strategy;	The Commission is committed to supporting sustainable livelihoods and income of forest owners, managers and rural communities, in particular through the development of the circular bioeconomy and rural areas. The Commission will continue to work with the Member States and stakeholders to ensure that the EU Forest Strategy contributes to preserve the well-being of all citizens, including in rural areas and help maintain wealthy rural populations.		No further specific actions proposed/promised to be taken by the Commission.	
5)	14. [...] calls on the Commission and the Member States to continue the implementation of sustainability criteria for biomass under the recast of the Renewable Energy Directive, and to make optimum use of the substitution effect by substituting CO <sub>2</sub> -intensive fossil-based materials and energy;	The Commission considers that sustainably produced bioenergy plays a role in meeting the EU climate and energy targets, requiring enforcement of the legislation and effective implementation of the sustainability criteria in the Renewable Energy Directive. In line with the Renewable Energy Directive, the Commission will develop operational guidance, in 2021, on sustainability criteria on forest biomass for energy. In addition, as announced in the EU 2030 Biodiversity Strategy, the Commission will publish, by the end of 2020, a study on the sustainability of the use of forest biomass for bioenergy, to better understand and monitor the potential climate and biodiversity risks, and to inform the review and revision, where necessary, of the level of ambition of the Renewable Energy Directive, the Emissions Trading Scheme, and the		Ongoing follow-up actions by the Commission. The implementing decision on guidance on <a href="#">sustainability criteria for forest biomass used in energy production</a> , expected at the end of 2021 is still pending.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Regulation on land use, land-use change and forestry set for 2021.			
6)	24. [...] calls on the Commission and the Member States to encourage the return of materials of biological origin, including wood waste, to the value chain, by encouraging eco-design, further boosting recycling and promoting the use of secondary raw materials comprising wood for products before their potential incineration at the end of their life;	Although the follow-up mentions point 24, no specific reply is given concerning this particular question.		Not mentioned.	
7)	26. Calls on the Commission to make every effort to ensure, in the implementation of the Regional Development Fund, that, in particular, initiatives aimed at putting a stop to biodiversity loss in forests, promoting mixed and native species planting and improving forest management are fostered, and that projects are implemented and funding is targeted;	The Commission takes note of the Parliament's calls to ensure the appropriate biodiversity protection and improving the sustainable forest management when EU funds are used, and recognises the potential role of agroforestry and elements diversifying the landscapes, such as shelterbelts, bushes and trees, for sustainable agriculture, for supporting environmental objectives and for the protection of farms against extreme events. The Commission is of the view that the new CAP and its strategic planning approach, and the amended definitions and conditions for eligibility under the new CAP will effectively contribute to the viability and applicability of agroforestry systems and the increase of landscape elements, and invites the Member States to make use of these enhanced opportunities for promoting them.		No further/ specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	31. [...] calls on the Commission and the Member States to set up an emergency mechanism, and believes it is essential to include support for silvopasture (forest grazing) within the agroforestry measures and to encourage Member States to implement it in the next Rural Development (RD) programme;	Although the follow-up mentions point 31, no specific reply is given concerning this particular question (to set up an emergency mechanism and on encouraging MS to implement next RD programme).		Not mentioned.	
9)	38. [...] calls on the Commission to coordinate the EU Forest Strategy with the Farm to Fork Strategy so as to achieve these goals and to promote EU-wide specialised training programmes, in order to make farmers aware of the benefits and the practice of integrating woody vegetation with agriculture;	Although the follow-up mentions point 38, no specific reply is given concerning this particular question (to coordinate the EU Forest Strategy with the Farm to Fork Strategy to inform farmers).		Not mentioned.	
10)	41. [...] calls on the Commission to promote the uptake of agroforestry support measures by Member States in their Strategic Plans;	The Commission recalls that the proposal for the new CAP Strategic Plan Regulation specifically addresses the national competences and specificities in recital (39), whereby “Forestry measures should contribute to the implementation of the Union Forest Strategy, and be based on Member States' national or sub-national forest programs or equivalent instruments” and stresses that the CAP Strategic Plans should provide a consistent framework within each country for designing and implementing the most appropriate interventions and investments in support of sustainable management of agricultural and forest land.		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	43. [...] calls on the Commission to invest in, and where necessary, intensify research on finding a solution to the spread of pests and diseases in forests;	The Commission is of the view that the spread of pests and diseases in forests calls for a wide-ranging set of solutions, including research but also action on the ground, and improved monitoring. As announced in the EU Biodiversity Strategy for 2030, the Commission will work with other data providers to further develop the Forest Information System for Europe. This will help produce up-to-date assessments of the condition of European forests and link all EU forest data web-platforms. This will help produce up-to-date assessments of the condition of European forests and link all EU forest data web-platforms.		Ongoing work on the <a href="#">Forest Information System for Europe</a> .	
12)	44. Calls on the Commission to take initiatives, in concert with manufacturers of forestry machinery, to improve the environmental design of that machinery in order to reconcile a high level of protection for workers with minimum impact on the soil and water in forests;	The Commission takes note of the Parliament's call for initiatives in concert with manufacturers of forestry machinery, to improve the environmental design. The Commission supports several initiatives, among others, through the European Innovation Partnership (EIP-AGRI), which can boost the research and innovation in the mentioned areas by supporting operation groups, which can develop and try new methods or machinery in the real working environment.		Ongoing <a href="#">support</a> by the Commission to boost innovation in machinery.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	46. [...] calls on the Commission and the Member States to continue to implement measures and to use existing European instruments such as the European Agricultural Fund for Rural Development (EAFRD), the European Regional Development Fund (ERDF), the European Social Fund (ESF) and the European training programmes (ET2020) to support generation renewal and to compensate for the skilled workforce shortage in the sector;	The Commission shares the Parliament's views that education and a skilled, well-trained workforce are essential when it comes to the successful implementation of sustainable forest management in practice. The Commission will support developing innovative tools by supporting relevant research and innovation activities under Horizon Europe. Moreover, the new CAP ensures the continuation of the knowledge transfer and training actions and access to advisory services. The Commission notes the need to prioritise continuing high-quality vocational training in eco-construction and timber-related trade and is committed to working with the Member States through the Skills Agenda and its upcoming Pact for Skills and through Cohesion funds and the Just Transition Fund to finance training and re-training initiatives, in close cooperation with social partners.		The Commission confirms it continues to implement measures in the context of <a href="#">Horizon Europe</a> , the <a href="#">new CAP</a> , the <a href="#">Skills Agenda</a> , <a href="#">Cohesion funds</a> and the <a href="#">Just Transition Fund</a> .	
14)	50. [...] calls on the Commission to consider the implementation of an EU-wide digital wood-traceability mechanism for data gathering, consistent transparency, ensuring a level playing field, and reducing uncompetitive behaviour and deliberate wrongful action in the wood trade, within and outside the EU, through a verification system;	The Commission takes note of the Parliament's call to consider the implementation of an EU-wide digital wood-traceability mechanism, supports ongoing efforts to improve implementation and compliance through digitalisation, and reiterates its commitments to zero-tolerance on non-compliance. The new legislative proposal on deforestation-free products is meant to establish sustainability criteria against deforestation and increase transparency and traceability of supply chains.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  <a href="#">Deforestation and forest degradation – reducing the impact of products placed on the EU market.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	<p>51. [...] calls on the Commission's Standing Forestry Committee (SFC) to support Member States in this task; stresses the importance of the exchange of information and the parallel involvement of relevant stakeholders, such as forest owners and managers, in the Civil Dialogue Group on Forestry and Cork, and of maintaining its regular meetings and increasing coordination and synergies with the SFC; urges the Commission to involve Parliament in the implementation of the EU Forest Strategy at least on an annual basis; calls for the strengthening of the role of the SFC in order to ensure coordination among relevant stakeholders and policies at EU level; in addition, stresses that local and regional authorities have a key role to play in strengthening the sustainable use of forests and, in particular, the rural economy;</p> <p>[...] calls on the Commission and its Directorates-General with forest-related competences to work strategically to ensure coherence in any forestry-related work and enhance the sustainable management of forests;</p>	<p>The Commission acknowledges the central role of the Member States in the implementation of the post-2020 EU Forest Strategy and recognises the role of the Standing Forestry Committee. Other fora and committee exist, which within their mandates, also discuss, take decisions and provide expertise on policies relevant to forests. The Commission will explore how to further strengthen the governance framework and will involve relevant stakeholders and keep the European Parliament duly informed along different stages of preparation of the EU Forests Strategy.</p> <p>No specific answer to this point although the entire Commission response could be considered as an acknowledgement of this Parliament request.</p>		<p>Ongoing follow-up actions by the Commission including meetings of the <a href="#">Co-ordination Group for Biodiversity and Nature</a>.</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point.</p>	
16)	<p>53. Recalls the pledge of the Commission concerning zero tolerance of non-compliance; stresses that a number of infringement cases currently open against Member States address irreplaceable values of European forest ecosystems, and urges the Commission to swiftly act in these cases;</p>	<p>The Commission [...] reiterates its commitments to zero-tolerance on non-compliance. The new legislative proposal on deforestation-free products is meant to establish sustainability criteria against deforestation and increase transparency and traceability of supply chains.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	54. Urges the Commission, in coordination with the Member States' labour inspection services, to verify that the machinery placed on the market and used by the timber industry complies with Directive 2006/42/EC on machinery and that it is equipped with a sawdust extraction and collection system;	No specific reply is provided to this point.	C C	Not mentioned.	C C
18)	57. [...] calls on the Commission and the Member States to encourage knowledge and technology transfer and sharing of best practices, on, for example, sustainable and active forest management;	The Commission takes note and shares the view of the importance given to sharing best practice, vocational training, cross-border cooperation, communication and information, as elements to consider in the EU Forest Strategy, within relevant actors' respective competences and capacity, to plan and enhance action at all levels to effectively address the identified needs.	C C	No further specific actions proposed/promised to be taken by the Commission.	C C

#### 4.1.5. AGRI/ENVI

Between July 2019 and December 2021, the **Joint Committees - the Committee on Agriculture and Rural Development (AGRI) and the Committee on Environment, Public Health and Safety (ENVI)** were responsible for one 'ordinary' own-initiative report (INI) and no legislative own-initiative report (INL) leading to the adoption of one Parliament's resolution ('AGRI/ENVI resolution'). The table below provides a summary of the analysis based on the data contained in the resolution as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one reply, within the 3-month period, in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions.

### Analysis of the Commission actions

No analysis possible, due to the lack of a written Commission reply.

## 4.1.5.1. AGRI/ENVI Resolution 1: EP resolution of 20 October 2021 on a farm to fork strategy for a fair, healthy and environmentally-friendly food system

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>A farm to fork strategy for a fair, healthy and environmentally-friendly food system</b>	20/10/2021 <a href="#">T9-0425/2021</a> <a href="#">2020/2260(INI)</a> AGRI / ENVI	On 23 November 2021, the Parliament received <a href="#">Replies</a> Of the Commission to positions and resolutions adopted by the European Parliament – October II 2021 part-session’ informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Stella Kyriakides. The <a href="#">plenary debate</a> took place on 18 October 2021.			
1)	1. [...] encourages the Commission to translate the strategy into concrete legislative and non-legislative action as soon as possible, accompanied by the proper financial support mechanisms for the transition;				
2)	3. Welcomes the announcement of an evidence-based proposal for a legislative framework for sustainable food systems based on transparent data and taking into account the latest scientific knowledge; invites the Commission to use this proposal to set out a future-oriented holistic, balanced, integrated and environmentally, socially and economically sustainable common food policy, in which all actors make their contribution, aimed at reducing the environmental and climate footprint of the EU food system as well as reducing its negative impacts on biodiversity and human and animal health and welfare in order to make Europe the first climate-neutral and close-to-zero-pollution continent by 2050 at the latest, and strengthening its resilience to ensure medium- and long-term food security in the face of climate change, environmental degradation and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	biodiversity loss; stresses the need to ensure economic and social sustainability throughout the food chain as good socioeconomic prospects and the competitiveness of the various sectors concerned will help fulfil the goals of the strategy [...]				
3)	4. [...] calls on the Commission to promote a societal dialogue on a common understanding of sustainability and its various components, on the path towards its proposal for a legislative framework for a sustainable food system, which ultimately will have to be based on one coherent approach to all aspects of sustainability;				
4)	5. Welcomes the Commission's proposal to develop a contingency plan for ensuring food supply and food security in order to coordinate a common European response to crises affecting food systems; insists that a prevention approach is needed to avoid panic movements and overreactions by people, firms or Member States; considers that it will be an adequate response to the growing expectations about food security that are to be addressed at European level; urges the Commission to consider strategic food stock issues in the way that it does for strategic petroleum stocks across the Union;				
5)	12. Calls on the Commission to ensure that the provisions of Regulation (EC) No 1107/2009 are properly applied and thereby to guarantee, inter alia, a minimum standard of notification on emergency authorisations of pesticides, including the requirement for Member States to provide complete and detailed explanations and to make those				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	notifications public; welcomes the role of EFSA in examining these derogations;				
6)	15. [...] invites the Commission to speed up and simplify the adoption of new plant health solutions, including plant protection products with a lower impact, such as low-risk substances or biosolutions, and to introduce a definition and a separate category for natural substances in horizontal legislation, as well as to engage in initiatives aimed at finding alternative assessment paths for these low-risk, basic and naturally occurring substances [...]				
7)	16. Reiterates the crucial importance of protecting bees and other pollinators against the harmful effects of pesticides and diseases; recalls its objection of 23 October 2019 <sup>6</sup> and reiterates its call on the Commission to ensure that the revision of the bee guidance and the future implementing acts do not lead to a level of protection for bees below that laid down in the EFSA bee guidance from 2013, and are based on the latest scientific and technical knowledge, and thus proposes modifying the uniform principles, not only with regard to acute toxicity for honeybees but at least also with regard to chronic toxicity and larval toxicity for honeybees and acute toxicity for bumblebees; notes that EFSA is designing its own modelling system, ApisRAM, which appears to be more in line with the biology of honeybees than BeeHAVE and less open to conflicts of interests; urges				

<sup>6</sup> OJC 202, 28.5.2021, p. 49.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the Commission to urgently reassess those substances that have the same mode of action as neonicotinoids;				
8)	17. Reiterates its call for a pollinator indicator <sup>7</sup> and a restoration target; calls on the Commission and the Member States to secure a new EU-wide pollinator monitoring framework with robust schemes deployed at Member State level, interim milestones, clear time-bound objectives, indicators and targets; stresses that the monitoring activities must be integrated in the new CAP monitoring and evaluation framework;				
9)	19. [...] believes that the proper implementation of the Veterinary Medicines Regulation <sup>8</sup> and Regulation (EU) 2019/4 on medicated feed <sup>9</sup> will further reduce the use of antibiotics and calls on the Commission to scrutinise the implementation and enforcement by Member States [...]				
10)	20. [...] calls on the Commission and the Member States to focus on additional measures to enable and incentivise sustainable innovative solutions, particularly in prevention tools and alternative treatments [...]				
11)	23. [...] calls on the Commission to ensure that its policies and funding programmes support the				

<sup>7</sup> As per the commitment made in the EU pollinators initiative ([COM \(2018\)0395](#)), action 5C.

<sup>8</sup> Regulation (EU) 2019/6 (OJ L 4, 7.1.2019, p. 43).

<sup>9</sup> Regulation (EU) 2019/4 of the European Parliament and of the Council of 11 December 2018 on the manufacture, placing on the market and use of medicated feed, amending Regulation (EC) No 183/2005 of the European Parliament and of the Council and repealing Council Directive 90/167/EEC (OJ L 4, 7.1.2019, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	traditional European cultural landscape, such as sloping and terraced vineyards and extensive permanent grassland-based production supporting biodiversity [...]				
12)	24. Calls for stronger harmonisation of the legal framework for animal husbandry in the EU, using common, science-based animal welfare indicators and welcomes the Commission's commitment to evaluate and revise, where necessary, the existing body of animal welfare legislation; underlines the importance of taking into account the latest advances in animal welfare science and responding to public, political and market demands for higher animal welfare standards; calls on the Commission to put forward a legislative proposal with the objective of phasing out the use of cages in EU animal farming, assessing the possibility of a phase-out by 2027; emphasises the need for this phase-out to be based on a science-based impact assessment and to ensure an appropriate transition period; calls on the Commission to adopt a species-by-species approach that takes into account and assesses the characteristics of each different animal, which should have housing systems suited to their specific needs, while safeguarding animal and human health, ensuring the protection of workers and ensuring sufficient support and a transition period with the aim of maintaining the competitiveness of farmers and breeders;				
13)	27. [...] calls on the Commission and the Member States to facilitate local slaughter solutions, including mobile slaughter, with smaller units and better staff training on avoiding animal suffering; calls on the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Commission to promote alternatives to live animal transport wherever possible;				
14)	28. Calls on the Commission and the Member States to implement and enforce relevant EU legislation, in particular Council Directive (EC) No 1/2005 on the protection of animals during transport and related operations; <sup>10</sup>				
15)	29. [...] calls <sup>11</sup> on the Commission and Member States to accelerate the move away from these agricultural practices and from the unsustainable use of wildlife, including illegal trafficking, and towards better management of veterinary prevention and the promotion of high standards of animal health and animal welfare, including with the EU's trading partners, in order to prevent the spread of zoonotic diseases and invasive species and to promote the EU's high biosecurity standards as the best practice at global level [...]

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	31. [...] calls on the Commission to explore a framework for robust carbon quantification and certification that should avoid the possibility of misrepresentation known as greenwashing; calls on the Commission to present several options for carbon farming and underlines that carbon markets are part of a much broader set of regulatory and non-regulatory measures to reduce GHG emissions, and stresses that carbon farming schemes should be part of an incentivising toolbox to deliver on climate objectives; calls for the proposals to be in line with animal welfare and environmental objectives and the 'do no harm' principle of the Green Deal [...]				
17)	33. Raises awareness of the potential negative effects of concentration and monopolisation in the seed sector and calls on the Commission to take measures to counter them if necessary; emphasises, in this context, the importance of open innovation through plant breeders' rights and notes with concern the detrimental effect of wide-scoped patents in the seed sector [...]				
18)	37. Reiterates its call on the Commission to present a new legislative proposal on the issue of cloning and 'clone food' as a matter of urgency [...]				
19)	41. Calls on the Commission to only approve CAP national strategic plans which clearly demonstrate a commitment to sustainability from the economic, environmental and social perspectives and are in line with the objectives of the European Green Deal, the relevant EU-wide targets and the Paris Agreement;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
20)	<p>43. Underlines that healthy soils are a precondition for ensuring security of food, feed and fibre production; calls on the Commission and the Member States, therefore, to prevent its further degradation at the EU level; underlines that agricultural soil is a basic natural resource, the good condition of which is key to fulfilling the farm to fork strategy; stresses, in this context, the importance of the new soil strategy and calls on the Commission to take appropriate action based on it to bring about the necessary solutions; acknowledges the essentiality of soil organic matter and biodiversity and the services and goods which it provides [...]</p>				
21)	<p>46. Points out that 'protected cultivation' of fruit and vegetables in modern greenhouses is a highly sustainable food production system that is increasingly being used and offers a number of advantages; calls on the Commission to recognise the ongoing transformation in the European horticultural sector, which enables more sustainable food production and contributes to food security, food safety, increased resource efficiency and reduced food waste throughout the food production chain; highlights that besides a low land-use footprint, modern horticulture contributes to different goals of the strategy such as a low need for input, efficient use of resources and production of fruits and vegetables close to the point of consumption, thereby promoting shorter supply chains and security of supply; calls on the Commission to consider allocating research and innovation investment funds for protected growing systems in modern greenhouses that use fewer resources to grow the same yields;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
22)	47. Calls on the Commission to encourage Member State governments to expand or create systems which allow members of the public to rent and utilise derelict and unused government-owned land for food production;				
23)	48. Stresses the importance of using agro-forestry and forest curtains to reduce pressure on natural forests, help tackle climate change and increase productivity, as well as alternatives to the use of fertilisers in agricultural production; encourages the Commission and the Member States to develop tools in their future national strategic plans to encourage reforestation and afforestation and to promote sustainable agroforestry, including silvo-pasture where possible; calls on the Commission to promote EU-wide specialised training programmes in order to make farmers aware of the benefits of integrating woody vegetation in agriculture;				
24)	49. Stresses the importance of robust and strict criteria for biomass-based renewable energy production and calls on the Commission to bring forward science-based criteria as part of the review of the Renewable Energy Directive;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
25)	51. Urges the Commission to integrate food aid issues in the farm to fork strategy since many Europeans suffer from lack of food, especially single parent families and students, and the social and economic consequences of the pandemic will increase that figure; recognises the unique role of the food aid associations across the European Union that need to be better supported because of the growing number of people who need help [...]				
26)	53. Encourages the Commission and the Member States to consider agricultural land, agricultural know-how, the food supply chain and its workers as strategic assets for the safety and well-being of all Europeans and to ensure that working and social protection conditions throughout the agri-food supply chain, including proper control of unfair practices in this chain, meet national and EU standards for all workers;				
27)	59. Expresses disappointment at the lack of prominence and ambition for the contribution and potential of the fisheries and aquaculture sector in the farm to fork strategy; urges the Commission to pay due attention to the specific nature of the fisheries and aquaculture sector in any future legislative proposals, strategies or guidelines [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
28)	63. Calls on the Commission and the Member States to build on existing sustainable practices and to facilitate, encourage and provide adequate support for the transition to low-impact fisheries and aquaculture and the sustainable development of the sectors, including small-scale coastal fisheries, such as through the application of selective fishing gear, environmentally friendly aquaculture, including organic aquaculture, and energy efficiency solutions and by increasing the percentage of the national quotas allocated to small-scale coastal fisheries;				
29)	66. Urges the Commission and Member States to deliver on the legally binding measures it committed to in the framework of the marine Natura 2000 sites and to adopt a holistic approach to the marine environment and tackle the root causes of water pollution, including marine litter and urban and industrial waste water, putting an end to practices that are harmful to the marine environment and human health and incentivising fishers to sustainably collect maritime waste while avoiding additional fuel consumption and emissions as well as bycatch of marine animals and fish and negative ecosystem impact, and to implement measures to improve water quality and disease control and limit stocking density in aquaculture production in the interests of human health and animal welfare;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
30)	68. Calls on the Commission and the Member States to support and encourage the development of more sustainable fishing techniques and gear and higher welfare methods of capture, landing, transport and slaughter of fish and marine invertebrates, on the basis of the best available science, as well as improvements to animal welfare standards for farmed fish in order to reduce stress and improve fish quality;				
31)	69. [...] calls on the Commission and the Member States to consider pond fishing in relevant measures and programmes;				
32)	74. [...] encourages the Commission and the Member States to actively promote the development of local food strategies, together with short supply chain initiatives;				
33)	77. [...] urges the Commission and the Member States to reduce the administrative burden on small and medium-sized participants in the food chain through measures such as streamlining registration processes and making permit and licence and approvals more efficient and also by ensuring that relevant regulatory bodies are appropriately staffed, in order for small food producers to get their products to market as quickly and easily as possible;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
34)	79. Urges the Commission to thoroughly enforce Directive (EU) 2019/633 on unfair trading practices, and to carefully monitor its transposition into national law; calls on the Commission to reinforce efforts to strengthen the position of farmers in the food supply chain and bring forward concrete proposals in line with the strategy;				
35)	80. Reiterates that dual quality in food products is unacceptable and needs to be fully counteracted in order to avoid discriminating against and misleading European consumers; considers, therefore, that the farm to fork strategy must include provisions to prevent double standards in food quality, and to this end calls on the Commission to monitor the situation on the market closely and propose targeted legislation where necessary;				
36)	88. [...] calls on the Commission to develop such recommendations and specific actions to effectively promote healthy, sustainable and more balanced diets;				
37)	89. Welcomes the fact that the strategy rightly recognises the role and influence of the food environment in shaping consumption patterns and the need to make it easier for consumers to choose healthy and sustainable diets; encourages the Commission and the Member States to take a more systematic and evidence-based approach in order to facilitate creating healthy, sustainable and fair food environments instead of only relying on a code of conduct [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
38)	90. [...] and urges the Commission to closely monitor the progress in reformulation [...]				
39)	91. [...] calls on the Commission to build upon its report on the development of plant proteins in the European Union (COM (2018)0757) and to present an EU protein transition strategy covering the demand and the supply side to support and boost the sustainable production of protein crops, including local supplies of feedstuffs and food production, enhancing EU self-sufficiency and lowering global environmental and climate impacts [...]				
40)	94. [...] calls on the Commission to ensure that a mandatory and harmonised EU front-of-pack nutritional label is developed based on robust, independent scientific evidence and demonstrated consumer understanding, with open access for all market operators including small and medium-sized operators, taking into account the additional burden to food operators and unions; stresses furthermore that to facilitate comparison across products, it should include an interpretive element to provide transparent, comparable and harmonised product information and be based on uniform reference amounts; calls on the Commission to duly take into account the specific characteristics of single ingredient products and products under European quality schemes (PDO, PGI, GI etc.), particularly the invariability of their composition, while stressing that any considerations regarding potential exemptions should be based on scientific reasoning [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
41)	96. Calls on the Commission to make an assessment of changes in consumer behaviour, such as in the online purchasing of food products;				
42)	97. Welcomes the Commission's initiative aimed at improving origin labelling and its consideration of extending it to a wider range of products; reiterates its call for mandatory origin labelling; stresses that this should be comprehensive and harmonised and cover all food products and should cover catering facilities, restaurants and retail and be fully verifiable and traceable and not undermine the proper functioning of the internal market; emphasises that the food information regulation <sup>12</sup> needs to be revised with a focus on milk and meat as ingredients; calls on the Commission to rectify the current practice whereby products whose primary ingredients are not locally or regionally sourced can be marketed as such if the origin of these non-local primary ingredients is indicated in the small print, and to make the origin of the primary ingredients more visible to the consumer; calls on the Commission to propose legislative changes for honey labelling rules that will result in better consumer information and to support the EU beekeeping sector by reinforcing import inspections in order to prevent imports of adulterated honey while stressing that all country-of-origin labelling needs to be effectively enforced to combat food fraud;				

<sup>12</sup> Regulation (EU) No 1169/2011 of the European Parliament and of the Council of 25 October 2011 on the provision of food information to consumers (OJ L 304, 22.11.2011, p. 18).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
43)	98. Welcomes the Commission's intention to create a sustainable food labelling framework and calls on the Commission to define the methodology and specify which dimensions of sustainability would be covered while ensuring that the new scheme does not conflict with existing environmental frameworks such as the EU ecolabel or the organic logo; highlights that many unsubstantiated and even misleading environmental claims and advertising methods are currently being used and calls on the Commission to introduce a regulatory framework establishing a clear, swift and efficient pre-approval procedure for all sustainability claims and labels;				
44)	101. [...] invites the Commission to launch a study to quantify in economic terms the environmental and societal costs, including health-related costs, associated with the production and consumption of the most consumed food products on the EU market;				
45)	102. [...] calls on the Commission further to develop monitoring and reporting tools on sustainable food procurement;				
46)	104. [...] calls on the Commission to identify any potential barriers that hinder a faster pace of reducing waste and calls on the Commission and the Member States to ensure adequate financing for research, innovation, engagement of stakeholders and information and education campaigns through the creation of national food waste funds with the objective of eliminating waste;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
47)	106. [...] calls on the Commission to work on a European force against food fraud to enhance coordination between the different relevant national agencies in order to ensure the enforcement of EU food standards both within the EU single market and regarding our imports;				
48)	107. Urges the Commission to monitor and enforce the continuous allocation of adequate resources for official food controls in order to ensure that a sufficient number of controls is performed to verify the compliance with food and feed requirements and urges the Commission and the Member States to strengthen customs checks to ensure compliance with EU production standards, inter alia on food safety, antimicrobial resistance, animal welfare and plant protection products, as well as to avoid the entry of plant and animal pests into the EU [...]				
49)	112. [...] calls on the Commission to take action to ensure that more equal progress is made in all Member States;				
50)	116. [...] encourages the Commission and the Member States to actively support bottom-up initiatives bringing farmers and citizens closer by working at local level and incorporating local knowledge, to better adapt to the specific realities on the ground; [...]				
51)	120. [...] calls on the Commission and Member States, as well as regional and local administrations, to put an end to such practices in order to support young farmers and to facilitate their entry into farming;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
52)	122. Recalls the global responsibility of European food systems and their key role in setting global standards for food safety, environmental protection, social protection and animal welfare; reaffirms its commitment to the implementation of Policy Coherence for Development principles; calls on the Commission and the Member States to ensure that all food and feed products imported into the EU fully comply with relevant EU legislation and the Union's high standards and to provide development assistance to support primary producers from developing countries in meeting those standards [...]				
53)	123. Calls on the Commission and the Member States to maintain a holistic approach as the implementation of certain farm to fork strategy targets in the EU must not lead to the relocation of parts of agricultural production to other regions with lower standards than the EU;				
54)	125. Welcomes the Commission's commitment to promoting the global phasing out of pesticides no longer approved in the EU and to ensuring that hazardous pesticides banned for use in the EU in accordance with the relevant legislation are not exported outside the Union, and urges the Commission to present its proposals to that end as soon as possible [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
55)	126. Points to the need for safe and affordable food for a global population of around 10 billion by 2050 in the context of rapid population growth, climate change, the scarcity of natural resources and changing consumption patterns; calls on the Commission to strengthen the global dimension of the strategy to ensure the right to adequate food and implement the UN Declaration on the Rights of Peasants and Other People Working in Rural Areas and emphasises that EU policies on fair, sustainable and resilient food systems should explicitly address gender inequality; urges the Commission to provide support for developing countries to protect their infant industries, promote food security, support climate change mitigation for agriculture, and meet EU and international sustainability standards for exporting their agricultural products;				
56)	129. Notes with concern that several audits carried out by DG Sante as well as detailed NGO investigations state that full traceability of live horses from Argentina destined to the European Union market is not ensured, involving food safety risks, and that animal welfare is compromised; calls on the Commission to suspend the import of horse meat from countries where applicable EU requirements relating to traceability and animal welfare are not complied with;				
57)	130. Recalls that structural animal experiments that are not indispensable should have no place in the food chain as Directive 2010/63/EU prescribes the replacement and reduction of the use of animals in procedures; calls on the Commission and Member States to stop the import and domestic production of Pregnant Mare Serum Gonadotropin (PMSG), which is				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	extracted from the blood of pregnant horses that are systematically impregnated and exposed to blood collections, involving health and welfare issues;				
58)	131. Calls on the Commission to urgently present a proposal for an EU legal framework based on mandatory horizontal due diligence throughout the supply chain for EU and foreign companies operating in the single market that ensures sustainable supply chains and investments that are free from adverse environmental impacts including deforestation, forest degradation, ecosystem conversion and degradation and adverse impacts on human rights and governance, to promote good governance and to increase traceability and accountability in global supply chains;				
59)	133. Calls on the Commission to strengthen the trade aspects of the farm to fork strategy in order to ensure consistency between the common commercial policy, the customs union action plan, the common agricultural and fisheries policies and the objectives of the farm to fork strategy, the EU biodiversity strategy for 2030 and other related EU policies, and to pursue these objectives in a gradual way through the development of efficient green alliances in all relevant bilateral, regional and multilateral forums, including the UN Food Systems Summit 2021, as well as through an ambitious revision of its trade policy, by establishing a dedicated framework on sustainable agri-food systems and products for future trade agreements, notably by means of non-regression clauses, improving the functioning of safeguard clauses and putting an end to imports of products that exceed the maximum EU residue limits for plant				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	protection products, in accordance with WTO rules; calls on the Commission to promote better coordination between all public and private stakeholders in order to achieve these objectives; considers that the EU should reconfirm the mandate of the Committee on World Food Security as the international policy platform for food security and nutrition;				
60)	134. [...] urges the Commission to provide support to developing countries in a bid to promote food security and provide assistance on aligning with European standards for sustainable agri-food systems [...]				
61)	141. Welcomes the proposed new initiative on climate and trade at the WTO; underlines the importance of using this framework to develop a comprehensive and sustainable agri-food system based on common and ambitious production standards; urges the Commission to engage proactively at the WTO to enable an ecological transition, ensure that trade policy is consistent with the SDGs, continue negotiations on transparent food security stocks and, in particular, prevent situations where agri-food products become the adjustment variable or a collateral victim of trade conflicts, while continuing to develop an ambitious, WTO-compatible sustainable trade policy;				
62)	142. Welcomes references to relevant UN processes in the farm to fork strategy; highlights the need for the EU to support the Committee on World Food Security and its civil society mechanism as the foremost multilateral policy platform on food systems; calls on the Commission to promote the global transition				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	towards sustainable food systems and food security in all the relevant international forums, including the 2021 UN Food Systems Summit;				

#### 4.1.6. BUDG

Between July 2019 and December 2021, the **Committee on Budgets (BUDG)** was responsible for one ‘ordinary’ own-initiative report (INI) and one legislative own-initiative report (INL) leading to the adoption of two Parliament's resolution ('BUDG resolution'). The table below provides a summary of the analysis based on the data contained in the resolution and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

Table 11: Overview on BUDG resolutions and its follow-up (July 2019 and December 2021)

Resolution and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	2
Number of INI parliamentary procedures	1
Number of INL parliamentary procedures <sup>3</sup>	1
Number of Commission written follow-up documents to the INI resolutions	1

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one written, specific reply to the Parliament's BUDG resolution, after the 3-month period prescribed by the Framework Agreement (point 16). To the five Parliament requests, the Commission provided five replies.

### Analysis of the Commission actions

The Commission proposed/promised one genuine action, which has already been carried out. In four cases, no further specific actions were proposed/promised to be taken by the Commission.

4.1.6.1. BUDG Resolution 1: EP resolution of 10 July 2020 on financial activities of the European Investment Bank – annual report 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Financial activities of the European Investment Bank – annual report 2019</b>	10/07/2020 <a href="#">T9-2020/0190</a> <a href="#">2019/2126(INI)</a> BUDG	<a href="#">SP(2020)452</a>	Final reply (SP) received 8 December 2021	Specific reply			
1)	10. Asks the EIB and the Commission to work together to draw up proposals for more systematic involvement of the EIB's teams in project implementation in countries which request this, particularly in areas requiring advanced expertise or which are of strategic importance to the Union, such as the fight against climate change;	<p>The EIAH and in the future the InvestEU Advisory Hub are active all across the project lifecycles including the implementation phase of the projects. The Commission alongside the EIB are currently discussing a strategy to mainstream "climate action" projects also by providing capacity building at the level of the financial intermediaries.</p> <p>The Commission in the next programming period of 2021-2027 plans to work together with the EIB especially under the umbrella of the InvestEU Advisory Hub to support Member States during the full cycle of investment projects.</p> <p>The Advisory Agreement signed between the Commission and the EIB on the InvestEU Advisory Hub foresees that the EIB shall provide advisory support for the identification, preparation, development, structuring, procuring and implementation of investment projects, and/ or enhance the capacity of promoters and financial</p>				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">InvestEU advisory hub</a> is up and running).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>intermediaries to implement financing and investment operations and/ or develop the existing market for financial products. Its support may cover any stage of the life cycle of a project or financing of a supported entity, as appropriate.</p> <p>The Advisory Hub shall be available to public and private project promoters, including SMEs and start-ups, to public authorities and to NPBI, financial and non-financial intermediaries. The Advisory Hub shall have local presence.</p> <p>For the programming period 2021-27, the Commission and the EIB plan to continue the joint initiative JASPERS to assist in preparing project pipeline and support project preparation and implementation throughout the whole project cycle, including in its implementation. JASPERS assistance will be discussed and programmed in Country Work Programmes that will set out strategic directions of technical assistance support together with identification of main areas of support and/or assignments. Supporting projects contributing to European Green Deal will be one of main areas of JASPERS intervention.</p> <p>JASPERS will be embedded in the InvestEU Advisory Hub through its horizontal cross-component with expert interventions under three windows (sustainable infrastructure; research-innovation-</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		digitisation and social investment) and with a separate budget and governance structure.			
2)	16. Calls on the Commission to pay special attention to ensuring that EU fiscal rules support future efforts to increase the level of public investment in the EU, which will allow the EIB to leverage that investment;	<p>The Stability and Growth Pact aims to ensure the credibility and sustainability of public finances, thus ensuring financial stability and smooth access to financial markets at low interest rates. These are necessary factors to ensure sustainable public investment over the medium term.</p> <p>In principle, the Pact is neutral about the composition of government revenue and expenditure, focusing on deficit and debt. Member States are thus free to re-prioritise their expenditure in favour of investment. It is however, observed that during consolidation periods it is often politically easier to cut investment rather than to increase taxes or cut other expenditure.</p> <p>The current context is also marked by the COVID-19 outbreak and the need for a green and digital transition, calling for more investment. The EIB may help address the scale of such structural investment needs, by using its financial and advisory product offer to mobilise private investment that complements Member States' public investment. The Multiannual Financial framework (MFF) for 2021-2027 and the NextGenerationEU, in particular the Recovery and Resilience Facility, will also help to cater for those investment needs.</p>		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The Economic Governance Review published in February<sup>6</sup> includes a retrospective assessment of the effectiveness of the EU fiscal rules and launches a debate on their future. The issues for public debate established by the review include the extent to which the fiscal framework can support the reforms and investments. As announced in the Communication on the European Green Deal<sup>7</sup>, the outcome of this debate will “inform the basis for any possible future steps, including how to treat green investment within the EU fiscal rules, while preserving safeguards against risks to debt sustainability”.</p> <p>The public debate on the future of the economic surveillance framework has been impacted by the need to focus on the immediate challenges of the coronavirus crisis. The Commission will actively return to the review exercise when the immediate challenges have been addressed.</p>			

<sup>6</sup> Communication from the Commission to the European Parliament, the Council, the European Central Bank, the European Economic and Social Committee and the Committee of the Regions on the Economic governance review COM(2020) 55 final.

<sup>7</sup> Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions on the European Green Deal, COM(2019) 640 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>21. Calls on the Commission to ensure that InvestEU's sustainability-proofing methodologies are fully consistent with the EU's sustainability objectives, and that evaluation criteria for social projects take into account the principles of the European Pillar of Social Rights;</p>	<p>In order to ensure that financing and investment operations receiving InvestEU support are in line with or contribute to the EU broader sustainability commitments, the InvestEU Regulation foresees sustainability proofing for identifying and addressing potential significant impacts they might have on the three sustainability dimensions: climate, environment and social. The transactions under all windows of the InvestEU Fund should be in line with relevant national and international conventions/instruments, including the European Pillar of Social Rights. The guidance aims going beyond the minimum obligations of the relevant EU legislation. Sustainability proofing should minimise detrimental impacts and, to the extent possible, maximise the benefits to the climate, environment and social dimensions. Whenever possible, some externalities will be monetised and included in the economic appraisal of the project.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (sustainability proofing).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	93. Calls on the Commission, the European Court of Auditors (ECA) and the EIB to enhance the role of the ECA in the upcoming renewal of the tripartite agreement governing the rules of engagement;	<p>The Commission is working together with the European Court of Auditors (ECA) and the European Investment Bank on a renewed tripartite agreement. The purpose of the revision is to renew the agreement concluded on 26 September 2016 on cooperation between the Commission, the ECA and the EIB and on the rules under which the Court is to carry out its audits on Union expenditure and revenue managed by the Bank. This revision will also revisit the clauses for the ECA's access to documentation in relation to operations supported by the EU budget within the provisions of the Treaty.</p> <p>Such revision shall however be done within the boundaries set by the Treaty on the Functioning of the EU (TFEU). In accordance with the third subparagraph of Article 287(3) TFEU, the tripartite agreement covers both the financing operations under the mandates conferred by the European Union on the EIB and the operations managed by the Bank and guaranteed by the general budget of the European Union. It does not modify or supersede any Union law, in particular the provisions of Articles 285 and 287(3) TFEU, which is the legal basis of the tripartite agreement and confers on the ECA the mandate to audit the Union expenditure and revenue managed by the EIB.</p> <p>In addition, the Commission and the EIB work to improve targeted communication aiming to increase the visibility of the Union contribution for citizens.</p>		A new <a href="#">tripartite agreement</a> between the European Court of Auditors, the European Investment Bank and the European Commission was signed on 11 November 2021.	
5)	95. Demands that the Commission increase its transparency towards Parliament on the positions it takes in the EIB Board of Directors;	The Board member nominated by the Commission and approved by the EIB Board of Governors is subject to the EIB's Statute and the Code of Conduct for the members of the EIB Board of Directors and acts in the interest of the EIB. His/ her position is always guided by the objective to		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>ensure compliance with EU law and policies and safeguard the integrity of EU principles and objectives in all EIB activities.</p> <p>The procedure laid down in Article 19 of the EIB Statute, whereby the EIB consults the Commission on projects it plans to finance, is also guided by the objective to ensure compliance with the EU law as well as the achievement of EU policy goals.</p>			

#### 4.1.7. BUDG/CONT

Between July 2019 and December 2021, **the Joint Committees - Committee on Budgets (BUDG) and the Committee on Budgetary Control (CONT)** were responsible for two 'ordinary' own-initiative reports (INI) and no legislative own-initiative report (INL) leading to the adoption of a two Parliament's resolution ('BUDG/CONT resolutions'). The table below provides a summary of the analysis based on the data contained in the resolutions, as well as the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website<sup>2</sup>. Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one written reply to the Parliament's two BUDG/CONT resolutions, after the 3-month period prescribed by the Framework Agreement (point 16). By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one BUDG/CONT resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted one mixed reply. At the cut-off date of this study, the Commission had not yet replied to 20 of Parliament's 37 requests.

### Analysis of the Commission actions

The Commission proposed/promised 10 genuine actions. In five cases, no further specific actions were proposed/promised to be taken by the Commission and in two cases, due to the lack of reply to the Parliament's request, no action was mentioned.

For all 10 actions proposed/promised by the Commission, the implementation of the action is still pending and needs to be followed at a later stage.

#### 4.1.7.1. BUDG/CONT Resolution 1: EP resolution of 7 September 2020 on the creation of guidelines for the application of the general regime of conditionality for the protection of the Union budget

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>The creation of guidelines for the application of the general regime of conditionality for the protection of the Union budget</b>	7/09/2021 <a href="#">T9-0348/2021</a> <a href="#">2021/2071(INI)</a> BUDG/CONT	<a href="#">SP(2021)598</a>	Final reply (SP) received 26 November 2021	Mixed reply			
1)	5. Believes that the Commission has not used the time since the entry into force of the Regulation efficiently; urges the Commission to avoid any further delay in the application of the Regulation and to investigate swiftly and thoroughly any potential breaches of the principles of the rule of law in the Member States that affect or seriously risk affecting the sound financial management of the Union budget or the protection of the financial interests of the Union in a sufficiently direct way; reiterates that the situation in some Member States already warrants immediate action under Article 6(1) of the Regulation by means of a written notification to those Member States and informing Parliament thereof;	The Commission has been duly applying Union law and complying with the requirements of the Regulation since 1 January 2021, the date on which the Regulation became applicable (paragraph 5 <sup>7</sup> ). The Commission agrees with the Parliament that the application of the Regulation is not subject to the adoption of guidelines. Therefore, the Commission is already applying the Regulation, as it is assessing breaches of principles of the rule of law that may be relevant under the Regulation. The Commission will initiate the procedure under the Regulation where it finds that it has reasonable grounds to consider that the conditions of Articles 4 and 6 of the Regulation are fulfilled.				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (application of <a href="#">Regulation 2020/2092</a> on a general regime of conditionality for the protection of the Union budget).	
2)	6. Recalls that the Commission's political guidelines for 2019-2024 stated that 'there can be no compromise when it comes to defending our core values' and that the full Union toolbox would be guaranteed to be used at EU level; recalls that the Commission 'shall be completely independent' and its members 'shall neither seek nor take instructions from any Government' in accordance with Article	No specific reply is provided to this particular point.				Not mentioned.	

<sup>7</sup> All references to paragraphs refer to the Resolution and not the draft guidelines, unless otherwise stated

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	17(3) TEU and Article 245 TFEU; recalls, furthermore, that in accordance with Article 17(8) TEU, the Commission 'shall be responsible to the European Parliament';				
3)	7. Requests that the Commission report to Parliament regularly and proactively at least twice a year on new and ongoing cases under investigation, starting with the first cases as soon as possible;	<p>Consolidated reply points 7-8</p> <p>The Commission fully recognises the importance of the Parliament as a partner throughout the implementation of the Regulation (paragraphs 7 and 8). The Commission consulted the Parliament on the draft guidelines and welcomes the Parliament's contribution to the development of the final version of the guidelines. In the context of potential cases under the Regulation, the Commission will ensure that the European Parliament is kept duly informed. First, the Commission will inform the European Parliament each time it sends a written notification to a Member State, as well as of any appropriate measures the Commission proposes. It will also inform the Parliament of measures adopted or lifted by the Council. Second, the Parliament has the possibility to invite the Commission to a formal structured dialogue once the Commission has sent a written notification to a Member State. The Commission is committed to participate actively in such dialogues. The Commission will also report to the European Parliament on the application and effectiveness of the Regulation as a whole by January 2024.</p>		<p>Ongoing action, as the Commission promises to 'ensure that the European Parliament is kept duly informed'.</p> <p>A report on the application and effectiveness of the Regulation is due in January 2024.</p>	
4)		<p>Consolidated reply points 7-8</p> <p>The Commission fully recognises the importance of the Parliament as a partner throughout the implementation of the Regulation (paragraphs 7 and 8). The Commission consulted the Parliament on the draft guidelines and welcomes the Parliament's contribution to the development of the final version of the guidelines. In the</p>		<p>Ongoing action, as the Commission promises to 'ensure that the European Parliament is kept duly informed'.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	8. [...] calls on the Commission to respond to the scrutiny of the lead committees in a timely manner by providing thorough information;	context of potential cases under the Regulation, the Commission will ensure that the European Parliament is kept duly informed. First, the Commission will inform the European Parliament each time it sends a written notification to a Member State, as well as of any appropriate measures the Commission proposes. It will also inform the Parliament of measures adopted or lifted by the Council. Second, the Parliament has the possibility to invite the Commission to a formal structured dialogue once the Commission has sent a written notification to a Member State. The Commission is committed to participate actively in such dialogues. The Commission will also report to the European Parliament on the application and effectiveness of the Regulation as a whole by January 2024.			
5)	10. Calls on the Commission to clarify in the guidelines that breaches of the rule of law in a Member State which result from decisions or events that took place prior to 1 January 2021 still fall within the scope of the Regulation as long as their effect is still ongoing;	The draft guidelines underline that the Regulation covers both individual and systemic breaches (paragraphs 9 and 10). As the Regulation applies since 1 January 2021, the Commission considers that its application will normally focus on budgetary commitments under the 2021-2027 multiannual financial framework (MFF), and later on future MFFs. Measures may also address earlier commitments, in particular with regard to breaches that are recurring and ongoing. The Commission takes note of the request from the Parliament on this point and will reflect on whether there is any need for clarification on this point in the final version of the guidelines.		According to the Commission <a href="#">website</a> , guidelines will be finalised following the judgements of the European Court of Justice in cases <a href="#">C-156/21</a> and <a href="#">C-157/21</a> .	
6)	11. Draws particular attention to the list of indicative breaches of the principles of the rule of law laid down in Article 3 of the Regulation; urges the Commission to investigate potential occurrences of the breaches included in that list in the Member States, while pointing out that other practices or omissions by public authorities may also be relevant [...]	Furthermore, the draft guidelines clarify that other practices or omissions of public authorities or other legal situations covered by Article 4(1) of the Regulation may be relevant under the Regulation, as well as the list of situations that may be indicative of rule of law breaches in Article 3 of the Regulation (paragraph 11). Consequently, when assessing breaches of the principles		Commission made a commitment, but too little time to assess the action(s) at this stage.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		of the rule of law, the Commission will take into account the list in Article 3 of the Regulation as well as other practices or omissions by public authorities.			
7)	14. [...] calls on the Commission to provide information on how it will collect, analyse and evaluate this information when building cases;	As regards the assessment process (paragraphs 14 and 17), the Commission agrees with the Parliament about the need for a qualitative assessment of potential cases under the Regulation.		No further specific actions proposed/promised to be taken by the Commission.	
8)	15. Considers, in particular, that the Commission's annual rule of law report, as an objective, impartial, fair and qualitative assessment of breaches of the principles of rule of law, is a crucial source of information for the Commission's assessment under the Regulation; calls on the Commission to include in its annual rule of law report a section dedicated to cases where breaches of the rule of law in a Member State could affect or seriously risk affecting the sound financial management of the Union budget or the protection of the financial interests of the Union in a sufficiently direct way and to clarify in the guidelines how the annual report will be used systematically for the Commission's assessment under the Regulation;	Section 5 of the draft guidelines explains how the Commission will carry out its assessment, which needs to be objective, impartial and fair. In this respect, the Commission's annual Rule of Law Report is one of the sources the Commission will use to identify and assess relevant breaches of the principles of the rule of law, in line with recital 16 of the Regulation. This has already been clarified in section 5.2.1 of the draft guidelines (paragraph 15). While the Conditionality Regulation and the Commission's annual Rule of Law Report have different objectives and should remain separate, the findings of the report feed the Commission's assessment under the Regulation, and references to adopted measures under the Regulation may be included in the relevant Country Chapters of the annual Rule of Law Report.		Commission made a promise, but too little time until the cut-off date of this document to assess the action as the publication of the Rule of Law Report 2022 is expected later in 2022.	
9)	16. Calls on the Commission to set out a clear, precise and user-friendly system for the submission of complaints and to set deadlines for the Commission's responses to complaints [...]	The Commission has also prepared a complaint form through which complainants can notify it of alleged breaches of the principles of the rule of law under the Regulation, which is annexed to the draft guidelines (paragraph 16). The form will contribute to making accessible important information that will add to the sources that the Commission has already been screening since 1 January 2021. To facilitate the submission of complaints, the Commission has set up a dedicated mailbox ( <a href="#">Budg-Conditionality-regime-</a>		According to the Commission, guidelines will be finalised following the judgements of the European Court of Justice in cases <a href="#">C-156/21</a> and <a href="#">C-157/21</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p><a href="mailto:complaints@ec.europa.eu">complaints@ec.europa.eu</a>) through which alleged rule of law breaches relevant to the Regulation may be brought to the Commission's attention. The Commission will clarify in the final version of the guidelines that it will ensure that the rules set out in Directive (EU) 2019/1937<sup>8</sup> will be complied with.</p>			
10)	<p>20. Recalls that the Regulation provides a clear definition of the rule of law, which must be understood having regard to other Union values and principles, including fundamental rights and non-discrimination; is of the opinion that persistent violations of democracy and fundamental rights, including state-sponsored discrimination against minorities and attacks against media freedom and freedom of association and assembly, have an impact on the projects Member States decide to fund with Union funds, and may therefore have a sufficiently direct effect on the protection of the financial interests of the Union; calls on the Commission to take this into account in its guidelines;</p>	<p>Consolidated reply for point 20 and 23</p> <p>Systemic breaches or persistent violations of democracy and fundamental rights, provided they qualify as breaches of the principles of the rule of law for the purposes of the Regulation may indeed trigger the application of the Regulation (paragraphs 20 and 23). However, the Regulation requires the Commission to establish that a breach affects or seriously risks affecting the sound financial management of the Union budget or the protection of the financial interests of the Union in a sufficiently direct way. If a sufficiently direct link with the budget cannot be established, the Regulation will not apply. This is the reason why the Commission needs to carefully assess and build up an evidence-based and robust analysis of potential cases, including as regards the link between the identified breach and the effect it may have on the Union budget. Thus, each case will be assessed on its own merits and on the basis of concrete evidence available to the Commission, as a one size fits all approach would not be appropriate. This approach is reflected in the draft guidelines.</p> <p>Moreover, the draft guidelines describe the elements that the Commission will examine when assessing the proportionality of the measures. In that regard, the guidelines state that where breaches are systemic or</p>		<p>According to the Commission, guidelines will be finalised following the judgements of the European Court of Justice in cases <a href="#">C-156/21</a> and <a href="#">C-157/21</a>.</p>	

<sup>8</sup> Directive (EU) 2019/1937 of the European Parliament and of the Council of 23 October 2019 on the protection of persons who report breaches of Union law, OJ L 305, 26.11.2019, p. 17.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		widespread, these factors should be taken into account as regards the proportionality of the measures to be proposed.			
11)	21. [...] calls on the Commission to lay down the modus operandi and the procedural and technical standards it will use to choose the instruments to apply;	The Commission does not consider the Regulation as a "last resort" instrument (paragraphs 21-22) and it will apply it in accordance with the intention of the co-legislators, i.e. where procedures already established under other Union legislation would not allow it to protect the Union budget more effectively. The Commission's objective is to protect the Union budget and the Union's financial interests in the most effective manner and the Regulation is a tool complementing all the other tools the Commission has at its disposal for such protection. In that regard, the Commission has laid down in the draft guidelines indicative criteria that may be used to determine the effectiveness of the protection provided under the Regulation as compared to other existing instruments to protect the financial interests of the Union.		No further specific actions proposed/promised to be taken by the Commission.	
12)	23. [...] calls on the Commission to clarify the criteria for determining measures in the case of systemic breaches;	Consolidated reply for point 20 and 23 Systemic breaches or persistent violations of democracy and fundamental rights, provided they qualify as breaches of the principles of the rule of law for the purposes of the Regulation may indeed trigger the application of the Regulation (paragraphs 20 and 23). However, the Regulation requires the Commission to establish that a breach affects or seriously risks affecting the sound financial management of the Union budget or the protection of the financial interests of the Union in a sufficiently direct way. If a sufficiently direct link with the budget cannot be established, the Regulation will not apply. This is the reason why the Commission needs to carefully assess and build up an evidence-based and robust analysis of potential cases, including as regards		According to the Commission, guidelines will be finalised following the judgements of the European Court of Justice in cases <a href="#">C-156/21</a> and <a href="#">C-157/21</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the link between the identified breach and the effect it may have on the Union budget. Thus, each case will be assessed on its own merits and on the basis of concrete evidence available to the Commission, as a one size fits all approach would not be appropriate. This approach is reflected in the draft guidelines.			
13)	26. Recalls that the Council is bound to act upon any proposal of the Commission to adopt appropriate measures under the Regulation within a period of one month, which may be extended by a maximum of two additional months in exceptional circumstances; considers that the Commission should ensure that these time limits are fully respected for a timely decision; calls on the Commission to provide information on how it will ensure a harmonised approach and consistent application of the budget conditionality across all its Directorates-General;	In the same vein, in accordance with recital 23 of the Regulation, the Commission is committed to make the most appropriate use of its rights under Article 237 TFEU and the Council's Rules of Procedure with a view to ensuring that the Council takes a timely decision on the proposal for measures (paragraph 26). This commitment is reflected as well in the draft guidelines.		No further specific actions proposed/promised to be taken by the Commission.	
14)	27. Believes that transparency is essential to foster the confidence of Member States and citizens in the conditionality mechanism; highlights that the assessment of individual and systemic breaches of the principles of the rule of law requires an impartial, fair and objective treatment of Member States, including non-partisan and evidence-based investigations; points out that each step of the procedure set out in the Regulation should therefore be taken in a fully transparent way; calls on the Commission to draw up the transparency rules and principles that it will apply when triggering the conditionality mechanism;	The Commission agrees with the Parliament on the need to ensure a consistent and transparent approach for the application of the Regulation (paragraphs 26 and 27). The purpose of the guidelines is precisely to bring clarity and predictability in the way the Commission will apply the Regulation.		No further specific actions proposed/promised to be taken by the Commission.	
15)	32. Calls on the Commission to implement Article 5(4) of the Regulation and swiftly set up a website or internet portal with information and guidance for the	The guidelines already include a specific section providing guidance on the rights of beneficiaries and final recipients in case of imposition of measures by the		The Commission has launched a <a href="#">website</a> with a complaint form. However, the website does not yet contain a FAQ document.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	benefit of final recipients or beneficiaries and with adequate tools for them to inform the Commission about any breach of the legal obligation to continue making payments after measures pursuant to this Regulation are adopted, such as a simple, easy-to-use and structured complaint form; calls on the Commission to explain how it will implement an efficient and effective compliant mechanism for applicants, recipients and beneficiaries;	Council (paragraph 32). The Commission refers in that section to a specific portal/ website where citizens, including beneficiaries or final recipients, may seek informal guidance. This portal/ website will also include a complaint form and may be accompanied in due course with a Frequently Asked Questions document. At the same time, recipients and beneficiaries of Union funds may also use the mailbox ( <a href="mailto:Budg-Conditionality-regime-complaints@ec.europa.eu">Budg-Conditionality-regime-complaints@ec.europa.eu</a> ) set up by the Commission to ask questions in relation to their rights.			
16)	34. Calls on the Commission to analyse all information at its disposal, including via digital tracking tools, and to do its utmost to ensure that any amount legitimately due from government entities or Member States is in fact paid to final recipients or beneficiaries, which may entail making financial corrections by reducing Union support to programmes in line with applicable sector-specific and financial rules;	The guidelines also present the way in which the Commission will verify whether payment obligations towards final recipients or beneficiaries set under the Regulation and other applicable Union law have been complied with (paragraph 34). This will be done on the basis of the reporting by the Member States in the context of shared management, but also on any other information at the disposal of the Commission, including through complaints received. Where necessary, it will do its utmost to ensure that any amount due from government entities or Member States is effectively paid to final recipients or beneficiaries in accordance with the relevant sector-specific rules. This may entail, for instance, the application of financial corrections in line with applicable Union law. The Commission may also decide to open infringement proceedings against the Member State concerned to ensure compliance with the Member State's obligation enshrined in Article 5(2) of the Regulation.		According to the Commission, guidelines will be finalised following the judgements of the European Court of Justice in cases <a href="#">C-156/21</a> and <a href="#">C-157/21</a> .	
17)	35. Requests that the Commission include Parliament's suggestions in the final version of the guidelines;	No specific reply is provided to this particular point.		Not mentioned.	

#### 4.1.7.2. BUDG/CONT Resolution 1: EP resolution of 24 November 2021 on revision of the Financial Regulation in view of the entry into force of the 2021-2027 multiannual financial framework

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Revision of the Financial Regulation in view of the entry into force of the 2021-2027 multiannual financial framework</b>	24/11/2021 <a href="#">T9-0469/2021</a> <a href="#">2021/2162(INI)</a> <b>BUDG CONT</b>	N.A. <sup>9</sup>					
1)	14. Calls on the Commission to simplify further annual accounts and other financial reporting obligations applicable to the general budget of the Union in the context of the Financial Regulation in order to encourage the participation of SMEs in relevant programmes included in the MFF 2021-2027 package, including NGEU;						
2)	16. [...] recalls that, upon the adoption of the Conditionality Regulation, Parliament, the Council and the Commission agreed to consider including the content of the Conditionality Regulation in the Financial Regulation upon its next revision; calls on the Commission therefore to make that proposal; calls on the Commission to examine opportunities to further improve the alignment of all EU instruments that aim to ensure sound financial management and the protection of the Union's financial interests, including the Commission's annual rule of law report; believes that the Commission should pay particular attention to preventive ex-ante measures to ensure that						

<sup>9</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Member States apply Article 63(2) of the Financial Regulation;				
3)	17. Believes that the Commission should ensure that the Union budget is spent on projects or organisations that respect the Union values laid down in Article 2 of the Treaty on European Union in order to protect the Union's financial interests; calls on the Commission, to that end, to develop concise indicators to be included in the Financial Regulation, which should be applied through a risk-based approach and used for targeted ex ante and ex post controls to detect potential non-compliance with Union values in the use of EU funds;				
4)	18. Welcomes the Commission's guidance on the avoidance and management of conflicts of interest under the Financial Regulation, which aims to raise awareness and promote a uniform interpretation and application of conflict of interest rules; regrets, however, that conflict-of-interest issues continue to persist at the highest level in some Member States; calls on the Commission to evaluate whether the relevant provisions of the Financial Regulation are sufficiently effective in preventing and addressing conflicts of interest in the implementation and control of the EU budget;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	20. Emphasises that the Financial Regulation should include provisions that require the responsible actors to gather and keep uniform records on economic operators and beneficial owners in order to allow their identification across EU programmes, regardless of who implements these programmes and of management mode (direct, indirect or shared); calls on the Commission to take measures to ensure that this is done through digital, interoperable, standardised collection of information on the recipients of Union funding, including those ultimately benefitting, directly or indirectly, from Union funding, and their beneficial owners; considers that these requirements should reflect all relevant information items to enhance the Commission's ability and capacity to detect fraud; emphasises the need to remove any technical and legal barriers to the collection of data on company structures and beneficial ownership;				
6)	22. [...] urges the Member States and the Commission to guarantee increased interoperability between existing EU and national databases and data-mining tools to facilitate risk analysis and fraud detection;				
7)	24. Recalls that a high-level panel was established in 2018 to assess cases in the database that are submitted for early detection or exclusion; calls for the opinion of the EDES panel, in the light of its experiences with the system, to be considered in the revision of the Financial Regulation and shared with Parliament at the same time as it is with the Commission; notes that EDES is currently only used under direct and indirect management; considers that economic operators that are considered a risk				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>to EU financial interests under direct and indirect management should also be considered a risk under shared management and vice versa; calls, therefore, for the use of EDES to be made compulsory under shared management; further notes that EDES does not distinguish between subsidiaries of larger corporations; calls on the Commission to make this distinction and to specify in the rules for early detection and for exclusion which entity of a multinational or multi-company corporation is registered for early detection or exclusion; calls for an obligation to update EDES once fraud or other relevant facts have been established by actors involved in the implementation; believes that excluded legal entities or natural persons (beneficial owners) should, for the duration of their exclusion, no longer have the ability to be a final recipient or beneficiary to whom any payments from the EU budget can be made;</p> <p>calls on the Commission to encourage the Member States to ensure that these entities or natural persons are also excluded from any contributions from national budgets for the period of exclusion; regrets that the database lists relatively few economic operators; views this as a sign that EDES has not been properly implemented; highlights that the EDES panel handled 20 cases in 2020, with 28 cases in the pipeline; stresses the importance of allocating sufficient resources to the panel in line with any extension of responsibility;</p> <p>calls on the Commission, moreover, to review the criteria to decrease the complexity and increase the applicability of EDES in practice;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	<p>25. Stresses that, while it is of the utmost importance to know who the final beneficiaries of EU funds are in order to ensure their proper use, the accessibility and simplicity of digital tendering platforms for EU funds also plays an important role; recalls that the Commission has adopted the concept of 'digital by design' and the 'Think Small First' principle in order to ensure sufficient SME participation;</p> <p>encourages the Commission, in this sense, to also take these principles into account when revising the Financial Regulation in the context of implementing the MFF 2021-2027 package;</p>				
9)	<p>26. Regrets the fact that only 21,7 % of EU programmes had gender-related indicators under the previous MFF; insists that gender mainstreaming be better reflected in the drafting and implementation of the budget, including through targeted incentives; calls for the systematic and comprehensive collection of gender-disaggregated data in the context of all EU policies and programmes in order to measure the impact on gender equality;</p> <p>expects the Commission to develop a methodology to measure the relevant expenditure at programme level in the 2021-2027 MFF, in line with the IIA;</p> <p>calls on the Commission to integrate gender mainstreaming and gender budgeting in the relevant provisions of the Financial Regulation;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	<p>27. Reiterates the Union’s commitment to spending at least 30 % of resources available under the 2021-2027 MFF and NGEU on addressing the climate challenge, as set out in the IIA; expects the Commission to develop a robust and clear methodology for tracking climate spending and its performance, and to consistently apply it across all policy areas; emphasises that the rules on budget implementation must reflect this methodology to allow for the effective and efficient tracking of funds used in tackling climate change on both the climate mitigation and adaptation fronts;</p> <p>calls on the Commission to integrate appropriate references to climate mainstreaming and tracking in the relevant provisions of the Financial Regulation in line with the IIA to ensure that the Union budget is climate-proof;</p>				
11)	<p>33. Calls on the Commission to ensure that Union trust funds deliver clear visibility for the Union and appeals to it to raise awareness of trust fund results and achievements by reinforcing provisions on effective communication with citizens and stronger relationships between communication activities, as is the case with the European Structural and Investment funds;</p>				
12)	<p>35. Notes that the current definition of ‘professional conflict of interest’ is limited to a conflicting interest that affects the capacity of an economic operator to perform a contract; calls on the Commission to provide for a more explicit definition and to ensure that its implementation rules on public procurement do not permit the awarding of policy-related service contracts to undertakings that are</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	under the economic control of a parent company or a group that owns shares related to activities that are not in line with the EU's environmental, social and Green Deal objectives;				
13)	<p>36. Asks the Commission to amend Article 167(1)(c) of the Financial Regulation to include a definition of 'professional conflicting interest' so as to ensure that EU institutions can take mitigating measures in case of bidders with a financial interest in a policy-related service contract, taking into account the European Ombudsman's decision in joint inquiry 853/2020/KR on the Commission's decision to award a contract to BlackRock Investment Management to carry out a study on integrating environmental, social and governance objectives into EU banking rules; reiterates that the general conditions of the Commission's public procurement contracts for services contain standard provisions on professional conflicting interests with requirements for contractors to proactively disclose any situations that could constitute a conflict of interest;</p> <p>calls on the Commission to update and strengthen the Financial Regulation in order to address professional conflicting interests and to further increase the accuracy and completeness of the voluntary notification thereof by applicants submitting tenders, such as developing adequate sanctions if voluntarily notifications are not complied with, including a temporary ban from public tendering in case of severe breaches;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	<p>37. Considers that all EU institutions engaging in public procurement should publish clear rules on their websites regarding acquisition, expenditure and monitoring, and should publish all contracts awarded with the fullest possible transparency; notes the guidance provided by the Commission on using the public procurement framework in the emergency situation related to the COVID-19 crisis; encourages the Commission to gather and evaluate the experience of contracting authorities with the public procurement framework in this regard, especially its effect on SMEs, and to reflect the lessons learned in the Financial Regulation, by identifying criteria for defining exceptional/unusual circumstances in which temporary/framed/necessary flexibility in the implementation of public procurement rules can be applied;</p>				
15)	<p>38. Notes that the upcoming revision of the Financial Regulation should take into account the autonomous strategic interests of the EU, including fair competition, and the need to stimulate EU job creation in a range of industries that are key to achieving the Union's future policy objectives, while ensuring a level playing field for fair competition; calls on the Commission to ensure that ambitious awarding criteria are set, particularly taking into account the Union added value of projects and the principle of the 'most economically advantageous tender'; calls for including safeguards in public procurement rules to evaluate the activities of companies that contradict the social and environmental objectives of the Union in the award decision;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	42. Criticises the length of the audit and control procedures in shared management, including the length of the ensuing contradictory procedures, as provided for by sectoral legislation; underlines that lengthy procedures increase the risk of leaks of confidential documents; considers it intolerable that the Commission insists that Parliament be subject to confidentiality requirements with regard to the audit and contradictory procedure even in cases of legitimate public interest involving public figures; expects the Commission to strengthen and shorten the length of audit and control procedures in shared management in line with the timeline applicable under the Conditionality Regulation;				
17)	44. Considers it regrettable that audit and contradictory procedures and procedures on the application of financial correction currently last several years; urges the Commission to revise the rules on audit and financial correction procedures to allow for more timely conclusions and a faster recovery of EU funds paid out unduly;				
18)	47. Notes that Article 262 of the Financial Regulation requires that the Union institutions and bodies referred to in Articles 70 and 71 of the Financial Regulation report on the measures taken in response to the decision on discharge; considers that this requirement would benefit from the setting of a reasonable deadline for reporting on the measures taken; calls on the Commission to include 30 September of the year following the year under review in the discharge procedure as the deadline in Article 262 of the Financial Regulation;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	50. Encourages the Commission and the Member States to exploit the opportunities for simplified cost options to their full potential [...]

Considers that derogations should remain possible from the rule that expenditures from the European Agricultural Guarantee Fund must be entered into the accounts for a financial year on the basis of the repayments made by the Commission to Member States by 31 December of that year; calls on the Commission to consider adapting the Financial Regulation to ensure that the financial rules applicable to the European Agricultural Fund for Rural Development continue to apply once the necessary changes have been made even if the fund is no longer fully under the Common Provisions Regulation 10;				

<sup>10</sup> OJL 231, 30.6.2021, p. 159.

#### 4.1.8. BUDG/ECON

Between July 2019 and December 2021, **the Joint Committees - the Committee on Budgets (BUDG) and the Committee on Economic and Monetary Affairs (ECON)** were responsible for one 'ordinary' own-initiative report (INI) and no legislative own-initiative reports (INL) leading to the adoption of a one Parliament's resolution ('BUDG/ECON resolution'). The table below provides a summary of the analysis based on the data contained in the resolution as well as the Commission written follow-up document. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one written, specific reply to the Parliament's BUDG/ECON resolution, after the 3-month period prescribed by the Framework Agreement (point 16).

### Analysis of the Commission actions

The Commission proposed/promised eight genuine actions. In 13 cases, no further specific actions were proposed/promised to be taken by the Commission and in three cases it remained unclear if an action was carried out. In four cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the eight actions proposed/promised by the Commission, the Commission already carried out the action in seven cases. In the remaining case, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.8.1. BUDG/ECON Resolution 1: EP resolution of 13 November 2020 on sustainable Europe Investment Plan - How to finance the Green Deal

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Sustainable Europe Investment Plan - How to finance the Green Deal</b>	13/11/2020 <a href="#">T9-0305/2020</a> <a href="#">2020/2058(INI)</a> BUDG ECON	<a href="#">SP(2021)32</a>	Final reply (SP) received 22 March 2021	Specific reply			
1)	5. [...] calls on the Commission, therefore, to encourage public and private investments when developing the SEIP;	<p>The Commission will mobilise public and private investments through funding during the next MFF period improving existing and providing new frameworks, as well as providing technical support in executing sustainable projects on the ground. The InvestEU programme will attract public and private investments through the use of a budgetary guarantee. The Commission will enhance its sustainable financing regulatory framework with a renewed sustainable finance strategy and will develop work on greening national budgeting at the EU level. Finally, the Technical Support Instrument and the InvestEU Advisory Hub will help project promoters, financial institutions and administrations to fully integrate the sustainable dimension in their assessment and reporting systems.</p> <p>Communication and awareness are key for the mobilisation of investments. The Commission will hold an annual Sustainable Investment Summit, involving relevant stakeholders in the public private sectors, within the EU and with international partners. The Summit will play a key role in exchanging best practice, identifying new avenues of finance and obtaining buy-in from stakeholders. It will also provide a forum for raising awareness of the opportunities and transformation of practices, happening in Europe. The first Summit is planned for 2021.</p> <p>The Commission is working on improving the quality of the performance frameworks of the spending programmes of the</p>				<p>A <a href="#">regulation</a> establishing the <a href="#">InvestEU programme</a> was adopted on 24 March 2021.</p> <p>On 6 July 2021, the Commission adopted a <a href="#">renewed sustainable finance strategy</a>.</p> <p>A <a href="#">technical support instrument</a> entered into force on 19 February 2021.</p> <p>A first <a href="#">sustainable investment summit</a> took place on 7 October 2021.</p>	
No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (Quality of							

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	[...] underlines the fact that, even with ambitious funding, available funds will not be unlimited; considers it essential for the SEIP to provide for and enable additional investment with real added value and that does not crowd out market financing; calls on the Commission to establish a robust framework for reporting and monitoring to ensure that spending has a real impact; insists that the link between expenditure and revenue, particularly through the creation of new own resources, will be key to the implementation of the Green Deal;	MFF 2021-2027 and harmonising a coherent and consistent performance framework of the Union budget.  The performance framework of MFF programmes builds on existing reports, indicators and evaluations. For the MFF 2021-2027, the new definition of “core performance indicators” is an important step for the performance framework of the spending programmes. Core performance indicators are the indicators listed in the relevant annexes of all basic acts. They will be used for annual reporting on progress of implementation. However, these indicators constitute only a small part of the performance information needed. The possibility of enriching the performance framework through delegated acts for additional indicators will provide the opportunity under the MFF 2021-2027 to enrich annual reporting and to ensure a global overview of the performance of the programmes with respect to the targets of the interventions, to the objectives of the programmes and to EU policy objectives and priorities.		performance frameworks of spending programmes in the MFF 2021-2027).	
2)	8. Calls on the Commission and Member States to make sure that the SEIP is adequately financed to ensure that future programmes, such as the Renovation Wave Strategy, will have a sufficient impact on every building in the EU, are made acceptable to all Union citizens, and are welcomed by them;	No specific reply is provided for this particular point.		Not mentioned.	
3)	9. Questions whether the SEIP, in its current form, will enable the mobilisation of EUR 1 trillion by 2030, given the negative economic outlook following the COVID-19 pandemic; requests the Commission ensures full transparency on financing issues, such as the optimistic leverage effect, potential double-counting of certain investments, or the lack of clarity over the extrapolations of certain	The figures put forward in the SEIP communication built on conservative assumptions and overlaps were carefully identified and eliminated.  However, as the European Parliament’s resolution rightly points out, between January 2020 and today, the economic outlook of the European economy has changed. The COVID-19 pandemic and necessary lockdown measures have resulted in the worst economic shock since the Great Depression, with devastating consequences for millions of European citizens and businesses.		No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (a <a href="#">taxonomy regulation</a> was adopted on 18 June 2020; the Commission adopted a <a href="#">renewed sustainable finance strategy</a> on 6 July 2021).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>amounts; (...) calls on the Commission and Member States to come forward with plans that explain how they will bridge the considerable investment gap by means of both private and public investments, including an assessment of the new economic outlook resulting from the current crisis and the expected increased ambition of the climate, energy and environmental goals for 2030;</p>	<p>The recently published European Economic Forecast (5 November) shows that EU GDP is likely to contract by about 7.5% this year, before growing 4.1% in 2021 and by 3% in 2022.</p> <p>To repair and recover swiftly from the crisis, the Commission proposed an unprecedented recovery package with the twin green and digital transitions at its heart.</p> <p>As set out in point A21 of the conclusions of the European Council meeting of 21 of July 2020, and as results from the outcome of MFF trilateral negotiations between the co-legislators of 10 November 2020, the stepped-up target for climate expenditures under the MFF and NewGenerationEurope (NGEU) is 30% of the agreed total of EUR1.8 trillion. This translates in more than EUR 600 billion of direct expenditures from the next EU multiannual framework for climate relevant projects, including NGEU. The new estimates for climate financing stemming from the approved MFF and the recovery package NGEU will be updated and published.</p> <p>Public investments are vital to recover from this crisis. In parallel, efforts should focus on restoring confidence in financial market and encouraging private investments. Private sector investments are essential to reach the EU's climate and broader environmental policy goals. In this respect, InvestEU will be an important instrument to increase private investments and help raise additional finance. The strong green focus of this programme will ensure that investments into green projects are at the core of the recovery. As a separate initiative, the EU Taxonomy will help channel private capital into sustainable investments (i.e. environmentally sustainable economic activities) through the financial sector. The EU Taxonomy is science-based and indicates those investments that are aligned with, and help achieve, the EU climate and environmental objectives. The renewed sustainable finance strategy will also</p>

		help channel further investments into green economic activities through the financial sector.			
4)	10. [...] calls on the Commission to reflect these new figures in a revised SEIP architecture;	The estimate referred to of EUR 662 billion in investment needs covers multiple objectives, not just the 2030 climate objectives. The Communication on the 2030 Climate Target Plan provides updates related to investment needs for achieving the increased climate and energy ambition of a reduction of 55% instead of 40% CO2 emissions compared to their 1990 level. It estimates that the EU will need to invest annually EUR 350 billion more in the period 2021-2030 than in the period 2011-2020, of which around EUR 90 billion are results from increased ambition on the current 2030 climate and energy targets.		No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (communication - <a href="#">2030 Climate Target Plan</a> dated 17 September 2020).	
5)	11. Calls on the Commission to disclose the exposure of all MFF and Next Generation EU funds to the different EU taxonomy objectives and categories;	No specific reply is provided for this particular point.		Not mentioned.	
6)	15. [...] the Commission must adopt by the end of 2020 a delegated act containing technical screening criteria for activities which substantially contribute to climate change;	No specific reply is provided for this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	16. Calls on the Commission to ensure that the new MFF does not support or invest in activities which would lead to a lock-in of assets that are harmful to the climate and environmental objectives of the Union, considering the lifetime of the assets;	Private sector investments are essential to reach the EU's climate and broader environmental policy goals. In this respect, InvestEU will be an important instrument to increase private investments and help raise additional finance. The strong green focus of this programme will ensure that investments into green projects are at the core of the recovery. As a separate initiative, the EU Taxonomy will help channel private capital into sustainable investments (i.e. environmentally sustainable economic activities) through the financial sector. The EU Taxonomy is science-based and indicates those investments that are aligned with, and help achieve, the EU climate and environmental objectives. The renewed sustainable finance strategy will also help channel further investments into green economic activities through the financial sector		<p>No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (<a href="#">InvestEU programme</a>).</p> <p>On 6 July 2021, the Commission adopted a <a href="#">renewed sustainable finance strategy</a>. A <a href="#">technical support instrument</a> entered into force on 19 February 2021.</p>	
8)	17. Calls on the Commission to assess options to extend the use of the EU taxonomy for tracking climate and environment spending in all EU public funding, including the new MFF, InvestEU, the Next Generation EU instrument, the Solvency Support Instrument, the Recovery and Resilience Facility and European Investment Bank (EIB) funds;	<p>As mentioned in the Communication on the SEIP, the Commission will enhance the tracking system for monitoring progress towards the envisaged targets. The Commission, in particular, will ensure that appropriate and updated methodologies are in place to track climate and environment spending in all EU public funding in line with the use of the EU Taxonomy as appropriate.</p> <p>For instance, in the framework of the Recovery and Resilience Facility (RRF) Regulation pending adoption by the co-legislators, a methodology was designed for calculating the contribution of both reforms and investments to the 37% climate mainstreaming target. This methodology, set out in Annex IIA of the RRF Regulation, on the calculation of the coefficient for support to the climate change and environmental objectives, was developed by the Commission based on the Common Provision Regulation (CPR). It also introduced targeted amendments to the CPR methodology to better align the Rio markers system with some of the elements of the EU Taxonomy, while taking into account the specificities of the RRF as a public</p>		<p>No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (<a href="#">Recovery and Resilience Facility Regulation</a>, <a href="#">Common Provision Regulation</a>). The <a href="#">Recovery and Resilience Facility</a> entered into force on 19 February 2021. The <a href="#">Common Provisions Regulation</a> was adopted on 24 June 2021.</p>

		expenditure programme. The additions are therefore strictly limited to the level of information realistically available to the Member States and the Commission when the Recovery and Resilience plans are submitted. Since the CPR regulation has not yet been adopted, the Commission is committed to ensure full consistency between the climate tracking methodologies used in the RRF and the CPR.			
9)	19. Calls on the Commission to assess and identify activities that significantly harm environmental sustainability, in line with Article 26(2)(a) of Regulation (EU) 2020/852 and as recommended by the European Central Bank and the central banks' and regulators' Network for Greening the Financial System (NFGS);	No specific reply is provided for this particular point.		Not mentioned.	
10)	20. [...] calls on the Commission and Member States to prepare strategies to phase out all environmentally harmful subsidies in order to improve the consistency and credibility of the EU in preserving biodiversity and natural ecosystems, and to boost the transition towards clean energy systems and a climate neutral and circular economy;	<p>As laid down in the Communication on the European Green Deal, all EU actions and policies should pull together to help the EU achieve a successful and just transition towards a sustainable future and live up to a green oath to 'do no harm'. National budgets also play a key role in the transition. A greater use of green budgeting tools will help redirect public investment, consumption and taxation to green priorities and away from harmful subsidies.</p> <p>The MFF and its allocation for climate action, together with the recovery instrument NextGenerationEU, will remain the bedrock of our green transition and our economic recovery. The agreement reached on the MFF on 10 November 2020 between the European Parliament, the Council and the Commission stresses that EU expenditure should be consistent with the Paris Agreement objectives and the 'do no harm' principle of the European Green Deal. The Commission is working to improve how its better regulation guidelines and supporting tools address sustainability and innovation issues. Specific</p>		<p>No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (<a href="#">European Green Deal</a>, proposal on a <a href="#">revision of TEN-E</a> dated 15 December 2020).</p> <p><a href="#">Trans-European energy infrastructure – revision of guidelines</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>instruments like TEN-E and CEF are key to speed up investment in energy infrastructure to make our energy system carbon neutral. The Commission proposal of 15 December for the revision of TEN-E will pave the way to secure sustainable and future proof investments in energy infrastructures.</p> <p>In addition, well-designed tax reforms can boost economic growth and resilience to climate shocks and help contribute to a fairer society and to a just transition. They play a direct role by sending the right price signals and providing the right incentives for sustainable behaviour by producers, users and consumers. At national level, the European Green Deal will create the context for broad-based tax reforms, removing subsidies for fossil fuels, shifting the tax burden from labour to pollution, and taking into account social considerations.</p>			
11)	23. [...] calls on the Commission and Member States to deliver on their political commitments, and equip the Union with a future-oriented MFF that is capable of responding to citizens' expectations;	[...] The package of a total of EUR 1.8 trillion will help rebuild a post-COVID-19 Europe, which will be greener, more digital, more resilient and better fit for current and future challenges.		No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives ( <a href="#">recovery plan for Europe</a> ).	
12)	26. [...] urges the Commission to establish a meaningful and transparent tracking and monitoring framework for climate-related expenditure in the EU budget;	<p>As mentioned in the Communication on the SEIP, the Commission will enhance the tracking system for monitoring progress towards the envisaged targets. The Commission, in particular, will ensure that appropriate and updated methodologies are in place to track climate and environment spending in all EU public funding in line with the use of the EU Taxonomy as appropriate.</p> <p>For instance, in the framework of the Recovery and Resilience Facility (RRF) Regulation pending adoption by the co-legislators, a methodology was designed for calculating the contribution of both reforms and investments to the 37% climate mainstreaming target. 		<p>the RRF Regulation, on the calculation of the coefficient for support to the climate change and environmental objectives, was developed by the Commission based on the Common Provision Regulation (CPR). It also introduced targeted amendments to the CPR methodology to better align the Rio markers system with some of the elements of the EU Taxonomy, while taking into account the specificities of the RRF as a public expenditure programme. The additions are therefore strictly limited to the level of information realistically available to the Member States and the Commission when the Recovery and Resilience plans are submitted. Since the CPR regulation has not yet been adopted, the Commission is committed to ensure full consistency between the climate tracking methodologies used in the RRF and the CPR.</p>			
13)	<p>36. [...] urges the Commission to keep the budgetary authority properly informed of the Funds' implementation;</p>	<p>The Innovation Fund revenues are treated as external assigned revenue. Implementation of the Innovation Fund will thus follow the rules of the implementation of the Union's budget. The budgetary authority will be involved in accordance with the respective rules applicable for external assigned revenue in the annual budget.</p> <p>The Modernisation Fund revenues are outside the EU Budget and beneficiary Member States are responsible for its implementation. However, the Commission will regularly publish the Modernisation Fund disbursement decisions, and will make public the annual Member States reports as regards the implementation of the Modernisation Fund.</p>		<p>No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (<a href="#">innovation fund</a>, <a href="#">modernisation fund</a>).</p> <p>The Commission <a href="#">publishes</a> disbursement decisions on the modernisation fund and on Member States' reports on the implementation of the fund.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	42. [...] calls on the Commission to provide details about the own resources presented in its Communication of 27 May 2020 on the Recovery Plan as soon as possible, including on the levy based on the operations of large enterprises and the possible extension of the ETS to the maritime and aviation sectors;	<p>The Commission will put forward proposals on a carbon border adjustment mechanism and a digital levy as well as an accompanying proposal to introduce new own resources by June 2021 with a view to their introduction at the latest by 1 January 2023.</p> <p>The Commission will review the EU Emissions Trading System (EU ETS) in spring 2021, including the possible extension of auctioning to aviation as well as the possible extension of the EU ETS to maritime transport. It will propose an own resource based on the Emissions Trading System by June 2021.</p> <p>The Commission will propose additional new own resources, which could include a Financial Transaction Tax and a financial contribution linked to the corporate sector or a new common corporate tax base by June 2024.</p>		On <a href="#">22 December 2021</a> , the Commission adopted proposals to create three new own resources for the EU budget. These are based on revenues from the EU ETS, on resources generated by the EU Carbon Border Adjustment Mechanism and on the share of residual profits of multinationals that will be reallocated to EU Member States under the OECD/G20 agreement on the reallocation of taxing rights.	
15)	58. [...] calls on the Commission to cooperate with the Member States in developing sustainable urban mobility plans and policies, including support for efficient public transport systems and active mobility solutions, such as walking and cycling, and the promotion of accessibility and multimodality among different modes of transport;	<p>The urban dimension is key for the European Green Deal objective of a carbon-neutral continent by 2050 as well as the affordability and accessibility of transport for all groups in our society. The Commission intends to promote the greening of all modes, multi-modality and a shift to more active modes and public transport through a series of “flagship initiatives included in the Sustainable and Smart Mobility Strategy adopted by the Commission on 9 December (COM(2020)789 final).</p> <p>The results of the evaluation of the 2013 Urban Mobility Package will be published early 2021. Despite some progress achieved, congestion, poor air quality, CO2 emissions and road accidents still persist. There are also new challenges to consider, in particular accelerating climate and environmental crises, poor connectivity of peri-urban and rural areas, new mobility services enabled by digitalisation, and the impact of COVID-19. More efforts will be needed to better involve Member States in e.g. collecting urban mobility data and supporting cities in making local mobility more sustainable much quicker than is currently</p>		No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives ( <a href="#">mobility strategy</a> ). An <a href="#">evaluation of the urban mobility package</a> was published on 24 February 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the case, as well as to strengthen the sustainable urban mobility planning framework (SUMP). The results of the evaluation are, overall, in line with the recommendations of the special report from Court of Auditors on EU urban mobility policy and funding.			
16)	60. [...] calls on the Commission to submit a legislative proposal for a European single access point for financial and non-financial information on listed and unlisted EU companies, while also respecting the proportionality principle where appropriate; calls on the Commission to streamline the transparency requirements under the NFRD and bring them into line with those under the Taxonomy Regulation and the Sustainable Finance Disclosure Regulation; calls for transparent methodologies in the gathering and publishing of data; calls on the Commission to put in place effective data monitoring and reporting of the SEIP's implementation, making it available to the public so as to guarantee full transparency for EU green transition spending;	<p>In the Action Plan on the Capital Markets Union, the Commission committed to put forward a proposal for a European Single Access Point, covering both financial and non-financial information. In its forthcoming proposal to revise the Non-Financial Reporting Directive, the Commission will aim to achieve as much alignment as possible with the Taxonomy Regulation and the Sustainable Finance Disclosure Regulation. One option is to develop European non-financial reporting standards. Executive Vice-President Valdis Dombrovskis issued a request for technical advice mandating the European Financial Reporting Advisory Group (EFRAG) to undertake preparatory work for possible EU Non-Financial Reporting Standards in a revised Non-Financial Reporting Directive.</p> <p>As regards communication on progress made towards the SEIP's commitments, the Commission in its communication on the SEIP, committed to holding an Annual Sustainable Investment Summit involving all relevant stakeholders. This Sustainable Investment Summit will provide a forum to take stock of progress made on the SEIP's implementation, report on results and discuss relevant issues with stakeholders.</p> <p>In the framework of the Annual Budget procedure, the Commission will publish the amounts of the EU budget dedicated to Climate and Biodiversity in the previous years and the updated estimates for the upcoming years of the MFF.</p>		<p>On 25 November 2021, the Commission adopted a proposal for a <a href="#">European single access point</a>.</p> <p>On 21 April 2021, the Commission adopted a proposal for a <a href="#">corporate sustainability reporting directive</a>, which would amend the existing reporting requirements of the NFRD, including a requirement to report according to mandatory EU sustainability reporting standards.</p> <p>A first <a href="#">sustainable investment summit</a> took place on 7 October 2021.</p>	
17)	62. [...] calls on the Commission to propose the measures needed to incentivise sustainable retail investment;	The Commission agrees and will propose new measures incentivising sustainable retail investment in the upcoming renewed sustainable finance strategy due in 2021. In parallel, relevant actions in line with the 2018 Sustainable Finance Action Plan are being finalised. In particular, the development of EU		On 6 July 2021, the Commission adopted a <a href="#">renewed sustainable finance strategy</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Ecolabel criteria for financial services linked to certain retail financial products is currently ongoing and the Joint Research Centre (JRC) is in the process of reviewing feedbacks received by stakeholders via the public consultation, on the Third Technical Report and the draft EU Ecolabel criteria. The Commission plans to have the EU Ecolabel criteria for financial services linked to certain retail financial products adopted by end-2021. A future extension to further retail financial products is envisaged.		Information on ongoing work on EU ecolabel criteria for financial services is available on the website of the <a href="#">Commission's Joint Research Centre</a> .	
18)	64. Endorses the call by the High Level Expert Group on Sustainable Finance for new measures to foster long-termism, which benefits people and the planet; invites the Commission to analyse and propose how a long-term perspective can be better incorporated in the corporate governance regime and rules; welcomes the preparation of a sustainable corporate governance initiative;	The Commission agrees on the importance of promoting long-termism and will propose new actions to promote long termism in the renewed sustainable finance strategy.  The Commission is also preparing a sustainable corporate governance initiative proposal by Q2 2021, which aims to promote long-termism in the corporate sector as well as ensure that sustainability risks and impacts are identified and mitigated in companies operations and supply chains.		On 6 July 2021, the Commission adopted a <a href="#">renewed sustainable finance strategy</a> .  On 21 April 2021, the Commission adopted a <a href="#">proposal</a> for a corporate sustainability reporting directive.	
19)	65. Calls on the Commission to consider a revision of the NFRD, which could incorporate the disclosure of the impact of corporate activities on environmental, social and governance sustainability;	The Commission intends to put forward a proposal to revise the Non-Financial Reporting Directive in the first quarter of 2021. The proposal will address both the risks that sustainability issues can create for companies, as well as the impacts of companies on society and the environment.		On 21 April 2021, the Commission adopted a <a href="#">proposal</a> for a corporate sustainability reporting directive which would amend the existing reporting requirements of the NFRD.	
20)	67. [...] calls on the Commission, therefore, to examine ways of improving the inclusion of sustainability risks and the prudential treatment of long-term investments and lending, including in the EU Banking Rule Book, which will additionally promote overall financial systemic stability, and to further seek to promote reliability, comparability and transparency of sustainability factors in credit ratings;	The Commission agrees on the importance of improving the inclusion of sustainability risks in the prudential framework and the need for further measures to promote reliability, comparability and transparency of sustainability factors in credit ratings. The Commission is assessing potential additional measures in these areas in the renewed sustainable finance strategy.		The general nature of the commitment's wording makes it unclear to what extent it has been/will be carried out.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	70. [...] encourages the Commission to map best practices on green budgeting;		A greater use of green budgeting tools will help redirect public investment, consumption and taxation to green priorities and away from harmful subsidies.		The general nature of the commitment's wording makes it unclear to what extent it has been/will be carried out.	
22)	73. [...] calls on the Commission to provide technical assistance to public authorities in drafting transition plans so as to avoid stranded assets; calls on the Commission to monitor the implementation of the recovery and resilience plans, and to ensure that serious breaches lead to the recovery of allocations paid;		<p>Over the last three years, the Commission has substantially expanded its support to green and sustainable projects, both in terms of the number of projects and the amount of financing. The Commission has supported over 160 projects linked to reforms to achieve the European Green Deal priorities, amounting to over EUR 50 million. During the last cycle of the Structural Reform Support Programme (SRSP) about one in four projects contributes to the Green Deal goals. The Commission will continue helping Member States design and implement growth-enhancing reforms while through the new Technical Support Instrument (TSI), including by supporting the implementation of the Sustainable Europe Investment Plan.</p> <p>The Commission is playing a key role in helping Member States unlock the funds under the Just Transition Mechanism. In February 2020, the Commission launched a dedicated call to support Member States with the preparation of territorial just transition plans. Eighteen Member States requested such support and the Commission approved all requests, which amounted to a budget of EUR 5.7 million. The technical support is currently ongoing. All relevant Commission services are closely involved in the process to ensure consistency in the approach to the technical support provided.</p> <p>About the Recovery and Resilience Facility, the agreement reached by co-legislators foresees that Member-States' recovery and resilience plans may include contributions to the Technical Support Instrument as a means to foster synergies and facilitate implementation.</p> <p>The main task of the Commission will be to assess Member States' National Recovery and Resilience Plans (RRPs) in light of</p>		<p>No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives.</p> <p>A <a href="#">technical support instrument</a> entered into force 19 February 2021.</p> <p>An <a href="#">assessment of national recovery and resilience plans</a> and their implementation is ongoing.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the requirements of the RRF Regulation and to closely monitor and assess the implementation of the plans. This involves, in particular, the fulfilment of agreed milestones and targets establishing progress in the implementation of reforms and investments.</p> <p>Since the Facility is based on performance funding, the fulfilment of the agreed milestones and targets will be the condition for the disbursement of RRF funds. The political agreement on the RRF Regulation, pending its adoption by co-legislators, foresees the possibility for the Commission of recovering the allocations paid in case of serious irregularities.</p>			
23)	<p>77. Calls on the Commission to revise the rules on State aid, including the Temporary Framework introduced as a response to the COVID-19 pandemic, as needed in order to obtain greater public support for the European Green Deal and ensure that State aid support is conditional on meeting the Union's climate and environmental objectives; notes that any revision of State aid rules should be carefully designed to prevent distortions of competition in the internal market, and ensure its integrity and a level playing field in any future revision;</p>	<p>The temporary framework is an exceptional framework based mostly on Article 107(3)(b), with the main aim to provide liquidity and solvency support. It is thus not an appropriate instrument to pursue those objectives. The revision of the main State aid instruments<sup>6</sup> is ongoing and will duly consider the twin transition objectives.</p>		<p>A review of rules on State aid has been postponed to 2022, as announced in the <a href="#">Commission Work Programme for 2022</a>.</p> <p>A <a href="#">revision of the communication on important projects of common European interest</a> was adopted on 25 November 2021.</p>	

<sup>6</sup> The regional aid guidelines, framework for State aid for research, development and innovation, Environmental and Energy State Aid guidelines, Communication on Important Projects of Common European Interest, Risk Finance guidelines and the targeted amendment of the General Block Exemption Regulation

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	78. Calls on the Commission, when approving a State aid request by a Member State in accordance with Article 108 TFEU, to include in its decision provisions requiring beneficiaries in carbon-intensive sectors to adopt climate targets and green transition roadmaps, and demonstrate the alignment of their business model and activities with the objectives set out in Chapter 2 of Regulation (EU) 2018/1999;		Imposing such requirement goes beyond the scope of the State aid rules. From a procedural point of view, conditions can only be imposed after having opened a formal investigation procedure. From a substantive point of view, in the recent <i>Hinkley</i> judgment (Grand Chamber), the Court of Justice ruled that, although the Commission should not declare compatible State aid that breaches EU environmental law, the Commission may not impose on Member States mere environmental policies (not reflected in binding rules or principles of EU law) that it would consider in the common interest when assessing the compatibility of aid under Article 107(3)(c) TFEU. <sup>7</sup>		No further specific actions proposed/promised to be taken by the Commission.	
25)	79. Welcomes the planned revision of the Energy Taxation Directive for 2021, and calls on the Commission to present legislative proposals to bring VAT rates in line with environmental considerations, introduce a single-use plastic levy, and increase relevant minimum excise duties that have lost their effect due to inflation;		<p>The plastic own resource proposed by the Commission as part of the reform of the own resource system was endorsed by the European Council of 21 July 2020. The Own Resources Decision needs to be adopted by the Member States unanimously and approved in line with their constitutional requirements (in most cases, ratification by national parliaments). The plastics-based own resource will apply from January 2021.</p> <p>It is however not a tax, but a statistics-based own resource (contribution on the basis of the quantity of non-recycled plastic packaging waste). It provides an incentive to the Member States to reduce plastic packaging waste and therefore contributes to EU recycling objective for plastics. Member States are free to adopt the most suitable measure to reduce the quantity of plastic packaging waste not recycled in line with the principle of subsidiarity.</p> <p>The Commission's 2018 VAT proposal aims at providing more flexibility to the Member States to set their VAT rates subject to general principles and conditions, including fiscal conditions (a minimum weighted average rate) through replacing the current</p>		<p>No further specific actions promised to be taken by the Commission on this particular point but actions were taken under existing programmes/events/initiatives (a proposal for a plastic own resource was <a href="#">endorsed</a> by the European Council on 21 July 2020).</p> <p>A <a href="#">revision of the energy taxation directive</a> was adopted on 14 July 2021.</p>	

<sup>7</sup> Case C-594/18 P *Austria v Commission* EU:C:2020:742, paras 20 and 24

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>VAT Annex III (list of supplies for which Member States may apply a reduced rate) by a very short negative list of supplies for which a zero-rate or reduced rate would not be possible (e.g. tobacco). The Council is also discussing as an alternative an update of the existing list of goods and services for which a favourable treatment may be offered. The Commission calls for health and environmental considerations to be taken into account in this context.</p> <p>The European Green Deal recalls that well-designed tax reforms can boost economic growth and resilience to climate shocks and help contribute to a fairer society and to a just transition. They play a direct role by sending the right price signals and providing the right incentives for sustainable behaviour by producers, users and consumers. At national level, the European Green Deal will create the context for broad-based tax reforms, removing subsidies for fossil fuels, shifting the tax burden from labour to pollution, and taking into account social considerations. This is also reflected and further enforced in the Annual Sustainable Growth Strategy 2021 (COM/2020/575 final), the Council recommendations on the Economic policy of the euro area (COM(2020) 746 final) and in the Guidance to Member States – Recovery and Resilience Plans (SWD(2020) 205 final), which call on the Member States to consider sustainable fiscal reforms.</p> <p>Concerning minima for excise duties, the Commission agrees that some excise directives have lost traction with the minimum rates as evidenced in recent evaluations on the Energy Tax Directive and on Tobacco Taxation. The Commission is working currently on a review of these proposals. The Commission work in the review of the Energy Taxation Directive will also be seeking the alignment of the provisions of the Directive with the EU energy and climate policies, to contribute to the EU 2030 energy targets and climate neutrality by 2050.</p>			

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
26)	80. [...] encourages the Commission to establish criteria to assess Member States' tax practices; reminds the Commission of Article 116 TFEU in the context of tax-related dossiers, and encourages the Commission to make use of that provision in order to avoid distortions of competition within the single market;		<p>Since the very start of this Commission's mandate, President von der Leyen has been clear that the Commission will make full use of all means at its disposal to address key tax policy issues facing the European Union.</p> <p>An initiative under Article 116 TFEU could be used to address a distortion of competition in the EU caused by differences in tax rules of concerned Member States.</p> <p>In the context of the current economic outlook, the Commission services are analysing all scenarios to ensure that the EU's tax policy is well suited to address the needs of the future, including scenarios in which use of Article 116 TFEU could be appropriate.</p>		The general nature of the commitment's wording makes it unclear to what extent it will be carried out.	
27)	81. [...] encourages Member States and the Commission to look into new resources to fund the economic recovery that take this into account;		Although the follow-up does not mention par.14, the Commission however states that [the Commission] "will propose an own resource based on the Emissions Trading System by June 2021" and "will put forward proposals on a carbon border adjustment mechanism and a digital levy as well as an accompanying proposal to introduce new own resources by June 2021 with a view to their introduction at the latest by 1 January 2023."		On <a href="#">22 December 2021</a> , the Commission adopted proposals to create three new own resources for the EU budget. These are based on revenues from the EU ETS, on resources generated by the EU Carbon Border Adjustment Mechanism and on the share of residual profits of multinationals that will be reallocated to EU Member States under the OECD/G20 agreement on the reallocation of taxing rights.	

#### 4.1.9. CONT

Between July 2019 and December 2021, the **Committee on Budgetary Control (CONT)** was responsible for seven 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of a eight Parliament's resolutions (CONT resolutions'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent four written replies to the Parliament's seven CONT resolutions. In all four cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to three CONT resolutions. Nevertheless, the Commission was still in the deadline to respond formally to these two resolutions. In total, the Commission submitted three specific replies and one mixed reply. At the cut-off date of this study, the Commission had not yet replied to 44 of Parliament's 135 requests.

### Analysis of the Commission actions

The Commission proposed/promised no genuine actions. In 68 cases, no further specific actions were proposed/promised to be taken by the Commission and in four cases it remained unclear if an action was carried out. In 12 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

#### 4.1.9.1. CONT Resolution 1: EP resolution of 10 July 2020 on control of the financial activities of the European Investment Bank - annual report 2018

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Control of the financial activities of the European Investment Bank - annual report 2018</b>		10/07/2020 <a href="#">T9-2020/0191</a> <a href="#">2019/2127(INI)</a> CONT	<a href="#">SP(2020)452</a>	Final reply (SP) received 8 December 2020	Specific reply			
1)	27. Calls on the Commission to supplement the framework on sustainable investment with criteria for economic activities with a significant negative environmental impact which could be applied by the EIB;		Article 26(2) of the Taxonomy Regulation requires the Commission to publish a report describing provisions that cover economic activities that do not have a significant impact on environmental sustainability and economic activities that significantly harm environmental sustainability, as well as a review of the appropriateness of specific disclosure requirements related to transitional and enabling activities.				No further specific actions proposed/promised to be taken by the Commission.	
2)	60. Notes that the Commission issues an opinion on all financing operations within the framework of the procedure in accordance with Article 19 of the Statute of the EIB; calls on the Commission to make these opinions available upon delivery;		EIB project proposals are submitted for Commission opinion before the projects are examined by the EIB's Board of Directors. Article 15 of the Treaty on the Functioning of the European Union (TFEU) gives citizens and residents of EU Member States a right of access to documents of the Union institutions subject to certain principles and conditions. The opinions on the EIB's project proposals issued by the Commission are thus made available in accordance with the rules of Regulation (EC) No 1049/2001 on public access to documents.				No further specific actions proposed/promised to be taken by the Commission.	
3)	71. Calls on the Commission to put forward a proposal to ensure that the EIB complies with due diligence obligations at least equivalent to the EU Anti-Money Laundering Directive;		As an EU body created by Article 308 TFEU, the EIB is directly bound by primary law, and must carry out its tasks in compliance with the EU legal and policy framework. This includes alignment of EIB policies and procedures with the latest regulations on anti-money laundering and counter terrorist financing (AML/CFT). The Commission understands that the EIB is already taking actions in				No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>updating its Best Banking Practice (BBP) Guidelines in order to adhere to relevant AML/CFT requirements. The EIB is already expected to comply with all AML/CFT obligations deriving from Directive (EU) 2015/849 (AMLD), including for example, (1) the obligation to “refrain from carrying out transactions which they know or suspect to be related to proceeds of criminal activity or to terrorist financing” laid down in Article 35 AMLD; and (2) the obligation to “ensure that individuals, including employees and representatives of the obliged entity, who report suspicions of money laundering or terrorist financing internally or to the FIU (<b>financial intelligence unit</b>), are protected from being exposed to threats or hostile action, and in particular from adverse or discriminatory employment actions” as laid down in Article 38 AMLD. The Commission also recalls the importance of effective implementation of the requirements.</p>			

## 4.1.9.2. CONT Resolution 2: EP resolution of 10 July 2020 on protection of the European Union's financial interests - combatting fraud - annual report 2018

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Protection of the European Union's financial interests - combatting fraud - annual report 2018</b>		10/07/2020 <a href="#">T9-2020/0192</a> <a href="#">2019/2128(INI)</a> CONT	<a href="#">SP(2020)452</a>	Final reply (SP) received 8 December 2020	Mixed reply			
1)	5. Calls on the Commission therefore to develop a methodology to improve the reliability and provide for more accurate estimations of the scale of fraud in the EU;		Concerning the Parliament's request to estimate the scale of fraud in the EU, the Commission relies on data reported by the Member States for statistics on suspected and detected fraud and irregularities. In close cooperation with the Member States, it has considerably improved its irregularity reporting system over the past years, allowing for a better and more refined analysis. The Commission is committed to further improving the reporting of irregularities and fraud as well as the analysis of the nature of fraud based on tailored data collection and a better understanding of the overall anti-fraud framework in the different Member States. However, it is not possible to establish an estimate of the scale of the undetected level of fraud, which is reliable and defensible enough for evidence-based policy, also taking into account the constraint of the efficient use of the limited resources available to the Commission.				No further specific action proposed/ promised to be taken by the Commission.	
2)	6. Reiterates its call on the Commission to establish a uniform system for the collection of comparable data on irregularities and cases of fraud from the Member States in order to standardise the reporting process		As regards the Parliament's call to establish a system able to identify undetected irregularities, the Commission has already put in place a number of actions to ensure that Member States duly fulfil their reporting obligations <sup>7</sup> .				Due to a general character of the promise, it is unclear which precise actions have been taken by the Commission.	

<sup>7</sup> See for example action No 3 of the Commission Anti-Fraud Strategy (CAFS).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and ensure the quality and comparability of the data provided;				
3)	7. [...] furthermore on the Commission to carry comprehensive checks to ensure the full transparency and quality of data reported by the Member States in the Irregularity Management System (IMS);	The Commission carries out ad hoc checks on quality of data reported via the Irregularity Management System (IMS). These checks are continuously refined and improved (for instance monitoring the reporting of irregularities detected during Commission's audits or monitoring information published by the media on cases of suspected fraud). However, available resources do not allow the comprehensive and extensive level of data quality monitoring called by the Parliament.		No further / specific actions proposed/promised to be taken by the Commission on this particular point (quality checks).	
4)	11. Recalls the role of the Commission in coordinating the cooperation between Member States; calls on the Commission to help in the coordination of establishing a uniform system for the collection of data on irregularities and cases of frauds from the Member States;	The Commission agrees with the Parliament on the important role played by exchange of information and coordinated action to fight fraud in the EU and is committed to increase quality and interoperability of data about beneficiaries in shared management for audit and control purposes.		No further specific action proposed/ promised to be taken by the Commission.	
5)	15. Therefore calls on the Commission to closely monitor the re-use of EU Funds and to consider developing a system where corrections are also accompanied by restrictions on the further use;	The Commission carries out ad hoc checks on quality of data reported via the Irregularity Management System (IMS). These checks are continuously refined and improved (for instance monitoring the reporting of irregularities detected during Commission's audits or monitoring information published by the media on cases of suspected fraud). However, available resources do not allow the comprehensive and extensive level of data quality monitoring called by the Parliament.		No further / specific actions proposed/promised to be taken by the Commission on this particular point (quality checks).	
6)	16. Calls on the Commission to collect and aggregate the data and publish lists of the largest beneficiaries from each fund in each Member State;	The Commission agrees with the Parliament on the important role played by exchange of information and coordinated action to fight fraud in the EU and is committed to increase quality and interoperability of data about beneficiaries in shared management for audit and control purposes. A technical solution is currently being explored, possibly including the use of a single data-		The Commission is working on a technical solution. However, according to the Commission, the current legal framework would not allow the publication of data collected by such a tool.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		mining tool to enhance control mechanisms at Member States' and Commission level. Nevertheless, the current legal basis does not allow the Commission to publish such aggregated information. The legal framework in force allows the Commission to use data received from the Member States only for the purpose of clearance of accounts, and (in aggregated form) for monitoring and making forecasts in the agricultural sector.			
7)	17. Insists that the Commission proposes a specific complaint mechanism at Union level to support farmers or beneficiaries confronted with e.g. land-grabbing malpractices, misconduct of national authorities, pressure from criminal structures or organised crime, or persons being subject to forced or slave labour, giving them the opportunity to swiftly lodge a complaint with the Commission which the latter should check as a matter of urgency;	Reply regarding land-grabbing - Commission disagrees with Parliament, particularly, stating that "it does not agree with the Parliament that it does not take sufficient action to tackle land grabbing fraud and similar practices. The Commission takes all possible actions to tackle this type of fraud and whenever it detects suspicions of fraud and serious irregularities, it reports them to the European Anti-Fraud Office (OLAF)."		No further specific action proposed/ promised to be taken by the Commission.	
8)	18. Urges the Commission to conduct effective controls in combination with binding measures;	The Commission agrees with the Parliament [...]. A technical solution is currently being explored, possibly including the use of a single data-mining tool to enhance control mechanisms at Member States' and Commission level. Nevertheless, the current legal basis does not allow the Commission to publish such aggregated information. The legal framework in force allows the Commission to use data received from the Member States only for the purpose of clearance of accounts, and (in aggregated form) for monitoring and making forecasts in the agricultural sector.		The Commission is working on a technical solution. However, according to the Commission, the current legal framework would not allow the publication of data collected by such a tool.	
9)	35. Urges the Commission to conduct effective controls in combination with binding measures;	The Commission reassures the Parliament that together with the Member States all necessary measures are taken to fully comply with the applicable data protection requirements when personal data of economic operators		No further specific action proposed/ promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		under investigation are processed with use of the new Transaction Network Analysis software (TNA).			
10)	36.Reiterates its call on the Commission to develop a strategy for improving the recovery rate in these cases;	The Commission is already setting-up a robust reporting system to monitor and report in a structured way the follow-up to financial recommendations issued by OLAF. This will enable it to identify gaps between the amounts recommended, the amounts established for recovery, and those recovered.		It is unclear to what extent the Commission kept its commitment to set up a reporting system.	
11)	38.Repeats its call on the Commission to report annually the amount of EU own resources recovered, following the recommendations made by OLAF, and to communicate the amounts still to be recovered;	Concerning the Parliament's call on the Commission to investigate why some Member States do not report fraud cases, the Commission supervises the own resources' system and performs risk-based inspection programmes to ensure that the Member States properly collect traditional own-resources and in a timely manner transfer them to the EU budget.		No further specific action proposed/ promised to be taken by the Commission.	
12)	42.Calls on the Commission to continue supporting Member States with a view to ensuring that both the quality and number of controls are improved, and to share best practice in the fight against fraud;	The Commission confirms that it will continue supporting Member States in their irregularity reporting.		No further specific action proposed/ promised to be taken by the Commission.	
13)	44.Calls on the Commission, the OLAF, EPPO and Member States, with regard to the common agricultural policy where 249 fraudulent irregularities were registered in 2018(-6 %) involving a total of EUR 63,3 million (+10 %) and to cohesion policy where 363 fraudulent irregularities were registered in 2018 (+5 %), the total amount involved being EUR 959,6 million (+199 %); to apply the strongest measures to fight against fraud involving the public money paid by the EU Budget;	Regarding the Parliament's concern that financial amounts involved by fraudulent irregularities in 2018 increased by 198%, the considerable increase was due to the reporting of two multi-million Euro cases concerning Cohesion policy. Notably, in the two cases in question, the fraud was detected before payments and therefore there were no losses to the EU budget.		No further specific action proposed/ promised to be taken by the Commission.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	53. Calls on the Commission to publish, as soon as possible, a list of all Member States which have failed to transpose the directive by the deadline; calls on all remaining Member States to take all necessary measures and ensure the full and correct transposition of the Directive within the shortest time possible;  [...] calls on the Commission to closely monitor the transposition process in all Member States, as well as to make use of its prerogatives for launching infringement procedures, where Member States fail to comply with the transposition process;		The Commission agrees with the Parliament on the importance that all Member States fully transpose the PIF Directive as soon as possible.  [...] The Commission reports that at that stage, 23 Member States have notified the Commission of the complete transposition of the PIF Directive, while three Member States (BE, IE, RO) have notified a partial transposition. The directive does not bind one Member State (Denmark).  The Commission is closely monitoring the process and supporting Member States to ensure complete and timely transposition. Infringement procedures have been launched where necessary. <sup>8</sup>		A list on national transposition of the PIF directive is provided in the Commission reply.          No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (monitoring of transposition and opening of infringement procedures).	
15)	56. Calls on the Commission to push the remaining Member States to advance their adoption of NAFS;  [...] calls on the Commission to consider adopting national anti-fraud strategies as a condition for access to EU funds;		Regarding the fact that not all Member States have adopted National Anti-Fraud Strategies (NAFS) and despite the fact that Member States have no legal obligation to do so, the Commission encourages them to develop such anti-fraud strategies and supports them in the drafting process. As the adoption of NAFS is not mandatory, their adoption cannot become a pre-condition to obtain EU funds as requested by the Parliament.		No further specific action proposed/ promised to be taken by the Commission.	
16)	62. Calls on the Commission to actively promote and incentivise EPPO membership among so-far reluctant Member States, in order to ensure effective and efficient cross-border functioning across the EU;		The Commission agrees with the Parliament on the importance of the EPPO in the fight against fraud and will continue to encourage non-participating Member States to join it. It also recalls that all Member States, including those who do not participate in the EPPO, are under the		No further specific action proposed/ promised to be taken by the Commission.	

<sup>8</sup> At this stage, 23 Member States have notified the Commission of the complete transposition of the PIF Directive, while three Member States (BE, IE, RO) have notified a partial transposition. The directive does not bind one Member State (Denmark).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		obligation to protect the financial interests of the Union in an effective and dissuasive manner.			
17)	64. No further specific action proposed/ promised to be taken by the Commission.	
18)	69. Regrets that the Commission no longer deems it necessary to publish the anti-corruption report; calls on the Commission, moreover, to consider establishing a network of corruption prevention authorities within the European Union;  Urges the Commission, therefore, to continue publishing its anti-corruption reports; reiterates its call on the Commission to engage in a more comprehensive and coherent EU anti-corruption policy, including an in-depth evaluation of the anti-corruption policies in each Member State;	As regards the Parliament's call to consider the establishment of a network for preventing corruption in the EU, the Commission considers that relevant networks on corruption prevention authorities already exist at the European level <sup>9</sup> . Notably, the Commission already works with Member States' relevant authorities via a Network of Corruption Contact Points and a newly established Network of Rule of Law Contact Points.  As regards the fight against corruption, the Commission does not deem it necessary to resume the publication of annual anti-corruption reports and to develop an anti-corruption index to rank Member States.		No further / specific actions proposed/promised to be taken by the Commission on this particular point ( <a href="#">network of corruption contact points</a> and the <a href="#">network of rule of law contact points</a> ).  No further specific action proposed/ promised to be taken by the Commission.	
19)	71. Reiterates its call to the Commission to set up an internal evaluation mechanism of corruption for the EU institution;	As regards the Parliament's call to consider the establishment of a network for preventing corruption in the EU, the Commission considers that relevant networks on corruption prevention authorities already exist at the		No further / specific actions proposed/promised to be taken by the Commission on this particular point ( <a href="#">network of corruption contact points</a> and the <a href="#">network of rule of law contact points</a> ).	

<sup>9</sup> Examples of these networks are the European contact-point network against corruption (EACN), the European Partners against Corruption (EPAC), and the Network of Corruption Prevention Agencies established in October 2018.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		European level <sup>10</sup> : Notably, the Commission already works with Member States' relevant authorities via a Network of Corruption Contact Points and a newly established Network of Rule of Law Contact Points.			
20)	72. Calls on the Commission to devise a Europe-wide strategy for the proactive avoidance of conflict of interests for all financial actors implementing the EU budget, as one of its overarching priorities;	Moreover, the Commission has been providing Member States with guidance on the management of conflict of interests and will continue to do so. In various fora, notably the Advisory Committee for the Coordination of Fraud Prevention, the Commission and the Member States have worked together to identify and promote good practices in this respect. Moreover, the 2018 revised Financial Regulation, including its Article 61, is directly applicable in the Member States. Consequently, their obligation to prevent and address conflict of interest, as set out in this Article, does not depend on the adoption of national implementing measures. The Commission has drafted a new guidance note based on Article 61 of the revised Financial Regulation on which the Member States were consulted. The Commission transmitted the new guidance note to the European Parliament's Committee on Budgetary Control on 4 August 2020.		No further / specific actions proposed/promised to be taken by the Commission on this particular point (provision of guidance on the management of conflict of interests).	
21)	76. Reiterates its request to the Commission to submit a legislative proposal on mutual administrative assistance in those areas of expenditure of EU funds where no provision is made for this;	As regards the fact that the Commission did not include a proposal for mutual administrative assistance on the expenditure side in its work programme, its proposal to amend Regulation 883/2013 on OLAF's investigations includes provisions to this effect. These aim to strengthen OLAF's ability to coordinate action by the Member States in the fight against fraud and to reinforce the role of the Member States' AFCOS. These provisions are reflected in		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">proposal to amend Regulation 883/2013</a> on OLAF investigations).	

<sup>10</sup> Examples of these networks are the European contact-point network against corruption (EACN), the European Partners against Corruption (EPAC), and the Network of Corruption Prevention Agencies established in October 2018.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the agreement in principle reached on 26 June 2020 and, if confirmed by the co-legislators, would apply in the expenditure and revenue side.		On 23 December 2020, a new <a href="#">regulation was adopted</a> as regards cooperation with the European Public Prosecutor's Office and the effectiveness of the European Anti-Fraud Office investigations.	
22)	79. Calls on the Commission and the Member States to monitor e-commerce transactions involving sellers based outside the EU who declare no VAT (for example by undue use of the 'sample' statute), or deliberately underestimate the goods' value in order to avoid VAT altogether or reduce the amount due;	The Commission welcomes the Parliament's call on the Member States and the Council to provide the Commission with access to Eurofisc and to exchange information among them. The Commission wishes to reassure the Parliament that it is working closely with Member States to enhance the collection of the VAT (value added tax) across all domains and make sure that it benefits national and EU budgets. In particular, the Commission would like to draw the attention of the Parliament to the recently published communication <sup>11</sup> outlining an Action Plan for a fair and simple taxation supporting the recovery strategy and presenting a number of upcoming initiatives in the field of direct and indirect taxation.		No further specific action proposed/ promised to be taken by the Commission.	
23)	81. Urges the Commission and Member States to utilise and improve, where possible, common reporting methods in order to provide comprehensive and comparable information on the detected fraud level in EU spending;	No specific reply is provided for this particular question.		Not mentioned.	
24)	82. Calls on the Commission to ensure the effectiveness of the IT system known as 'Irregularity Management System' (IMS) managed by OLAF, so that information on criminal investigations related to fraud affecting the EU's financial interests is reported in a timely manner by all competent authorities;	The Commission carries out ad hoc checks on quality of data reported via the Irregularity Management System (IMS). These checks are continuously refined and improved (for instance monitoring the reporting of irregularities detected during Commission's audits or monitoring information published by the media on cases of suspected fraud). However, available resources do not		No further / specific actions proposed/promised to be taken by the Commission on this particular point (quality checks).

		allow the comprehensive and extensive level of data quality monitoring called by the Parliament.			
25)	83. Calls on the Commission to provide for EU citizens to have full access to information on co-financed projects;	As regards the Parliament's call on the Commission to provide EU citizens with full access to information on co-financed projects, such information is already available at Member States' managing authority level. The current legal basis does not allow the Commission to publish aggregated data on EU-financed projects in an EU wide platform. Data received from the Member States can be used by the Commission only for the purpose of clearance of accounts, and (in aggregated form) for monitoring and making forecasts in the agricultural sector.		No further specific action proposed/ promised to be taken by the Commission.	
26)	86. Calls on the Commission to consider making the use of ARACHNE mandatory;	Although the follow-up mentions point 86, no specific reply is provided for this particular question.		Not mentioned.	
27)	88. Calls on the Commission to provide for proper legal protection for investigative journalists along the lines of that provided for whistleblowers;	The Commission agrees on the need to design a legal framework to provide ad hoc protection to investigative journalists across the EU.		No further specific action proposed/ promised to be taken by the Commission.	
28)	91. Welcomes the Commission's timetable for the rollout of e-procurement in the EU and calls on the Commission to follow up on it;	Although the follow-up mentions point 91, no specific reply provided for this particular question (e-procurement).		Not mentioned.	
29)	92. Calls on the Commission to elaborate a framework for the digitalisation of all processes of implementation of EU policies (calls for proposals, application, evaluation, implementation, payment) to be applied by all Member States;	In reply to the Parliament's call to elaborate a framework for the digitalisation of all processes of implementation of EU policies and develop incentives to create an electronic profile of contracting authorities for those Member States where such profiles are not available, the Commission recalls that it has already established such framework, both for direct and indirect management.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (framework for the digitalisation of all processes of implementation of EU policies).	
30)	93. Calls on the Commission to develop incentives to create an electronic profile of contracting authorities for those Member States where such profiles are not available;	In reply to the Parliament's call to elaborate a framework for the digitalisation of all processes of implementation of EU policies and develop incentives to create an electronic profile of contracting authorities for those Member States		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		where such profiles are not available, the Commission recalls that it has already established such framework, both for direct and indirect management.		request (framework for the digitalisation of all processes of implementation of EU policies).	
31)	94. Calls on the Commission to restart negotiations with GRECO as soon as possible to assess in a timely manner its compliance with the United Nations Convention against Corruption (UNCAC) and to set up an internal evaluation mechanism for the EU institutions;	The Commission agrees that the EU participation in GRECO (Group of States against Corruption) will bring added value to the cooperation between the European Union and the Council of Europe. It will facilitate our joint work on capacity-building and implementing standards intended to strengthen the rule of law and the fight against corruption. Discussions have started with the United Nations Office on Drugs and Crime (UNODC) on how the review of the EU implementation of the UN Convention Against Corruption (UNCAC) could be organised. As regards the EU institutions, given that the Convention is binding on all of them, the review will concern them all. Preparatory works between the Commission, the Parliament and the Council have already started.		The Commission has started <a href="#">preliminary work</a> on the review of the EU implementation of the UN Convention Against Corruption.	
32)	97. Strongly encourages the Commission, OLAF (...) to actively engage and collaborate with partner authorities in candidate, potential candidate and EaP countries, promoting measures to effectively address possible fraud cases; calls on the Commission to develop specific and regular mechanisms to effectively prevent and combat fraud with EU funds in these states;	Together with OLAF, it (Commission) will continue engaging with Eastern Partnership countries, notably with authorities entrusted with the fight against fraud. Specific and regular mechanisms to prevent and combat fraud with EU funds in those states are already in place. These measures include the adoption of anti-fraud strategies, the launch of fraud and prevention awareness campaigns and capacity building of anti-fraud related structures in partner countries.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (collaboration with national authorities entrusted with the fight against fraud in Eastern Partnership countries).	
33)	101. Calls on the Commission to closely monitor and assist the Member States, ensuring the complete, correct and timely transposition of the Directive;	As regards the Parliament's call to closely monitor the transposition and implementation of the Directive on whistle-blower protection in the Member States, the Commission is already doing so. To this aim, it has set-up an informal expert group on Directive 2019/1937 on the protection of persons who report breaches of Union law,		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (setting up of an expert group on Directive	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			composed of Member States' representatives, to ensuring the correct, timely and consistent transposition of the directive and to collect information on its transposition and implementation. The group will also be a platform for sharing experiences and good practices with a view to maximising the effectiveness of the directive on the ground. The Commission will submit a report on the application and implementation of the Directive to the Parliament and the Council by 17 December 2023.		2019/1937 on the protection of persons who report breaches of Union law).	
34)	102. Calls on the Commission to develop comprehensive measures for the protection of investigative journalism, including a rapid response mechanism for journalists in distress and effective anti-SLAPP legislation;		The Commission agrees on the importance of investigative journalism and on developing legal instruments to ensure its protection in the EU.		No further specific action proposed/ promised to be taken by the Commission.	
35)	107. Calls on the Commission, as Guardian of the Treaties, to fight all forms of conflict of interests and to evaluate on a regular basis the preventive measures taken by the Member States to avoid them;  Calls on the Commission to propose common guidelines for the avoidance of conflicts of interest of high-profile politicians;		Concerning the Parliament's call to propose guidelines to avoid conflict of interests of high-level profile politicians, the Commission wishes to highlight that it takes the issue of conflict of interests and the "revolving doors" phenomenon very seriously. Article 61 of the Financial Regulation applies to all persons involved in budget implementation at any level. The guidance note on avoidance of conflict of interests cited above provides guidance and practical examples in that respect. The Staff Regulations contain a comprehensive ethical framework, which was reinforced in the area of post-employment restrictions by the 2014 Staff Regulations Reform and the new Decision on outside activities, assignments and occupational activities after leaving the service adopted in 2018.		No further specific action proposed/ promised to be taken by the Commission.  No further specific action proposed/ promised to be taken by the Commission.	

4.1.9.3. CONT Resolution 3: EP resolution of 7 July 2021 on control of the financial activities of the European Investment Bank - annual report 2019

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Control of the financial activities of the European Investment Bank - annual report 2019</b>		7/07/2021 <a href="#">T9-0332/2021</a> <a href="#">2020/2245(INI)</a> CONT	<a href="#">SP(2021)558</a> -	Final reply (SP) received 8 November 2021		Specific reply	
1)	53. [...] calls on the Commission, the ECA and the EIB to enhance the role of the ECA and further strengthen its auditing powers regarding activities of the EIB in the renewal of the tripartite agreement governing the rules of engagement;		<p>The European Commission has been working together with the ECA and the EIB on a renewed tripartite agreement. The purpose of the ongoing revision of the tripartite agreement was to renew the agreement concluded on 26 September 2016, which governs cooperation between the Commission, the ECA and the EIB with respect to the audits carried out by the ECA on the EIB's activity in managing Union expenditure and revenue. The revised agreement is expected to be adopted shortly.</p> <p>The Commission notes that it is not the purpose of the Tripartite Agreement to define the mandate of the ECA as concerns the EIB, which is laid down in Article 287 (3) TFEU. The Tripartite Agreement governs the rights of access to information held by the EIB in respect of its activity in managing Union expenditure and revenue.</p>			On 11 November 2021, a <a href="#">new tripartite agreement</a> was signed by EC, ECA and EIB.	
2)	54. Invites the EIB Group and the Commission to launch the revision process of the Financial and Administrative Framework Agreement (FAFA) provisions dating back to May 2014, setting out the rules governing the centrally managed EU instruments entrusted to the EIB Group;		<p>The Financial and Administrative Framework Agreement with the EIB was – since its signature in 2014 – already updated in 2019 to take into account the revision of the Financial Regulation in 2018. It is the intention of the Commission to enter into discussions with the EIB on whether a further update would be needed.</p>			It is unclear whether the Commission kept its promise to 'enter into discussions with the EIB'.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>61. [...] calls for better information sharing from the Commission in order to increase its transparency towards Parliament on the positions it takes in the EIB Board of Directors; reiterates its call for the disclosure of the opinions issued by the Commission within the framework of the procedure in accordance with Article 19 of the EIB Statute on the EIB financing operations for the purpose of assessing their compliance with the relevant EU legislation and EU policies;</p> <p>[...] calls on the Commission and the EIB to reach an agreement to ensure full transparency on such opinions and their underlying rationale as far as is legally possible;</p>	<p>Regarding the positions taken by the EU Board member, the Commission has the right to nominate one member (and one alternate) who is appointed "ad personam" by the EIB Board of Governors. According to the EIB Statute and the Code of Conduct, the members of the Board of Directors have to act only in the interest of the EIB and they are responsible only to the Bank. The Commission stands ready to look into ways to enhance the explanations given to the European Parliament in matters concerning the EIB.</p> <p>Regarding the disclosure of Commission opinions issued in accordance with Article 19 of the EIB Statute, the current practice involves granting disclosure of individual Article 19 opinions upon request, which in the Commission's view provides a good balance between the different interests, i.e. on the one hand, the need of transparency, and on the other, confidentiality and protection of commercially sensitive information. Such disclosure requests are treated according to the access to document rules governed by Regulation 1049/2001 regarding public access to documents from the Commission in particular, providing for exceptions when disclosure would undermine public or private interests, such as commercial interests of private project promoters.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p> <p>No further specific actions proposed/promised to be taken by the Commission.</p>	

4.1.9.4. CONT Resolution 4: EP resolution of 7 July 2021 on protection of the EU’s financial interests – combatting fraud – annual report 2019

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Protection of the EU’s financial interests – combatting fraud – annual report 2019</b>		7/07/2021 <a href="#">T9-0337/2021</a> <a href="#">2020/2246(INI)</a> CONT	<a href="#">SP(2021)558</a>	Final reply (SP) received 8 November 2021	Mixed reply		
1)	1. [...] calls on the Commission to closely monitor the transposition process in all Member States and to make use of its prerogatives for launching infringement procedures where Member States fail to comply with the transposition process;		The Commission agrees with the Parliament on the importance that all Member States fully transpose the Protection of financial interests (PIF) Directive. The Commission is closely monitoring the process and supporting the Member States to ensure complete and timely transposition. All 26 Member States bound by the directive have notified full transposition of the PIF Directive into national law. Denmark is not bound by the directive.			No further specific actions proposed/promised to be taken by the Commission point as according to the Commission, it is already working on action falling under the scope of the EP request (monitoring of transposition).	
2)	6. Notes that the number of detected irregularities reported as fraudulent is an indication of the extent of detection and of the capacity of the Member States and EU bodies to intercept potential fraud, but not a direct indicator of the level of fraud affecting the EU budget or a specific Member State; notes that it is unclear how many fraudulent irregularities go unreported every year, making it very difficult to evaluate the effectiveness of anti-fraud activities; recalls that in 2019, the European Court of Auditors published two special reports in which it highlighted the Commission’s shortcomings with regard to its insights into the scale, nature and causes of fraud and identified weaknesses in the Commission’s strategic approach towards managing fraud risks, calling on it to take more proactive measures to address these issues; calls on the Commission, therefore, to develop a methodology to improve reliability and		Consolidated reply points 5-14 The Parliament states that it is difficult to draw conclusions on the effectiveness of the anti-fraud activities by the Commission, as it is unclear how many fraudulent irregularities remain unreported every year. The Commission relies on data reported by the Member States for statistics on suspected and detected fraud and irregularities. In close cooperation with the Member States, it has considerably improved its irregularity reporting system over the past years, allowing for a better and more refined analysis. The Commission is committed to further improving the reporting of irregularities and fraud as well as the analysis of the nature of fraud on the basis of tailored data collection and a better understanding of the overall anti-fraud framework in the different Member States. However, it is			No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	provide for more accurate estimations of the scale of fraud in the EU [...]	not possible to establish an estimate of the scale of the undetected level of fraud, which is reliable and defensible enough for evidence-based policy, also taking into account the constraint of the efficient use of the limited resources available to the Commission [...]			
3)	10. Highlights that in the particular case of fraudulent irregularities, detections were concentrated within a few Member States, which suggests different approaches to the use of criminal law to protect the EU budget; underlines and regrets the fact that many Member States do not have specific laws to combat mafia-type organised crime, whose involvement in cross-border activities and sectors affecting the EU's financial interests is constantly growing; calls on the Commission to address these differences between the Member States and to consider new harmonising measures;	Consolidated reply points 5-14 [...] <p>Regarding the fact that many Member States do not have specific laws against organised crime, the Council Framework Decision 2008/841/JHA on the fight against organised crime aims at approximating definitions and sanctions for offences relating to the participation in a criminal organisation in all Member States.</p> <p>No specific reply is provided to this particular point on harmonising measures, but the Commission states that 'the Directorates-General managing the European Structural and Investment Funds (ESIF) has aligned its irregularity typology used by audit authorities with the one used by OLAF for the irregularity reporting. This will allow for a joint analysis of irregularities reported, and to identify and assess risks and tendencies to take preventive action'.</p>		No further specific actions proposed/promised to be taken by the Commission.	
4)	12. Underlines the increased risks that the COVID-19 crisis has brought to the implementation of the EU budget; notes with concern that more than half of the fraudulent irregularities were reported by two Member States and that some Member States regularly do not report a single case of fraud; calls on the Commission to pay particular attention to these cases by carrying out monitoring and taking action to ensure the full protection of the EU budget, and to run random, on-the-spot checks, especially in exceptional circumstances of crises [...]	Consolidated reply points 5-14 [...] The Commission relies on data reported by the Member States for statistics on suspected and detected fraud and irregularities. In close cooperation with the Member States, it has considerably improved its irregularity reporting system over the past years, allowing for a better and more refined analysis. The Commission is committed to further improving the reporting of irregularities and fraud as well as the analysis of the nature of fraud on the basis of tailored data collection and a better understanding of the		No further specific actions proposed/promised to be taken by the Commission.

		consistent reporting of irregularities at legislative and operational level [...].			
7)	18. Notes from the 2020 Final Report on the VAT Gap that the EU VAT gap dropped to EUR 140 billion in 2018 and could fall below EUR 130 billion in 2019; is concerned, however, that the VAT gap may reach EUR 164 billion in 2020 and asks the Commission for a thorough explanation as to whether this increase was in any way related to the COVID-19 pandemic;	Consolidated reply to points 15-26 Regarding the Parliament's request to provide a thorough explanation on whether the possible increase in the EU Value Added Tax (VAT) gap in 2020 was related to the COVID-19 pandemic, the Commission recalls that this increase cannot be taken as a given. Based on previous experiences with past economic downturns, the 2018 VAT Gap Study projects a preliminary estimation of the potential impact of the COVID-induced economic crisis on the 2020 VAT gap. In view of the considerable financial support provided by the Member States to ease the impact of the COVID-induced economic crisis, it is probable that the final 2020 VAT gap figure may be considerably different [...].		No further specific actions proposed/promised to be taken by the Commission.	
8)	19. Is deeply concerned by the extensive impact of VAT fraud on the EU budget as well as national budgets; deems it very important to step up the fight against the biggest kind of VAT fraud – missing trader intra-community (MTIC) fraud, which comes at an estimated annual cost of EUR 40-60 billion; calls on the Commission to assess the strengths and weaknesses of different potential solutions to tackle MTIC fraud, notably the introduction of a real-time, digital transaction-based reporting system developed by researchers (TX++), or a combination of the definitive VAT system with digital and real-time, transaction-based reporting;	Consolidated reply to points 15-26 [...] The Commission agrees with the Parliament on the importance to step up the fight against missing trader intra-community (MTIC) fraud. However, it disagrees with the suggestion of applying a specific IT solution developed by a particular service provider in order not to limit the scope of potential solutions and particularly block chain-based systems. Furthermore, the Commission does not want to provide a preferential treatment to specific proposals [...].		No further specific actions proposed/promised to be taken by the Commission.	
9)	21. Notes that between 2017 and 2019, the Commission carried out on-the-spot inspections on the control strategy in the field of customs value in all Member States and found that the Union's financial interests	Consolidated reply to points 15-26 [...] As regards undervaluation fraud, the Commission wishes to point out that the EU financial interests were not properly protected in the past due to the Member			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>were not effectively protected, leading to significant losses to the EU budget of TOR; notes that OLAF has issued investigative reports with recommendations for six Member States which have not fully implemented the necessary measures to consistently tackle undervaluation fraud; calls on the Commission to report back to Parliament on the Member States that could provide a good example of best practices to follow and those where significant challenges remain;</p>	<p>States' inadequate control strategies on customs value. However, the Commission follow-up inspections and all further actions taken in 2020 to address the undervaluation risks at EU level clearly paid off, as there is a significant decline at EU level in potential TOR losses due to undervaluation for 2020.</p> <p>[...] As regards the Parliament's call on the Commission to report annually the amount of EU own resources recovered, the Commission confirms that reporting on the follow-up of OLAF's financial recommendations in the TOR area is the subject of a stocktaking exercise carried out in 2020/2021, in cooperation between the Directorate-General for Budget and OLAF and is being developed for regular publication. Further consultation and verification processes in this respect are currently ongoing.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	
10)	<p>22. Notes that just as in 2017 and 2018, solar panels were the goods most affected by fraud and irregularities in monetary terms in 2019; calls on the Commission to recognise the systemic nature of such fraud [...]</p>	<p>Consolidated reply to points 15-26</p> <p>[...] The Commission confirms that it carried out desk audits on solar panels originating in China, Malaysia and Taiwan. A significant part of the traditional own resource (TOR) losses identified by the Commission was related to the evasion of anti-dumping and countervailing duties on solar panels. Further quantification of TOR losses are completed and the Member States concerned were recently informed on the TOR losses occurred on their territory and requested to compensate the EU budget thereto. There are no longer anti-dumping and countervailing duties on solar panels since September 2018 and thus the incentive for fraud disappeared [...].</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	23. [...] welcomes the Commission's referral to the Court of Justice in March 2019 of an infringement case against the UK concerning the TOR losses due to undervalued imports, asks the Commission to report on any developments in this regard;	Consolidated reply to points 15-26 [...] Furthermore, the Commission has taken further steps for quantifying previous TOR losses in all Member States and recently informed them of their respective preliminary amounts of estimated TOR losses. Pending the Court of Justice of the European Union ruling in case C-213/19, the Member States are free to use this information in their assessment of their financial responsibility, in particular in view of the accumulating interest. However, the preliminary quantification can be finalised only after the Court's ruling. The discharge authority will be informed as requested [...].		On 9 September 2021, the Court of Justice of the European Union delivered a non-binding opinion in the case mentioned by the Commission. The state-of-play of this court case is available on its <a href="#">website</a> .	
12)	24. [...] notes that the Commission will follow up with and hold Member States financially responsible for any potential losses incurred; is concerned that according to provisional calculations, TOR losses in 2019 accounted for 1 % of total TOR for the year; asks the Commission to promptly inform Parliament about the findings and consequences of its inspections and quantification calculations, once these have been finalised;	Consolidated reply to points 15-26 [...] the Commission follow-up inspections and all further actions taken in 2020 to address the undervaluation risks at EU level clearly paid off, as there is a significant decline at EU level in potential TOR losses due to undervaluation for 2020. Furthermore, the Commission has taken further steps for quantifying previous TOR losses in all Member States and recently informed them of their respective preliminary amounts of estimated TOR losses [...]. As regards the Parliament's call on the Commission to report annually the amount of EU own resources recovered, the Commission confirms that reporting on the follow-up of OLAF's financial recommendations in the TOR area is the subject of a stocktaking exercise carried out in 2020/2021, in cooperation between the Directorate-General for Budget and OLAF and is being developed for regular publication. Further consultation and verification processes in this respect are currently ongoing.		No further specific actions proposed/promised to be taken by the Commission.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	25. Reiterates that a combination of different detection methods (release controls, post-release controls and inspections by anti-fraud services and others) is the most efficient way of detecting fraud and that the efficiency of each method depends on the Member State concerned, the efficiency of its administrative coordination, and the ability of the relevant Member State services to communicate with one another; calls on the Commission to inform the Council on the Member States that could provide a good example of best practices to follow and those where significant challenges for improvement remain;		No specific reply is provided to this particular point (informing the Council on the Member States that could provide a good example of best practices to follow and those where significant challenges for improvement remain).		Not mentioned.	
14)	26. Notes that over the past five years, the annual TOR recovery rate has varied between 52 % and 66 %, and that the recovery rate for cases reported in 2019 currently stands at approximately 57 %; notes that differences in the Member States' recovery results may arise from factors such as the type of fraud or irregularity or the type of debtor involved; notes that as of March 2020, the overall recovery rate for all years between 1989 and 2019 was 61 %; reiterates its call on the Commission to report every year on the amount of EU own resources recovered, following the recommendations made by OLAF, and to inform the discharge authority of the amounts still to be recovered;		Consolidated reply to points 15-26 [...] As regards the Parliament's call on the Commission to report annually the amount of EU own resources recovered, the Commission confirms that reporting on the follow-up of OLAF's financial recommendations in the TOR area is the subject of a stocktaking exercise carried out in 2020/2021, in cooperation between the Directorate-General for Budget and OLAF and is being developed for regular publication. Further consultation and verification processes in this respect are currently ongoing.		According to the Commission reply, the process of making available a regular publication on the recovery of EU own resources is still ongoing.	
15)	31. Repeats its concern that CAP subsidies continue to incentivise land-grabbing by criminal and oligarchic structures; reiterates its urgent call on the Commission to establish a complaints mechanism for farmers and SMEs faced with land-grabbing, severe misconduct by national authorities, irregular or biased treatment in tenders or distribution of subsidies, pressure or intimidation from criminal structures, organised crime or oligarchic structures, or another severe infringement		Consolidated reply points 27-41 The Commission agrees with the Parliament's call for the introduction of maximum amounts for the payments that one natural person can receive from the first and second pillar of the Common Agricultural Policy (CAP) and for cohesion funds. Under the political agreement on the CAP post 2020, the Member States may implement instruments to reduce payments as well		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C Action of the Commission	C C
	<p>of their fundamental rights to lodge a complaint directly with the Commission; welcomes the fact that such a complaints mechanism has been proposed for the new CAP regulation;</p>	<p>as to cap amounts of direct payments (of all types) above EUR 60 000. In addition, there is a clear obligation for the Member States to achieve the objective of fairer distribution and targeting of support. Dedicating at least 10% of the Direct Payments envelope to the complementary redistributive payments to smaller and medium size farms is obligatory with a possibility to derogate from this obligation if the Member State is able to prove the redistribution needs are adequately addressed through other instruments. For example through reduction of payment and capping, the possibility to differentiate the basic income support by groups of territories faced with similar socio-economic or agronomic conditions, the payment for small farmers. The complementary income support for young farmers and the coupled income support will also contribute to a better-targeted and fairer distribution of direct payments.</p> <p>Regarding the Parliament's call to establish a complaints mechanism, the Commission recalls that the measures put in place in the framework of the CAP aim at preventing land-grabbing by criminal and oligarchic structures. The Integrated Administration and Control System (IACS) and the Land Parcel Identification System (LPIS) prevent falsification of documents or fake statements or duplication of applications. Moreover, the CAP is implemented in shared management and it is for the Member States authorities to deal with complaints from individual beneficiaries. The three institutions reached an agreement on the CAP complaint mechanism where, in accordance with the principle of subsidiarity, the Member States should, upon request of the Commission, examine complaints submitted to the Commission falling within the scope of their CAP Strategic Plan and should inform the Commission of the</p>	<p>working on action falling under the scope of the EP request (<a href="#">political agreement on the CAP post 2020</a>).</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">CAP strategic plans</a>, <a href="#">Integrated Administration and Control System (IACS)</a> and <a href="#">Land Parcel Identification System (LPIS)</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		results of these examinations. In addition, the Commission should ensure that complaints directly lodged with it are adequately followed up, in accordance with the discretionary power the Commission has in deciding which cases to pursue [...].			
16)	33. Is very concerned by media reports about EU-co-financed infrastructure investments which were repurposed after the minimum required period of three or five years; regrets the allegations of fraud and personal enrichment from this repurposing; regrets the fact that the Commission has not been able to provide additional information to dispel the remaining doubts; welcomes the Commission's intention to follow up properly on these allegations and calls on the Commission to report its findings to Parliament; further calls on the Commission to analyse which Member States have severe problems with the repurposing of EU-co-financed infrastructure projects;	Consolidated reply points 27-41 [...] The Commission notes that the legal periods on durability of operations in cohesion have been broadly confirmed by the legislator in the recently-adopted Common Provisions Regulation 2021/1060 for the period 2021-2027. The Commission has also undertaken to follow up on specific cases of alleged fraud with respect to the repurposing of vocational training centres and infrastructure financed with the support of cohesion funds and to keep the discharge authority informed.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (repurposing of EU-co-financed infrastructure projects).	
17)	35. Calls on the Commission to conduct a thorough analysis on the different national rules on the durability of appropriation requirements of co-financed investments and premature repurposing, both for infrastructure and equipment, with a particular focus on whether national rules go beyond the minimum EU requirements; Calls on the Commission to report its findings to Parliament;	Consolidated reply points 27-41 [...] The Commission notes that the legal periods on durability of operations in cohesion have been broadly confirmed by the legislator in the recently-adopted Common Provisions Regulation 2021/1060 for the period 2021-2027. The Commission has also undertaken to follow up on specific cases of alleged fraud with respect to the repurposing of vocational training centres and infrastructure financed with the support of cohesion funds and to keep the discharge authority informed.  The Common Provisions Regulation 2021/1060 provides that the Member States ensure as part of the sound functioning of the management and control systems a proper audit trail and take all required actions to		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>prevent, detect and correct, and report on irregularities including fraud. These actions comprise amongst others the collection of information on the beneficial owners of the recipients of cohesion funding of the European Union, and notably data about the name and unique identifier of the beneficiary, and the VAT or tax identification number. The collection of data on those ultimately benefiting, directly or indirectly, from Union funding under shared management is indeed necessary to ensure effective implementation of the projects concerned and controls and audits. To enhance the protection of the financial interests of the European Union, the Commission makes available an integrated and interoperable information and monitoring system, including a single data-mining and risk-scoring tool, to access and analyse the relevant data ("ARACHNE"). The system may be used cost free for the Member States and the Commission encourages its generalised application by Member States.</p>			
18)	<p>36. Reiterates the transparency requirements for the CAP and cohesion policy, which oblige the responsible authorities of the Member States to maintain a publicly available list of final beneficiaries; strongly calls on the Member States to publish such data in a uniform, machine-readable format and ensure interoperability of the information; demands that the Commission collect and aggregate the data and publish lists of the largest beneficiaries from each fund in each Member State;</p>	<p>Consolidated reply points 27-41 The Commission agrees with the Parliament on the importance of transparency in accounting for expenditure. Under shared management, the implementation of funds at project level is the responsibility of the Member States. Accordingly, information on co-financed projects is available at Member States' managing authority level. The current legal basis does not allow the Commission to publish aggregated data on EU-financed projects in an EU-wide platform. The legal framework in force requires the Commission to use data received from the Member States only for the purpose of clearance of accounts, and (in aggregated form) for monitoring and making forecasts in the agricultural sector.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	37. [...] and calls on the Commission, OLAF and the EPPO to ensure that fraudulent activities, especially those related to fighting the COVID-19 pandemic, do not remain unresolved;	Consolidated reply points 27-41 [...] As regards the Parliament's call on the Commission, OLAF and the EPPO to fully investigate whether the different reporting patterns in the Member States in terms of their tendency to detect fraudulent irregularities involving large financial amounts are related to possible conflict of interest, the Commission wishes to recall the difference between the reporting to the Commission of detected irregularities and suspected fraud by the Member States, and investigations by OLAF based on incoming information. Where appropriate OLAF can use this information reported by the Member States and can act on suspicions of fraud. The Member States are obliged to report to the EPPO any criminal conduct in respect of which EPPO could exercise its competence [...].		No further specific actions proposed/promised to be taken by the Commission.	
20)	38. Is concerned about continued reports by the Court of Auditors and the Commission about persisting weaknesses in public procurement in several Member States; calls on the Commission to conduct a thorough analysis of the Member States with noticeable weaknesses about the underlying reasons for these and to specify precisely to what extent they are due to formal errors or systemic fraud and corruption; is of the opinion that minor formal errors need to be treated differently and that the Commission should focus more on the more severe issues, such as intentional manipulations of the tender criteria to favour the application of certain or single bidders, corruption relating to bidder selection, conflicts of interest and other fraudulent misuse;	Consolidated reply points 27-41 [...] Regarding the Parliament's concern about persisting weaknesses in public procurement in several Member States, the Commission agrees with the suggested approach and the distinction between types of errors according to their severity. However, the mentioned errors concern individual cases and not the Member States public procurement systems, which would fall under the Commission's competence to assess. Moreover, the Commission is not in a position to assess individual errors in specific public procurement procedures. The public procurement procedures carried out by the Member States entities are, as a principle, controlled by the Member States' authorities. However, audits performed by the Commission services, cases investigated by OLAF or under the sampling in a specific		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		audit by the European Court of Auditors could reveal the mentioned errors in individual procedures [...].			
21)	39. Points out that complete transparency in accounting for expenditure is essential, especially as regards infrastructure works financed directly through EU funds or financial instruments; calls on the Commission to provide for EU citizens to have full access to information on co-financed projects;	Consolidated reply points 27-41 [...] The Commission agrees with the Parliament on the importance of transparency in accounting for expenditure. Under shared management, the implementation of funds at project level is the responsibility of the Member States. Accordingly, information on co-financed projects is available at Member States' managing authority level. The current legal basis does not allow the Commission to publish aggregated data on EU-financed projects in an EU-wide platform. (...)		No further specific actions proposed/promised to be taken by the Commission.	
22)	40. Stresses the need for complete transparency in accounting for the transfers and loans provided for under the Recovery and Resilience Facility and calls on the Commission to provide for Parliament to have full access to information;	Consolidated reply points 27-41 [...] In the context of the Recovery and Resilience Facility (RRF), the beneficiaries and borrowers of EU funding are the Member States themselves. The RRF Regulation <sup>12</sup> requires that the Member States take all the appropriate measures to protect the financial interests of the Union and to ensure that the use of funds in relation to measures supported by the Facility complies with the applicable Union and national law, in particular regarding the prevention, detection and correction of fraud, corruption and conflicts of interests. To this effect, the Member States shall provide an effective and efficient internal control system and the recovery of amounts wrongly paid or incorrectly used. The Member States may rely on their regular national budget management systems. The RRF Regulation further requires that the Member States, for the purpose of		No further specific actions proposed/promised to be taken by the Commission.	

<sup>12</sup> OJL 57, 18.2.2021

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		audit and control collect and provide access to information on the use of funds, including the final recipients. OLAF, the European Court of Auditors and (where applicable) the European Public Prosecutors Office may exert their rights, including to request this information. The regulation does not plan a possibility for the data on final recipients to be accessed by the European Parliament.			
23)	41. Invites the Commission to step up its fraud prevention and detection work to ensure that EU money continues to reach the intended beneficiaries and brings effective and measurable benefits to citizens' lives;	Consolidated reply points 27-41 [...] The Commission has also undertaken to follow up on specific cases of alleged fraud with respect to the repurposing of vocational training centres and infrastructure financed with the support of cohesion funds and to keep the discharge authority informed [...].		No further specific actions proposed/promised to be taken by the Commission.	
24)	44. Reiterates its urgent call on the Commission to propose a legal basis in the Financial Regulation for the creation of an interoperable digital reporting and monitoring system to allow timely, uniform and standardised reporting by the Member States' authorities in the area of shared management [...]	Consolidated reply points 42-50 [...] In the context of the forthcoming alignment of the Financial Regulation to the rules for the Multiannual Financial Framework 2021-2027, the Commission is reflecting on possible measures to enhance the quality and interoperability of the data on recipients of EU funding with a view to further improving the protection of the EU's financial interests.		A proposal for a revision of the Financial Regulation is still pending.	
25)	45. Recalls that this system should not lead to the national authorities becoming too overlaid with bureaucracy or create data congestion; calls on the Commission to determine which indicators and data are truly relevant, necessary and proportionate for auditing and control purposes and achieving the intended programming goals, and to reduce the number of indicators and milestones that need to be entered into the system;	Consolidated reply points 42-50 The Commission takes note of the Parliament's reiterated call on the Commission to propose a legal basis in the Financial Regulation for the creation of an interoperable digital reporting and monitoring system. However, the Commission regrets that there is no legal basis for such a project as the requirements go beyond what is indicated in the Common Provisions		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Regulation<sup>13</sup> (CPR) as the set-up of such a system would require a level of standardisation of the data that cannot be imposed in the current legal framework.</p> <p>The Commission regrets that the co-legislators decided not to take forward the Commission's proposal to make mandatory the use of a single data-mining and risk-scoring tool such as ARACHNE in the next Multiannual Financial Framework (MFF) and NextGenerationEU (NGEU), but left it optional.<sup>14</sup> A number of Member States has however indicated their intention or committed to use ARACHNE, including for the RRF as the biggest programme under NGEU. The Commission continues to encourage the uptake of ARACHNE in all Member States. For the next programming period 2021-2027, the ARACHNE database will be updated. The Commission is working on future improvements on the information to be collected and the way such information is analysed and used for control and audit purposes by the Member States. Trainings or presentations continue to take place in various Member States [...].</p>			
26)	46. Notes that the early detection and exclusion system (EDES) established by Article 135 of the Financial Regulation should ensure effective sanctions on unreliable persons or entities by excluding them from the award and procurement procedures funded under the EU budget and imposing financial penalties; regrets the fact that the database lists only very few economic operators – six as of May 2021; calls on the Commission	<p>Consolidated reply points 42-50</p> <p>[...] As far as improvements to Early Detection and Exclusion System (EDES) are concerned, the Commission will examine, in the context of a forthcoming revision of the Financial Regulation and in light of the first 5 years of the functioning of the system, the possibility of extending its scope to shared</p>		A proposal for a revision of the Financial Regulation is still pending.

	to review the criteria with a view to reducing complexity and making EDES more applicable in practice;	management and, where possible, enhancing the procedure. [...]			
27)	47. Asks the Commission to consider extending EDES to apply to funds under shared management, with respect for the principles of proportionality and appropriateness, in its proposal for the revision of the Financial Regulation; Urges the Member States and the Commission to ensure greater interoperability of existing European and national databases and data-mining tools [...]	Consolidated reply points 42-50 As far as improvements to Early Detection and Exclusion System (EDES) are concerned, the Commission will examine, in the context of a forthcoming revision of the Financial Regulation and in light of the first 5 years of the functioning of the system, the possibility of extending its scope to shared management and, where possible, enhancing the procedure. (...) The Commission takes note of the Parliament's reiterated call on the Commission to propose a legal basis in the Financial Regulation for the creation of an interoperable digital reporting and monitoring system [...].		A proposal for a revision of the Financial Regulation is still pending.	
28)	49. [...] calls on the Commission to pay particular attention to framework agreements awarded through public procurement procedures, as the related fraud and corruption pose an increased risk to the Union's financial interests;	Consolidated reply points 42-50 Regarding the digital transformation, public procurement is undergoing. The Commission notes that the digitalisation of the pre-award and post-award phases as well as the integration of various data sources are beyond the scope of the EU public procurement rules. Nevertheless, the Commission emphasises the added value of comprehensive digitalisation and strives to promote it within Member States. Regarding the Parliament's concern about the risk of fraud and corruption in framework agreements awarded through public procurement procedures, the Commission reiterates what it stated above (under part III – Expenditure fraud) about persisting weaknesses in public procurement in Member States.		No further specific actions proposed/promised to be taken by the Commission.	
29)	50. [...] asks the Commission to carry out a systemic analysis to investigate how the new technologies are being used in the field of fraud detection and	No specific reply is provided to this particular point (systemic analysis to investigate how the new technologies are being used in the field of fraud		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	prevention, to assess their limitations, and to devise proposals on how to improve their use;	detection and prevention, to assess their limitations, and to devise proposals on how to improve their use).			
30)	52. Calls on the Commission to consider revising its new Anti-Fraud Strategy to fully reflect the operationalisation of the EPPO and its role in fighting fraud;	Consolidated reply points 51-53 The Commission welcomes the Parliament’s support for the Commission Anti-Fraud Strategy (CAFS). The Commission will reflect the operationalisation of the EPPO when preparing a future strategy and will consider the idea of involving the Member States and other relevant players in the anti-fraud architecture [...].		According to the current communication on the current <a href="#">2019 Commission Anti-Fraud Strategy</a> , the ‘next update of the CAFS is expected after the mid-term review of the MFF 2021 – 2027. In the meantime, the Action Plan will be reviewed and amended as appropriate’.	
31)	53. [...] calls on the Commission to assess the NAFSs that have been adopted, to examine why Member States are lagging behind in adopting them, and to push the remaining Member States to progress with adoption;	Consolidated reply points 51-53 [...] The Commission will continue promoting the adoption of National Anti-Fraud Strategies (NAFS) and supporting the Member States with guidance and shared know-how, even if they are not legally obliged to adopt a NAFS. The situation has improved in relation to 2019. 14 Member States have reported having a NAFS in place and 5 others are considering adopting or preparing a NAFS [...].		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">National Anti-Fraud Strategies (NAFS)</a> ).	
32)	62. Welcomes the appointment of Laura Codruța Kövesi as European Chief Prosecutor in 2019 and the launch of EPPO operations on 1 June 2021; regrets the fact that the date on which the EPPO was due to become operational had to be postponed several times owing to a lack of financial and human resources and severe delays in the appointment of European and delegated prosecutors in a few Member States; asks the Commission to increase the financial and staffing resources of the EPPO to enable it to tackle the challenges that will arise from the spending of the exceptionally large recovery fund;	Consolidated reply points 62-66 The Commission agrees with the Parliament that the EPPO needs adequate resources to perform its mandate. It wishes to underline that already in the Draft 2021 budget, the Commission had proposed to more than triple the EPPO budget and double the EPPO staff compared to what was envisaged in the Legislative Financial Statement of 2017. This major increase of budget and staff had the purpose to equip the EPPO with financial and human resources to start its operations. Therefore, the same level of resources compared to 2021 are proposed in the Draft budget for 2022 for the EU contribution of EUR 45.8 million and for		In October 2021, the Commission published an amending letter no 1 (AL 1/2022) to the draft budget for the year 2022 (DB 2022), which ‘proposes to adjust the EPPO budget and staff resources by 76 establishment plan posts (of which 62 AD and 14 AST posts), 13 Contract Agents and 29 Seconded National Experts. This reinforcement is proposed for a period of three years (2022-2024) so as to allow EPPO to deal with the backlog of cases in a reasonable timeframe. The Commission will therefore re-assess the staffing situation of the EPPO at the end of 2023’ [...] ‘To cover the additional staff	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		staff with 95 posts and 35 contract agents in the Central Office. When the EPPO will provide its reassessment of its budgetary and staff needs based on its initial workload experience, the Commission will be in a position to re-assess its requests and may propose a financial adjustment in the autumn amending letter to the Draft budget.		costs in 2022 and considering recruitment on average mid-year, the Commission proposes to increase appropriations by EUR 7,5 million as compared to DB 2022.'	
33)	63. [...] urges the Commission to strictly monitor the Member States that have not yet nominated their European delegated prosecutors or have not adapted their national legislation for the operationalisation of the EPPO, where necessary, by suspending their funding on the basis of Article 63(2) and (8) of the Financial Regulation and the sector-specific rules, and/or by launching infringement proceedings; notes, moreover, that by the end of 2019, 18 Member States had notified the Commission that they had incorporated the PIF Directive into national law;  Calls on the Commission to do its utmost to incentivise all Member States to join the EPPO [...]	Consolidated reply points 62-66  The Commission agrees with the Parliament that the EPPO will be an important factor in the fight against fraud and will continue to encourage non-participating Member States to join it. The Commission also recalls that all Member States, also those that do not participate in the EPPO, are obliged to protect the financial interests of the Union, and OLAF will continue playing an important role in this respect.  The Commission wants to clarify that the delay in the EPPO's start of operations was not due to the lack of financial and human resources, but to a number of delays in the setting up process, notably, as the Parliament acknowledges, in constituting the College of the EPPO and nominating the European Delegated Prosecutors (EDPs). The Commission also regrets, as the Parliament, that Slovenia has not yet nominated its EDPs. The Commission agrees with the Parliament on the importance of ensuring the independence of the European Prosecutors and the EDPs.		No further / specific actions proposed/promised to be taken by the Commission.	
34)	67. Welcomes the adoption of Directive (EU) 2019/1937 (the Whistleblower Directive), while noting that the deadline for transposition is 17 December 2021; calls on the Commission to closely monitor and assist the Member States, ensuring the complete, correct and	Consolidated reply 67-78  The Parliament welcomes the adoption of Directive 2019/1937 and calls on the Commission to monitor closely its transposition and implementation. The Commission has set up an informal expert group			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	timely transposition of the directive, and to start assessing the implementation by the Member States as soon as the deadline has passed;	composed of Member States' representatives, precisely with a view to ensuring a correct, timely and consistent transposition of the directive and to collecting information on its transposition and implementation. The group will also be a platform for sharing experiences and good practices with a view to maximising the effectiveness of the directive. The Commission will submit a report on the application and implementation of the directive to the Parliament and the Council by 17 December 2023. (...)		The deadline for the Commission to present a report on the application and implementation of the directive to the Parliament and the Council is 17 December 2023.	
35)	68. Highlights the importance of independent media and investigative journalists and reiterates the need to protect them; calls on the Commission to provide for serious legal protections akin to those provided for whistleblowers, and to develop comprehensive measures for the protection and financing of independent investigative journalism, including a rapid response mechanism for journalists in distress and effective legislation to combat strategic lawsuits against public participation (SLAPPs);	Consolidated reply 67-78 [...] The Commission also agrees on the importance of investigative journalism and on developing legal instruments to ensure its protection in the EU [...].		No further / specific actions proposed/promised to be taken by the Commission.	
36)	69. Stresses the importance of the progress made on the Commission's legislative and policy initiatives to prevent and fight corruption, as well as the regular monitoring and evaluation of the Member States' legal frameworks via the newly established Rule of Law Report; recalls however, while reiterating its regret that the Commission no longer deems it necessary to publish a specific anti-corruption report, that the newly established Rule of Law Report is highly descriptive; calls on the Commission to augment these reports by issuing recommendations on situations where deficiencies have been identified;	Consolidated reply 67-78 [...] The Commission welcomes the Parliament's acknowledgment on the progress made on the legislative and policy initiatives to prevent and fight corruption, including the establishment of the Rule of Law Mechanism and the publication of the Annual Rule of Law Report. The anti-corruption framework is one of the four pillars, which are covered by this report. The Commission works with the Member States' relevant authorities via a Network of Corruption Contact Points and a newly established Network of Rule of Law Contact Points. As relevant networks of corruption prevention authorities already exist at the European and global		No further / specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		level <sup>15</sup> , the Commission sees no need to establish an additional one.			
37)	72. Highlights that the connection between corruption and fraud in the EU may have a negative impact on the EU budget; calls on the Commission to consider establishing a network of corruption prevention authorities in the European Union;	Consolidated reply to points 67-78 [...] As relevant networks of corruption prevention authorities already exist at the European and global level <sup>16</sup> , the Commission sees no need to establish an additional one.		No further specific actions proposed/promised to be taken by the Commission.	
38)	77. Reiterates its call on the Commission to set up an internal corruption evaluation mechanism for the EU institutions;	Consolidated reply to points 67-78 Although the follow-up mentions par 77, no specific reply provided for this particular point (to set up an internal corruption evaluation mechanism for the EU institutions).		Not mentioned.	
39)	78. Is concerned about the Czech Chief Prosecutor General citing permanent pressure by the justice minister as reasons for his recent resignation; asks the Commission to look into vulnerabilities of the Czech judicial system and to carefully examine whether any other cases involving members of the Czech Government have been withdrawn or prematurely closed potentially following pressure or unjustified interference;  Calls on the Commission to also conduct such an analysis for all the other Member States and to keep Parliament informed about its findings and conclusions;	Consolidated reply to points 67-78 Although the follow-up mentions par 77, no specific reply provided for this particular point (to look into vulnerabilities of the Czech judicial system and to carefully examine whether any other cases involving members of the Czech Government have been withdrawn or prematurely closed potentially following pressure or unjustified interference).		Not mentioned.	

<sup>15</sup> Examples of these networks are the European contact-point network against corruption (EACN), the European Partners against Corruption (EPAC), and the Network of Corruption Prevention Agencies as well as the Network of Corruption Prevention Agencies (NCPA) established in October 2018.

<sup>16</sup> Examples of these networks are the European contact-point network against corruption (EACN), the European Partners against Corruption (EPAC), and the Network of Corruption Prevention Agencies as well as the Network of Corruption Prevention Agencies (NCPA) established in October 2018.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
40)	79. Reiterates its call on the Commission to establish a digital and interoperable uniform system for the collection of comparable data on irregularities and cases of fraud from the Member States in order to standardise the reporting process and ensure the quality and comparability of the data provided; underlines the importance of harmonising definitions to obtain comparative data across the EU;		Consolidated reply to points 79-93  Regarding the creation of an interoperable digital reporting and monitoring system, the Commission regrets that there is no legal basis for such a project as the requirements go beyond what is envisaged in the EU regulations: the set-up of such a system would require a level of standardisation of the data that cannot be imposed in the current legal framework. The Commission regrets that the co-legislators decided not to agree to the Commission's proposal to make mandatory the use of a single data-mining and risk-scoring tool (such as ARACHNE) in the next MFF and NGEU, but left it optional.		No further specific actions proposed/promised to be taken by the Commission.	
41)	80. Calls on the Commission to ensure the full transparency and quality of data reported by Member States in the irregularity management system; urges the Member States to report complete data in a timely manner;  Calls on the Commission and the Member States to link the irregularity management system with EDES and Arachne and to provide access to it for all Member States and the Commission;		Consolidated reply to points 79-93  As regards checks on quality of data reported via the Irregularity Management System (IMS), given the current level of human resources available, the Commission cannot carry out comprehensive checks but only ad hoc ones. Nonetheless, the checks it is able to carry out are continuously refined and improved for instance monitoring the reporting of irregularities detected during Commission's audits or monitoring information published by the media on cases of suspected fraud.  The Commission confirms that an interface between the Irregularity Management System and Early Detection and Exclusion System (EDES) already exists, as IMS can be consulted through the EDES database.  The Commission will continue to encourage the uptake of ARACHNE in all Member States for the next programming period 2021-2027 and the ARACHNE database will be updated. The Commission is working on future improvements on the information to be		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (interface between the Irregularity Management System and Early Detection and Exclusion System).

		collected by the Member States on beneficiaries of certain funds, including information on beneficial owners of the beneficiaries/ recipients, and the way such information is analysed and used for control and audit purposes by the Member States and for supervision by the Commission [...].			
42)	82.Emphasises that EDES, as the EU’s blacklist, has huge potential for flagging people and companies that misuse EU funds; notes, in addition, the judgment of the General Court of 13 May 2020 in Case T-290/18 (Agmin Italy SpA v Commission), wherein the Court of Justice confirmed the validity of the respective roles of the panel and the authorising officers and found that the adversarial procedure led by the panel had fully respected the right of the entity concerned to be heard; invites the Commission to include the extension of EDES to funds under shared management in its proposal for the revision of the Financial Regulation;  Asks the Commission to equip this system with the necessary financial and staffing resources to enable it to operate on a full time basis;	Consolidated reply to points 79-93  [...] The Commission confirms that an interface between the Irregularity Management System and Early Detection and Exclusion System (EDES) already exists, as IMS can be consulted through the EDES database.  The Commission agrees with the Parliament on the possibility to extend EDES to shared management and confirms that this is being considered in the context of the preparation of the forthcoming alignment of the Financial Regulation to the rules for the Multiannual Financial Framework 2021-2027. The Commission is also reflecting on possible measures to enhance the quality and interoperability of the data on recipients of EU funding.		A proposal for a revision of the Financial Regulation is still pending.	
43)	83. Deplores the fact that there are more than 290 monitoring and reporting systems for the CAP and cohesion funds, which makes it impossible to verify the final beneficiaries of those funds and prevent and investigate fraud and corruption effectively; calls on the Commission and the Member States to establish a harmonised or unified reporting system with timely and accurate data in order to remedy this situation;	Consolidated reply to points 79-93  Regarding the creation of an interoperable digital reporting and monitoring system, the Commission regrets that there is no legal basis for such a project as the requirements go beyond what is envisaged in the EU regulations: the set-up of such a system would require a level of standardisation of the data that cannot be imposed in the current legal framework. The Commission regrets that the co-legislators decided not to agree to the Commission’s proposal to make		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		mandatory the use of a single data-mining and risk-scoring tool (such as ARACHNE) in the next MFF and NGEU, but left it optional. (...)			
44)	86. Highlights the importance of structured information exchange among the competent authorities for cross-checking accounting records relating to transactions between two or more Member States in order to prevent cross-border fraud arising from the structural and investment funds; reiterates its request to the Commission to include in its work programme a legislative proposal for a horizontal regulation on mutual administrative assistance in the area of EU expenditure [...]	Although the follow-up mentions par 79-93, no specific reply provided for this particular point ( legislative proposal for a horizontal regulation on mutual administrative assistance in the area of EU expenditure).		Not mentioned.	
45)	87. Regrets the fact that only 13 Member States used Arachne when carrying out their risk analyses; reiterates the importance of this tool and the interoperability of IT systems and databases for the purposes of risk analysis and detection of fraud; reiterates its call on the Commission and the Member States in the Council in particular to move towards Parliament's position of making the use of Arachne mandatory [...]	Consolidated reply to points 79-93 [...] The Commission regrets that the co-legislators decided not to agree to the Commission's proposal to make mandatory the use of a single data-mining and risk-scoring tool (such as ARACHNE) in the next MFF and NGEU, but left it optional. (...)The Commission will continue to encourage the uptake of ARACHNE in all Member States for the next programming period 2021-2027 and the ARACHNE database will be updated. The Commission is working on future improvements on the information to be collected by the Member States on beneficiaries of certain funds, including information on beneficial owners of the beneficiaries/ recipients, and the way such information is analysed and used for control and audit purposes by the Member States and for supervision by the Commission [...].		It is unclear to what extent the Commission kept its promise to work 'to encourage the uptake of ARACHNE in all Member States.'	
46)	88. Notes that 16 Member States have strengthened risk analysis to detect fraud and irregularities through the use of IT tools; calls on the Commission to facilitate	Consolidated reply to points 79-93 [...] The Commission has set up an informal expert group composed of Member States' representatives, precisely with a view to ensuring a correct, timely and consistent			

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	exchanges of good practices between these countries and Member States with no experience;		transposition of the directive and to collecting information on its transposition and implementation. The group will also be a platform for sharing experiences and good practices with a view to maximising the effectiveness of the directive. The Commission will submit a report on the application and implementation of the directive to the Parliament and the Council by 17 December 2023 [...].		The deadline for the Commission to present a report on the application and implementation of the directive to the Parliament and the Council is 17 December 2023.	
47)	89. Notes with concern that no information is provided in the PIF Report on the analysis of cases of conflicts of interest, despite the relevance of the new provision adopted in the Financial Regulation in 2018 and the acknowledged importance and impact of this phenomenon; calls on the Commission to fill this gap in its next PIF Report and to devote more attention to fraud relating to public procurement;		Consolidated reply to points 79-93 [...] The Commission draws the Parliament's attention to the fact that the available information on conflict of interest irregularities is provided in the enclosed document to the PIF Report called "statistical evaluation of irregularities reported by Member States" [...].		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (information on conflict of interest irregularities).	
48)	91. Invites the Commission to explore new avenues for the PIF Report to be shared and analysed alongside other sources of information and annual reports such as the Rule of Law Report, including through enhanced dialogue between Europol, Eurojust and the EPPO in order to help identify trends in fraudulent and non-fraudulent irregularities, detect weaknesses and provide useful lessons learnt to improve the adoption of fraud-proofing measures by all stakeholders;		Although the follow-up mentions par 79-93, no specific reply provided for this particular point (explore new avenues for the PIF Report to be shared and analysed alongside other sources of information and annual reports).		No further specific actions proposed/promised to be taken by the Commission.	
49)	92. [...] calls on the Commission to develop specific and regular mechanisms to effectively prevent and combat fraud with EU funds in these states;		Consolidated reply to points 79-93 [...] The Commission welcomes the Parliament's acknowledgment of its awareness-raising activities on the fight against fraud in non-EU countries. Together with OLAF, it will continue engaging with Eastern Partnership countries as well as with candidate countries and potential candidates, notably with		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>authorities mandated to fight against fraud. Specific and regular mechanisms to prevent and combat fraud with EU funds are already in place. These measures include gradual alignment of national legislation to relevant EU legislation in fighting fraud and the adoption of anti-fraud strategies as part of the enlargement process as well as the launch of fraud prevention and awareness campaigns and capacity building of anti-fraud related structures in other partner countries [...]</p>		<p>request (specific and regular mechanisms to prevent and combat fraud with EU funds).</p>	
50)	<p>93. Regrets the fact that Parliament repeatedly has to address several recommendations without receiving any clear response from the Commission; notes with regret that on some observations and recommendations, the Commission has not taken any tangible action or measures; asks the Commission to provide Parliament with a clear explanation whenever it decides not to follow one of its recommendations;</p>	<p>Consolidated reply to points 79-93 [...] Finally, the Commission does not agree with the Parliament that it does not provide a clear response to its recommendations. The Commission always replies to the Parliament's requests in line with the Commission's obligation to report to the Parliament on its activities on a regular basis, including through the discharge procedure.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission.</p>	

4.1.9.5. CONT Resolution 5: EP resolution of 20 October 2021 on effectiveness of Member States' use of EU Solidarity Fund money in cases of natural disasters

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Effectiveness of Member States' use of EU Solidarity Fund money in cases of natural disasters</b>	20/10/2021 <a href="#">T9-0429/2021</a> <a href="#">2020/2127(INI)</a> CONT	N.A. <sup>17</sup>			
1)	10. Highlights the important role of disaster risk prevention and management in the EU; invites the Commission to facilitate the establishment of a coordinated plan for accurate and rapid damage assessment; calls on each beneficiary country to detail in their implementation reports the preventive measures they have taken or are planning to take, including how they will use Union structural funds to limit future damage and avoid, as far as possible, a recurrence of similar natural disasters; emphasises that future challenges, either concerning climate change or public health emergencies, primarily require a preventive policy; notes that the EUSF is curative in nature; recalls, therefore, the need for effective synergies with other Union policies and programmes, in particular the cohesion policy funds, the Union Civil Protection Mechanism, the European Green Deal and Union policies and programmes supporting disaster prevention and risk management; calls for a revision of the EUSF to ensure that the 'build back better' principle is enshrined within it;				
2)	12. Highlights the need for hands-on support from the Commission to Member States, in particular for damage				

<sup>17</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	estimation and encourages the Commission to ensure the dissemination of good practices with regard to governance and the use of institutional coordination structures in disaster situations; emphasises that, in cases of severe earthquakes or massive floods, the mitigation of the consequences can take more time than for other natural disasters; considers that this should be reflected in any future revision of the EUSF, specifically in terms of allowing for sufficient absorption time beyond the current application deadlines;				
3)	13. Notes with regret that the quality of applications for funding varies and that this can prolong the mobilisation process; notes that the estimation of damage is often the most difficult component in this regard, due to challenges in data collection, overlap and duplication, and development of aggregated data in line with the Commission's requirements; calls on the Commission to introduce requirements that are as simple and straightforward as possible, while still maintaining the necessary level of detail; calls on the Commission to develop a common tool or system to strengthen the beneficiaries' capacity to follow standardised approaches for disaster loss data quantification and loss data collection systems, thereby reducing the administrative burden and simplifying the application procedure as much as possible;				
4)	15. Highlights that data collection for applications to the EUSF for public health crises is a novelty for countries, and may therefore prove particularly challenging; calls on the Commission to pay special attention to this matter and to support countries in all possible ways, including through the provision of technical support;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>20. Calls again on the Commission to consider more reactive solutions, and in particular to continue its work on the guidance for the EUSF's simplified use in order to facilitate the actions of national, regional and local authorities and to continue its work to simplify and speed up the application procedure for Member States, for example by paying particular attention to simplifying applications for activation of the EUSF across several regions in the context of cross-border disasters, so as to ensure a swifter response to the intensification of major and regional natural disasters and major public health emergencies;</p> <p>Urges the Commission to establish a mechanism by which financial support is provided to a Member State in an emergency, regardless of whether the annual budget of the EUSF has been spent;</p>				
6)	<p>21. Observes with regret that the translation of documents or other specific technical challenges can cause substantial delays at different stages of EUSF interventions; calls on the Commission to put in place the means necessary to process translations of documents that are submitted by disaster-struck states more quickly and thus prevent any delay in EUSF interventions;</p>				
7)	<p>22. [...] calls on the Commission to exhaust all possible avenues to accelerate the mobilisation of the EUSF under the new MFF arrangements, particularly for less developed regions;</p>				
8)	<p>26. Notes that the EUSF is implemented by the designated authorities in the recipient countries under the principle of shared management; notes that the Commission's powers in influencing which projects receive funding are therefore limited; reminds the Commission of Parliament's resolution of</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	1 December 2016, in which it stressed the importance of determining whether EUSF subsidies have been used in compliance with the principles of sound financial management and called on the Commission and the Member States to improve transparency and to guarantee public access to information throughout the assistance mobilisation process; calls on the Commission to pay special attention to cases of potential misuse of EUSF funds under shared management and to introduce steps to improve transparency and monitor and prevent such potential misuse;				
9)	27. Notes with regret the delayed closure of some interventions; is concerned that in some cases, national authorities required extended periods to provide answers to audit questions or did not reply to repeated requests for audit information; recognises the importance of timely closure; calls on the Commission to report to Parliament on closure;				
10)	29. [...] insists that the Commission provide all available information in line with Article 4 of the EUSF Regulation;				
11)	34. Calls on the Commission to identify the regions that are more prone to specific or recurrent natural disasters and to propose an action plan on risk mitigation and targeted anticipatory activities; calls, moreover, on the Commission to propose a revision of the EUSF in order to establish a more targeted, effective and timely rapid response mechanism in areas and regions prone to specific or recurrent natural disasters;				

4.1.9.6. CONT Resolution 6: EP resolution of 15 December 2021 on the impact of organised crime on own resources of the EU and on the misuse of EU funds

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>The impact of organised crime on own resources of the EU and on the misuse of EU funds</b>	15/12/2021 <a href="#">T9-0501/2021</a> <a href="#">2020/2221(INI)</a> CONT	N.A. <sup>18</sup>					
1)	7. [...] calls on the Commission and the Member States to cooperate in creating such a centralised database in line with the rulings of the European Court of Justice; [...]						
2)	10. Calls on the Commission to raise the Member States' awareness of organised criminals engaging in tax evasion, corruption and illegal practices (such as 'pocket contracts') in connection with land transactions, and to support them in combating such crime;						
3)	16. Urges the Commission to propose a centralised Union-wide complaints mechanism to support those individuals having to deal with unfair land-grabbing practices and intimidation by criminal organisations, by giving them the opportunity to lodge a complaint swiftly with the Commission;						
4)	20. Is concerned by the assessment of the PIF Report, which found that seven Member States detected fraud in relation to health infrastructure in 2019 and that health infrastructure was particularly affected by violations of public procurement rules; points out that the dependence on emergency procurement procedures in response to the COVID-19 crisis may have aggravated these problems; highlights that emergency procedures						

<sup>18</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	must respect the same standards of transparency and accountability as regular procedures; calls on the Commission and Member State authorities to complement these procedures through the use of risk mitigation tools, focusing on prevention, as well as through comprehensive ex post controls and scrutiny;				
5)	24. [...] calls on the Commission to coordinate and collaborate with Member State authorities in order to carry out a comprehensive EU-wide assessment into the actual size, nature and causes of fraud, involving the relevant EU agencies and collaborating with partners from the EU's neighbouring countries;				
6)	30. [...] and urges the Commission to closely monitor Member States' compliance, as proper transposition is of vital importance in enabling the EPPO to conduct effective investigations and prosecutions; urges the Commission to take all necessary steps to ensure correct and comprehensive transposition, including the possibility of infringement procedures;				
7)	31. [...] calls on the Commission, in the meantime, to step up its oversight of those Member States' regrets the lack of nominations of European delegated prosecutors, in particular by Slovenia, and considerable delays in many other Member States [...]				
8)	32. Highlights the need to better tackle environmental crimes with a cross-border dimension and which affect biodiversity and natural resources, such as the illegal trade in plants and animals, illegal logging and timber trafficking, and illegal waste trafficking; calls on the Commission to initiate the extension of the EPPO's mandate in order to cover cross-border environmental crimes;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	33. [...] strongly calls on the Commission to increase the budget and qualified staff available to the EPPO so that it can achieve its full potential in the fight against crime;				
10)	37. [...] calls on the Commission to present concrete measures to address the current issues before the AMLA becomes fully operational;				
11)	40. [...] calls on the Commission to make use of its prerogatives and take the necessary measures for ensuring the timely and correct implementation of EU legislation;				
12)	41. [...] calls, therefore, on the Commission to take more resolute action with a view to making it mandatory for the Member States to lay down rules to prevent fraud against the EU;				
13)	42. Calls on the Commission to develop a common approach for assessing the impact of organised crime on EU funds and evaluate the effectiveness of measures taken to tackle the problem across Member States [...]				
14)	44. Calls on the Member States and the Commission to consider a more coherent use of all the available tools to detect and tackle fraud, in particular the Arachne IT platform and EDES; emphasises that the interoperability of Arachne, EDES and institutional and national databases is crucial for ensuring the effective exchange of information exchange aiming to prevent and identify fraud against the EU budget; expresses its regret that Arachne and EDES are currently limited in their scope and in the awareness and use thereof by Member States; highlights, in this regard, that EDES covers directly and indirectly managed funds but not funds under shared management, even though the latter represent roughly 80 % of EU expenditure; calls on the Commission to extend the application of EDES to these funds; reiterates				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	its call on the Commission and, in particular, on the Member States in the Council, to make the use of Arachne compulsory; calls on the Commission to reassess the framework for data exchange across EU institutions and with the Member States, in order to maximise the degree of effective information exchange, while at the same time respecting data protection requirements;				
15)	45. Calls on the Commission to support Member States by providing training to national authorities to equip them with adequate knowledge for using tools such as EDES and Arachne in the most effective manner possible and in accordance with EU reporting standards; calls on the Commission, in cooperation with the Member States, to analyse difficulties that national authorities encounter when using EDES and Arachne and to issue specific recommendations and improve the existing general guidelines and the user-friendliness of these tools; expresses its regret that some Member States oppose using these tools for fear of increased bureaucratic burden; highlights that when properly integrated, these tools can in fact reduce bureaucracy; calls on the Member States to reconsider their position on this matter and on the Commission to further engage in promoting the advantages of EDES and Arachne to the Member States; calls for the introduction of anti-money laundering training schemes allowing authorities to detect the risk of potential fraud before funds are disbursed, in particular in the area of 'know your client' and the undisclosed involvement of politically exposed persons in CAP subsidies, projects and grants;				
16)	47. [...] calls on OLAF and the Commission to investigate the underlying reasons and on the Member States to fulfil their legal obligation to recover the funds and to cooperate closely with the Union's bodies to ensure that				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>funds misused by organised crime are effectively recovered, as a devastating 98 % of estimated criminal proceeds are not confiscated and remain at the disposal of criminals; calls on OLAF to collect information on the rate of recovery following its financial recommendations and to publish this information in its annual reports; takes the view that decisive action to recover funds, including through preventive or value-based seizures, can deter criminal organisations from committing fraud against the EU, thereby protecting its financial interests; calls on the Member States to increase the confiscation rate of funds associated with fraud, with more emphasis on preventative measures; invites the Commission to assess the possibility of complementing the current fragmented approach towards asset recovery through an EU-wide body in charge of ensuring the timely and effective recovery of EU funds;</p>				

#### 4.1.9.7. CONT Resolution 7: EP resolution of 15 December 2021 on avoiding corruption, irregular spending and misuse of EU and national funds in case of emergency funds and crisis-related spending areas

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Avoiding corruption, irregular spending and misuse of EU and national funds in case of emergency funds and crisis-related spending areas</b>	15/12/2021 <a href="#">T9-0502/2021</a> <a href="#">2020/2222(INI)</a> <b>CONT</b>	N.A. <sup>19</sup>					
1)	2. Calls on the Commission and the Member States to include in their respective anti-corruption strategies targeted measures dedicated to spending public money in times of crisis [...]						
2)	11. Underlines that citizen participation in public decision-making is key to a successful response in emergency situations; urges the Member States to develop comprehensive crisis management plans in order to prepare for similar situations in the future and to include safeguards for civil society's role as public watchdog; recalls that public access to documents in a machine-readable format is a key component in ensuring transparency and scrutiny of public spending; calls on the Commission to provide the right platforms for engagement and recalls the current possibilities to report alleged cases of fraud to the European Public Prosecutor's Office (EPPO) and the European Anti-Fraud Office (OLAF);						
3)	13. [...] calls on the Commission and the Member States to reinforce and implement effective anti-corruption policies;						

<sup>19</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	17. Recalls that the scoreboard will serve as a basis for the recovery and resilience dialogue and that the Commission should update it biannually; calls on the Commission, in this regard, to ensure that the progress achieved in the implementation of the milestones and targets set out is monitored thoroughly and strictly in line with the Recovery and Resilience Facility (RRF) Regulation, on the basis of the established common indicators and reporting methodology; recalls moreover that the RRF is bound by conditions that guarantee the transparent use of the money disbursed and that should prevent corruption or fraud, double funding or conflicts of interest, and believes that controls should be extended also to costs actually incurred by the final beneficiaries; welcomes the fact that, thanks to the European Parliament, Member States are now obliged to provide information on final recipients;				
5)	20. Calls on the Commission to thoroughly monitor the potential risks to the EU's financial interests and not to proceed with any payments if the milestones linked to measures to prevent, detect and correct corruption and fraud are not met; calls, moreover, on the Commission to immediately inform the budgetary authorities about all situations where funds are not paid out due to allegations of misuse, corruption, fraud or breaches of rule of law, and where Member States do not have sufficient anti-fraud systems in place;				
6)	23. Is of the opinion that more transparency, coupled with technology and data science, is instrumental in preventing and reducing corruption; calls on the Commission and the Member States, in this regard, to make full use of the available tools, such as the Early Detection and Exclusion System (EDES), Arachne and the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Irregularities Management System (IMS) to effectively and efficiently identify the problematic economic operators and the private individuals (or natural persons) linked to them in both direct and indirect management;				
7)	24. Highlights the added benefits that information sharing can bring to fighting corruption; urges the Commission and the Member States to make sure that this is done through a digital, interoperable and standardised system for data collection, and encourages Member States to exchange information both among themselves and with the relevant EU bodies (in particular the European Court of Auditors (ECA), OLAF, the EPPO and Europol) to cooperate more closely, especially in crisis situations, with a view to improving data collection, enhancing the effectiveness of controls and securing the recovery of misused funds;				
8)	27. Insists on the need to strengthen EDES and its scope in the context of a forthcoming targeted revision of the Financial Regulation; calls on the Commission to extend the scope of EDES to funds under shared management, with due respect for the principles of proportionality and appropriateness;				
9)	29. Calls on the Commission to evaluate the response to the COVID-19 pandemic on several fronts, including as regards preventive anti-corruption measures, analysis of empirical evidence and the rate of payment claims absorption, to look at whether corruption affected the outcome and whether integrity was upheld or undermined, and to report back to Parliament on the main findings to allow it (as the discharge authority) to include a dedicated chapter on emergency funds and crises-related spending in the 2020 discharge;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	30. Regrets the fact that the Commission makes extensive use of the redaction tool to cover parts of the APA contracts; insists, notwithstanding the sensitivity of the information, that such details are important in improving accountability and the global response to the virus; calls on the Commission to better address transparency and accountability aspects in response to future crises, thereby contributing to enhancing public trust, fuelling public debate and promoting EU values [...]				
11)	34. Acknowledges that the Joint Procurement Agreement <sup>20</sup> allows the Member States and EEA and other countries to jointly negotiate better terms for supplying medical equipment; calls on the Commission to assess, with a view to establishing good practices for future crises, the efficiency and effectiveness of the Joint Procurement Agreement and the rescEU stockpiling of medical equipment; urges the Commission, moreover, to put in place a solid and transparent EU public procurement framework, when funds from the EU budget are fully or partially involved, that would allow for comprehensive scrutiny by Parliament, especially concerning major economic, security or health crisis-related spending areas;				
12)	35. Urges the Commission to propose a review of the Financial Regulation to include a solid legal basis for the mandatory use of open and standardised public procurement data, and to make budgetary control IT systems mandatory, public and interoperable with national databases;				

<sup>20</sup> [https://ec.europa.eu/health/security/preparedness\\_response\\_en](https://ec.europa.eu/health/security/preparedness_response_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	36. Calls on the Commission and the Member States to work together towards the adoption of robust National Anti-Fraud Strategies (NAFS), that offer the benefit of coordinating the actions of several entities and guaranteeing optimisation of resources and coverage of all the areas of interest (expenditures under indirect and shared management, national funds [...])				
14)	37. Urges the Member States to harmonise and align their standards and calls on the Commission to initiate infringement procedures against Member States refusing to do so; calls on the Commission to support Member States to improve their strategies to ensure the existence of robust NAFS throughout the Union;				
15)	43. Calls for increased effective international cooperation on taking of evidence, mutual recognition, service of documents, and confiscation and freezing of assets, with a view to giving the competent authorities the means to trace, freeze, manage and confiscate the proceeds of crime; calls on the Commission, therefore, to support and promote the Union-wide harmonisation of definitions of corruption offenses and to make better use of the existing data sets and methodology to develop new ones in order to obtain comparative data from across the EU on the treatment of corruption cases;				
16)	47. [...] calls on the Commission and the Member States to make a decisive investment and a strong political commitment to meet these new challenges;				
17)	48. Is of the opinion that advances in the field of AI present a major opportunity for the public sector to detect and prevent fraud, for instance by strengthening				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the Commission's central analytical capacity, as IT tools can easily scrape, link and analyse the necessary data and detect potential irregularities, fraud and corruption; calls on the Commission and the Member States to put into use a single integrated, interoperable information and monitoring system, including a single data-mining and risk-scoring tool to access and analyse the relevant data and increase control reliability, with a view to a generalised application, including with the help of the Technical Support Instrument;</p>				

#### 4.1.10. CULT

Between July 2019 and December 2021, the **Committee on Culture and Education (CULT)** was responsible for eight 'ordinary' own-initiative reports (INI) and no legislative own-initiative report (INL) leading to the adoption of eight Parliament's resolutions ('CULT resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

Table 15: Overview on CULT resolutions and its follow-up (July 2019 and December 2021)

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent four written replies to the Parliament’s eight CULT resolutions. In four cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to four CULT resolutions. Nevertheless, the Commission was still in the deadline to respond formally to two of these resolutions. In total, the Commission submitted three specific replies and one mixed reply. At the cut-off date of this study, the Commission had not yet replied to 88 of Parliament’s 189 requests.

### Analysis of the Commission actions

The Commission proposed/promised 38 genuine actions. In 60 cases, no further specific actions were proposed/promised to be taken by the Commission and in six cases it remained unclear if an action was carried out. In four cases, due to the lack of reply to the Parliament’s request, no action was mentioned.

Among the 38 actions proposed/promised by the Commission, the Commission already carried out the action in 12 cases. In the 26 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.10.1. CULT Resolution 1: EP resolution of 15 September 2020 on effective measures to 'green' Erasmus+, Creative Europe and the European Solidarity Corps

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Effective measures to 'green' Erasmus+, Creative Europe and the European Solidarity Corps</b>	15/09/2020 <a href="#">T9-0211/2020</a> <a href="#">2019/2195(INI)</a> CULT	<a href="#">SP(2020)597</a>	Final reply (SP) received 11 February 2021	Mixed reply			
1)	3. Highlights the importance of the three programmes in promoting cooperation and innovation in European education, culture and youth policy and the positive social and economic impact of mobility [...] calls on the Commission and national agencies and desks to show maximum flexibility and to provide support to participants and project developers so as to enable them to resume their activities post-pandemic in a sustainable way;	<p>In relation to the call on the Commission, the national agencies and the Creative Europe desks to provide support to participants so that they can resume their activities after the pandemic in a sustainable way (paragraph 3), the Commission is applying maximum flexibility to the management of programmes by allowing ongoing project beneficiaries to adapt their activities to the new circumstances without financial penalties, including the possibility to use alternative digital solutions to replace physical activities, such as a mix of virtual and physical mobility and virtual meetings. Programmes under Erasmus+, Creative Europe, and the European Solidarity Corps should be made accessible and should ensure the increase of cultural and educational participation across the Union, in particular with regard to persons with disabilities and persons from marginalized backgrounds.</p> <p>The Erasmus+ programme will support two additional formats of Strategic Partnerships to respond to the educational challenges resulting from the COVID-19 pandemic. The first call aims at equipping education and training systems to face the challenges presented by the sudden shift to online and distance learning, including supporting teachers to develop digital competences. The second call aims to enhance skills development and competences that reinforce creativity, as well as to boost</p>				<p>The <a href="#">corrigendum to the 2020 Erasmus+ programme guide</a> was published on 25 August 2020. It introduced changes related to new decentralised calls for strategic partnerships in response to COVID 19. <a href="#">Two new calls</a> were launched. They each provide €100 million to respond to the educational challenges resulting from the COVID-19 pandemic.</p> <ol style="list-style-type: none"> <li>1. A call on 'Digital education readiness'</li> <li>2. A call on 'Partnerships for creativity'</li> </ol>

		quality, innovation and recognition of youth work that support the creative potential of youth, thus contributing to the recovery resilience of the cultural and creative sectors.			
2)	4. Stresses the need for a baseline assessment of the programmes' contribution to and impact on environmental and climate goals to inform the design of their future implementation; deplors the Commission's failure to propose environmental, climate and sustainability indicators for the new programmes, calls, therefore, on the Commission to propose specific indicators to the co-legislators that are to be incorporated into the regulations governing the new generation of programmes;	Concerning the call on the Commission to propose environmental, climate and sustainability indicators for the new generation of programmes, the Commission recalls that indicators have been proposed to the co-legislators. Once established, regular reporting on these indicators will be ensured.		Indicators are included in <a href="#">Annex II</a> of Regulation (EU) 2021/817 of the European Parliament and of the Council of 20 May 2021 establishing Erasmus+: the Union Programme for education and training, youth and sport and repealing Regulation (EU) No 1288/2013.	
3)	5. Calls on the Commission to record and calculate systematically participants' individual transport-related carbon footprint; takes the view that the MobilityTool should be used for this purpose and that use of the Tool should be extended to cover all parts of Erasmus+ and the ESC;  [...] calls on the Commission to analyse the possibility of making a similar calculation tool	Regarding the call on the Commission to record and calculate participants' individual transport-related carbon footprints and to make relevant data easily accessible to the public, the Commission is planning to register in its IT tools for Erasmus+ and the European Solidarity Corps the main means of transport used by participants and the distance travelled. This will allow calculating individual transport-related carbon footprints and monitoring the evolution over the years. The Commission will analyse how best to make relevant results accessible to the public. In addition, the Commission will analyse the possibility of making a similar calculation tool available for journeys undertaken under the Creative Europe programme.		In the <a href="#">Erasmus+ programme guide</a> the Commission established a top-up amount for green travel support in different key actions. Individuals who choose to take transport methods considered to be more sustainable can receive more grant money for their travels and up to 4 days of additional travel days. See for more information on the <a href="#">distance calculator</a> . Similar conditions for the European Solidarity Corps as explained in the <a href="#">programme guide</a> .  The new <a href="#">Creative Europe MEDIA programme</a> supports a "greening priority" in the practice of the calls. In several schemes, applicants will be encouraged to submit sustainability strategies. This is not mandatory,	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	available for journeys undertaken in connection with the Creative Europe programme;			but will be recognised in award criteria if evidence is presented of commitment to green solutions. MEDIA thus introduces <a href="#">financial incentives for green practices</a> , including reduction of air travel as well as strengthening green skills and green innovation.  The objective is to agree on common tools and standards for 'green media' applicable to all Member States. The goal is to set up a common carbon calculator to ensure a decrease in CO2 emissions.	
	[...] urges the Commission to make any relevant data collected easily accessible to the public, in addition to its reports on the programmes, highlighting good practices;			Because of a general character of the promise, it is unclear whether this particular point has been addressed.	
4)	6. [...] calls on the Commission to work with stakeholders to develop and circulate a list of recommendations based on the analysis of good practices;	<u>Consolidated reply:</u> As for the call on the Commission to work with stakeholders in order to develop a list of recommendations based on the analysis of good practices, to improve communication and to set up a SALTO (Support, Advanced Learning and Training Opportunities) platform for greening, the Commission is considering to set up a support network with the national agencies to this effect. This network would gather and share good practices, build capacity for green practices within national agencies and elaborate 'eco-tips' for participants and organisations with a view to making their mobility and activities more sustainable. The Commission is also exploring the possibility of introducing an eco-label to give visibility to projects meeting certain sustainability standards.		A <a href="#">structured cooperation forum</a> will be set up with the industry and subnational film/audiovisual funds with the objective of sharing best practices and agreeing on common tools and standards for 'green media' applicable to all Member States.  <a href="#">Strategic EU ecolabel work plan 2020 -2024</a> <a href="#">SALTO</a> training programmes for Erasmus project coordinators.	
5)	7. [...] calls on the Commission, national agencies and desks to improve communication in this	<u>Consolidated reply:</u>		Due to a general character of the promise, it is unclear whether this particular point has been addressed.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	regard and give more visibility to environment issues in the project setting and among receiving organisations and participants;	As for the call on the Commission to work with stakeholders in order to develop a list of recommendations based on the analysis of good practices, to improve communication and to set up a SALTO (Support, Advanced Learning and Training Opportunities) platform for greening, the Commission is considering to set up a support network with the national agencies to this effect. This network would gather and share good practices, build capacity for green practices within national agencies and elaborate 'eco-tips' for participants and organisations with a view to making their mobility and activities more sustainable. The Commission is also exploring the possibility of introducing an eco-label to give visibility to projects meeting certain sustainability standards.			
6)	10. Calls on the Commission to encourage national agencies, national desks and project developers to register with the EU Eco-Management and Audit Scheme (EMAS) in order to evaluate, communicate and improve their environmental performance and enhance the sustainability of their own operations; [...] calls on the Commission to encourage and coordinate the efforts made by national agencies and desks to reduce their environmental footprint, for example through the use of sustainable promotional material, prudent management of travel, increased use of video-conferencing and waste reduction (point 10);	In relation to the call on the Commission to encourage national agencies, Creative Europe desks and project developers to register with the EU Eco-Management and Audit Scheme (EMAS) <sup>7</sup> and to coordinate their efforts to reduce their environmental footprint, the Commission will foster the adoption of sustainable practices in the daily work of the national agencies and Creative Europe desks. Public recommendations provided by EMAS can be shared and practical examples offered when organising events and activities. The Commission has started this process earlier this year, with the organisation of a workshop for stakeholders and national agencies, in cooperation with EMAS, on how to organise more sustainable events.		<a href="#">Official statistics of EU eco-management and audit scheme</a> , June 2021.  <a href="#">EMAS and the education sector</a> , 2021.	
7)	11. 	[...] calls on the Commission and the Member States to put in place effective financial assistance schemes to ensure that people who need the programmes can have access to them;	No particular information provided on this point (on financial assistance schemes).		Not mentioned.	
11)	15. Calls on the Commission – particularly in the light of the planned European Year of Rail in 2021 – to enter into partnerships with European rail operators so that participants are eligible for discounted fares;	In relation to the call on the Commission to enter into partnerships with European rail operators, the Commission is exploring several possibilities in this regard. In this context, since June 2018, the DiscoverEU initiative <sup>8</sup> has been cooperating with European rail companies to give young people the opportunity to discover and learn about Europe travelling predominantly by rail.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">DiscoverEU</a> ).	
12)	18. Calls on the Commission to take account of their digital environmental impact; encourages the Commission to look at ways of reducing the environmental footprint of digital tools, including websites and software, used within the programmes;	Regarding the call on the Commission to take account of the digital environmental impact of the three programmes, the Commission will follow the general measures proposed by the EU Eco-Management and Audit Scheme.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU eco-management and audit scheme</a> ).	
13)	20. Calls, therefore, on the Commission to provide guidance to national agencies and desks, and to support and foster dialogue with stakeholders to ensure that synergies are meaningfully achieved in practice;	Concerning the call on the Commission to provide guidance to national agencies and Creative Europe desks, and to support and foster dialogue with stakeholders to ensure that synergies are achieved in practice (paragraph 20), the Commission continues to cooperate with and provide guidance to national agencies and to facilitate the exchange of good practices between them.  ****		Due to a general character of the promise, it is unclear whether this particular point has been addressed.	

<sup>8</sup> [https://europa.eu/youth/discovereu\\_en](https://europa.eu/youth/discovereu_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		As for the fact that many beneficiaries are small and struggling with administrative requirements, and regarding the call on the Commission to provide guidance to national agencies and Creative Europe desks in this respect, the Commission confirms that micro and small organisations represent more than 70% of Creative Europe beneficiaries. The Commission intends to further facilitate access to Creative Europe cooperation projects through simplification. It intends to increase co-financing rates and to guide Creative Europe desks so that they can help applicants build transnational partnerships.		The Creative Europe programme 2021-2027 has a budget of €2.44 billion, compared to €1.47 billion of the previous programme (2014-2020). This includes easier access to funding through higher co-financing rates (greater contribution levels from Creative Europe for projects).	
14)	21. Calls on the Commission to include respect for the environment, sound environmental practices and environmental protection among the principles set out in the Erasmus+ Higher Education Charter (point 21)  urges the Commission to apply this approach to all sectors covered by the programme and to take action to ensure that the principles are adhered to;	Concerning the call on the Commission to include respect for the environment, sound environmental practices and environmental protection among the principles set out in the Erasmus+ Higher Education Charter (ECHE) <sup>9</sup> the Commission has reviewed the principles of the 2021-2027 ECHE, and included a new provision requesting the higher education institutions to “promote environmentally friendly practices in all activities related to the Programme.” In addition, one of the selection criteria for awarding the ECHE 2021-2027 is an explicit commitment to this principle, where higher education institutions need to indicate how they will promote environmentally friendly practices in the context of Erasmus. Several of the 41 European Universities have already committed to mainstreaming teaching and training on environmental and sustainable development issues. This will serve as inspiration and good practice for the broad higher education community in Europe.		<a href="#">Erasmus charter for higher education</a> <a href="#">Erasmus charter for higher education 2021-2027 guidelines</a>	
15)	23. [...] calls on the Commission to make every effort to expedite the roll-out of the European Student Card;	Regarding the call on the Commission to make every effort to expedite the roll-out of the European Student Card		The goal of the Commission is to have full deployment of the <a href="#">European student card initiative</a> during 2021. The initiative will develop an online one-stop-shop	

<sup>9</sup> [https://ec.europa.eu/programmes/erasmus-plus/resources/documents/applicants/higher-education-charter\\_en](https://ec.europa.eu/programmes/erasmus-plus/resources/documents/applicants/higher-education-charter_en)

	efficiency and waste management and with the aim of making the practices concerned standard for all projects financed by the programme;	the different sectors to play an active role in the collection and dissemination of good practices at European level. The cultural and audiovisual sectors clearly show its increasing concern for climate change and environmental sustainability and for the role they can play in raising awareness on those issues.			
24)	41. [...] calls on the Commission to lay down common green public procurement criteria for the cultural sector and to develop a tool to evaluate the environmental impact of cultural events; emphasises, furthermore, the environmental impact of audiovisual content production and calls on the Commission to use the MEDIA strand of Creative Europe to promote best practices in the audiovisual sector, with respect to sustainability, energy efficiency and the protection of the environment;	In relation to the call on the Commission to lay down common green public procurement criteria for the cultural sector and to use the MEDIA strand of Creative Europe to promote best practices in the audiovisual sector, with respect to sustainability, energy efficiency and the protection of the environment, the Commission will take a gradual approach. This will aim at raising awareness, highlighting best practices, and encouraging beneficiaries to start to implement greening measures, which will result in concrete economic savings and more effectiveness in the implementation of the future projects.		The new <a href="#">Creative Europe MEDIA programme</a> supports a “greening priority” in the practice of the calls. In several schemes, applicants will be encouraged to submit sustainability strategies. This is not mandatory, but will be recognised in award criteria if evidence is presented of commitment to green solutions. MEDIA thus introduces <a href="#">financial incentives for green practices</a> , including reduction of air travel as well as strengthening green skills and green innovation.	
25)	42. Calls on the Commission to include sustainability and respect for the environment in the selection and the evaluation criteria for the European Capitals of Culture;	As for the call to include sustainability and respect for the environment in the selection and the evaluation criteria for the European Capitals of Culture <sup>14</sup> , the criteria for this action are explicitly specified in Article 5 of Decision 445/2014/EU of the European Parliament and the Council. New criteria can only be added through an amendment to this decision. The Commission underlines that, as indicated in Article 2 of the decision, one of the general objectives of the European Capitals of Culture is to foster the contribution of culture to the long-term development of cities. Therefore, upcoming European Capitals of Culture do include environmental considerations in the planning and implementation of their title-years. Indeed, ecology		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Decision 445/2014/EU</a> ).

		<p>becomes very often a strong focus of such years, such as in Bad Ischl (Austria), Tartu (Estonia) or Bodo (Norway in 2024).</p>			
26)	<p>43. Calls on the Commission to authorise, as a trans-sectoral measure, the establishment of a European network of environmental, climate and sustainability consultants to advise project developers and Creative Europe Desks; considers that best practices should be shared and made public;</p>	<p>Concerning the call on the Commission to authorise the establishment of a European network of environmental, climate and sustainability consultants to advise project developers and Creative Europe desks, the Commission will explore with the desks how such a network of consultants could be put in place in a transparent and efficient way. In this regard, the Commission will take into account the diversity of the sectors covered by the programme.</p> <p>As for the fact that many beneficiaries are small and struggling with administrative requirements, and regarding the call on the Commission to provide guidance to national agencies and Creative Europe desks in this respect, the Commission confirms that micro and small organisations represent more than 70% of Creative Europe beneficiaries. The Commission intends to further facilitate access to Creative Europe cooperation projects through simplification. It intends to increase co-financing rates and to guide Creative Europe desks so that they can help applicants build transnational partnerships.</p>		<p>The Commission is preparing a proposal on a Council recommendation on education for environmental sustainability. See public consultation results: <a href="#">Environmental sustainability – education and training</a>.</p> <p>The Creative Europe programme 2021-2027 has a budget of €2.44 billion, compared to €1.47 billion of the previous programme (2014-2020). This includes easier access to funding through higher co-financing rates (greater contribution levels from Creative Europe for projects).</p>	

## 4.1.10.2. CULT Resolution 2: EP resolution of 20 January 2021 on achieving an effective policy legacy for the European Year of Cultural Heritage

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Achieving an effective policy legacy for the European Year of Cultural Heritage	20/01/2021 <a href="#">T9-0008/2021</a> <a href="#">2019/2194(INI)</a> CULT	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 0021	Specific reply			
1)	3. Stresses that languages enable and promote the richness and diversity of European cultural heritage, as mother tongues are vectors of values and knowledge which are often used to transmit intangible cultural heritage; urges the Commission and the Member States to take greater action to protect, develop, and promote language diversity in the digital age, also by setting aside a sufficient budget for policies dealing with languages classified as endangered and developing awareness among EU citizens about the linguistic and cultural richness the communities concerned represent;	In relation to the protection and promotion of language diversity in the digital age (paragraph 3), the Commission reiterates that it remains committed to providing policy support and funding for inclusion and respect for the rich cultural diversity of Europe, which is one of the priorities and objectives of the Commission. In this respect, the Commission will closely monitor the implementation of the Communication on achieving the European Education Area by 2025 (C (2020) 625 final). The priority ambition of building a European Education Area should support Member States in reaching a large number of underlying goals, including promoting common values, inclusive education and language aware schools. It should also foster awareness of Europe's shared cultural and linguistic heritage and its diversity. The Council Recommendation (2019/C 189/03) on a comprehensive approach to the teaching and learning of languages includes regional or minority languages in its over-arching strategy. The Commission notes that the EU Roma Strategic Framework <sup>15</sup> for equality, inclusion and participation 2020-2030 as well as the proposal for a Council Recommendation on Roma equality, inclusion and				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:  - <a href="#">Communication on achieving the European education area by 2025 (C(2020) 625 final)</a> , new funding programmes for the period 2021-2027 in the fields of education and culture, Erasmus+ and Creative Europe.  - <a href="#">EU Roma strategic framework<sup>16</sup> for equality, inclusion and participation 2020-2030</a> as well as the <a href="#">Council recommendation on Roma equality, inclusion and participation (COM/2020/621)</a> will promote awareness of Roma art, history and culture.  The Commission presents progress on key indicators on education and training as part of the annual <a href="#">education and training monitor</a> . It will develop a new approach to indicators and targets for the European education area. The Commission will publish a progress report in 2022 and a full report in 2025.	

<sup>15</sup> [https://ec.europa.eu/commission/presscorner/detail/en/ip\\_20\\_1813](https://ec.europa.eu/commission/presscorner/detail/en/ip_20_1813)

<sup>16</sup> [https://ec.europa.eu/commission/presscorner/detail/en/ip\\_20\\_1813](https://ec.europa.eu/commission/presscorner/detail/en/ip_20_1813)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		participation (COM/2020/621) will promote awareness of Roma art, history and culture. The Commission stresses that the new funding programmes 2021-2027 in the fields of education and culture, Erasmus+ and Creative Europe, are accessible for small regional and minority language communities.			
2)	4. Reminds the Commission and the Member States of the need to fully include the cultural heritage of the minorities present in Europe in any reflection on the European heritage, by committing themselves to recognising and promoting their contribution to the cultural, linguistic and artistic wealth and diversity of the Union and endeavouring to establish and implement concerted and coordinated measures for the sustainable management and promotion of these cultures;	Regarding the inclusion of cultural heritage of minorities, the Commission highlights that, while the rights of persons belonging to minorities is one of the values on which the Union is founded, the EU has no general legislative competence specifically on the protection of national minorities. The Commission Communication, adopted on 15 January 2021, on the European Citizens' Initiative 'Minority SafePack – one million signatures for diversity in Europe' (C(2021) 171 final) spells out how the full implementation of legislation and policies already in place in a large array of policy areas will improve the protection of persons belonging to national and linguistic minorities, and strengthen cultural and linguistic diversity in the Union.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (communication adopted on 15 January 2021 on the European citizens' initiative 'Minority SafePack – one million signatures for diversity in Europe', <a href="#">Minority SafePack</a> ).	
3)	5. Highlights the role of European and pan-European cultural events and traditional cultural festivals in raising awareness of Europe's cultural richness and diversity; encourages the Member States to promote and support such activities and to protect their traditions; urges the Commission to consider financing such initiatives;	In relation to cultural events and traditional festivals (paragraph 5), the Commission shares the Parliament's view of their importance in raising awareness of European cultural diversity. The Commission continues to finance festivals and mobility of artists under cooperation projects through its Creative Europe programme, and this remains a priority under the 2021-2027 funding period. One example of Creative Europe's support to festivals and to cultural heritage is the project Heritart <sup>17</sup> , which developed a new model for the promotion of archaeological sites through artistic performances and organised two festivals, in Italy		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Creative Europe programme</a> , project <a href="#">Heritart</a> , Creative Europe - <a href="#">perform Europe</a> ).	

<sup>17</sup> <https://ec.europa.eu/programmes/creative-europe/projects/ce-project-details/#project/583908-CREA-1-2017-1-IT-CULT-COOP1>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and Croatia. The European Festivals Association (EFA) is also financed by Creative Europe. EFA participates widely and is one member of the consortium implementing the Creative Europe initiative Perform Europe <sup>18</sup> , which was launched in January 2021. Perform Europe will design new support schemes for more sustainable and inclusive circulation of performing arts. Until 2019, the Commission and the Parliament supported Europe for Festivals, Festivals for Europe (EFFE), an action initiated by EFA. EFFE offers a searchable database for audiences all over Europe to discover all art festivals.			
4)	6. Stresses the importance of all types of education – formal, non-formal and informal – relating to cultural heritage and humanities, including history and philosophy, at all ages; believes that special attention should be paid to pupils and students with disabilities and to those from disadvantaged backgrounds; reiterates the significance of including various artistic forms such as music, film, theatre, literature, design and architecture in school curricula or in curriculum support activities; believes that various existing materials produced on the occasion of the EYCH, such as the relevant eTwinning kit, should be promoted more actively; calls on the Commission to more comprehensively integrate cultural heritage in its strategy for a European Education Area, in order to help students develop a strong sense of European citizenship;	In relation to the integration of cultural heritage in its strategy for a European Education Area (EEA) (paragraph 6), the Commission agrees with the Parliament on the importance of all types of education, including artistic forms, to develop a strong sense of European citizenship. The European Council conclusions of 14 December 2017 stressed that “education and culture are key to building inclusive and cohesive societies, and to sustaining our competitiveness”. This approach is reflected in the vision put forward in the EEA Communication (COM/2020/625 final), and supported at expert level by the definition of inclusive education agreed by the ET 2020 Working Group on Promoting Common Values and Inclusive Education. The Working Group on Promoting Common Values and Inclusive Education, within the strategic framework for European cooperation in education and training (ET 2020), has promoted intercultural dialogue through all forms of learning. The EEA Communication foresees that the Commission will convene Member State experts and stakeholders through dedicated platforms for mutual		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request: <ul style="list-style-type: none"> <li>- <a href="#">Communication COM/2020/625</a> on achieving the European education area by 2025.</li> <li>- <a href="#">Council recommendation</a> on promoting common values, inclusive education and the European dimension of teaching.</li> <li>- <a href="#">Activities of working groups</a> dedicated to the implementation of the European education area.</li> </ul>	

<sup>18</sup> <https://performeurope.eu/>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>learning and cooperation to support initiatives dedicated to inclusion and equality in education. As underlined by the Parliament, the Commission believes that different education and cultural initiatives should be complementary to strengthen inclusion and promote citizenship. Through the Erasmus+ programme, the Commission has continued to support Member States and stakeholders in implementing the Council Recommendation of 22 May 2018 on promoting common values, inclusive education, and the European dimension of teaching (ST/9010/2018/INIT), and thereby build democratic education environments free from bullying, harmful speech and disinformation.</p>			
5)	<p>9. Expresses its concern about the growing lack of skilled craftspeople, restoration professionals and heritage experts and the difficulties in attracting young people to learn these types of skills; stresses the lack of systemic approach and efficient mechanisms such as training courses in ancestral techniques for transmitting the relevant skills and knowledge, which is putting European heritage at risk; believes that in future quality preservation of cultural heritage will only be possible if the relevant skills and knowledge are comprehensively preserved, including via digital means, and passed on; calls on the Commission, therefore, to ensure that future initiatives on preservation of cultural heritage include the preservation of the necessary practices and knowledge; recalls the value of exchanges, and highlights in this regard the importance of the Erasmus+ programme, which also enables mobility of apprentices;</p>	<p>In relation to the preservation of the necessary practices and knowledge for cultural heritage, and the importance of the Erasmus+ programme, (paragraph 9), the Commission has launched two recent projects, which focus on the safeguarding of skills for cultural heritage. The Erasmus+ CHARTER project, under the European Cultural Heritage Skills Alliance, focuses on knowledge areas of Cultural Heritage and on core and transversal skills, including digital, technological and green adaptation skills. The Creative Europe INCREAS project is developing innovative and creative educational solutions for the heritage sector, like digital skills modules, workshops, study visits, and a structured peer-to-peer exchange programme. The latter will be aimed at preserving traditional and at risk craftsmanship skills by attracting young people to the sector. The project will create a prototype of the European Competence &amp; Community Centre for Heritage Assets, focused on built heritage competences. Moreover, the Commission recently launched the European Competence Centre for digital preservation and conservation of cultural heritage, a collaborative digital space for cultural heritage conservation. The Centre, funded under Horizon 2020, will</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <ul style="list-style-type: none"> <li>- <a href="#">Erasmus+ CHARTER project</a></li> <li>- <a href="#">Creative Europe INCREAS project</a></li> <li>- <a href="#">European competence centre</a> for digital preservation and conservation of cultural heritage</li> <li>- <a href="#">European framework for action on cultural heritage</a></li> </ul>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		map research, provide interdisciplinary expertise in digitisation (particularly in 3D), set up a collaborative digital space for cultural heritage conservation and facilitate best practices and access to repositories of data, metadata, standards and guidelines.			
6)	22. Calls for a comprehensive update to the Commission's recommendation of 27 October 2011 on the digitisation and online accessibility of cultural material and digital preservation, in order to reflect technological progress and the challenges and opportunities of the past decade; considers, however, that the focus on digital heritage should not come at the expense of protecting existing tangible and intangible cultural heritage and the related jobs;	The Commission welcomes the call of the Parliament for a comprehensive update to the Commission's Recommendation 2011/711/EU on the digitisation and online accessibility of cultural material and digital preservation (paragraph 22), which is the Commission's main policy tool for digital cultural heritage. Some of the challenges faced by the cultural heritage sector when the Recommendation was adopted are still present today, and additional difficulties have arisen since. In a context driven by an urgent need to protect and preserve European cultural heritage at risk, and to exploit the opportunities brought by major technological advances, the Commission is evaluating the Recommendation's overall performance and relevance to the cultural heritage sector, its users and to the public. The Commission held a series of consultation activities with Member States, stakeholders and citizens, including an open public consultation. Respondents to the open public consultation underlined the key role played by digital technologies during the COVID-19 pandemic, and in the future. Moreover, most of them considered that the EU and Member States should intensify their actions to help cultural heritage institutions to address the challenges, and seize the opportunities of the digital era. The evaluation is in its final stages and will soon be made public. It will be the basis for the revision of the recommendation, planned for the second quarter of 2021.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:  - Commission recommendation of 10 November 2021 on a common European data space for cultural heritage ( <a href="#">C(2021) 7953</a> ).  - Digitisation and online access of cultural material and digital preservation ( <a href="#">evaluation</a> ).	
7)	25. Points out that the existence of cultural heritage sites encourages people to travel and learn about different societies and cultures;	Regarding the role that cultural heritage plays in encouraging people to travel and the involvement of young people from disadvantaged backgrounds		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>recalls that 72 % of those surveyed aged between 15 and 24 agree that the presence of cultural heritage can have an influence on their holiday destination; highlights in this regard the role the DiscoverEU initiative can play; notes, however, that the initiative has not benefited youth equally; calls on the Commission to find ways for better involvement of young people from socially disadvantaged backgrounds and those from rural and remote areas of the Member States, as well as from Member States without good rail links to other EU countries;</p>	<p>(paragraph 25), every year, the DiscoverEU initiative gives young people the opportunity to discover Europe through learning experiences, travelling predominantly by train. In 2018, DiscoverEU linked its activities to the European Year of Cultural Heritage. Since then, DiscoverEU contributed to the promotion of cultural heritage sites through the development of a cultural travel track. Through targeted measures, such as outreach activities or pre-departure information meetings, the Commission aims to encourage young people to visit lesser-known destinations in Europe, particularly destinations located in more remote areas and the periphery of Europe. The current application process for DiscoverEU accommodates young people from socially disadvantaged backgrounds. For example, young people facing economic obstacles can take shorter trips and are able to travel in groups. Additionally, young people with special needs or those from rural and remote areas are eligible for extra assistance. The Commission is currently working to enhance the inclusiveness of DiscoverEU with the Erasmus+ National Agencies.</p>		<p>working on action falling under the scope of the EP request :</p> <ul style="list-style-type: none"> <li>- <a href="#">DiscoverEU</a></li> <li>- <a href="#">Commission implementing decision</a> - framework of inclusion measures of Erasmus+ and European Solidarity Corps 2021-27 (October 2021). As an integral part of their work programmes, the Erasmus+ and European Solidarity Corps national agencies shall develop inclusion action plans.</li> <li>- <a href="#">Implementation guidelines</a> - Erasmus+ and European Solidarity Corps Inclusion and Diversity Strategy (April 2021).</li> </ul>	
8)	<p>29. Is concerned about the impact on cultural heritage of pollution, vandalism, theft, poorly managed tourism and uncontrolled development, as well as of global warming and climate change, in particular due to increased occurrences of extreme weather events, including torrential rain, heatwaves, floods, fires and wind risk; stresses the need for action, including through knowledge sharing between the Member States, and calls on the Commission to propose concrete actions for preserving and protecting cultural heritage in light of these natural and human-made hazards;</p>	<p>In terms of impact on cultural heritage of poorly managed tourism, uncontrolled development, global warming and climate change (paragraph 29), the Commission organised expert groups under the Open Method of Coordination (OMC) on sustainable cultural tourism, climate change and cultural heritage, and on the cultural dimension of sustainable development. The OMC group on sustainable cultural tourism published a report in 2019, which includes the first definition of sustainable cultural tourism, as well as recommendations and guidelines for policymakers and 27 case studies illustrating best practices in both tangible and intangible cultural heritage. The OMC groups on Cultural Heritage and Climate Change mitigation and on the Cultural Dimension of Sustainable Development met for the first time in January 2021. The Cultural Heritage group</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request :</p> <ul style="list-style-type: none"> <li>- The Commission organised <a href="#">expert groups</a> under the Open Method of Coordination, such as those on cultural heritage and climate change mitigation and on the cultural dimension of sustainable development.</li> <li>- <a href="#">Sustainable cultural tourism</a>: A mapping document for the Open Method of Coordination.</li> <li>- Horizon Europe <a href="#">Cluster 2 - culture, creativity &amp; inclusive society</a>.</li> </ul>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>will examine how to build resilience in the face of climate change, and how cultural heritage can play an important role in mitigating the effects of climate change, in line with the goals of the Green Deal. The OMC group on Sustainable Development will concentrate on how to integrate cultural policies and perspectives into national sustainable development practices. It will also address how to further strengthen the contribution of the cultural sectors and culture to sustainable development.</p> <p>Moreover, the Commission funds projects that work on the safeguard of cultural heritage and its resilience against the effects of natural disasters and climate-related hazards, particularly under Horizon 2020. The Horizon Europe programme, under Cluster 2 dedicated to “Culture, Creativity and Inclusive Society”, will promote Research and Innovation on the green protection and restoration of cultural heritage; enhancement of and engagement with cultural and creative industries and sectors in order to sustain regional/ local development and job’s creation; the role of games in culture and in shaping European societies; research on innovative and participatory management and sustainable financing of Museums and other Cultural Institutions including the promotion of a Cloud for Cultural Heritage; preventing and fighting illicit trafficking in cultural goods and for the protection of endangered cultural heritage; on preserving cultural heritage with advanced digital technologies and also, increasing the international competitiveness of the European film-making and music sectors.</p>			
9)	30. Underlines the role of civil society and the significance and value of volunteering for protecting and even discovering cultural heritage and highlighting its importance, as well as the knowledge, expertise and energy that volunteers bring to the cause; calls on the Commission and	Regarding the role of volunteering in promoting and discovering cultural heritage (paragraph 30), the Commission will continue to foster the desire of young people to express their solidarity and make a meaningful contribution to society. With a dedicated budget of more than EUR 1 billion for the period of 2021-2027 in current		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Solidarity Corps</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the Member States to continue to support actions in this regard; notes the role that the European Solidarity Corps can play in enabling young people to become involved in preserving and renovating Europe's heritage and raising awareness;	prices, the European Solidarity Corps programme will offer solidarity activities to support people and organisations at national, regional and local levels in their efforts to cope with different challenges and crises. This may include projects that raise awareness of European cultural heritage or projects that aim to protect, preserve and promote cultural heritage.			
10)	34. Calls on the Commission to adopt a more integrated approach towards cultural heritage, giving equal treatment to tangible, intangible, natural and digital heritage and approaching these dimensions as being interconnected and inseparable;	The Commission stressed that a more integrated approach towards cultural heritage (paragraph 34), is the basis of all its actions on cultural heritage. From March 2017 until June 2019, an Interservice Group of the relevant Directorate Generals in the Commission met to discuss synergies and exchange information about the European Year of Cultural Heritage 2018 and its legacy, which fed into the European Framework for Action on Cultural Heritage. This integrated approach is promoted and put into practice through the Framework for Action on Cultural Heritage, as well as through the exchanges of the Commission's expert group on cultural heritage. The Framework cuts across different EU policy areas, reflecting the mainstreaming of cultural heritage in different policies. This is also evident from the several EU programmes that fund projects working for the safeguard and promotion of cultural heritage.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:  - An interservice group of the relevant directorates general in the Commission - An <a href="#">expert group on cultural heritage</a> - <a href="#">European year of cultural heritage 2018, European framework for action on cultural heritage</a>	
11)	37. Is of the view that the findings and recommendations of the relevant studies commissioned by the Commission should be reflected in its actions for preserving cultural heritage;	The Commission regards the findings and recommendations of studies on cultural heritage (paragraph 37) with great importance. For this reason, it disseminates, circulates and shares them with relevant stakeholders within its networks and at relevant events. These studies often feed into the work plan for culture, the deliberations of the Cultural Affairs Committee and the work of expert groups under the Open Method of Coordination. For instance, the study on " <i>Safeguarding Cultural Heritage from Natural and Man-made disasters</i> " is included in the mandate of the OMC group on climate		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. These studies feed into the work plan for culture, the deliberations of the Cultural Affairs Committee and the work of expert groups under the Open Method of Coordination.  - <a href="#">Safeguarding cultural heritage from natural and man-made disasters</a> - <a href="#">Carrying capacity at sensitive cultural heritage sites</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		change and cultural heritage. Moreover, the studies produced as part of the work of the OMC groups are reflected in the recommendations of those groups. This is the case of the study on <i>"Carrying Capacity in sensitive cultural sites"</i> , which was part of the deliberations and recommendations of the OMC group on sustainable cultural tourism.			
12)	38. Reiterates its request to the Commission concerning the setting-up of a single EU portal to be called 'Know Europe', bringing together information from all the EU programmes funding cultural heritage, together with the establishment of a common approach within the Commission through improved cooperation across the different policy areas relating to cultural heritage;	In relation to a portal with all information about EU programmes funding cultural heritage (paragraph 38), in 2020 the Commission completely updated and revamped its culture website. This includes an entire new section dedicated to cultural heritage and to the Commission's policies and actions supporting it. A page is specifically dedicated to funding opportunities for cultural heritage under the different EU programmes. In addition, the Commission is currently in the process of preparing new user-friendly tools for cultural stakeholders, which will inform them about funding opportunities for cultural and creative sectors under various 2021-2027 EU programmes. The Commission recognises the importance of informing the cultural heritage sector about funding instruments that are complementary to public support. To this end, in January 2021 the Commission organised a workshop on complementary sources of funding for cultural heritage, in order for Member States and heritage stakeholders to share best practices and examples. A non-paper on the topic was prepared and will be published on the Commission's website by the end of April.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request: - In 2020, the Commission completely updated and revamped its culture website; to this end, in January 2021, the Commission organised a workshop. - The Commission published the information on the <a href="#">workshop on complementary funding cultural heritage</a> . - <a href="#">Background paper and selected good practices</a> , March 2021.	
13)	44. Welcomes the quick response and the expression of solidarity by the cultural and creative sectors during the COVID-19 crisis by making cultural heritage widely and freely available online to the public; is alarmed at the	In terms of the COVID-19 pandemic (paragraph 44), the Commission is aware of its devastating impacts on the cultural and cultural heritage sectors. Analyses of the impact have already been carried out by Member States and shared with members of the Cultural Affairs		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>tremendous impact that the fallout from COVID-19 will have on cultural heritage and the cultural and creative sectors; calls on the Commission to carry out a comprehensive analysis of the impact of the pandemic on the relevant sectors and the cultural heritage sector in particular; urges the Commission and the Member States to offer adequate and targeted financial support to alleviate the crisis in these sectors and aid the people employed in them, including access to social benefits for those in non-standard forms of employment;</p>	<p>Committee in the Council of the EU. Heritage stakeholder organisations have also undertaken studies and surveys on the impacts and consequences of the pandemic, and these are regularly shared via the Commission's expert group on cultural heritage. The Commission has mobilised all the instruments at its disposal to support the cultural and creative sectors, including the heritage sector, since the beginning of the pandemic. Maximum flexibility of rules was applied under the Creative Europe programme for ongoing and planned actions, with several deadlines extended and the launch of new, dedicated calls.</p> <p>The Commission issued horizontal support measures in favour of the cultural and creative sectors since the start of the COVID-19 pandemic, such as the State aid Temporary Framework, the temporary Support to mitigate Unemployment Risks in an Emergency (SURE), and the Coronavirus Response Investment Initiatives (CRII and CRII Plus). Additionally, the Recovery Assistance for Cohesion and the Territories of Europe package (REACT-EU) will bring additional resources for the cohesion policy for 2021-2022, thanks to the new temporary instrument NextGenerationEU (European Union Recovery Instrument).</p>		<ul style="list-style-type: none"> <li>- <a href="#">Overview of EU action</a> to the coronavirus outbreak in support of the cultural and creative sectors.</li> <li>- <a href="#">REACT-EU, NextGenerationEU, implementation report on SURE</a>, coronavirus response investment initiatives (<a href="#">CRII</a> and <a href="#">CRII Plus</a>).</li> </ul>	
15)	<p>45. Calls for increased efforts to build on the momentum of the EYCH in order to develop it into a durable policy legacy at local, regional, national and European levels, since this in its turn would make a positive economic, cultural and social contribution and help develop the sense of belonging to the European cultural space for all Europeans, as well as that of shared responsibility for preserving, enriching and promoting cultural heritage; invites the Commission to consider organising another European Year of Cultural Heritage in the future;</p>	<p>The Commission welcomes the call to build on the momentum of the <a href="#">European Year of Cultural Heritage</a> - EYCH (paragraph 45), and supports the efforts to transform it into a durable policy legacy. As an example of this support, the Commission developed the <a href="#">European Framework for Action on Cultural Heritage</a> in 2019, precisely to embed a durable policy legacy of the EYCH. The Framework promotes and puts into practice an integrated and participatory approach to cultural heritage, and contributes to the mainstreaming of cultural heritage across EU policies, reflecting the common set-up for heritage-related activities at European level. It also ensures its legacy by developing over 60 concrete actions, which</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <ul style="list-style-type: none"> <li>- <a href="#">European framework for action on cultural heritage</a></li> <li>- <a href="#">Creative Europe</a> programme 2021-2027</li> <li>- <a href="#">Joint action plan with the Committee of the Regions</a></li> <li>- An <a href="#">expert group on cultural heritage</a></li> </ul>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>respond to five pillars pertaining to inclusiveness, sustainability, resilience, innovation and global partnerships, which includes the setting up of the Commission's Cultural Heritage Expert Group. This group is composed of representatives from Member States, key stakeholders as well as a number of individual experts and provides the Commission with advice and expertise. It also serves as a platform for consultation and the exchange of information on cultural heritage policies in order to support the implementation of the European Framework for Action on Cultural Heritage.</p> <p>The ambitious Creative Europe programme 2021-2027 will significantly reinforce the support to European cultural and creative sectors. Its initial budget of over EUR 1.8 billion in current prices, topped up by EUR 0.6 billion in 2018 prices (related to the technical adjustment mechanism foreseen in the Multiannual Financial Framework Regulation), is considerably higher than the amount available for 2014-2020 programme. It includes a new sectorial approach in its CULTURE strand, for the first time ever addressing the specific needs of some key cultural and creative sectors, amongst them cultural heritage, with special types of action to complement and support the policy legacy of EYCH.</p> <p>Additionally, the Commission recalls its Joint Action Plan with the Committee of the Regions. With its concrete actions, the Commission aims at adopting a strategic approach to cultural heritage, with the involvement of regional and local authorities. The Action Plan intends to increase the administrative and implementation capacity of the Regions to not leave anyone behind, reducing the innovation divide and at building a well interconnected innovation ecosystem in Europe, including in the field of cultural heritage.</p>			

4.1.10.3. CULT Resolution 3: EP resolution of 25 March 2021 on shaping digital education policy

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Shaping digital education policy	25/03/2021 <a href="#">T9-0095/2021</a> <a href="#">2020/2135(INI)</a> CULT	<a href="#">SP(2021)345</a>	Final reply (SP) received 3 August 2021	Specific reply			
1)	4. Notes, however, that effective delivery of the Plan also depends on coordination across a broad range of programmes and among the Member States; calls on the Commission to ensure effective synergies between the different programmes and more consistent and effective coordination across all relevant digital education policies at the EU level with a view to reducing fragmentation and avoiding overlaps between national and European funding instruments and policies and thereby increasing impact;	The Commission fully recognises the importance of ensuring synergies and coordination across European digital education policies and funds to ensure greater impact in the digital education field (point 4). This approach is reflected in the comprehensive nature of the Digital Education Action Plan 2021-2027, which takes a holistic approach, brings together the work of more than five Commission services and leverages a number of European funding instruments (Erasmus+, Horizon Europe, Connecting Europe Facility, European Social Fund, Recovery and Resilience Facility and others). To promote greater coherence in digital education initiatives, the Commission has launched an internal inter-service group, which brings together services working on the implementation of the Digital Education Action Plan, but also such working on digital education initiatives more broadly.				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">digital education action plan 2021-2027</a> ), an internal inter-service group).	
2)	8. Notes that the new Plan sets specific targets to address persistent digital education gaps, such as with respect to connectivity, digital skills and online learning content; welcomes the Commission's scheduled mid-term review of the plan and its intention to ramp up data collection; calls on the Commission to develop comprehensive monitoring system for all digital education policies which should be used to share good practice across the EU and feed into the mid-term review; reiterates the need for a clear	The Commission agrees with the Parliament on the importance of sharing good practices and following more closely digital education policies across the Union (point 8). To help address data and knowledge gaps in relation to digital policies, the Commission is financially supporting the Member States' participation in cross-national data collection. To support exchanges on the implementation of digital education in the Member States, the Commission is working on the set up of a network of National Advisory Services. In addition, the Commission is working on bringing more closely together national agencies				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">SALTO</a> ).  A <a href="#">first meeting</a> of the national advisory services took place in September 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	implementation timetable and for clear benchmarks and milestones to be presented to both Parliament and Council; remains convinced that the plan needs a clearer governance and coordination structure, in which Parliament should be involved, to monitor developments and performance on an ongoing basis; calls on the Commission, therefore, to establish a forum bringing together the Member States, Parliament and other relevant stakeholders and experts, including education providers and civil society organisations;	implementing the Erasmus+ programme through a dedicated SALTO ("Support for Advanced Learning and Training Opportunities") on digital education. [...]			
		In alignment with the multi-stakeholder approach of the Digital Education Hub, the Commission will organise the first Digital Education Stakeholder Forum in the first quarter of 2022, bringing together key players and organisations in digital education from the public and private sector at European, national and local level (point 8).		Throughout 2022, the Commission will put in place an <a href="#">intensive stakeholder dialogue process</a> , including bilateral meetings and a community of practice.	
3)	9. Urges the Commission to increase the role and visibility of education, including digital education, in the European Semester exercise and include in its focus references to the economic impact of education to include social objectives and the quality of educational provision;	Regarding the integration of digital education in the European Semester process (point 9), the Commission underlines that education and skills are already deeply rooted in the process. For instance, in 2019, all the Member States received a Country-Specific Recommendation in this area and specific reference to digital learning was made for seven Member States. With the pandemic, digital education has gained more prominence in the Semester, becoming a clear focal point of the 2020 Country-Specific Recommendations. In particular, digital education or skills were mentioned in the Recommendations of fourteen Member States and are covered in several others as part of broader recommendations on education and skills.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (country - specific recommendations).	
4)	10. [...] urges the Commission to work quickly to bring forward the date of publication of the draft Recommendation to 2021;	The Commission welcomes the recognition of the ambition of launching a Strategic Dialogue with the Member States (point 10) on key enabling factors of digital education and informs that work on the action is underway and will include the rollout out of a dedicated Digital Education Strategic Dialogue Group. Given the complexity of the exercise and keeping in mind that its areas of focus cut across different policy intervention areas (e.g. tackling connectivity gaps, promoting guidelines for digital		The Commission launched a <a href="#">structured dialogue</a> with Member States in October 2021. A <a href="#">Council recommendation</a> is expected in Q4 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		pedagogy) and the need to allow for ample consultation at the Member State level, the adoption of a possible Recommendation is expected by the end of 2022. The action will take into consideration the differing levels of technological advancement and readiness across the Union and will pay special attention to addressing accessibility and availability of assistive technologies as a key enabling factor for digital education (point 39).			
5)	11. Calls on the Commission, while respecting the principle of subsidiarity to supervise implementation at national level and ensure fair representation and independence within the hubs and advisory services and in stakeholder consultation; calls on the Commission to fully involve Parliament increasing European and national hubs and advisory services and in nominating relevant stakeholders; reminds the Commission, when it develops the concept for the planned European Exchange Platform, to avoid overlap and duplication with the aims of the hub;	The Digital Education Hub will also have a key role in the process, being a single space for exchange and co-operation, information sharing and mapping, and enabling innovation in digital education. Work on the implementation of the Digital Education Hub is ongoing with the aim of being operational by the end of 2021. The Hub will stimulate dialogue between Member States, private and public sectors, on broker information, data, and choices across policies, research, and practices, thus linking top down and bottom up approaches to digital education issues. The Commission encourages the European Parliament to follow the implementation of the Hub and to suggest possible stakeholders, organisations, experts that could contribute to its community (point 11).		<a href="#">Official launch</a> of the digital education hub is in January 2022.	
6)	12. Underlines the need for the European Union to act as a global reference in terms of quality digital education and calls on the Commission to work closely with relevant global and regional institutions and stakeholders to boost access to quality digital education across the world;	Regarding the importance of ensuring that the EU is a global reference for high-quality digital education (point 12), the Commission underlines that the Digital Education Action Plan 2021-2027 has a strong international dimension. It promotes cooperation on the global scale through the Team Europe approach, and addresses strategic goals in priority regions, such as the Western Balkans, South and Eastern Neighbourhood, and Africa. In particular, the Action Plan contributes to the Digital Agenda for the Western Balkans, the EU4Digital Initiative and will contribute to the Western Balkans Agenda on Innovation, Research, Education, Culture, Youth and Sport.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">digital education hackathon</a> , <a href="#">SELFIE</a> , <a href="#">EU code week</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		A number of European initiatives, such as the Digital Education Hackathon, the SELFIE (Self-reflection on Effective Learning by Fostering the use of Innovative Educational Technologies) tool for schools and EU Code Week are open internationally, attracting participants across all continents.			
7)	13. Underscores the pivotal role of research in delivering the plan and achieving effective and appropriate digital education for all and welcomes the Commission's recognition of this; calls on the Commission and the Member States to invest more in interdisciplinary research to assess the long-term impacts of digitalisation on learning and the effectiveness of digital education policies, thereby informing their future design and implementation, including by anticipating new types of jobs and skills and adjusting education curricula accordingly [...]	Interdisciplinary research plays a key role in evaluating the effectiveness and assessing the impact of policies and practices on digital education (point 13). The Commission is significantly investing in this area, by funding and supporting different studies on relevant topics, such as the role of digital technologies for inclusive education and training, or the role of computing education to boost digital competences and other transversal skills. In this area, the Joint Research Centre, the Commission's science and knowledge service, plays a key supporting role along with the Eurydice, a network of 39 national units based in all Programme Countries of the Erasmus+ programme.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Joint research centre</a> , <a href="#">Eurydice</a> ).	
8)	15. [...] and calls on the Commission to study the potential contribution of 5G to digital education initiatives; (...)	The Commission shares the view of the Parliament on the importance of exploring the potential of 5G for education and training (point 15). The digital strand of the Connecting Europe Facility is set to be instrumental in funding connectivity infrastructures. Furthermore, it is also set to contribute to striking a balance between rural and urban developments and to also complement the support provided for the deployment of very high capacity networks by other programmes, in particular the European Regional Development Fund, the European Agriculture Fund for Rural Development, the Cohesion Fund and the InvestEU Fund. The importance of 5G and its smart sectorial applications can help addressing many challenges such as the digital divide – notably when it is combined with innovative digital technologies and services.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Connecting Europe facility</a> , <a href="#">European regional development fund</a> , <a href="#">European agriculture fund for rural development</a> , <a href="#">cohesion fund</a> and <a href="#">InvestEU fund</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	16. Welcomes the plan's focus on supporting school and university connectivity through the Connecting Europe Facility and efforts to publicise EU funding opportunities; calls on the Commission to work closely with Member States, local authorities and stakeholders to ensure that EU support dovetails with national schemes, in particular to support disadvantaged groups; calls on the Commission to target support beyond schools to reach all formal and non-formal educational establishments; recalls the need for educational establishments to benefit from support from trained staff to oversee networks and applications and to provide training and assistance on data protection;	[...] the Commission has been encouraging the Member States to include high-speed connectivity for education and training, including in formal and non-formal setting and for disadvantaged groups (paragraph 16) in their National Recovery and Resilience Plans under the flagship area 'Connected'. Supporting connectivity for socio-economic drivers is an explicit objective of the digital strand of the Connecting Europe Facility, which even puts higher priority on education and research centres. Further to these specific funding opportunities for socio-economic drivers, the Commission is also trying to dovetail its support with other national schemes. More specifically, and in the context of the national Recovery and Resilience Plans, the Commission is encouraging the Member States to invest in the flagship "Reskill and upskill", aiming at the adaptation of education systems to support digital skills and educational and vocational training for all ages.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">national recovery and resilience plans</a> under the flagship area 'connected').	
10)	18. Encourages the European Commission and the Member States to provide schools (teachers and students) not only with technical support and Internet connection, but also a necessary support on safe and reliable software and to promote flexible models of education and support for distance learners using such means as e-resources, e-materials, videos, e-mentorship and free online training; highlights, in that regard, that local cultural and community institutions, such as libraries and museums, are key providers of such digital resources; warns against the negative effects of the vendor lock-ins of educational resources on pedagogical independence and calls on the Commission and the Member States to guarantee such independence from any interference or interests; insist on the need for an open and transparent	Regarding the support for flexible models of education and supporting distance learners (point 18) (...) the Commission plans to propose Council Recommendation on blended learning for high quality and inclusive primary and secondary education in 2021. The Recommendation will outline ways in which the Member States could adapt their school systems to be more flexible and inclusive of a broad range of learner needs, changing circumstances, and pedagogical approaches.		On 5 August 2021, the Commission published a <a href="#">proposal for a Council recommendation on blended learning for high quality and inclusive primary and secondary education</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	digital education ecosystem with regard to content, devices and technologies;				
11)	22. Considers that the Union can play a key role in helping develop and make available high-quality educational content; notes with satisfaction the growing number of digital education platforms being set up to enable access to sources and the sharing of good practices, such as eTwinning, the Electronic Platform for Adult Learning in Europe (EPALE) and the School Education Gateway; calls on the Commission to further promote and scale up such successful initiatives through relevant programmes such as Invest EU and Erasmus+ and for the Member States to better tap into their potential; considers the European exchange platform to have potential as a tool to ensure better cooperation between stakeholders and education actors at European level and calls on the Commission to complete its planned feasibility study with due speed;	<p>In the context of “EU Code Week”, the Commission supports massive open online courses that provide primary and secondary schools teachers with ideas, free training material and resources to help them bring coding and computational thinking as well as AI into the classroom.</p> <p>Welcoming the comments of the Parliament on the role of the EU in helping develop and make available high quality educational content (point22), the Commission informs that there is a number of initiatives in the field underway. For instance, the eTwinning and School Education Gateway platforms will be enhanced by a new initiative funded under the Erasmus+ programme. The platforms will be integrated in 2022 to provide one single platform for all school education stakeholders with access to enhanced online features and with specific tools to support professional and school development. Concerning the creation of a European exchange platform to share certified online resources and link existing education platforms, the Commission conducts the study as part of a closed call for tender. The final report informing on the feasibility of the platform is expected in October 2021.</p> <p>Additionally, the Commission is working on a European Digital Education Content Framework, which will propose guidelines how to ensure that online learning content is of high quality, accessible and recognised.</p>		<p>In 2022, the Commission's school education gateway and eTwinning platforms <a href="#">will merge</a> into the European school education platform.</p> <p><a href="#">Digital education action plan</a> <a href="#">Digital competence framework for educators</a></p> <p>The Commission will propose a European digital education content framework in 2023.</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	24. [...] and calls on the Commission to present to the Parliament a clear concept and budget [...]		<p>Regarding (...) the need for new pedagogical and assessment methods (point 24), the Commission plans to propose Council Recommendation on blended learning for high quality and inclusive primary and secondary education in 2021. The Recommendation will outline ways in which the Member States could adapt their school systems to be more flexible and inclusive of a broad range of learner needs, changing circumstances, and pedagogical approaches.</p> <p>[...]</p> <p>The Commission recognises that teacher education and continuous professional development of teachers and educators is of key importance in ensuring effectively functioning digital education ecosystem (paragraph 24). A key role in achieving these objectives will be played by the 'Erasmus+ Teacher Academies', which aims to create networks of existing teacher education institutions providing initial teacher education and continuous professional development. The Erasmus+ Teacher Academies will develop partnerships and joint programmes between institutions, with cross-border training and learning as a regular feature. They will become communities of practice involving both initial and continuous education providers together with ministries and other stakeholders to work on common issues such as</p>		<p>On 5 August 2021, the Commission published a <a href="#">proposal for a Council recommendation on blended learning for high quality and inclusive primary and secondary education</a>.</p>

		<p>establishment of national STEM platforms, and by disseminating the results from the Erasmus+ funded forward-looking cooperation projects and good practices available within the European Universities alliances.</p> <p>In general, in its Communication on '2030 Digital Compass: the European way for the Digital Decade' (COM(2021) 118 final), the Commission referred to universal digital education and skills for people to take an active part in society and in democratic processes as a principle that could be included in a possible set of digital principles and rights. The Commission will propose to include such a set of principles and rights in an interinstitutional solemn declaration between the European Commission, the European Parliament and the Council. The Commission hopes to achieve decisive progress with the other institutions on such declaration by the end of 2021.</p>		<p>On 9 March 2021, the Commission published '<a href="#">2030 Digital Compass: the European way for the Digital Decade' (COM (2021) 118 final)</a>'.</p>	

## 4.1.10.4. CULT Resolution 4: EP resolution of 19 May 2021 on artificial intelligence in education, culture and the audiovisual sector

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Artificial intelligence in education, culture and the audiovisual sector</b>	19/05/2021 <a href="#">T9-238/2021</a> <a href="#">2020/2017(INI)</a> CULT	<a href="#">SP(2021)507</a>	Final reply (SP) received 22 September 2021	Specific reply			
1)	7. Emphasises that such bias and discrimination can arise from already biased datasets that reflect existing discrimination in society; recalls, in this context, that it is essential to involve the relevant stakeholders, including civil society, to prevent gender, social and cultural biases from being inadvertently included in AI algorithms, systems and applications; stresses the need to work on the most efficient way of reducing bias in AI systems in line with ethical and non-discrimination standards; underlines that the datasets used to train AI should be as broad as possible in order to represent society in the best and most relevant way, that the outputs should be reviewed to avoid all forms of stereotypes, discrimination and bias and that, where appropriate, AI should be used to identify and rectify human bias wherever it exists; calls on the Commission to encourage and facilitate the sharing of de-biasing strategies for data;	The Commission [...] fully agrees that AI and related technologies must not be used in a way that would be discriminatory in any form and that it is therefore necessary to undertake measures for the implementation of de-biasing strategies for data and algorithms, where relevant (point 7). The proposed mandatory requirements for high-risk AI systems aim to ensure that bias is not embedded in the AI system and its use respects the principles of equality and non-discrimination. AI systems must be technically robust to guarantee that the technology is fit for purpose and results are not affecting protected groups (e.g. racial or ethnic origin, sex, age etc.) in a discriminatory way. Data-driven AI systems should also be trained and tested with sufficiently representative and relevant datasets to minimise the risk of discrimination and there should be appropriate bias, detection, correction and other mitigating measures implemented before the system is placed on the market and during its use.				No further specific actions proposed/promised to be taken by the Commission.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	C C	Commission follow up Commission reply/commitment	C C	
2)	8. Calls on the Commission and the Member States to take into account ethical aspects, including from a gender perspective, when developing AI policy and legislation, and, if necessary, to adapt the current legislation, including Union programmes and ethical guidelines for the use of AI;	Concerning the need to take into account gender aspects when developing AI policy and legislation ( point 8), through the set of requirements for trustworthy AI and the proportionate obligations on all value chain participants, the proposed AI Act will enhance and promote the protection of the rights protected by the Charter of Fundamental Rights of the European Union, including on non-discrimination and on equality between women and men. It complements existing Union law with specific requirements that aim to minimise the risk of algorithmic discrimination, in particular in relation to the design and the quality of data sets used for the development of AI systems complemented with obligations for testing, risk management, documentation and human oversight throughout the AI systems’ lifecycle. It should also be noted that the proposal builds upon the Ethics Guidelines for Trustworthy AI prepared by the Commission’s High-Level Expert Group on Artificial Intelligence. While the requirements and the corresponding obligations under the proposed AI Act apply with respect to high-risk AI systems in accordance with the adopted risk-based approach, the ethical guidelines can be used on a voluntary basis also by providers of AI systems not covered by the proposed legislation such as, for instance, systems used for research. In addition, it is proposed that voluntary codes of conduct may be developed with the purpose of committing to the mandatory requirements also with respect to low-risk AI systems. Such codes of conduct could also include additional requirements related, for instance, to diversity and gender balance of teams developing AI systems.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">proposed AI act</a> ).		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>9. Calls on the Commission and the Member States to devise measures that fully incorporate the gender dimension, such as awareness-raising campaigns, training and curricula, which should provide information to citizens on how algorithms operate and their impact on their daily lives; further calls on them to nurture gender-equal mindsets and working conditions that lead to the development of more inclusive technology products and work environments; urges the Commission and the Member States to ensure the inclusion of digital skills and AI training in school curricula and to make them accessible to all, as a way to close the digital gender divide;</p>	<p>The Commission acknowledges the importance of strengthening digital skills and achieving a high standard of media, digital and information literacy at Union level, also addressing the gender dimension ( point 9 and 30). Within the framework of the Digital Education Action Plan 2021-2027, Action 6 is dedicated to Artificial Intelligence and Data. Its basic goals are to promote understanding of emerging technologies and their applications in education, to develop ethical guidelines on AI and data usage in teaching and learning for educators and support related research and innovation activities through the Horizon Europe programme. This will build on the Ethics Guidelines for Trustworthy Artificial Intelligence developed by the High-Level Expert group on AI. The ethical guidelines will be developed by an Informal Commission Expert Group that was launched on 8 July 2021. The guidelines, expected for September 2022, will be accompanied by a training programme for researchers and students on the ethical aspects of AI and include a target of 45% of female participation in the training activities.</p> <p>In addition, Action 8 of the Digital Education Action Plan, under priority 2, envisages updating the European Digital Competences Framework for Citizens and Educators, to include also AI and data-related competences. Currently the Commission's Joint Research Centre is working to have the Framework updated in the first quarter of 2022.</p> <p>Moreover, Action 10 involves the preparation of a Council Recommendation on improving the provision of digital skills in education and training. The goal is to provide a coherent vision and shared language on providing high quality computing/informatics education to all students across Europe.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">digital education action plan 2021-2027</a>), <a href="#">Informal Commission expert group</a> was launched 8/7/2021 and is working on guidelines (Q4 2022). An <a href="#">update</a> of the European digital competences framework for citizens and educators, DigComp version 2.2, is expected in the first quarter of 2022.</p> <p>A proposal for a Council recommendation on improving the provision of digital skills is expected in the <a href="#">last quarter of 2022</a>.</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	12. Calls on the Commission to include education in the regulatory framework for high-risk AI applications, given the importance of ensuring that education continues to contribute to the public good, as well as the high sensitivity of data on pupils, students and other learners; emphasises that in the education sector, this deployment should involve educators, learners and the wider society and should take into account the needs of all and the expected benefits in order to ensure that AI is used purposefully and ethically;		Welcoming the Parliament’s call to include education in the regulatory framework for high-risk AI applications ( point 2) (...) the Commission informs that education and vocational training forms part of the areas in which the use of AI systems is classified as high-risk in the Commission’s proposal. In particular, the Commission considers as high-risk the use of AI systems for the purpose of: (i) determining access or assigning individuals to educational and vocational training institutions; (ii) assessing students in educational and vocational training institutions as well as participants in tests required for admission to educational institutions (Annex III, point 3). However, further uses of AI systems in the area may be categorised as high-risk in the future based on clear and predictable criteria for assessing the level of risk of adverse impact on fundamental rights of natural persons (Article 7).		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">proposed AI act</a> ).	
5)	13. Calls on the Commission to encourage the use of Union programmes such as Horizon Europe, Digital Europe and Erasmus+ to promote multidisciplinary research, pilot projects, experiments and the development of tools including training, for the identification of gender biases in AI, as well as awareness-raising campaigns for the general public;		[...] the Commission notes that, in addition to the guidelines and training programme for researchers and students referred to when discussing paragraph 30 below, multidisciplinary research and gender dimensions are prominent in all the AI and robotics topics under the Horizon Europe programme. There is also a specific call for Research and Innovation which focuses on ‘Tackling gender, race and other biases in AI’. In addition, “Widespread education and outreach programmes including public awareness and addressing acceptability and trustworthiness” are part of another call for proposals under Horizon Europe.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">widespread education and outreach programmes including public awareness and addressing acceptability and trustworthiness</a> ).	
6)	17. Calls on the Commission and the Member States to implement an obligation of transparency and explainability of AI-based automated individual decisions taken within the framework of prerogatives of public power, and to implement penalties to enforce this; calls for		The AI Act proposal lists a number of areas and concrete applications where the use of AI systems would be considered high-risk. Agreeing with the Parliament’s position that the use of AI-based automated decisions taken within the framework of prerogatives of public power should be subject to regulatory scrutiny ( point 17),		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">proposed AI act</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the implementation of systems which use human verification and intervention by default, and for due process, including the right of appeal and redress as well as access to remedies;</p>	<p>the Commission has listed as high-risk a number of applications of AI systems in the areas of law enforcement, migration, asylum and border control management, and administration of justice and democratic processes, employment, education and vocational training, and management of critical infrastructure. AI systems intended to be used by or on behalf of public authorities in the context of determining individuals' rights related to public assistance benefits and services would also be considered as high-risk. This also applies to any AI system intended to be used for the remote biometric identification of natural persons (Annex III of the AI Act proposal), taking into account also the risks arising from the use of this technology on educational and cultural premises. In order to keep the framework future-proof and adaptive to fast technological and market developments, the Commission's proposal also provides for the possibility to classify as high-risk other AI use cases within the above-mentioned broad areas should there be sufficient evidence that similarly significant risks.</p> <p>[...]</p> <p>As noted by the Parliament, it is crucial to ensure that the application of AI systems for taking automated individual decisions – or any other high-risk application of AI for that matter – is transparent and explainable when the intended purpose of the use of the AI system may pose significant risks to the health and safety or fundamental rights of persons. Such AI systems should also be designed and developed in such a way that natural persons can oversee their functioning (point 17).</p> <p>The Commission agrees that for the effective enforcement of the regulatory framework it is necessary to provide for appropriate penalties in cases of infringements (point 17). The Commission has therefore proposed that Member States should lay down rules on effective, proportionate</p>		<p>The Commission launched a public consultation on <a href="#">civil liability – adapting liability rules to the digital age and artificial intelligence</a>. The consultation period is 18 October 2021 - 10 January 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and dissuasive penalties for infringements of the AI regulation, taking into account the interests and economic viability of small-scale providers and start-ups. Accordingly, Member States should also notify these rules to the Commission and take all measures necessary to ensure that the rules on penalties are properly and effectively implemented. For certain specific infringements, Member States should take into account the margins and criteria set out in Article 71 of the legislative proposal. Concerning Union institutions, agencies and bodies falling within the scope of the proposed AI Regulation, it is envisaged that the European Data Protection Supervisor should have the power to impose fines. Last but not least, the Commission may prepare guidance documents, including guidelines concerning the setting of administrative fines.</p> <p>With regard to the right of appeal and redress and access to remedies (point 17), the Commission notes that the requirements under the AI proposal will complement existing legislation, for instance the General Data Protection Regulation and consumer protection law, by demanding compliance of AI systems posing high risks to fundamental rights with requirements for trustworthy AI before such systems can be placed on the market. While the proposal does not establish new rights and remedies for affected individuals, the objective is that the documentation and the logs produced by those systems can be accessed by competent authorities responsible for the fundamental rights legislation and facilitate the effective enforcement of already existing rights and remedies (Article 64). It should also be noted that the Commission is currently analysing the various options to best achieve the objectives set in the White Paper with respect to the liability aspects of AI. In that context the Commission will shortly launch a public consultation on the harmonisation of national liability laws for AI and on</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the revision of the Product Liability Directive <sup>20</sup> . The AI horizontal framework and the liability framework will complement each other: while the requirements of the horizontal framework mainly aim to protect against risks to fundamental rights and safety, effective liability rules primarily take care of damage caused by AI, ensuring compensation should the risks materialise.			
7)	18. Notes the potentially negative impact of personalised advertising, in particular micro-targeted and behavioural advertising, and of the assessment of individuals, especially minors, without their consent, by interfering in the private life of individuals, asking questions as to the collection and use of the data used to personalise advertising, and offering products or services or setting prices; calls on the Commission, therefore, to introduce strict limitations on targeted advertising based on the collection of personal data, starting with a ban on cross-platform behavioural advertising, without harming small and medium-sized enterprises (SMEs); recalls that the ePrivacy Directive currently only allows targeted advertising subject to opt-in consent, otherwise making it illegal; calls on the Commission to prohibit the use of discriminatory practices for the provision of services or products;	Concerning targeted advertising (point 18), the Commission's proposals for the Digital Services Act and the Digital Markets Act <sup>21</sup> include several measures directly or indirectly applicable to targeted advertising, which complement the enforcement of existing rules, not least the General Data Protection Regulation <sup>22</sup> . Notably, the proposed Digital Markets Act prohibits the combination of personal data across services by gatekeeper platforms in the absence of the user's consent, including for online advertising.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (proposals for the <a href="#">digital services act</a> , the <a href="#">digital markets act</a> , and the <a href="#">general data protection regulation</a> ).	

<sup>20</sup> Directive 85/374/EEC

<sup>21</sup> COM (2020) 842 final

<sup>22</sup> Regulation (EU) 2016/679

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	<p>21.Stresses the need to strike a balance between, on the one hand, the development of AI systems and their use in education, culture and the audiovisual sector and, on the other, measures to safeguard competition and market competitiveness for AI companies in these sectors; emphasises, in this regard, the need to encourage companies to invest in the innovation of AI systems used in these sectors, while also ensuring that those providing such applications do not obtain a market monopoly; underlines the need for AI to be made widely available to the cultural and creative sectors and industries (CCSI) across Europe in order to maintain a level playing field and fair competition for all stakeholders and actors in Europe; calls on the Commission and the Member States, when taking decisions on competition policy, including mergers, to take greater account of the role played by data and algorithms in the concentration of market power;</p>	<p>Concerning the calls to take account of the role played by data and algorithms in the concentration of market power (point 21), the Commission informs that it pays close attention to the interaction of data and competition policy in its merger enforcement, as evidenced for example by the <i>Google/Fibit</i>, <i>Apple/Shazam</i> and <i>Microsoft/LinkedIn</i> merger decisions.</p> <p>The Commission has integrated data into its competition analysis by taking data protection into account as an element of quality, where evidence shows that a sufficiently large group of consumers view data protection as an aspect of the quality of a product, and by checking whether a proposed merger allowing the merging parties to accumulate large amounts of users' personal data provides them an insurmountable advantage (for example in terms of additional commercial insights) leading to foreclosure of competitors.</p> <p>In the context of digitalisation and application of machine learning and other data technologies in several industries, the Commission has more and more often assessed whether the combination of datasets under the ownership of one player may have a foreclosing effect to the detriment of competitors of the merging parties. The Commission remains vigilant in this emerging and fast-developing area and will take enforcement action if the circumstances.</p> <p>Furthermore, in antitrust, the Commission recognises that data and algorithms can play an important role in the definition of dominance. In the <i>Google Shopping</i> case, for example, the Commission considered Google's established position in general search as amounting to a dominant position, in virtue of amongst other factors its access to a very large amount of search query data. Going forward, the</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Commission will continue to take these elements into account in the context of its antitrust investigations.			
9)	23. Calls on the Commission to put forward a comprehensive set of provisions designed to regulate AI applications on a horizontal basis and to supplement them with sector-specific rules, for example for audio-visual media services;	<p>Welcoming the Parliament’s call on the Commission to put forward a horizontal set of provisions regulating Artificial Intelligence (AI) applications (points 23 and 43), the Commission notes that the legislative proposal for an Artificial Intelligence Act<sup>23</sup> (hereinafter AI Act) lays down harmonised and comprehensive rules for the secure and trustworthy development, deployment and use of AI systems in the Union. The proposal follows a horizontal, proportionate and risk-based regulatory approach to address the risks for fundamental rights and safety linked to certain uses of AI, without unduly constraining or hindering technological development and in full consistency with existing Union legislation applicable to sectors where high-risk AI systems are already used or likely to be used in the near future. ‘High-risk’ AI systems will have to comply with a set of horizontal mandatory requirements for trustworthy AI and follow conformity assessment procedures before they can be placed on the Union market.</p> <p>Notably, the proposal provides for a single future-proof definition of AI while being complemented by a list of specific techniques and approaches used for its development, such as machine learning. Where necessary, the proposal will be integrated into the existing sectoral safety legislation to ensure consistency, avoid duplications and minimise additional burdens. Additionally, in the legislative proposal for a Digital Services Act<sup>24</sup> the Commission has proposed rules applicable to certain</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">proposed AI act</a> and <a href="#">digital services act</a> ).	

<sup>23</sup> COM(2021) 206 final

<sup>24</sup> COM (2020) 825 final

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		automated systems used by online platforms, for example in content moderation, recommender systems or online advertising.			
10)	24. Stresses the need for investment in research and innovation on the development, deployment and use of AI and its applications in education, culture and the audio-visual sector; highlights the importance of public investment in these services and the complementary added value provided by public-private partnerships in order to achieve this objective and deploy the full potential of AI in these sectors, in particular education, in view of the substantial amount of private investment made in recent years; calls on the Commission to find additional funding to promote research and innovation into AI applications in these sectors;	Regarding the need for investments in research and innovation on the development, deployment and use of AI and its applications in education, culture and the audio-visual sector (point 24), the Commission will support research and innovation on the development of the use of AI, its applications and other advance education technologies under Cluster 2, "Culture, Creativity & Inclusive Society", of the Horizon Europe programme. Concerning the audio-visual sector, the Commission supports the AI4media project - a network of excellence centres boosting excellence in the development of AI for the media industry. Moreover, a call in Horizon Europe is planned on AI for combating disinformation.		<p><a href="#">Work programme 2021-2022</a> for the cluster dedicated to culture, creativity and inclusive society.</p> <p>A human-centred and ethical development of digital and industrial technologies 2021 (<a href="#">HORIZON-CL4-2021-HUMAN-01</a>).</p> <p><a href="#">AI4Media</a> is a 4-year-long project funded under the European Union's Horizon 2020 research and innovation programme.</p>	
11)	25. Underlines that algorithmic systems can be an enabler for reducing the digital divide in an accelerated way, but unequal deployment risks creating new divides or accelerating the deepening of existing ones; expresses its concern that knowledge and infrastructure are not developed in a consistent way across the Union, which limits the accessibility of products and services that rely on AI, in particular in sparsely populated and socio-economically vulnerable areas; calls on the Commission to ensure cohesion in the sharing of the benefits of AI and related technologies;	Concerning the necessity to focus on developing digital and AI related knowledge and infrastructure in a consistent way across the Union in order to reduce the digital divide (point 25), the Commission notes that a number of relevant measures are indicated in Section 8 of the Coordinated Plan on AI <sup>25</sup> , whose implementation is either undergoing or envisioned in the near future. The Commission also takes measures to support the development of the technological systems and the next-generation of data processing infrastructures as a key for enabling the use of data for AI. More information can be found in Section 3 of the Coordinated Plan on AI.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">coordinated plan on AI</a> ).	

<sup>25</sup> COM (2021) 205 final

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	<p>26. Calls on the Commission to establish requirements for the procurement and deployment of AI and related technologies by Union public sector bodies in order to ensure compliance with Union law and fundamental rights; highlights the added value of using instruments such as public consultations and impact assessments prior to the procurement or deployment of AI systems, as recommended in the report of the Special Rapporteur to the UN General Assembly on AI and its impact on freedom of opinion and expression<sup>26</sup>; encourages public authorities to incentivise the development and deployment of AI by public funding and public procurement; stresses the need to strengthen the market by providing SMEs with the opportunity to participate in the procurement of AI applications in order to ensure the involvement of technology companies of all sizes and thus guarantee resilience and competition;</p>	<p>With regard to the calls of the Parliament in relation to the procurement and deployment of AI and related technologies in the public sector (point 26), the Commission refers to Section 14 of the Coordinated Plan on AI, which focuses on measures to support the uptake of AI technologies in the public sector, including the development of the Adopt AI programme to support public procurement of AI systems and help to transform public procurement processes themselves. The section outlines specific action that the Commission is committed to undertake in the future, including in cooperation with Member States.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">coordinated plan on AI</a>).</p>	
13)	<p>28. Notes the benefits and risks of AI in terms of cybersecurity and its potential in combatting cybercrime, and emphasises the need for any AI solutions to be resilient to cyberattacks while respecting Union fundamental rights, especially the protection of personal data and privacy; stresses the importance of monitoring the safe use of AI and the need for close collaboration between the public and private sectors to counter user vulnerabilities and the dangers arising in this connection; calls on the Commission to evaluate the need for better</p>	<p>The Commission underlines that the mandatory requirements for high-risk AI systems envisaged in the AI Act proposal implement these considerations so as to effectively mitigate the risks for health, safety and fundamental rights, as applicable in the light of the intended purpose of the system. (...) high-risk AI systems should be designed in a way that ensures that users are able to interpret the system output and use it appropriately (Article 13). With respect to human oversight, Article 14 of the AI Act proposal ensures that the necessary measures are in place so that natural persons can oversee the functioning of high-risk AI systems and are</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposed AI act</a>).</p>	

<sup>26</sup> Report of the UN Special Rapporteur on the promotion and protection of the right to freedom of opinion and expression, 29 August 2018.

	prevention in terms of cybersecurity and mitigation measures thereof;	able to intervene on their operations. Moreover, Article 15 of the proposal specifies that high-risk AI systems must meet an appropriate level of accuracy, robustness and cybersecurity in accordance with the generally acknowledged state of the art, and perform consistently in those respects throughout their lifecycle.			
14)	29. Highlights that the COVID-19 pandemic crisis can be considered as a probation period for the development, deployment and use of digital and AI-related technologies in education and culture, as exemplified by the many online schooling platforms and online tools for cultural promotion employed across the Member States; calls on the Commission, therefore, to take stock of those examples when considering a common Union approach to the increased use of such technological solutions;	<p>[...] the Commission informs that it has been working intensively over the last years to support the digital transition in education and culture to make sure that everyone in Europe, including children, can benefit from digital technologies. Through research programmes such as Horizon 2020, many different projects were co-funded in different areas, such as the support of EdTech start-ups and small and medium sized enterprises (SMEs) or the development of whole-school approaches to ICT deployment and the mainstreaming of innovative practice involving ICT in schools across Europe.</p> <p>Given the crucial importance to take stock of best practice examples, the Commission also co-funded the Horizon 2020 project Del4All with the aim to consolidate digital enhanced learning projects into a cohesive, dynamic, participatory and sustainable ecosystem by analysing best-practice and success stories in order to stimulate collaboration among all key players in an inclusive and impactful way.</p> <p>The Commission aims to continue these efforts to take stock of best practice examples with the intention to fund a coordination and support action under the Digital Europe programme with the aim to promote European excellence in educational innovation by mainly supporting EdTech start-ups/ SMEs. One of the project goals would be to exchange best practices, analyse successful applications of digital technologies and potential market uptake,</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Horizon 2020 project Del4All</a> , Horizon 2020 Call - 'Acceleration Services in support of the institutional transformation of Higher Education Institutions' (European research area (HORIZON-WIDERA-2022-ERA-01))).

		<p>explore lessons learned during and after the COVID-19 crisis.</p> <p>In addition, in the framework of Action 10 ('Artificial Intelligence &amp; Analytics') of the 2018 Digital Education Action Plan, the Commission started exploring the use of AI and learning analytics in education to help predict skills shortages and support education systems to respond to skills needs and trends. As part of this effort, the Commission is supporting the development of two publicly available online services supporting higher education institutions interested in improving their educational programmes.</p>			
15)	<p>30. Recalls the importance of strengthening digital skills and achieving a high standard of media, digital and information literacy at Union level as a prerequisite for the use of AI in education; underlines the need, in this regard, to ensure Union-wide digital and AI literacy, in particular through the development of training opportunities for teachers; insists that the use of AI technologies in schools should help to narrow the social and regional digital gap; welcomes the Commission's updated Digital Education Action Plan, which addresses the use of AI in education; calls on the Commission, in that regard, to make digital capabilities, media literacy and training and AI-related skills the priorities of this plan, while raising awareness about the potential misuses and malfunctioning of AI;</p> <p>Calls on the Commission, in that connection, to place special emphasis on children and young people in precarious situations, as they need particular support in the area of digital education;</p>	<p>Within the framework of the Digital Education Action Plan 2021-2027, Action 6 is dedicated to Artificial Intelligence and Data. Its basic goals are to promote understanding of emerging technologies and their applications in education, to develop ethical guidelines on AI and data usage in teaching and learning for educators and support related research and innovation activities through the Horizon Europe programme. This will build on the Ethics Guidelines for Trustworthy Artificial Intelligence developed by the High-Level Expert group on AI. The ethical guidelines will be developed by an Informal Commission Expert Group that was launched on 8 July 2021. The guidelines, expected for September 2022, will be accompanied by a training programme for researchers and students on the ethical aspects of AI and include a target of 45 % of female participation in the training activities.</p> <p>In addition, Action 8 of the Digital Education Action Plan, under priority 2, envisages updating the European Digital Competences Framework for Citizens and Educators, to include also AI and data-related competences. Currently the Commission's Joint Research Centre is working to have the Framework updated in the first quarter of 2022.</p>		<p>A call was launched in July 2021, <a href="#">HORIZON-WIDERA-2021-ERA-01-91</a>: Ensuring reliability and trust in quality of research ethics expertise in the context of new/emerging technologies.</p> <p>An <a href="#">informal Commission expert group</a> was launched on 8/7/2021 and is currently working on guidelines (Q4 2022).</p> <p>An <a href="#">update</a> of the European digital competences framework for citizens and educators, DigComp version 2.2, is expected in the first quarter of 2022.</p> <p>A proposal for a Council recommendation on improving the provision of digital skills is expected in the <a href="#">last quarter of 2022</a>.</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	C C	Commission follow up Commission reply/commitment	C C
	Urges the Commission to duly address AI and robotics initiatives in education in its forthcoming AI legislative proposals; urges the Member States to invest in digital equipment in schools, using Union funds to this end;	<p>Moreover, Action 10 involves the preparation of a Council Recommendation on improving the provision of digital skills in education and training. The goal is to provide a coherent vision and shared language on providing high quality computing/informatics education to all students across Europe.</p> <p>Finally, the Commission has also set up Erasmus+ Teacher Academies as a new action in the Erasmus+ programme. It brings together teacher education providers – both for initial teacher education and for teachers continuing professional development to create a network with other relevant actors related to teacher education. These Academies will work together on common European issues such as digital education and equity and offer teachers with concrete learning opportunities on these matters. The first set of Erasmus+ Teacher Academies will be selected in the second half of this year and the projects will be operational in the beginning of 2022.</p>		<p>A call was launched in April 2021 - Partnership for excellence - Erasmus+ teacher academies, <a href="#">ERASMUS-EDU-2021-PEX-TEACH-ACA</a>.</p>	
16)	32. [...] Underlines that in order to engage with AI both critically and effectively, citizens need at least a basic understanding of this technology; calls on the Member States to integrate awareness-raising campaigns about AI in their actions on digital literacy; calls on the Commission and the Member States to promote digital literacy plans and forums for discussion to involve citizens, parents and students in a democratic dialogue with public authorities and stakeholders concerning the development, deployment and use of AI technologies in education systems;	<p>On the need for a democratic dialogue with public authorities and stakeholders concerning the development, deployment and use of AI technologies in education systems (point 32), the Commission should launch a strategic dialogue with Member States (Digital Education Action Plan 2021-2027, Action 1) in order to support them in the digital transformation of their education and training systems and prepare a possible proposal for a Council Recommendation on the enabling factors for successful digital education.</p>		<p>A structured dialogue <a href="#">was launched</a> in October 2021. A proposal for a Council recommendation on improving the provision of digital skills is expected in the <a href="#">last quarter of 2022</a>.</p>	
17)	42. Calls on the Commission to assess the level of risk of AI deployment in the education sector in order to ascertain whether AI applications in	<p>In the framework of Action 10, Artificial Intelligence &amp; Analytics, of the 2018 Digital Education Action Plan, the Commission started exploring the use of AI and learning</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>education should be included in the regulatory framework for high risk and subject to stricter requirements on safety, transparency, fairness and accountability, in view of the importance of ensuring that education continues to contribute to the public good and the acute sensitivity of data on pupils, students and other learners; underlines that datasets used to train AI should be reviewed in order to avoid reinforcing certain stereotypes and other kinds of bias;</p>	<p>analytics in education to help to predict skills shortages and support education systems to respond to skills needs and trends. As part of this effort, the Commission is supporting the development of two publicly available online services supporting higher education institutions interested in improving their educational programmes.</p> <p>Both projects should comply with the recently proposed AI Act, thus addressing the need to assess the level of risk of AI deployment in the education sector (point 42) in order to ascertain which AI applications in education are to be included in the regulatory framework for high risk and subject to stricter requirements on safety, transparency, fairness and accountability. Note that the proposed regulatory framework considers certain AI systems used in educational and vocational training as high-risk (see Annex III, point 3 of the proposed AI Act).</p>		<p>working on action falling under the scope of the EP request (<a href="#">proposed AI act</a>, Horizon 2020 Call - 'Acceleration Services in support of the institutional transformation of Higher Education Institutions' (<a href="#">European Research Area (HORIZON-WIDERA-2022-ERA-01)</a>).</p>	
18)	<p>43. Calls on the Commission to propose a futureproof legal framework for AI so as to provide legally binding ethical measures and standards to ensure fundamental rights and freedoms and the development of trustworthy, ethical and technically robust AI applications, including integrated digital tools, services and products such as robotics and machine learning, with particular regard to education;</p>	<p>The Commission informs that education and vocational training forms part of the areas in which the use of AI systems is classified as high-risk in the Commission's proposal. In particular, the Commission considers as high-risk the use of AI systems for the purpose of: (i) determining access or assigning individuals to educational and vocational training institutions; (ii) assessing students in educational and vocational training institutions as well as participants in tests required for admission to educational institutions (Annex III, point 3). However, further uses of AI systems in the area may be categorised as high-risk in the future based on clear and predictable criteria for assessing the level of risk of adverse impact on fundamental rights of natural persons (Article 7).</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposed AI act</a>).</p>	
19)	<p>44. Expresses serious concern that schools and other education providers are becoming increasingly dependent on educational technology (edtech) services, including AI</p>	<p>In order to tackle concerns over the robust protection and safeguard children's data in the education sector (point 44), Action 6 of the Digital Education Action Plan 2021-2027 will promote understanding of emerging</p>		<p>An <a href="#">informal Commission expert group</a> was launched on 8/7/2021 and is currently working on guidelines (Q4 2022).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>applications, provided by a few private companies that enjoy a dominant market position; believes that this should be scrutinised through Union competition rules; stresses the importance, in this regard, of supporting the uptake of AI by SMEs in education, culture and the audiovisual sector through the appropriate incentives that create a level playing field; calls, in this context, for investment in European IT companies in order to develop the necessary technologies within the Union, given that the major companies that currently provide AI are based outside the Union; strongly recalls that the data of minors is strictly protected by the GDPR and can only be processed if completely anonymised or consent has been given or authorised by the holder of parental responsibility, in strict compliance with the principles of data minimisation and purpose limitation; calls for more robust protection and safeguards in the education sector where children's data is concerned and calls on the Commission to take more effective steps in that regard; calls for clear information to be provided to children and their parents about the possible use and processing of children's data, including through awareness-raising and information campaigns;</p>	<p>technologies and their applications in education and develop ethical guidelines on AI and data usage in teaching and learning for educators. The ethical guidelines will be developed by an Informal Commission Expert Group, and are expected in September 2022.</p> <p>More generally when it comes to AI and education and skills, in its Communication on '2030 Digital Compass: the European way for the Digital Decade'<sup>27</sup>, the Commission identified a digitally skilled population and highly skilled digital professionals as one of the four 'cardinal points' for mapping the EU's trajectory, as part of a 'Digital Compass' to translate the EU's digital ambitions for 2030 into concrete targets and to ensure that these objectives are met. The Communication recalls that the European Pillar of Social Rights Action Plan includes the objective to increase the share of adults with basic digital skills to 80 % by 2030, and includes the target to increase the number of employed ICT specialists to 20 million by the same year, with convergence between women and men.</p> <p>In the same Communication, the Commission refers to universal digital education and skills for people to take an active part in society and in democratic processes as a principle that could be included in a possible set of digital principles and rights. The Commission will propose to include such a set of principles and rights in an interinstitutional solemn declaration between the Commission, the European Parliament and the Council. The Commission hopes to achieve decisive progress with the other institutions on such declaration by the end of 2021.</p>		<p>A <a href="#">declaration of digital principles – the 'European way' for the digital society</a> was expected in the last quarter of 2021.</p>	

<sup>27</sup> COM(2021) 118 final

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
20)	45. Underlines the specific risks in the use of AI automated recognition applications, which are developing at pace; recalls that children are a particularly sensitive group; recommends that the Commission and the Member States ban automated biometric identification, such as facial recognition for educational and cultural purposes, on educational and cultural premises, unless its use is allowed by law;		Concerning the use of biometric identification systems in the context of education and culture (point 45), the Commission recalls that Article 9 of the General Data Protection Regulation (GDPR) prohibits in principle the processing of biometric data for the purpose of unique identification, unless in specific situations and with appropriate safeguards.		No further specific actions proposed/promised to be taken by the Commission.	
21)	48. Stresses that next-generation digital infrastructure and internet coverage are of strategic significance for providing AI-powered education to European citizens; in light of the COVID-19 crisis, calls on the Commission to elaborate a strategy for a European 5G that ensures Europe's strategic resilience and is not dependent on technologies from states which do not share our values;		Concerning, the 5G (point 48), and in particular the security and resilience of 5G infrastructure deployment, the Commission's Cybersecurity Toolbox Communication <sup>28</sup> of January 2020 refers to a number of strategic and technical measures to be taken into account by Member States when assigning deployment licenses. These measures aim to create a security level-playing field in Europe and are coordinated with Member States through the Network and Information Security Cybersecurity Working Group. At this stage, the setting up of a European certification scheme to ensure compliance is under consideration with the European Union Agency for Cybersecurity (ENISA) support. In a longer-term perspective, the Commission supports the Smart Networks and Service Institutional Partnership under the Horizon Europe programme, which aims at reinforcing EU leadership in communication and service infrastructures, whilst reducing our exposure to non EU-based solutions.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">cybersecurity toolbox communication</a> ).	
22)	54. Stresses that good practices in AI technologies for the protection and accessibility of cultural heritage, in particular for people with disabilities,		The Commission recognises the importance and potential of AI for cultural heritage (point 54) both for facilitating			

<sup>28</sup> COM(2020) 50 final

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>should be identified and shared between cultural networks across the Union, while encouraging research on the various uses of AI to promote the value, accessibility and preservation of cultural heritage; calls on the Commission and the Member States to promote the opportunities offered by the use of AI in the CCSI;</p>	<p>access, and for providing protection of these valuable and irreplaceable resources.</p> <p>In April 2021, the Commission arranged a focused session on AI-related skills and challenges for cultural heritage at the fourth meeting of the Commission's Expert Group on Cultural Heritage. This session was coordinated and led by members of the group: the group's IT expert, Europeana and Interpret Europe. A further information session will cover issues like the idea behind AI and machine/deep learning for cultural heritage, the current and future potential advantages and new capabilities that AI/Machine Learning brings for cultural heritage and creativity; how stakeholders can become able to use/take advantage of AI/Machine Learning tools; and examine some specific platforms/tools for an AI-enabled application.</p> <p>More broadly, the Commission recognises the importance of making Europe's culture heritage more widely accessible online to the whole population, including persons with disabilities. The Commission has proposed actions for digital cultural heritage under the Horizon Europe programme (a Cluster 2 call for preserving and enhancing cultural heritage using advanced digital technologies) and under the Digital Europe Programme, which will allow cultural heritage institutions to test and adopt advanced technologies such as AI.</p> <p>The upcoming revision of the Commission Recommendation on digitisation, online accessibility and digital preservation will encourage the Member States to support the cultural heritage institutions in taking up artificial intelligence and other advanced technologies in order to ensure a more efficient process of digitisation and digital preservation and a higher quality. The revised recommendation will also encourage the Member States to take the necessary measures to assess the digital skills gap in the sector, and set ambitious objectives to upskill</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Commission's expert group on cultural heritage</a>).</p> <p>Horizon 2020 call launched in June 2021: Preserving and enhancing cultural heritage with advanced digital technologies (<a href="#">HORIZON-CL2-2021-HERITAGE-01-04</a>).</p> <p>The Commission finalised in early January 2021 the <a href="#">evaluation of digitisation and online access of cultural material and digital preservation</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and reskill cultural heritage professionals, to be able to fully exploit the opportunities brought by advanced digital technologies.			
23)	58. Regrets the fact that culture is not among the priorities outlined in policy options and recommendations on AI at Union level, notably the Commission's white paper of 19 February 2020 on AI; calls for these recommendations to be revised in order to make culture an AI policy priority at Union level; calls on the Commission and the Member States to address the potential impact of the development, deployment and use of AI technologies on the CCSI and to make the most of the Next Generation EU recovery plan to digitise these sectors to respond to new forms of consumption in the 21st century;	<p>In relation to the policy approach to AI and Culture (points 58) the Commission underlines that culture and cultural diversity, as highlighted for example in the Ethics Guidelines for Trustworthy AI, are important elements of the human centric approach to AI that the Commission strongly promotes both in the European Union and internationally. The Commission stands strong to support the development and deployment of trustworthy AI.</p> <p>The 2021 review of the Coordinated Plan on AI and the proposal for an AI Act, while not specifically addressing culture and creative sectors and industries, should be considered as the first steps to build an ecosystem of trust and promote uptake of human-centric AI. In the framework of the 2021 review of the Coordinated Plan, the Commission has closely worked with the Member States to define priority areas of collaboration on AI policy. The priority areas in the Coordinated Plan are the result of the common agreement between the Commission and Member States. The future reviews of the Coordinated Plan will likely include additional sectors and industries. Furthermore, should AI applications in the area of culture pose high risks with respect to fundamental rights, health or safety in the future, the proposed horizontal regulatory framework would be able to respond in a dynamic manner through updates of the relevant list of high-risk use cases.</p> <p>In order to better understand the opportunities and challenges of AI and related technologies for the cultural and creative sectors and industries the Commission launched a study that will be completed by the end of 2021. This study is looking into the diverse links between AI and cultural sectors and exploring how AI can be</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">coordinated plan on AI</a>).</p> <p><a href="#">Advanced technologies for industry - Sectoral watch: technological trends in creative industries</a>, May 2021.</p> <p><a href="#">Transforming the creative and cultural industries with advanced technologies</a> - Sectoral watch: technological trends in the creative industries, October 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		developed in ways that respect Europe’s cultural diversity and ethical values.		<a href="#">Innovation ecosystems in the creative sector</a> - The case of additive manufacturing and advanced materials for design, December 2021.	
24)	59. Points out that AI has now reached the CCSI, as exemplified by the automatic production of texts, videos and pieces of music; emphasises that creative artists and cultural workers must have the digital skills and training required to use AI and other digital technologies; calls on the Commission and the Member States to promote the opportunities offered by the use of AI in the CCSI, by making more funding available from science and research budgets, and to establish digital creativity centres in which creative artists and cultural workers develop AI applications, learn how to use these and other technologies and test them;	Furthermore, on the need to address the potential impact of the development, deployment and use of AI technologies (paragraph 58) and to promote the opportunities offered by the use of AI in the CCSI (point 59), the above-mentioned study should recommend ways in which EU support programmes, including Creative Europe, Horizon Europe and the EU Recovery Plan, can help transform the cultural and creative ecosystem through investing in AI. Among the challenges the study will explore, is the acquisition of up-to-date digital skills. The study is also to examine opportunities for cross-sector collaboration to tackle common challenges. It should also be noted that the Recovery and Resilience Facility, which will make EUR 672.5 billion in loans and grants available to support reforms and investments undertaken by Member States, provides that each national recovery and resilience plan will have to include a minimum of 20 % of expenditure to foster the digital transition. These funds will be dedicated, among others, to building the digital skills and training required to use AI and other digital technologies.		<a href="#">Advanced technologies for industry - Sectoral watch: technological trends in creative industries</a> , May 2021. <a href="#">Transforming the creative and cultural industries with advanced technologies</a> - Sectoral watch: technological trends in the creative industries, October 2021. <a href="#">Innovation ecosystems in the creative sector</a> - The case of additive manufacturing and advanced materials for design, December 2021.	
25)	61. Emphasises that the interaction between AI and the CCSI is complex and requires an in-depth assessment; welcomes the Commission’s report of November 2020 entitled ‘Trends and Developments in Artificial Intelligence – Challenges to the IPRS Framework’ and the study on copyright and new technologies: copyright	In relation to paragraph 61, the Commission welcomes the support of the European Parliament and recognises the need for in-depth assessments of the interaction between AI and creative sectors. The study mentioned above when discussing paragraph 58 will look into the business opportunities and challenges of AI in creative sectors. It will identify inspiring use cases for all creative sectors and		<a href="#">Advanced technologies for industry - Sectoral watch: technological trends in creative industries</a> , May 2021. <a href="#">Transforming the creative and cultural industries with advanced technologies</a> - Sectoral watch: technological trends in the creative industries, October 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>data management and artificial intelligence; underlines the importance of clarifying the conditions of use of copyright-protected content as data input (images, music, films, databases, etc.) and in the production of cultural and audiovisual outputs, whether created by humans with the assistance of AI or autonomously generated by AI technologies; invites the Commission to study the impact of AI on the European creative industries; reiterates the importance of European data and welcomes the statements made by the Commission in this regard, as well as the placing of artificial intelligence and related technologies high on the agenda;</p>	<p>examine the necessary access to finance, skills, technologies and data to deploy AI.</p> <p>The first part of the study on Copyright and New Technologies mentioned in the resolution is to look into the potential use of new technologies to improve the management of data linked to copyright-protected content by European creative industries, which have an impact on transparency and identification of rights owners. The Commission is pleased to note that the resolution welcomes its work on this study. Furthermore, the European Union Intellectual Property Office is conducting a study on the Impact of Artificial Intelligence on Infringement and Enforcement of Copyright and Design.</p>		<p><a href="#">Innovation ecosystems in the creative sector</a> - The case of additive manufacturing and advanced materials for design, December 2021.</p> <p><a href="#">EUIPO study</a>: Intellectual property infringement and enforcement tech watch (2020).</p>	
26)	<p>64. Calls on the Commission and the Member States to support a democratic debate on AI technologies and to provide a regular forum for discussion with civil society, researchers, academia and stakeholders to raise awareness on the benefits and the challenges of its use in the CCSI; emphasises, in that connection, the role which art and culture can play in familiarising people with AI and fostering public debate about it, as they can provide vivid, tangible examples of machine learning, for example in the area of music;</p>	<p>Regarding the need to support a democratic debate on AI technologies and the role which art and culture can play in familiarising people with AI and fostering public debate about it (point 64), the Commission refers to the Creative Europe programme support for cooperation projects that are relevant in this regard. For example, the project "European ARTificial Intelligence Lab" aims to bring AI related scientific and technological topics to citizens and art audiences in order to contribute to a critical and reflective society. The project "AI for future" aims at enhancing the understanding and dissemination of AI related technologies for the active and creative participation of young activists to the European cultural scene, allowing them to work with artists for a joint creation of a new urban community awareness. The project "Tele-encounters beyond the human" explores the impact of the Internet, robots, and AI on human relationships, as well as the meaningful integration of these technologies in the arts. Its aim is to consolidate the abilities of artists, culture professionals, technologists, and researchers to</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Creative Europe programme</a>).</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	C C	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				engage critically with new media. The project is also meant to open a debate about the future and ethics of human-robot interactions to the larger audience. Another project, "the New Networked Normal" has addressed critical issues through an innovative programme of cultural activities exploring art, technology and citizenship, including themes such as algorithmic citizenship.  Moreover, the Commission concurs on the fact that sectors like music can be a very good example for a debate to raise further awareness and knowledge of the use of AI. It is also a topic that the Commission plans to further study from a cultural diversity perspective, in order to assess whether AI can further contribute to cultural diversity or whether it could actually favour some genres and some artists at the expense of others.			
	65. Calls on the Commission and the Member States to address the issue of AI-generated content and its challenges to authorship and copyright infringement;  27) Asks the Commission, in that regard, to assess the impact of AI and related technologies on the audiovisual sector and the CCSI, with a view to promoting cultural and linguistic diversity, while respecting authors' and performers' rights;			The Commission shares the view of the Parliament that the interplay between AI and copyright is a complex matter that requires in-depth assessment and a balanced, open and evidence-based approach. For example, the study mentioned by paragraph 61 of the resolution on 'Trends and Developments in Artificial Intelligence – Challenges to the Intellectual Property Rights Framework' <sup>29</sup> started to look at how the current copyright framework deals with the authorship and ownership of AI outputs.		No further specific actions proposed/promised to be taken by the Commission.	
	68. Calls on the Commission to carry out studies and consider policy options to tackle the detrimental impact of AI-based control of online streaming services designed to limit diversity and/or maximise profits by including or			Concerning the impact of AI-based control of online streaming services referred to in paragraph 68, it should be noted that the revised Audiovisual Media Services Directive (AVMSD) <sup>30</sup> contributes to the promotion of production and distribution of European works by		No further specific actions proposed/promised to be taken by the Commission.

<sup>32</sup> COM/2020/760 final

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Intellectual Property Action Plan <sup>33</sup> , the Commission said that 'whilst inventions and creations autonomously created by AI technologies are still mostly a matter for the future, the Commission takes the view that AI systems should not be treated as authors or inventors'.			
32)	76. Calls on the Commission to lay down rules designed to guarantee effective data interoperability in order to make content purchased on a platform accessible via any digital tool irrespective of brand;	As regards paragraph 76, the topic of interoperability was discussed in the negotiation on the Digital Content Directive (Directive (EU) 2019/770 on certain aspects concerning contracts for the supply of digital content and digital services). The co-legislators decided however not to include a respective provision in the Digital Content Directive as this issue does not concern contract law.		No further specific actions proposed/promised to be taken by the Commission.	
33)	77. Notes that AI is often used to enable automated decision-making algorithms to disseminate and order the cultural and creative content displayed to users; stresses that these algorithms are a 'black box' for users; stresses that the algorithms used by media service providers, video sharing platforms (VSPs) and music streaming services should be designed in such a way that they do not privilege specific works by limiting their 'personalised' suggestions to the most popular works, for targeted advertising, commercial purposes or to maximise profit; calls for recommendation algorithms and personalised marketing to be explainable and transparent where possible, in order to give consumers an accurate and comprehensive insight into these processes and content and to ensure that personalised services are not discriminatory and in line with the recently adopted Platform to	As concerns paragraph 77, where content is disseminated by online platforms, acting as intermediaries, note that the Commission's proposal for the Digital Services Act includes a comprehensive set of rules, both to empower users when interacting with recommender systems, and to ensure that very large online platforms, with the highest societal impacts in the Union, assess and address the risks stemming from their service, including the design and use of their recommender systems, and with a particular regard for fundamental rights such as non-discrimination. The proposal also includes similar rules on advertising displayed on such online platforms. The Commission stresses the importance of compliance and effective enforcement of the GDPR for automated decision-making based on personal data. The Commission's reply to paragraph 68 above, is also relevant in this context for the AVMSD.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">digital services act</a> ).	

<sup>33</sup> COM/2020/760 final

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Business Regulation<sup>34</sup> and New Deal for Consumers Omnibus Directive<sup>35</sup>; calls on the Commission to address the ways in which content moderation algorithms are optimised to engage users, and to propose recommendations to increase user control over the content they see, by guaranteeing and properly implementing the right of users to opt out of recommended and personalised services; underlines, moreover, that consumers must be informed when they are interacting with an automated decision process and that their choices and performance must not be limited; stresses that the use of AI mechanisms for the commercial surveillance of consumers must be countered, even if it concerns 'free services', by ensuring that it is strictly in line with fundamental rights and the GDPR; stresses that all regulatory changes must take into consideration the impact on vulnerable consumers;</p>				
34)	<p>81. Calls on the Commission and the Member States to step up their financial support for the development, deployment and use of AI in the area of the automatic subtitling and dubbing of European audiovisual works, in order to foster cultural and language diversity in the Union and enhance the dissemination of and access to European audiovisual content;</p>	<p>The Commission is stepping up efforts in the area of audiovisual subtitling referred to in paragraph 81. Through the Preparatory Action 'Crowdsourcing subtitling to increase the circulation of European works' the Commission has tested the impact of innovative solutions/processes/models for subtitling. In the new Creative Europe MEDIA programme, subtitling and dubbing are eligible activities and costs. In 2020 the Commission set up the Open Method of Coordination</p>		<p>'Crowdsourcing subtitling to increase the circulation of European works' was launched in <a href="#">2017</a>. Call for proposals for <a href="#">Creative Europe programme</a>, June 2021. <a href="#">Mandate</a> for the Open Method of Coordination group of Member States' experts on multilingualism and translation, February 2020.</p>	

<sup>34</sup> Regulation (EU) 2019/1150 of the European Parliament and of the Council of 20 June 2019 on promoting fairness and transparency for business users of online intermediation services (OJ L 186, 11.7.2019, p. 57).

<sup>35</sup> Directive (EU) 2019/2161 of the European Parliament and of the Council of 27 November 2019 amending Council Directive 93/13/EEC and Directives 98/6/EC, 2005/29/EC and 2011/83/EU of the European Parliament and of the Council as regards the better enforcement and modernisation of Union consumer protection rules (OJ L 328, 18.12.2019, p. 7).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>group on multilingualism and translation (which covers, among others, audio-visual works). One of the objectives of this group is to reinforce the translation sector and improve the working conditions and professional opportunities for translators/adaptors. The Commission will further explore how new technologies like AI and automated translation can reinforce subtitling and dubbing of European audio-visual works and enhance the dissemination of, and access to, European audio-visual content.</p>			
35)	<p>82. Calls on the Commission to establish a clear ethical framework for the use of AI technologies in media in order to prevent all forms of discrimination and ensure access to culturally and linguistically diverse content at Union level, based on accountable, transparent and inclusive algorithms, while respecting individuals' choices and preferences;</p>	<p>The Commission underlines that the proposed AI Act lays down transparency obligations for certain AI systems in Article 52. It is thus required that people are informed when interacting with a machine such as chatbots in social networks, unless this is obvious from the circumstances and the context of use. Individuals should also be notified when exposed to an emotion recognition system or a biometric categorisation system. The proposed AI Act is also relevant in the context of false and manipulated content such as deepfakes (see further down under paragraphs 91 and 92).</p> <p>Furthermore, concerning AI and media, apart from the points already made above on the AVMSD in particular, note that when media content is distributed through online platforms, the Commission's proposal for the Digital Services Act includes specific measures for empowering users in making informed choices, as well as obligations on platforms to assess and mitigate certain risks stemming from their recommender systems, for example.</p> <p>In addition to what is stated above on the new proposal for an AI Act, the Commission is already taking further important steps to counter the spread of disinformation</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">proposed AI act</a>, <a href="#">digital services act</a>, <a href="#">EU code of practice on disinformation</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>online. The proposed Digital Services Act includes clear rules for tackling systemic risks in this regard.</p> <p>Another key instrument is the self-regulatory Code of Practice on Disinformation, signed by major online platforms active in the EU as well as major trade associations from the European advertising sector. On 26 May 2021, the Commission published a Guidance setting out the Commission's views on how signatories should strengthen the Code of Practice to become a more powerful instrument in fighting disinformation. Among various measures, the Guidance calls for additional efforts to tackle all current and emerging manipulative techniques, including AI driven ones such as deepfakes. It also calls for specific commitments on algorithmic transparency, in line with the proposed Digital Services Act. Furthermore, the Guidance also calls for AI driven measures to counter disinformation, for instance by giving visibility to reliable information of public interest.</p>			
36)	<p>83. Points out that AI can play a major role in the rapid spread of disinformation; stresses, in that regard, that the framework should address the misuse of AI to disseminate fake news and online misinformation and disinformation, while avoiding censorship; calls on the Commission, therefore, to assess the risks of AI assisting the spread of disinformation in the digital environment as well as solutions on how AI could be used to help counter disinformation;</p>	<p>The Commission underlines that the proposed AI Act lays down transparency obligations for certain AI systems in Article 52. It is thus required that people are informed when interacting with a machine such as chatbots in social networks, unless this is obvious from the circumstances and the context of use. 		<p>users in making informed choices, as well as obligations on platforms to assess and mitigate certain risks stemming from their recommender systems, for example.</p> <p>In addition to what is stated above on the new proposal for an AI Act, the Commission is already taking further important steps to counter the spread of disinformation online. The proposed Digital Services Act includes clear rules for tackling systemic risks in this regard. Another key instrument is the self-regulatory Code of Practice on Disinformation, signed by major online platforms active in the EU as well as major trade associations from the European advertising sector. On 26 May 2021, the Commission published a Guidance setting out the Commission's views on how signatories should strengthen the Code of Practice to become a more powerful instrument in fighting disinformation. Among various measures, the Guidance calls for additional efforts to tackle all current and emerging manipulative techniques, including AI driven ones such as deepfakes. It also calls for specific commitments on algorithmic transparency, in line with the proposed Digital Services Act. Furthermore, the Guidance also calls for AI driven measures to counter disinformation, for instance by giving visibility to reliable information of public interest.</p>			
37)	84. Calls on the Commission to take regulatory measures to ensure that media service providers have access to the data generated by the provision and dissemination of their content on other providers' platforms; emphasises that full data transfer from platform operators to media service providers is vital if the latter are to understand their audience better and thus improve the services they offer in keeping with people's wishes;	Concerning the points made by the Parliament in paragraph 84, the already mentioned proposal for a Digital Markets Act aims to ensure fair and contestable markets in the digital sector. To this end the proposal lays down a number of obligations and prohibitions applicable to designated gatekeepers, such as data portability obligations relevant for gatekeeper's business and end users or obligations concerning access to performance measuring tools in relation to advertising services provided by gatekeepers to their business users.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">digital markets act</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
38)	<p>90. Notes the important role which independent media play in culture and the daily life of citizens; stresses that disinformation represents a fundamental problem, as copyright and IPR generally are being constantly infringed; calls on the Commission, in cooperation with the Member States, to continue its work on raising awareness of this problem, countering the effects of disinformation as well as the source problems; considers it important, furthermore, to develop educational strategies to specifically improve digital literacy in this regard;</p>	<p>The Commission agrees on the importance to enhance media literacy skills for EU citizens of all ages in the context of disinformation (point 90). As referred to in the recent Guidance on strengthening the Code of Practice on Disinformation, mentioned above, media literacy and user empowerment can contribute significantly to the fight against disinformation. In the context of the Digital Education Action Plan, the Commission has set out a number of initiatives and practical tools to enhance digital literacy in education, including the preparation of a comprehensive set of guidelines to tackle disinformation and enhance digital literacy skills for teachers and educational staff.</p> <p>The European Digital Media Observatory (EDMO) and its national hubs will also foster European and national media literacy activities among other activities, increase public awareness, and support media literacy campaigns.</p> <p>Under the next EU financial framework, funding of media literacy activities will be mainstreamed under the new Creative Europe Programme (2021-2027), following the implementation of the European Parliament preparatory action "Media Literacy for All". One of the specific aims of Creative Europe is to promote cross-sectoral innovative and collaborative actions as well as diverse, independent and pluralistic media environment and media literacy, thereby fostering freedom of artistic expression, intercultural dialogue and social inclusion. The first call for proposals under the new media literacy scheme should be launched in the second half of 2021 with a budget of EUR 2.4 million. Creative Europe will further guarantee funding of the Commission's Media Literacy Expert Group, an effective member state forum for the sharing of good practice and awareness raising on European media literacy practice.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">guidance on strengthening the code of practice on disinformation</a> , <a href="#">European digital media observatory (EDMO)</a> , <a href="#">Creative Europe programme (2021-2027)</a>).</p> <p><a href="#">Media literacy for all - Call for proposals 2020</a></p> <p>A new 'Media literacy' program will be launched under the 'Creative Europe' - 'Media' program for the period 2021-2027.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
39)	<p>91. Recalls that with new techniques rapidly emerging, detecting false and manipulated content such as deepfakes may become increasingly challenging due to the ability of malicious producers to generate sophisticated algorithms that can be successfully trained to evade detection, thus seriously undermining our basic democratic values; asks the Commission to assess the impact of AI in the creation of deepfakes, to establish appropriate legal frameworks to govern their creation, production or distribution for malicious purposes, and to propose recommendations for, among other initiatives, action against any AI-powered threats to free and fair elections and democracy;</p>	<p>Concerning paragraphs 91 and 92, the Commission agrees that while the threat deepfakes pose to political discourse has not yet fully materialized, deepfakes represent the highest concern amongst emerging threats for geopolitical and civil security, and hence they require a robust political, legal and technological preparedness. Malicious actors may try to harness the latest advances in AI and deep learning to manipulate the public debate and electoral processes, which may lead to the destabilisation not just countries but entire regions. Deepfakes harming individuals, spreading panic or in other ways representing a threat to public security are already penalised by national criminal or administrative law. In addition, according to the proposal for an AI Act, users who use an AI system in order to create deepfakes should disclose that the content has been artificially created or manipulated. The labelling of deepfakes will thus help reduce the spread and scale of misinformation. Furthermore, the placing on the market, putting into service or use of certain manipulative AI systems, including in media, are to be prohibited under the proposed AI Act (Article 5). The detection of deepfakes in the context of detecting, preventing, investigating or prosecuting a criminal offence qualifies as a high-risk application due to its high stake in the procedure.</p> <p>Furthermore, as mentioned above, in the Commission Guidance on Strengthening the Code of Practice on Disinformation, the Commission called on signatories of the Code to commit to tackling all forms of current and emerging techniques of manipulative behaviour on their services, including deepfakes. The Commission will facilitate the drafting of the revised Code and closely monitor its implementation through a rigid monitoring and reporting framework. Combined with the activities of the European Digital Media Observatory (EDMO) and its national hubs, the revised Code will create the conditions</p>		<p>The Commission <a href="#">announced</a> in December 2021 that 26 new prospective signatories would contribute to the drafting process on a revised code of practice on disinformation. The revised code is expected by the end of March 2022.</p> <p>The Commission will present in January 2022 a <a href="#">package</a> of measures to ensure greater transparency in political advertising.</p> <p><a href="#">ALIGNER</a> (Artificial Intelligence Roadmap for Policing and Law Enforcement) funded under H2020.</p> <p>The European research executive agency received 230 proposals in late November 2021. More information: <a href="#">Horizon Europe security research calls</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>to limit AI-powered threats to free and fair elections in the EU. Moreover, through the Horizon Europe programme the Commission will finance research and innovation activities aiming at developing AI-based tools which help professionals and citizens to detect content manipulated through sophisticated techniques.</p> <p>Furthermore, in the European Democracy Action Plan the Commission recognises need for more transparency in political advertising and communication, and the commercial activities surrounding it. In the online environment, it is often difficult to recognise paid-for political material and distinguish it from other political content, not least because it can often appear as 'organic' content shared or created by other users. New techniques used by intermediaries/service providers to target advertising on the basis of users' personal information enable political adverts to be amplified and tailored to an individual's or a group's specific profiles, often without their knowledge. Micro-targeting and behavioural profiling techniques can rely on data improperly obtained, and be misused to direct divisive and polarising narratives. This process makes it much harder to hold politicians to account for the messaging and opens new way for attempts to manipulate the electorate. Other concerns are the concealment and/or misrepresentation of key information such as the origin, intent, sources and funding of political messages.</p> <p>To address these concerns, in 2021, the Commission will present a legislative proposal on the transparency of sponsored political content. The proposal will complement the rules on online advertising in the proposed Digital Services Act, with the aim to have dedicated rules in place sufficiently ahead of the May 2024 European Parliament elections.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Furthermore, the Commission’s proposal for the Digital Services Act addresses the manipulation of platforms’ services with a significant impact on electoral processes or civil discourse, through obligations on very large online platforms to assess and address such risks, coupled with appropriate user information and public oversight.</p> <p>In addition, the Commission addresses the detection of deepfakes and image manipulation via certain security research projects under Horizon 2020 as well as via the coming security research call under Horizon Europe. Some national law enforcement agencies have also been intensifying research in this area such as the Netherlands Forensic Institute (NFI), which is investigating deepfake technology and detection tools, together with University of Amsterdam<sup>36</sup>.</p> <p>The Commission stresses, at the same time, that the so-called deepfake applications are not always harmful and they do not consistently pose societal risks. Where legitimate use and content is disseminated, the Commission does not support measures to limit expression.</p>			
40)	<p>92. Welcomes recent initiatives and projects to create more efficient deepfake detection tools and transparency requirements; stresses, in this regard, the need to explore and invest in methods for tackling deepfakes as a crucial step in combatting misinformation and harmful content; considers that AI-enabled solutions can be helpful in this regard; asks the Commission, therefore, to impose an obligation for all deepfake material or any other realistically made</p>	<p>Concerning paragraphs 91 and 92, the Commission agrees that while the threat deepfakes pose to political discourse has not yet fully materialized, deepfakes represent the highest concern amongst emerging threats for geopolitical and civil security, and hence they require a robust political, legal and technological preparedness. #### 4.1.10.5. CULT Resolution 5: EP resolution of 20 October 2021 on a Europe's Media in the Digital Decade : an Action Plan to Support Recovery and Transformation

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>A Europe's Media in the Digital Decade : an Action Plan to Support Recovery and Transformation</b>	20/10/2021 <a href="#">T9-0428/2021</a> <a href="#">2021/2017 (INI)</a> CULT	N.A. <sup>38</sup>					
1)	1. Highlights the fallout from the economic downturn and strongly reiterates its call on the Commission and the Member States to increase the support available for the news media and audiovisual sectors, and the cultural and creative sectors more broadly, with a special focus on SMEs; considers that allocations for the news media and audiovisual sectors should be increased across various multiannual financial framework (MFF) programmes; notes the need for the EU and the Member States to support these sectors and calls on the Commission to strongly encourage the Member States to increase support for them from the funds made available via their approved national recovery plans, so that they can fully recover from the pandemic, become more sustainable and continue their green and digital transition; considers that special attention in all of the initiatives should be paid to local and regional media and to news media operating in small markets; underlines the need for a transparent and open support mechanism in order to maintain the independence of the media;						

<sup>38</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	2. Welcomes the launch of the 'NEWS' initiative for the news media, including the proposal to establish a European News Media Forum, which should be as inclusive as possible and lead to thorough discussions with the relevant sectors on their ongoing transformations; invites the Commission to further develop this initiative and make it permanent, should stakeholders so request [...]				
3)	7. Welcomes the establishment of an equity-based pilot initiative through InvestEU that will be able to support the news media sector in innovative ways; calls on the Commission to provide this pilot initiative with adequate financial means;				
4)	8. Regrets that some parts of the media ecosystem are not covered by current support measures; invites the Commission to continue exploring tailored support schemes for news media and to envisage setting up such insurance guarantees for audiovisual co-production; urges that particular attention be paid in all support actions to Member States with low audiovisual production capacity; underlines the benefits of Member States sharing best practices with one another to support the audiovisual ecosystem;				
5)	9. Urges the Commission to acknowledge the unique nature of Euranet Plus as an independent radio network that successfully bridges the information gap between the EU and its citizens by strengthening understanding of and promoting debate on all fields of EU policy making; calls for a renewal of Euranet Plus' current core funding in the form of a transitional grant agreement for at least 2 years, so that it can develop a long-term strategic plan aimed at				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	further developing the network by the end of 2027, with a view to extending its membership and geographic and linguistic coverage, preparing for the digital shift and investing in further improvements of its products and services;				
6)	10. Invites the Commission to conduct a study on news media funding support in the EU, develop guidelines and facilitate the sharing of information and best practices among Member States on public financing mechanisms; reiterates that the study should be carried out by independent bodies [...]				
7)	13. [...] welcomes the Commission's announcement of additional financial support for the European network of cinemas; calls also on the Commission to facilitate the exchange of good practices among Member States in order to support the competitiveness of the media and audiovisual sectors; underlines, however, that special tax policies should ensure an equal playing field for all media developers and not harm SMEs and freelancers;				
8)	15. [...] invites the Commission, at the same time, to better take into account developments in the digital competitive environment to enable EU media players to continue to compete and play a significant role in the long term; underlines that new media can play a constructive and active role in smaller markets and in countries and regions with a low rate of media freedom in allowing access to independent coverage of information;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	18. [...] calls on the Commission to closely monitor developments in this regard and encourages it to explore how the media sector may be assisted with respect to the new neighbouring right to ensure the possibility of fair negotiations with platforms; notes that the role and capacity of the European Regulators Group for Audiovisual Media Services (ERGA) should be strengthened;				
10)	21. Highlights the importance of availability of information and access to news media for every EU citizen in their respective language; considers that more coverage should be devoted to EU news in order to inform citizens about the activities of the Union; reiterates its support for the news media that have made the editorial choice to cover European affairs; calls on the Commission and the Member States to continue their efforts to promote the emergence of a genuine European media ecosystem; considers, in addition, the benefits of alternative community-led funding mechanisms such as 'for the media and by the media', with independent boards governed by a 'cascade' system <sup>39</sup> ;				
11)	22. [...] calls on the Commission to ensure a more comprehensive monitoring of the political economy of the news media sector in the EU and in the European Neighbourhood and Enlargement region;				
12)	25. Believes that the EU can contribute to ensuring that international media freedom standards are further strengthened both within				

<sup>39</sup> [https://eic.ec.europa.eu/eic-funding-opportunities/european-innovation-ecosystems/calls-proposals/ufo-open-call-cascade\\_en](https://eic.ec.europa.eu/eic-funding-opportunities/european-innovation-ecosystems/calls-proposals/ufo-open-call-cascade_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and beyond the EU; urges the Commission to develop an ambitious, robust and complete mechanism that covers all media, founded on the current legislation, notably the AVMSD, to strengthen the EU's capacity to monitor and sanction actions that would limit or harm media freedom [...]				
13)	26. Welcomes the Commission Recommendation of 16 September 2021 <sup>40</sup> on ensuring the protection, safety and empowerment of journalists and other media professionals in the European Union, and calls on the Commission and the Member States to effectively protect journalists NGOs and civil society with legislative and non-legislative tools against the increasing use of vexatious lawsuits (SLAPPS) in order to intimidate and silence them; emphasises the importance of investigative journalism, which is being threatened by the associated high costs, and welcomes the Investigative Journalism for Europe (IJ4EU) fund in support for such journalism;				
14)	27. [...] asks the Commission to monitor the situation closely and, if appropriate, take necessary action to make conditions for competition more equitable so as to ensure that EU citizens are well served regardless of the distribution means they choose to access content and information;				
15)	28. [...] asks the Commission, therefore, to remain vigilant with regard to these developments, to

	monitor the situation closely and, where appropriate, to take all necessary actions to make conditions for competition equitable;				
16)	29. Considers that the transparency of algorithms and recommender systems is needed to ensure the fairer presence of European works on online platforms and to provide real consumer choice; invites the Commission to assess the role of streaming services, in particular, in view of the converging online media environment, and, if necessary, to provide incentives for cultural diversity and the discoverability of European works on such services, which may also be promoted via algorithms;				
17)	31. Notes that, despite some similarities, the news media and audiovisual sectors face different challenges; calls, therefore, on the Commission to develop comprehensive European news media and audiovisual sector-specific strategies, engaging stakeholders for high added value activities in which the EU is a competitive player or has the potential to be one, such as video games and virtual reality, that will provide tailored support measures for the news media and audiovisual sectors [...]				
18)	32. [...] calls on the Commission and the Member States to provide tailored support for the digital transformation of these sectors, notably by earmarking funding in Horizon Europe;				
19)	34. Calls on the Commission to develop an overarching media and information literacy strategy; underlines the added value of including the media sector stakeholders in media and information literacy (MIL) initiatives (including				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>monitoring and actions); believes that civil society organisations play a key role in fostering MIL and therefore asks the Commission and the Member States to include them as stakeholders in initiatives dedicated to promote journalism and MIL; emphasises the need for media education to be promoted in formal, informal and non-formal settings through a life-long learning approach in order to promote digital and media skills throughout life and from an early age; calls, in particular, on the Commission to encourage support for media literacy education programmes and initiatives in universities; welcomes the implementation, in close cooperation with the ERGA, of a media literacy toolbox and the practical application of the new media literacy obligations provided for by the AVMSD;</p>				
20)	<p>39. [...] calls on the Commission to take into due account the outcome of such dialogue and to use it to explore alternative funding models while fully respecting copyright rules, territorial exclusivity and the fair remuneration of the rights holders;</p>				
21)	<p>41. Urges the Commission and the Member States to create tools and support actions that pay attention to the low audiovisual production capacity of some Member States; recalls the adoption of the revision of the AVMSD and calls, in particular, on Member States to properly implement Article 13(1) thereof, which will ensure that media service providers of on-demand audiovisual media services under their jurisdiction secure at least a 30 % share of European works in their catalogues; asks the</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Commission and the ERGA to closely monitor the effective implementation of this measure and to evaluate the success of its objective;				
22)	43.[...] urges the Commission to conduct a study on the impact of VOD services on the European film and audiovisual market, in particular on the relationships between the different actors in the value chain and to take tangible steps to prevent potentially coercive practices that can hamper creators from enjoying adequate and proportionate remuneration;				
23)	45. Stresses the importance of reducing the audiovisual sector's carbon footprint, especially at the production stage, which accounts for most CO <sub>2</sub> emissions; notes that digital solutions such as virtual audiovisual production techniques can facilitate this reduction; believes that the current MFF provides a unique opportunity to fund greening projects and reach net zero emissions for the sector within this decade; calls on the Commission to conduct a study on the CO <sub>2</sub> emissions across the value chain and propose targeted measures; invites the Commission to accelerate this development and support the exchange of best practices, common tools and voluntary standards encompassing the whole value chain in reducing the audiovisual sector's carbon footprint in order to meet the EU's target to become climate neutral by 2050; welcomes, therefore, the Commission's intention to produce a best practice guide for green production and the provision of services; underlines that environmental sustainability can be a key factor and asset in making the industry more competitive and more attractive to investment;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	47. Considers that increased financing for digitisation and promoting the availability of Europe's audiovisual and film heritage is necessary in order to preserve it and make it more accessible to a broader audience; calls on the Commission to explore support options for audiovisual and film heritage under the Creative Europe programme, including the promotion and facilitation of exchanges and capacity building among professionals in the field of film restoration and preservation with due regard for independent SMEs, which, through their specific business model, play a pivotal role in safeguarding Europe's rich and diverse audiovisual heritage;				
25)	48. Calls on the Commission and the Member States to further support the recovery and transformation of the entire news media and audiovisual sectors and to strengthen their resilience and market competitiveness in order to tackle existing challenges and future crises as effectively as possible; emphasises the necessity to promote synergies between different EU funding schemes with specific amounts dedicated to the entire news media and audiovisual sectors, such as Creative Europe, Horizon Europe, InvestEU and Digital Europe;				

4.1.10.6. CULT Resolution 6: EP resolution of 20 October 2021 on the situation of artists and the cultural recovery in the EU

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>The situation of artists and the cultural recovery in the EU</b>	20/10/2021 <a href="#">T9-0430/2021</a> <a href="#">2020/2261(INI)</a> <b>CULT</b>	N.A. <sup>41</sup>			
1)	1. Urges the Commission and the Member States to recognise the intrinsic value of culture, as well as the fundamental role of culture for society, its progress and our well-being, the economy and inclusiveness, and to translate this recognition into adequate and continuous financial and structural support;				
2)	3. Calls on the Commission to further develop and consolidate the industrial policy framework for the CCSI ecosystem into a coherent, competitive and long-term strategy in order to boost their competitiveness, their strategic value for the European economy and the European way of life, and enable them to meet their potential in terms of jobs and growth creation; highlights the potential of CCSI in relation to youth employment and reindustrialisation and, in particular, the growing opportunities in the CCSI for young people created by the digital environment;				
3)	4. Calls the Commission and the Member States to include the CCSI in all financial supporting tools, such as InvestEU and the NextGenerationEU; stresses the importance of channelling these resources based on the				

<sup>41</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	particularities of the different sectors and the dimensions of the potential beneficiaries in order to ensure compatible solutions that do not create further inequalities within the EU;				
4)	5. Calls on the Member States and the Commission to recognise the European added value of cross-border cooperation and to eliminate all barriers to sustainable and inclusive cross-border mobility in the EU, and with non-EU countries for artists and cultural professionals;				
5)	6. Calls on the Commission and the Member States to support and provide authors, performers and other creative professionals and workers in the CCSI with clear information and guidelines on mobility opportunities and review and, where necessary, revise administrative requirements in all Member States, including on visas, taxation, social security and access to training and the recognition of artistic education degrees, including vocational education and training and academic qualifications, with a view to simplifying and unifying access to all of the above, as well as to Union programmes and funds that can serve their needs, such as Creative Europe, including those not directly or specifically targeted at the CCSI; calls for specific programmes dedicated to the mobility of young creators and innovators in order to promote exchanges and innovation in the fields of culture and creativity;				
6)	8. Calls on the Commission to provide clear information for artists on mobility issues related to EU-UK relations;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	13. Calls on the Member States to transpose Directive (EU) 2019/790 on copyright in the digital single market, with a strong focus on the protection of cultural and creative works and those creating them, and, in particular, to guarantee fair, appropriate and proportionate remuneration for authors and performers; calls on the Commission to closely monitor the effective implementation of these key principles;				
8)	16. Calls on the Commission to promote collective rights management in the implementation of the recently adopted directives on copyright, as well as in its forthcoming initiatives to ensure the fair remuneration of creators and wide access to cultural and creative works for the public;				
9)	17. Urges the Commission to effectively implement gender equality, inclusion and integration initiatives in the cultural and audiovisual fields through the Creative Europe Programme and to monitor the results thereof;				
10)	18. Invites the Commission to evaluate the impact of music streaming platforms in Europe, in order to ensure transparency on their recommendation algorithms, as they determine to a great extent what content their consumers listen to and see on the services' playlists and user interfaces, and to consider the introduction of positive obligations to promote cultural diversity and the discoverability of European works in their services;				
11)	22. [...] asks the Commission, therefore, to evaluate the situation and to take measures to ensure that revenues are duly and fairly				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	distributed to all creators, artists and rights holders;				
12)	23. Welcomes the Commission's inception impact assessment and recent public consultation on collective bargaining for the self-employed, which is examining the possibility of removing the competition law obstacles to collective bargaining for the self-employed and freelancers; urges, in this regard, that the Commission take the broadest possible approach, in order to ensure access to collective bargaining for all solo self-employed workers, including artists and cultural workers; invites the Commission to further evaluate the current State aid rules and their application to the CCSI and the possible needs for adaptation;				
13)	25. Calls on the Commission to propose a European Status of the Artist, setting out a common framework for working conditions and minimum standards common to all EU countries, while fully respecting the responsibilities of the Member States and the EU with regard to the labour market and cultural policy, through the adoption or application of a number of coherent and comprehensive guidelines with respect to, inter alia, contracts, means of collective representation and management, social security, sickness and unemployment insurance, pension schemes, direct and indirect taxation, non-tariff barriers and information asymmetries;				
14)	26. Calls on the Commission to map the existing definitions of artists and cultural workers across the Member States with a view to developing a				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	common understanding to be reflected in EU policy-making and cultural statistics;				
15)	28. Calls on the Member States and the Commission to support vocational training programmes and initiatives for the career development of all authors, performers and cultural creators, and, in particular, to support them in acquiring digital, entrepreneurial and other skills in order to benefit from digital opportunities to promote their work and collaborate with other artists;				
16)	29. Urges all Member States to fulfil their responsibility and obligation to foster and defend artistic freedom in order to uphold the fundamental right to freedom of expression and to ensure that EU citizens can freely enjoy artistic creations and participate in culture, and urges the Commission to sanction those Member States that fail to comply with their obligations; invites the Commission to carry out further research into the topic and prepare a roadmap for achieving better protection of freedom of artistic expression in Europe;				
17)	31. Calls on the Member States to ensure full access to social protection for artists and cultural workers, regardless of their employment status, including access to unemployment allowance, healthcare and pensions; urges the Member States and the Commission to take specific measures for the different categories of creative professions in order to tackle unstable income, unpaid work and job insecurity, and safeguard a minimum standard for their income;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	C C	Commission follow up Commission reply/commitment	C C	
18)	35. Calls on the Commission and the Member States to facilitate access to public grants and loans by reducing administrative burdens at all stages of the application and reporting processes, and to ensure transparency;					
19)	36. Stresses the importance of directing an adequate proportion of the economic recovery measures to the CCSI; reiterates its call on the Commission and the Member States to include culture in the national recovery and resilience plans and to earmark at least 2 % of the budget envelope of the Recovery and Resilience Facility to culture with concrete, inclusive measures which are accessible to all, leaving no one behind; is alarmed that in some Member States, the submitted plans appear to earmark a lower percentage or completely lack dedicated funding to those sectors;  Calls on the Commission to publish data on the amounts and purposes of funds earmarked in the plans in order to ensure transparency and facilitate democratic oversight;					
20)	38. Highlights that the CCSI are the first sectors to be hit by the pandemic, were the most severely hit and have been the last to recover, while, given the restrictions in capacity of cultural events and venues, the CCSI's recovery is expected to be even slower; underlines that the recovery of the CCSI must go hand in hand with the transition towards the sustainability of the sector; calls on the Commission and the Member States to support the short-term recovery of the whole cultural ecosystem and to bolster the resilience, competitiveness and innovation of the CCSI in the					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>long term, and to reinforce these sectors by providing fair and structured support to all, especially the most vulnerable actors, and foster employment opportunities for artists, authors, performers, cultural workers and cultural mediation professionals by supporting cooperation across disciplinary domains, as well as to ensure comprehensive monitoring of the socio-economic situation in the CCSI with the help of the European Framework for working conditions, in order to tackle any major crises as effectively as possible in the future and to accompany their digital and green transitions;</p>				
21)	<p>40. Calls on the Commission and the Member States to gather and share reliable data on best practices and methods for distributing aid to the CCSI; calls, furthermore, for the exchange of best practices on the most efficient ways to distribute recovery funding in the short and mid-term, in order to ensure maximum coverage of the CCSI, so that no artist or cultural worker is left behind;</p>				
22)	<p>42. Calls on the Commission to continuously monitor the CCSI with regular studies on the situation of artists for the purpose of having accurate, reliable, updated and sector-specific data at European level in order to design solid policy-making, as well as to improve mapping of the CCSI and be better prepared in the event of future crises;</p>				

## 4.1.10.7. CULT Resolution 7: EP resolution of 11 November 2021 on the European Education Area: a shared holistic approach

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>The European Education Area: a shared holistic approach</b>	11/11/2021 <a href="#">T9-0452/2021</a> <a href="#">2020/2243(INI)</a> CULT	N.A. <sup>42</sup>			
1)	17. Stresses the importance of placing the learner at the centre of the learning process; underlines the need to ensure that a tailored approach is taken towards vulnerable groups, including people with any kind of disabilities or learning differences, such as those on the autism spectrum or those with high potential, and to foster a whole-school approach to the EEA; invites the Commission to consult all the relevant stakeholders such as student associations, pedagogical support experts, caregivers for learners with special needs, and others, especially when it comes to developing the European Universities and Centres of Vocational Excellence;				
2)	25. Highlights the need to improve the quality and increase the frequency of the necessary data collection activities, and to ensure the active monitoring of relevant indicators and benchmarks such as the target set by the European Skills Agenda to achieve 50% of the adult population participating in learning activities; urges the Commission and the Member States to achieve ambitious targets, such as on the proportion of low achievers and early school leavers, by reducing the first				

<sup>42</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	benchmark from 15 % to 10 % and the second from 10 % to 5 %;				
3)	26. Calls for closer collaboration between the EU and other organisations and institutions such as UNESCO and the Organisation for Economic Co-operation and Development, and for the active use of and support for existing and future educational research and studies to assist Member States in identifying effective policy reforms; urges the Commission and the Member States to develop common and participatory educational research with a well-defined mandate and budget within the remit of EU competences;				
4)	27. Calls on the Member States and the Commission to provide the requisite funding for the establishment, implementation and development of the EEA and the establishment of a dedicated financial instrument in the 2028-2034 multiannual financial framework with a view to developing the EEA further and facilitating the mutual recognition of qualifications; reiterates its call to allocate at least 10 % of the funding under the Recovery and Resilience Facility to education, including digital education, and calls for the Member States to substantially increase public spending in education to above the EU average (4,7 % of GDP in 2019);				
5)	28. Encourages the Commission and the Member States to put in place disaster mitigation strategies for the education sector, in partnership and consultation with all stakeholders, and insists on the importance of concerted European				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	action at times of crisis, such as the COVID 19 pandemic;				
6)	30. Calls on the Commission to develop tools to allow Member States to implement the Council recommendation on a comprehensive approach to the teaching and learning of languages, and to monitor progress accordingly; calls on the Member States to collect comparable data on language learning; calls on the Commission to provide financial support for schools teaching European language skills, especially the native languages of EU citizens living in other EU countries;				
7)	32. Welcomes the initiative of the European Centres of Vocational Excellence, which provides a structure for the sector at European level; calls for the creation of a European vocational and training area as an integral part of the EEA; asks the Commission and the Member States to work towards the creation of a European apprentice statute [...]				
8)	34. Urges that the EEA should be a milestone in the recognition of diplomas and qualifications across the EU and calls on the Commission and the Member States to facilitate the expansion of automatic mutual recognition of learning outcomes and study periods abroad, including in VET and through European micro-credentials;				
9)	35. Highlights the prominent role of non-formal and informal learning as well as volunteering and stresses the need to recognise their results; calls on the Commission and the Member States to promote soft skills across the EU;				
10)	39. Calls on the Commission and the Member States to close the gender gap in education,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	including in education and careers in science, technology, engineering, the arts and mathematics (STEAM), to fight gender stereotypes and discrimination, and to eradicate bullying, cyber-bullying and other forms of harassment, discrimination and violent misconduct so as to improve cultural, ethnic and gender diversity through the creation and exchange of good practices across Europe;				
11)	43. Calls on the Commission and the Member States to establish a concrete European Education Area Strategic Framework 2030 (EEASF 2030) by the end of 2022, including a comprehensive steering, monitoring and evaluation mechanism, in line with UN Sustainable Development Goal 4 to 'ensure inclusive and equitable quality education and promote lifelong learning opportunities for all' and the first principle of the European Pillar of Social Rights; welcomes the proposal for a steering committee for the EEA, laying the groundwork for a structured and systematic governance framework; emphasises the role of the Conference on the Future of Europe to discuss the way forward on the challenges facing European education and on policy development;				
12)	44. Urges the Commission and the Member States to commit to the type of participation required from Member States and other levels of government, including local and regional authorities, as well as the EU institutions, and to devise effective multi-level governance arrangements that respect the principle of subsidiarity, while aiming to generate European added value;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	46. Calls on the Commission to establish an EEA platform as an interactive public gateway to support Member States and stakeholders in exchanging information and promoting cooperation and the exchange of good practices; believes that such a platform should be adequately funded and available in all official languages of the EU;				
14)	49. [...] calls on the Commission, the Member States and the Council of Europe to cooperate on European history and cultural heritage education across the EU, and highlights the need for targeted funding and initiatives to increase research on European history, as well as the promotion of public history, taking into account the complex nature of the history of our continent;				
15)	50. Calls on the Commission and the Member States to create a common framework on learning about the EU throughout all appropriate levels and areas of education; stresses the need to familiarise learners with the European integration process, the institutions and policies of the EU, the rights stemming from EU citizenship, and how to actively participate in the EU's democratic processes;				
16)	51. Calls on the Commission and the Member States to develop a comprehensive European strategy and a common framework on citizenship education with a European dimension, including learning about European values – such as human dignity, democracy, the rule of law, human rights and equality – to encourage the exchange of good practices and the development of common pedagogical				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	material and approaches; asks the Commission, in this respect, to explore the establishment of a citizenship education task force to coordinate this task and improve access to European citizenship education in order to foster a European civic culture and a sense of European belonging, complementing local, regional, national and global dimensions;				

## 4.1.10.8. CULT Resolution 8: EP resolution of 23 November 2021 on EU sports policy: assessment and possible ways forward

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>EU sports policy: assessment and possible ways forward</b>	23/11/2021 <a href="#">T9-0463/2021</a> <a href="#">2021/2058(INI)</a> CONT	N.A. <sup>43</sup>			
1)	3. Calls on the Commission to set up regular high-level structured cooperation with all sports stakeholders and other institutions to deliver more targeted and accountable recommendations for action on the current challenges facing the sport sector;				
2)	4. Calls on the Commission to present a communication on the future of sport linked to the EU's strategic goals;				
3)	5. Calls on the Commission to strengthen the visibility of sport and its perspective on sport across policy areas at EU level by adding sport to the title of the portfolio of the Commissioner in charge;				
4)	31. Calls on the Commission to build on its existing work on social dialogue and to extend its scope to all professional sports;				

<sup>43</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	33. Recalls the need to regulate the activities of agents and acknowledges that the recent reforms in the football transfer market, including the establishment of a clearing house, licencing requirements for agents and caps on agents' commission go in the right direction; urges the relevant sports authorities to ensure the prompt implementation of these reforms and calls on the Commission to monitor progress;				
6)	36. Urges the Council and the Commission to break the deadlock on the signing and ratification of the Council of Europe Convention on the manipulation of sports competitions;				
7)	39. Calls on the Commission and the Member States to involve all relevant stakeholders in ensuring that sports policy and legislation support gender equality, with particular attention to tackling all forms of violence and harassment, gender stereotypes, low visibility and media coverage, and disparities in wages, premium pay and awards;				
8)	41. Calls on the Commission to recognise the importance and support the social inclusion of persons with fewer opportunities, refugees, ethnic minorities and the LGBTQI+ community in sport, leaving no one behind;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	44. Insists on a zero-tolerance approach in terms of racism and violence in sport and urges the Commission, the Member States and sports federations to develop measures to prevent such incidents and to adopt effective penalties and measures to support victims;				
10)	52. Welcomes the 2019 Commission study entitled 'Safeguarding children in sport' and calls on the Commission to continue working in this area, including by regularly collecting and updating data;				
11)	57. Welcomes initiatives and campaigns to encourage physical activity such as the European Week of Sport, #BeActive and HealthyLifestyle4All and encourages the Commission to intensify communication about these events in the Member States, particularly targeted towards schools; underlines the importance of regular assessments of their outreach and impact;				
12)	59. Reiterates its call on the Commission, the Member States, sports federations and clubs to promote dual-career opportunities for athletes and calls on the Commission to consider including cross-border mobility of athletes in the next Erasmus+ programme;				
13)	62. Welcomes the inclusion of sport staff mobility in the Erasmus + 2021-2027 programme, and calls on the Commission, national agencies and sports federations to raise awareness about this new opportunity;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	63. Calls on the Commission and the Member States to develop common standards at EU level to ensure that all coaches have the appropriate skills and training to coach children and young people;				
15)	65. Recognises the valuable contributions that sports volunteers bring to a society and calls on the Commission and the Member States to create a system in line with the EU skills agenda, and building on the European credit transfer and accumulation system (ECTS) and the European credit system for vocational education and training (ECVET), for the recognition of qualifications gained by volunteers, including coaches working as volunteers;				
16)	68. Calls on the Commission to provide data on sports-related investments and reforms in its review report on the implementation of the Recovery and Resilience Facility, which is to be presented to Parliament and the Council in 2022;				
17)	74. Calls on the Commission to increase the number of accepted pilot projects and preparatory actions in the field of sport;				
18)	78. Calls on the Commission to encourage the use of REACT-EU funding for projects related to sports infrastructure, provided that it is sustainable, contributes to long-term economic recovery and supports tourism;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	81. Calls on the Commission to develop a methodology for defining the criteria for measuring and monitoring the social impact of sports-related projects together with all relevant stakeholders including civil society, social partners and public authorities, and to regularly update and present data on the social impact of sport;				
20)	82. Urges the Commission and the Member States to regularly update and present data on the economic impact of sport;				
21)	85. Calls on the Commission and the Member States to support the green transition of the sport sector, especially with regards to constructing, extending and renovating sports infrastructure, including winter sports facilities;				
22)	86. [...] calls on the Commission to ensure that sports-related projects, especially those within public spaces, are prioritised within this initiative;				
23)	87. Calls on the Commission and the Member States to establish harmonised minimum accessibility criteria, sustainability benchmarks and safety standards for sports infrastructure, including measures to prevent any form of harassment, and to support inclusion as well as mobility of athletes and sports-related workers;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	91. Calls on the Commission and the European Institute for Technology to create a Knowledge and Innovation Community (KIC) in the field of sport to boost innovation, resilience and transnational collaboration;					
25)	93. Calls on the Commission to effectively tackle the growing problem of illegal streaming of live sport events without delay;					

#### 4.1.11. DEVE

Between July 2019 and December 2021, the **Committee on Development (DEVE)** was responsible for five 'ordinary' own-initiative reports (INI) and leading to the adoption of a five Parliament's resolutions ('DEVE resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents, as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

Table 16: Overview on DEVE resolutions and its follow-up (July 2019 and December 2021)

Resolutions and follow-up analysis	Quantifications
Number of resolutions adopted by the Parliament during the period	5
Number of INI parliamentary procedures	5
Number of INL parliamentary procedures <sup>3</sup>	0
Number of Commission written follow-up documents to the INI resolutions	2
Number of INI procedures to which the Commission did not send the written response <sup>4</sup>	2
Number of INI procedures to which the Commission did not respond before the 31 January 2022 <sup>5</sup>	1
Number of Commission written follow-up documents provided within 3 month deadline	0/2 <sup>6</sup>

<sup>1</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

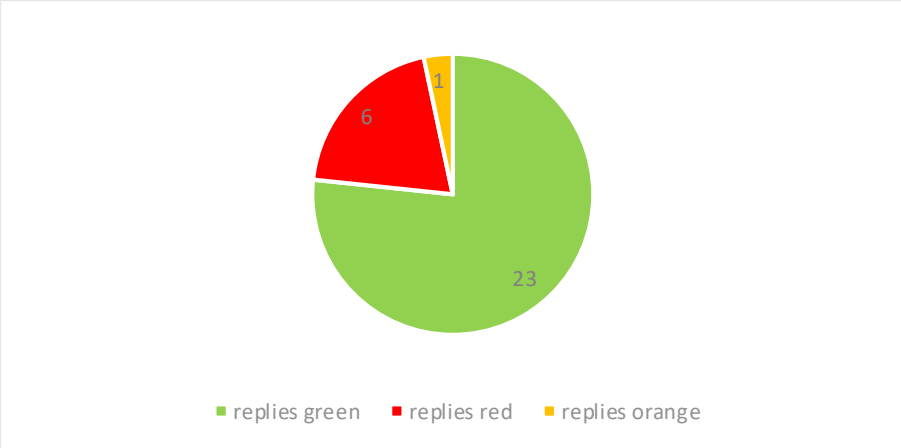

<sup>2</sup> [www.ec.europa.eu](http://www.ec.europa.eu) and related websites.

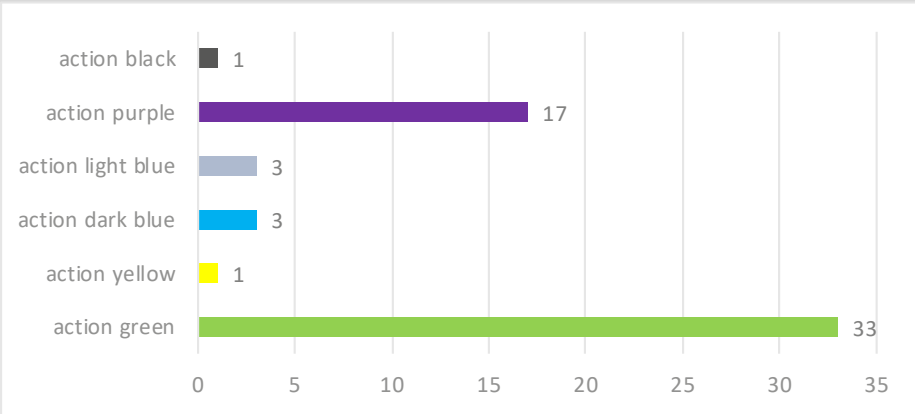

<sup>3</sup> For more details on INL please see chapter 4.2.

<sup>4</sup> Commission replies to positions and resolutions adopted by the Parliament that the Commission did not respond formally.

<sup>5</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022. Nevertheless, the Commission was still in the deadline to respond formally.

<sup>6</sup> Only 2 received written replies taken into account.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent four written replies to the Parliament's five DEVE resolutions. In two cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other two replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one DEVE resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted two specific replies. The Commission has not replied with written follow-up documents to 33 of Parliament's 75 requests. At the cut-off date of this study, the Commission had not yet replied to 12 of Parliament's 75 requests.

### Analysis of the Commission actions

The Commission proposed/promised 34 genuine actions. In six cases, no further specific actions were proposed/promised to be taken by the Commission and in 17 cases it remained unclear if an action was carried out. In one case, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 34 actions proposed/promised by the Commission, the Commission already carried out the action in 33 cases. In the one remaining case, the implementation of the action is still pending and needs to be followed at a later stage.

4.1.11.1. DEVE Resolution 1: EP resolution of 25 November 2020 on improving development effectiveness and the efficiency of aid

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Improving development effectiveness and the efficiency of aid</b>	25/11/2020 <a href="#">T9-0323/2020</a> <a href="#">2019/184(INI)</a> DEVE	<a href="#">SP(2021)129</a>	Final reply (SP) received 2 February 2021	Mixed reply			
1)	8. [...] calls on the Commission to use its membership of the GPEDC and OECD-DAC and its voice in international fora and in the governance structures of the international financial institutions to further strengthen the effectiveness principles and encourage adherence to them and implementation of them in all forms of development cooperation and by all actors involved;	<p>The Commission has used its membership in the Global Partnership for Effective Development Co-operation (GPEDC) and of the Development Assistance Committee (DAC) of the Organisation for Economic Co-operation and Development (OECD) to increase development aid effectiveness as the resolution recommends (paragraph 8). Following proposals from the Commission, the DAC has decided to re-engage in significant work on effectiveness. This has been reflected in the DAC High-Level meeting communique and has resulted in the inclusion of a new work stream on effectiveness in the DAC's "Programme of Work and Budget" and a determination that the DAC should strengthen its normative role in encouraging and supporting its members to meet their commitments on effectiveness.</p> <p>The Commission is an active member of the GPEDC and is a member of its Steering Committee, representing the European providers of development cooperation. The Commission leads the flagship work stream in the new GPEDC work programme – <i>Demonstrating the Impact of Effectiveness</i> – which is focused on achieving, demonstrating, and replicating better real-world impact in practice, through the implementation of effectiveness approaches in key SDG sectors in partner countries.</p>				<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Commission considers its action as sufficient).</p> <p>The <a href="#">EU Team Europe initiative and the joint programming tracker</a> offer a detailed overview of the implementation of programming, which enables Team Europe to work better and more effectively together around the world.</p>	
2)	10. Calls on the Commission to publish, at least biannually, an aid effectiveness progress report, covering joint planning, joint	The Commission agrees that development effectiveness is fundamentally about delivering more and better impact, bringing existing actors and resources together behind a				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	implementation and joint results frameworks, and actions by EU institutions, Member States and local and regional authorities; underlines that this report should be based on commonly agreed targets and policy objectives, notably the SDGs and the Consensus; calls on the Commission to consult stakeholders while drawing up this report and to present the report to Parliament;	<p>common purpose - reducing duplication and incoherence. The longer-term effects of strengthening and using country systems and supporting national policy-making processes builds our partners' own development capacities. [...]</p> <p>The Commission reports on the EU and the Member State progress on improving the effectiveness of European development cooperation (paragraph 10) after each of the GPEDC's biannual global monitoring rounds. These reports use the underlying data collected by the GPEDC to present a more disaggregated and detailed picture of the EU and the Member States' performance than that provided by the GPEDC report. The reports show performance against the indicators and target agreed by the GPEDC.</p>		<p>working on action falling under the scope of the EP request (Commission considers its reporting sufficient).</p> <p>The work of the global partnership for effective development co-operation is available <a href="#">here</a>.</p>	
3)	11. Calls on the Commission and the Council to scale up joint programming between the EU and its Member States;	The Commission welcomes the strong support for joint programming, joint implementation and co-ordinated action with the Member States, including through the Team Europe approach, in order to make the European coordination transformative and impactful. To further strengthen the impact of unified and collective European action on the ground, the EU and its Member States apply a Team Europe approach in the pre-programming phase of Multiannual Financial Framework (MFF) 2021-2027, building on the experience gained during the COVID-19 response. This has strengthened co-ordination and increased the visibility of the external cooperation of the EU, its Member States, their implementing and finance agencies, and the European Investment Bank (EIB) and the European Bank for Reconstruction and Development (EBRD).		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Commission considers its action as sufficient).	
4)	12. Calls on the Commission to ensure that regular meetings of the EU with Member States' representatives, implementing agencies, international organisations, local and regional authorities and CSOs take place on	To further strengthen the impact of unified and collective European action on the ground, the EU and its Member States apply a Team Europe approach in the pre-programming phase of Multiannual Financial Framework (MFF) 2021-2027, building on the experience gained during		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the ground in the respective partner countries in order to identify the challenges and opportunities and that the subsequent joint response and implementation meets the identified needs;	the COVID-19 response. This has strengthened co-ordination and increased the visibility of the external cooperation of the EU, its Member States, their implementing and finance agencies, and the European Investment Bank (EIB) and the European Bank for Reconstruction and Development (EBRD). [...] As stipulated in the 2012 Communication <sup>7</sup> , the EU values CSOs' diversity and specificities and engages with accountable and transparent CSOs, which share its commitment to social progress and to the fundamental values of peace, freedom, equal rights and human dignity.		<a href="#">EU launches a global €1.5 billion programme to support civil society organisations</a> (14 December 2021).	
5)	13. [...] asks the Commission to submit, on the basis of Articles 209 and 210 TFEU, a proposal for an act concerning regulatory aspects of EU donor coordination on development aid;	With respect to the call on the Commission to submit an act on regulatory aspects on EU donor coordination on development aid (paragraph 13), recently good progress has been achieved with the Team Europe approach, which corresponds to the philosophy of parallel competence in the field of development cooperation, i.e. to achieve 'more for more'. A separate legal act would not necessarily bring added value. In addition, the principles are already enshrined in the new Neighbourhood, Development and International Cooperation Instrument (NDICI).		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Team Europe and the neighbourhood, development and international cooperation instrument (NDICI)).	
6)	15. Calls on the Commission to ensure that the programming and implementation of these modalities is coordinated, strategically aligned with partner countries' priorities and processes, and focused on delivering outcomes and impacts that are transformational for achieving the SDGs in the specific context of each partner country; underlines the need to facilitate the creation of	Programming, implementation, and evaluation will follow an inclusive process encompassing broad and transparent consultation both at country, regional, global and headquarters levels with all relevant stakeholders (paragraphs 15). [...] The Commission welcomes the strong support for joint programming, joint implementation and co-ordinated action with the Member States, including through the Team		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Team Europe approach).

	markets which are self-sustaining and to ensure that good exit practices are taken into account in the pre-programming phase; calls on the Commission and the Member States to accelerate efforts to untie their ODA in line with the commitments of the Consensus and to encourage all development cooperation providers, including emerging economies, to do the same; encourages local procurement and ownership;	Europe approach (paragraphs 11 to 15), in order to make the European coordination transformative and impactful. To further strengthen the impact of unified and collective European action on the ground, the EU and its Member States apply a Team Europe approach in the pre-programming phase of Multiannual Financial Framework (MFF) 2021-2027, building on the experience gained during the COVID-19 response. This has strengthened co-ordination and increased the visibility of the external cooperation of the EU, its Member States, their implementing and finance agencies, and the European Investment Bank (EIB) and the European Bank for Reconstruction and Development (EBRD).		Further information on how the EU evaluation methodology encompasses inclusiveness can be found <a href="#">here</a> .	
7)	21. [...] calls on the Commission, therefore, to coordinate a Europe-wide standardisation of impact indicators in order to compare the effectiveness and efficiency of projects between Member States;	The Commission is determined to improve the transparency and accountability of European external assistance (paragraphs 21, 25, 26 and 27) and has made significant progress as evidenced by the 2020 Aid Transparency Index.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (aid transparency index).	
8)	26. [...] calls on the Commission to look into appropriate indicators for assessment and to use the results to prepare country-specific information on the efficiency and effectiveness of development aid and to develop best-practice approaches;	The Commission is determined to improve the transparency and accountability of European external assistance (paragraphs 21, 25, 26 and 27) and has made significant progress as evidenced by the 2020 Aid Transparency Index. The recently updated EU Aid Explorer is an open and accessible source for comprehensive data on EU and Member State development cooperation based on OECD-DAC and International Aid Transparency Initiative (IATI) reporting standards.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU aid explorer</a> ).  The tracking of transparency and accountability is ongoing. For further information on EU funding available to developing/partnership countries, see the <a href="#">EU aid explorer</a> , which is a one-stop shop with funding information available.	
9)	27. [...] reiterates in this respect that the Commission should publish the 'Annual Report on the implementation of the European Union's instruments for financing	. Although the follow-up mentions par.27, no specific reply is provided to this particular point (on annual report on the		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	external action' prior to the start of the discharge procedure for the given year;	implementation of the European Union's instruments for financing external action).			
10)	29. Urges the Commission and the Member States, as well as all development partners, to prioritise gender equality, by making increased use of gender mainstreaming, gender budgeting and gender targeting;	<p>Gender equality (paragraphs 28 and 29) takes a central role in the external actions as evidenced in the Joint Communication on the EU Gender Action Plan (GAP) III<sup>8</sup> adopted on 25 November. External assistance across all sectors will have to integrate a gender perspective and support gender equality.</p> <p>The Gender Action Plan III (GAPIII) provides the EU with a policy framework for accelerating progress towards meeting international commitments. It provides the EU with five pillars of action:</p> <ul style="list-style-type: none"> <li>- promotion of gender equality as a priority of all external policies and actions. For instance, 85% of all new actions throughout external relations will contribute to gender equality and women's empowerment by 2025;</li> <li>- a roadmap for working together with stakeholders at national, regional and multilateral levels, in close cooperation with Member States and all partners, including through GAPIII country level implementation plans;</li> <li>- an accelerating progress, focusing on the key thematic areas of engagement, including fighting against gender-based violence and promoting the economic, social and political empowerment of women and girls among others;</li> <li>- a leading example, including by establishing gender-responsive and gender-balanced leadership at top political and management levels</li> <li>- new approach to monitoring, evaluation and learning, with a stronger focus on measuring results and increase accountability and transparency.</li> </ul>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (gender action plan III).

11)	36. [...] calls on the Commission to improve accessibility of funding for CSOs, including in partner countries;	No specific reply is provided to this particular point (on funding for CSOs.		Not mentioned.	
12)	38. Calls on the Commission and the Member States to enhance cooperation with local authorities in partner countries, but also within the EU;	The Commission attaches a high value to cooperation with local authorities (paragraph 38) in partner countries and the EU, which is exemplified by the mainstreaming of the support to them in the period 2021-2027.		No further specific actions proposed/promised to be taken by the Commission.	
13)	40. Recognises the essential role of civil society as partner, both during the consultation process and as deliverer of services; in this light, calls on the Commission and the Member States to recognise and strengthen their roles in order to achieve inclusive development partnerships ;	Partnerships with civil society (paragraphs 20, 39, 40, 52 and 53) are vital to fight inequalities, to build inclusive societies, and fulfil the central commitment of the 2030 Agenda for Sustainable Development to leave no one behind. Through strengthening the capacity of civil society organisations (CSO) in third countries, the Commission reinforces public accountability and supports the achievement of the sustainable development goals. As such, civil society actors are enabled to participate in an informed way in national policy dialogues and structural dialogue with the EU on the political priorities of the Commission.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2030 agenda for sustainable development).	
14)	46. Calls on the Commission and the Member States to ensure that actors of the private sector involved in development partnerships abide by the principle of corporate accountability on human rights and the environment throughout the whole lifecycle of projects, in compliance with the UN Global Compact on Human Rights, the UN Guiding Principles on Business and Human Rights, ILO	Private sector engagement was introduced as a new dimension into EU development policy with the 2014 Communication <sup>9</sup> on the role of the private sector in development, which is based on principles fully in line with Kampala Principles <sup>10</sup> (2019) developed by Global Partnership for Effective Development Co-operation (GPEDC) /OECD. The Communication includes a set of guidelines and criteria to ensure that development and commercial objectives are aligned in mutually reinforcing ways in the partnerships with the private sector.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Kampala principles, work programme 2021). A Commission communication on sustainable corporate governance is still forthcoming. On 26 October 2020, the Commission launched a <a href="#">public consultation</a> , which ended on 08 February 2021.	

<sup>9</sup> COM(2014) 263

	core labour standards, and the UN Convention Against Corruption;	<p>The EU actions to engage the private sector aim at improving the business environment and investment climate, facilitating investments and creating jobs. The Commission has adopted a rights-based approach, mainstreamed across all EU development cooperation, to ensure the respect of human rights in the European Union's engagement with the private sector.</p> <p>Furthermore, the Commission aims at harnessing the knowledge and experience the private sector has in order to improve aid effectiveness. Through the programming and implementation of EU financial instruments, and public-private dialogue with the private sector, the Commission continues to improve predictability and rapidness of its interventions.</p> <p>The Commission has announced a legislative initiative on sustainable corporate governance for the second quarter of 2021 as part of its Work Programme 2021. The initiative is currently being prepared in line with the Commission's Better Regulation guidelines. On 26 October 2020, an internet-based open public consultation has been launched covering key elements to be considered in the impact assessment.</p>		<p>On 17 December 2020, the <a href="#">European Parliament approved a non-legislative report</a> calling for sustainable business conduct and addressing shortcomings in existing laws. Parliament wants upcoming corporate governance proposals from the Commission to include a series of mandatory obligations for companies and incentives to act rather than rely on voluntary disclosure of information. A clear set of rules strengthening the duties of company boards regarding sustainability is also asked.</p> <p>Initially, the Commission proposal was supposed to be published in the first half of 2021, then in December 2021. The Regulatory Scrutiny Board has twice given a red light to the impact assessment accompanying the proposal, and a new text should be proposed in 2022.</p>	
15)	51. [...] therefore calls on the Commission and the Member States to reinforce cooperation in R&D and to strengthen investments in strategic local production capacity, especially related to health and including for the newest bio-pharmaceutical products, so as to enhance autonomy from global supply chains;	No specific reply is provided to this particular point (on funding for CSOs).		Not mentioned.	
16)	53. Calls on the Commission to reassess whether the administrative obligations concerning access to EU funding are proportionate;	Although the follow-up mentions paragraph 53, no specific reply is provided to this particular point (to reassess whether the administrative obligations concerning access to EU funding are proportionate).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	54. Calls on the Commission to establish a network of and engage with reliable non-governmental partners, such as local CSOs, churches, faith-based organisations and specialised Member State agencies for the implementation of smaller-scale projects;	Faith-based organisations (paragraph 54) can play important roles in development processes by providing services to large groups. As stipulated in the 2012 Communication <sup>11</sup> , the EU values CSOs' diversity and specificities and engages with accountable and transparent CSOs, which share its commitment to social progress and to the fundamental values of peace, freedom, equal rights and human dignity.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">COM (2012) 492</a> -The roots of democracy and sustainable development: Europe's engagement with Civil Society in external relations).	
18)	59. Reiterates its request that the Council and the Member States set out a clear timeline for reaching the target of raising the ODA budget to 0,7 % of GNI, including the international commitment of spending 0,15 to 0,2 % of GNI on ODA to LDCs, and that the Commission present a concrete action plan defining how additional resources will be leveraged towards achieving the SDGs; stresses that the effectiveness of aid is no substitute for adequate aid volumes and that maintaining or exceeding the 0,7 % target for ODA is of great importance; reiterates that the EU budget should make a considerable contribution to increasing EU ODA overall;	The Commission recognises the important role that official development aid (ODA) (paragraph 59) plays in fulfilling the development effectiveness agenda, but would also highlight that all forms of development cooperation should respect the key development effectiveness principles. When reporting on ODA, the EU strictly follows the rules set by the OECD DAC. EU development assistance is geared towards poverty eradication and the achievement of the SDGs, as stated in the European Consensus on Development. Despite the challenging economic context, the EU explicitly reaffirmed its collective commitment to the ODA targets (0.7% of gross national income dedicated to ODA and 0.15 to 0.2% of the gross national income dedicated to ODA to least developed countries (LDCs)) in the Annual Report 2020 to the European Council on EU Development Aid Targets. The EU and its Member States are still the largest provider of ODA, with EUR 75.2 billion in 2019, although more efforts will need to be made to reach the 0.7% target.		No further / specific actions proposed/promised to be taken by the Commission on this particular point.

## 4.1.11.2. DEVE Resolution 2: EP resolution of 25 March 2021 on new EU-Africa Strategy – a partnership for sustainable and inclusive development

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>New EU-Africa Strategy – a partnership for sustainable and inclusive development</b>	<b>25/03/2021</b> <a href="#">T9-0108/2021</a> <a href="#">2020/2041(INI)</a> <b>DEVE</b>	<p>On 7 May 2021, the Parliament received '<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament –March II 2021 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as it considers that the main elements were addressed in plenary by Commissioner Jutta Urpilainen. The recommendations contained in the resolutions have been discussed in the run-up to the vote, and will continue to be discussed during the fine-tuning of the New EU-Africa Strategy.</p> <p>The <a href="#">plenary debate</a> took place on 24 March 2021.</p>			
1)	21. [...] calls on the Commission to consider how best to work with the diaspora as part of the comprehensive strategy with Africa, including by taking advantage of synergies between internal and external funding instruments when tackling common challenges;				
2)	46. Calls for the recently launched GAP III to enhance efforts, in particular, to put an end to gender-based violence, female genital mutilation and forced marriage; calls on the Commission to ensure synergies between the EU-Africa partnership and GAP III in order to achieve gender equality;				
3)	48. [...] calls on the Commission to prioritise sexual and reproductive health and rights in the new EU-Africa partnership and to commit to the promotion, protection and fulfilment of the right of every individual to have full control				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	over, and decide freely and responsibly on, matters related to their sexuality and sexual and reproductive health and rights, free from discrimination, coercion and violence;				
4)	78. Calls on the Commission to support Africa in its ambitions for a continental free trade area; welcomes the launch of the African Continental Free Trade Area (AfCFTA) and underlines its enormous potential as an instrument to foster intra-African trade and regional integration, and improve Africa's access to global markets; emphasises that the AfCFTA should make for integration that benefits all African populations, including the most marginalised;				
5)	82. Recalls that free and fair trade with the African continent is key in supporting sustainable development and poverty alleviation; asks the Commission to involve civil society at all levels of the political dialogue, especially when trade agreements are prepared, monitored and evaluated; emphasises that Economic Partnership Agreements (EPAs) and the Generalised Scheme of Preferences (GSP) are important instruments of the EU-African trade relationship; urges the Commission, however, to acknowledge diverging views on EPAs and to find concrete solutions to respond to African countries' concerns, notably regarding their priority of building regional value chains and boosting intra-African trade; reiterates its request for an in-depth analysis of the impact of EPAs;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	84. Notes that African countries, while accounting for more than 50 % of the beneficiaries of the GSP, represent less than 5 % of the EU's GSP imports; invites the Commission to assist the economic players in beneficiary countries on adherence to rules of origin and overcoming technical barriers, among others; regrets that the GSP has not so far contributed to the economic diversification of African beneficiary countries; reiterates its call on the Commission to consider expanding the list of products covered by the GSP Regulation <sup>12</sup> ;				
7)	85. Calls on the Commission, in view of the documented growing risk of dissemination of zoonotic pathogens in Africa, to promote more stringent standards in African countries in terms of sanitary and phytosanitary (SPS) measures and animal welfare, through regulatory cooperation and dialogue;				
8)	89. Underlines that European companies have a responsibility for their supply chains; calls on the Commission to proceed with an ambitious legislative proposal on mandatory human rights, social rights and environmental due diligence obligations for EU companies; urges the Commission, in developing any such proposals, to ensure that they apply to the whole supply chain and meet OECD guidelines on social responsibility and human rights in trade and are WTO-compatible, and that after				

<sup>12</sup> Regulation (EU) No 978/2012 of the European Parliament and of the Council of 25 October 2012 applying a scheme of generalised tariff preferences and repealing Council Regulation (EC) No 732/2008 (OJ L 303, 31.10.2012, p.1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	careful assessment the proposals are found to be functional and applicable to all actors on the market, including SMEs, and include provisions to facilitate injured parties' access to justice;				
9)	91. Is of the view that the EU-Africa strategy should also include measures to assist African countries in converting their mineral resource wealth into real development results and calls for a review of the effectiveness of existing measures, also with regard to the questionable exploitation of Africa by China and Russia; calls on the Commission and the EU's African partners to implement the measures required under the Conflict Minerals Regulation <sup>13</sup> smoothly, and publish without delay the list of companies outside the EU that do not fulfil requirements set out by that regulation;				
11)	96. Recalls that the position of women can be strengthened with strong provisions in trade agreements on gender and trade; calls in this regard on the Commission to assist the African Union with the implementation of its Strategy for Gender Equality and Women's Empowerment and to implement measures that contribute to the achievement of gender equality in its trade agreements with African countries;				
12)	115. Calls on the Commission expressly to monitor activities related to industrial fishing as they may pose a threat to the stocks				

<sup>13</sup> Regulation (EU) 2017/821 of the European Parliament and of the Council of 17 May 2017 laying down supply chain due diligence obligations for Union importers of tin, tantalum and tungsten, their ores, and gold originating from conflict-affected and high-risk areas (OJ L 130, 19.5.2017, p.1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	available to local populations using traditional fishing resources, while also risking creating an imbalance in the good ecological status of fishery stocks;				
13)	117.[...] encourages the Commission to come up with an ambitious plan for implementing a sustainable energy partnership, notes to this end that renewable energy and energy efficiency are crucial elements in bridging the gap in access to energy on the African continent, while ensuring the necessary reduction in carbon dioxide emissions;				
14)	125. Is concerned at the common agricultural policy-supported exporting of European milk powder to West Africa, given that the tripling of exports since the EU lifted its milk quotas in 2015 has had disastrous consequences for local herders and farmers who cannot compete; calls on the Commission to work on solutions with African governments and stakeholders;				
15)	138. Regrets the lack of recognition of the strategic importance of rangelands, which cover about 43 % of the African land surface and are therefore important carbon sinks; calls on the Commission to develop, together with local communities and local stakeholders, a strategy to optimise this potential through sustainable grazing management such as that practiced by pastoralists;				
16)	169. [...] calls on the Commission to take into account African countries' priorities on migration in order to forge a real 'partnership of equals';				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	171. [...] and calls on the Commission and Member States to increase political, financial, operational and logistical support to G5 Sahel;				
18)	183. Notes that the information sphere in Africa is coming under increasing influence from the EU's global adversaries; calls, in this regard, on the EEAS and the Commission to actively tackle the problem of the lack of presence of a European voice within African societies and to counter false narratives and better promote the European approach and democratic values to the African people;

The role of the EU's development cooperation and humanitarian assistance in addressing the consequences of the COVID-19 pandemic	24/06/2021 <a href="#">T9-0308/2021</a> <a href="#">2020/2118(INI)</a> DEVE	<a href="#">SP(2021)557</a>	Final reply (SP) received 25 October 2021	Specific reply			
1)	4. [...] encourages the Commission to use humanitarian and development instruments flexibly, in line with an integrated nexus approach, particularly when it comes to the financing and distribution of vaccines;	Regarding paragraph 4, human development is at the core of the EU's multilateral commitment towards achieving the SDGs by 2030 and leaving no one behind. This global emphasis is reflected in the on-going programming of the NDICI-Global Europe global, regional and country envelopes: it will be the first and main priority of the Global Challenges Multiannual Indicative Program (MIP); it will also be an important priority of the regional MIPs (notably the program for Sub-Saharan Africa), and numerous country MIPs are contemplating an ambitious priority area tackling several sectors of human development. On health, programming intends to increase the number of country MIPs prioritizing health. The inclusion of health in the regional MIP for Sub-Saharan Africa would constitute a positive development compared to the previous programming cycle. It will rest on four areas: (i) health security and pandemic preparedness and response, (ii) African pharmaceutical systems and manufacturing capacity for vaccines and other medical products and technologies, (iii) Africa-based public health institutional capacity and (iv) legal, political and societal environment for sexual and reproductive health and rights (SRHR). EU Member States have expressed interest in the Team Europe Initiatives (TEIs) in all four subjects, which is a promising development. The TEI on vaccine manufacturing and access to vaccines,				The Commission has been already working on action falling under the scope of the EP request ( <a href="#">NCICI programme</a> , <a href="#">global challenges multiannual indicative program (MIP)</a> ).  The Commission has committed to increasing the number of country MIPs prioritising health especially in Sub-Saharan Africa. That is visible in the <a href="#">MIP for Sub-Saharan Africa for 2021-2027</a> and in MIPs of individual countries (e.g. <a href="#">Kenya</a> ). However, health does not appear to be a <a href="#">priority in South Africa</a> , where the Covid-19 Omicron variant was first identified, nor in the <a href="#">MIP</a> for that country.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>medicines and health technologies in Africa, announced at the G20 Global Health Summit in Rome in May, is progressing well.</p> <p>Overall, social protection continues to play a prominent role in the new budgetary cycle as reflected in the draft programming documents. This is also due to the reinforced interest in social protection as an important measure to cope with the socio-economic challenges. Against this background, close coordination with EU Member States and international stakeholders is already happening at the level of policymaking and design and implementation of concrete programmes. With the Team Europe approach, these ties will even be strengthened.</p>			
2)	17.[...] asks the Commission to design strategies with partner countries for economic recovery, job creation and for improving social security systems, fostering the expansion of social protection coverage to informal workers in rural sectors;	Regarding social protection (point 17), the Commission underlines that the new budgetary cycle includes a high number of programmes addressing poverty eradication through specific programmes. EU social protection programmes focus on financially sustainable and shock responsive national system building including the needs of the most vulnerable, thus women, children, informal workers as well as migrants and refugees, therefore responding to the Covid-19 effects. At international level, the EU is part of the respective platforms Social Protection Interagency Cooperation Board (SPIAC-B) and the Universal Social Protection 2030 (USP2030) to reach universal social protection by 2030 to achieve the Sustainable Development Goals.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Social protection interagency cooperation board, Universal social protection 2030 (USP2030), <a href="#">Sustainable development goals</a> ).	
3)	20. Urges the Commission to address the specific needs of refugees, migrants and internally displaced persons (IDPs), upholding the guiding principle of public health networks of leaving no-one behind and refraining from blocking front-line humanitarian workers from having direct contact with those they serve; recalls with concern that refugees, migrants	As regards the specific needs of refugees, migrants and IDPs (point 20) in addressing the consequences of the COVID-19 pandemic, the Commission has already considered these by adjusting, with its implementing partners, most ongoing interventions to the new situation. In line with the 2016 Communication 'Lives in Dignity', the Commission strives to mainstream wherever possible the health response for these persons into the national systems and reserve parallel			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>and IDPs are among the most vulnerable populations facing this health crisis, as they are often faced with more precarious living conditions and tend to face greater obstacles to accessing basic health services than local populations;</p>	<p>emergency systems to situations where this is the only option. The Commission is strongly committed to the Nexus approach to forced displacement situations. Concerning the direct access of front-line humanitarian workers to persons in need of humanitarian assistance, the Commission has kept encouraging partner organisations to continue to deliver their services, having also in mind the need to protect humanitarian workers, as spelled out in the recent Humanitarian Assistance Communication.</p> <p>As regards the need to create the conditions for children and young people in refugee camps ( point 20) to have access to education: education is a priority for the Commission in its external assistance, both in the context of humanitarian and development engagements. This is all the more the case for vulnerable populations, such as refugees in protracted situations residing in camps. The EU is committed to continue its engagement and contribution to education in emergencies, including through the 'Education Cannot Wait' initiative and actions related to displacement situations specifically addressing the education needs of refugee children and young people in camps and other.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	
4)	<p>24. [...] calls on the Commission to ensure that the EU global response to the COVID-19 pandemic does not undermine EU funding for other vital health programmes, including the Minimum Initial Services Package for sexual and reproductive health and programmes targeting the health of women and pregnant women;</p> <p>Urges all Member States and the Commission to continue to support partner countries in providing services related to sexual and reproductive health and rights (SRHR), while ensuring the safety of communities and health workers;</p>	<p>As regards paragraph 24, the EU fully agrees that the urgent response to the COVID-19 should not divert us from tackling other critical health priorities, not to mention the dramatic secondary health impacts of the pandemic. Protecting essential health services and preserving health gains for women, adolescents and children, key populations and people living with HIV (human immunodeficiency virus) is critical during this crisis and beyond. In the context of a reduced Global Challenges envelope which requires making difficult choices, the EU is still committed to the Global Fund, the Vaccine Alliance (GAVI), the Universal Health Coverage (UHC)-Partnership led by the World Health Organisation (WHO) and the United Nations Population Fund (UNFPA) Supplies Partnership, including continuation</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Global fund</a>, <a href="#">Vaccine alliance (GAVI)</a>, <a href="#">Universal health coverage (UHC)-partnership</a> (WHO), <a href="#">United Nations Population Fund (UNFPA)</a>, <a href="#">Supplies partnership, COVAX</a>).</p> <p>On 25 June 2021, a meeting on the <a href="#">EU multi-annual indicative programme on global challenges</a> took place.</p> <p>On NDICI-Global Europe, see the <a href="#">Commission website</a>.</p> <p>Global challenges programme is ongoing:</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>of the support to ACT-A and COVAX initiated in 2020. The Global Challenges Programme is still under finalisation.</p> <p>The EU's longstanding commitment to Sexual and Reproductive Health and Rights (SRHR) will be reflected in our partnerships at country, regional, and global levels. In addition of the ongoing SRHR initiatives from the 11<sup>th</sup> European Development Fund (EDF), (notably the country and regional programs of the Spotlight Initiative and the call for proposals for non-governmental organisations (NGOs) on vulnerable adolescents' SRHR in Africa), the EU intends to continue supporting the UNFPA Supplies Partnership, which ensures access to essential SRHR commodities for women and girls most in need. A regional TEI on SRHR in Sub-Saharan Africa is in the making. SRHR will also be supported at country level via the country MIPs prioritizing health.</p>		<p><a href="#">Global challenges multiannual indicative program (MIP)</a></p> <p>On the 11th European Development Fund instrument see <a href="#">here</a>.</p>	
5)	27. Urges the Commission and the Member States to commit to making anti-pandemic vaccines and treatments a global public good, accessible to all;	<p>The Commission is committed to the objective of universal equitable access to vaccines and treatments against COVID-19 (point 27). From the start, it has advocated for a multilateral approach to ensure the provision of diagnostics, treatments and vaccines everywhere. The EU has been a key initiator with the WHO and international health organizations of the ACT Accelerator, and a top contributor from the start to COVAX, the vaccine's pillar of the ACT-A. In</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">EU response to Covid-19 and on particular programs, ACT Accelerator, COVAX</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>support of the ACT-A, we launched the Global Coronavirus Response to help mobilise necessary resources. The EU has invested close to EUR 3 billion to pre-finance the production of safe and effective vaccines, which will benefit not only the EU but also citizens across the world. 'Team Europe' is also one of the leading contributors to the COVAX Facility, having pledged over EUR 3 billion. The EU has also exported around half of the vaccines produced in the EU. Finally, the EU has set up a vaccine sharing mechanism and EU Member States have committed to sharing at least 200 million doses by the end of 2021, the majority of which will be shared via COVAX.</p> <p>The Commission considers that the key objective at this stage in efforts towards universal equitable access to COVID-19 vaccines is increasing the global manufacturing capacity. The Commission is undertaking action to facilitate the production of COVID-19 vaccines and to allow for a ramping up of production in the shortest possible time. Public-private partnerships being key to address this problem, our objective is to ensure that any available and adequate manufacturing capacity anywhere in the world is used for the COVID-19 vaccines production.</p>		<p>By <a href="#">January 2022</a>, Team Europe (a joint action involving the EU, its Member States and European financial institutions) has so far shared more than 380 million vaccine doses with countries around the world, making the EU the biggest donor of Covid-19 vaccines to date. In parallel, the EU was the only region that exported 1.7 billion doses to the rest of the world, to 155 countries.</p> <p>Some examples of the COVAX vaccine delivery by Team Europe include:</p> <ul style="list-style-type: none"> <li>- In Sierra Leone, in August 2021, the Commission (via COVAX, Team Europe and other partners), delivered 96,000 vaccines. This brings the total to 192,000. Its goal was to have 200,000 vaccines delivered by the end of 2021.</li> <li>- In Mali, in March 2021, the first 396,000 doses went to medical personnel, people older than 60 or having a serious illness.</li> <li>- In Guinea, COVAX, with Team Europe as a main funder, sent 194,400 vaccines. The EU already mobilised €35 million to fight the virus. The total Team Europe contribution is €45 million. As such, Team Europe is the biggest donor in this country.</li> <li>- In Madagascar, via COVAX, the first 250,000 doses of Covishield/AstraZeneca arrived. They will be given to the front line workers (health care, police, social workers), to the most vulnerable and to people older than 70. Together with the other vaccines to come in the future, COVAX - mainly funded by Team Europe - will already cover about 20% of the population.</li> </ul>	
6)	32. Highlights the crucial role played by community-led organisations and civil society organisations (CSOs) in delivering health	As regards paragraph 32, civil society organizations (CSOs) are indeed instrumental in advocating for universal health coverage as a human right. Their involvement is key for the			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	services to the most marginalised and underserved communities; calls on the Commission to ensure political, financial and technical support for CSOs delivering community-based services in order to make sure that those who cannot go to health clinics are able to access tailored and appropriate services;	EU's rights-based approach, particularly as it relates to diseases affecting marginalised populations (HIV, tuberculosis), SRHR or mental health. They are instrumental particularly in fragile settings where governments are not able to deliver healthcare and there are not private providers. Support to international and local CSOs will be mainstreamed through calls for proposals at global and local levels, and also through global initiatives (especially the Global Fund) or the UN with a thorough monitoring framework.		Due to the general character of the promise/reply, the action(s) taken cannot be assessed.	
7)	39. Calls on the Commission and the Member States to support parliaments as they continue to play an active role in scrutinising government measures to contain the COVID-19 pandemic and in assessing the human rights implications of public health measures; stresses that the health sector in many countries is prone to corruption and there is a need to strengthen accountability and oversight;	No specific reply is provided to this particular point.		Not mentioned.	
8)	42. Welcomes the temporary suspension of debt service payments for the poorest countries announced by the G20 and joins the call on private creditors and state-owned commercial banks to follow suit; calls on the Commission and the Member States to promote full implementation of the G-20 Debt Service Suspension Initiative (DSSI) and the G-20's new Common Framework on Debt Treatments beyond the DSSI; underlines that the magnitude of the economic and social crisis in the developing world requires more profound and far-reaching measures and encourages the Commission to support international efforts in this regard; considers that interest saved thanks to this suspension	As regards paragraph 42, on the background of the rise of non-OECD creditors and increased private debts, the Commission has been advocating the need of addressing the debt issue of developing countries in the context of the pandemic; it has been promoting the implementation of the G-20 Debt Service Suspension Initiative (DSSI). In addition, the Commission is following up on the G-20's new Common Framework on Debt Treatments beyond the DSSI in coordination with the EU member states.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">G-20 debt service suspension initiative (DSSI)</a> ), <a href="#">G-20 new common framework on debt treatments</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	should instead be invested in the health sector, which is often severely underfunded in developing countries; invites the Commission and the Member States, in this regard, also to support initiatives at international level proposing flexible mechanisms for debt reduction linked to the creation of counterpart funds in local currency to promote investments aimed at achieving the SDGs;				
9)	43. Points out that many developing countries were already experiencing significant levels of debt before the pandemic, thereby preventing adequate investments in crisis prevention, health systems and social protection; underlines the importance of addressing debt sustainability in partner countries as a priority; calls on the Commission to take new initiatives to tackle the problems of illicit financial flows, tax evasion and tax fraud in order to improve the tax bases of developing countries;	As regards paragraph 43, the Commission agrees with the importance of strengthened domestic revenue mobilisation to finance sustainable development outcomes. It is fully committed to the principle of policy coherence for development as also reflected in the Addis Tax Initiative 2025 declaration, which it supports. The Commission confirms that illicit financial flows, tax evasion and topics related to domestic revenue mobilisation feature substantially in the ongoing programming exercise. The Commission agrees that budget support is a useful modality to assist partner countries' reform programmes on universal basic services. The Commission believes that it would be important to strengthen and better coordinate existing international bodies and organisations working on tax issues and international cooperation, in particular the Global Forum on Transparency and Exchange of information and the Inclusive Framework on Base Erosion and Profit Shifting (BEPS). While the Commission recalls that Double Taxation Treaties fall under the competence of EU Member States, the Commission shares the view that such treaties should be negotiated also applying policy coherence for developments principles.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Addis tax initiative 2025 declaration, double taxation treaties</a> ).	
10)	44. Calls on the Commission to envisage more support for the most fragile countries to tackle the COVID-19 pandemic and provide access to healthcare while not neglecting existing	Concerning paragraph 44, many fragile countries recovering from the fallouts of the pandemic require indeed linking relief, rehabilitation and development (LRRD) approaches in collaboration with the Commission, continuing the good		Human development investments in the Sahel region are described <a href="#">here</a> . Recent examples include:	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>challenges such as extreme poverty, security, access to quality education and jobs, democracy, equal opportunities and climate change;</p>	<p>collaboration e.g. the Ebola epidemic in Kivu and the COVID-19 response. At country level, bilateral EU health programmes are ongoing or planned precisely in some of the most fragile countries -Afghanistan, Central African Republic, Democratic Republic of the Congo, South Sudan, Yemen-, or fragile parts of countries where nexus considerations apply -north of Nigeria, north of Burkina Faso-. In the countries of the Sahel region, social sectors and basic services play a key role in (re)building states, and the health and social protection nexus helps protect refugees' health. Important human development investments are planned in all Sahel countries.</p>		<ul style="list-style-type: none"> <li>- <a href="#">Regreening Africa: Restoring land and livelihoods in the Sahel</a> (June 2021).</li> <li>- <a href="#">Investing in brighter futures for displaced people in the Sahel</a> (May 2021).</li> </ul>	
11)	<p>64. Underlines that implementation of the humanitarian-development-peace nexus has to be a priority in the programming of the NDICI-Global Europe in fragile countries; calls on the Commission's DG ECHO, DG INTPA and DG NEAR to implement complementary programmes suited to local contexts and local opportunities, whenever possible, in order to mutually reinforce the different aspects of the nexus;</p>	<p>In line with paragraph 64, the Commission acknowledges that the COVID-19 pandemic has exposed the weak social protection for various groups in society, including migrants, the urban poor and vulnerable communities. In order to reduce vulnerabilities and the growing inequality, the Commission's work with early investment on Shock Responsive Social Protection at community level has proved to be strategic in the context of COVID-19. These actions have been complementary to development and peacebuilding efforts enabling the expansion of social protection at national level in the times of COVID-19.</p> <p>The Commission also recognises the importance of continuing strengthening synergies and complementarities among different actors while respecting humanitarian principles. The programming exercise in fragile and conflict-affected countries has taken the Humanitarian-Development-Peace (HDP) nexus into consideration, in accordance with the framework set out in the NDICI-Global Europe instrument and its programming guidelines.</p> <p>The HDP nexus has also been at the core of the response to COVID-19. Through Team Europe, over EUR 40 billion have been allocated to tackle the humanitarian needs, strengthening at the same time health system and also</p>		<p>A two-track approach to the EU humanitarian initiative to support Covid-19 vaccination rollout in Africa is explained <a href="#">here</a>.</p> <p>On the Commission's work with early investment on shock responsive social protection to support children and their families living in crisis-prone areas where severity and complexity of humanitarian crises is increasing, see:</p> <ul style="list-style-type: none"> <li>- <a href="#">Programme guidance: strengthening shock-responsive social protection systems</a></li> </ul> <p>The Commission continues its work on the <a href="#">resilience and humanitarian-development-peace</a> nexus. However, it is unclear how the work has evolved during the pandemic.</p> <p>The Commission has made available extra funds to address <a href="#">humanitarian crises</a> exacerbated or created as a consequence of the Covid-19 pandemic.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>addressing socio-economic impacts. In the same way, and as mentioned above, the Commission, through Team Europe is one of the main contributors to COVAX, aiming to deliver 2 billion vaccines in 2021 to 92 low- and middle-income countries (LMICs), of which 5% for humanitarian needs. By implementing effective linkages between the different humanitarian, development and peace actions and using existing tools, such as policy dialogue, the Commission will reinforce national and local capacities to provide basic services and support resilience building.</p>			

4.1.11.4. DEVE Resolution 4: EP resolution of 6 October 2021 on the role of development policy in the response to biodiversity loss in developing countries, in the context of the achievement of the 2030 Agenda

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>The role of development policy in the response to biodiversity loss in developing countries, in the context of the achievement of the 2030 Agenda</b></p>	<p>6/10/2021 <a href="#">T9-0404/2021</a> <a href="#">2020/2274(INI)</a> <b>DEVE</b></p>	<p>On 9 November 2021, the Parliament received <a href="#">‘Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – October I 2021 part-session’ informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Janez Lenarčič on behalf of Commissioner Jutta Urpilainen. The <a href="#">plenary debate</a> took place on 10 October 2021.</p>			
1)	<p>10. Welcomes the African initiative on the ‘Great Green Wall’ and calls on the Commission to support this project;</p>				
2)	<p>16. Reiterates its request that the Commission urgently present a proposal for an EU legal framework to halt and reverse EU-driven global deforestation and forest degradation, which imposes on companies a requirement to conduct due diligence in order to ensure that the products placed on the EU market are not associated with deforestation, the conversion of natural ecosystems and violations of IPLC rights;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>20. Notes with deep concern that EU consumption accounts for around 10 % of the global share of deforestation, in particular through dependency on imports of agricultural commodities such as palm oil, meat, soy, cocoa, coffee, maize, timber and rubber; reiterates its call on the Commission to submit a proposal in 2021 for an EU legal framework to halt and reverse EU-driven global deforestation, by ensuring that EU markets and consumption patterns do not detrimentally affect forests and biodiversity in developing countries, taking account of the knock-on effects of this on their populations; calls for the EU to support such countries in implementing the sustainability of food systems, through the creation of short supply chains, the development of agro-ecology, support for small farmers, while ensuring land rights and the rights of local communities;</p>				
4)	<p>28. [...] urges the Commission and the Member States to take into account the Union's obligations under international agreements and to ensure that development aid is not used to promote genetic modification (GM) technologies in developing countries;</p>

	humanitarian funding; urges the Member States to lead by example and contribute a fixed share of their gross national incomes to humanitarian aid; calls on the Commission to report annually on the amount of humanitarian funding disbursed from the EU in the global context;				
3)	3. Calls on the Commission and the European External Action Service to devise a strategy for long-term collaboration with third countries, in particular emerging donors, by leveraging the EU's bilateral, regional and multilateral diplomacy to expand the range of donor countries which contribute to humanitarian aid on a voluntary basis; underlines that a contribution from additional donor countries would make it possible to raise the amount needed to address international humanitarian crises; notes with concern the lack of a formal arrangement in the EU-UK Trade and Cooperation Agreement regarding humanitarian aid and calls on the Commission and the Member States to work towards a formal EU-UK partnership on humanitarian aid;				
4)	4. [...] calls on the Commission to provide Parliament with more information and a written assessment on the implementation of the pilot project for blending for humanitarian action, assessing the alignment with external action objectives [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	6. Calls on the Commission, the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy, and the Member States to closely monitor international humanitarian law violations and to include international humanitarian law violations as a criterion for listing individuals or entities in the relevant EU sanctions regimes in line with the EU guidelines on promoting compliance with international humanitarian law [...]				
6)	7. Calls on the Commission and the Member States to strengthen international humanitarian law and to vigorously prosecute and sanction those who use starvation as a weapon of war in order to counteract the widespread violations of the right to food during conflicts, the recurring use of starvation as a method of warfare, and the denial of humanitarian access;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	<p>9. Calls on the Commission and the Member States to maintain and foster a realistic risk-sharing dialogue between the relevant departments, with their humanitarian partners and with other stakeholders, building on recent experiences and the lessons learnt in order to continuously strive to improve existing funding regulations by making them more efficient and effective, particularly at times of highly volatile humanitarian crises; points out that risk awareness has proven to be an effective tool for risk mitigation;</p>				
8)	<p>10. Stresses the particular importance of supporting local actors and urges the Commission to develop an ambitious localisation policy, including fostering transparency, making use of partners' expertise and experience, and outlining how to provide more and better support for local respondents to strengthen their capacities, enable them to make use of all the instruments available and ensure their involvement in decision-making processes, while addressing the issue of mutual accountability and risk sharing, as reinforcing local respondents is a major factor to reduce the need for international humanitarian assistance in the future; calls on the Commission to ensure that women's equal participation and empowerment is integrated explicitly into any new mechanisms to strengthen the role of local actors in humanitarian action;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	12. [...] calls on the Commission to provide the necessary resources for climate change adaptation and disaster risk reduction through the Neighbourhood, Development and International Cooperation Instrument – Global Europe, among other tools, and to accelerate the implementation of the Sendai commitments in the EU’s external action;				
10)	14. Underlines the fact that while humanitarian aid seeks to tackle immediate, life-threatening situations, crises are caused by drivers that require long-term solutions, as underlying fragility is a significant precursor to humanitarian crises; calls on the Commission and the European External Action Service to adopt a communication developing a clear policy on a humanitarian-development-peace nexus in order to bridge the gaps between the individual policy areas, while ensuring that the distinct legal character and principles of humanitarian aid are respected; (...); calls on the Commission to publish an assessment of the operationalisation of the humanitarian-development nexus in the six pilot countries identified in 2017;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	15. Calls on the Commission to assess past experiences and programmes on gender-related issues, as there is a growing need to address these given the prominent role of women as victims of conflicts and disasters;				
12)	18. Reiterates the Commission's commitment and ongoing efforts to promote the visibility and awareness of EU humanitarian aid among different stakeholders throughout the EU, including NGOs, and to strengthen the EU's visibility in its external action;				

#### 4.1.12. ECON

Between July 2019 and December 2021, the **Committee on Economic and Monetary Affairs (ECON)** was responsible for fourteen ‘ordinary’ own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of fifteen Parliament's resolutions ('ECON resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents, as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent 12 written replies to the Parliament’s 14 ECON resolutions. In ten cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other two replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one ECON resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted six specific and six mixed replies. The Commission has not replied with written follow-up documents to one of Parliament's 249 requests. At the cut-off date of this study, the Commission had not yet replied to 23 of Parliament’s 249 requests.

### Analysis of the Commission actions

The Commission proposed/promised 47 genuine actions. In 66 cases, no further specific actions were proposed/promised to be taken by the Commission and in 66 cases it remained unclear if an action was carried out. In 79 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 47 actions proposed/promised by the Commission, the Commission already carried out the action in 23 cases. In the 24 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.12.1. ECON Resolution 1: EP resolution of 12 February 2020 on the European Central Bank Annual Report for 2018

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>The European Central Bank Annual Report for 2018</b>	12/02/2020 <a href="#">T9-0034/2020</a> <a href="#">2019/2129(INI)</a> ECON	On 22 April 2020, the Parliament received 'Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – February 2020 part-session' informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Valdis Dombrovskis. In addition, the report does not address any direct calls to the Commission.  The <a href="#">plenary debate</a> took place on 14 September 2020.			
No calls falling under the scope of the methodology.					

4.1.12.2. ECON Resolution 2: EP resolution of 18 June 2020 on competition policy – annual report 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Competition policy – annual report 2019</b>	18/06/2020 <a href="#">T9-2020/0158</a> <a href="#">2019/2131(INI)</a> ECON	<a href="#">SP(2020)427</a>	Final reply (SP) received 14 December 2020	Specific reply			
1)	1. Calls on the Commission to further develop the influence of EU competition policy in the world, in particular by continuing pertinent dialogue and stepping up cooperation with the USA, China, Japan and other third countries, where possible, via second-generation cooperation agreements that allow for a more effective exchange of information between competition authorities;	The Commission intends to maintain and strengthen its role as one of the world’s leading competition law enforcers. An important aspect of this objective is to continue to develop its close cooperation with the competition authorities in many competition policy jurisdictions (paragraph 1). The Commission has longstanding cooperation arrangements in place with a number of countries such as the United States (US), Japan and South Korea. The cooperation between the US competition agencies (the Federal Trade Commission and the Department of Justice) and the Commission in ongoing merger investigations is particularly close and frequent. The Commission also has good cooperation with other important jurisdictions, including China. The Commission continues the negotiations with Japan and Canada with a view to conclude a 2nd generation cooperation agreement that would, under certain conditions, allow the exchange of confidential evidence in “parallel” investigations. The Commission also remains very active in multilateral fora such as the Competition Committee and the International Competition Network of the Organisation for Economic Co-operation and Development (OECD). The Commission reconfirmed its State aid control dialogue with the Chinese competition agency (State Administration for Market Regulation) in 2019 and the Commission is looking to expand its State aid control dialogue with other jurisdictions.				In February 2021, the Commission announced an <a href="#">improvement</a> to the agreement with Japan, which would allow for more effective exchange of information. However, it does not specifically concern cooperation on anticompetitive practices.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	<p>2. Calls on the Commission to develop tools to facilitate better monitoring of foreign direct investment (FDI) in all Member States, to ensure a rapid implementation of the screening mechanism for FDIs and to propose a tool to strengthen the current mechanism, while ensuring that the European Union remains open and attractive for FDI;</p>	<p>The resolution recalls the need to apply State aid control equally to EU and non-EU operators and requests that the Commission pay attention to foreign state-owned companies subsidised by their governments (paragraph 2). [...] In its Communication “Guidance to the Member States concerning foreign direct investment and free movement of capital from third countries, and the protection of Europe’s strategic assets, ahead of the application of Regulation (EU) 2019/452 (Foreign Direct Investment – FDI-Screening Regulation)”, issued on 25 March 2020, the Commission called upon Member States to set up a screening mechanism for foreign direct investments into the EU. To date, a majority of Member States have introduced a screening mechanism, and a number of them have reviewed their scope or are considering doing so. An evaluation of the FDI Screening Regulation taking into account the experience gained in the covid-19 pandemic as well as lessons learnt from the full implementation of the regulation as of October 2020 indeed could be considered. In such a review, Member States’ national FDI screening mechanisms would be assessed in order to remove remaining blind spots in the single market.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  The <a href="#">EU foreign investment screening mechanism</a> became fully operational on 11 October 2020. In July 2020, the Commission proposed <a href="#">a delegated act</a> amending Annex I to the <a href="#">FDI screening regulation</a>.</p>	
3)	<p>3. Calls on the Commission to ensure reciprocity with third countries in public procurement, State aid and in investment policy including taking into account social and environmental dumping; recalls the need to open up public procurement markets in third countries to which access does not yet exist;</p> <p>Urges the Commission to work towards the accession of key third countries, such as China, to the WTO Agreement on Government</p>	<p>Moreover, the revised Commission proposal for an International Procurement Instrument is aimed at opening public procurement markets in third countries to EU firms by increasing the EU leverage in consultations with third countries excluding foreign firms participating in public tenders. The objective is to adopt an effective procurement instrument, which will not create unnecessary administrative burdens for contracting authorities and adverse effects for EU companies. The Commission pursues reciprocity in the opening of procurement markets by negotiating and implementing ambitious provisions on public procurement in</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">international public procurement</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Procurement with an acceptable initial offer; stresses that any instrument aimed at improving international market opening, such as the EU's International Procurement Instrument that are to be finalised by 2021 must avoid additional bureaucracy and new market distortions that have adverse effects on EU companies;	Free Trade Agreements (FTAs) and by securing the broadest possible commitments from countries joining the WTO Government Procurement Agreement (GPA). The EU is strongly in favour of additional countries acceding to the GPA if their public procurement regulatory frameworks are compatible with the GPA rules and that market access is commensurate with the EU and other GPA parties' schedules.			
4)	4. Calls on the Commission to guarantee fair competition between the European Union and the United Kingdom following its departure from the EU in order to ensure a level playing field and avoid dumping;	The Commission supports the European Parliament's call to guarantee fair competition between the EU and the United Kingdom following its departure from the EU.		No further specific actions proposed/promised to be taken by the Commission.	
5)	5. Calls on the Commission to further promote major IPCEIs in disruptive technologies, to simplify the relevant provisions and to streamline its requirements so that smaller industrial research projects are also approved;	Not mentioned.		Not mentioned.	
6)	6. Recalls the need for the Commission to apply State aid control equally to EU and non-EU operators to avoid asymmetries with foreign competitors and pay increased attention to foreign-based state-owned companies that are subsidised by their governments in ways that the EU single market rules prohibit for EU entities; invites the Commission to look at the recent proposal of the Dutch Government and investigate the option to add a pillar to EU competition law that gives the Commission appropriate investigative tools in cases where a company is deemed to have engaged in distortionary behaviour due to government	Although the follow-up does not mention point 6, the Commission however states that the "Commission reconfirmed its State aid control dialogue with the Chinese competition agency (State Administration for Market Regulation) in 2019 and the Commission is looking to expand its State aid control dialogue with other jurisdictions."		Due to a general character of the promise, it is unclear whether relevant action has been taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	subsidies or to have made excessive profits based on a dominant market position in its home country;				
7)	7. Reiterates its request for the Commission to examine whether possible distortions of competition arise from the corporate support purchase programme, especially between SMEs and multinational corporations;	No specific reply is provided to this particular point.		Not mentioned.	
8)	8. Calls on the Commission to adopt a more favourable approach for strong EU industrial policy to ensure and maintain high competitiveness in global markets;	The Commission recognises the link between the competition rules, industrial policy and rules on international trade (paragraph 12), because they all have the objective to maintain and enhance Europe's competitiveness within the Single Market and globally. In this respect, the Commission refers to its Communication "A New Industrial Strategy for Europe" of 10 March 2020, which lays out the Commission's vision for achievements in the EU by 2030 and beyond. The industrial strategy aims to enable and accelerate change and innovation, to make the EU a global leader in green and digital technologies. The Communication includes a number of initiatives putting the industrial strategy into practice.		No further / specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	9. Calls on the Commission to seize the opportunity of the revision of the guidelines on horizontal cooperation agreements to create a more flexible framework and increase legal certainty for companies, (...) calls on the Commission to communicate more timely and efficiently to the holders of cooperation projects of a certain magnitude, and allow for the possibility of asking new questions as part of a voluntary fast-track notification procedure;	No specific reply is provided to this particular point.		Not mentioned.	
10)	14. Calls on the Commission to fully involve Parliament and the Member States in this area;	No specific reply is provided to this particular point.		Not mentioned.	
11)	17. Calls on the Commission to ensure the EU trade and competition policy doesn't undermine the respect of EU social and ecological standards or undermine the development of more ambition standards;	No specific reply is provided to this particular point.		Not mentioned.	
12)	18. Calls on the Commission to properly analyse and study the public procurement markets of the third countries with which it has or is negotiating a free trade agreement, in order to negotiate the best access conditions for European companies;	The Commission is engaged in FTA negotiations based on comprehensive analyses of third countries' procurement markets. The Commission relies on the country knowledge of trade experts including those in EU delegations in third countries. In addition, the Commission has developed innovative tools to gather economic data and analyses of legal frameworks, including assessments of access barriers to procurement markets.		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	19. Calls on the Commission to coordinate the necessary action by the Directorates-General involved – DG Trade and DG Competition – to ensure that the competition rules and their implementation guarantee fair competition for European companies in third-country markets, and vice versa;	In general, the Commission aims to ensure that competition rules and their implementation guarantee fair competition for European companies in third country markets, and vice versa.		Because of a general character of the promise, it is unclear whether the Commission ensured 'that competition rules and their implementation guarantee fair competition for European companies in third country markets, and vice versa'.	
14)	20. Calls on the Commission to pay particular attention to the role of international standard-setting for fair competition; insists that the EU should strengthen its multilateral approach to standard-setting, in particular in the context of the International Organisation for Standardisation (ISO) and the International Electrotechnical Commission (IEC);	No specific reply is provided to this particular point.		Not mentioned.	
	Calls on the Commission to establish a high-level coordinator for standardisation policy in this context;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	<p>22. Calls on the Commission to review merger and acquisition rules and strengthen antitrust action and to take into account the effects of market and network power associated with both personal and financial data;</p> <p>Calls, in particular, on the Commission to adjudge the control of such data as a proxy for the existence of market power under its guidance on Article 102 of the TFEU;</p>	<p>The European Parliament is of the opinion that the Commission should consider the control of personal and financial data as a proxy for market power (paragraph 22). While the European Court of Justice stated in its 2006 ASNEF judgment<sup>7</sup> that data protection issues "as such" are not a matter for competition policy enforcement, this does not prevent the Commission to take into account the importance of control of large amounts of (personal) data, and of data protection in the competitive dynamics of digital markets. In competition analyses, data can be relevant in several ways, for example as a product offered on a market, as an input for the product provided and as an asset that confers a competitive advantage and market power. An example of data as an asset are unilateral conduct or merger cases where the possession of data is an element of the quality of a product. For example, in the Microsoft/ LinkedIn merger case, the Commission considered data protection as an element of the quality of professional social networks.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	

<sup>7</sup> Case C-238/05, Asnef-Equifax, Servicios de Información sobre Solvencia y Crédito, SL and Administración del Estado v Asociación de Usuarios de Servicios Bancarios (Ausbanc), 23.11.2006

17)	<p>24. Calls on the Commission to consider revising the thresholds for a merger review in order to include factors such as the number of consumers affected and the value of the related transactions as part of its ongoing evaluation of the Merger Regulation<sup>8</sup>;</p>	<p>The European Parliament calls on the Commission to consider revising the thresholds for merger reviews (paragraph 24). This issue is one of the main components of the Commission’s ongoing evaluation of certain procedural and jurisdictional aspects of the Merger Regulation. The Commission has reached the tentative conclusion that overall the existing thresholds work well. However, each year there are a few mergers that could potentially affect competition in the internal market, which the Commission cannot review because the turnover thresholds are not met. Sometimes a company’s turnover does not reflect the role the firm plays on the market. In digital and pharmaceutical industries for instance, future competition may depend on new products or services, which have generated as yet no or limited turnover. A solution currently considered would be to readjust the use of the merger referral system between the Commission and the national competition authorities of the EU. In the past, certain proposed mergers could be reviewed because national</p>		<p>In March 2021, the Commission published a staff working document announcing <a href="#">evaluation results and follow-up measures</a> on jurisdictional and procedural aspects of EU merger control. The evaluation considers revising the jurisdictional thresholds for a merger review.</p>	

<sup>8</sup> OJ L 24, 29.1.2004, p. 1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		competition authorities referred them to the Commission. An increased use of such referrals would be a possible way for the Commission to assess mergers that do not meet the EU turnover thresholds, but have potential negative effects on competition across the EU. However, before changing the approach in this manner, further reflection is needed and guidance would have to be adopted.			
18)	25. Calls on the Commission to assess higher levels of concentration due to horizontal ownership by large asset management companies in its ongoing evaluation of the Merger Regulation and consider providing guidelines on the use of Article 101 and Article 102 of the TFEU in this respect;	No specific reply is provided to this particular point.		Not mentioned.	
19)	26. Calls on the Commission to take resolute action against such abuses of dominant positions, which are harmful to the fluidity of financial markets and run counter to the interests of sustainable development	No specific reply is provided to this particular point.		Not mentioned.	
20)	27. Calls on the Commission and the national competition authorities to look into the practices of such acquisitions and their effects on competition, especially with regard to 'killer acquisitions', as defined in its high-level expert report of 4 April 2019 entitled 'Competition policy for the digital era' [...]  Calls on the Commission and the national competition authorities to look into the practices of such acquisitions and their effects on competition, especially with regard to 'killer acquisitions', as defined in its high-level expert	The Commission takes note of the European Parliament's call for conducting a study about reversing the burden of proof for certain "digital" mergers (paragraph 27). The Commission would like to emphasise the fact that the allocation of the burden of proof in EU merger control follows directly from the EU Merger Regulation and the jurisprudence of EU courts. The Commission bears the burden of proof both in prohibition and clearance decisions. There are limited exceptions, such as merger-specific efficiency claims that must be demonstrated by the merging parties. Reversing the burden of proof would not be possible without amending the Merger Regulation. A legislative reform reversing the burden of proof would have to take into account fairness and efficiency considerations while being fully reconciled with the merging firms' rights of		No further specific actions proposed/promised to be taken by the Commission.  No further specific actions proposed/promised to be taken by the Commission.  No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	report of 4 April 2019 entitled 'Competition policy for the digital era';  Calls on the Commission to conduct a study on the reversal of burden of proof as per the Act on Digitalisation of German Competition Law ('GWB-Digitalisierungsgesetz') published in October 2019;	defence. Another difficulty would be to determine in a non-ambiguous manner, which "digital" mergers would fall under the normal standard of proof and those that would be subject to the reverse burden.			
21)	28. Asks the Commission to assess how more demanding regimes of data access, including data interoperability, can be imposed in particular when data access opens up secondary markets for complementary services or when data is confined to dominant firms;	No specific reply is provided to this particular point.		Not mentioned.	
22)	29. Calls on the Commission to look into the issue of self-preferencing and enforce the necessary laws and use the instruments required on those entities that practice self-preferencing;  Calls on the Commission to assess the possibility of imposing <i>ex ante</i> regulatory obligations where competition law is not enough to ensure contestability in these markets, therefore avoiding competitors' foreclosure and ensuring that emerging bottlenecks are not perpetuated by the monopolisation of future innovation;	The European Parliament calls on the Commission to explore the possibility to adopt <i>ex-ante</i> regulation in markets dominated by digital platforms to ensure the contestability and fair functioning of such markets (paragraph 29). The Commission considers that there is a need for a comprehensive policy response, which comprises three complementary and mutually reinforcing pillars. These are i) continued vigorous enforcement of the competition rules, ii) possible <i>ex ante</i> regulation of digital platforms, and iii) a possible new competition tool addressing competition issues which cannot be addressed or tackled in the most effective way with the existing competition rules.  Gatekeeper platforms may both operate a platform upstream and at the same time compete with companies operating on the platform downstream. In such cases, gatekeeper platforms may favour their own downstream products in a way that is detrimental to choice and innovation. The Platform-to-Business Regulation, which entered into force on 12 July 2020, created horizontal standards for transparency and offers		The Commission published a <a href="#">legislative proposal</a> for the digital service act package on 15 December 2020.  The <a href="#">Platform-to-Business Regulation</a> entered into force on 12 July 2020.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>redress for small and medium sized Enterprises (SMEs) that may be using platforms' services. However, there is no current regulatory framework at EU level addressing the economic power of large digital platforms acting as gatekeepers. The Commission is therefore working on a possible <i>ex ante</i> regulatory instrument for large online platforms acting as gatekeepers in markets with significant network effects. The aim is to ensure a fair trading environment and increase the innovation potential and capacity across the online platform ecosystem in the EU's single market. As part of the Digital Services Act Package, the Commission has published an Inception Impact Assessment and initiated a public consultation. One possibility would be to establish a number of clear-cut regulatory obligations and prohibitions ("dos and don'ts") for digital platforms acting as gatekeepers. Another possibility would be to allow imposing on such platforms tailor-made remedies on a case-by-case basis.</p> <p>The Commission also refers in this context to its ongoing public consultation on a possible new competition tool. Such a tool would on a case-by-case basis, and subject to fair process principles (including judicial review), allow the Commission to impose behavioural and, where appropriate, structural remedies to address structural competition problems that cannot be addressed or tackled in the most effective manner with the existing competition rules. There would be no finding of an infringement and consequently no fines imposed on market participants</p>		<p>The Commission carried out a public consultation on a possible new competition tool the from 3 June to 8 September 2020.</p>	
23)	<p>30. Notes that the Commission is reflecting on the need for targeted <i>ex ante</i> regulation on specific systemic issues that may arise in digital markets; calls, therefore, on the Commission to introduce a centralised <i>ex ante</i> market monitoring system (while taking into account the results of an impact assessment), to provide</p>	<p>No specific reply is provided to this particular point.</p>		<p>Not mentioned.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	EU and national competition and regulatory authorities with the necessary means to gather data anonymously so as to be able to better detect market failures in due time, and – where appropriate – to introduce targeted regulation when practices become systemic;				
24)	31. Calls on the Commission to take those aspects into account regarding the upcoming European strategy for data and to investigate the cross-usage of data, where data originating from one service is used to expand the platforms’ offering to new services;	No specific reply is provided to this particular point.		Not mentioned.	
25)	34. Calls on the Commission to give explicit attention in its competition policy to these gatekeepers and to conclude its ongoing investigations as soon as possible;	No specific reply is provided to this particular point.		Not mentioned.	
26)	35. Urges the Commission to increase freedom of choice for consumers, to strengthen the role of the European Consumers Centres Network (ECC-Net) and to conduct a study on whether an EU consumers authority is needed;	No specific reply is provided to this particular point.		Not mentioned.	
27)	36. Calls on the Commission to support initiatives that meet this objective and to recognise that their success is contingent both on the innovative nature of the system for consumers and businesses and on the viability of its economic model;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
28)	37. Calls on the Commission to also make use of alternative behavioural and, if need be, structural remedies in order to fully ensure the effectiveness of EU competition policy; stresses that the cease-and-desist order should be much more prescriptive in upcoming remedies;	The Commission considers fines and remedies ( <b>paragraph 37</b> ) as two fundamental complementary tools to ensure the full effectiveness of competition law. The purpose of the fines imposed for infringements of Articles 101 or 102 TFEU is two-fold. While fines are set in each case at a level that has a deterrent effect on the undertaking concerned (specific deterrence), they also aim at deterring other undertakings from engaging in, or continuing, anti-competitive conduct (general deterrence). However, the fine imposed in a competition case is only one of the elements that can contribute to a change in an undertaking's behaviour. In this regard, remedies play an important role in ensuring that an undertaking that breached Articles 101 or 102 TFEU ceases its illegal conduct and desists from engaging in similar conduct in the future. Under Regulation (EC) No 1/2003 (recital 12 and Article 7.1), the Commission can impose any remedy, whether behavioural or structural, which is necessary to bring the infringement effectively to an end, having regard to the principle of proportionality. Structural remedies can only be imposed either where there is no equally effective behavioural remedy or where any equally effective behavioural remedy would be more burdensome for the undertaking concerned than the structural remedy. Changes to the structure of an undertaking as it existed before the infringement would only be proportionate where there is a substantial risk of a lasting or repeated infringement that derives from the very structure of the undertaking. The Commission thus must assess in each case what remedy is necessary and proportionate, based on the specific circumstances at stake. The Commission is committed to make full use of its powers when devising appropriate and proportionate remedies, in order to ensure the full effectiveness of competition law enforcement. The Commission also highlights that it has already conducted a review of alternative approaches proposed in the literature to		Because of a general character of the promise, it is unclear whether the Commission fulfilled its' commitment to make full use of its powers when devising appropriate and proportionate remedies, in order to ensure the full effectiveness of competition law enforcement'.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		assess the deterrent effects of cartel and merger enforcement policies <sup>9</sup> .			
29)	39. Calls on the Commission to consider a proposal aimed at unbundling search engines –as outlined in Parliament’s resolution of 27 November 2014 on supporting consumer rights in the digital single market <sup>10</sup> – from their commercial services in order to end the status quo, which could be a potential long-term means of achieving fair and effective competition in the European digital market;	No specific reply is provided to this particular point.		Not mentioned.	
30)	40. Calls on the Commission to make use of fast-track antitrust procedures and to find new incentives, such as the leniency programme, to make companies more cooperative when it comes to tracking down cartels across the EU;	No specific reply is provided to this particular point.		Not mentioned.	
31)	41. Calls on the Commission to relax the criteria for these measures, while respecting the rule of law, in order to avoid any irreversible damage;	The Commission considers the imposition of interim measures (paragraph 41) as a key tool to ensure that competition is not harmed while an investigation is ongoing. The purpose of interim measures is to avoid that the final decision is deprived of its effectiveness. Pursuant to Article 8 of Regulation 1/2003, interim measures can only be imposed if two conditions are fulfilled: (i) there is a “ <i>prima facie</i> finding of infringement”; and (ii) there is a risk of “serious and irreparable damage to competition”. In October 2019, the Commission issued a decision imposing interim measures on chipset manufacturer Broadcom. It was the first time in 18 years the Commission		No further specific actions proposed/promised to be taken by the Commission.

35)	47. Calls on the Commission to examine whether the tax exemption for kerosene results in a distortion of competition that benefits the aviation sector;	The Commission welcomes the European Parliament's support for the Commission's review of the State aid guidelines in line with the European Green Deal (paragraph 47). The State aid rules enable Member States to steer investment towards objectives of common interest, such as aid for environmental protection and energy savings governed by the Guidelines on State aid for environmental protection and energy 2014-2020		<a href="#">Revised guidelines</a> on state aid for environmental protection and energy were adopted by the Commission on 21 December 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Calls on the Commission, as part of the upcoming revision of the Guidelines on State aid for environmental protection and energy, to provide for greater flexibility for aid granted to citizen-generated renewable energy, in line with the EU's climate commitments;</p>	<p>(EEAG). Since State aid rules form a vital part of the EU legal framework promoting the green transition, they need to be kept up to date, not least by adjusting them to market developments and to the objectives set out in the Communication on the European Green Deal. To that end, the EEAG are currently undergoing an evaluation with a view to revising them by the end of 2021.</p> <p>The EEAG evaluation forms part of a wider Fitness check of a large number of State aid rules mostly adopted in 2012-2014 as a part of the so-called State aid modernisation. Within the Fitness check, the General Block Exemption Regulation (GBER) is evaluated to bring it in line with the European Green Deal during the second half of 2021. The GBER allows the Member States - without the Commission's approval - to provide considerable support for environmental protection and energy savings. The GBER shortens the lead times for investments in support of the European Green Deal targets.</p> <p>To address the risk of carbon leakage, in 2012 the Commission adopted the Emissions trading scheme State aid guidelines (ETS guidelines). These guidelines define the conditions under which state aid can be used to help energy-intensive industries to cope with higher electricity costs from the EU's emissions trading system, while maintaining incentives for green investments and maintaining competition in the internal market. The Commission adopted on 21 September 2020, revised EU Emission Trading System State aid Guidelines in the context of the system for greenhouse gas emission allowance trading post-2021. The revised rules will enter into force on 1 January 2021 with the start of the new ETS trading period, and replace those of 2012.</p> <p>Member States may continue to rely on the State aid rules to alleviate the social and regional consequences of decarbonisation measures. The Commission may authorise State aid measures promoting the deployment of renewables,</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		improving energy efficiency, stimulating demand for low emission vehicles for public and private transport as well as reducing CO2 emissions.			
36)	50. Calls on the Commission to provide further guidance and an enabling framework for further investments in energy efficiency and building renovation, as well as on repowering, hybrid projects and electricity storage;	No specific reply is provided to this particular point.		Not mentioned.	
37)	53. Calls on the Commission to make more systematic use of investigations in sectors that are essential to the everyday life of citizens, such as health, mobility, online advertising, energy, tourism, including monitoring price caps of online accommodation platforms, culture, financial and payment services, and the media, in the digital age, while maintaining the EU's high standards;	No specific reply is provided to this particular point.		Not mentioned.	
38)	54. Calls on the Commission to take note of the presence of national monopolies and oligopolies as a potential signal of the existence of weaknesses in the single market or barriers to fair competition;	No specific reply is provided to this particular point.		Not mentioned.	
39)	55. Requests that the Commission carry out a preliminary study on the concentration of media ownership in Europe, also in the context of multinational corporations buying out European media providers	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
40)	56. calls on the Commission to update its existing guidelines on the notion of State aid to ensure that the Member States do not grant State aid in the form of a tax advantage; Insists that the Commission have access to the information exchanged between the Member States' tax authorities so as to better detect violations of competition rules;	The 2016 Notice on the notion of State aid gives the Member States and other stakeholders, clear and concrete guidance on how the Commission interprets this concept. However, it is ultimately for the European Court of Justice to interpret this notion. Because the notice is relatively recent, the Commission considers it premature to evaluate it at this stage.	C C	No further specific actions proposed/promised to be taken by the Commission.  No further specific actions proposed/promised to be taken by the Commission.	C C
41)	57. Calls on the Commission to look into the possibility to fine countries found in breach of State aid rules;	No specific reply is provided to this particular point.	C C	Not mentioned.	C C
42)	58. Calls on the Commission to examine swiftly the discrepancies between the rules on State aid in the area of liquidation aid and the resolution regime under the Bank Recovery and Resolution Directive <sup>12</sup> ('BRR Directive'), and to revise its Banking Communication of 30 July 2013 <sup>13</sup> accordingly, including in light of recent cases, taking into account the need to protect taxpayers;	No specific reply is provided to this particular point. 46)	<p>62. Calls on the Commission to guarantee fair competition and greater transparency in offline platforms' commercial practices, including supermarket and hypermarkets, so as to ensure that EU producers receive fair conditions and prices for their products;</p> <p>Calls on the Commission to continue its in-depth analysis on the extent and effect of buying alliances, related to both pricing and non-pricing strategies, on the economic functioning of the agricultural and food supply chain, taking particular account of the effects on small-scale suppliers and farmers; regrets the fact that selling at a loss is not on the list of practices that are prohibited at EU level;</p>	No specific reply is provided to this particular point.		Not mentioned.	
47)	<p>63. Calls, therefore, on the Commission to assess the implementation and clarify the provisions of Single Common Organisation of the Markets (CMO) Regulation<sup>15</sup>, in particular with regard to the exceptions to competition rules granted to certain agreements and practices of farmers in association;</p>	As regards the application of the competition rules to agricultural producers and producer organisations, competition law enforcement help farmers obtain better conditions when selling their produce to large buyers or buying cooperatives. In addition, the Commission supports cooperation among farmers in producer organisations that help them become more efficient, innovative and competitive.		No further/ specific actions proposed/promised to be taken by the Commission.	

<sup>15</sup> OJL 347, 20.12.2013, p. 671.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Joint sales and integrating other activities via producer organisations enable farmers to capture more value in the food supply chain. Most producer organisations doing joint selling integrate other activities on behalf of their members such as common quality control, distribution and procurement of inputs.			
48)	64. Calls on the Commission to exempt from State aid rules tax provisions specifically introduced by Member States to encourage farmers to set up voluntary precautionary savings with a view to coping better with the upsurge in climate-driven and health risks, as well as economic crises;	No specific reply is provided to this particular point.		Not mentioned.	
49)	65. Calls on the Commission to assess the implementation and clarify the scope of Article 209 of the Single CMO Regulation, specifically with regard to the exceptions to competition rules granted to certain agreements and practices of farmers in associations, in order to provide those concerned with greater clarity and legal certainty when this article is implemented, and to give the Commission greater flexibility in implementing this article;	No specific reply is provided to this particular point.		Not mentioned.	
50)	69. Calls on the Commission to ensure that the provisions of Article 222 of the Single CMO Regulation are activated swiftly in order to address serious market distortions;	In the Farm to Fork Strategy, the Commission reiterates its commitment to encourage cooperation of farmers and to help them capture a fair share of the value added in the food supply chain. Article 152 and other provisions in the CMO Regulation help farmers improve their position in the food supply chain. The Commission stands ready to help farmers to interpret the provisions of the CMO regulation. Farmers have the possibility to ask the Commission for an opinion for instance on the agreements of farmers' associations or of		The Commission adopted an <a href="#">implementing regulation</a> authorising agreements and decisions on market stabilisation measures in live trees and other plants, bulbs, roots and the like, cut flowers and ornamental foliage sector in April 2020; it also adopted an <a href="#">implementing regulation</a> authorising agreements and decisions on market stabilisation measures in the wine sector in July 2020.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		inter-branch organisations pursuant to Articles 209 and 210 of the CMO Regulation. In the context of the economic turmoil caused by the Covid-19 pandemic, the Commission has shown that it reacts swiftly to address severe market imbalances in different sectors by making full use of Article 222 of the CMO Regulation. The Commission has adopted four implementing regulations allowing collective measures by farmers to deal with oversupply in the sectors of flowers & plants, milk, potatoes (April 2020) and wine (July 2020), including temporary planning of production for some of these sectors.			
51)	71. Asks the Commission to engage in dialogue with all relevant stakeholders on the functioning of the agricultural and food supply chain, and to adapt EU competition policy in line with the most recent developments in the trading environment;	As regards adapting EU competition policy in line with the functioning of the agricultural and food supply chain and recent developments in the trading environment (point 71), the Commission refers to its Communication of 20 May 2020 setting out its "Farm to Fork" strategy. In the Communication, the Commission announced that it envisages clarifying the application of the competition rules to collective initiatives that promote sustainability in food supply chains. The Commission will also help farmers to strengthen their position in the food supply chain and to capture a fair share of the benefits generated by sustainable production, for example by encouraging the possibilities for cooperation as set out in the CMO Regulation. Together with the co-legislators, the Commission will work to improve agricultural rules that strengthen the position of farmers, their cooperatives and producer organisations in the food supply chain.		Because of a general character of the promise, it is unclear whether the Commission addressed this point of the resolution.	
52)	72. Calls on the Commission to monitor the progress of transposition closely and to promote the sharing of best practices between Member States;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
53)	73. Calls on the Commission, when assessing mergers in these sectors, to consider impacts beyond consumer prices;	No specific reply is provided to this particular point.		Not mentioned.	
54)	74. Considers it essential that the Commission continue its detailed monitoring of the EU market for pesticides, seeds and traits, and monitor the impact of digitalisation on the agricultural sector;	No specific reply is provided to this particular point.		Not mentioned.	
55)	75. Urges the Commission to set up a permanent EU-level information platform on risk management tools to help farmers cope with the uncertainty of climate, market volatility and other risks where stakeholders can exchange best practices, as set out in its communication on the future of food and farming from November 2017;	No specific reply is provided to this particular point.		Not mentioned.	
56)	77. Calls on the Commission to present, as soon as possible, its latest report on the cumulative impact of ongoing and future trade deals, and calls for the application of the principles of reciprocity and compliance for agricultural products and for the protection of vulnerable sectors in future and ongoing trade negotiations, ensuring that all necessary inspections are carried out;	As regards the call to report on the impact of FTAs on EU agri-food producers (paragraph 77), the Commission is preparing a study on the cumulative impact of FTAs on EU agriculture, to be published in the second half of 2020. In its trade policy, the EU has successfully reconciled the need to make meaningful concessions to EU trading partners with the need to safeguard the interests of EU farmers. For sensitive agricultural products in particular, the Commission has used Tariff Rate Quotas, allowing imports at preferential tariff rates only up to a limited volume, and has introduced safeguard clauses. While respecting the EU's regulatory sovereignty, as well as that of the EU's trading partners, trade agreements also serve as useful platforms of exchange and cooperation in order to elevate standards. At the same time, EU standards are not negotiable. EU sanitary and phytosanitary standards apply in the same way to all products in the EU internal market, whether they are domestically produced or imported. The EU		The Commission published a <a href="#">report</a> on the implementation of EU trade agreements on 12 November 2020.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		has a tight system of controls including inspections, audits, and border controls by its Member States, as well as market surveillance tools to make sure that products that do not comply with EU requirements do not enter the EU market.			
57)	81. Calls on the Commission to continue to pay particular attention to the provision of services of general economic interest (SGEI) when applying State aid rules, especially in the context of isolated, remote or peripheral regions and islands in the Union;	When applying the State aid rules, the Commission pays particular attention to services of general economic interest (SGEIs) If the State aid concerns isolated, remote or peripheral regions and islands, the Commission takes into account the particular economic conditions in such areas.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">SGEI</a> ).	
58)	87. Calls on the Commission to report regularly to Parliament on the implementation and monitoring of cooperation agreements with reference to competition, on the screening of foreign direct investments; Calls on the Commission to maintain high transparency standards;	No specific reply is provided to this particular point.		Not mentioned.	
59)	88. Calls on the Commission to particularly involve Parliament when devising soft-law instruments such as notices and guidelines;	No specific reply is provided to this particular point.		Not mentioned.	
60)	89. Calls on the Commission to organise multisectoral and interinstitutional forums involving industry, national regulators including data protection authorities, consumer groups and other relevant stakeholders to decompartmentalise competition policy; Calls, therefore, on the Commission to simplify the complaint form in order to give ordinary citizens the possibility to send in complaints;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
61)	91.Calls on the Commission to give the complainant a confirmation of receipt and a notification upon the launch of the investigation, including an expectation of the length of the investigation;	<p>The European Parliament considers that the Commission provides inadequate information to complainants during its investigations of possible breaches of competition law (paragraph 91). Complaints are an invaluable source of information for the Commission which takes several measures to ensure that complainants have appropriate access to information during the course of its investigation. When a formal complaint under Regulation 1/2003 is submitted to the Commission, the complainant receives a confirmation of receipt. The Commission has a duty to examine formal complaints, and strives to inform the complainant within four months on the action that it intends to take. This time-frame, however, is indicative and may vary depending on the circumstances of the individual case. Due to the complexity of antitrust investigations, for priority reasons and due to circumstances beyond its control, it is difficult for the Commission to foresee the total length of a case and to inform the complainant about the projected duration. If it follows up on the complaint - for example by initiating proceedings – the Commission must involve the complainant in the procedure. The complainant may receive non-confidential versions of replies to requests for information, the Statement of Objections, replies to Statement of Objections and a recording of the Oral Hearing (if the complainant participated). If the Commission decides not to pursue the complaint, it will inform the complainant of its intention to reject the complaint and allow the complainant to provide additional comments, before issuing any final decision. The Commission also regularly receives valuable market information that does not constitute a formal complaint. Such market information can also help the Commission to detect competition issues and may serve as a starting point for opening an own-initiative investigation. When the Commission receives market information, it will reply by letter within 15 working days.</p>		No further specific actions proposed/promised to be taken by the Commission.

62)	92. Calls on the Commission to present to Parliament an assessment of the implementation of the ECN+ Directive;	No specific reply is provided to this particular point.		Not mentioned.	
63)	96. Calls on the Commission to evaluate in due time whether this Temporary Framework should be extended beyond the end of 2020 if necessary;	The Commission welcomes the European Parliament's recognition of the prompt adoption of the Temporary Framework for State aid and the European Parliament's support for applying it as long as the covid-19 crisis requires. The Commission continuously assesses the pandemic, its economic consequences and how these influence the continued need for the Temporary Framework.		The temporary framework has been extended several times (see <a href="#">Temporary Framework</a> ).	
64)	100. Calls on the Commission to set common minimum standards in order to specify the requirement for companies receiving financial assistance to be in line with ESG criteria and taxation transparency, so as to avoid different national criteria giving rise to further discrepancies and to demonstrate how the public support received is used to align their operation with the EU's climate and environmental objectives and the Paris Agreement; recalls that aid should only be granted to cover the losses incurred due to COVID-19;	No specific reply is provided to this particular point.		Not mentioned.	
65)	102. Calls on the Commission to adopt a more dynamic approach when revising the 1997 Communication on market definition, making the innovation criteria as a core element of the relevant market analysis when it comes to European merger control;	No specific reply is provided to this particular point.		Not mentioned.	
				Because of a general character of the promise, it is unclear whether the Commission 'contributed to	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Calls on the Commission to assess, as part of its fitness review, the possibility of adopting a more favourable approach towards cooperation and research and development agreements;	In general, the Commission aims to ensure that competition rules and their implementation guarantee fair competition for European companies in third country markets, and vice versa (paragraph 19) as well as to contribute to reinforcing the economic resilience of key European sectors (point 102).		reinforcing the economic resilience of key European sectors'.	
66)	104. Calls on the Commission, therefore, to propose immediately a temporary ban on foreign takeovers of European companies by SOEs or GLCs from third countries	<p>The Commission closely follows FDI developments, and has urged Member States to be particularly vigilant to ensure that the current covid-19 pandemic does not result in a sell-off of Europe's business and industrial actors. In particular, the Commission called upon all Member States to envisage setting-up a fully-fledged FDI screening mechanism and in the meantime to consider available options to address risks to security and public order. The Commission also called upon Member States to make full use of already existing screening mechanisms.</p> <p>[...]</p> <p>FDI remains an essential component of the EU's economic growth, competitiveness, employment and innovation. The EU's openness to FDI will remain crucial in the recovery phase after the covid-19 pandemic. The EU economy has to emerge from this crisis better prepared for the future, including in terms of resilience and diversification. One should not assume that every acquisition by foreign SOEs or GLCs equates unfair competition or hostile behaviour. It has also to be kept in mind that a very large number of EU companies, big and small, depend on investing in other countries to remain competitive globally.</p> <p>[...]</p> <p>Moreover, the European Parliament requests stepping up the EU's efforts to counter unfair competition and hostile behaviour from foreign state-owned enterprises or government-linked companies towards vulnerable European companies (paragraph 104). In this respect, the Commission</p>		The Commission adopted a <a href="#">legislative proposal</a> to address distortions caused by foreign subsidies in the Single Market on 5 May 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>refers to its White Paper on foreign subsidies in the single market published on 17 June 2020. The White paper launched the public discussion on how to address effects caused by foreign subsidies so that they do not undermine the functioning of the single market. The EU State aid rules make sure that subsidies from Member States do not distort competition in the internal market. However, it has become increasingly clear that only controlling subsidies granted in the EU is insufficient to ensure that competition is not distorted. Foreign subsidies can undermine competition in the EU in various ways, by subsidising the operation of undertakings active in the EU, by facilitating acquisitions of EU undertakings and by subsidising bids in public tenders in the EU. The current instruments at the Commission’s disposal – such as State aid rules, the merger Regulation and trade defence instruments – are insufficient to deal with this problem. In the White paper, the Commission puts forward for discussion with stakeholders several options to fill this regulatory gap. The public consultation on the White Paper is open until 23 September 2020. If the public consultation shows that new rules are needed, the Commission will table a legislative proposal in 2021.</p>			
67)	<p>105. Calls on the Commission to ban platforms from displaying micro-targeted advertisements and to increase transparency for users; Calls on the Commission to ensure that data collection will not further entrench the market power of a few dominant players;</p>	<p>No specific reply is provided to this particular point.</p>		<p>Not mentioned.</p>	
68)	<p>106. Calls on the Commission to assess whether the failing firm defence concept currently applied is fit for purpose for the current crisis; strongly believes that competition policy and</p>	<p>No specific reply is provided to this particular point.</p>		<p>Not mentioned.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	industrial policy can together help to build European sovereignty in a sustainable way;				
69)	108. Urges the Commission to better inform Parliament about its ongoing work, in particular the revision of the definition of the relevant market and the revision of the State aid guidelines;  Calls on the Commission to provide Parliament with a detailed evaluation presenting the repartition of the global amount of State aid authorised within the Temporary State aid Framework by Member State, sector and type of aid authorised (grants, guarantees, etc.) as well as any additional conditions applied by the Member States;	The Commission notes that it does not yet have comprehensive information on actual aid amounts disbursed in different Member States, which will become available later since the Temporary Framework includes a number of transparency requirements. Member States must publish relevant information about recapitalisation measures within three months and for most other types of aid such information must be published within 12 months (paragraph 108). Moreover, Member States must submit to the Commission annual reports setting out their Temporary Framework expenditure. These requirements will enable the Commission to monitor State aid granted and disbursed under the Temporary Framework.		Because of a general character of the promise, it is unclear whether the Commission was 'enabled to monitor State aid granted and disbursed under the Temporary Framework'.  Because of a general character of the promise, it is unclear whether the Commission was 'enabled to monitor State aid granted and disbursed under the Temporary Framework'.	
70)	109. Calls on the Commission to present to Parliament and the Council, after the crisis, a communication on the effects of the COVID-19 pandemic on market competition and competition law enforcement, the integrity of the single market and the future of competition policy;	The Commission takes note of the call by the European Parliament to present, after the crisis, a communication on the effects of the covid-19 pandemic on market competition and competition law enforcement, the integrity of the single market and the future of competition policy.		No further specific actions proposed/promised to be taken by the Commission.	
71)	110. Calls on the Commission to make it compulsory for banks receiving State aid to retain their full retail banking/consumer banking services and to ensure that banks are not allowed to use the COVID-19 crisis as a pretext for permanently reducing such services	No specific reply is provided to this particular point.		Not mentioned.	

4.1.12.3. ECON Resolution 3: EP resolution of 18 June 2020 on Banking Union - annual report 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Banking Union - annual report 2019</b>	18/06/2020 <a href="#">T9-2020/0165</a> <a href="#">2019/2130(INI)</a> ECON	<a href="#">SP(2020)427</a>	Final reply (SP) received on 14 December 2020	Mixed reply			
1)	19. Calls on the governments of the Member States, the European Council, the Eurogroup and the Commission to actively work towards gender balance in their upcoming proposals for shortlists and appointments, endeavouring to include at least one female and one male candidate per nomination procedure;	As regards the gender balance in EU institutions and bodies, currently, 41% of the Commission management are women. In its Gender Equality strategy 2020-2025, adopted on 05 March 2020, the Commission confirms its President’s commitment to reach gender equality at all management levels by 2024. The Commission also considers that other EU institutions and bodies should not be exempt from ensuring gender balance in leadership positions. With respect to the agencies and bodies in the area of economic, financial and monetary affairs where the Commission is responsible for establishing a shortlist of candidates to be put forward to the relevant appointing authorities, in addition to encouraging applications from women in its advertisements in the international press, the Commission stands ready to:  review the eligibility criteria with the objective of attracting a higher number of female applications  and  strive, whenever possible, to include at least one female and one male candidate in the shortlist				Although the Commission published in March 2020 a <a href="#">gender equality strategy 2020-2025</a> , the strategy does not mention concrete measures to achieve gender balance in leadership positions.	
2)	24. Calls on the Commission, in the upcoming revision of the Consumer Credit Directive, to lay down more ambitious provisions on the protection of borrowers against abusive practices, ensuring that those rights apply equally to existing and future loans;	The Commission is currently reviewing the Consumer Credit Directive, with the aim to reinforce the protection of borrowers, and has just launched a project aimed at facilitating the delivery of debt-advice services for all European citizens.				The Commission published a <a href="#">report on the implementation of the directive</a> on 5 November 2020. On 30 June 2021, the Commission adopted its <a href="#">proposal</a> for a revision of the consumer credit directive.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	26. Urges the Commission to further assess the issue of miss-selling of financial products by banking institutions;	As regards protection of retail investors, the Commission agrees with the need to ensure prudent application by relevant authorities of the new rules included in the Banking Package that restrict the selling of Minimum Requirement for Own Funds and Eligible Liabilities eligible instruments to such investors.		No further/ specific actions proposed/promised to be taken by the Commission.	
4)	28. [...] Calls on the Commission to act on the recommendations therein when drafting the new legislative proposals;	The Commission welcomes the Parliament's commitment to timely and consistently implement the Basel III agreement in the EU, taking into account European specificities and the need to preserve the diversity of the EU banking sector. The Commission services have taken several steps over the last two years to prepare for the EU implementation of the final Basel III reforms with a view to putting forward legislative proposals. The Commission is currently reviewing its impact assessment taking into account the impact of the COVID 19 crisis. In this context, particular consideration is also given to the objective stated by the Parliament for the reforms not to result in a significant increase in the overall capital requirements for the EU banking sector.		The Commission adopted its <a href="#">legislative proposal</a> as regards adjustments to the securitisation framework to support the economic recovery in response to the COVID-19 pandemic on 24 July 2020.	
5)	36. Urges the Commission to respond to the joint advice of the ESAs on the need for legislative improvements relating to ICT risk management requirements in the EU financial sector;	The Commission agrees that financial technologies pose opportunities and challenges for banking in the EU. The Commission has adopted on 23 September 2020 a Digital finance strategy in the third quarter of 2020 to ensure that the EU realises the opportunities stemming from the digital transformation while addressing risks in a proportionate manner. It is accompanied by a legislative initiative on digital operational resilience and a legislative initiative on crypto assets, in response to calls for follow up to the ESAs advice.		No further/ specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">digital finance package</a> , <a href="#">financial services – improving resilience against cyberattacks</a> , <a href="#">financial services – EU regulatory framework for crypto-assets</a> ).	
6)	44. [...] Calls on the Commission to evaluate in 2020 the current state of the credit rating agencies market, to assess it in terms of competition, information asymmetries and transparency to the markets;	One of the objectives of the EU legislation relative to credit ratings is to increase competition in that market. The Commission services are monitoring developments in the market in close cooperation with the European Securities and Markets Authority (ESMA), which publishes every year a		Because of a general character of the promise, it is unclear how the Commission is 'monitoring developments in the market in close cooperation with the European Securities and Markets Authority (ESMA)' beyond market shares.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		calculation of the market share of the credit rating agencies registered in the EU.			
7)	<p>46. Urges the Commission to review whether the legislation is adequate to ensure that all banks could, if needed, be resolved without the need for taxpayers' money;</p> <p>[...] Calls on the Commission to take into account the Financial Stability Board review of the 'too big to fail' legislation and address potential shortcomings, in particular with regard to the safeguarding of retail deposits;</p>	<p>No specific reply is provided to this particular point.</p> <p>As regards the Minimum Requirement for Own Funds and Eligible Liabilities, the Commission notes the strong emphasis placed on the need to protect retail investors and retail depositors in the context of bail-in and selling of Minimum Requirement for Own Funds and Eligible Liabilities eligible instruments:</p> <p>As regards the need to address potential shortcomings in safeguarding retail deposits, it shall be noted that they already have been granted a sizeable degree of protection in the EU resolution framework by virtue of their super-preferred ranking in the hierarchy of claims under insolvency law. Any additional enhancements could be considered in the follow-up to the Commission report on implementation of Bank Recovery and Resolution Directive (BRRD) and Single Resolution Mechanism Regulation (SRMR) of April 2019.</p>	<p style="background-color: red; color: white; text-align: center;">C C</p>	<p>Not mentioned.</p> <p>No further/ specific actions proposed/promised to be taken by the Commission.</p>	
8)	<p>48. Invites the Commission to reflect on the potential for further harmonisation of specific aspects of existing national insolvency laws and to assess the extent to which such further harmonisation is necessary to ensure a consistent and effective application of the crisis management framework; calls on the Commission, in the framework of the revision of the Deposit Guarantee Scheme Directive (DGSD) to bring more clarity to the least-cost principle under the DGSD;</p>	<p>In parallel, the Commission is consulting European Parliament and Member States' representatives through its own technical expert group on aspects of the Deposit Guarantee Scheme Directive (DGSD) and Bank Recovery and Resolution Directive (BRRD) to help design a complete and consistent framework, taking into account national characteristics and the diversity of national frameworks.</p>		<p>The Commission published a roadmap/inception impact assessment for a <a href="#">legislative proposal</a> amending the BRRD on 10 November 2020.</p> <p>The Commission published a roadmap/inception impact assessment for a <a href="#">legislative proposal</a> amending the DGSD on 12 November 2020.</p> <p>The Commission adoption for a review of the bank crisis management and deposit insurance framework is still pending.</p>

9)	51. [...] is concerned by the lack of a mechanism in the Banking Union to ensure that liquidity can be provided to a bank in the event of a resolution in order to ensure the smooth continuity of services and the stability of financial markets, calls on the Commission to attempt to address this gap without further delay;	On liquidity in resolution, the Commission agrees with the need to find solutions to cover the identified gap in the framework and is ready to continue discussions with the other EU institutions and bodies and with Member States to that end.		No further/ specific actions proposed/promised to be taken by the Commission.	
10)	55. Calls on the Commission to analyse the framework of functioning institutional protection schemes in the context of EDIS;	<p>The Commission welcomes the 2019 Banking Union Annual resolution and the Parliament's acknowledgment on the major steps taken in several critical areas as well as its call for the completion of the Banking Union, which remains a key priority also under this Commission, including European Deposit Insurance Scheme.</p> <p>[...]</p> <p>Finally, the completion of the Banking Union including a European Deposit Insurance Scheme (EDIS) remains one of the key priorities also for this Commission. In light of the outcome of discussions between Member States in December 2019, the Commission continues to believe that it is essential that an agreement is found on how to move forward with the Banking Union. The Political Guidelines of President von der Leyen for the 2019-2024 European Commission recall the need for a European Deposit Insurance Scheme. The Commission is actively contributing to continued technical discussions in the Council's Ad Hoc Working Party, exploring potential design scenarios for a common depositor protection mechanism, which may help to inform political discussions and identify desirable features of a financial safety net that includes a strong depositor protection component.</p>		In 2015, the Commission adopted a <a href="#">legislative proposal</a> establishing an EDIS. Final adoption by co-legislators is still pending, as mentioned in <a href="#">Annex III</a> to the Commission Work Programme 2022.	

4.1.12.4. ECON Resolution 4: EP resolution of 8 October 2020 on further development of the Capital Markets Union (CMU): improving access to capital market finance, in particular by SMEs, and further enabling retail investor participation

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Further development of the Capital Markets Union (CMU): improving access to capital market finance, in particular by SMEs, and further enabling retail investor participation</b>	8/10/2020 <a href="#">T9-0266/2020</a> <a href="#">2020/2036(INI)</a> ECON	<a href="#">SP(2020)686</a>	Final reply (SP) received 3 March 2021	Mixed reply			
1)	1. Asks the Commission to make a stronger commitment to achieving real progress on issues such as supervision, taxation and insolvency laws, which still represent major obstacles to the true integration of EU capital markets;	<p>The Commission fully shares the European Parliament’s view that issues such as supervision, taxation and insolvency laws represent major long-standing obstacles to the true integration of EU capital markets. Since the launch of the CMU initiative in 2015, the Commission has been dealing with these issues as a matter of priority.</p> <p>On supervision, the Commission tabled in 2017 a legislative proposal amending the rules on the powers, governance and funding of the three European Supervisory Authorities (ESAs). The revised rules were adopted by the co-legislators in December 2019. On withholding tax, the Commission put forward in December 2017 a Code of Conduct with best practices to help the Member States simplify withholding tax procedures and make them more efficient for cross-border investors in the EU. On insolvency, in June 2019 the EU adopted the Restructuring and Second Chance Directive<sup>16</sup> to facilitate the</p>				<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>On supervision, the Commission tabled in 2017 a legislative proposal amending the rules on the powers, governance and funding of the three European supervisory authorities (ESAs). The revised rules were adopted by the co-legislators in December 2019).</p>	

<sup>16</sup> Directive (EU) 2019/1023 of the European Parliament and of the Council of 20 June 2019 on preventive restructuring frameworks, on discharge of debt and disqualifications, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt, and amending Directive (EU) 2017/1132.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		efficient restructuring of viable companies in financial difficulties and to give honest entrepreneurs a second chance, which also laid down some elements to enhance the efficiency of insolvency procedures. As detailed below, in its new CMU action plan the Commission committed to taking additional measures in these areas.			
2)	4.Calls on the Commission to draft a legislative proposal on 'European Secured Notes' (ESNs), as a new dual-recourse funding instrument for banks which could help improve access to financing for SMEs across the EU;	As part of its mandate set out in the Directive on Covered Bonds, the Commission will submit a report to the European Parliament and Council on the possibility of introducing a dual-recourse instrument - European Secured Note - together with a legislative proposal, if appropriate, by July 2024. In its assessment, the Commission will consider the objective of supporting SMEs in the transition to a more competitive and sustainable economy and channelling funding to the real economy.		Already in 2018, the Commission published a <a href="#">study on the feasibility of European secured notes</a> .  European secured notes are also mentioned in the Commission communication on <a href="#">a capital markets union for people and businesses-new action plan</a> . The last date for submitting the proposal is 8 July 2024.	
3)	5. Calls on the Commission to strengthen the mandatory feedback given by banks when declining SME credit applications, as a more comprehensive feedback could give the opportunity to SMEs with declined requests to adapt their business approach and to learn;	In line with the European Parliament's resolution, the Commission will assess the merits and feasibility of introducing a requirement for banks to direct SMEs, whose credit applications have been turned down, to providers of alternative funding. The Commission is grateful for the European Parliament's support to the creation of the SME IPO (Initial Public Offering) fund, which would primarily aim to support SMEs, going for a public listing (IPO), but would also help SMEs in pre-IPO or post-IPO stages.  The Commission expects the Regulation on European Crowdfunding Service Providers <sup>17</sup> , which entered into force on 10 November 2020, to enable the development of this industry		A report to the European Parliament and Council on the application of the regulation on European	

<sup>17</sup> Regulation (EU) 2020/1503 of the European Parliament and of the Council of 7 October 2020 on European crowdfunding service providers for business, and amending Regulation (EU) 2017/1129 and Directive (EU) 2019/1937

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>by establishing a pan-European framework for the provision of these services, thus unlocking this alternative financing channel for European companies, especially start-ups and SMEs. Before 10 November 2023, the Commission will present a report to the European Parliament and Council on the application of this regulation, accompanied where appropriate by a legislative proposal. The report will also assess the impact of this regulation on the proper functioning of the Union's internal market for crowdfunding services, including the impact on access to finance by SMEs.</p> <p>The report will also assess the impact of this regulation on the proper functioning of the Union's internal market for crowdfunding services, including the impact on access to finance by SMEs.</p> <p>In addition, the Commission is working on a number of projects that would provide more information to SMEs on alternative financing instruments through assessing the feasibility of a bank referral scheme as well as the creation of the SME IPO Fund.</p>		<p>crowdfunding service providers will be presented in 2023.</p>	
4)	<p>11. [...] calls on the Commission to submit a legislative proposal for a European Single Access Point for financial and non-financial information in respect of listed and unlisted EU companies, while also respecting the proportionality principle where appropriate; calls on the Commission to streamline the transparency requirements under the Non-Financial Reporting Directive (NFRD) with those under the Taxonomy Regulation and the Sustainable Finance Disclosure Regulation;</p>		<p>The Commission welcomes the European Parliament's support to create a European Single Access Point (ESAP) and would consider adopting a legislative proposal to put it in place in the third quarter of 2021. The aim of ESAP would be to provide seamless, EU-wide access to all relevant information (including financial and sustainability-related information) disclosed to the public by listed companies. Moreover, the Commission intends to adopt a proposal to revise the Non-Financial Reporting Directive (NFRD)<sup>18</sup> in the first quarter of 2021. An aim of the revision would be to align the disclosure requirements of the NFRD as much as possible with other relevant EU legislation,</p>		<p>On 25 November 2021, the Commission adopted a <a href="#">proposal for a regulation</a> establishing a European single access point.</p> <p>On 21 April 2021, the Commission adopted a <a href="#">proposal for a corporate sustainability reporting directive (CSRD)</a>, which would amend the existing reporting requirements of the NFRD.</p>	

<sup>18</sup> Directive 2014/95/EU of the European Parliament and of the Council of 22 October 2014 amending Directive 2013/34/EU as regards disclosure of non-financial and diversity information by certain large undertakings and groups.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		including the Taxonomy Regulation <sup>19</sup> and the Sustainable Finance Disclosure Regulation <sup>20</sup> . This is likely to require the development of mandatory EU non-financial reporting standards. The sustainability-related information reported under the revised NFRD may also feed into ESAP.			
	15. [...] asks the European Supervisory Authorities (ESAs) and the Commission to finalise all Regulatory Technical Standards [...]	Furthermore, the European Supervisory Authorities are currently jointly - and in consultation with relevant stakeholders, including representatives of civil society - developing financial product-level and entity-level disclosure rules in regulatory technical standards under the Sustainable Finance Disclosure Regulation. These disclosure rules should bring greater accountability, discipline and comparability to financial markets by improving disclosures of sustainability-related information, for the benefit of end-investors, supervisors and broader civil society. The European Supervisory Authorities will also develop financial product-level disclosure rules in regulatory technical standards under the Taxonomy Regulation.		The ESAs have submitted a <a href="#">draft RTS</a> to the Commission in February 2021, which should apply as of 1 July 2022.  The ESAs have also submitted <a href="#">a report with draft RTS</a> regarding disclosures under the taxonomy regulation.	

<sup>19</sup> Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088.

<sup>20</sup> Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>16. Takes note of the proposals on securitisation presented on 24 July 2020 within the Capital Markets Recovery Package; requests the Commission to assess how targeted amendments to the Securitisation Regulation could free up financing capacity, so as to avoid a reduction of European bank lending while addressing financial stability concerns, given that the nature of some synthetic securitisation may create specific prudential and systemic risks;</p>	<p>The Commission agrees with the European Parliament on the need for appropriate differentiation between groups of clients. As part of the Capital Markets Recovery Package adopted on 24 July 2020, the Commission proposed a clear differentiation between retail and professional investors. In order to tailor the treatment of clients according to knowledge and experience, the Commission has also proposed the introduction of exemptions, such as cost and charges disclosures or loss reporting requirements that would apply to professional investors only. Other proposals to increase the ability for retail clients to opt into the professional client status, such as modifying the annual transaction thresholds or the introduction of a “semi-professional” client category, did not find a majority in the consultations leading up to the proposal or in the negotiations on the proposal itself.</p> <p>[...]</p> <p>In line with the recommendation of the Parliament, the Commission is looking to revitalise securitisation markets in the EU by undertaking a comprehensive review of the EU securitisation framework for both Simple, Transparent and Standardised Securitisation (STS) and non-STS securitisation. The Commission took note of the European Parliament’s suggestion to assess how targeted amendments to the securitisation framework could free up the financing capacity of banks.</p>		<p>No further/ specific actions proposed/promised to be taken by the Commission.</p> <p>In 2021, the Commission carried out a <a href="#">targeted consultation</a> on the functioning of the EU securitisation framework.</p>	
6)	<p>17. Calls on the Commission to assess the impact on financial stability of potential targeted measures, aligning and simplifying securities market legislation, to facilitate expeditious recovery after the COVID-19 crisis, to facilitate investment in the real economy, in particular in SMEs, and to allow newcomers</p>	<p>The upcoming review of the MiFIR (Markets in Financial Instruments Regulation) rulebook will also aim at reconciling the interest of transparent trading on public markets with the aim to allow EU issuers to raise capital in the markets of their choice.</p> <p>[...]</p>		<p>On 25 November 2021, the Commission adopted proposals for the review of the markets in financial instruments <a href="#">regulation</a> as well as of the <a href="#">directive</a> (MiFIR/MiFID).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>and new products to enter the markets, preserving consumer protection and market integrity while encouraging cross-border equity investment and trade; furthermore, calls on the Commission to assess whether it is necessary to review the Markets in Financial Instruments Regulation (MiFIR), including the Share Trading Obligation (STO) and Derivative Trading Obligation (DTO), in order to eliminate potential frictions that can impact the ability of EU companies to raise capital at this time, especially in view of the end of the transition period between the EU and the UK;</p>	<p>As announced in the new CMU action plan, the Commission would plan to put forward a legislative proposal amending the Markets in Financial Instruments Regulation (MiFIR)<sup>21</sup>/ the revised Markets in Financial Instruments Directives (MiFID II)<sup>22</sup> by the fourth quarter of 2021 to reduce the administrative burden and information requirements for a subset or retail investors. This will involve reviewing the existing investor categorisation of retail versus professional investors.</p> <p>The Commission took note of the European Parliament's concerns regarding the reporting framework under EMIR<sup>23</sup> and MiFIR. The reporting obligations under EMIR and under MiFIR serve different objectives. While MiFIR reported data should help national competent authorities detect and investigate potential cases of market abuse, to monitor the fair and orderly functioning of markets, as well as the activities of investment firms, the EMIR reporting requirement should allow for a comprehensive overview of the market and for assessing systemic risk, both of cleared and non-cleared derivative contracts. The Commission is aware of the relevance of streamlining the obligations across different pieces of legislation as much as possible. EMIR REFIT mandated the European Commission to prepare a report assessing whether the obligations to report transactions under MiFIR and under EMIR create a duplicative transaction reporting obligation for non-OTC (over-the-counter) derivatives and whether reporting of non-OTC transactions could be reduced or simplified for all counterparties without undue loss of information. This report may be accompanied with any appropriate proposal. Any</p>		<p>On 23 March 2021, ESMA published a <a href="#">MiFIR review report</a> on the obligations to report transactions and reference data.</p> <p>On 31 March 2021, ESMA published a <a href="#">Q&amp;A document</a> regarding Regulation 648/2012 (EMIR).</p>	

<sup>21</sup> Regulation (EU) No 600/2014 of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Regulation (EU) No 648/2012.

<sup>22</sup> Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU.

<sup>23</sup> Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		modification to the reporting requirements, however, should ensure that there is not any undue loss of information both in terms of scope and by different actors, and that the objectives are achieved efficiently.			
7)	18. Calls on the Commission and the Member States to actively inform SMEs of the alternative financing instruments available to them;	<p>[...]</p> <p>The Commission will consider the objective of supporting SMEs in the transition to a more competitive and sustainable economy and channelling funding to the real economy.</p> <p>In line with the European Parliament's resolution, the Commission will assess the merits and feasibility of introducing a requirement for banks to direct SMEs, whose credit applications have been turned down, to providers of alternative funding. The Commission is grateful for the European Parliament's support to the creation of the SME IPO (Initial Public Offering) fund, which would primarily aim to support SMEs, going for a public listing (IPO), but would also help SMEs in pre-IPO or post-IPO stages.</p>		Because of a general character of the promise, it is unclear whether the Commission took action on this point.	
8)	19. Calls on the Commission to explore initiatives to incentivise employee share ownership, in order to promote the direct involvement of retail savers in the financing of the economy, and also as a tool to improve corporate governance and help develop an equity culture;	The Commission sees that Employee Share Ownership schemes can have a number of benefits for employees and companies, but also for society in general. This is also the reason why the promotion of the development of Employee Share Ownership has been the EU policy for nearly thirty years, starting with the publication of the PEPPER report in 1991 on Promotion of Employee Participation in Profits and Enterprise Results. As part of the CMU action plan in 2015 and its mid-term review in 2017, the Commission carried out actions considered useful and realistic in this area, notably targeted exchanges in the Member States Expert Group of the European Securities Committee and a mapping of the existing EU Employee Share Ownership schemes. Continuing this exchange between Member States, coordinated at European level, could be useful to promote such schemes and allow Member States with less experience to benefit from the experience of other Member States, notably		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (CMU action plan in 2015 and its mid-term review in 2017).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		where Employee Share Ownership has traditionally played a greater role. Nevertheless, the success of Employee Share Ownership hinges to a large extent on the tax treatment afforded to such schemes. This is why the High Level Forum on the CMU recommended that Member States should promote Employee Share Ownership and Employee Financial Participation in general by providing adequate tax incentives.			
9)	20. Calls on the Commission to promote the direct involvement of retail savers in financing the economy, considering the possibility of return on investment for retail investors;	<p>The Commission will continue to promote best execution and the interest of investors.</p> <p>[...]</p> <p>The Commission concurs that it is important to ensure investor confidence in capital markets, ensure that the sound investor protection measures are in place and that market participants are financially literate. In this regard, the Commission will seek to conduct a feasibility assessment for the development of a dedicated EU financial competence framework by the second quarter of 2021 as well as to assess whether it is appropriate to extend the principle enshrined in Article 6 of the Mortgage Credit Directive, requiring Member States to promote formal and non-formal financial education, to other relevant sectoral legislation.</p>		DG FISMA published a <a href="#">feasibility assessment report</a> in the second quarter of 2021. The report was followed by the launch of a <a href="#">joint Commission/OECD-INFE project</a> to develop a financial competence framework in the EU on the 26 April 2021.	
10)	21. Invites the Commission to review the settlement discipline regime under the Central securities depositories regulation (CSDR), in view of the COVID-19 crisis and Brexit;	The Commission agrees with the European Parliament that an assessment of the settlement discipline regime under CSDR <sup>24</sup> may be necessary in view of Brexit as well as recent experiences in the financial markets as a result of the COVID-19 crisis. The Commission intends to conduct this analysis within the ambit of its forthcoming report to the European Parliament and the Council on the CSDR review. Depending on the outcome of that		The Commission adoption of a <a href="#">revised CSDR</a> is planned for Q1 2022.	

<sup>24</sup> Regulation (EU) No 909/2014 of the European Parliament and of the Council of 23 July 2014 on improving securities settlement in the European Union and on central securities depositories and amending Directives 98/26/EC and 2014/65/EU and Regulation (EU) No 236/2012

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>analysis, the Commission may make appropriate legislative proposals by the fourth quarter of 2021.</p> <p>[...]</p> <p>Regarding the supervision of CSDs by ESMA, the Commission takes note of the European Parliament's view. In addition to the specific provision in the ESMA Regulation, which requires the Commission to assess the supervisory framework for third-country CSDs by 30 June 2021, a review of CSDR as a whole is currently ongoing. The Commission intends to present a report to the European Parliament and the Council in the coming months on the application of CSDR, including on matters related to the authorisation and supervision of EU CSDs. Depending on the outcome of that analysis, the Commission might make appropriate proposals by the fourth quarter of 2021.</p>		<p>On 5 November 2020, <a href="#">ESMA published its first reports on CSDR implementation</a>.</p>	
11)	24. [...] calls on the Commission to propose legislative initiatives and/or issue recommendations to Member States, as appropriate;		<p>The Commission shares the European Parliament's view concerning the importance of more efficient and effective insolvency proceedings. Divergent and sometimes inefficient national regimes make it difficult for cross-border investors to anticipate the length and outcome of value recovery proceedings, and is thus a barrier to cross-border investment. Action is needed to make the outcome of insolvency proceedings more predictable. The Commission will analyse with great care which instrument can best serve this objective and will, after careful assessment, proceed to proposing legislation or issue apposite recommendations to the Member States.</p> <p>The Commission agrees with the European Parliament that it should be made easier for shareholders to engage with companies whose shares they own and to fully exercise their voting rights. The Commission will therefore assess the need for, and the possibility of, introducing an EU-wide, harmonised definition of "shareholder". It will also consider if and how the rules governing the interaction between shareholders,</p>		<p>The Commission <a href="#">proposal on cross-border investment within the EU</a> is still pending.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>intermediaries and issuers as regards the exercise of voting rights and corporate action processing can be further clarified and harmonised.</p> <p>The Commission agrees with the European Parliament on the need to ensure a consistent and adequate protection of intra-EU investments. The debate triggered by the termination of the intra-EU Bilateral Investment Treaties showed that reinforcing investors' trust in the protection that EU law offers to them will be essential to encourage them to invest in other Member States. The Commission will therefore propose to strengthen the investment protection and facilitation framework in the EU by the second quarter of 2021.</p>			
12)	26. [...] calls on the Commission and the ESAs to focus on the use of supervisory convergence tools and to enhance their effectiveness;	<p>The Commission will then carefully monitor whether there is sufficient progress on supervisory convergence for the CMU to thrive. This will notably involve assessing the extent to which the enhanced tools and powers granted to the European Supervisory Authorities (ESAs) in the EU rules adopted in 2019 are effective and sufficiently conducive to ensuring supervisory convergence in the EU. This in particular concerns strengthened peer reviews (e.g. more balanced composition of review teams in addition to improved review and reporting process), the ESA's ability to define Union strategic supervisory priorities and the ability to coordinate mystery shopping activities of competent authorities. The Commission would then take stock of what has been achieved in terms of supervisory convergence in the fourth quarter of 2021. Should there be indications that the EU supervisory set-up is inadequate for the desired progress of market integration, the Commission will consider stronger supervisory coordination or direct supervision by the ESAs in future reviews.</p>		Between 12 March and 21 May 2021, the Commission carried out a <a href="#">targeted consultation</a> on supervisory convergence.	
13)	27. [...] recalls the Commission recommendation of 26 June 2017 inviting Member States to ensure that PEPPs are	<p>The Commission agrees with the European Parliament's view that demographic changes within the EU are affecting pension adequacy, and creating a risk of insufficient income for</p>		No review available yet as the <a href="#">PEPP Regulation</a> becomes applicable on 22 March 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	subject to the same tax treatment as national pension products to become an option for savers;	individuals when they retire. As state finances are ever more strained, it will be essential to promote occupation and personal pensions. The goal of PEPP <sup>25</sup> , was precisely to contribute to increased choices for retirement savings and to build an EU market for personal private pensions. The Commission reminds that Member States are encouraged to apply a fair and favourable tax treatment for all pension products to ensure a level playing field. The Commission is currently in the process of adopting implementing measures to further specify details of the PEPP Regulation. In line with the mandate set out in the PEPP Regulation, every two years from the date of application, the Commission will review, with the support of the European Supervisory Authorities, the adequacy of costs and fees, and analyse their impact on the availability of PEPPs.			
14)	30. [...] requests the Commission and EIOPA to assess, on the basis of a targeted impact assessment, the potential benefits and prudential justification of adjusting capital requirements for investments in equity and private debt, in particular of SMEs, possibly also through the internal model approach, to ensure that capital requirements for insurers and pension funds do not discourage long-term investments; encourages the rapid phasing-out of national exemptions and the reduction of 'gold-plating' in the national implementation of Solvency II;	[...] The Commission believes that incentivising institutional investors to make more long-term investments will be instrumental to supporting re-equitisation in the corporate sector. The participation of insurers in long-term investments, in particular equity, can be supported by ensuring that the prudential framework appropriately reflects the long-term nature of the insurance business and mitigates the impact of short-term market turmoil on insurers' solvency. In addition, the role of banks as institutional investors can be further increased by facilitating their investment and enhancing their ability to build on their large customer bases. With this in mind, the Commission will assess whether Solvency II could be amended to further promote long-term investment by insurance companies, without harming financial stability and policy holder protection.		On 22 September 2021, the Commission adopted a <a href="#">'review package'</a> of Solvency II rules.	

<sup>25</sup> Pan-European Personal Pension Product Regulation

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	32. [...] calls on the Commission, in implementing the finalised Basel III standards, to pay due attention to risk weights applicable to banks' investments in equity, especially SMEs' long-term equity;	<p>The Commission believes that incentivising institutional investors to make more long-term investments will be instrumental to supporting re-equitisation in the corporate sector. The participation of insurers in long-term investments, in particular equity, can be supported by ensuring that the prudential framework appropriately reflects the long-term nature of the insurance business and mitigates the impact of short-term market turmoil on insurers' solvency. In addition, the role of banks as institutional investors can be further increased by facilitating their investment and enhancing their ability to build on their large customer bases. With this in mind, the Commission will assess whether Solvency II could be amended to further promote long-term investment by insurance companies, without harming financial stability and policy holder protection.</p> <p>The Commission [...] welcomes the European Parliament's support to pay attention to appropriate prudential treatment of long-term SME equity investment by banks when implementing Basel III.</p>		On 22 September 2021, the Commission adopted a <a href="#">'review package'</a> of Solvency II rules.	
16)	35. Calls on the Commission, with a view to potential efficiency gains, to consider gradually granting ESMA direct supervisory powers, including direct oversight over certain market segments, such as EU Central Counterparties (CCPs) and Central Securities Depositories (CSDs), and the European Single Access Point, as well as greater product intervention powers;	<p>On the specific European Parliament's recommendation on the supervision of an ESAP, the Commission would examine the possibility of granting the direct supervisory powers to the European Securities and Markets Authority (ESMA) in the impact assessment that would accompany a possible future proposal on ESAP, alongside other options aiming for an effective system.</p> <p>[...]</p> <p>The Commission took good note of the European Parliament's call to consider a gradual granting of the direct supervisory powers to (ESMA), including the direct oversight of EU Central Counterparties (CCPs) and Central Securities Depositories (CSDs). Regarding the supervision of EU CCPs, under the European Market Infrastructure Regulation (EMIR), the Commission is required to prepare by 2 January 2023 a report</p>		In 2021, the Commission carried out a <a href="#">targeted consultation</a> on the establishment of a European single access point for financial and non-financial information publicly disclosed by companies.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>assessing notably the effectiveness of ESMA's tasks, and in particular the CCP Supervisory Committee's, in fostering the convergence and coherence of the application of EMIR among the competent authorities supervising EU CCPs and the colleges, and the division of responsibilities between ESMA, the competent authorities and the central banks of issue.</p> <p>Depending on the outcome of that analysis, the Commission may make appropriate legislative proposals.</p>			
17)	<p>36. Is concerned about the recent scandal involving the German FinTech company Wirecard; in this regard, asks the Commission and the EU competent authorities to assess to what extent this scandal can be attributed to deficiencies in the EU regulatory framework in the area of audit and supervision, and whether national and EU supervisors are sufficiently equipped to effectively supervise big cross-border financial institutions with complex business models that involve different third-country jurisdictions and multiple corporate layers; (...) ; reiterates in particular its call on the Commission to look into ways of improving the functioning of the accounting sector, including through joint audits;</p>	<p>The Commission is equally concerned as the European Parliament about the Wirecard case. The Commission outlines again that risks should be regulated and supervised appropriately, and that strong regulation and supervision are key to preserving trust in finance, both for traditional and new players. The Commission will therefore evaluate, in the context of the Payment Services Directive review, any new risks stemming from unregulated activities, and whether some of these activities should be brought under supervision [...]</p> <p>On audit, the Commission will evaluate the impact of the Audit Directive and of the Audit Regulation, including their effects on the market, and has just launched a study to this effect. Joint audits will be one of the items to be included in the review.</p>		<p>On 20 October 2021, the Commission <a href="#">requested advice</a> from the European Banking Authority on a number of specific topics related to the application and impact of Directive (EU) 2015/2366 on payments services (PSD2).</p> <p>The results of a <a href="#">study</a> on the audit directive and the audit regulation are not yet publicly available.</p>	
18)	<p>40. [...] calls on the Commission and the Member States to commit to significant efforts to streamline and harmonise existing and future rules, by phasing out national exemptions as appropriate and by preventing the 'gold-plating' of EU law at national level;</p>	<p>The Commission notes the European Parliament's concern regarding the complexity of and need for proportionality in financial regulation. The Commission is committed to the principles of Better Regulation. Legislative proposals must be evidence-based, widely consulted upon, subject to an impact assessment and reviewed by the independent Regulatory Scrutiny Board. They should also respect the principles of proportionality and subsidiarity and show the clear benefit of a European action. In its legislative work, the Commission pays particular attention to the coherence of rules and, as part of an</p>		<p>No further/ specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		impact assessment, to the overall impact of each proposed legislation. Regular legal reviews or evaluations of existing rules aim to assess not only the effectiveness and efficiency of those rules but also their coherence with the wider legal framework and the potential for simplification and burden reduction.			
19)	41. Reiterates the call made in its resolution of 19 January 2016 on 'Stocktaking and challenges of the EU Financial Services Regulation', for the Commission to conduct, every five years and in cooperation with the ESAs, the Single Supervisory Mechanism (SSM) and the European Systemic Risk Board (ESRB), a comprehensive quantitative and qualitative assessment of the cumulative impact of EU financial services regulation on the financial markets and their participants at EU and Member State level, in order to identify shortcomings and loopholes, assess the performance, effectiveness and efficiency of the regulation of financial services, ensure that it is not impeding fair competition and the development of the economy, and report back to Parliament; regrets that no such assessment has been conducted thus far;	<p>As requested by the European Parliament, the Commission is currently undertaking a comprehensive assessment of the distribution channels for retail products across all sectors (including insurance-based investment products). Depending on the outcome of this study and considering the advice already provided by ESMA, the Commission will assess the applicable rules in the area of inducements to ensure that retail investors receive fair and adequate investment advice.</p> <p>[...]</p> <p>The Commission will use the opportunity provided by the ongoing reviews of the regulatory frameworks for insurers and investment funds to consider options for further developing the macro-prudential toolkit, also taking into account relevant recommendations of the European Systemic Risk Board (ESRB).</p> <p>[...]</p> <p>The Commission concurs that it is important to ensure investor confidence in capital markets, ensure that the sound investor protection measures are in place and that market participants are financially literate. In this regard, the Commission will seek to conduct a feasibility assessment for the development of a dedicated EU financial competence framework by the second quarter of 2021 as well as to assess whether it is appropriate to extend the principle enshrined in Article 6 of the Mortgage Credit Directive, requiring Member States to promote formal</p>		<p>The results of a <a href="#">study</a> on disclosure, inducements and suitability rules for retail investors are not yet publicly available.</p> <p>DG FISMA published a <a href="#">feasibility assessment report</a> in the second quarter of 2021. The report was followed by the launch of the <a href="#">joint Commission/OECD-INFE project</a> to develop a financial competence framework in the EU on the 26 April 2021.</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>and non-formal financial education, to other relevant sectoral legislation.</p> <p>[...]</p> <p>The Commission points out that it has undertaken various comprehensive assessments of the regulatory reforms that followed the last financial crisis. Further evaluations of these reforms are ongoing and planned, with some coordinated at international level by the Financial Stability Board. In 2019, the Commission completed a large-scale fitness check of the supervisory reporting requirements contained in EU financial services legislation, following up on the findings of the 2015 Call for Evidence and subsequent reports. The fitness check considered the overall effectiveness, efficiency and coherence of the rules in place. Significant work has also been undertaken to assess whether the rules in place are fit-for-purpose to address new challenges and facilitate the digital and green transformations.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	
20)	42. Calls on the Commission to present a detailed roadmap to strengthen the robustness of the financial ecosystem, drawing lessons from the benefits and shortcomings of the existing EU rulebook on financial stability and financial supervision, as identified during the COVID-19 crisis;		<p>Commission states that the robust equivalence monitoring process ensures that financial stability, orderly markets and investor protection are preserved at all times. Any decision to suspend or withdraw an equivalence decision may be taken at the discretion of the Commission, taking into account the risks of any such decision. Equivalence decisions can be unilaterally withdrawn at any time, in particular if third-country frameworks diverge and the conditions for equivalence are no longer fulfilled.</p> <p>The Commission is committed to the implementation of G20 financial regulatory reforms in the Financial Stability Board, Basel Committee on Banking Supervision and the other standard-setting bodies. The Commission will continue to work within the Financial Stability Board and the standard-setting</p>		<p>Due to the general wording of the Commission answer to EP's request, it remains unclear to what extent the promise will be kept.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>bodies to evaluate the effects of the G20 financial regulatory reforms. The Commission supports international coordination on the COVID-19 response, and is determined to act consistently with international standards.</p> <p>[...]</p> <p>The Commission agrees that a level playing field should be guaranteed in future relations with the UK. In its Communication of 9 July 2020, the Commission noted the importance, when assessing equivalence, of being particularly mindful of the risks for the EU in terms of financial stability, market transparency, market integrity, investor protection and level-playing field.</p>			
21)	<p>44. Regrets with concern that the consumer and investor protection provisions in several sectorial pieces of EU financial services legislation are poorly aligned, resulting in undue complexity for financial intermediaries and retail clients alike; calls on the Commission to adopt a more horizontal and harmonised approach to consumer and investor protection in EU financial services legislation, adapted to the green and digital transformation, in order to ensure effective and consistent levels of protection across all financial products and providers;</p>	<p>The Commission takes note of the European Parliament's request to align investor protection measures across financial services legislation and to foster the development of web-based comparison tools that would help retail investors in their decision making process. As announced in the new CMU action plan and in line with the results of the Commission's study on Options for development of online tools and services supporting retail investors in investment decisions, the Commission will assess the applicable disclosure framework with a view to amending it to ensure that investors receive clear and comparable product information. Comparable product information is an essential pre-requisite for the development of digital comparison tools. This action should include improvements to the disclosure of sustainability-related information, which would accelerate the uptake of sustainable products by retail investors. The Commission will complete the assessment by the first quarter of 2022.</p>		<p>According to the Commission reply, the assessment of the disclosure framework will be completed by the first quarter of 2022.</p>	
22)	<p>47. [...] calls on the Commission to put in place a new Action Plan for retail that sets out an ambitious strategy to remove obstacles for cross-border retail financial services, along</p>	<p>The Commission shares the European Parliament's view that the single market for retail financial services is underdeveloped and that purchasing retail investment products on a cross-border basis is not common and is subject to obstacles. While for</p>		<p>According to the Commission reply, it will present a retail investment strategy in the first half of 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	with the elimination of unnecessary and excessive fees for such services;	mortgages or insurance products there can be high costs associated with cross-border provision, this is not necessarily the case for all retail investment products. The Commission has thus committed to presenting a retail investment strategy in the first half of 2022, which should focus on the interest of individual investors and seek to ensure that they can take full advantage of capital markets. In particular, it will seek to ensure that an individual investor can benefit from adequate protection, bias-free advice and fair treatment, open markets with a variety of competitive and cost-efficient financial services and products, and transparent, comparable and understandable product information. The Commission will also seek to address weaknesses of the current disclosure framework, notably to seek better alignment of the Insurance Distribution Directive (IDD), the Markets in Financial Instruments Directives (MiFID II) and the Packaged Retail and Insurance-based Investment Products (PRIIPS).			
23)	48. [...] calls on the Commission and the ESAs to coordinate their proposals for their respective level 1 and level 2 changes in a way that guarantees a high degree of predictability for intermediaries and retail clients alike;	<p>As regards the Packaged Retail and Insurance-based Investment Products (PRIIPs), the Commission agrees with the assessment of the CMU High Level Forum that some elements of the PRIIPs framework should be reviewed, in particular to ensure that the PRIIPs Key Information Document functions well as a disclosure document for investment fund products. The Commission has thus closely followed and supported the work of the European Supervisory Authorities to review the Delegated Regulation on the PRIIPs Key Information Document. As part of this effort, the Commission has carried out consumer testing on the optimal presentation of financial performance information.</p> <p>The Commission regrets that ESAs were not yet able to agree on a proposal to review the PRIIPs Key Information Document, despite considerable work that went into the review process. The Commission is currently assessing the options to ensure that the work on the revised PRIIPs Key Information Document continues. The Commission shares the European Parliament's</p>		It is unclear to what extent the Commission kept its promise to assess 'the options to ensure that the work on the revised PRIIPs Key Information Document continues'.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		expectation that any changes to delegated and implementing acts must fully respect the provisions set out in the legislative act. Meanwhile, work is ongoing on the broader review of the PRIIPs Regulation. This review will build on a comprehensive study of the EU rules for financial product disclosure. The Commission will seek to ensure that any interaction between the reviews of the legislative act and its delegated and implementing acts do not result in confusion or a disproportionate burden for stakeholders.			
24)	49. Urges the Commission to clarify the differentiation between professional and retail investors on all levels of MiFID, making it possible to tailor the treatment of clients according to their knowledge and experience on the markets; takes the view that it is important to allow retail investors to be considered professional investors according to clear criteria, upon request; requests the Commission to consider if the introduction of a category of semi-professional investors would better respond to the reality of participation on the financial markets and, on the basis of its findings, assess whether the introduction of such a category would be needed or not; alternatively, requests the Commission to consider more flexibility in the client categorisation, namely through opt-out options for certain obligations and opt-in options for certain clients, or to make the existing criteria for professional investors more efficient;	The Commission agrees with the European Parliament on the need for appropriate differentiation between groups of clients. As part of the Capital Markets Recovery Package adopted on 24 July 2020, the Commission proposed a clear differentiation between retail and professional investors. In order to tailor the treatment of clients according to knowledge and experience, the Commission has also proposed the introduction of exemptions, such as cost and charges disclosures or loss reporting requirements that would apply to professional investors only. Other proposals to increase the ability for retail clients to opt into the professional client status, such as modifying the annual transaction thresholds or the introduction of a “semi-professional” client category, did not find a majority in the consultations leading up to the proposal or in the negotiations on the proposal itself. Nonetheless, as announced in the new CMU action plan, the Commission would plan to put forward a legislative proposal amending the Markets in Financial Instruments Regulation (MiFIR) / the revised Markets in Financial Instruments Directives (MiFID II) by the fourth quarter of 2021 to reduce the administrative burden and information requirements for a subset or retail investors. This will involve reviewing the existing investor categorisation of retail versus professional investors.		On 25 November 2021, the Commission adopted proposals for the review of the markets in financial instruments <a href="#">regulation</a> as well as of the <a href="#">directive</a> (MiFIR/MiFID).	
25)	51. [...] calls on the Commission to explore alternative approaches, with similar effects on	The Commission took note of the European Parliament’s concerns regarding the reporting framework under EMIR and			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	aligning interests across the entire distribution chain [...]	<p>MiFIR. The reporting obligations under EMIR and under MiFIR serve different objectives. While MiFIR reported data should help national competent authorities detect and investigate potential cases of market abuse, to monitor the fair and orderly functioning of markets, as well as the activities of investment firms, the EMIR reporting requirement should allow for a comprehensive overview of the market and for assessing systemic risk, both of cleared and non-cleared derivative contracts. The Commission is aware of the relevance of streamlining the obligations across different pieces of legislation as much as possible. EMIR REFIT mandated the European Commission to prepare a report assessing whether the obligations to report transactions under MiFIR and under EMIR create a duplicative transaction reporting obligation for non-OTC (over-the-counter) derivatives and whether reporting of non-OTC transactions could be reduced or simplified for all counterparties without undue loss of information. This report may be accompanied with any appropriate proposal. Any modification to the reporting requirements, however, should ensure that there is not any undue loss of information both in terms of scope and by different actors, and that the objectives are achieved efficiently.</p> <p>The Commission is committed to considering all possible regulatory tools to avoid conflicts of interests in investment advice. For independent advice, the Commission takes note of the safeguards already in place, such as the obligation to transfer all monetary benefits received from third parties to the client. On the distribution of in-house products, investment firms already today have to inform the client on whether the range of financial instruments is limited to instruments issued or provided by entities with close links. As requested by the European Parliament, the Commission is currently undertaking a comprehensive assessment of the distribution channels for retail products across all sectors (including insurance-based investment products). Depending on the outcome of this study</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and considering the advice already provided by ESMA, the Commission will assess the applicable rules in the area of inducements to ensure that retail investors receive fair and adequate investment advice.		The results of a <a href="#">study</a> on disclosure, inducements and suitability rules for retail investors are not yet publicly available.	
26)	55. [...] urges the Commission to launch and support programmes in Member States to foster financial and digital literacy using a range of instruments, including digital and social media, to engage with citizens and businesses, especially through public agencies created for that effect;	<p>The Commission is committed to making progress on this file. On the European Parliament’s call to launch and support programmes in Member States to foster financial and digital literacy, the Commission put forward two measures in the new CMU action plan to contribute to this objective.</p> <p>The first measure – the development of an EU financial competence framework (if recommended by the feasibility assessment) – will aim to categorise financial competences or skills, and within these categories, specific levels of proficiency. The competence framework would provide a common conceptual basis for a variety of stakeholders (such as national, regional, local public authorities, educational institutions, private bodies) in a variety of applications. Examples of applications include testing and monitoring of financial skills, school curricula reforms in the Member States, design of learning opportunities, design of teacher trainings and recognition and certification of financial skills. If the competence framework is effectively set up, it will be proposed to promote its take-up amongst Member States through working groups facilitated by the Commission. These working groups could constitute a useful platform for the Member States to exchange best practices on financial literacy measures and on the take-up of the competence framework.</p> <p>The second measure, subject to a positive impact assessment, would seek to extend the principle enshrined in Article 6 of the Mortgage Credit Directive to relevant sectoral legislation, such as MiFID II, IDD, PEPP, UCITS and PRIIPs. It would require Member States to promote formal, non-formal and/ or informal</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Capital markets union 2020 action plan: A capital markets union for people and businesses</a> ).	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			learning measures that support consumers' financial education as regards responsible investing. The Commission aims to put forward a legislative omnibus to introduce this requirement in relevant sectorial legislation.			
27)	57. Believes that a more informed and better-educated citizenship on financial issues is beneficial to democratic systems, contributes to the stability of financial systems, and promotes the transparency and duties of information of financial institutions; calls on the Commission to propose a review of the Council recommendation on 'Key Competences on Lifelong Learning', and to introduce financial literacy as a standalone key competence;		<p>The Commission agrees with the European Parliament's analysis that financial education cannot replace access to reliable and impartial professional financial advice, and to effective consumer protection measures. Financial literacy and education should not be an argument to shift onto the consumer the full responsibility for making sound investment decisions. Financial literacy should help individuals reach out for advice and guidance when they need it, and to ask the right questions – but not necessarily to know all the answers.</p> <p>Although the Council recommendation on 'Key Competences on Lifelong Learning' has recently been updated (in May 2018), the Commission notes the European Parliament's call to propose a review of the Council recommendation and to introduce financial literacy as a standalone key competence in a future review of the Council recommendation.</p> <p>The Commission supports the European Parliament's call to financial institutions to take an active role in increasing the financial literacy of individuals, and suggests to them to take up the EU financial competence framework, once and if developed.</p> <p>The Commission joins the European Parliament in its call to Member States and competent regional, local or other public authorities, to consider including or expanding financial literacy in all curricula from school to university. The Commission underlines that the EU financial competence framework, if set up after a positive feasibility assessment, could constitute a useful conceptual basis for national, regional and local public authorities and educational institutions to design such curricula reforms, and will be ready to support these authorities,</p>		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>including by offering a platform for Member States to exchange best practices in the field.</p> <p>As regards the OECD's Programme for International Student Assessment (PISA) study, the Commission encourages Member States' increased and regular participation in the financial literacy assessment of students.</p>			
28)	<p>60. Calls on the Commission to work towards the implementation of the Digital Finance Action Plan for better access to financial services offering wider choice and increasing efficiency of operations;</p>	<p>The Commission considers that digital transformation of the financial sector brings significant opportunities. Digital finance cuts across borders and can contribute to further integrating capital markets in the EU. On 24 September, the Commission adopted a digital finance package consisting of a digital finance strategy and two sets of legislative proposals on crypto assets (including the proposal for a regulation on a pilot regime for distributed ledger technology market infrastructures) and digital operational resilience.</p> <p>As set out in the digital finance strategy, the Commission will take measures to remove fragmentation in the Single Market for digital financial services to the benefit of consumers, retail investors and businesses. These measures will aim to enhance access to financial services, including across borders. Furthermore, the Commission will support the uptake of new technologies, hence bringing efficiencies for the industry.</p> <p>[...]</p> <p>In the context of the digital finance package, the Commission has adopted a proposal, which clarifies the application of existing rules to crypto-assets, introduces a pilot regime for crypto-assets covered by existing financial services legislation and establishes a new legal framework (MICA) for crypto-assets, which are not covered by these rules. These new rules are meant to clarify the requirements to be applied by issuers of crypto-assets in the EU, in particular in the context of SME funding. In addition, and in line with ongoing work at international level,</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Digital finance package</a>).</p> <p><a href="#">Digital operational resilience</a> - Commission adoption in September 2020.</p> <p><a href="#">Markets in crypto-assets</a> - Commission adoption in September 2020.</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Digital finance package</a>).</p> <p><a href="#">Digital operational resilience</a> - Commission adoption in September 2020.</p> <p><a href="#">Markets in crypto-assets</a> - Commission adoption in September 2020).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the Commission will consider updating the prudential rules for crypto-assets held by financial firms.</p> <p>[...]</p> <p>In addition, as set out in the digital finance strategy, the Commission will assess whether the current financial services legislation, both prudential and conduct rules, need to be adapted to this new ecosystem.</p>			
29)	61. Calls on the Commission to use the forthcoming reviews of financial services regulations to foster investor and shareholder engagement through digital tools;	<p>The Commission will seek to ensure that the financial services legislative framework is fit for the digital age. The Commission will seek to ensure through regular legislative reviews and interpretative guidance that the current framework neither prescribes nor prevents the use of digital technologies. At the same time, the Commission will assess whether the existing rules are sufficient to mitigate the risks stemming from the use of these services and adapt these rules if need be.</p>		Because of a general character of the promise, it is unclear whether the Commission kept its promise.	
30)	62. Emphasises the need for European markets to be able to compete globally; calls on the Commission to create a favourable environment for innovative and competitive EU financial products, with a global reach to attract foreign capital and investment and to promote the EU's competitiveness in global markets, whilst maintaining high levels of prudential regulation and financial stability;	<p>The Commission agrees with the European Parliament that the adoption of the legislative proposal on a Common Consolidated Corporate Tax base (CCCTB) would increase the competitiveness of the single market.</p> <p>[...]</p> <p>At the same time, it is important that the EU stays open and connected to global markets, to ensure that European investors and companies have access to the highest-quality and cheapest financial products and services.</p>		No further specific actions proposed/promised to be taken by the Commission.	
31)	64. [...] calls on the Commission to monitor and investigate how the competitive advantages inherent to these operators may distort competition in the market and harm the interests of consumers and innovation	<p>The Commission agrees with the European Parliament that the financial ecosystem is evolving rapidly, involving a wide range of players including traditional financial services providers, smaller start-ups and technology providers. While these firms offer financial services, it is essential that they can operate under the 'same business, same risk, same rules' principle and benefit from a level playing field. In the context of the Digital agenda, the Commission intends to propose by the end of this year new</p>		On 15 December 2020, the Commission adopted its proposal for a <a href="#">digital services act</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>rules ('Digital Services act') to be able to investigate ex-ante competition issues that arise in digital markets and to regulate large platforms acting as gatekeepers. These horizontal measures are likely to address a number of issues that the financial services providers are facing while competing with large platforms. In addition, as set out in the digital finance strategy, the Commission will assess whether the current financial services legislation, both prudential and conduct rules, need to be adapted to this new ecosystem. The Commission is preparing a call for advice to the European Supervisory Authorities in order to propose legislative amendments by 2022, if appropriate.</p> <p>While MiFIR reported data should help national competent authorities detect and investigate potential cases of market abuse, to monitor the fair and orderly functioning of markets, as well as the activities of investment firms, the EMIR reporting requirement should allow for a comprehensive overview of the market and for assessing systemic risk, both of cleared and non-cleared derivative contracts.</p>		The Commission plans to present amendments to the financial services legislation by 2022.	
32)	65. [...] requests that the Commission draw upon the experience gained from the European Forum for Innovation Facilitators (EFIF) to assess whether a common EU framework for a pan-European 'sandbox' for financial services would provide additional benefits for financial innovation;	The Commission welcomes the European Parliament's interest in and support for regulatory sandboxes. The Commission considers that regulatory sandboxes are effective tools to foster innovation while enabling supervisors to identify opportunities and challenges innovation brings at an early stage. The European Supervisory Authorities and the Commission are monitoring these developments in the context of the European Forum of Innovation Facilitators (EFIF) and have already issued guidelines on the design of innovation facilitators to ensure sufficient harmonisation across the EU. By mid-2021, the EFIF is going to implement a new framework for cross-border testing to enable firms to test innovative proposals simultaneously in several countries on a voluntary basis.		In an <a href="#">EFIF conference call</a> in October 2021, EIOPA presented an update on a final version of the framework prepared by the EFIF project team on cross-border testing. ESMA also presented proposals to implement the framework.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
33)	68. [...] calls on the Commission, in cooperation with the ESAs, and where relevant with NCAs, to establish a dynamic monitoring system on equivalence regimes, in the case of third-country regulatory and supervisory divergences which could entail potential risks for the EU in terms of financial stability, market transparency, market integrity, investor and consumer protection and the level playing field;	The Commission, with the support of the relevant stakeholders including the European Supervisory Authorities, and acting in accordance with their respective mandates, ensures adequate and dynamic equivalence monitoring. This robust equivalence monitoring process ensures that financial stability, orderly markets and investor protection are preserved at all times. Any decision to suspend or withdraw an equivalence decision may be taken at the discretion of the Commission, taking into account the risks of any such decision. Equivalence decisions can be unilaterally withdrawn at any time, in particular if third-country frameworks diverge and the conditions for equivalence are no longer fulfilled.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (dynamic monitoring system on equivalence regimes).	

## 4.1.12.5. ECON Resolution 5: EP resolution of 10 February 2021 on European Central Bank - annual report 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>European Central Bank - annual report 2020</b>	10/02/2021 <a href="#">T9-0039/2021</a> <a href="#">2020/2123(INI)</a> ECON	On 23 March 2021, the Parliament received ' <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – February 2021 part-session' informing that Commission will not be responding formally to the resolution because it does not address any direct calls to the Commission.  The <a href="#">plenary debate</a> took place on 8 February 2021.			
1)	36. [...] calls on the governments of the Member States, the European Council, the Council, the Eurogroup and the Commission to actively work towards gender balance in their upcoming proposals for shortlists and appointments;				

4.1.12.6. ECON Resolution 6: EP resolution of 11 March 2021 on European Semester for economic policy coordination: Annual Sustainable Growth Strategy 2021

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<p><b>European Semester for economic policy coordination: Annual Sustainable Growth Strategy 2021</b></p>	<p>11/03/2021 <a href="#">T9-0083/2021</a> <a href="#">2021/2004(INI)</a> ECON</p>	<p><a href="#">SP(2021)261</a></p>	<p>Final reply (SP) received 12 July 2021</p>	<p>Specific reply</p>			
<p>1)</p>	<p>1. Takes note of the fact that the European Semester and the Recovery and Resilience Facility are closely intertwined; notes that the assessment of the recovery and resilience plans (RRPs) will be made against 11 criteria grouped under relevance, effectiveness, efficiency and coherence; invites the Commission to scrutinise the plans thoroughly in order to ensure that the recovery generates European added value, improves Member States' long-term competitiveness and sustainable growth prospects, and guides European economies to address the challenges and reap the benefits of the green and digital transitions, the EPSR and UN Sustainable Development Goals (SDGs);</p>	<p>The Commission will assess the Recovery and Resilience Plans based on the eleven criteria set out in Article 19 of the Recovery and Resilience Facility (RRF) Regulation. In particular, the Commission will consider whether the investments and reforms set out in the plans represent a balanced response to the economic and social situation of the Member State concerned, contributing appropriately to all six RRF pillars; contribute to effectively address all or a significant subset of the challenges identified in the relevant country-specific recommendations; contain measures that effectively contribute to strengthening the growth potential, job creation and economic, institutional and social resilience of the Member State, contributing to the implementation of the European Pillar of Social Rights and to mitigating the economic and social impact of the COVID-19 crisis; contain measures that effectively contribute to the green and digital transitions; and do not significantly harm environmental objectives.</p> <p>Moreover, as a performance-based instrument, payments of the financial support will be made in instalments upon fulfilment of the relevant milestones and targets, based on a positive assessment by the Commission of the implementation of the Recovery and Resilience Plan by the Member State concerned.</p>				<p>The action is ongoing, as of the cut-off date of this publication (January 2022), the Commission has not yet finalised the assessment of all national recovery and resilience plans. Information on the latest state of play is accessible on the <a href="#">Commission website</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		As required by the RRF Regulation, the Commission will monitor the implementation of the RRF and measure the achievement of its objectives in a targeted and proportionate manner. By 31 July 2022, the Commission will present a review report on the implementation of the RRF. By 20 February 2024, it will provide an independent evaluation report, assessing the achievement of the objectives of the RRF, the efficiency of the use of its resources and its European added value. Finally, by 31 December 2028 an independent ex post evaluation report will focus on the long-term impact of the RRF.			
2)	2. Welcomes, furthermore, the rapid and intense initial response to the crisis in the area of monetary and fiscal policy, at both EU and Member State level, as well as the adoption of the next MFF and Next Generation EU (NGEU); calls on the Commission and the Council to accelerate the implementation of the Recovery and Resilience Facility in order for funding to be disbursed quickly;	With the RRF Regulation in force since 19 February 2021, the priority is for the Member States to finalise their Recovery and Resilience Plans for their official submission. The Commission has been engaging intensely with all the Member States since the outset to help them deliver high quality plans that meet the requirements in the Regulation. This work is essential to ensure a smooth assessment and approval process for the plans, so that they can be rolled out quickly and disbursements reach Member States as soon as possible.		No further/ specific actions proposed/promised to be taken by the Commission.	
3)	3. [...] considers it essential, therefore, for debates to be held in national parliaments, for the Commission to cooperate with the national authorities and relevant stakeholders proactively in order to discuss the draft national plans at an early stage, making tailor-made solutions and specific reforms possible;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	10. [...] invites the Member States and the Commission to strike a proper balance between boosting sustainable, growth-friendly public and private investment and structural reforms in the recovery plans;	<p>The Commission fully agrees that to ensure their contribution to the objectives of the RRF as set out in Article 4 of the RRF Regulation, Recovery and Resilience Plans should comprise measures for the implementation of both reforms and investment projects through a comprehensive and coherent package, which may also include public schemes that aim to incentivise private investment. The plans must effectively address all or a significant subset of challenges identified in the relevant country-specific recommendations, pursuant to articles 18 and 19 of the RRF Regulation, it is therefore key to ensure that all plans present the right balance between investments and reforms. The Commission will continue to engage in an intensive dialogue with Member States on the preparation of their Recovery and Resilience Plans to help ensure that this right balance is reached.</p> <p>Moreover, in line with Articles 18 and 19 of the RRF Regulation, the Recovery and Resilience Plans should set out a detailed explanation and the Commission should assess their expected impact to strengthen the growth potential, job creation and economic, social and institutional resilience, including through the promotion of policies for children and the youth, and on the mitigation of the economic and social impact of the COVID-19 crisis, contributing to the implementation of the European Pillar of Social Rights, including on gender equality and equal opportunity for all, thereby enhancing the economic, social and territorial cohesion and convergence within the Union.</p>		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>20. Points out that those Member States that had fiscal buffers were able to mobilise fiscal stimulus packages at a much faster pace and without associated borrowing costs, which has helped to mitigate the negative socio-economic effects of the pandemic; reiterates that replenishing fiscal buffers over time, in a socially responsible manner, will be important for preparation for future crises; however, urges Member States, the Commission and the Council not to repeat mistakes of the past in response to the economic crisis; shares the view of the European Fiscal Board that rapidly reversing the fiscal stance is not advisable for recovery;</p>	<p>The sharp fall of economic output, the severity of the imposed restrictions to economic activity and the policy support put in place by governments to mitigate the impact of the crisis makes the COVID-19 crisis different from the previous financial crisis. The EU strengthened its economic governance framework substantially since then, which facilitated a coordinated policy response. Moreover, this time the Commission swiftly reacted by setting up new instruments to support Member States' efforts to fight the pandemic and its economic fallout.</p> <p>Firstly, in March 2020, the Commission and the Council activated for the first time the general escape clause of the Stability and Growth Pact. The activation of this clause has allowed Member States to provide necessary fiscal support to businesses and citizens to deal with the current health crisis and the economic disruption that it is causing.</p> <p>Secondly, in spring 2020, as part of the country-specific recommendations under the European Semester framework, Member States were recommended to take all necessary measures, in line with the general escape clause of the Stability and Growth Pact, to effectively address the COVID-19 pandemic, sustain the economy and support the ensuing recovery. Member States were also recommended to, when economic conditions allow, pursue fiscal policies aimed at achieving prudent medium-term fiscal positions and ensuring debt sustainability, while enhancing investment.</p> <p>Moreover, the Commission started working straight away on multiple instruments designed to save lives and jobs, protect companies and support Member States whose public finances were put under severe stress. The response complemented the action taken at national level and provided the coordinated action that this unprecedented crisis called for. This included, among others, the European instrument for temporary support to mitigate</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>unemployment risks in an emergency (SURE), providing up to EUR 100 billion in loans granted on favourable terms to Member States to address sudden increases in public expenditure needed to protect employment and workers' income, the Coronavirus Response Investment Initiative (CRII) and the Coronavirus Response Investment Initiative Plus (CRII+), which introduced extraordinary flexibility to allow that all non-utilised support from the European Structural and Investment Funds could be mobilised to the fullest to address the consequences of the crisis. The "Next Generation EU" recovery instrument continues and extends the crisis response and crisis repair measures delivered through the Coronavirus Response Investment Initiative and the Coronavirus Response Investment Initiative Plus through ReactEU. Finally, the Recovery and Resilience Facility will provide funding and support for the implementation of reforms and investments to foster the economic and social recovery and strengthen the overall resilience.</p> <p>Still in spring 2020, the Commission reached the conclusion that a decision whether to open the excessive deficit procedures should not be taken, due to the exceptional uncertainty created by the macroeconomic and fiscal impact of the COVID-19 outbreak, including for designing a credible path for fiscal policy. The Commission intends to prepare new reports to assess Member States' compliance with the deficit and debt criteria in spring 2021. In this context, the Commission intends to take into account the high uncertainty, the agreed fiscal policy response to the COVID-19 crisis and the Council recommendations for 2021. The Commission approach will be confirmed in the European Semester spring package, based on the outturn data for 2020 and the Member States' Stability and Convergence Programmes.</p>		<p>The latest <a href="#">report on Member States' compliance with deficit and debt criteria</a> was published on 2 June 2021.</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In addition, in the Communication issued on 3 March 2021, the Commission presented a number of key considerations for the conduct of fiscal policy for the period ahead. Importantly, learning from the past crisis, it is highlighted that the Member States should avoid a premature withdrawal of fiscal support to their economies. Fiscal policy should remain agile and adjust to the evolving situation as warranted. Support measures should be timely, temporary and targeted. They should maximise support to the recovery without pre-empting future fiscal trajectories. The proposals for fiscal policy guidance that the Commission will put forward as part of the European Semester package in May will remain predominantly qualitative. They will include some differentiated quantified element as part of the medium-term guidance. Fiscal policy should take account of the state of the recovery, fiscal sustainability risks in the medium term and the need to reduce economic, social and territorial divergences. Once health risks diminish, fiscal measures should gradually pivot to more targeted measures that promote a resilient and sustainable recovery.</p> <p>The overall fiscal impulse needs to remain supportive in 2021 and 2022. To that end, fiscal policies should make best use of the window of opportunity provided by NextGenerationEU, notably under the RRF. Additional expenditure financed by the RRF will provide a significant fiscal impulse in the coming years without giving rise to higher deficits and debt. Moreover, the expenditure financed by the RRF with non-repayable support will make it possible to fund high-quality investment projects and cover costs of productivity-enhancing reforms. The fiscal impulse from the RRF, an improvement of the underlying fiscal position, and the implementation of reforms and investments to boost potential growth are mutually beneficial. This opportunity is particularly important for Member States with less fiscal space or high levels of public debt, who should pursue</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>prudent fiscal policies, while preserving nationally-financed investment and using RRF grants to fund additional high-quality investment projects.</p> <p>Finally, country-specific situations will continue to be taken into account after the deactivation of the general escape clause. The pace of this adjustment should depend on factors such as the state of the economy and country-specific risks to debt sustainability. In case a Member State has not recovered to the pre-crisis level of economic activity, fiscal policy guidance will make use of all flexibilities within the Stability and Growth Pact. These will be fully used, in particular when proposing fiscal policy guidance.</p>			
6)	23. [...] invites the Commission to assess the deactivation or continued application of the general escape clause as part of its European Semester package on the basis of its spring 2021 economic forecast [...]	The decision on the deactivation or continued application of the general escape clause should be taken as an overall assessment of the state of the economy based on quantitative criteria, notably the level of economic activity in the EU or euro area compared to pre-crisis levels. The current forecast suggests continuing to apply the clause in 2022 and to de-activate it as of 2023. The Commission will assess the deactivation or continued application of the general escape clause as part of its spring European Semester package, on the basis of the Commission 2021 spring forecast.		Action still ongoing, as the general escape clause continues to be applied until the <a href="#">end of 2022</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	<p>25. Calls on the Commission to act decisively in order to tackle tax fraud, tax avoidance and evasion, as well money laundering issues, which drain potential resources from national budgets and hampers governments' capacity to act, among others, for the recovery from the COVID-19 pandemic;</p>	<p>The European Commission places a high priority on combatting tax fraud, evasion and avoidance. It has pushed a number of important legislations (Anti-Tax Avoidance Directives and amendments to the Directive on Administrative Cooperation) to increase transparency and fight tax abuse and money laundering practices. Against the backdrop of the COVID 19 pandemic, the Commission also adopted a Recommendation on making state financial support to undertakings in the EU conditional on the absence of links to non-cooperative jurisdictions for tax purposes. Restrictions should also apply to companies that have been convicted of serious financial crimes, including, among others, financial fraud, corruption, and non-payment of tax and social security obligations.</p> <p>The European Commission also supports the work of the Code of Conduct on Business Taxation, which continues to look into critical elements of harmful tax regimes that can lead to tax avoidance and evasion. The Commission's July 2020 Communication on Tax good governance in Europe and beyond proposes to revisit and reform the code of conduct on business taxation and the EU list of non-cooperative jurisdictions. Furthermore, the Commission actively supports the ongoing OECD-led discussions to reform the global corporate tax framework, which would reallocate taxing rights, to better reflect the way of doing business in a digitalised and globalised economy, and set a minimum effective tax rate for taxing multinational's profits. A successful conclusion of these discussions would be a significant step forward in the fight against tax avoidance and towards a fairer global corporate tax system. The Commission will continue to take steps to address tax evasion and avoidance, and is looking in particular into action to tackle the challenges linked to the use of shell</p>		<p>No further specific actions proposed/promised to be taken by the Commission as the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (tackling tax fraud, avoidance and evasion as well as money laundering).</p> <p>On 22 December 2022, the Commission proposed a <a href="#">directive</a> to ensure a global minimum effective tax rate of 15% for large groups operating in the European Union.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>companies for tax avoidance purposes.</p> <p>In addition, the Commission has analysed the issue under the European Semester leading to Country Specific Recommendations being put forward to six Member States calling on these to take steps to address Aggressive Tax Planning. The new EU instrument of the RRF, aiming at mitigating the economic and social impact of the coronavirus pandemic and making European economies and societies more sustainable, socially and economically resilient and better prepared for the green and digital transitions, is also a good framework to address tax evasion, aggressive tax planning and money laundering issues. The RRF links the EU funding with the necessary reforms that each Member State has to implement in order to address its main challenges identified in its country specific recommendations. Funding can also be used to strengthen the ability of tax administrations to combat tax fraud, including through digitalisation.</p> <p>The Commission will also continue to work with the Member States tax administrations to develop methodologies to estimate various tax gaps. This work can also be supported financially by the FISCALIS programme. The Commission works with national governments and civil society through a wide range of platforms at political and operational level, such as the Platform for Tax Good Governance, which brings together Member State representatives and civil society. A new instrument to be launched in June 2021, the EU Tax Observatory, thanks to a preparatory action of the European Parliament, will promote high-quality research, create a public repository of data and information, and will be an active voice in the EU and internationally on tax evasion and</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p> <p>An <a href="#">EU tax observatory</a> was created in 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>avoidance issues, bringing together the interests of various stakeholders, including parliaments, civil society and taxpayers.</p> <p>As regards money laundering, the Commission will present during the first semester of 2021 a package of legislative proposals implementing the Action Plan on anti-money-laundering/counter terrorist financing of 7 May 2020, including a single rulebook and the establishment of an EU level anti-money-laundering/counter terrorist financing supervisor.</p>		<p>On 20 July 2021, the Commission presented an <a href="#">anti-money laundering package</a>.</p>	
8)	<p>29. Calls on the Commission to start working on the creation of a climate indicator to assess the discrepancy between the structure of Member States' budgets and the Paris-aligned scenario for each of their national budgets [...]</p>	<p>The Commission is developing a set of key indicators to monitor the transition to a sustainable economy within the European Semester, including the transition towards climate neutrality. The consistency of Member States' budgets with the Paris agreement targets is very relevant in this context. In its Green Deal Communication, the Commission has committed to working with Member States on green budgeting and intense consultations to follow-up on this commitment have started. While the green budgeting work highly encourages country-specific approaches that would ensure ownership and adaptability of these approaches to each Member State's context, the use of standardised indicators could potentially over time contribute to increased transparency.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	
9)	<p>31. Calls on the Member States and the Commission, while respecting fiscal sustainability and sound budgetary rules, to create a regulatory and governance framework, including investment rules or other adequate mechanisms, that are predictable and supportive of public and private investments in line with the EU's long-term objectives, while</p>	<p>Ensuring an investment framework that comprises an efficient and high-quality public administration, an effective and agile regulatory framework and an efficient judicial system will be crucial to allow for a swift deployment of the recovery support and on a longer run to deliver on the green and digital transitions, as well as to strengthen economic and social resilience.</p> <p>In addition, the review of the economic governance framework also needs to pay due attention to the quality of</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	ensuring Member States' ability to respond to future crises ;	<p>public finances, including the role of public investment, as a necessary condition for supporting sustainable economic growth and for long-term sustainability.</p> <p>Since the adoption of the Investment Plan for Europe in 2014, the Commission has continuously mapped investment barriers as part of the European Semester. Such barriers include regulatory barriers, heavy administrative procedures, the lack of adequate skills, and the weakness of some public administrations. As progress in addressing these barriers has been slow, the Recovery and Resilience Plans under preparation by the Member States will prove a determinant tool in adopting the necessary reforms to deliver an effective and investment-friendly regulatory and governance framework.</p> <p>While assessing the Recovery and Resilience Plans, the Commission will notably pay particular attention that the measures put forward aim to strengthen the growth potential, job creation and economic, social and institutional resilience of the Member State concerned, including through the promotion of policies for children and the youth, and mitigate the economic and social impact of the COVID-19 crisis, contributing to the implementation of the European Pillar of Social Rights, thereby enhancing the economic, social and territorial cohesion and convergence within the Union. The Commission will also by a rigorous assessment ensure that the plans contain measures that effectively contribute to the green and digital transitions, verifying thoroughly that digital measures amount for at least 20 % of the Recovery and Resilience Plan's total allocation, and that at least 37% of the plan's total allocation is dedicated to climate objectives.</p>			
10)	40. Highlights the importance of full debate and the proper involvement of national parliaments and the European Parliament in the process of	Greater transparency, ownership and accountability for the decisions taken under the framework of the European Semester is ensured by economic dialogue with the		No further specific actions proposed/promised to be taken by the Commission as the Commission on this particular point as according to the Commission, it has

		<p>implementation of the RRF, such as the Recovery and Resilience Plans of the Member States, the assessment by the Commission, the main findings of the review report, the status of fulfilment of the milestones and targets, the procedures related to payments and suspensions, the state of recovery, resilience and adjustment capacity in the Union, as well as the measures adopted under the RRF Regulation, and any other relevant information and documentation provided by the Commission in relation to the implementation of the RRF. The Commission will take into account elements arising from the views expressed through the recovery and resilience dialogue, including the resolutions from the European Parliament if provided. Moreover, the Commission has already started sharing with the European Parliament information transmitted to the Council or any of its preparatory bodies in the context of the RRF Regulation.</p>			

## 4.1.12.7. ECON Resolution 7: EP resolution of 25 March 2021 on strengthening the international role of the euro

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Strengthening the international role of the euro</b>	25/03/2021 <a href="#">T9-0110/2021</a> <a href="#">2020/2037(INI)</a> ECON	<a href="#">SP(2021)345</a>	Final reply (SP) received 3 August 2021	Specific reply			
1)	1. [...] encourages the Commission, in that regard, to assess the potential impact of further enlargement of the euro area on the process of strengthening the international role of the euro;	<p>The Commission continues to work towards further enlargement of the euro area including on the assessment of its potential impact on the EU economy, financial system and its financial and monetary stability (paragraph 1). Euro adoption is a Treaty obligation for all the Member States (except Denmark), and the Commission supports all Member States that have not yet adopted the euro in their efforts to achieve sustainable economic convergence and prepare their economies in view of euro adoption. Currently Bulgaria and Croatia are working towards a successful membership in the euro area and the Commission is supporting the efforts of the two countries.</p> <p>The Commission assesses the economic convergence achieved by the Member States outside the euro area at least every two years, or at the request of a Member State that has not yet adopted the euro. The Commission also provides analytical support to those Member States, as well as technical guidance on the practical preparation for euro changeover when all convergence criteria are met. The general impact of an expanded euro area on the process of strengthening the international role of the euro should be positive. As economic size and international trade are important determinants for the internationalisation of a currency, expanding the euro area should contribute to strengthening the international role of the euro along both these dimensions.</p>				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (the Commission assesses the economic convergence and provides analytical support).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	<p>16. Acknowledges that the euro is already the main currency of denomination for the issuance of green bonds, as according to the ECB, in 2019 over half of the green bonds issued globally were issued in euro; believes that the EU should also become the world leader in setting standards for green bond issuance; calls, therefore, on the Commission to present an ambitious new action plan on sustainable finance and a proposal for a robust EU green bond standard; considers that the consolidation of the EU's role as a global leader and standard-setter for green finance could strengthen the euro as the currency of choice for sustainable financial products, bolstering its international role;(…); urges the Commission and the Member States to provide investors, through strong standards of transparency and traceability of proceeds, with a strong degree of legal certainty that their investment will be used for its stated purpose; calls, in this context, for the swift completion and implementation of the taxonomy of sustainable economic activities; points to the need to avoid the risk of potential negative liquidity effects that may arise as a result of the fragmentation of European safe assets between green bonds, social bonds and 'standard' bonds;</p>	<p>Almost half of all global green bond issuances is denominated in euro and this share is expected to grow along with the objective of having 30% of NextGenerationEU investments funded by green bonds. The recently adopted EU taxonomy Regulation<sup>27</sup>, followed by a delegated act<sup>28</sup> specifying the technical screening criteria, will guide investments into green economic activities and fight against greenwashing. The Commission's proposal for an EU Green Bond Standard is scheduled for later this year. The Commission organised last year a public consultation on the Renewed Sustainable Finance Strategy that will feed into the upcoming new action plan on sustainable finance (paragraph 16).</p>		<p>On 6 July 2021, the Commission adopted its proposal for a <a href="#">regulation on European green bonds</a> as well as a <a href="#">strategy for financing the transition to a sustainable economy</a>.</p>	
3)	<p>18. [...] calls on the Commission to continue its work on both the effectiveness of its own</p>	<p>In order to address risks stemming from the extra-territorial application of sanctions by third countries on EU operators</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as</p>	

<sup>27</sup> [https://ec.europa.eu/info/law/sustainable-finance-taxonomy-regulation-eu-2020-852\\_en](https://ec.europa.eu/info/law/sustainable-finance-taxonomy-regulation-eu-2020-852_en)

<sup>28</sup> [https://ec.europa.eu/finance/docs/level-2-measures/taxonomy-regulation-delegated-act-2021-2800\\_en.pdf](https://ec.europa.eu/finance/docs/level-2-measures/taxonomy-regulation-delegated-act-2021-2800_en.pdf)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	sanctions and the extra-territorial effects of sanctions by third countries on EU operators;	(paragraph 18), the Commission launched a dialogue with financial-market infrastructures, with relevant ESAs and with the ECB with the aim to assessing relevant vulnerabilities. Relatedly, the Commission is discussing with the European Banking Authority (EBA) the approach, scope and feasibility of the study on EU dependence on non-EU financial operators and on funding in foreign currencies. On that basis, the Commission will assess the need for issuing related recommendations.		according to the Commission, it has been already working on action falling under the scope of the EP request (dialogue with financial-market infrastructures, with relevant ESAs and with the ECB).	
4)	19. [...] calls on the Commission to provide detailed answers regarding the concrete actions undertaken to follow up on the proposals made by Parliament in its resolution of 12 April 2016 on the EU role in the framework of international financial, monetary and regulatory institutions and bodies;	As regards the need for a unified representation of the euro area in multilateral organisations such as the International Monetary Fund (IMF) (paragraph 19), the Commission in 2015 presented a Communication entitled "A roadmap for moving towards a more consistent external representation of the euro area in international fora" (2015, COM(2015) 602 final), which laid out a proposal to strengthen the representation of the euro area at the IMF. While several institutional and organizational obstacles hamper a unified representation of the euro area in the IMF, coordination on IMF-related topics in the EU has improved considerably over the last years with the help of the Commission. However, a more consistent euro area representation would allow delivering single euro area messages at the IMF on issues such as economic and fiscal policy, macroeconomic surveillance, exchange rate policies, and financial stability. Currently, the Commission's proposal is still under consideration by the Council.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">communication</a> - A roadmap for moving towards a more consistent external representation of the euro area in international fora (COM(2015) 60).	
5)	24. [...] calls, therefore, on the Commission to foster the use of the euro in pricing and invoicing in trade transactions, and to make use of the high potential offered by financial instruments denominated in euro, by actively engaging with private stakeholders and trade	No specific reply to the particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	partners, and by promoting the use of euro in EU trade agreements;				
6)	26. [...] encourages the Commission to continue consultation and the drafting of studies aiming to identify the potential to increase the use of euro in other sectors, notably in transport, as well as agriculture and food commodities, in order to further support and promote the use of euro for this type of contracts;	<p>Regarding the importance of green energy, commodity markets and of the EU emissions trading system (paragraph 26), the Commission strives to promote the use of the euro in strategic sectors and commodity markets including gas and other materials. To this end, the Commission maintains regular dialogue with main market players. The Commission is also looking for possibilities to expand the role of the EU Emissions Trading System to maximize its environmental outcome by covering additional sources of greenhouse gas emissions and to meet the EU's greenhouse gas emissions reduction target of at least 55% by 2030, compared to 1990. The Commission will make legislative proposals by July 2021.</p> <p>To further facilitate the take-off of euro-denominated contracts, in particular for sustainable energy sources and nascent energy markets (paragraph 26), the Commission will review the Markets in Financial Instruments Regulation / Directive (MiFIR/MiFID) framework in the area of exchanged-traded derivatives. The review of the Benchmarks Regulation is planned for 2022, so as to facilitate the emergence of euro-denominated indices and to ensure their robustness.</p>		<p>On 14 July 2021, the Commission adopted a <a href="#">series of legislative proposals</a>, including a revision of the emissions trading system, setting out how it intends to achieve climate neutrality by 2050, including the intermediate target of an at least 55% net reduction in greenhouse gas emissions by 2030.</p> <p>On 25 November 2021, the Commission adopted the proposals for the review of the markets in financial instruments <a href="#">regulation</a> as well as of the <a href="#">directive</a> (MiFIR/MiFID).</p>	

## 4.1.12.8. ECON Resolution 8: EP resolution of 29 April 2021 on digital taxation: OECD negotiations, tax residency of digital companies and a possible European Digital Tax

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Digital taxation: OECD negotiations, tax residency of digital companies and a possible European Digital Tax</b>	29/04/2021 <a href="#">T9-147/2021</a> <a href="#">2021/2010(INI)</a> ECON	<a href="#">SP(2021)567</a>	Final reply (SP) received 27 September 2021	Specific reply			
1)	17. Calls on the Commission and the Council to make sure that the future compromises of the G20/OECD IF negotiations take into account the EU's interests and avoid adding more complexity and any supplementary red tape for SMEs and citizens;	The Commission is actively supporting the ongoing OECD-led and G20 guided discussion and engaging with the Member States and international partners including via the G20 process to ensure that any solution benefits the EU and is compatible with the Single Market, the EU legal framework and EU international obligations. The Commission also supports a solution that avoids red tape and is simple for businesses and tax administrations to implement, as the cost of implementation shall not exceed the expected benefits of the envisaged measures.				No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( OECD-led and G20 guided discussion).	
2)	23. Calls on the Commission and the Council to intensify the dialogue with the new US administration on digital tax policy with the aim of finding a common approach in the framework of the G20/OECD IF negotiations before June 2021; welcomes the recent declaration of the new US administration that it will re-engage actively in OECD negotiations with a view to achieving an agreement and abandon the 'safe harbour' concept; calls on the Commission to assess carefully the implications of the new proposed adjustments made by the US to Pillar I; calls on the Member States to oppose the 'safe harbour' clause,	The Commission welcomes the reengagement of the US in the OECD-led discussions, on both pillars, which paved the way toward an agreement on the main features of the two-pillar solution at the Inclusive Framework meeting last July. The Commission has already intensified its dialogue with the US administration and stands ready to intensify it further in order to ensure the agreement is finalised by autumn 2021.				In <a href="#">October 2021</a> , G20 countries endorsed an agreement on international corporate tax reform, agreed upon by 136 countries in the OECD. In <a href="#">February 2021</a> , U.S. Treasury Secretary Janet Yellen dropped the call for a voluntary 'Safe Harbour' scheme.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>which risks seriously undermining reform efforts; calls on the Commission to pursue a proposal of its own for addressing the challenges of a digitalised economy should a 'safe harbour' clause be included in Pillar One of the reform; recalls, in that regard, the Commission's long-term proposal centred on a significant digital presence;</p>				
<p>3)</p>	<p>26. Calls on the Commission to complete its own impact assessment on the effects of Pillars One and Two on revenue collection for the Member States and to inform the Council and Parliament about its findings;</p> <p>Calls on the Commission, on this basis of this impact assessment, to advise and guide Member States to take positions in the negotiations that defend the EU's interests;</p>	<p>The Commission continues to carefully examine the developments in terms of the exact design and relevant parameters pertaining to both Pillar 1 and Pillar 2. While the overall framework for evaluating the new design of the Pillars has been prepared and agreed at the G20 (of July 2021), concrete elements of the Pillars are still under discussion at the OECD/Inclusive Framework level. The elements still to be fully developed and agreed upon include relevant parameters, such as the basis for reallocation in Pillar 1 and the minimum tax rate in Pillar 2.</p> <p>The Commission will thus continue to liaise with and inform the Member States as developments progress on these issues ahead of the expected finalisation in the autumn of this year (2021). The Commission expects that further coordination with the EU Member States will allow all EU Member States to agree to the final solution in the course of the autumn.</p>		<p>On 22 December 2021, as part of a <a href="#">package on new own resources</a>, the Commission proposed creating an "own resource" equivalent to 15% of the share of the residual profits of the largest and most profitable multinational enterprises that are reallocated to EU Member States under the agreement on a reform of the international tax framework (Pillar 1). The practical implementation aspects of the agreement are still being finalised, the Commission has committed to propose a directive on this point in 2022.</p> <p>On 22 December 2021, the Commission also adopted a <a href="#">proposal for a directive</a> ensuring a minimum effective tax rate of 15 % for the global activities of large multinational groups (Pillar 2).</p>	
<p>4)</p>	<p>27. Calls on each Member State and the Commission to coordinate their positions in order to speak with a single voice;</p>	<p>The Commission strongly supports a coordinated and united EU position in the negotiation. The Commission is actively engaging with Member States in this regard.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	31. Insists, therefore, that regardless of the progress of the negotiations in the G20/OECD IF, the EU should have a fall-back position and stand ready to roll out its own proposal for taxing the digital economy by the end of 2021, especially as the OECD proposals apply only to a small group of companies and may not be sufficient; calls on the Commission to respect the interinstitutional agreement of 16 December 2020 on cooperation in budgetary matters by presenting its proposals for a digital levy by June 2021, while anticipating their compatibility with the reform by the G20/OECD IF, if there is an agreement on it; recommends that the Commission come up with a road map taking into account different scenarios, in particular with and without agreement at OECD level by mid-2021;	In July 2021, the overwhelming majority of the Inclusive Framework members reached an agreement on the main elements of a two-pillar solution to reform the global corporate tax framework. This agreement, supported by 134 jurisdictions to date, has been subsequently endorsed by the G20 and work now continues to solve the remaining technical issues, rally the few reticent jurisdictions to the agreement and ensure a successful worldwide implementation. Successfully concluding the OECD/G20 process will require a final effort from all parties, and the Commission is committed to focusing on that effort. For this reason, the Commission has decided to put on hold its work on a proposal for a digital levy as a new EU own resource. The Commission will re-assess the situation this autumn.		In <a href="#">October 2021</a> , the G20 countries endorsed the agreement on international corporate tax reform, agreed upon by 136 countries in the OECD.  On 22 December 2021, as part of a <a href="#">package on new own resources</a> , the Commission proposed creating an “own resource” equivalent to 15% of the share of the residual profits of the largest and most profitable multinational enterprises that are reallocated to EU Member States under the agreement on a reform of the international tax framework (Pillar 1). The practical implementation aspects of the agreement are still being finalised, the Commission has committed to propose a directive on this point in 2022.  On 22 December 2021, the Commission also adopted <a href="#">a proposal for a directive</a> ensuring a minimum effective tax rate of 15 % for the global activities of large multinational groups (Pillar 2).	
6)	32. Invites the Commission to consider in particular introducing a temporary EU digital services tax as a necessary first step; stresses that if an international agreement is reached under the OECD/G20 IF, these European solutions should be adapted accordingly; recalls that an EU DST can only be envisaged as a temporary first step;	The Commission will re-assess the situation this autumn.		On 22 December 2021, as part of a <a href="#">package on new own resources</a> , the Commission proposed creating an “own resource” equivalent to 15% of the share of the residual profits of the largest and most profitable multinational enterprises that are reallocated to EU Member States under the agreement on a reform of the international tax framework (Pillar 1). The practical implementation aspects of the agreement are still being finalised, the Commission has committed to propose a directive on this point in 2022.	
7)	33. Calls for the EU to implement the future outcome agreement of the international negotiations in a harmonised way and invites	As announced in the Commission’s communication on business taxation on 18 May 2021, in order to ensure its consistent implementation in all EU Member States, including those that are not members of the OECD and do		On 22 December 2021, as part of a <a href="#">package on new own resources</a> , the Commission proposed creating an “own resource” equivalent to 15% of the share of the residual profits of the largest and most profitable multinational

	the Commission to issue a proposal to that effect;	not participate in the Inclusive Framework, the Commission will consider proposing a directive for the implementation of Pillar 1 in the EU. In order to ensure its consistent application within the EU and compatibility with EU law, the principal method for implementing Pillar 2 will be an EU directive that will reflect the OECD Model Rules with the necessary adjustments. The implementation of a global agreement on minimum effective taxation may also have implications for existing EU Directives and pending legislative proposals.		enterprises that are reallocated to EU Member States under the agreement on a reform of the international tax framework (Pillar 1). The practical implementation aspects of the agreement are still being finalised, the Commission has committed to propose a directive on this point in 2022.  On 22 December 2021, the Commission also adopted <a href="#">a proposal for a directive</a> ensuring a minimum effective tax rate of 15 % for the global activities of large multinational groups (Pillar 2).	
8)	43. Welcomes the Commission inception impact assessment of 14 January 2021 on a digital levy; notes that digitalisation can increase productivity and consumer welfare, but that it is also of paramount importance to ensure that large, highly digitalised businesses contribute their fair share to society; calls on the Commission to carefully assess how the scope, definition and segmentation of digital activities, transactions, services or companies will be in line with international efforts to find a global solution;	In July 2021, the overwhelming majority of the Inclusive Framework members reached an agreement on the main elements of a two-pillar solution to reform the global corporate tax framework. This agreement, supported by 134 jurisdictions to date, has been subsequently endorsed by the G20 and work now continues to solve the remaining technical issues, rally the few reticent jurisdictions to the agreement and ensure a successful worldwide implementation. Successfully concluding the OECD/G20 process will require a final effort from all parties, and the Commission is committed to focusing on that effort. For this reason, the Commission has decided to put on hold its work on a proposal for a digital levy as a new EU own resource. The Commission will re-assess the situation this autumn.		On 22 December 2021, as part of a <a href="#">package on new own resources</a> , the Commission proposed creating an “own resource” equivalent to 15% of the share of the residual profits of the largest and most profitable multinational enterprises that are reallocated to EU Member States under the agreement on a reform of the international tax framework (Pillar 1). The practical implementation aspects of the agreement are still being finalised, the Commission has committed to propose a directive on this point in 2022.	
9)	46. Calls for a stronger role for Parliament in legislative procedures in the area of taxation; calls on the Commission to explore all possibilities offered by the Treaties; takes note, in this respect, of the Commission's proposed roadmap to qualified majority voting in its communication of 15 January 2019 entitled	The Commission remains committed to following up on its Communication on Qualified Majority Voting.  The Commission is also of the view that it should use all possibilities offered by the Treaties to move forward its agenda for a fair and efficient taxation, including the use of the Article 116 of the Treaty on the Functioning of the European Union.		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Towards a more efficient and democratic decision making in EU tax policy;				
10)	47. Welcomes the Interinstitutional Agreement of 16 December 2020 (IIA) between Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources <sup>29</sup> , in compliance with the principle of universality, and recalls the Commission's legally binding commitment to present a legislative proposal concerning an EU digital levy as an own resource by June 2021; stresses the legally binding commitment of Parliament, the Council and the Commission to follow, without delay, the steps set out in the roadmap, with a view to introducing it at the latest by 1 January 2023;	Although no specific reply is provided to this particular point, the Commission however states that successfully concluding the OECD/G20 process will require a final effort from all parties, and the Commission is committed to focusing on that effort. For this reason, the Commission has decided to put on hold its work on a proposal for a digital levy as a new EU own resource. The Commission will re-assess the situation this autumn.		On 22 December 2021, as part of a <a href="#">package on new own resources</a> , the Commission proposed creating an "own resource" equivalent to 15% of the share of the residual profits of the largest and most profitable multinational enterprises that are reallocated to EU Member States under the agreement on a reform of the international tax framework (Pillar 1). The practical implementation aspects of the agreement are still being finalised, the Commission has committed to propose a directive on this point in 2022.	
11)	57. Urges the Commission to incorporate Parliament's position when preparing the legislative proposals for an EU digital levy as an own resource and the revised own resources decision and calls on the Council to swiftly adopt the proposal in line with the roadmap; encourages the institutions to engage swiftly and constructively in the 'regular dialogue' provided for in the agreed own resources roadmap; urges the European Council to endorse a resolute leadership role for the EU in	In July 2021, the overwhelming majority of the Inclusive Framework members reached an agreement on the main elements of a two-pillar solution to reform the global corporate tax framework. This agreement, supported by 134 jurisdictions to date, has been subsequently endorsed by the G20 and work now continues to solve the remaining technical issues, rally the few reticent jurisdictions to the agreement and ensure a successful worldwide implementation. 	Banking Communication of 30 July 2013 <sup>31</sup> in the context of the review of the crisis management framework, including in the light of recent cases, taking into account the need to protect taxpayers and savers against the burden of bank rescues;				
11)	21. Calls on the Commission to ensure and monitor the proper use and distribution of the different EU funding measures in response to the COVID-19 crisis, including through Member States' National Recovery and Resilience Plans (NRRPs) of the Recovery and Resilience Facility, which should be in accordance with EU competition and State aid rules, must not lead to any distortions of competition, and must be applied equally to all companies, in particular in critical sectors such as telecommunications, energy and transport; urges the Commission to oversee any such potential distortions of competition; stresses that State aid should not be granted to companies that were inefficient and structurally loss-making before the COVID-19 crisis, nor encourage the formation of monopolistic structures;	In February 2021, the Recovery and Resilience Facility (RRF) entered into force. It will make EUR 672.5 billion in loans and grants available to support reforms and investments undertaken by Member States. The aim of the RRF is to mitigate the economic and social impact of the coronavirus pandemic and make EU economies, and societies more sustainable, resilient and better prepared for the challenges and opportunities of the green and digital transitions. The Commission will continue to monitor and improve how Member States implement their RRP to ensure that they achieve their intended purpose without unduly distorting competition.		The Commission published several <a href="#">recovery and resilience facility (RRF) guiding templates</a> to assist Member States in the design of the State aid elements of their RRP of the types of investments which are expected to be common to most of those. One guideline is addressed to Member States for a <a href="#">swift treatment of State aid notifications in the framework of the recovery and resilience facility</a> .  Furthermore, the Commission is regularly publishing <a href="#">press releases</a> on national recovery and resilience plans.	
12)	25. Stresses that dedicated cooperation agreements with non-EU countries in the area of competition policy can meaningfully contribute to the effectiveness of competition policy and	The Commission continues its endeavours to improve international rules for subsidies. Reforming the subsidy rules is one of the EU's main priorities for the modernisation of World Trade Organisation trade rules. To this effect, the		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

<sup>31</sup> Communication from the Commission on the application, from 1 August 2013, of State aid rules to support measures in favour of banks in the context of the financial crisis (OJ C 216, 30.7.2013, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	invites the Commission to pursue more of such dedicated competition agreements in order to allow for a more effective exchange of information between competition authorities; recalls, furthermore, that the EU must ensure a level playing field and reciprocity with its international partners in terms of State aid, public (...)policy; calls on the Commission to reinforce State aid chapters in future trade and investments agreements;	EU, the United States and Japan agreed in a common statement in January 2020 to strengthen the existing rules on industrial subsidies (paragraphs 22 - 25). Moreover, in 2020 the Commission was engaged in several sectoral initiatives addressing subsidies in the international context, for example the G20 Global Forum on steel excess capacity. The Commission also worked closely with EU Member States in the International Subsidy Policy Group, exchanging views and coordinating initiatives concerning international subsidy policies at multilateral and bilateral levels. The Commission continued its active engagement in competition-related international fora such as the Organisation for European Economic Cooperation (OECD) Competition Committee, the International Competition Network (ICN), the World Bank, and United Nations Conference on Trade and Development (UNCTAD).		working on action falling under the scope of the EP request ( <a href="#">international subsidy policy group</a> ).	
14)	26. Calls on the Commission to pay attention to the role of foreign-based state-owned enterprises that are supported and subsidised by their governments in ways that the EU single market rules prohibit for EU entities [...]	The Commission pays close attention to the role of enterprises subsidised by third-country governments in ways prohibited under EU single market rules (paragraph 26). On 5 May 2021, the Commission adopted a proposal for a regulation on foreign subsidies distorting the internal market (COM(2021) 223 final). This legislative proposal largely follows the White Paper on foreign subsidies published in June 2020 while taking into account the extensive consultation process with stakeholders. Under the proposed regulation, the Commission would be given powers to investigate financial support granted by non-EU governments to companies active on EU markets. If the Commission finds that such financial support distorts competition in the internal market, the Commission would be able to impose measures redressing the distortive effects of the foreign subsidies in the internal market.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">proposal</a> for a regulation on foreign subsidies distorting the internal market).

		the COVID-19 related measures taken by the Member States.			
24)	43. [...] recalls, in this regard, that in the annex of the ECN+ Directive <sup>32</sup> , the Commission identified 'interim measures' as 'a key tool for competition authorities to ensure that competition is not harmed while an investigation is on-going'; regrets and is concerned that interim measures have been used only once in 20 years; calls on the Commission to revise the Notice on Remedies <sup>33</sup> by taking into account the developments and evolution of the digital sector over recent years;	The Commission considers the imposition of interim measures (paragraph 43) as a key tool to ensure that competition is not harmed while an investigation is ongoing. The purpose of interim measures is to avoid that the final decision is deprived of its effectiveness. Pursuant to Article 8 of Regulation 1/2003, interim measures can only be imposed if two conditions are fulfilled: (i) there is a "prima facie finding of infringement"; and (ii) there is a risk of "serious and irreparable damage to competition". As shown in the Broadcom case, the Commission will not hesitate to impose interim measures in cases where it could be clearly demonstrated that the two conditions above are fulfilled. A possibility to impose interim measures is also included in the DMA proposal.		No further specific actions proposed/promised to be taken by the Commission.	
	44. [...] urges the Commission, therefore, to pursue its antitrust enforcement in new and pending cases involving gatekeepers in the digital environment;	Although no specific reply is provided to this particular point, the Commission states that the "Commission makes good use of its enforcement powers in merger control and antitrust proceedings, although improvements are necessary in certain areas (paragraph 74)."		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (antitrust proceeding). In addition, in December 2020, the Commission tabled a proposal for a digital markets act (DMA)).	
25)	47. [...] calls on the Commission to file antitrust charges against Google for abuse of dominance in other specialised search services, including local search;	No specific reply is provided to this particular point.		Not mentioned.	

<sup>32</sup> Directive (EU) 2019/1 of the European Parliament and of the Council of 11 December 2018 to empower the competition authorities of the Member States to be more effective enforcers and to ensure the proper functioning of the internal market (OJ L 11, 14.1.2019, p. 3).

<sup>33</sup> Commission notice on remedies acceptable under Council Regulation (EC) No 139/2004 and under Commission Regulation (EC) No 802/2004 (OJ C 267, 22.10.2008, p. 1).

26)	<p>52. Calls on the Commission to review its merger and acquisition rules when it comes to assessing personal data;</p> <p>Calls on the Commission to fully consider and assess personal data assets in the same way as all other traditional physical assets when deciding on digital mergers and acquisitions;</p>	<p>The European Parliament calls on the Commission to review its merger and acquisition rules when it comes to personal data (paragraph 52). In particular, the European Parliament regrets the Commission's decision to approve Google's takeover of Fitbit, fearing that Google could use the personal data from Fitbit users for the purpose of digital advertising. In addition, the European Parliament expresses concerns at the 2014 acquisition of WhatsApp by Facebook, noting that the Commission fined Facebook for having provided incorrect information in the merger review and calls on the Commission to put forward appropriate measures to bring an end to the use of WhatsApp users' data for Facebook's advertising purposes.</p> <p>The Commission recalls that in all its decisions it takes into account the legal and economic context, including the legislation concerning personal data protection when it is relevant for consumer choice or market differentiation. The Commission emphasises the fact that it approved the Google/Fitbit merger subject to conditions that include a technical separation of health and wellness data collected from wrist-worn wearable devices in the European Economic Area from Google's digital advertising business. Such data is stored in a 'data silo' and cannot be used by Google for advertising purposes. The duration of this commitment is ten years, and it can be extended by another ten years if justified by market conditions.</p> <p>With respect to the Commission's approval of the Facebook/WhatsApp merger in 2014, the Commission assessed the merger's competitive effects assuming that the companies could automatically match user identifiers across Facebook and WhatsApp. The incorrect information provided by Facebook on this issue did not affect the Commission's decision to clear the merger. With respect to</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Urges the Commission to take a broader view when evaluating digital mergers and to also assess the impact of data consolidation, including of advertising technology at the heart of big tech companies' business models;</p>	<p>gaining access to data on WhatsApp's users, the Commission may only assess whether digital mergers resulting in the aggregation of datasets give rise to competition issues. The Commission concluded that, regardless of whether Facebook would introduce advertising on WhatsApp and/ or start collecting WhatsApp user data, the transaction would not raise competition concerns. This is because after the merger, in the market conditions of 2014 a sufficient number of alternative providers to Facebook remained available for the supply of targeted advertising, and a large amount of internet user data that are valuable for advertising purposes were not within Facebook's exclusive control.</p>			
27)	<p>54. Notes that in several specific markets for financial data, there are multiple vendors and, although none of them has a dominant market share, competition remains very low; notes also that some financial market data vendors positioned as data aggregators could act as gatekeepers and as such control access to data and restrict usage for customers;</p> <p>Calls on the Commission to assess such situations where companies acquire the position of gatekeepers or oligopolies and to develop measures to restore competition, supporting price transparency and avoiding unfair and unreasonable commercial practices;</p>	<p>No specific reply is provided to this particular point.</p>		Not mentioned.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
28)	55. Regrets and expresses its concern at the acquisition in 2014 of WhatsApp by Facebook; recalls that the Commission was lied to by Facebook during the process of assessing the take-over about its technical capability to use WhatsApp data for the purposes of digital advertising; stipulates that Facebook started in 2016 to use metadata from WhatsApp conversations for the purposes of advertising; recalls that the Commission fined Facebook in 2017 for having lied during its assessment process; reiterates that Article 105 TFEU obliges the Commission to propose appropriate measures to bring an end to infringements of Articles 101 and 102 TFEU; calls on the Commission to put forward appropriate measures to bring an end to the use of WhatsApp users' data for Facebook's advertising purposes;		Although the follow-up does not mention paragraph 55, the [...] Commission recalls that in all its decisions it takes into account the legal and economic context, including the legislation concerning personal data protection when it is relevant for consumer choice or market differentiation. [...] With respect to the Commission's approval of the Facebook/WhatsApp merger in 2014, the Commission assessed the merger's competitive effects assuming that the companies could automatically match user identifiers across Facebook and WhatsApp. The incorrect information provided by Facebook on this issue did not affect the Commission's decision to clear the merger. With respect to gaining access to data on WhatsApp's users, the Commission may only assess whether digital mergers resulting in the aggregation of datasets give rise to competition issues.		No further specific actions proposed/promised to be taken by the Commission.	
29)	57. Calls on the Commission to review and adapt the methodology used to assess an abuse of dominant position and ensure that the notion of 'essential facilities' remains fit for the purpose in the digital age; invites the Commission to consider complementing the concept of 'dominance' with concepts such as 'dependency' and 'relative market power';		No specific reply is provided to this particular point.		Not mentioned.	
30)	58. Notes that some oligopolistic structures have developed in the area of financial services, and also that some large technology undertakings have become important players in the financial services market; calls on the Commission to		No specific reply is provided to this particular point. <sup>37</sup> Judgment of 19 February 2002, *J. C. J. Wouters, J. W. Savelbergh and Price Waterhouse Belastingadviseurs BV v Algemene Raad van de Nederlandse Orde van Advocaten*, C-309/99, EU:C:2002:98.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Calls on the Commission to formulate a ‘theory of harm’, which should transcend price-centric approaches and account for broader considerations, while stressing the importance of the proportionality principle, meaning that limitations of competition cannot go beyond what is necessary for the general interest;</p> <p>Calls on the Commission, furthermore, to issue guidance in this regard on the interpretation of ‘significant impediment to effective competition’ under the EC Merger Regulation;</p>				
39)	<p>74. Agrees with the ECA that, overall, the Commission makes good use of its enforcement powers in merger control and antitrust proceedings, although improvements are necessary in a number of areas; notes in particular that the turnover thresholds might not be suitable to detect all cases that should be reviewed by competition authorities; calls on the Commission, therefore, to consider revising the thresholds in order to include factors such as the number of consumers impacted and the value of the related transactions as part of its ongoing evaluation of the EC Merger Regulation;</p> <p>Calls on the Commission, furthermore, to also assess higher levels of concentration due to horizontal ownership by large asset management companies in its ongoing evaluation of the EC Merger Regulation and to</p>	<p>The Commission notes that the European Parliament agrees with the European Court of Auditors that, overall, the Commission makes good use of its enforcement powers in merger control and antitrust proceedings, although improvements are necessary in certain areas (paragraph 74).</p> <p>In order to address all competition issues in EU merger control in an efficient manner and to respond faster to the evolution of markets - in particular digital markets - the Commission endeavours to improve and streamline merger procedures and case management. Therefore, the Commission launched an impact assessment on revising certain procedural aspects of EU merger control.</p> <p>The Commission notes the call of the European Parliament to consider revising the merger control thresholds to include factors such as the number of consumers impacted and the value of the related transactions (paragraph 74). The Commission also notes the European Parliament’s view concerning “killer acquisitions” and the use of Article 22 of Regulation 139/2004. Article 22 allows the Member States to refer proposed concentrations to the European</p>		<p><a href="#">Merger control in the EU – further simplification of procedures</a> - planned Commission adoption in first quarter 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	consider providing guidelines on the use of Articles 101 and 102 TFEU in this respect;	Commission for review also in cases where the referring Member State is not competent to review these under its national merger control rules.			
40)	75. Notes that while the ECA rightly points out that the amount of fines does not allow conclusions to be drawn on whether they are effective deterrents, the ECA also underlines that, in itself, the ceiling of possible fines can limit the deterrent effect in 'serious cases'; points out in this regard that, while the level of fines imposed by the Commission is among the highest in the world, nearly two thirds of the fines imposed by the Commission in cartel cases since 2006 stayed below 0,99 % of global annual turnover, thus well below the allowed ceiling of 10 % of a company's annual worldwide	Although the follow-up does not mentions paragraph 75, the Commission states that it [...] takes note of the European Parliament's call for an evaluation of the deterrent effect of fines. Rigorous enforcement and the knowledge and experience built up in previous cases remain essential parts of the Commission's enforcement toolbox and the Commission is working on identifying possible ways to assess the deterrent effects of its fining policy.		It is unclear to what extent the Commission kept its promise to work 'on identifying possible ways to assess the deterrent effects of its fining policy'.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	turnover <sup>38</sup> ; calls on the Commission to evaluate the deterrent effects of its fines and to consider imposing fines of up to 40 % of global annual turnover in serious cartel cases;				
41)	78. Suggests looking into ‘killer acquisition’ practices that could jeopardise innovation and the flourishing of European start-ups and small enterprises; welcomes in this regard the initiative of the Commission to encourage greater use of the ‘Dutch clause’ of Article 22 of the EC Merger Regulation and to start accepting referrals from national competition authorities of mergers that are worth reviewing at EU level; calls on the Commission to review and issue guidelines on its referral practice based on the aforementioned Article, in parallel with the obligation to inform about concentrations provided for in the Digital Markets Act;	The European Parliament calls on the Commission to review and issue guidelines on its referral practices based on Article 22 Regulation 139/2004 (paragraph 78). The Commission published new guidance on referrals under Article 22 in March 2021. Member States may refer any merger case to the Commission, even in instances where they do not have jurisdiction, provided that the concentration affects trade between Member States and threatens to significantly affect competition within the territory of the Member State making the request. As a result, the Commission may be asked to review transactions between companies that have limited turnover but may nevertheless have a significant impact on competition in the EU. The purpose of Article 22 Regulation 139/2004 is to give the Member States and the Commission the flexibility to examine proposed concentrations at EU level, when the relevant legal requirements are met and this is considered appropriate. This approach might allow the Commission to review some so-called “killer acquisitions”, which would otherwise fall below the existing notification thresholds [...].		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (guidance on referrals).	
42)	80. Welcomes in this regard the Directive on unfair trading practices in business-to-business relationships in the agricultural and food supply chain <sup>39</sup> as an important first step to ensure	The Commission is closely monitoring the transposition and implementation of the Directive (EU) 2019/633 of the European Parliament and of the Council of 17 April 2019 on unfair trading practices in business-to-business

3)	<p>110. Takes note of the ECA’s special report no 3/2019 entitled ‘European Fund for Strategic Investments: Action needed to make EFSI a full success’, in particular its observations on the need for comparable performance and monitoring indicators for all EU financial instruments and budgetary guarantees; calls on the Commission to ensure proper follow-up in collaboration with the EIB, as a major implementer in the context of InvestEU;</p>	<p>Under the 2021-2027 Multiannual Financial Framework (MFF), InvestEU consolidates nearly 30 financial instruments, budgetary guarantees and advisory initiatives representing the majority of the financial instruments and budgetary guarantees funded by the EU budget. Annex III of the InvestEU regulation includes the list of key performance and monitoring indicators to be reported on. In addition, the annex to Communication on the Performance Framework for the EU budget under the 2021-2027 MFF provides additional information on this set of indicators including the methodology to define the baselines and targets.</p> <p>The Commission is currently in the process of negotiating the guarantee agreement with the EIB Group for the InvestEU implementation. The agreement will include all the key performance and monitoring indicators as per Annex III of the InvestEU Regulation. The Commission has also drafted the InvestEU leverage and multiplier methodology which provides a framework linking the underlying available InvestEU contribution with the amount of financing provided by the implementing partners under InvestEU and the amount of total InvestEU eligible investment that is expected to be mobilised by such financing in line with the definitions of leverage and multiplier effect from the Financial Regulation.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">performance framework for the EU budget under the 2021-2027 MFF</a>).</p> <p>The negotiations on the guarantee agreement with the EIB Group are still ongoing.</p>	

4.1.12.11. ECON Resolution 11: EP resolution of 8 July 2021 on review of the macroeconomic legislative framework

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Review of the macroeconomic legislative framework	8/7/2021 <a href="#">T9-0358/2021</a> <a href="#">2020/2075(INI)</a> ECON	<a href="#">SP(2021)626</a>	Final reply (SP) received on 27 October 2021	Mixed reply			
1)	1. Calls on the Commission to relaunch the public debate on the review of the European economic governance framework and to come forward with comprehensive, forward-looking legislative proposals as a result of the review; notes that the review of the economic governance framework was put on hold due to the pandemic;	<p>The pandemic has significantly changed the context of the public debate, with higher levels of debt and deficit and significant output losses, increased investment needs and the related introduction of new policy tools at EU level, notably the Recovery and Resilience Facility (RRF) and the Support to mitigate Unemployment Risks in an Emergency (SURE). Moreover, the general escape clause (GEC) was used for the first time in the implementation of the fiscal surveillance.</p> <p>In addition, the COVID-19 crisis has also called for a stronger forward-looking perspective in our MIP surveillance, which has been pursued for this past year, given the very unusual economic circumstances and exceptional uncertainty. It has also had an important impact on labour markets. The sharp increase in the unemployment rate has been contained by the significant support measures, while the social impact (poverty risks, inequalities) is not yet fully visible.</p> <p>Therefore, the crisis has highlighted the relevance and importance of many of the challenges that the Commission sought to discuss and address in the public debate. Relaunching the public consultation on the economic governance framework will allow the Commission to reflect on these challenges and draw lessons (paragraph 1).</p> <p>[...]</p>				<p>Citizens, organisations and public authorities were invited to submit their contributions on the <a href="#">economic governance review</a> until 31 December 2021.</p> <p>The Commission aims to provide orientations on possible changes to the economic governance framework with the objective of achieving a broad-based consensus on the way forward well in time for 2023.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In reply to points 8-10, the Commission states additionally that [i]n its February 2020 Review, the Commission set out a number of issues for the public debate, based on the experience with the legislation so far. One of these questions is: "What is the appropriate role for the EU surveillance framework in incentivising Member States to undertake key reforms and investments needed to help tackle today and tomorrow's economic, social, and environmental challenges while preserving safeguards against risks to debt sustainability?" This includes re-assessing the appropriateness of the current flexibility clauses in terms of their scope and eligibility, in order to facilitate the right type and level of investment while preserving debt sustainability.</p> <p>Relaunching the public debate on the economic governance framework when the recovery takes hold, will allow the Commission to reflect on the challenges identified in the Commission's Review of February 2020 and draw lessons from the crisis.</p>			
2)	8. Calls on the Commission to provide clear fiscal policy guidelines for Member States during the period of activation of the general escape clause aimed at achieving prudent medium-term fiscal positions and ensuring fiscal sustainability in the medium term [...]	<p>Consolidated reply to point 8-10</p> <p>The Commission provided clear fiscal policy recommendations to the Member States for 2022 and the medium term as part of its 2021 spring package. These recommendations were adopted by the Council on 18 June 2021. More precise quantified guidance for the years to follow should be provided in 2022, once the degree of uncertainty has sufficiently declined. Country-specific situations will continue to be taken into account after the deactivation of the general escape clause.</p>		As announced by the Commission in <a href="#">March 2021</a> , precise guidance should be provided in 2022.	
3)	9. Considers that economic indicators and adjustment paths need to be implemented	In its February 2020 Review, the Commission set out a number of issues for the public debate, based on the			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	cautiously, and therefore calls for the <i>Vade Mecum</i> and the code of conduct of the Stability and Growth Pact to be revised; stresses that fiscal guidance should avoid pro-cyclical biases, promote upward convergence, strengthen a sustainable, inclusive, green and digital recovery, by contributing to the European Green Deal and to the implementation of the European Pillar of Social Rights, consider differing situations calls on the Commission, in the updates of the implementation guidelines of the Stability and Growth Pact, to provide NGEU-loan-financed expenditure with the same treatment as for the European Fund for Strategic Investments (EFSI) in the context of the Commission communication on flexibility [...]	<p>experience with the legislation so far. One of these questions is: "What is the appropriate role for the EU surveillance framework in incentivising Member States to undertake key reforms and investments needed to help tackle today and tomorrow's economic, social, and environmental challenges while preserving safeguards against risks to debt sustainability?" This includes re-assessing the appropriateness of the current flexibility clauses in terms of their scope and eligibility, in order to facilitate the right type and level of investment while preserving debt sustainability.</p> <p>Relaunching the public debate on the economic governance framework when the recovery takes hold, will allow the Commission to reflect on the challenges identified in the Commission's Review of February 2020 and draw lessons from the crisis (paragraphs 8-10).</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point.	
4)	12. Calls on the Commission to ensure that Member States develop credible exit strategies from the crisis-related measures, while not pre-empting future fiscal trajectories;	<p>As regards Member States' exit strategies from the crisis-related measures, it is important to avoid a premature and abrupt withdrawal of fiscal support. At the same time, a belated withdrawal could increase unwarranted side effects, postponing the transition to a more sustainable and future-proof economy. Moreover, coordination of national fiscal policies is essential to support the economic recovery. The general escape clause will remain active in 2022 and is expected to be deactivated in 2023.</p> <p>In 2021 and 2022, the fiscal stance, taking into account national budgets and the Recovery and Resilience Facility, should be supportive excluding the impact of the withdrawal of the COVID-19 emergency measures from the estimate of the fiscal stance. At the same time, fiscal policies should become more differentiated as of 2022, taking into account country-specific situations.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The Commission agrees that fiscal measures should maximise support to the recovery without pre-empting future fiscal trajectories. Therefore, measures should avoid creating a permanent burden on public finances. When the Member States introduce permanent measures, they should properly fund them to ensure budgetary neutrality in the medium term. Also, support measures should become more targeted and focused, promoting a resilient and sustainable recovery.</p> <p>The Commission agrees that, in the medium term, it is important to maintain a credible and coordinated approach. In particular, it has recommended that, when economic conditions allow, the Member States should pursue a fiscal policy aimed at achieving prudent medium-term fiscal positions and ensuring fiscal sustainability in the medium term. Investment, including in human capital, should be enhanced to boost growth potential and ensure an inclusive recovery (paragraph 12).</p>			
5)	34. Calls on the Commission to pursue a comprehensive and transparent sovereign debt sustainability analysis (SDSA) in order to support policymakers' decision to set an appropriate country-specific, clear and transparent adjustment path [...]	<p>The Commission agrees with the need to assess country-specific debt sustainability risks and has developed since the Global Financial Crisis a state-of-the-art framework in that regard. This framework, based on a multi-dimensional approach, provides a comprehensive assessment of debt sustainability risks over the short, medium and long term. The Commission publishes the results every year in its Debt Sustainability Monitor, along with transparent information on the assumptions and methodologies.</p> <p>The Commission debt sustainability analysis (DSA) informs the implementation of EU fiscal rules. For example, it is considered as an important relevant factor in the excessive deficit procedure. The recent report under Article 126(3) of</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the Treaty on the Functioning of the European Union (TFEU) prepared by the Commission includes the result of the medium-term (10 year) projections of debt under an unchanged policy baseline scenario. It also has a role in the preventive arm of the Stability and Growth Pact to set up the appropriate fiscal adjustment path towards the country-specific medium-term budgetary objective.</p> <p>The Commission DSA relies on the most innovative tools and techniques, including a wide range of stress tests and stochastic simulations. It also provides a granular analysis of various mitigating and aggravating risk factors, such as the composition of debt, government gross financing needs, the presence of public assets, and contingent and implicit liabilities. Finally, the Commission analysis pays particular attention to the implications of an ageing population (paragraph 34).</p>		<p>request (Commission debt sustainability analysis, <a href="#">debt sustainability monitor</a>).</p>	
6)	<p>35. Invites the Commission during the review process to reflect on the role of fiscal policy in the European economy addressing the shortcomings already identified in the EU fiscal framework before the outbreak<sup>42</sup>, and also in view of the legacies of the pandemic [...]</p>	<p>Consolidated reply to point 35-36</p> <p>The Commission's Communication on the Economic Governance Review issued in February 2020 identified a number of well-recognised challenges with the fiscal framework and its implementation. These challenges have been usefully reiterated and highlighted in the resolution of the European Parliament. The COVID-19 crisis also highlighted the relevance of these challenges identified by the Commission. At the same time, the pandemic has changed the context of the public debate on the EU fiscal rules, not least due to the significant increase in public debt in the EU, innovations in the EU's architecture, and increased investment needs, in particular in relation to the</p>		<p>In a public consultation, citizens, organisations and public authorities were invited to submit their contributions on the <a href="#">economic governance review</a> until 31 December 2021.</p> <p>The Commission aims to provide orientations on possible changes to the economic governance</p>

		climate and digital transitions. The identified challenges will be discussed as part of the public consultation on the economic governance review, in line with the issues for public debate set out in the Commission's Review.		framework with the objective of achieving a broad-based consensus on the way forward well in time for 2023.	
7)	36. Calls on the Commission to assess how to promote fiscal sustainability and counter-cyclical rules, and to consider simplifying the framework and improving the Commission's autonomy in the enforcement of the rules within a more accountable framework with stronger ownership [...].	Consolidated reply to point 35-36 The Commission's Communication on the Economic Governance Review issued in February 2020 identified a number of well-recognised challenges with the fiscal framework and its implementation. These challenges have been usefully reiterated and highlighted in the resolution of the European Parliament. The COVID-19 crisis also highlighted the relevance of these challenges identified by the Commission. At the same time, the pandemic has changed the context of the public debate on the EU fiscal rules, not least due to the significant increase in public debt in the EU, innovations in the EU's architecture, and increased investment needs, in particular in relation to the climate and digital transitions. The identified challenges will be discussed as part of the public consultation on the economic governance review, in line with the issues for public debate set out in the Commission's Review.		In a public consultation, citizens, organisations and public authorities were invited to submit their contributions on the <a href="#">economic governance review</a> until 31 December 2021.  The Commission aims to provide orientations on possible changes to the economic governance framework with the objective of achieving a broad-based consensus on the way forward well in time for 2023.	
8)	48. Welcomes the NGEU and SURE initiatives; stresses that the NGEU is financed through debt issuance guaranteed by the EU budget; underlines that EU-issuance of debt <sup>43</sup> will provide a new supply of European high-quality safe assets; calls on the Commission to fully exploit the potential of the Recovery Package and the SURE instrument to improve convergence between Member States, promote	NextGenerationEU (NGEU) is a EUR 806,9 billion (in current prices) temporary instrument to help repair the immediate economic and social damage brought about by the coronavirus pandemic and to emerge stronger from the crisis and transform the economies. The largest of its share is devoted to the Recovery and Resilience Facility (RRF). Having entered into force on 19 February 2021, the Recovery and Resilience Facility will make available EUR 723,8 billion non-repayable and loan support for reforms			

<sup>43</sup> NGEU and SURE bonds.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>EU policies and reduce the EU's vulnerability to economic shocks [...]</p>	<p>and investments in Member States. This breaks down into non-repayable support worth a total of EUR 338 billion and EUR 385,8 billion in loans. The RRF helps the European Union recover from the economic and social damage of the crisis, and make EU Member States' economies and societies more sustainable, resilient and better prepared for a green and digital future.</p> <p>In line with the Regulation establishing the RRF (Regulation (EU) 2021/241), the Member States have to submit their recovery and resilience plans to the European Commission. The reforms and investments included in these plans should be implemented by 2026 and should address a significant subset of relevant country specific recommendations issued by the Council in 2019 and 2020. The Member States are required to dedicate at least 37% of the costs of their recovery and resilience plans to investments and reforms directed to climate objectives and a minimum of 20% to the digital transition. To date, the Commission has officially received 25 recovery and resilience plans. Work on the national plans still to be submitted continues and discussions are ongoing. After a thorough assessment, the Commission has tabled proposals for a positive assessment of 20 plans to the Council for adoption. As per Article 20 of the RRF Regulation, the Council has, as a rule, four weeks to adopt the decision for the approval of the positive assessment of the plans. To date, the Council has already approved 18 national recovery and resilience plans, and the Commission has executed first disbursements of pre-financing to most of these 18 Member States.</p> <p>The Commission agrees that it is important to have transparency about the repayment of NextGenerationEU</p>		<p>No further/ specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and SURE bonds. Repayments of the Union’s borrowing under NextGenerationEU and SURE will be done by Member States benefitting from RRF and SURE loans and by the Union budget for the NextGenerationEU non-repayable support. The schedule for RRF and SURE loan repayments will be set out in the relevant loan agreement between the Commission and the beneficiary Member State. This schedule will follow a harmonised approach across all Member States requesting a loan. The amounts of loan repayments per Member State will depend on the amount requested and the date when the Member State requests the disbursements.</p> <p>The repayments of the Union budget for NextGenerationEU non-repayable support will be determined by the budgetary appropriations made available in the context of future Multiannual Financial Frameworks and the annual budgetary procedures. Without prejudice to the decision by the budgetary authority, the Commission assumes in its maturity planning that these repayments would be around EUR 15 billion per year.</p> <p>The NextGenerationEU repayment streams will enable the Commission to target a maturity profile of the bonds issued under NGEU in line with a predictable and nearly linear decline in financial liabilities. For SURE, the maturity profile is fully aligned with the corresponding loan repayments (back-to-back principle) and the annual ceiling of EUR 10 billion maximum repayments per year as set out in the SURE Regulation (paragraph 48).</p>

<b>The implementation of the EU requirements for exchange of tax information: progress, lessons learnt and obstacles to overcome</b>	16/09/2021 <a href="#">T9-0392/2021</a> <a href="#">2020/2046(INI)</a> ECON	<a href="#">SP(2021)709</a>	Final reply (SP) received 18 January 2022	Mixed reply			
1)	3. Notes that the better implementation and application of the rules by tax authorities are necessary in order to minimise the risk of the non-declaration of income and therefore calls on the Commission to guarantee better enforcement of the rules; notes, however, that some types of income and assets are still excluded from the scope, which presents a risk of circumventing tax obligations; calls on the Commission to assess the need and the most appropriate way, and to present concrete proposals, to include the following ownership information, items of income and non-financial assets in the AEOI: (a) the beneficial owners of immovable property and companies; (b) capital gains related to immovable property and capital gains related to financial assets, including currency trading, in particular to find ways for tax administrations to be better informed to identify realised capital gains; (c) non-custodial dividend income; (d) non-financial assets such as	<p>Consolidated reply points 1-16</p> <p>The Commission has continuously worked to improve and expand the scope of the DAC. This has meant closely following the developments at the level of the Organisation for Economic Cooperation and Development (OECD), but also going further in some cases.</p> <p>[...]</p> <p>The Commission proposal, which was subsequently adopted as Directive 2021/514 (DAC7)<sup>44</sup>, included peer-to-peer lending as one of the activities in scope incomes stemming from which the platform operator has to report, but this was not retained in the final text which was adopted by the Council. The reporting of non-financial assets such as cash, art, gold or other valuables held at free ports, customs warehouses or safe deposit boxes as well as ownership of yachts and private jets is currently being assessed by the Commission services in the context of its work to evaluate</p>				Because of a general character of the promise, it is unclear whether the Commission will take action with respect to the reporting on the aspects requested in the resolution.	

<sup>44</sup> Council Directive (EU) 2021/514 of 22 March 2021 amending Directive 2011/16/EU on administrative cooperation in the field of taxation (OJ L 104, 25.3.2021, p. 1)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	cash, art, gold or other valuables held at free ports, customs warehouses or safe deposit boxes; (e) ownership of yachts and private jets; and (f) accounts at larger peer-to-peer lending, crowdfunding and similar platforms;	the current situation on free zones from a customs and tax point of view.			
2)	4. Observes that the effectiveness of DAC1 is seriously constrained by the fact that Member States are only required to report at least two categories of income; takes note of the recent amendment that obliges the Member States to exchange all information that is available, on at least four categories of income with respect to taxable periods as of 2024; calls on the Commission, after an impact assessment, to make it mandatory to report on all categories of income and assets in the scope; (...)	Consolidated reply points 1-16  The scope of the DAC1 was recently expanded by adding a sixth income category (royalties) to those that are reportable. In addition, the minimum number of income categories that will be compulsory to exchange as of 1 January 2024 has been raised to four categories. Further expanding the scope of DAC1 would be relevant, but requires further reflection for some categories, as explained below. The Commission considers that it should give priority to making all categories of income that are already covered in DAC1 compulsory to exchange, before adding further categories to the list. The Commission will examine whether to include non-custodial dividend income.		Because of a general character of the promise, it is unclear how the Commission wants to reach the objective of making all categories of income that are already covered in DAC1 compulsory to exchange.	
3)	6. Observes that the definition of reporting Financial Institutions (FIs) and types of accounts that need to be reported in DAC2 involves a risk of circumvention and increased bureaucracy; calls for an assessment and, if appropriate, a proposal by the Commission to extend the reporting obligations to other relevant types of FIs, while avoiding further red tape, but to reconsider the qualification of closely held managed Investment Entities as FIs, to review the definition of excluded accounts and to remove the thresholds applicable to pre-existing entity accounts; recalls that with adequate IT	Consolidated reply points 1-16  As regards the recommendations concerning Financial Institutions (FIs) and types of accounts covered by the		Too little time since the adoption of the EP resolution to assess the action.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	systems in place, a practice of zero exemptions and zero thresholds can contribute to less bureaucracy; calls on the Commission to assess the obligation for FIs, where there is no information to report, to file nil returns with the objective of decreasing bureaucracy;	DAC2 <sup>45</sup> , the Commission agrees that there is a need to ensure that possible loopholes are closed. However, the OECD is currently assessing the need for review concerning these specific aspects, to which the Commission is contributing. The discussions within the OECD have not yet been concluded. It is therefore premature to table proposals for revising the DAC as regards those aspects.			
4)	9. Regrets that the summary information in the central directory for ACBRs and APAs is often too brief to be used without having to request additional information; calls on the Commission to develop guidelines on what tax administrations should provide as a summary, which should include all relevant direct and indirect tax implications such as the effective tax rates;	Consolidated reply points 1-16  The Commission agrees that there is scope for widening the application of Directive 2015/2376 (DAC3) to further categories of rulings. With the adoption of DAC7, the requirements on the content and quality of the summaries exchanged under DAC3 have been strengthened, which should improve possibilities for receiving tax authorities to detect tax avoidance schemes. In addition, the Commission is currently assessing whether an extension of the scope of the rulings to be exchanged to include rulings provided to natural persons should be proposed as part of DAC8.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (adoption of <a href="#">DAC7</a> , including provisions on the information on ACBRs and APAs).	
5)	10. Deplores the practice of shadow tax rulings in Luxembourg, as exposed by the LuxLetters revelations, which leads to informal arrangements not being reported as required by DAC3; urges the Commission to urgently assess a potential breach of the DAC3 requirements by	Consolidated reply points 17-24  The Commission is investigating the issues referred to in the resolution and assessing the scope for initiating infringement procedures.		Because of a general character of the promise, it is unclear whether the Commission is assessing potential breaches of DAC.	

<sup>45</sup> Council Directive 2014/107/EU of 9 December 2014 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (OJ L 359, 16.12.2014, p. 1)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Luxembourg and other Member States with similar practices and to launch infringement proceedings if necessary;				
6)	11. Welcomes the fact that a large number of countries, including many Member States, are releasing anonymised and aggregated information, extracted from the CbCRs as required under DAC4 or Action 13 of the BEPS Action Plan; regrets that a minority of Member States are not publishing this information in international databases; calls for a harmonised approach in this regard and insists that the Commission integrate this requirement into the future revision of the DAC;	Consolidated reply points 1-16  No specific reply is provided to this particular point.		Not mentioned.	
7)	17. [...] calls on the Commission to extend its infringement proceedings to all Member States offering golden visas; Calls for stronger enforcement procedures at Member State level and to set up domestic systems of penalties for incorrect or incomplete reporting with an effective deterrent effect; Calls on the Commission to include on the spot visits in Member States and to assess the effectiveness of their monitoring schemes;	Consolidated reply points 17-24  The Commission is investigating the issues referred to in the resolution and assessing the scope for initiating infringement procedures.  Concerning the golden visa schemes, the situation is that even though a Member State may have provided a golden visa scheme, the Commission may not be able to demonstrate an infringement of DAC2, as it is the individual account holder and the FI that have the obligation to ensure that the correct due diligence procedures have been carried out, while the Member States have the responsibility for ensuring that they have rules in place which effectively implement DAC2 reporting, including enforcement provisions to address non-compliance. Taking this into		The Commission is working on a <a href="#">proposal for a DAC8</a> proposal that could include provisions on sanctions and compliance measures.  The Commission is also working on a system of on the spot visits with the aim of identifying best practices as well as Member States or areas where there is a need to improve data quality and data use.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>account it would be very difficult to carry out a successful infringement procedure against a Member State on this particular aspect for DAC2. However, this issue is currently being dealt with in the context of the European Semester.</p> <p>As regards sanctions and compliance measures, the issue is currently under consideration in the context of the DAC8 proposal. The Commission will also check that all Member States have compliance measures that correspond to the requirements of the directive. In case deficiencies are detected, infringement procedures could be initiated. The reviews from the Global Forum and the OECD will be a useful complement in the analysis of these compliance measures.</p> <p>Reply to points 25-38</p> <p>Moreover, and based on the recommendations of the ECA and the ECON Committee, the Commission is working with the Member States to set up a system of on the spot visits with the aim of identifying best practices as well as Member States or areas where there is a need to improve data quality and data use. The aim is to target areas where there is a need for improvement using the yearly assessment of automatic exchange of information. The objective is to start carrying out the visits in 2022.</p>			
8)	24. Calls on the European Commission to present, in due time, an evaluation of the interaction between AML and DAC;	<p>Consolidated reply points 17-24</p> <p>The provisions of DAC5 ensures that information collected under the AML rules can be used for tax purposes. The DAC and AMLD pursue different objectives and operate separate regulatory regimes. However, Article 27 of the DAC provides that the Commission shall submit a report on its application</p>		Because of a general character of the promise, it is unclear whether the Commission will be able to assess interaction between AML and DAC.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		to the European Parliament and to the Council every five years. In case the Commission finds any cross-effects between AML and DAC, those could be recorded in one of the future reports, whether through the next evaluation process in 2023 or later.			
9)	25.[...] urges the Commission to step up its activities in this regard and to take direct and effective actions to address the lack of quality of data sent by Member States, further develop its guidance for Member States on implementing the DAC legislation, performing risk analysis and using tax information received, and to launch infringement procedures, using, among others, the Global Forum <sup>46</sup> and Financial Action Task Force reviews;  Calls on the European Commission to prioritise the issue of improving data quality in upcoming reviews of the DAC framework;	Consolidated reply points 25-38  The Commission has launched a number of initiatives under the Fiscalis programme with the aim to improve data quality and the use of data. The results of the work carried out by these groups will be available in the form of reports to be presented before the end of 2021 and further actions will be based on these reports. In addition, as announced in the 2020 Tax Action Plan <sup>47</sup> , an expert team for improving data analytics is being set up and will start its work by the end of 2021 with an expected outcome within 24 months.  Moreover, and based on the recommendations of the ECA and the ECON Committee, the Commission is working with the Member States to set up a system of on the spot visits with the aim of identifying best practices as well as Member States or areas where there is a need to improve data quality and data use. The aim is to target areas where there is a need for improvement using the yearly assessment of automatic exchange of information. The objective is to start carrying out the visits in 2022.		The <a href="#">Fiscalis Work Programme for 2021, 2022, and 2023</a> states that the implementation of the expert team for DAC AEOI data analysis and enhanced use of data with data analytics approach is planned to start in Q4 2021.	

<sup>46</sup> Global Forum on Transparency and Exchange of Information for Tax Purposes.

<sup>47</sup> Commission communication of 15 July 2020 on an Action Plan for fair and simple taxation supporting the recovery strategy (COM (2020)0312).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	<p>27. [...] calls on the Commission to closely monitor Member States and launch infringement procedures until all Member States are fully compliant; looks forward to the Global Forum peer review of the practical enforcement of the CRS and</p> <p>Calls on the Commission and Member States to prepare diligently for this process;</p>	<p>Consolidated reply points 25-38</p> <p>The Commission services follow the outcome of the Global Forum peer reviews closely. Deficiencies identified in that process are followed up in relation to DAC2. However, even though the Common Reporting Standard (CRS) and DAC2 have been designed to cover the same reporting and exchanges, the peer reviews of the Global Forum cover more than what is covered by the legal text of DAC2. Deficiencies identified in the peer review process will therefore not always amount to infringements.</p>		<p>No further/ specific actions proposed/promised to be taken by the Commission.</p>	
11)	<p>30. Calls on the Commission in close collaboration with Member States to create a validation tool for TINs; notes that this validation tool would increase the reporting effectiveness of FIs significantly, and thus decrease the compliance costs for these institutions;</p> <p>Calls on the Commission to, after a proper analysis and impact assessment, re-examine the creation of a European TIN; (...)</p>	<p>Consolidated reply points 25-38</p> <p>The use of Tax Identification Numbers (TINs) was an issue only for exchanges under DAC1. TINs have always been requested for DAC2. DAC7 states that for taxable periods starting on or after 1 January 2024, the Member States shall endeavour to include the TIN of residents issued by the Member State of residence in the communication of the information. In the framework of the initiatives under the Fiscalis programme to improve data quality, one project group is proposing in its report a Key Performance Indicator (KPI) benchmark for the sending Member State to check the quality of data, in particular the existence of the TIN. This would also require Member States to develop their IT systems to facilitate TIN validation. The issue of TIN validation replacing Common Reporting Standard (CRS) due diligence procedures is being examined as part of the Common Reporting Standard (CRS) review, taking place in the OECD. The Commission will actively follow this work and consider necessary adaptations to the DAC in the same sense.</p>		<p>Too little time since the adoption of the EP resolution to assess the action.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	<p>31. Takes note of the fact that information exchanged on request (EOIR) has often been found to be incomplete and required further clarifications; regrets that in the framework of the EOIR authorities often take up to six months and longer to provide information from the date of receipt of the request; notes with regret that there are no time limits for any follow-up exchanges, which creates the potential for further delay;</p> <p>Calls on the Commission to revise this provision, including for follow-up requests, to no later than three months; suggests that the Commission is granted the mandate to systematically assess the degree of cooperation of third countries;</p> <p>Calls on the Commission to assess indications that EOIR with several third countries is unsatisfactory, including Switzerland;</p>	<p>Consolidated reply points 25-38</p> <p>No specific reply is provided to this particular point (on follow-up requests)</p>		Not mentioned.	
13)	<p>32. [...] expects the Commission to deploy with no further delay all legal and non-legal tools to ensure legislation is being properly implemented;</p> <p>Calls on the Commission to launch infringement procedures until all Member States are fully compliant;</p> <p>Calls, therefore, on the Member States to fully commit to the DAC's objectives and the implementation of EOI best practices;</p>	<p>Consolidated reply</p> <p>The Commission is investigating the issues referred to in the resolution and assessing the scope for initiating infringement procedures.</p> <p>[...]</p> <p>As regards sanctions and compliance measures, the issue is currently under consideration in the context of the DAC8 proposal. The Commission will also check that all Member States have compliance measures that correspond to the requirements of the directive. In case deficiencies are detected, infringement procedures could be initiated. The</p>		Because of a general character of the promise, it is unclear whether the Commission will launch infringement procedures.

	Commission to further consider this aspect of the DAC in its future evaluations;	current work in a Fiscalis group to agree on key performance indicators would be an important step towards an effective evaluation.			

4.1.12.13. ECON Resolution 13: EP resolution of 7 October 2021 on Banking Union annual report 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Banking Union annual report 2020</b>	7/10/2021 <a href="#">T9-0415/2021</a> <a href="#">2020/2122 (INI)</a> ECON	N.A. <sup>51</sup>					
1)	8. [...] calls on the Commission to make further efforts to better align financial market activity with sustainability objectives and environmental, social and governance (ESG) criteria, including a legislative proposal on the development of sustainability ratings based on such criteria; calls on the Commission to pursue its efforts in the field of sustainable finance by adopting the remaining delegated acts under the EU Taxonomy Regulation <sup>52</sup> and the Disclosure Regulation <sup>53</sup> and applying, inter alia, a robust ‘do no significant harm’ methodology;						
2)	13. [...] calls on the Commission to examine a legally binding dividend and share buyback tool as a supervisory tool in times of crisis;						

<sup>51</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

<sup>52</sup> Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment (OJL198, 22.6.2020, p. 13).

<sup>53</sup> Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (OJL317, 9.12.2019, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	14. Invites the Commission, as well as national and European supervisory authorities (ESAs), to prepare for an expected deterioration in the asset quality of banks [...]				
4)	16. Considers that an integrated Banking Union must be contingent on a well-functioning single market for retail financial services; calls on the Commission to assess the obstacles and barriers that arise for consumers when availing of retail banking products such as mortgage loans on a cross-border basis and to propose solutions to ensure that consumers can benefit from retail financial services across borders [...]				
5)	20. [...] stresses that the current revision should respect the principle of not significantly increasing overall capital requirements, while at the same time strengthening the overall financial position of European banks; recalls its resolution of 23 November 2016 on the finalisation of Basel III <sup>54</sup> and calls on the Commission to act on the recommendations therein when drafting the legislative proposals; Calls on the Commission to introduce measures aimed at increasing banks' lending to the real economy, in particular to SMEs, and to finance the recovery, along with the digital and environmental transition in Europe;				

<sup>54</sup> OJC 224, 27.6.2018, p. 45.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	21. Highlights that there is considerable interconnectedness between the non-bank financial intermediation sector and the 'traditional' banking sector, which raises concerns of systemic risk given the lack of appropriate regulation and supervision of the former; stresses that the recent pandemic shock illustrated that the non-bank sector can amplify market volatility and price dislocation, particularly when market liquidity comes under pressure; calls on the Commission to consider whether additional macro-prudential tools are required, namely the development of ex ante liquidity management tools and careful analysis of existing leverage measures;				
7)	24. Calls on the Commission to review the eligibility criteria with the objective of attracting a higher number of applications from women;				
8)	37. Is alarmed that recent banking crises have revealed that credit institutions have routinely mis-sold bonds and other financial products to retail customers; regrets that the enforcement of the BRRD provisions on consumer protection with respect to minimum requirements for own funds and eligible liabilities (MREL) has been piecemeal; urges the Commission to assess the mis-selling of financial products by banking institutions and, based on the findings, to come up with appropriate proposals, including in the upcoming BRRD revision;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	38. [...] calls on the Commission to take into account and follow up on the conclusions of the Financial Stability Board's 2021 evaluation of the effects of too-big-to-fail reforms on the financial system;				
10)	46. [...] calls on the Commission to launch infringement procedures for the remaining cases of lack of transposition and implementation of the AMLDs; takes note of the EBA's second mandate to build a database on AML, which is expected to be developed in 2021, and to enhance cooperation and the exchange of information across European authorities [...]				
11)	47. Welcomes the Commission's action plan for a comprehensive Union policy on preventing money laundering and terrorism financing, published on 7 May 2020; calls on the Commission to swiftly adopt its AML legislative package; urges the Commission to present a proposal to establish a European AML supervisor; stresses that the scope of the AML framework should cover crypto-asset issuers and providers; invites the Commission to consider the creation of a European Financial Intelligence Unit (FIU);				
12)	57. [...] calls on the Commission, therefore, to bring more clarity to the least-cost principle and to the conditions for the use of DGS funds;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	58. Notes that the current diversity of insolvency regimes is a source of uncertainty as regards the outcome of liquidation procedures; is of the opinion that in order for the Banking Union to function effectively, bank insolvency laws need to be further harmonised; invites the Commission, following detailed study and consultation with national authorities and parliaments, to reflect on promoting the further harmonisation of specific aspects of existing national insolvency laws, as well as the conditions for the use of external funding, so as to ensure the alignment of incentives and a level playing field;				
14)	65. Calls on the Commission to take further steps to relaunch the negotiations on the EDIS through a roadmap-based work plan; calls for a firm commitment on the part of Member States to work for an agreement that is consistent with Union interests as a whole; declares its commitment to working towards an agreement on the EDIS, while aiming to continue its work on risk-reducing measures;				
15)	66. Calls on the Commission to duly take into account the role of institutional protection schemes in protecting and stabilising member institutions;				

## 4.1.12.14. ECON Resolution 14: EP resolution of 7 October 2021 on reforming the EU policy on harmful tax practices (including the reform of the Code of Conduct Group)

3)	9. Calls on the Commission to come forward with an impact assessment of the future outcome of the international tax negotiations; recalls the Commission’s commitment to propose a similar solution to the Pillar II solution on minimum effective taxation, whether an agreement is reached or not at OECD Inclusive Framework level;				
4)	11. Calls on the Commission to produce guidelines on how to design fair and transparent tax incentives with fewer risks of distorting the Single Market, and that ensure fair competition and favour job creation, notably by looking at the type (profit-based or costs-based), the temporal nature (temporary or permanent), the geographical limitation (economic zones) and the intensity (full or partial exemptions) of such incentives; takes note of a study commissioned by the European Economic and Social Committee on the reduction of corporate tax rates and its impact on revenues and growth <sup>56</sup> ;				
5)	12. [...] calls on the Commission, in this regard, to guarantee that the implementing rules on a minimum effective tax rate will be designed without excessive compliance costs;				

<sup>56</sup> Baert, P., Lange, F., Watson, J., The Role of Taxes on Investment to Increase Jobs in the EU – An Assessment of Recent Policy Developments in the Field of Corporate Taxes, May 2019.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	14. Highlights the need to tax multinational corporations on the basis of a fair and effective formula for the allocation of taxing rights between Member States; regrets in this regard that the Council did not agree on the CCTB and CCCTB proposals; urges the Commission to adjust the timeline of the future BEFIT legislative proposal to the international tax agenda; is concerned by the lack of a clear strategy to ensure that the new framework for business taxation in the Union will achieve support from the Member States;				
7)	17. Calls on the Commission to evaluate the effectiveness of patent boxes and other intellectual property (IP) regimes under the new nexus approach defined by Action 5 of the BEPS Action Plan on HTP, including the impact on revenue losses;  Calls on the Commission to come forward with proposals in the event that the evaluation establishes an absence of impact of IP regimes on real economic activities [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	<p>26. Invites the Commission and the Member States to consider a 'Framework on Aggressive Tax Arrangements and Low Rates' (FATAL) along the following lines, and which would replace the current CoC:</p> <p>A. Without prejudice to the respective spheres of competence of the Member States and the Union, this framework concerns those measures which affect, or may affect, in a significant way the location of business activity in the Union and the relocation of personal income and capital (individual taxation regimes).</p> <p>Business activity in this respect also includes all activities carried out within a group of companies.</p> <p>The tax measures covered by the framework include both laws or regulations and administrative practices.</p> <p>B. Within the scope specified in paragraph A, tax measures which provide for a significantly lower effective level of taxation, including zero taxation, than those levels which generally apply in the Member State in question, or below any minimum effective level of tax agreed in the Inclusive Framework on BEPS or in international forums where the EU is represented, are to be regarded as potentially harmful and therefore covered by this code (gateway criterion).</p> <p>Such a level of taxation may operate by virtue of the nominal tax rate, and/or the tax base or any other relevant factor determining the effective tax rate.</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>When assessing whether such measures are harmful, account should be taken of, inter alia:</p> <ol style="list-style-type: none"> <li>1. whether advantages are accorded only to non-residents or in respect of transactions carried out with non-residents; or</li> <li>2. whether advantages are ring-fenced from the domestic market, so they do not affect the national tax base; or</li> <li>3. whether advantages are granted even without any real economic activity and substantial economic presence within the Member State offering such tax advantages, as defined by the European Commission and based on a proportionate substance requirement evolving progressively as reported income increases within the Member State concerned. Particular attention will be given to intellectual property regimes in this regard;</li> <li>4. whether the rules for profit determination in respect of activities within a multinational group of companies depart from internationally accepted principles, notably the rules agreed upon within the OECD; or</li> <li>5. whether the tax measures lack transparency, including where legal provisions are relaxed at administrative level in a non-transparent way.</li> </ol> <p>C. Within the scope specified in paragraph A, preferential personal income and capital tax regimes resulting in a significantly lower effective level of taxation, including zero taxation, than those levels which generally apply in the Member State in question are to be regarded as potentially harmful and therefore covered by this</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p>code. Similarly, general personal income and wealth tax regimes that would lead to single market distortion may be covered by the scope and assessed.</p> <p>Standstill and rollback</p> <p>Standstill</p> <p>D. Member States commit themselves not to introduce new tax measures, which are harmful within the meaning of this framework. Member States will therefore respect the principles underlying the framework when determining future policy and will have due regard for the review process referred to in paragraphs E to I in assessing whether any new tax measure is harmful.</p> <p>Rollback</p> <p>E. Member States commit themselves to re-examining their existing laws and established practices, having regard to the principles underlying the framework and to the review process outlined in paragraphs E to I. Member States will amend such laws and practices as necessary with a view to eliminating any harmful measures as soon as possible taking into account the Council's and Commission's discussions following the review process.</p> <p>Review process</p> <p>Provision of relevant information</p> <p>F. In accordance with the principles of transparency and openness Member States will inform each other and the Commission of</p>					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>existing and proposed tax measures which may fall within the scope of the framework. In particular, Member States are called upon to provide at the request of another Member State information on any tax measure which appears to fall within the scope of the framework. Where envisaged tax measures need parliamentary approval, such information need not be given until after their announcement to Parliament. The regimes that will be evaluated in the scope of the framework should be notified for information to the European Parliament.</p> <p>Assessment of harmful measures</p> <p>G. Any Member State may request the opportunity to discuss and comment on a tax measure of another Member State that may fall within the scope of the framework. This will permit an assessment to be made of whether the tax measures in question are harmful, in the light of the effects that they may have within the Union. That assessment will take into account all the factors identified in paragraphs B and C.</p> <p>H. The Council also emphasises the need to evaluate carefully in that assessment the effects that the tax measures have on other Member States, inter alia in the light of how the activities concerned are effectively taxed throughout the Union.</p> <p>Insofar as the tax measures are used to support the economic development of particular regions, an assessment will be made of whether the measures are in proportion to, and targeted at, the aims sought. In assessing this, particular attention will be paid to special features and</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>constraints in the case of the outermost regions and small islands, without undermining the integrity and coherence of the Union legal order, including the internal market and common policies. Such assessment would consider the progressive minimum substantial economic presence requirements as defined in paragraph B.</p> <p>Procedure</p> <p>I. A group will be set up jointly by the Council and the Commission to assess the tax measures that may fall within the scope of this framework and to oversee the provision of information on those measures. The Council invites each Member State and the Commission to appoint a high-level representative and a deputy to this group, which will be chaired by a representative of a Member State. The group, which will meet regularly, will select and review the tax measures for assessment in accordance with the provisions laid down in paragraphs E to G. The group will report regularly on the measures assessed. These reports will be forwarded to the Council for deliberation and, if the Council so decides, published. The documents should be communicated to Parliament upon request and disclosed once the evaluation process is over.</p> <p>Enforcement</p> <p>J. Member States are entitled to implement countermeasures that would reduce tax avoidance incentives should a Member State fail to roll back a regime that had been assessed as harmful in the context of this framework within 2 years, and in particular:</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>a) non-deductibility of costs; b) withholding tax measures; c) limitation of participation exemption; d) special documentation requirements, especially regarding transfer pricing;</p> <p>Geographical extension</p> <p>K. The Council considers it advisable that principles aimed at abolishing harmful tax measures should be adopted on as broad a geographical basis as possible. To this end, Member States commit themselves to promoting their adoption in third countries; they also commit themselves to promoting their adoption in territories to which the Treaty does not apply. In this context, the Council and the Commission should rely on criteria on tax transparency, fair taxation and implementation of anti-BEPS measures to establish an EU list of non-cooperative jurisdictions. The Fair taxation criteria should be based on factors identified in paragraphs B and C of this framework.</p> <p>L. Member States with dependent or associated territories, or which have special responsibilities or taxation prerogatives in respect of other territories, commit themselves, within the framework of their constitutional arrangements, to ensuring that these principles are applied in those territories. In this connection, those Member States will take stock of the situation in the form of reports to the group referred to in</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>paragraph H, which will assess them under the review procedure described above.</p> <p>Monitoring and revision</p> <p>M. In order to ensure the even and effective implementation of the framework, the Council invites the Commission to report back to it annually on the implementation thereof and on the application of fiscal State aid. The report should be made publicly available. The Council and the Member States will review the provisions of the framework two years after its adoption;</p>				

### 4.1.13. EMPL

Between July 2019 and December 2021, the **Committee on Employment and Social Affairs (EMPL)** was responsible for twelve 'ordinary' own-initiative reports (INI) and two legislative own-initiatives reports (INL) leading to the adoption of fifteen Parliament's resolutions ('EMPL resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent nine written replies to the Parliament's 12 EMPL resolutions. In nine cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to three EMPL resolutions. Nevertheless, the Commission was still in the deadline to respond formally to these three resolutions. In total, the Commission submitted six specific and three mixed replies. At the cut-off date of this study, the Commission had not yet replied to 59 of Parliament's 315 requests.

### Analysis of the Commission actions

The Commission proposed/promised 102 genuine actions. In 149 cases, no further specific actions were proposed/promised to be taken by the Commission and in 27 cases it remained unclear if an action was carried out. In 17 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 102 actions proposed/promised by the Commission, the Commission already carried out the action in 50 cases. In the 52 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

4.1.13.1. EMPL Resolution 1: EP resolution of 10 October 2019 on employment and social policies of the euro area

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Employment and social policies of the euro area	10/10/2019 <a href="#">T9-0033/2019</a> <a href="#">2019/2111(INI)</a> EMPL	<a href="#">SP(2019)669</a>	Final reply (SP) received 3 February 2020	Specific reply			
1)	1. Calls on the Commission to present a European unemployment benefit reinsurance scheme to protect citizens and reduce the pressure on public finances during external shocks;	<p>Active support to unemployed people is a key principle of the European Pillar of Social Rights, specifically with respect to the right to adequate unemployment benefits of reasonable duration (in line with their contributions and national eligibility rules), and to receive adequate activation support to re-enter the labour market.</p> <p>With a view to promoting upward economic and social convergence, the Commission has developed a benchmarking framework on unemployment benefits and active labour market policies. The framework was agreed with the Member States in the Council's Employment Committee in 2017 and has been used since then in the context of the European Semester.</p> <p>The financial crisis highlighted the limitations that individual euro area Member States have to absorb large asymmetric shocks, even with sound public finances going into the crisis. In these situations, Member States can face financial constraints that hamper their capacity to protect adequately citizens' incomes. The feasibility and the impact of a common unemployment insurance scheme were already assessed by a study financed by the European Parliament in 2014 (The cost of Non-Europe – Common unemployment insurance scheme for the euro area, European Parliamentary Research Service). The Commission has recognised a need for a stabilisation function in its proposals for deepening the <i>Economic and Monetary Union</i> (EMU), notably in the reflection paper on deepening EMU (COM (2017) 291 of 1 March 2017). On 31</p>				<p>With the publication of the <a href="#">Commission's work programme 2020</a>, on 29 January 2020, the Commission announced its intention to put forward a proposal for a European unemployment reinsurance scheme (EUBRS). The work programme estimated that this would be introduced in the fourth quarter of 2020 (legislative, including an impact assessment).</p> <p>Furthermore, in the beginning of April 2020 as part of the comprehensive economic response to the coronavirus pandemic, the Commission proposed <a href="#">temporary support to mitigate unemployment risks in an emergency</a> (SURE). The SURE instrument is the emergency operationalisation of the EUBRS, and is specifically designed to respond immediately to the challenges presented by the coronavirus pandemic.</p> <p>While the SURE instrument as such in no way precludes the establishment of a future permanent EUBRS, the Commission has, as of December 2021, not presented any proposal for such a permanent scheme so far. Under the European pillar of social rights action plan adopted in March 2021, the Commission only presented a new instrument for job creation and job transition from hard-hit sectors to expanding ones ('effective active support to employment - EASE'). Moreover, no proposal for a permanent EUBRS is foreseen under the <a href="#">Commission's work programme for 2022</a>, adopted on 19 October 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>May 2018, the Commission tabled a proposal for the European Investment Stabilisation Function to complement existing instruments at national and European level to absorb large asymmetric macroeconomic shocks in the euro area and countries participating in the European Exchange Rate Mechanism (ERM II). The Commission's contribution to the informal EU27 leaders' meeting in Sibiu (Romania) on 9 May 2019 mentioned that 'other ideas, such as the gradual setting up of a common unemployment re-insurance scheme, should also be considered'.</p> <p>In her Political Guidelines, President-elect Ursula von der Leyen stated: 'We must also do more to support those who lose their jobs because of external events that affect our economy. This is why I will propose a European Unemployment Benefit Reinsurance Scheme. This will protect our citizens and reduce the pressure on public finances during external shocks'.</p>			
2)	2. Urges the Commission to put the necessary pressure on Member States, regardless of their membership of the euro area, to implement the recommendations;	<p>Ensuring timely and affordable healthcare of good quality and long-term care are important principles of the European Pillar of Social Rights. To pursue these principles, the Commission has been taking a number of steps, including proposing several CSRs in the field of health and long-term care.</p> <p>The Commission acknowledges that progress with the implementation of CSRs can be further improved. The Commission has already undertaken steps to raise the CSR implementation rate, including through promoting a continuous dialogue with the Member States during each European Semester cycle, strengthening stakeholder engagement and creating stronger incentives for implementation.</p> <p>Currently, the Commission is undertaking efforts to improve the incentives for the Member States to enact</p>		<p>In a <a href="#">communication from the Commission on the 2020 European Semester</a>, the Commission wrote that '[t]he 2019 country-specific recommendations remain relevant and should be taken into account for the EU funds, in particular for cohesion policy.'</p> <p>Furthermore, the Commission wrote that it 'will continue to engage with Member States and national stakeholders throughout the Semester process to ensure effective follow-up and implementation, based on broad ownership.'</p> <p>Following establishment of the recovery and resilience facility (RRF) in February 2021, the proposal for a reform support programme, adopted in May 2018, has been withdrawn. The RRF finances reforms and investments in Member States from the start of the</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			structural reforms by strengthening the existing link between the European Semester and the Cohesion policy for the next programming period (2021-2027) and by building on the successful Structural Reform Support Programme and setting up a Reform Support Programme that is also to include the Budgetary Instrument for Convergence and Competitiveness. The proposal for the Reform Support Programme is currently under discussion as part of the 2021-2027 Multiannual Financial Framework package.		coronavirus pandemic in February 2020 until December 2026. To benefit from the support of the facility, Member States have to submit their recovery and resilience plans to the Commission. Each plan should effectively address challenges identified in the <a href="#">European Semester</a> , particularly the <a href="#">country-specific recommendations</a> of 2019 and 2020. The recovery and resilience facility is performance based. Fulfilment of agreed milestones and targets towards achieving the reforms and investments in the plans will unlock regular payment.	
3)	4. Stresses that the Member States and the Commission should ensure the implementation of specific employment policies to address the constraints and difficulties experienced by regions at a demographic disadvantage, such as depopulated or sparsely populated regions, with a special focus on the agricultural sector, with the aim of fostering their capacity to create employment and added value in rural areas; considers it necessary to increase employment rates and income and promote decent job creation in order to achieve the Europe 2020 goal of an employment rate of at least 75%;		No specific reply is provided to this particular point.		Not mentioned.	
4)	7. Calls on the Member States and the Commission to make the fight against youth unemployment a priority and to make full use of financial instruments such as the Youth Guarantee, EU programmes such as Erasmus+ and tailored measures for tackling youth unemployment and fostering youth employability;		The fight against youth unemployment has been a priority for the Commission for many years. Upon a proposal by the Commission, the Council Recommendation on establishing a Youth Guarantee was adopted on 22 April 2013. It was the first major coordinated active labour market policy intervention at the EU level and it is a permanent instrument with no end date. The EU's commitment to the Youth Guarantee has been confirmed in the European Pillar of Social Rights (principle 4b).		On 1 July 2020, the Commission published a communication on <a href="#">Youth employment support: a bridge to jobs for the next generation</a> and a proposal for a Council recommendation on <a href="#">A bridge to jobs - reinforcing the youth guarantee</a> in order to step up the outreach to vulnerable young people now covering people aged 15-29 ('reinforced Youth Guarantee').	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>At the same time, dedicated EU funding is available for youth employment measures, including provision of apprenticeships and traineeships, under the European Social Fund and the Youth Employment Initiative (YEI).</p> <p>Taking due account of the urgency of the youth unemployment situation, already from the outset of the 2014-20 period, the Commission proposed special provisions so that the total amount of resources allocated to the YEI were frontloaded in the first two years of the programming period and the initial pre-financing was increased significantly, in order to allow for a speedy and substantial mobilisation of youth measures and for immediate results.</p> <p>Furthermore, the YEI envelope was reinforced first within the context of the mid-term revision of the multiannual financial framework 2014-20 in 2017 and a second time in 2019 following a proposal from the Parliament. Six years after its launch, the Youth Guarantee has become a reality across the EU. Every year, more than 3.5 million young people receive a Youth Guarantee offer. The Youth Guarantee focuses on early intervention and activation through targeted and tailored support to young people not in employment, education or training (NEETs) (e.g. career guidance, hiring subsidies, traineeship programmes) and promotes structural reforms (e.g. apprenticeship reform, integrated services for young people).</p> <p>As regards the 2021-27 period, the Commission's proposal for the European Social Fund Plus (ESF+) includes specific provisions binding the Member States with above-EU</p>		<p>In particular, paragraph 27 (COM(2020) 276) stated the following: 'exploit the full potential of complementing national funding efforts with other EU funding sources that could contribute to implementing the reinforced Youth Guarantee, notably the Recovery and Resilience Facility, EAFRD, InvestEU, AMIF, the Erasmus+ programme and the Technical Support Instrument;' .</p> <p>All EU Member States have committed to the implementation of the reinforced youth guarantee in a <a href="#">Council recommendation of October 2020</a>. Significant EU funding backs up the recommendation (<a href="#">NextGenerationEU</a>, long-term EU budget).</p> <p>Under the <a href="#">European pillar of social rights action plan</a>, presented by the Commission in March 2021 as a contribution to the Porto Social Summit, the Commission stated that 'The reinforced Youth Guarantee provides guidance towards a stable labour market integration with a focus on quality employment. This will be supported by NextGenerationEU and the MFF, mainly through the European Social Fund Plus (ESF+) with support from the RRF for eligible measures. The Commission reiterates its call to Member States to dedicate at least EUR 22 billion to youth employment support. Traineeships or internships allow to gain practical and first-hand experience. They are usefully facilitating young people's access to the labour market. Yet, this aim can only be achieved if traineeships are of good quality and apply fair working conditions.'</p> <p>Under the <a href="#">CWP 2022</a>, presented on 19 October 2021, the Commission wishes to pay special attention to the younger generation (through notably a proposal for a 'European Year of Youth 2022', presented in October 2021, to honour young people, who have shown solidarity towards older generations and great</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>average NEET rates to dedicate at least 10% of their ESF+ envelopes to measures to tackle youth unemployment, in line with the Youth Guarantee recommendation. The President-elect Ursula von der Leyen tasked Commissioner-designate Nicolas Schmit to reinforce the Youth Guarantee and Commissioner-designate Mariya Gabriel to support the objective of tripling the Erasmus+ programme in the Mission letters addressed to them.</p> <p>In addition, the European Solidarity Corps aims, inter alia, at fostering learning and employability of youth.</p>		<p>resilience during the pandemic; the proposal's overall purpose is to reinforce EU, Member States' and regional and local authorities' efforts to support and engage with young people in a post-pandemic perspective; according to the political agreement of December 2021, €8 million will serve this purpose as top-up to the Erasmus+ and European Solidarity Corps programmes.</p>	
5)	8. Calls on the Commission to propose a directive on pay transparency in order to quickly close the gender pay gap;	<p>Equal pay for work of equal value is one of the key principles of the European Pillar of Social Rights. To monitor developments in this area, the gender pay gap in unadjusted form has been selected as an indicator of the Social Scoreboard supporting the Pillar. Furthermore, in her Political Guidelines, President-elect Ursula von der Leyen committed to pursue this principle by tabling, in the first 100 days of her mandate, measures to introduce binding pay-transparency measures as part of a new European Gender Strategy.</p>		<p>A legislative proposal on pay transparency is one of the priorities in the Commission's EU gender equality strategy 2020-2025 adopted on 5 March 2020. Under the Commission's <a href="#">work programme 2020</a>, published on 29 January 2020, the Commission announced its intention to put forward a legislative proposal setting out binding pay transparency measures in Q4 2020. With a slight delay, the Commission published the <a href="#">proposal</a> on 4 March 2021. A year ahead of the publication of the proposal, the Commission, in March 2020, published an assessment of its 2017-2019 gender pay gap action plan. This included a detailed evaluation of how existing EU equal pay legislation (Directive 2006/54/EC) has been applied and enforced since the adoption of the Commission's non-binding 2014 recommendation on pay transparency, which aimed to strengthen it. The evaluation finds that 13 Member States (BG, CY, CZ, EE, EL, HR, HU, LV, MT, PL, RO, SI, SK) have no pay transparency measures, two (IE and NL) are considering introducing legislation. 11 Member States</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				(AT, BE, DK, DE, ES, FI, FR, IT, PT, SE, UK), have introduced mandatory measures, meaning that there are discrepancies in regulatory standards across the EU. Due to the lack of transparency, pay discrimination often goes undetected and victims are prevented from bringing claims. The evaluation considers that the non-binding nature of the recommendation limits its impact and ability to reinforce Directive 2006/54/EC. It concludes that EU legislative action in this area has the potential to yield results and that stakeholders generally agree with the potential benefits of future EU action.	
6)	10. Calls on the Commission and the Member States to stimulate productivity through reforms which remove unnecessary regulation; highlights the fact that investments in occupational health and safety do not only improve job quality and the wellbeing of workers, but also have a positive effect on the productivity and competitiveness of the European economy;	Over the long term, productivity gains are a precondition to create jobs, sustain wage growth and improve living conditions. To foster productivity growth, Member States should promote investment in research and innovation and intangible assets, digitalisation and human capital. Productivity also needs to be supported by competitive and efficient markets and reforms that remove bottlenecks in the business environment. For this reason, the Commission is committed to pursue a better regulation agenda, with the aim of designing and evaluating EU policies and laws transparently. The agenda includes the Regulatory Fitness and Performance (REFIT) programme, established to make EU law simpler and to reduce the costs of regulation, and the related Platform, which brings together the Commission, national authorities and other stakeholders in regular meetings to improve existing EU legislation. This, together with the announced 'one in one out' policy, can help identifying unnecessary obligations for companies, especially Small and Medium Sized Enterprises (SMEs). This commitment is instrumental to free up business resources to pursue objectives that can contribute to improving their productivity.		In May 2020, the Commission launched the Fit for future platform (F4F) and invited experts to join. <a href="#">The Fit for future platform</a> is a high-level expert group that will help the Commission in its efforts to simplify EU laws and to reduce related unnecessary costs. These efforts are part of the Regulatory fitness and performance (REFIT) programme.' The Commission will take into account the Platform's opinions to ensure EU laws help, not hinder, people and business, in particular small and medium-sized enterprises.'  Following a stocktaking exercise of the Better Regulation agenda, the Commission, on 29 April 2021, published a <a href="#">communication</a> reconfirming, inter alia, the 'one in, one out' approach announced in the political guidelines of Commission President Ursula von der Leyen. This instrument aims at offsetting new burdens resulting from legislative proposals by reducing an equivalent existing burden in the same policy area. According to the communication, the implementation of this approach will be reported in the annual burden survey.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Digitalisation of administrative procedures can also help improving productivity. A recent study has quantified that businesses would save EUR 170 million annually if eight key procedures were available fully online, also for cross-border users. One of the most significant improvements that the Single Digital Gateway Regulation will bring for companies is the inclusion of six key procedures that the Member States have to provide fully online (end-to-end) by December 2023.</p> <p>Furthermore, the Commission monitors the Member States' reforms in the area of market regulation and administrative burden in the context of the European Semester. In addition, effective institutions and judicial systems, quality and capacity of public administrations, efficient delivery of public procurement, activating and upskilling labour market institutions and efficient tax systems are important determinants of a Member State's business environment. The analysis of these various dimensions by the services of the Commission is published in the Country Reports and the Commission follows up, in specific cases, by recommending to the Council country-specific recommendations. In July 2019, nine Member States received a recommendation on the regulatory framework, while 16 Member States received a recommendation on the business environment more broadly.</p> <p>Recently, a network of National Productivity Boards has been established by the Commission as a platform for discussions on competitiveness and productivity. The Commission has developed and is working on benchmarking frameworks to be applied in the Semester</p>		<p>In the communication, the Commission confirms that the calculation of burden will not constitute a mechanical exercise. Instead, there will be a certain degree of flexibility within the reporting period, the possibility of 'trading' across policy areas or even exemptions in certain exceptional circumstances. The main aim of 'one in, one out' is to create greater cost-awareness in policy-making. Still in the context of regulatory offsetting, the communication highlights fitness checks (i.e. ex-post assessments of entire policy areas, as opposed to evaluations of individual acts), as a tool to determine cumulative impacts, overlaps and potential inconsistencies. Under the communication, the 'SME test' will be applied more systematically to better assess impacts on small and medium-sized enterprises (SMEs). On 3 and 25 November 2021 respectively, the Commission <a href="#">published</a> revised Better Regulation guidelines and a revised toolbox. According to the revised guidelines, 'impacts on competitiveness and small and medium-sized enterprises (SMEs) must be screened and assessed systematically.'</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>cycle to assess and help identify reform priorities in public administrations and the business environment. Moreover, Commission's Structural Reform Support Service provides to the Member States, upon their request, targeted technical support for the design and implementation of reforms.</p>			
7)	<p>11. Calls on the Commission and the Member States to step up efforts to change this trend ["that older and less-skilled workers are much less likely to participate in lifelong learning programmes"]</p>	<p>Promoting lifelong learning is part of the first principle of the European Pillar of Social Rights. The Commission acknowledges that older and low skilled adults are much less likely to take part in learning. Progress towards achieving the 15% EU target has been slow. In 2008, about 9.5% of adults took part in learning; the share increased to 11.1% in 2018.</p> <p>This is why the Council on 19 December 2016 adopted the Recommendation on Upskilling Pathways, through which all the Member States committed to putting in place provisions to help low-qualified adults acquire the basic skills they lack, with a view to progressing to a further qualification. In February 2019 the Commission took stock of the Member States' progress in implementing the recommendation, which should target 60 million low-skilled adults. It found that despite a number of initiatives being rolled out, there is a need to significantly increase the upskilling offer. It also found that the offer should target basic skills (literacy, numeracy, digital) explicitly and that coordination of provisions for this target group needs to be intensified.</p> <p>The Commission's proposals for the new Multiannual Financial Framework puts a strong emphasis on the investment in people and their skills. The ESF+, as the main EU instrument for investing in people, will support the Member States in tackling challenges such as upskilling</p>		<p>The <a href="#">proposal for a Council recommendation on vocational education and training (VET)</a> for sustainable competitiveness, social fairness and resilience was announced in the communication '<a href="#">A strong social Europe for just transitions</a>' of 14 January 2020. It is an important part of the ongoing implementation of the European pillar of social rights strengthening principle 1 "education, training and lifelong learning".</p> <p>The Commission communication on '<a href="#">A new industrial strategy for Europe</a>' calls for decisive action to make lifelong learning a reality for all and ensure that education and training keep pace and help deliver the twin transitions. The Commission proposal for a regulation of the European Parliament and of the Council on the European social fund plus (ESF+) aims at ensuring better labour market relevance of education and training system and equal access to lifelong learning opportunities for all, through up- and reskilling pathways.</p> <p>In addition, the new <a href="#">European skills agenda</a>, presented on 1 July 2020, is a five-year plan to help individuals and businesses develop more and better skills and to put them to use, by: [...] ensuring social fairness, putting into practice the first principle of the <a href="#">European pillar of social rights</a>: access to education, training and lifelong learning for everybody, everywhere in the EU. The aim is to place skills, employability and human</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and reskilling for people of all ages and social inclusion. The proposal for the future Erasmus programme also strengthens the support for Vocational education and <i>training</i> (VET) and adult learning, which provide opportunities for people of all ages to engage into further education and training. Financial support is also available through the InvestEU 'Social Investment and Skills' window which has an envelope of EUR 4 billion to support investments in various areas, including education and training.</p>		<p>capital centre stage. The new skills agenda builds on the previous <a href="#">European skills agenda of 2016</a>. It should also be noted that the Commission, in its <a href="#">European pillar of social rights action plan</a>, set the target of at least 60% of all adults to participate in training every year by 2030. According to the Commission, 'a key factor of success to ensure that adults are able to engage in up- and reskilling later in life is a strong foundation of basic and transversal skills acquired in initial education and training, in particular among disadvantaged groups.' and 'Efforts must therefore be strengthened to increase adult participation in training and to improve the levels of achievement in initial education and training. In particular: 1) at least 80% of those aged 16-74 should have basic digital skills, a precondition for inclusion and participation in the labour market and society in a digitally transformed Europe; and 2) early school leaving should be further reduced and participation in upper secondary education increased'.</p>	
8)	<p>12. Calls on the Commission to draw up a long-term planning strategy for the integration of ethnic minorities into the labour market, in order to mitigate the risk of exclusion;</p> <p>Calls on the Commission and the Member States to strengthen efforts against discrimination based on ethnicity, membership of a minority or minority language by raising awareness, implementing diversity strategies, and collecting and analysing reliable, disaggregated data on discrimination;</p>	<p>Ensuring equal rights to all, regardless of racial or ethnic origin, also in relation to their employment opportunities, is one of the principles of the European Pillar of Social Rights. Moreover, according to Article 2 of the Treaty on the European Union, the respect for the rights of persons belonging to minorities constitutes one of the founding values of the EU. Furthermore, Articles 21 and 22 of the Charter of Fundamental Rights of the European Union prohibit discrimination based on membership of a national minority and provide for the respect by the Union of cultural, religious and linguistic diversity.</p> <p>The Commission has always been committed to fight discrimination, and over the years has promoted the</p>		<p>No further specific actions proposed/promised to be taken by the Commission (long-term planning strategy for the integration of ethnic minorities into the labour market).</p> <p>On 18 September 2020, the Commission presented an <a href="#">EU anti-racism action plan for the period 2020-2025</a>. The action plan sets out a series of measures to step up action, to help lift the voices of people with a minority racial or ethnic background, and to bring together actors at all levels in a common endeavour to address racism more effectively and build a life free from racism and discrimination for all. Moreover, in its <a href="#">joint report on the application of the employment equality directive and the racial equality directive</a>,</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>adoption of important legislation, such as the Directive 2000/43/EC (the Race Equality Directive), the Directive 2000/78/EC (the Employment Equality Directive) and the Council Framework Decision 2008/913/JHA (the Framework Decision on combating racism and xenophobia). More recently, in her Political Guidelines, the President-Elect Ursula von der Leyen committed to pursue 'A Union of equality', to promote diversity and to propose new legislation on anti-discrimination.</p> <p>In terms of analysis and data collection, the integration challenges related to education and the labour market faced by people with a migrant background and by other disadvantaged groups is monitored yearly through the European Semester. The main challenges and policy developments are presented in the Joint Employment Report and in the Country Reports. In the most problematic cases, this analysis is followed up with country-specific recommendations.</p>		<p>published in March 2021, the Commission identified follow-up action, including, inter alia, 'closer monitoring by Member States of the implementation of the Directives, in particular in relation to protection against victimisation and the application of effective, proportionate and dissuasive sanctions.</p> <p>The Commission will offer support in this regard, e.g. by commissioning a study on sanctions. Moreover, the Commission 'will continue to promote equality and support victims through EU funding channels, including through the 'citizens, equality, rights and values' (CERV) programme and the Justice programme'. Under the <a href="#">European pillar of social rights action plan</a>, also published in March 2021, the Commission stated that it 'will continue to encourage Member States to improve the collection of data disaggregated by racial or ethnic origin in line with the EU anti-racism Action Plan.'</p>	
9)	13. Calls on the Commission and the Member States to step up efforts to ensure the greater labour market inclusion of the groups furthest from the labour market, such as single parents, informal carers, people with long-term illnesses, disabilities, health problems or complex chronic diseases, migrants and refugees, and people from ethnic and religious minorities, and their increased integration into society;	<p>Consolidated reply for points 13 and 14:</p> <p>The labour market inclusion of groups furthest away from the labour market is a key element in the European Pillar of Social Rights and is touched upon in a number of principles, in particular the principle on equal opportunities, on active support to employment, as well as principles on unemployment benefits and minimum income as well as on inclusion of people with disabilities. In addition, since the start of its implementation in 2008, the active inclusion Recommendation has put the emphasis on the need for an integrated approach for the inclusion of those furthest away from the labour market that combines adequate income support, inclusive labour markets and access to quality social services.</p>		<p>On 29 January 2020, the <a href="#">Commission work programme</a> for 2020 was published. Under the fifth priority - 'Promoting our European way of life', the Commission stated that 'The European way of life is built around our values of solidarity, equality and fairness. It is about feeling safe, secure and having peace of mind, supporting the most vulnerable in our society and championing inclusion'. In November 2020, the Commission presented an <a href="#">action plan on integration and inclusion</a>, which is linked to the new pact on migration and asylum and promotes, inter alia, employment opportunities and skills recognition of people with a migrant background.</p> <p>The action plan on integration and inclusion complements existing and upcoming EU strategies to</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				<p>foster equality and social cohesion to ensure everyone is fully included and able to participate in European societies. It will be implemented with the <a href="#">European pillar of social rights action plan</a> and the EU's <a href="#">anti-racism plan 2020-2025</a>. It is also closely linked with the <a href="#">EU Roma strategic framework for equality, inclusion and participation 2020-2030</a>; the <a href="#">gender equality strategy 2020-2025</a>; the <a href="#">LGBTIQ equality strategy 2020-2025</a>; the <a href="#">strategy to combat antisemitism</a> and the <a href="#">2020 EU citizenship report</a>.</p> <p>It should also be mentioned that the Commission, in its European pillar of social rights action plan, set the target of at least 78% of the population aged 20 to 64 in employment by 2030. To reach this target, the EU must, according to the Commission, strive to 1) at least halve the gender employment gap compared to 2019; 2) increase the provision of formal early childhood education and care (ECEC); and 3) decrease the rate of young people neither in employment, nor in education or training (NEETs) aged 15—29 from 12.6% (2019) to 9%. In the action plan, the Commission also stated that 'Making sure other under-represented groups – e.g. older people, low skilled people, persons with disabilities, those living in rural and remote areas, LGBTIQ people, Roma people and other ethnic or racial minorities particularly at risk of exclusion or discrimination as well as those with a migrant background – participate in the labour market to the maximum of their capacity will also contribute to a more inclusive employment growth. People currently discouraged from actively seeking employment must be encouraged to participate in the labour market for it to rebound quickly. As working lives are extended across the EU due to ageing and policy reforms, the current statistical notion of 'working age population'</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				from 20 to 64 warrants examination. The Commission will undertake analytical and statistical work in cooperation with Member States with a view to adjust the current indicator at the occasion of the review of this Action Plan.'	
10)	<p>14. Calls on the Commission and the Member States to continue developing specific measures within employment, education and social policies to ensure the effective inclusion of people with disabilities, long-term illnesses and chronic diseases, including those with mental health disorders and psychosocial disabilities;</p> <p>Calls on the Commission and the Member States to go beyond supporting measures and create more employment incentives, better accessibility</p>	<p>As regards the employment situation of persons with disabilities, the European Union and the Member States have an obligation to implement the United Nations Convention on the Rights of Persons with Disabilities (UN CPRD), including Article 27 on inclusion of persons with disabilities into work and employment. The European Disability Strategy 2010-2020 (EDS) is the main instrument for the implementation of the UN CRPD. EDS is currently undergoing an external evaluation. The Commission will address the findings in its future actions. Moreover, in the frame of the Semester, the Commission collects statistics and provides analysis on the situation of persons with disabilities in the area of employment, and steers action at Member State level where necessary.</p> <p>The Commission is also working with the Member States on the transposition of Directive (EU) 2019/882 of the</p>		<p>As outlined in the Commission's '<a href="#">A strong social Europe for just transitions</a>', the Commission will pursue the implementation of the United Nations convention on the rights of persons with disability. Moreover, in March 2021, the Commission adopted the <a href="#">strategy for the rights of persons with disabilities 2021-2030</a>, building on the results of the evaluation of the European strategy for disability 2010-2020. The new strategy contains a set of actions and flagship initiatives. Its priorities include, inter alia, non-discrimination of persons with disabilities at work.</p> <p>The Commission published an updated <a href="#">digital education action plan 2021-2027</a> on 30 September 2020. On 15 December 2020, the Commission presented a proposal for a <a href="#">digital services act</a>. On digital platforms, the Commission published a comprehensive package of measures in December 2021 (see reply to point 16 below).</p> <p>It should be noted that under the recovery and resilience facility, the Commission strongly encourages the Member States to put forward investment and reform plans in 7 flagship areas, several of which aim at promoting digitalisation. In particular, the 'reskill and upskill' flagship will give central importance to investments and reforms focusing on digital skills and educational and vocational training for all ages. In addition, the flagship 'Modernise' addresses the digitalisation of public administration and services.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and reasonable accommodation <sup>7</sup> , including by taking full advantage of the economic and social inclusion opportunities offered by digitalisation;	<p>European Parliament and of the Council of 17 April 2019 on the accessibility requirements for products and services. This directive will contribute to improve accessibility across the EU and facilitate the implementation of certain accessibility obligations enshrined in the UN Convention on the Rights of Persons with Disabilities.</p> <p>Finally, digitalisation has been mentioned as one of the priorities in the Political Guidelines of President-elect Ursula von der Leyen. A new Digital Services Act is planned, so to upgrade our liability and safety rules for digital platforms, services and products, which should also contribute to increased social inclusion and access to services. The new Commission is also planning to update the Digital Education Action Plan.</p>		<p>The recent communication on '2030 Digital Compass: the European way for the Digital Decade' presents a vision for Europe's digital transformation by 2030. The communication will be followed by a wide consultation process and a proposal for a digital policy programme setting out concrete objectives for 2030.</p> <p>Moreover, following the Council conclusions of 9 June 2020 on shaping Europe's digital future the Commission is working on an inclusive, human-centric EU digital government policy. Finally, in Q4 2021, the Commission intended to include digital rights in an inter-institutional solemn declaration.</p>	
11)	16. Stresses the need for the Commission and the Member States to collect better and more harmonised data on the number of platform workers, and their employment status, job content and income;	The Commission agrees that there is a need to improve data collection and to develop comparable data sets on the platform economy and the platform labour market. The Commission services have already started work on piloting platform data collection. Results are expected for 2022.		In March 2020, the Commission published a <a href="#">study</a> that looked at the challenges faced by platform workers (including employment status, information available to the workers about their working conditions, dispute resolution, collective rights and non-discrimination). Moreover, in its communication on <a href="#">A strong social</a>	

<sup>7</sup> The UN Convention on the Rights of Persons with Disabilities (CRPD) states: 'Reasonable accommodation' means 'necessary and appropriate modification and adjustments not imposing a disproportionate or undue burden, where needed in a particular case, to ensure to persons with disabilities the enjoyment or exercise on an equal basis with others of all human rights and fundamental freedoms' (<https://www.ohchr.org/EN/HRBodies/CRPD/Pages/ConventionRightsPersonsWithDisabilities.aspx>); Article 5 of the Employment Equality Directive states: 'In order to guarantee compliance with the principle of equal treatment in relation to persons with disabilities, reasonable accommodation shall be provided. This means that employers shall take appropriate measures, where needed in a particular case, to enable a person with a disability to have access to, participate in, or advance in employment, or to undergo training, unless such measures would impose a disproportionate burden on the employer. This burden shall not be disproportionate when it is sufficiently remedied by measures existing within the framework of the disability policy of the Member State concerned' (<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32000L0078&from=EN>); The Commission's website states: 'Reasonable accommodation is any change to a job or a work environment that is needed to enable a person with a disability to apply, to perform and to advance in job functions, or undertake training' (<https://ec.europa.eu/social/main.jsp?catId=147>).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The Commission also agrees that the challenges raised in the resolution deserve policy attention, i.e. labour status, employment and working conditions, access to social protection and access to collective representation and bargaining of platform workers. Looking at ways how to improve the labour conditions of platform workers is a key political priority for the new Commission, as stated by the President-elect Ursula von der Leyen in her Political Guidelines.</p>		<p><a href="#">Europe for just Ttransition</a>, the Commission stated that it 'will organise a Platform Work Summit to discuss priority issues and possible solutions including for example employment status, working conditions and access to social employment status, working conditions and access to social protection of platform workers, access to collective representation and bargaining, as well as cross-border aspects of platform work.' In <a href="#">the Letter of intent of Commission President Ursula von der Leyen</a>, annexed to the State of the Union, published in September 2020, the initiative to improve the working conditions of people working in the platform economy is one of the key new initiatives for 2021. Between June and September 2021, the Commission launched a second-stage <a href="#">consultation</a> of social partners on how to improve the working conditions for people working through digital labour platforms.</p> <p>On 9 December 2021, the Commission presented a package of measures to improve the working conditions of people working through digital labour platforms. The proposed measures include the <a href="#">communication</a> 'Better working conditions for a stronger social Europe: harnessing the full benefits of digitalisation for the future of work' and a <a href="#">proposed directive</a>. The proposal seeks, inter alia, to ensure that people working through digital labour platforms are granted the legal employment status that corresponds to their actual work arrangements. In relation to data access, the proposal intends to bring more transparency around platforms by clarifying existing obligations to declare work to national authorities and asking platforms to make key information about their activities and the people who work through them available to national authorities. In addition, the</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				Commission launched a public consultation on <a href="#">draft guidelines on the application of EU competition law to collective agreements of solo self-employed people</a> , i.e. people who work completely on their own and do not employ others. The draft guidelines aim to bring legal certainty and make sure that EU competition law does not stand in the way of certain solo self-employed people's efforts to improve collectively their working conditions, including remuneration, in cases where they are in a relatively weak position, for example where they face a significant imbalance in bargaining power.	
12)	19. Agrees with the Commission that timely efforts are needed to address digitalisation, that the EU as a whole must speed up the process, and that Union, Member State and regional policies should be better aligned, public and private resources should be pooled to increase investment and stronger synergies should be developed in the digital economy and society; stresses the need to ensure the effective and equitable digital transformation of services and that no one is left behind; emphasises that digital literacy programmes should address issues of privacy and data protection;	No specific reply to this particular point.		Not mentioned.	
13)	23. Calls on the Commission and the Member States to provide incentives and maintain technical assistance with a view to increasing opportunities to promote decent work for young people through employment programmes, support for young entrepreneurs via EntreComp, high-quality apprenticeship programmes, and language and vocational training, including through school curricula in the Member States, in	In accordance with the principle on Active support to employment, enshrined in the European Pillar of Social Rights, the Commission promotes actions dedicated to young people in order to facilitate the transition from education to work and to foster fair and well-functioning labour markets. The actions support the implementation of tailor-made employment services and innovative forms of work that ensure quality working conditions, notably for youth and unemployed.		In July 2020, the Commission proposed the <a href="#">youth employment support</a> package including four strands to provide a bridge to jobs for the next generation:  1) A <a href="#">proposal</a> for a Council recommendation on a bridge to jobs to reinforce the 2013 <a href="#">youth guarantee</a> (see <a href="#">Council recommendation</a> of October 2020). The recommendation keeps the pledge that if young people aged between 15 and 29 years sign up to the youth guarantee, they will receive an offer of	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>close cooperation with the entrepreneur and research community and other relevant stakeholders;<sup>i</sup></p>	<p>More specifically, the Commission launched the action Targeted Mobility Scheme (TMS), financed under the EaSI Programme, aimed to ensure the continuity of development of “Your First Eures Job” (YFEJ) and “Reactivate”. The TMS helps the target groups (young people aged 18-35 and jobseekers 35+) find a job, traineeship or apprenticeship in another EU/ EEA country. The initiatives include direct financial support to contribute to the costs borne for interview trips, relocation, language courses and recognition of qualifications. With a view to offering quality work opportunities and employment services, enhancing skills and employability of job/traineeship/apprenticeship seekers, it is important that the each project coordinator play its role in the implementation of the TMS projects in order to achieve the requested results.</p> <p>Since its launch in 2013, 314 organisations, social partners, chambers, VET schools, companies and other stakeholders have joined the European Alliance for Apprenticeships. They have pledged almost 907 000 apprenticeships and learning opportunities. According to the latest survey (2019) to which 103 stakeholders responded, more than 220 000 apprenticeship places were created in the period 2017-2018 by the survey respondents. Building on the joint work of the social partners, the Council adopted in 2018 the Recommendation on a European Framework for Quality and Effective Apprenticeships, whose implementation is supported by the Commission through the Apprenticeship Support Services.</p> <p>Work on implementation of the Riga priorities for vocational education and training (endorsed at a meeting</p>		<p>employment, education, apprenticeship or training within four months. ‘Bridge to Jobs’ is intended to be more inclusive to avoid any forms of discrimination, with a wider outreach to more vulnerable groups, such as youth of racial and ethnic minorities, young people with disabilities, or young people living in some rural, remote or disadvantaged urban areas. It aims to link in with the needs of companies, providing the skills required - in particular those for the green and digital transitions - and short preparatory courses; and it will provide tailored counselling, guidance and mentoring.</p> <p>2) A <a href="#">proposal</a> for a Council recommendation on vocational education and training (see <a href="#">Council recommendation</a> of November 2020) which aims to make systems more modern, attractive, flexible and fit for the digital and green economy. More agile, learner-centred vocational education and training should prepare young people for their first jobs and gives more adults opportunities to enhance or change their careers. It intends to help vocational education and training providers to become <a href="#">centres of vocational excellence</a> (CoVEs), while supporting diversity and inclusiveness. The CoVEs will be implemented and supported through the Erasmus programme in the period 2021-2027.</p> <p>3) A renewed <a href="#">European alliance for apprenticeships</a>, intended to promote national coalitions, support SMEs and reinforce the involvement of social partners: trade unions and employers’ organisations. The goal is to sustain the apprenticeship offers to ensure that apprentices trained today will be highly skilled workers in a few years’ time.</p> <p>4) Additional measures to support youth employment including employment and start-up incentives in the short term, and capacity building, young entrepreneur</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>hosted by the Latvian Presidency on 22 June 2015) is ongoing, together with the Member States, social partners, VET providers and other stakeholders. The Commission has also launched a new initiative for the establishment of European Platforms of ‘Centres of Vocational Excellence’, which will be implemented and supported through the Erasmus programme in the period 2021-2027. These platforms will bring together local and regional partners from education, business, and research, as well regional authorities and development agencies, to co-create local ‘skills ecosystems’ and the second call for piloting this action under the current Erasmus programme has just been published with a budget of EUR 20 million.</p>		<p>networks and inter-company training centres in the medium term.</p> <p>With NextGenerationEU and the MFF 2021-2027, the Commission proposed EU financing opportunities for youth employment. According to the Commission, at least €22 billion should be spent on youth employment support.</p>	
14)	<p>25. Urges the Commission to enhance the CSRs for eurozone members by creating a matrix framework where social policies related to the European Pillar of Social Rights, such as inclusive access to education, health, nutrition, employment and housing, and the preservation of social rights, are analysed by social segment, for example children, young people, older people, minorities, migrants and people with disabilities, thereby creating a much more accurate image of the economic and social health of the Member States, and to examine the possible extension of this new component of the CSRs to non-Eurozone members;</p> <p>Calls on the Commission and the Member States to define a European sustainability strategy to overcome social, economic and climate</p>	<p>The euro area recommendations already strengthen the framework for the CSRs addressed to individual Member States. By setting up the reform priorities for the euro area ahead of the CSRs, they give a common vision on which are the main challenges for euro area Member States. The 2019 Euro Area Recommendation includes a specific recommendation dedicated solely to employment and social aspects.</p> <p>From the start delivering on the European Pillar of Social Rights has been conceived as a shared political commitment and responsibility, with EU institutions, Member States, public authorities, social partners and civil society all having a crucial role to play, in line with their competences. The Commission has shown its readiness to turn words into deeds, through various legislative and non-legislative initiatives, the European Semester and EU funding. The level of ambition remains high, with a range of new initiatives and an action plan to implement the Pillar announced by President-elect Ursula von der Leyen in her Political Guidelines, reflecting the Commission’s</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>With a view to monitoring social policies by category and in line with the European pillar of social rights, as requested by the EP, the Commission referred to the new social scoreboard to monitor progress of pillar-relevant outcomes and policies, and to its yearly and multi-annual assessments showing how country specific recommendations (CSR) relate to the pillar principles. According to the Commission, this analysis and the recitals underpinning the CSRs already provide information on which social segment is most affected by a certain issue (implying that no additional action was needed as the EP request is covered by the work done under the social scoreboard).</p> <p>As to new legislative initiatives to reinforce social rights and the announcements made by then</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>challenges; calls on the Commission and the Member States to reinforce social rights by proposing legislation, including financial instruments where appropriate and following review, to implement the European Pillar of Social Rights within the limits of their respective competences as laid down in the Treaties;</p>	<p>commitment to social progress and upward convergence in the EU, in full respect of Member States' competences.</p> <p>Concerning the monitoring of social policies by category and by Pillar principle, the Commission uses the new Social Scoreboard to monitor progress of Pillar-relevant outcomes and policies, and more generally produces a yearly and multi-annual assessment showing how CSRs relate to which Pillar principles. This analysis and the recitals underpinning the CSRs already contain provide information on which social segment is most affected by a certain issue.</p> <p>The Commission is committed to delivering the 2030 Sustainable Development Goals (SDGs), including in the areas of social, economic and environmental challenges. In particular, the President-elect announced in her programme that she will refocus the European Semester into an instrument that integrates the United Nations Sustainable Development Goals. Achieving the 17 Sustainable Development Goals requires social fairness going hand in hand with environmental sustainability. A majority of the SDGs fall within the sphere of social policy and mirror the ambitions of heads of state and government when proclaiming the European Pillar of Social Rights in 2017. At the EU level, the European Pillar of Social Rights provides the guiding framework for the implementation of the SDGs in the social arena.</p> <p>Finally, the EU-level must act where appropriate and in full respect of the principle of subsidiarity and in respect of national practices. To this end, the President-elect has announced her intention to propose new legislative initiatives in a number of relevant areas, including for</p>		<p>President-elect Ursula von der Leyen (including on minimum wage, the creation of a child guarantee, a new anti-discrimination legislation and a European green deal), the Commission presented a <a href="#">proposal</a> on minimum wages (October 2020) and a <a href="#">proposal</a> for a European child guarantee (March 2021).</p> <p>However, in relation to new anti-discrimination legislation, no such initiatives have been presented by the Commission (at time of writing in December 2021), and none are foreseen under the Commission work programme for 2022. It should be noted that the Commission's <a href="#">proposal</a> for a directive on implementing the principle of equal treatment between persons irrespective of religion or belief, disability, age or sexual orientation, presented in 2008, has been blocked in the Council for years.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		example on minimum wage (principle 6 of the Pillar), on the creation of a child guarantee (principle 11), a new anti-discrimination legislation and a European Green Deal.			
15)	28. Urges the Commission and the Member States to take the necessary steps to reduce poverty, including in-work poverty and poverty experienced by vulnerable groups; underlines the need to eradicate child poverty;	<p>Combatting poverty and social exclusion is a key priority for the EU, as highlighted in the EU2020 Strategy and its target to lift 20 million people out of poverty by 2020. By 2018, 7.9 million had been moved out of the risk poverty and social exclusion compared to 2008 (compared to 2012 when the risk of poverty and social exclusion had reached a peak, the decline even amounts to 14.9 million). Integrated approaches to active inclusion, combining adequate income support with activation measures and access to enabling services, are the core of the active inclusion recommendation adopted by the Commission in 2008. The Commission monitors the progress in the Member States in implementing the active inclusion strategy within the European Semester. In 2019, many Member States received country-specific recommendations in the area of social inclusion and social benefits (BG, EE, EL, ES, FI, HR, HU, IE, IT, LT, LV, PT, RO, SK) and in the area of active labour market policies (BE, BG, CY, CZ, EL, ES, FI, HR, HU, IE, IT, SI).</p> <p>The EU budget provides significant financial support to fight poverty and exclusion through the European Social Fund (ESF), as well as the other European Structural and Investment Funds and the Fund for European Aid to the Most Deprived (FEAD). Over the period 2014-20, Member States were required to spend at least 20% of their ESF amounts for this purpose (FEAD also provides targeted assistance to those most in need). For the 2021-27 period, the Commission has proposed to increase the ESF+ amount dedication to poverty and social exclusion to 25%.</p>		<p>Under the <a href="#">European pillar of social rights action plan</a>, published in March 2021, the Commission aims at reducing the number of people at risk of poverty or social exclusion by at least 15 million by 2030, out of which five million should be children. As regards child poverty, the Commission states that ‘The focus on children will allow not only to provide them with access to new opportunities but will also contribute to break the intergenerational cycle of poverty, preventing that they become adults at risk of poverty or social exclusion and thus producing long-term systemic effects.’</p> <p>In this context, the Commission commits to support targeted national measures and investments to address poverty, inequalities and social exclusion among children. This will be achieved through policy guidance, including related country-specific recommendations, in order to strengthen employment and social policies, investment in social services and social infrastructure, and making the best use of EU funding. With a view to reducing poverty and promoting social inclusion in the EU, the Commission acknowledges the importance of minimum income schemes, access to affordable housing and to essential services of sufficient quality (such as water, sanitation, healthcare, energy, transport, financial services and digital communications). Under the action plan, it therefore announced several initiatives, including:</p> <ul style="list-style-type: none"> <li>- In Q1 2021, an EU strategy on the rights of the child and a Council recommendation establishing a</li> </ul>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Social protection and inclusion are also at the heart of the European Pillar of Social Rights. In the context of the Political Guidelines of President-elect Ursula von der Leyen for the next Commission 2019-2024 and notably the focus on an economy that works for people by reconciling the social and the market dimensions, and striving for more social fairness and prosperity an action plan to implement the principles of the Pillar is foreseen.</p>		<p>European child guarantee (to ensure that children at risk of poverty and social exclusion have effective access to key services such as healthcare and education); see the <a href="#">EU strategy on the rights of the child</a>, adopted in March 2021, and the <a href="#">European child guarantee</a>, adopted by Council in June 2021;</p> <ul style="list-style-type: none"> <li>- A Council recommendation on minimum income in 2022 to effectively support and complement the policies of Member States (announced in Commission work programme 2022 for Q3);</li> <li>- In Q2 2021, a European platform on combatting homelessness to support Member States, cities and service providers in sharing best practices and identifying efficient and innovative approaches; see <a href="#">platform</a> launched in June 2021;</li> <li>- In Q2 2021, guidance on public procurement of innovation and on socially responsible public procurement;</li> <li>- In 2022, an EU report on access to essential services.</li> </ul> <p>In May 2018, the Commission submitted a proposal for a regulation on the European social fund plus (ESF+), the EU's main instrument for investing in people.</p> <p>For the 2021-2027 period, the Commission suggested to increase the ESF+ amount dedicated to poverty and social exclusion to 25%. The ESF+, with €88 billion, will continue to be the EU's main instrument to support the implementation of the social pillar and achieve the three EU headline targets (including on poverty reduction). In line with the initial Commission proposal, the <a href="#">ESF+ regulation</a>, adopted in June 2021, provides that at least 25% of the ESF+ resources at national level should be spent to combat poverty and social exclusion, out of which Member States most affected by child poverty should invest at least 5% in</p>

16)	30. Calls on the Commission to put forward a legal instrument to ensure that every worker in the Union has a fair minimum wage, which can be set according to national traditions, or through collective agreements or legal provisions;	<p>In line with Principle 6 of the European Pillar of Social Rights, the Commission believes that minimum wages should be set in such a way to be fair for all workers, and allow them to enjoy a decent standard of living while safeguarding employment and incentives to work.</p> <p>In her Political Guidelines for the next Commission, President-elect Ursula von der Leyen stated: <i>'I will propose a legal instrument to ensure that every worker in our Union has a fair minimum wage. This should allow for a decent living wherever they work. Minimum wages should be set according to national traditions, through collective agreements or legal provisions. I am a firm believer in the value of social dialogue between employers and unions, the people who know their sector and their region the best'</i>. Subsequently, in his mission letter, Commissioner-designate Nicolas Schmit, has been tasked <i>'to put forward a legal instrument to ensure that every worker in our Union has a fair minimum wage'</i>. This mission letter also recalls that minimum wages <i>'can be set through collective agreements or legal provisions, depending on each country's traditions'</i>.</p> <p>An EU initiative on fair minimum wages would respect subsidiarity, national diversities, the competence of the Member States and the autonomy and collective freedom of social partners, and not seek to harmonise minimum wages, nor their setting mechanisms. Minimum wages would continue to be set through collective agreements or legal provisions, in line with national traditions and practice.</p> <p>With a view to supporting structural reforms and convergence towards the best performers in the context of the European Semester, a benchmarking exercise on</p>		On 28 October 2020, the Commission introduced a proposal for a <a href="#">directive on adequate minimum wages in the European Union</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>minimum wages has been launched. The aim is to establish a broad framework by which policies and outcomes related to statutory minimum wages can be compared across the EU. The framework is now being discussed with the Member States.</p>			
17)	<p>33. Calls on the Commission and the Member States to make better use of the European Semester to monitor and support progress on housing affordability and homelessness; calls on the Commission to propose a European Framework for Social and Affordable housing for the efficient coordination of Member State policies;</p>	<p>The Commission agrees that investment in affordable and adequate housing is a key component of social investment. The 2019 “Employment and Social Developments in Europe” Report dedicated a chapter to this important challenge.</p> <p>Moreover, in the 2019 Country Reports, investment needs in the field of housing were identified in a number of Member States and were marked as funding priorities for the period 2021-2027. The Commission will continue to monitor housing affordability and access to housing through the European Semester and to give policy guidance to the Member States.</p> <p>Moreover, social housing will be supported in the frame of the 2021-2027 Invest EU programme, which foresees a specific policy window for social investment and skills, with a EU budgetary guarantee of EUR 4 billion. This policy window includes investment in social infrastructure, such as social and student housing.</p>		<p>It is difficult to assess whether the Commission has ‘made better use of the European Semester to monitor and support progress on housing affordability and homelessness’, as requested by the EP.</p> <p>However, under the <a href="#">European pillar of social rights action plan</a> of March 2021, the Commission stated that: ‘Access to affordable housing is an increasing concern in many Member States, regions and cities. Homelessness is increasing in most Member States. While policies to end homelessness can only be successful through a tailored local or regional approach, many stakeholders have called for a European impetus to end homelessness across the EU by 2030.</p> <p>Moreover, energy poverty affects nearly 34 million Europeans who are unable to afford keeping their homes warm, pointing to the lack of access to affordable quality housing for many families. The implementation of the Green Deal, through the <a href="#">renovation wave initiative</a>, the <a href="#">Commission recommendation on energy Poverty</a>, the <a href="#">proposal</a> for a recast of the energy efficiency directive and the steer and guidance for local action by the <a href="#">EU energy poverty observatory</a>, will contribute to alleviate energy poverty and increase the quality of housing, in particular for medium and low-income households.’ The European Pillar of Social Rights Action Plan also included an ‘Affordable Housing Initiative’, to be put</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				<p>forward by the Commission in Q2 2021 (which was presented in October 2021).</p> <p>As part of the renovation wave strategy, the <a href="#">affordable housing initiative</a> intends to make sure social and affordable housing facilities also benefit from the renovation wave. It will guarantee local social housing projects' access to necessary technical and innovation capacity and project support by:</p> <ul style="list-style-type: none"> <li>- Piloting 100 lighthouse renovation districts with a smart neighbourhood approach focused on liveability and innovation, also providing blueprints for replication;</li> <li>- Mobilising cross-sectoral project partnerships and linking them to local actors, such as social economy, SMEs, local authorities, housing associations and civil society;</li> <li>- Promoting efficient access and use of innovative processes such as circular and modular building as well as social innovation and engagement models to empower residents in the renovation process;</li> </ul>	
18)	35. Calls on the Commission and the Member States to develop specific measures to follow up on the European Framework for Action on Mental Health and Wellbeing and the EU-Compass for Action on Mental Health and Wellbeing;	<p>Good mental health is crucial for people's well-being and for Europe's economy. The importance of promoting mental health has been prominently underlined in the Health at a Glance: Europe 2018 report in the State of Health in the EU cycle.</p> <p>The Commission has already taken and supported many actions on mental health in the past decade. The Steering Group on Promotion and Prevention and Management of Non-Communicable Diseases is the central mechanism to support Member States' health objectives. In 2019, this Steering Group has set mental health as a priority for the identification of best practices and implementable</p>		<p>It is difficult to assess whether the action taken by the Commission further to the adoption of the <a href="#">European framework for action on mental health and wellbeing</a> in 2016 and the <a href="#">EU-Compass for action on mental health and wellbeing</a> corresponds to Parliament's request 'to develop specific measures to follow-up on the Framework and EU-Compass'.</p> <p>Under the <a href="#">European pillar of social rights action plan</a> of March 2021, the Commission stated that 'An update of the EU's occupational safety and health strategic framework is required due to the rapid technological and societal changes. The pandemic underlined that adequate health and safety measures are indispensable. The acceleration of digitalisation is</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>research. Consequently, a marketplace workshop showcasing such mental health practices to Member States' representatives took place at the Commission's Joint Research Centre in Ispra in May 2019. This included practices collected via the EU-Compass. For 2020, it is foreseen that EU funding can be used for scaling up several of the highest ranked approaches focusing on promoting mental health and preventing mental ill health.</p> <p>Mental health and well-being are cross-cutting issues that are also dealt with by other sectors. The principle of 'Health in all Policies' can demonstrate very beneficial results here, also building on the European Pillar of Social Rights and other specific instruments that are already in place. The new Multiannual Financial Framework 2021-2027 is expected to allow better coordination of all health-related investment, as the Commission strives for more coherence and synergies between the different EU Programmes and funds.</p>		<p>transforming the very notion of a work environment, the nature and content of work performed, working-time arrangements and workplace relationships. In this context, psychosocial and organisational risk factors may give rise to higher levels of work-related stress, poor mental health as well as ergonomic and safety risks. This is especially challenging for micro enterprises and SMEs.'</p> <p>In the action plan, the Commission announced its intention to present, in Q2 2021, a new occupational safety and health strategic framework 2021-2027, to update protection standards for workers and tackle traditional and new work-related risks. The <a href="#">framework</a> was adopted in June 2021. It takes a tripartite approach — involving EU institutions, Member States, social partners and other stakeholders — and focuses on three key priorities:</p> <ol style="list-style-type: none"> <li>1. Anticipating and managing change in the context of green, digital and demographic transitions;</li> <li>2. Improving the prevention of work-related accidents and diseases, and striving towards a Vision Zero approach to work-related deaths;</li> <li>3. Increasing preparedness to respond to current and future health crises.</li> </ol> <p>In terms of promoting health (including mental health) and ensuring access to healthcare, the Commission, in its European pillar of social rights action plan, also stated that 'Reforms and investments in health systems are required to increase their resilience and capacity to manage current and future crises, to reinforce primary health care and mental health, and to improve access to quality healthcare for all and reduce social, territorial and economic inequalities in health. The Commission supports Member States in</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				these efforts by providing evidence based information and sharing best practices to strengthen health systems.'	
19)	36. The link of the EU funds with the European Semester ensures the translation of the broader EU policy objectives to the Member State level, including regional level, through the Semester country-specific recommendations and the identified policy and investment challenges.</p> <p>As Member States are primarily responsible for the sound management of EU funds and, consequently, for preventing and detecting fraud, the Commission is and will continue to actively assist them by providing guidance, specific trainings and sharing good practices as well as a fraud risk assessment tool. Moreover, Article 125(4)(c) of the Common Provisions Regulation (CPR) outlines that the Managing Authorities must put in place effective and proportionate anti-fraud measures taking into account the risks identified. Under Article 142, the Commission may suspend payments in case there is a serious deficiency in the effective functioning of the management and control system of the operational programme or if expenditure in a statement of expenditure is linked to an irregularity having serious financial consequences, which has not been corrected. Finally, if the irregularity or deficiency continues, the Commission can make financial corrections. Similar provisions are contained in the proposal for 2021-2027. Therefore, the CPR for both the current and next</p>		No further / specific actions proposed/promised to be taken by the Commission as according to the Commission, it has been already working on action falling under the scope of the EP request and will continue to do so in the future.

		programming period include strong provisions for the Member States and the Commission to tackle any misuse, fraud and corruption relating to Union funds.			

## 4.1.13.2. EMPL Resolution 2: EP resolution of 22 October 2020 on the employment and social policies of the euro area 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>The employment and social policies of the euro area 2020</b>	22/10/2020 <a href="#">T9-2020/0284</a> <a href="#">2020/2079(INI)</a> <b>EMPL</b>	<a href="#">SP(2021)9</a>	Final reply (SP) received 5 March 2021	Specific reply			
1)	1. Calls on the Commission to develop a political strategy to replace Europe 2020 which aims to eradicate poverty, bringing together key instruments such as the European Green Deal, the European Pillar of Social Rights and the European Semester with a longer-term vision of an economy of well-being and the sustainability of our environment and social models, in line with the UN SDGs;	Europe's new growth strategy is the European Green Deal, with the overarching target to make Europe climate-neutral by 2050. The twin transition of the green and the digital transformation has to happen in a just and inclusive way. The Commission put this at the heart of its actions, including through the Communication "A Strong Social Europe for Just Transitions" and the Just Transition Mechanism; both presented on 14 January 2020. The National Energy and Climate Plans not only accelerate the modernisation of our economy and drive innovation but also contribute to a fair transition and help create long-term, skilled green jobs. With the Recovery and Resilience Facility (RRF), Member States have the opportunity to frontload reforms and investments to create jobs, boost skills and promote economic and social resilience, creating the basis for a sustainable and future-proof recovery. This was underlined in the Annual Sustainable Growth Strategy 2021. The "up-skill and re-skill" flagship initiative proposed by the Commission in the context of the Facility provides a unique opportunity for Member States to invest in people and provide them with the necessary skills needed for the green and digital transition.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:  - Several communications: a European green deal, 'A Strong Social Europe for Just Transitions' along with the just transition mechanism; the recovery and resilience facility, UN Sustainable Development Goals.  It should be noted that the Commission, on 14 December 2021, presented a <a href="#">proposal</a> for a Council recommendation on ensuring a fair transition towards climate neutrality. The proposal intends to offer guidance to Member States on how to put the right policies and actions in place and how to make full use of the funding options available to achieve a fair and inclusive transition. In particular, the Commission proposes measures that provide targeted support to people, households, sectors and regions that are most affected. Member States are encouraged to act in four policy areas: 1) Active support to quality employment; 2) Equal access to quality and inclusive education, training and lifelong learning; 3) Fair tax-benefit and social protection systems; and 4) Access to affordable essential services and housing.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In the social domain, the Commission will come forward with an Action Plan to implement the European Pillar of Social Rights in early 2021. The Pillar as well as the UN Sustainable Development Goals (SDGs) are fully integrated into the European Semester.</p>		<p>In March 2021, the Commission presented the <a href="#">European pillar of social rights action plan</a> as the Commission's contribution to the Social Summit in Porto on 7-8 May 2021. The Porto Social Summit was intended to rally forces to renew, at the highest political level, the commitment to implement the <a href="#">European pillar of social rights</a>.</p>	
2)	<p>5. [...] and calls on the Member States and the Commission to boost investment in response to the health crisis, especially investment in education, social and healthcare systems; points out that the European Semester still lacks an agenda to monitor and address the increase of inequalities in Europe;</p>	<p>Mitigating the social impact of the crisis and creating employment are among the objectives of the Recovery and Resilience Facility, and the national Recovery and Resilience Plans of Member States should aim at strengthening social resilience and social cohesion and convergence. Along these lines, it is important that Member States use the RRF for investments in human capital and have an inclusive approach towards using all talents and skills. In addition, the Facility sets out the need to pursue reforms that enable education, social and healthcare systems to improve their performance, increase their resilience to future economic shocks and adapt to future challenges, particularly green and digital transitions and the needs of growing economic sectors.</p> <p>The Employment Guidelines and the proposal for the Joint Employment Report 2021 identify priorities for investments, combined with reforms, in the employment and social policy field.</p> <p>Finally, the European Skills Agenda sets out a series of actions that will help steer the investment in people and their skills for a sustainable recovery and ensure that the right to training and lifelong learning, enshrined in the European Pillar of Social Rights, becomes a reality all across Europe. The Commission Communication on Achieving the European</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>- recovery and resilience facility - <a href="#">RRF</a>, 2020 <a href="#">Employment guidelines</a> and 2021 <a href="#">joint report on the application of the employment equality directive and the racial equality directive</a>, 2021 <a href="#">Commission communication on achieving the European education area by 2025</a> and the 2020 <a href="#">European skills agenda</a>).</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as</p>

	<p>5. [...] urges the Commission, therefore, to better assess the distributional impact of public policies, and the imbalances in terms of income and wealth distribution, also through individual in-depth review (IDR) reports if these imbalances are detected, as a way to link economic coordination with employment and social performance;</p> <p>5. [...] calls on the Commission to study which should be the most accurate indicators of economic inequality, and to monitor the evolution of inequalities;</p>	<p>Education Area by 2025 proposes to intensify work on investment in education.</p> <p>The Commission is committed to carrying out comprehensive assessments of public policies, closely monitoring their economic, social, and environmental impact, both in terms of aggregate and distributional effects.</p> <p>Such assessments fall under the scope of the integrated surveillance carried out under the European Semester. Here, in-depth assessments can be made when warranted on specific subjects, including in the context of the Commission's Employment and Social Developments in Europe (ESDE) reviews.</p> <p>The Annual Sustainable Growth Strategy 2021 puts sustainability and wellbeing at its core, by articulating a growth strategy that relies on the four complementary dimensions of prosperity, fairness, stability, and sustainability. These remain the guiding principles for the national Recovery and Resilience Plans currently under preparation by Member States.</p> <p>The Social Scoreboard, which accompanies the European Pillar of Social Rights, already contains a (headline) indicator on income inequality. The Commission will reflect on possible future developments of the Social Scoreboard in the context of the European Semester and the Action Plan implementing the European Pillar of Social Rights.</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>- Better assessment of distributional impact of public policies (as, according to the Commission, this aspect is already covered by its assessments of economic, social and environmental impact of public policies carried out under the European Semester).</p> <p>Under the <a href="#">European pillar of social rights action plan</a>, the Commission proposed three EU headline targets to be achieved by 2030 in the areas of employment, skills and social protection. These targets should allow to measure and monitor progress towards the commitments included in the pillar. The action plan, in Annex 2, contains a revised social scoreboard with, inter alia, new indicators to measure and monitor the evolution of income inequalities ('income quintile ratio' as a new headline indicator; 'income share of the bottom 40% earners' as a secondary indicator').</p>	
3)	<p>8. Welcomes the Commission's SURE proposal as an emergency measure to support Member States' short-time work schemes for the COVID-19 crisis, and, as a result, to increase the chances of companies obtaining the liquidity necessary</p>	<p>The SURE instrument is temporary and limited to the ongoing COVID-19 crisis. It will provide up to EUR 100 billion in loans to the Member States affected by the coronavirus outbreak. The purpose is to finance short-time work schemes, other similar measures, notably for the self-employed, and, to a</p>		<p>With the publication of the <a href="#">European Commission's work programme 2020</a>, on 29 January 2020, the Commission announced its intention to put forward a proposal for a European unemployment reinsurance scheme (EUBRS). The work programme estimated that</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>for resuming economic activity and safeguarding jobs; takes note of the temporary nature of the instrument; invites the Commission, therefore, to examine the possibility of a permanent special instrument to be activated – upon request by Member States – in case of any unexpected crisis that leads to a steady rise in expenditure for short-time work schemes and similar measures;</p>	<p>more limited extent, ancillary health related expenses. The Council has already approved a total of EUR 87.9 billion in financial support to 17 Member States, based on proposals from the Commission. The emergency SURE has been established without prejudice to the possible subsequent establishment of a permanent instrument, in line with the President of the Commission's Political Guidelines. Any decision on a permanent scheme should take into account the experience derived from the implementation of the SURE. The SURE Regulation envisages that the Commission issues every six months a report to the European Parliament, the Council, the Economic and Financial Committee and the Employment Committee on the use of the financial assistance and the continuation of the exceptional occurrences that justify the application of the SURE Regulation.</p>		<p>this would be introduced in the fourth quarter of 2020 (legislative, including an impact assessment). Furthermore, in the beginning of April 2020 as part of the comprehensive economic response to the coronavirus pandemic, the Commission proposed <a href="#">temporary support to mitigate unemployment risks in an emergency</a> (SURE). The SURE instrument is the emergency operationalisation of the EUBRS and is specifically designed to respond immediately to the challenges presented by the coronavirus pandemic. While the SURE instrument as such in no way precludes the establishment of a future permanent EUBRS, the Commission has, as of December 2021, not presented any proposal for such a permanent scheme so far. Under the European pillar of social rights action plan adopted in March 2021, the Commission only presented a new instrument for job creation and job transition from hard-hit sectors to expanding ones ('Effective Active Support to Employment - <a href="#">EASE</a>'). Moreover, no proposal for a permanent EUBRS is foreseen under the <a href="#">European Commission's work programme for 2022</a>, adopted on 19 October 2021. However, in its reply the Commission does not exclude a future proposal on a permanent scheme either (by stating that any decision on a permanent scheme should take into account the experience derived from the implementation of SURE and, in particular, the regular Commission reports, to be issued every six months). Because of a general character of the promise, it is therefore at present unclear if and when the Commission will come up with a proposal.</p>	
4)	<p>10. Calls on the Commission and Member States to ensure that financial assistance is only provided to undertakings not registered in the</p>	<p>The Commission has taken a clear stance against international tax avoidance and evasion in recent years through its External Strategy for Effective Taxation as well as its recent</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already</p>

7)	<p>14. Calls on the Commission and Member States to ensure that the COVID-19 pandemic does not worsen the position of those groups furthest from the labour market, such as informal carers, people with long-term illnesses, disabilities, health problems or complex chronic diseases, migrants and refugees, and people from ethnic and religious minorities;</p>	<p>Disadvantaged groups must receive particular attention. Among others, persons with disabilities have been disproportionately affected by the COVID pandemic. The forthcoming Strategy on the Rights of Persons with Disabilities will reflect on this through the actions taken to promote the economic and social inclusion of persons with disabilities, as well as advance in the implementation of the UN Convention on the Rights of Persons with Disabilities. (See also remarks to paragraph 37).</p> <p>Enhancing access to services will be reflected in a number of the Commission's upcoming initiatives and work-streams, such as the mentioned strategy and the new Action Plan on Integration and Inclusion for people with a migrant background<sup>10</sup>.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>- 2021 <a href="#">strategy for the rights of persons with disabilities 2021-2030</a>, 2020 <a href="#">action plan on integration and inclusion</a>.</p> <p>It should be mentioned that the Commission, in its European pillar of social rights action plan, set the headline target of at least 78% of the population aged 20 to 64 in employment by 2030. To reach this target, the EU must, according to the Commission, strive to 1) at least halve the gender employment gap compared to 2019; 2) increase the provision of formal early childhood education and care (ECEC); and 3) decrease the rate of young people neither in employment, nor in education or training (NEETs) aged 15—29 from 12.6% (2019) to 9%.</p> <p>In the action plan, the Commission also stated that 'Making sure other under-represented groups – e.g. older people, low skilled people, persons with disabilities, those living in rural and remote areas, LGBTIQ people, Roma people and other ethnic or racial minorities particularly at risk of exclusion or discrimination as well as those with a migrant background – participate in the labour market to the maximum of their capacity will also contribute to a more inclusive employment growth. People currently discouraged from actively seeking employment must be encouraged to participate in the labour market for</p>	

<sup>10</sup> See also the responses to paragraphs 26 and 28 related to addressing inequalities, non-discrimination, and support to different vulnerable groups.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				it to rebound quickly. As working lives are extended across the EU due to ageing and policy reforms, the current statistical notion of ‘working age population’ from 20 to 64 warrants examination. The Commission will undertake analytical and statistical work in cooperation with Member States with a view to adjust the current indicator at the occasion of the review of this Action Plan.’	
8)	15. Stresses that small and medium-sized enterprises (SMEs) play a key role in sustainable and inclusive development, economic growth and job creation in the EU; calls on the Commission and the Member States to strengthen their support for SMEs and their workers in the resumption of economic activity and the transition towards a more digital and greener economy;	<p>The SME strategy published in March 2020 dedicates one of its three pillars to capacity-building and support for the transition to sustainability and digitalisation. Its ultimate objective is to unleash the power of Europe’s SMEs of all kinds, to lead the twin transitions, and to considerably increase the number of SMEs engaging in sustainable business practices, as well as the number of SMEs employing digital technologies.</p> <p>Actions under this pillar span from the provision of dedicated sustainability advisors and other sustainability services by the Enterprise Europe Network to the support in digitalisation from the network of 240 Digital Innovation Hubs. The measures also target SME employees – for instance through the Digital Crash courses for SME employees, the Digital Volunteers Programme allowing young skilled people and experienced seniors to share their digital competence with traditional businesses, or the interlink between SME intermediaries (such as clusters like Enterprise Europe Network and European Resource Efficiency Knowledge Centre) to help upskill staff of SMEs in the area of sustainability.</p> <p>Cohesion policy will remain a major source of financial and innovation support to SMEs across Europe, helping Member States to incentivise digitalisation, greening and</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (see <a href="#">SME Strategy</a> ).

		modernisation with the next generation of regional development funding 2021-2027.			
9)	<p>18 [...] calls on the Commission and Member States to support capacity building of the social partners, including through the ESF+ in order to strengthen trade union density, social dialogue, collective bargaining, and the involvement of workers in company matters, and to respect collective agreements in public procurement;</p> <p>Calls on the Commission and Member States to also ensure that the social partners are fully involved in policy-making, including the European Semester;</p>	<p>In its proposal for the ESF+ Regulation, the Commission included an obligation for all Member States to allocate an appropriate amount of their ESF+ resources under shared management in each programme for the capacity building of social partners and civil society organisations.</p> <p>The Commission proposal for a directive on adequate minimum wages in the European Union requires that, in the performance of public procurement and concession contracts, economic operators (including the subcontracting chain thereafter) respect the applicable collectively agreed wages and statutory minimum wages where they exist.</p> <p>The Commission consults social partners on new policy initiatives through formal consultations based on Article 154 of the Treaty on the Functioning of the European Union (TFEU) (e.g. minimum wage) and dedicated hearings (e.g. in 2020 on the Skills Strategy, the new Youth Strategy, binding pay transparency measures, a sustainable mobility strategy, the Child Guarantee). Since 2015, in line with the Employment Guidelines, European and national social partners are consulted at key milestones of the European Semester. In addition, in its 2021 Annual Sustainable Growth Strategy, the Commission urged Member States to engage in a broad policy dialogue with social partners and other relevant stakeholders to prepare their Recovery and Resilience Plans.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>- A proposal for the ESF+ regulation related to capacity building of the social partners and the 2021 Annual Sustainable Growth Strategy related to the involvement/consultation of social partners in policy-making.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	<p>19. Calls on the Commission to identify barriers to social dialogue within the EU, and to present a European framework for minimum wages to eliminate in-work poverty in line with national traditions and with due respect for the autonomy of national social partners and well-functioning collective bargaining models;</p> <p>Asks the Commission, in this regard, to study how to identify what a living wage could encompass, and how it should be measured, which could serve as a reference tool for the social partners;</p>	<p>On 28 October 2020, the Commission adopted a proposal for a directive on Adequate Minimum Wages in the EU, to ensure that workers can enjoy a decent living wherever they work, in full respect of national competences and traditions and of social partners' autonomy and collective bargaining freedom. The proposal recognises the role of well-functioning social dialogue and collective bargaining for adequate minimum wage protection, both in countries where statutory minimum wages exist and are set by law, and in those where minimum wage protection is provided by collectively agreed wages.</p> <p>The Commission proposal aims to promote collective bargaining on wages in all Member States. The countries with a statutory minimum wage are required to put in place the conditions for statutory minimum wages to be adequate, including not only stable and clear criteria and timely updates, but also an effective involvement of social partners in minimum wage setting. In order to monitor the evolution of the situation in Member States, the directive calls for effective data collection and monitoring systems to be put in place, including on collective bargaining coverage.</p> <p>To guide the assessment of statutory minimum wage adequacy, the proposal asks Member States to use indicators such as those commonly used at international level. The concept of living wages is complex to both develop and implement on a cross-country basis; there is no EU definition of a living wage.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2020 <a href="#">proposal</a> on minimum wages).</p> <p>No further / specific actions proposed/promised to be taken by the Commission (as Commission appears sceptical about the concept of living wages).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	<p>21. Calls on the Commission to conduct a comprehensive assessment of the working and employment conditions of frontline and essential workers, platform workers, non-standard workers and workers in precarious forms of employment, identifying the causes of their precarious situation, to present a European regulatory framework with clear and simple guidelines to ensure adequate working hours, decent working conditions for all workers, rights and universal access to social protection, and to strengthen collective bargaining coverage, combat precarious contracts, bogus self-employment, zero-hour contracts and the improper use of non-standard contracts; calls on the Commission to set strict limits on subcontracting practices, and improve social protection standards;</p> <p>[...] calls on the Commission [...] to provide guidelines for testing the employment status of independent contractors so as to combat bogus self-employment;</p>	<p>As announced in the Commission Work Programme 2021, the Commission is preparing an initiative to improve the working conditions of platform workers, aiming to ensure dignified, transparent and predictable working conditions and adequate social protection for platform work. This initiative will be subject to a formal consultation of the European social partners on the direction of possible EU action. In March 2020, the Commission published <a href="#">a study on the working conditions of platform workers</a>.</p> <p>The Commission has also recently published an Inception Impact Assessment on an initiative about <a href="#">collective bargaining of self-employed</a>. The objective of the initiative is to ensure that EU competition law does not stand in the way of the improvement of working conditions through collective agreements for solo self-employed in the platform economy, or possibly, beyond, where they choose to conclude such agreements, while guaranteeing that consumers and SMEs continue to benefit from competitive prices and innovative business models.</p> <p>Directive (EU) 2019/1152 on transparent and predictable working conditions in the EU, which will be implemented by August 2022, creates new rights for protection for non-standard workers and those in precarious forms of employment. This includes not only information rights about their employment relationship but also new material rights, such as the right to compensation, if called to a work assignment that is cancelled at the last minute. The impact assessment<sup>11</sup> underpinning the Commission's proposal contained a detailed assessment of working conditions and</p>		<p>Apart from the initiative to improve the working conditions of platform workers (see <a href="#">proposed directive</a>), no further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>- A <a href="#">proposal</a> on minimum wages, and <a href="#">Directive 2019/1152</a> on transparent and predictable working conditions in the EU, to be implemented by August 2022.</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (guidance to Member States on how to ensure adequate social protection for workers and the self-employed included in the <a href="#">Council recommendation on access to social protection for all</a>).</p>	

<sup>11</sup> SWD(2017)478

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>vulnerabilities of workers. The Commission continues to monitor the implementation of Directive 2003/88/EC on working time, in regular dialogue with the Member State authorities, and will publish a report on the Member States' implementation of the directive in 2022.</p> <p>The Council Recommendation on access to social protection for all provides guidance to Member States on how to ensure adequate social protection for workers and the self-employed. The Commission is supporting the Member States in this endeavour by facilitating mutual learning and strengthening the statistical and analytical base.</p>			
12)	23. Calls on the Commission, therefore, to propose an EU teleworking agenda, including a legislative framework to ensure decent working conditions including respect for working hours, leave, work-life balance and the right to disconnect;	<p>Future reflections on making work regulations fit for the digital age will have to take into account the role of social partners and the importance of implementing measures at company and sectoral level. Social partners already reached a Framework Agreement on Telework in 2002 and a new one on Digitalisation in June 2020.</p> <p>Digitalisation can help both women and men to better reconcile work and private life, if it is combined with care infrastructure in a life course perspective. The Commission's on-going work on the Action Plan to implement the principles of the European Pillar of Social Rights is expected to contribute to developing and expanding care infrastructure in the EU. The Commission will continue supporting the Member States' work on improving the availability and affordability of quality care services for children and other dependents through investments from the European Social Fund Plus (ESF+), the European Regional Development Fund (ERDF), the InvestEU programme, the European Agricultural Fund for Rural Development as well as the Recovery and Resilience Facility in line with country specific recommendations (CSRs) issued in 2019 and 2020. As</p>		<p>It is difficult to tell at this moment in time whether the Commission will comply with Parliament's request (to propose an EU teleworking agenda, including a legislative framework to ensure decent working conditions), as the Commission, on the one hand, seems to consider that it has been already working on action falling under the scope of the EP request:</p> <ul style="list-style-type: none"> <li>- Commission work to implement the social pillar, see 2020 <a href="#">European pillar of social rights action plan</a>; Commission support to Member States to improve availability and affordability of care services for children and other dependents under cohesion and other EU funds; and the planned revision of Barcelona targets on early childhood education and care in line with the EU gender equality strategy 2020-2025).</li> <li>- On the other hand, the reply does not exclude a future proposal on telework.</li> </ul>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>announced in the Gender Equality Strategy 2020–2025, the Commission will propose to revise the Barcelona targets to ensure further upwards convergence among the Member States of the availability of early childhood education and care and monitor the implementation of the Work-Life Balance Directive.</p>		<p>Moreover, under the European pillar of social rights action plan, the Commission states (in the context of telework and, in particular, the EP Resolution on the right to disconnect) that 'Any Commission proposal for a legislative act related to the right to disconnect must be subject under Article 154 TFEU to consultation of the EU social partners, who may decide to act by means of agreements. The Commission invites social partners to find commonly agreed solutions to address the challenges raised by telework, digitalisation and the right to disconnect. The Commission will assess existing practices and rules related to the right to disconnect and will proactively support social partners in their endeavour, facilitating discussions and the identification of best practices. The future implementation report of the Working Time Directive will also provide an opportunity to reflect further on the implications of remote work on working time.' The Commission would therefore 'ensure an appropriate follow-up to the European Parliament Resolution'.</p> <p>It should also be noted that under the Commission work programme 2022 (<a href="#">CWP 2022</a>), the Commission announced, for Q3 2022, a European care strategy (including a communication on a European care strategy, accompanied by the revision of the Barcelona targets, and a proposal for a Council recommendation on long-term care).</p> <p>In terms of availability of affordable and high quality early childhood education, the Commission, in its European pillar of social rights action plan, states that 'On average, the EU has reached the 2002 Barcelona</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				target of 33% of children below the age of 3 in early childhood education and care (35.5% at EU-27 level in 2019) and the target of 90% of children from 3 to primary school going age (90% at EU-27 level in 2019). Significant gaps remain with many Member States not having reached this level, in particular for children from lower income households or for the youngest group of children. A revision of the Barcelona targets will aim at fostering upward convergence across Member States, and hence improve female labour market participation.'	
13)	<p>24. [...] calls on the Commission and the Member States to strengthen the portability of rights and ensure fair and just working conditions for mobile, cross-border and seasonal workers in the EU [...]</p> <p>[...] asks the Commission, therefore, to put forward, following a proper impact assessment, a proposal for a digital EU social security number which also has the potential of establishing a control mechanism for both individuals and relevant authorities to ensure that social security is paid in accordance with obligations;</p>	<p>The Commission is currently exploring different technical and policy options for a possible initiative to digitise the cross-border verification of social security coverage and address challenges in citizens' identification for social security coordination purposes. The aim would be to improve the portability of social security rights and simplify mobile people's interactions with administrations, health care providers and labour inspectorates, while contributing to reducing the risk of errors and fraud. Under EU law, mobile and seasonal workers have the right to equal treatment with national workers regarding any conditions of work and employment. This includes legislation on health and safety at work and it applies to all workers, independently of their nationality. The employers must assess all possible risks at work – including new ones – and put in place adequate preventive and protective measures.</p> <p>In the context of the COVID-19 outbreak, the Commission published several guidelines, including those concerning the exercise of the free movement of workers and those covering the seasonal workers in the EU. The initiatives focus on free and fair movement of workers but also aim to ensure equal treatment, social rights, health and safety, access to public</p>		Because of a general character of the promise, it is unclear whether the Commission will come up with an initiative to digitise the cross-border verification of social security coverage and address challenges in citizens' identification for social security coordination purposes (in order to improve the portability of social rights, as requested by the EP).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>services and decent housing for the most vulnerable categories of mobile workers. The European Agency for Health and Safety at Work has published guidance addressing COVID-19 at the workplace as well as on the return to work.</p> <p>For posted workers in the context of the provision of cross-border services, subcontracting liability had to be introduced according to Article 12 of Enforcement Directive on Posting of Workers (2014/67/EU). For third-country national seasonal workers, Article 17(3) of the Seasonal Workers Directive (2014/36/EU) provides that Member States may hold main contractors and intermediate subcontractors liable to pay compensations or back payments or subject them to sanctions, if the directive is infringed. In 2021, the Commission will launch a study that will look at the situation of posted workers in subcontracting chains.</p>			
14)	<p>25. [...] calls on the Commission to present as soon as possible a new Strategic Framework for Health and Safety, a directive on work-related stress and musculoskeletal disorders, a directive on mental well-being at the workplace, and an EU mental health strategy in order to protect all workers at the workplace;</p>	<p>The European Agency for Safety and Health at Work, in close coordination with the Commission, is playing an essential role in improving health and safety at work in the EU.</p> <p>Following the Commission Work Programme 2021, the Commission will come forward with a new EU strategic framework on health and safety at work. The roadmap for the initiative includes a public consultation (launched on 7 December 2020), as well as a Commission adoption by the second quarter 2021. Important topics such as work-related stress, musculoskeletal disorders and mental well-being and health at the workplace will be carefully considered in the preparation of the Strategic Framework.</p> <p>Investments in occupational health and safety improve job quality and the wellbeing of workers, and contribute to the productivity and competitiveness of the European economy.</p>		<p>On 28 June 2021, the Commission presented a <a href="#">communication</a> entitled 'EU strategic framework on health and safety at work 2021-2027 - Occupational safety and health in a changing world of work'.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		This is clearly reflected both in the EU Strategic Framework on Health and Safety at Work 2014-2020 <sup>12</sup> and in the Commission Communication “Safer and Healthier Work for All - Modernisation of the EU Occupational Safety and Health Legislation and Policy” <sup>13</sup> .			
15)	26. [...] calls on the Commission and the Member States to tackle inequalities and fight discrimination;	<p>The objectives set by the Sustainable Development Goals (SDG) in terms of employment, education and skills, working conditions, fighting poverty and inequality, and promoting equal opportunities and social inclusion while leaving no one behind are being pursued through the European Pillar of Social Rights. As indicated in other paragraphs, the Commission will table an Action Plan to implement the Pillar in early 2021.</p> <p>EU policies on education and skills support the right to education, training and lifelong learning enshrined in the Pillar’s first principle. The Commission Communications on achieving a European Education area<sup>14</sup> and on a European Skills Agenda on sustainable competitiveness, social fairness and resilience<sup>15</sup> provide the framework to create a culture of lifelong learning in Europe and promote innovative and inclusive education, training and lifelong learning for all.</p> <p>NextGenerationEU funding will need to ensure social resilience in line with the Pillar principles by addressing the relevant country-specific challenges. The European Social Fund Plus (ESF+) will continue to support employment,</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:</p> <p>- See in particular European pillar of social rights; communication on achieving a European education area; communication on a European skills agenda and Council recommendation on vocational education and training.</p> <p>- In March 2021, the Commission presented the <a href="#">European pillar of social rights action plan</a> to implement the pillar.</p>

	support protect workers, guarantee decent working conditions, respect trade unions and applicable collective agreements, pay their share of taxes, and refrain from share buybacks or paying out bonuses to management or dividends to shareholders; (...)				
2)	10. [...] Welcomes the announcement by the President of the European Commission proposing an EU Unemployment Benefit Reinsurance Scheme and urges the Commission to present its proposal;	The imminent priority is to combat the virus and its dire socio-economic effects and secure the recovery, while developing and implementing the new instruments established during the crisis, not least SURE and the Recovery and Resilience Facility. As a temporary instrument, SURE provides for an emergency operationalisation of mitigating unemployment risk in the context of the COVID-19 crisis.		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point.</p> <p>In the <a href="#">Commission's work programme 2020</a>, presented on 29 January 2020, the Commission announced its intention to put forward a proposal for a European unemployment reinsurance scheme (EUBRS). The work programme estimated that this would be introduced in the fourth quarter of 2020 (legislative, including an impact assessment). In the beginning of April 2020, as part of the comprehensive economic response to the coronavirus pandemic, the Commission proposed <a href="#">temporary support to mitigate unemployment risks in an emergency</a> (SURE). The SURE instrument is the emergency operationalisation of the EUBRS and is specifically designed to respond immediately to the challenges presented by the coronavirus pandemic. While the SURE instrument as such in no way precludes the establishment of a future permanent EUBRS, the Commission has, as of December 2021, not presented any proposal for such a permanent scheme so far. Moreover, no proposal for a permanent EUBRS is foreseen under the <a href="#">Commission's work programme for 2022</a>, adopted on 19 October 2021. Under the European pillar of social rights action plan adopted in</p>

			<p>addressing the challenges relating to working conditions in platform work<sup>48</sup>.</p> <p>The Action Plan also highlights several planned initiatives at EU level to improve working conditions in the EU. The Commission will notably present in the second quarter of 2021 a new Occupational Safety and Health Strategic Framework 2021—27, to update protection standards for workers and tackle traditional and new work-related risks. It will also put forward an initiative in the fourth quarter of 2021 to ensure that EU competition law does not stand in the way of collective agreements for (some) self-employed. Following the White Paper on Artificial Intelligence, the Commission will propose an EU regulation on Artificial Intelligence (AI) in the second quarter of 2021, for the uptake of trustworthy AI use in the EU economy, including in the workplace for all forms of work.</p> <p>In 2022, the Commission will present a report on the implementation of the Working Time Directive.</p> <p>It will also ensure an appropriate follow-up to the European Parliament resolution with recommendations to the Commission on the right to disconnect.</p>		<p>Moreover, on 9 December 2021, the EC presented <a href="#">draft guidelines on the application of EU competition law to collective agreements</a> regarding the working conditions of solo self-employed people providing services, with a public consultation open until February 2022, with the aim of adopting the final guidelines in Q2 2022. The draft guidelines are linked to the <a href="#">proposal</a> published on the same day to improve the working conditions in platform work. However, the scope of the draft guidelines is not limited to the online platform economy. On 21 April 2021, the Commission published a <a href="#">proposal</a> for a regulation on artificial intelligence.</p>	
12)	23. Calls on the Commission and the Member States to ensure the revision of the EU Employment Guidelines no later than one year after their adoption in 2020, in order to take into account the COVID-19 crisis and its social and employment consequences, and to respond better to similar future crises [...]		<p>Article 148 (2) TFEU sets out the rules of the procedure:</p> <p>“On the basis of the conclusions of the European Council, the Council, on a proposal from the Commission and after consulting the European Parliament, the Economic and Social Committee, the Committee of the Regions and the Employment Committee referred to in Article 150, shall each year draw up guidelines which the Member States shall take into account in their employment policies.”</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point ('revision of the EU Employment Guidelines no later than one year after their adoption in 2020') as according to the Commission, it has been already working on action falling under the scope of the EP request (see amendment of <a href="#">proposal on 2020 employment guidelines</a> on 26 February 2020 to take into account the COVID-19 crisis). It should be noted that the Commission presented a <a href="#">proposal</a> for a</p>

		To reflect and to take into account the COVID-19 crisis and its social and employment consequences, and to respond better to similar future crises, the proposal on Employment Guidelines submitted by the Commission on 26 February 2020 has been further amended, also taking into account changes proposed by the European Parliament, before adoption by the Council on 13 October <sup>49</sup> .		Council decision on employment guidelines in June 2021 which was subsequently adopted on 15 October 2021 (see final <a href="#">Council decision</a> ).	
13)	24. [...] calls on the Commission and the Member States to work towards the objective of eliminating involuntary temporary and involuntary part-time employment by 2030 and towards the target of 80 % of jobs created being middle- or high-paying and concentrated in sustainable sectors; urges the Commission and the Member States to eliminate the practices of zero-hour contracts and bogus self-employment;	<p>In line with the European Pillar of Social Rights, eliminating involuntary temporary and involuntary part-time employment is one of the priorities in the EU guidelines for employment policies which stipulate that working conditions “should reduce and prevent segmentation within labour markets” and that “Employment relationships that lead to precarious working conditions should be prevented, including in the case of platform workers and by fighting abuse of atypical contracts”<sup>50</sup>. This is primarily obtained when designing and implementing the comprehensive set of labour market policies advocated in the EU guidelines for employment policies.</p> <p>Directive (EU) 2019/1152 on Transparent and Predictable Working Conditions in the EU creates new protections for workers on on-demand contracts, including those on zero-hour contracts<sup>51</sup>. It requires the Member States to implement measures to prevent abuse of such contracts, requires employers to define time slots in which workers on unpredictable schedules have a right to refuse a call, requires compensation for late cancellation of a work assignment, and requires such workers to be provided with additional information on their working conditions. The</p>		The action (implementation of Directive (EU) 2019/1152 on transparent and predictable working conditions in the EU will be completed in August 2022.

		measures aiming to improve the framework conditions for social economy organisations and social enterprises.			
22)	34. [...] calls on the Commission and the Member States to speed up the adoption and implementation of the European Child Guarantee so that by 2030 every child in the EU has full access to quality and free healthcare, education and childcare, is living in decent housing and receives adequate nutrition[...]	<p>The European Pillar of Social Rights Action Plan puts forward an EU-headline target aimed at reducing the number of people at risk of poverty or social exclusion by at least 15 million by 2030. Out of these 15 million people, at least 5 million should be children.</p> <p>To contribute to the achievement of this objective, and in line with the Commission Work Programme 2021, the Commission is committed to adopt a proposal for a Council Recommendation establishing a European Child Guarantee by the end of the first quarter of 2021.</p> <p>Moreover, in line with the Regulation on the European Social Fund Plus (ESF+) at least 25% of the ESF+ resources at national level should be spent to combat poverty and social exclusion, out of which the Member States most affected by child poverty should invest at least 5% in measures combating child poverty. All others should equally allocate appropriate amounts to implement the forthcoming Child Guarantee. In addition, all Member States will need to dedicate at least 3% of their ESF+ share to fight material deprivation.</p>		On 24 March 2021, the Commission published a proposal for a Council <a href="#">recommendation establishing a European child guarantee</a> .	
23)	36. Welcomes the Council conclusions on strengthening minimum income protection to combat poverty and social exclusion; invites the Commission to further develop on these conclusions, proposing a framework for minimum income schemes, with the purpose of	The Commission welcomes the mentioned Council conclusions, which invite the Commission to initiate an update of the Union framework to effectively support and complement the policies of Members States on national minimum income protection. As announced in its Action Plan to implement the European Pillar of Social Rights, the		Under the Commission Work Programme 2022, the Commission plans to present a proposal for a Council recommendation on minimum income in Q3 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	safeguarding the right to a decent life and eradicating poverty and addressing the questions of adequacy and coverage, including a non-regression clause[...]	<p>Commission will propose a Council Recommendation on minimum income in 2022 to effectively support and complement the policies of the Members States.</p> <p>In addition to its monitoring under the Semester, the Commission engages in various mutual learning activities, in particularly the recently established Minimum Income Network of public authorities, which facilitates the exchange of best practices and the networking of national contact points for cross-country assistance. A periodical joint report with the Social Protection Committee, based on the established benchmarking framework will be developed, covering the dimensions of access (coverage), adequacy and enabling aspects of minimum income protection.</p> <p>The Commission will also finance an overarching study to fill up EU level information gaps in certain aspects of the national schemes and co-fund local/ regional-level projects to put in place comprehensive systems to support people in (the most) vulnerable situations. The selected projects will test innovative approaches for the integrated delivery of the three strands of active inclusion: adequate income support with labour market activation and effective access to enabling goods and services.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	<p>37. Calls on the Member States and the Commission to commit to eliminating the gender pay gap, which is currently 16 % - and the resulting pension gap - with a 0 % target for 2030, by championing the principle of equal pay for equal work for women and men; calls on the Commission to urgently present a legal framework on pay transparency, as originally promised for its first 100 days, including pay transparency reporting and information on pay levels; reiterates that the gender pension gap also results from inadequate pension schemes which do not appropriately take into account periods of maternity or parental leave; calls on the Commission and the Member States to take long-term measures to reduce the high unemployment rates among women and ensure women's participation in the labour market, to ensure equal participation and opportunities for men and women in the labour market, and to introduce initiatives to promote women's access to finance, female entrepreneurship and women's financial independence;</p>	<p>Consolidated reply to points 37, 38, 39 and 45:</p> <ul style="list-style-type: none"> <li>As argued in the European Pillar of Social Rights Action Plan, and in order to reach the EU headline target on employment with the ambition of having at least 78% of the population aged 20 to 64 in employment by 2030 put forward in the Action Plan, "Europe must strive to:</li> <li>at least halve the gender employment gap compared to 2019. This will be paramount to progress on gender equality and achieve the employment target for the entire working age population.</li> <li>increase the provision of formal early childhood education and care (ECEC), thus contributing to better reconciliation between professional and private life and supporting stronger female labour market participation."</li> </ul> <p>In order to support the increase of the provision of ECEC, the Commission will present in 2022 a revision of the Barcelona targets on early childhood education and care.</p>		<p>In its reply, the Commission considers that it has taken in several areas covered by the EP request ('close the gender pay and pension gap' 'present a legal framework on pay transparency', 'take long-term measures to reduce the high unemployment rates among women and ensure women's participation in the labour market'), but also announces further action (in particular, revision of Barcelona targets on early childhood education and care, elimination of gender pay gap by addressing all of its root causes in line with the gender equality strategy 2020-2025, and mapping of best practices in providing pension rights for care-related career breaks in pension schemes and promoting the exchange of practices among Member States, social partners and pension stakeholders).</p>	
25)	<p>38. Calls on the Commission to introduce concrete measures applying to both public and private sectors with due account taken of the specificities of small and medium-sized enterprises, such as the clear definition of criteria for assessing the value of work, gender-neutral job evaluation and classification systems, gender pay audits and reports to guarantee equal pay, workers' entitlement to request full pay</p>	<p>Eliminating the gender pay gap requires addressing all of its root causes, including women's lower participation in the labour market, invisible and unpaid work, their higher use of part-time work and career breaks, as well as vertical and horizontal segregation based on gender stereotypes and discrimination. Specific challenges are faced by rural women where the gender pay gap is pronounced, in particular due to invisible and unpaid work. The Commission is committed to address all these priorities along the lines defined in the Gender Equality strategy 2020-2025<sup>74</sup>.</p>			

<sup>74</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A52020DC0152>

		<p>recovery and resilience plans to prioritise renovation and affordability.</p> <p>[...]</p> <p>The Commission supports the adoption of national strategies aiming at the eradication of homelessness in Member States. It considers that the “Housing First” model has a potential to combat homelessness, since it combines the provision of social or public housing with enabling social and employment services, to support the social inclusion of homeless persons and their integration in the labour market.</p> <p>[...] In relation to better data collection on homeless people, the Commission provided the following reply to EP resolution on employment and social policies 2020 in the euro area:</p> <p>It (NB: The European Platform on Combatting Homelessness) will be complemented by a housing exclusion policy toolkit, which will analyse challenges, measures and ways to monitor progress.</p>		<p>‘Affordable Housing Initiative’. Presented by the Commission in October 2021 as part of the renovation wave strategy, the <a href="#">affordable housing initiative</a> intends to make sure social and affordable housing facilities also benefit from the renovation wave.</p> <p>In November 2020, the Commission launched a call for tender for a <a href="#">problem tree analysis and production of policy toolkit</a>.</p>	
32	<p>47. [...] calls on the Commission and the Member States to maximise efforts as regards investing in affordable housing to cover the housing needs of the low- and middle-income groups (the three bottom quintiles), ensuring that at least 30 % of all newly built houses constitute affordable housing for both of these income groups, and to eliminate energy poverty by 2030 through supporting energy efficiency investment by low-income households; calls on the Member States to prioritise renovation in their recovery and resilience plans;</p>	<p>The Commission’s 14 October 2020 Renovation Wave Strategy helps ensure universal access to decent, safe and affordable housing. With the Renovation Wave, the Commission is also acting to maximise investments in affordable housing across the EU and for higher energy efficiency in low-income households by:</p> <p>Strengthening information, legal certainty and incentives for public and private owners and tenants to undertake renovations.</p> <p>Ensuring adequate and well-targeted funding, for example through guidance during the preparation of the national recovery and resilience plans to prioritise renovation and affordability.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Urges the Commission to come up with an ambitious action plan to progressively eradicate homelessness by 2030, including a European-wide 'Housing First' approach;</p> <p>Calls on the Commission to propose an EU framework for national homelessness strategies;</p> <p>Calls on the Commission and the Member States to ensure minimum standards for quality housing for cross-border and seasonal workers, which should be decoupled from their remuneration, as well as ensuring decent facilities, tenant privacy and written tenancy contracts enforced by labour inspectorates and establishing standards in this regard;</p>	<p>Increasing the capacity to implement projects through scaled up technical assistance that is closer to the regional/ local level.</p> <p>One of the Strategy's three focus areas is tackling energy poverty and worst-performing buildings.</p> <p>To support Member States' efforts, the Commission has issued a Recommendation on energy poverty<sup>80</sup>. It also continues to support the EU Energy Poverty Observatory, which collects data, develops indicators and disseminates best practices for tackling energy poverty.</p> <p>The Commission's is developing the Affordable Housing Initiative which has as a key objective to pilot the renovation of 100 lighthouse social and affordable housing districts and support the creation of local long term partnerships.</p> <p>As an ongoing progress, the Commission's monitoring of national energy and climate plans and long-term renovation strategies shall contribute to the progress made by the Renovation Wave and other Green Deal initiatives with a focus on delivering a just and fair transition.</p> <p>The Commission supports the adoption of national strategies aiming at the eradication of homelessness in Member States. It considers that the "Housing First" model has a potential to combat homelessness, since it combines the provision of social or public housing with enabling social and employment services, to support the social inclusion of homeless persons and their integration in the labour market.</p> <p>As part of the European Pillar of Social Rights Action Plan, the Commission committed to launch in the second quarter of 2021 a European Platform on Combating Homelessness to support Member States, cities and service providers in</p>		<p>As stated in the reply, the Commission has taken different strands of action covered by the EP request. Under the <a href="#">European pillar of social rights action plan</a> of March 2021, the Commission stated that: 'Access to affordable housing is an increasing concern in many Member States, regions and cities. Homelessness is increasing in most Member States. While policies to end homelessness can only be successful through a tailored local or regional approach, many stakeholders have called for a European impetus to end homelessness across the EU by 2030. Moreover, energy poverty affects nearly 34 million Europeans who are unable to afford keeping their homes warm, pointing to the lack of access to affordable quality housing for many families. The implementation of the Green Deal, through the <a href="#">renovation wave initiative</a>, the <a href="#">Commission recommendation on energy poverty</a>, the <a href="#">proposal</a> for a recast of the energy efficiency directive and the steer and guidance for local action by the <a href="#">EU energy poverty observatory</a>, will contribute to alleviate energy poverty and increase the quality of housing, in particular for medium and low-income households.' The European Pillar of social rights action plan also included an 'Affordable Housing Initiative', to be put forward by the Commission in Q2 2021 (and which was presented in October 2021). As part of the renovation wave strategy, the <a href="#">affordable housing initiative</a> intends to make sure social and affordable housing</p>

		sharing best practices and identifying efficient and innovative approaches.		facilities also benefit from the renovation wave. On 21 June 2021, the Commission published a <a href="#">European platform on combatting homelessness</a> .	
33)	49. [...] calls on the Commission to develop common indicators and methodologies to monitor health, as well as the performance and accessibility of healthcare systems, with a view to reducing inequalities, identifying and prioritising areas in need of improvement and obtaining increased funding; calls on the Commission to analyse how the different national social welfare systems are covering social welfare needs during the current crisis, in order to identify strengths and weaknesses regarding access to and provision of services and social protection, and to ensure a mechanism for the monitoring and evaluation of social welfare systems in Europe, in order to verify their degree of resilience when they undergo shocks of different degrees of severity and study in what way they can be made more resilient and robust to resist future crises;	<p>The yearly EU monitoring on SDG 3<sup>81</sup> includes indicators on health status, health determinants and access to healthcare. All indicators are broken down by age, sex and socioeconomic status. They provide useful measurements of health inequalities.</p> <p>The 2019 Companion Report<sup>82</sup>, published in the context of the State of Health in the EU<sup>83</sup>, stressed problems with effectiveness of health coverage. There are persisting gaps in access to healthcare, which are linked to various layers of vulnerability, whether socio-economic conditions or particular disease or health problem. These challenges tend to be obscured, due to a lack of adequate tools to capture them.</p> <p>As part of the Commission's work, focus is put on improving accessibility metrics. The Commission will publish a report in 2021, developed in co-operation with the Expert Group on Healthcare System Performance Assessment<sup>84</sup>, which will propose better tools to capture problems in access to healthcare. These tools may be useful in the discussion on how to better align health coverage with health profiles and how to ensure a stronger patient perspective in policies on access to healthcare. These instruments also place health equity at the centre of the attention, because they allow capturing various layers of vulnerability and cumulative</p>		While the Commission in its reply mentions different actions already taken in the past or ongoing, it also announces several actions to be taken in the future.

	protect workers' mobility, also having the potential of establishing a control mechanism for both individuals and relevant authorities to ensure that workers are covered and social security is paid in accordance with obligations, such as a personal labour card, and that EU rules on labour mobility and social security coordination are enforced in a fair and effective way [...]	<i>the portability of social security rights across borders (European Social Security Pass), building on the initiative for a trusted and secure European e-ID (Q2 2021)."</i>		according to the Commission, it has been already working on action falling under the scope of the EP request. In particular, and as announced in the <a href="#">European pillar of social rights action plan</a> of March 2021, the Commission launched, in cooperation with the Italian social security institution, Istituto Nazionale della Previdenza Sociale (INPS), a pilot project to explore by 2023 the feasibility of introducing a European social security pass.  Moreover, the Commission proposed, on 3 June 2021, a <a href="#">framework for digital identity for all Europeans</a> .	
44)	61. Invites the Commission to study the possibilities of enabling third-country national workers to obtain work permits in the EU, under the precondition that all safeguards in national and EU labour law are effectively ensuring protection and decent working conditions for third-country nationals too and that this will not result in labour market distortions;  Asks the Commission to conduct an extensive investigation into the trends characterising posted third-country nationals with regard to their working conditions, and emphasises the need for possible policy measures at EU or national level based on the outcome of the investigation [...]	EU legislation already covers rules for admission and residence of third-country workers. In particular, it provides that third-country workers enjoy equal treatment with national workers, in terms of working conditions and social security. All safeguards in national and EU labour law already apply to third-country workers.  In its new Pact on migration and asylum adopted in September 2020 <sup>102</sup> , the Commission announced it would review the existing framework legislation on third-country workers (the Single permit Directive 2011/98/EU <sup>103</sup> ) by the end of 2021. One of the objectives of the review is to explore the possibility of introducing specific measures to prevent and fight labour exploitation of third-country workers.  With regard to investigations on possible abuses of posting of third-country workers from one EU Member State to another, it is within the remit of the European Labour Authority.		No further / specific actions proposed/promised to be taken by the Commission on this particular point ('study the possibilities of enabling third-country national workers to obtain work permits in the EU', 'conduct an extensive investigation into the trends characterising posted third-country nationals with regard to their working conditions' and 'ensure compliance with applicable laws and rules on employment conditions when dealing with third-country nationals'), as according to the Commission it has been already working on action falling under the scope of the EP request (existing EU legislation already applies to third country nationals).

<b>Access to decent and affordable housing for all</b>	21/01/2021 <a href="#">T9-0020/2021</a> <a href="#">2019/2187(INI)</a> EMPL	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	Specific reply			
1)	1. Calls on the Commission and the Member States to make ensure that the right to adequate housing is recognised and enforceable as a fundamental human right through applicable European and national legislative provisions; Calls on the Commission and the Member States to ensure equal access for all to decent housing, including clean and high-quality drinking water, adequate and equitable sanitation and hygiene, connection to sewage and water networks, a high quality indoor environment and to affordable, reliable, sustainable energy for all, thereby contributing to eradicating poverty in all its forms, protecting the human rights of disadvantaged households and supporting the most vulnerable groups, so as to protect their health and well-being;	<p>The Commission shares the concerns raised in the resolution on housing affordability and quality issues, and their social and macroeconomic implications. A decent home is essential to health and well-being. This is further underlined by rising trends of homelessness in the EU and the COVID-19 crisis, which has demonstrated once again the vulnerability of persons and families who experience homelessness.</p> <p>These challenges should be addressed in the way out of the crisis, and the Commission will support the Member States mobilizing all the instruments at their disposal.</p>				No further/specific actions proposed/promised to be taken by the Commission.	
2)	2. [...] Calls on the Commission to ensure that electricity suppliers adopt protection schemes to guarantee the domestic energy supply of those most in need, since access to basic utility services such as water, electricity and sanitation is essential for meeting sustainable development goals;	<p>Guaranteeing the domestic energy supply of those most in need (paragraph 2) is a key concern of the 'Clean Energy for All Europeans'<sup>105</sup> legislative package. Designed to facilitate a fair energy transition, it provides structural remedies to the issue. The pieces of legislation will ensure that energy poverty is addressed exhaustively and comprehensively in the new governance framework, and the mix of energy policy measures implemented under both the national energy and climate plans (NECP) and national long-term renovation strategies (LTRS). Member</p>				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2019 <a href="#">clean energy for all Europeans package</a> , national energy and climate plans (NECP) and national long-term renovation strategies (LTRS)).	

<sup>105</sup> [https://ec.europa.eu/energy/topics/energy-strategy/clean-energy-all-europeans\\_en](https://ec.europa.eu/energy/topics/energy-strategy/clean-energy-all-europeans_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>States are required to ensure a universal service to all households customers, and where appropriate, small enterprises. This includes electricity supply of a specified quality within their territory at reasonable, easily and clearly comparable, transparent and non-discriminatory prices. To ensure the provision of universal service, Member States may appoint a supplier of last resort.</p> <p>On protection schemes, (paragraph 2), the Commission recognises that social protection systems are important to prevent and mitigate the consequences of energy poverty. For instance, different forms of social benefits can help tackle energy poverty indirectly by increasing the disposable income of low-income households. Social housing can provide low-income households with relatively energy-efficient housing, thereby lowering their energy bills. Energy bill support and social tariffs providing targeted financial support to help households pay their energy bills also reduce immediate pressures on the energy-poor.</p>			
3)	4. Calls on the Commission and Member States to prioritise emissions reductions and energy efficiency through housing renovation; [...]	Energy policy also plays a fundamental role, especially where energy poverty and poor energy efficiency are linked. Energy efficiency improvements to infrastructure and renovation of buildings should prioritise buildings with energy-poor households. In the Renovation Wave framework <sup>106</sup> , the Commission adopted a Recommendation on Energy Poverty (SWD(2020)960) which lays out the best options for structural remedies to guarantee the domestic supply of those most in need. This recommendation informs Member States' monitoring of		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2020 <a href="#">renovation wave framework</a>, 2020 <a href="#">recommendation on energy poverty</a>).</p> <p>It should be noted that on 14 July 2021, the Commission presented, as part of its 'Fit for 55' legislative package, a <a href="#">proposal</a> for a substantial</p>	

<sup>106</sup> [https://ec.europa.eu/energy/topics/energy-efficiency/energy-efficient-buildings/renovation-wave\\_en](https://ec.europa.eu/energy/topics/energy-efficiency/energy-efficient-buildings/renovation-wave_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>progress in their national energy and climate plans and national long-term renovation strategies and the configuration of national Recovery and Resilience Plans. In relation to paragraph 4, the Renovation Wave initiative (COM(2020)662) aims also to at least double the annual energy renovation rate of residential and non-residential buildings by 2030. The Commission's EU Energy Poverty Observatory<sup>107</sup> will continue to monitor support schemes in the Member States, with a special focus on the local level. The Observatory will be providing technical assistance to municipalities with regional specificities and which may serve to replicate solutions across a variety of energy poverty situations.</p> <p>The Commission is also currently revising the Energy Efficiency Directive (Directive 2012/27/EU as amended by Directive 2018/2002)<sup>108</sup>. Various policy options are being considered and assessed, which could lead to additional energy savings and greenhouse emission reductions in the building sector. Those would include increasing the energy efficiency targets, strengthening the energy savings obligations and extending the renovation obligation to include possibly all public buildings.</p> <p>The quality and energy performance of buildings have a major impact on affordability of housing and therefore low energy efficiency is one of the main causes of energy poverty. Almost 75% of the existing building stock in the EU is inefficient and the weighted annual energy renovation rate, meaning the annual reduction of primary</p>		<p>revision ('recast') of the energy efficiency Directive (which is currently negotiated by the co-legislators).</p>	

<sup>107</sup> <https://www.energy-poverty.eu/>

<sup>108</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1399375464230&uri=CELEX:32012L0027>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		energy consumption, within the total stock of buildings (residential or non-residential respectively) achieved through the sum of energy renovations of all depths, is low at some 1%. Building renovation is one of the sectors facing the largest investment gap in the EU. In order to achieve the objectives of the European Green Deal, and reach the proposed 55% climate target by 2030, around EUR 275 billion of additional investment in building renovation is needed every year. Furthermore, in the context of the post-COVID-19 recovery, it is worth highlighting the huge potential of energy efficiency investments in term of local economies development and jobs creation, and in particular the renovation of buildings.			
4)	7. Notes that in order to provide incentives for renovations, in particular in multi-apartment buildings, participation, communication and financial incentives will be key; Calls on the Commission, Member States and financing institutions to ensure broad availability of renovation funding, and eligibility for all ownership categories to it, including in situations where there are no homeowners associations;	Although the follow-up does not mention point 7 specifically, the Commission refers to funding of renovation and energy efficiency in its reply to point 8 (see below).		See below.	
5)	8. Calls on the Commission to prioritise the Renovation Wave in the multiannual financial framework and Next Generation EU, putting people in vulnerable situations at the centre of recovery policies, and to ensure equal access to renovation projects for all, as investment in this field can act as a	Concerning the financial opportunities (paragraph 8), the Recovery <sup>109</sup> package and the next Multiannual Financial Framework (MFF) are a unique opportunity to scale-up investments in the field of energy efficiency and buildings renovation.		While the Commission in its reply refers to several actions and instruments already taken or in place: - <a href="#">Renovation wave framework</a> , recovery and resilience package including the recovery and resilience facility (RRF) - 'Renovate' priority flagship component	

<sup>109</sup> [https://ec.europa.eu/info/strategy/recovery-plan-europe\\_en](https://ec.europa.eu/info/strategy/recovery-plan-europe_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	countercyclical intervention with a substantial job-creation potential;	<p>The Renovation Wave, published on 14 October 2020, was well accepted by the European Council and the European Parliament as well as by stakeholders and national administrations. It endorses a holistic approach for the future built environment and contributes to the EU recovery strategy through a wave of renovations of European homes, workplaces, schools, hospitals and public building in order to transform them into healthier, greener, smarter, more accessible, resilient and future-proof buildings. One of the basic principles of the Renovation Wave is to protect the right of everyone to have affordable, liveable, accessible and healthy housing, while safeguarding cultural heritage and making energy-performing and sustainable buildings widely available, in particular for medium and lower-income households and vulnerable people and areas. The main facility, which will support energy efficiency and specifically buildings renovation measures in the next four years, will be the Recovery and Resilience Facility<sup>110</sup>. It will make available to Member States a total of EUR 672.5 billion in non-repayable financial support and loans. As part of its guidance to the Member States on the preparation of the national Recovery and Resilience Plans, the European Commission has published the “Renovate” priority flagship component<sup>111</sup>. These components are identified as priority areas to be included in the national recovery plans for their envisaged contribution to a widespread, resilient and sustainable European recovery.</p>		<p>- MFF 2021-2027 including the clean energy transition sub-programme of the <a href="#">LIFE Programme</a>, <a href="#">Horizon Europe</a> and InvestEU</p> <p>It nevertheless acknowledges that current funding will not be sufficient to meet the target of doubling renovation rates by 2030 as foreseen under the renovation wave.</p> <p>It therefore announces its intention to strengthen technical assistance support through instruments like the <a href="#">European local energy assistance (ELENA)</a>.</p>	

<sup>110</sup> [https://ec.europa.eu/info/business-economy-euro/recovery-coronavirus/recovery-and-resilience-facility\\_en](https://ec.europa.eu/info/business-economy-euro/recovery-coronavirus/recovery-and-resilience-facility_en)

<sup>111</sup> Annual Sustainable Growth Strategy 2021 - COM(2020) 575 final; <https://www.energy-poverty.eu/>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Other sources of funding for energy efficiency investments from the EU budget are mainstreamed across different programmes and financing instruments. Among the centrally managed EU Programmes in the next MFF, the LIFE Programme<sup>112</sup> within its Clean Energy Transition Sub-Programme, and Horizon Europe<sup>113</sup> will have a specific focus on the challenges of buildings' renovation. The LIFE Clean Energy Transition sub-programme will have a specific focus on approaches to buildings renovation in vulnerable districts and fighting energy poverty through energy efficiency improvements. Within the Social Investment and Skills Window and the Sustainable Infrastructure Window of the InvestEU fund, dedicated financial products for energy renovation of buildings will target the residential sector and focus on social and affordable housing, public buildings, schools and hospitals, small and medium-sized enterprises (SMEs) and support for energy service companies to mainstream energy performance contracting.</p> <p>Despite the significant amounts of public funding that will be available in the MFF programmes and recovery funds to finance the renovation wave, it should be noted that public funds and grants alone would not be sufficient to meet the target of doubling renovation rates by 2030. Therefore, the Commission will strengthen technical assistance support through instruments like the European Local Energy Assistance (ELENA)<sup>114</sup>, which can also be replicated at</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		national or regional level, to leverage private financing and build a pipeline of large buildings renovation projects.			
6)	9. [...] Calls on the Commission and the Member States to introduce green social housing in their housing investment plans, including social housing sustainability criteria;	<p>On investments on green social housing and affordable housing (paragraphs 9 and 51), the Commission acknowledges that there is a major gap in investment to social and affordable housing in the EU, estimated at EUR 57 billion per year<sup>115</sup>. The share of expenditure on housing and community amenities of EU Member States decreased from 0.9% to 0.6% of gross domestic product (GDP). The cohesion policy and the Recovery and Resilience Facility provide an important opportunity for Member states to enhance investment in environmentally sustainable social housing.</p> <p>Within the revision of the Energy Efficiency Directive ((Directive 2012/27/EU as amended by Directive 2018/2002), the Commission considers extending the renovation obligation to all public buildings, which would include also publicly owned social housing. The Commission believes that social housing can spearhead the Renovation Wave, serving as a role model and reference point for the industrialisation of construction and the co-benefits that become immediately visible to the public. Social housing units, often owned by public authorities, can be the demonstrators for innovate solutions and latest state-of-the art technologies for smart buildings. It would boost technology development, innovation and a diverse local economic ecosystem.</p>		The Commission considers that existing EU policies/instruments such as - EU cohesion policy, the recovery and resilience facility, the <a href="#">Commission recommendation on building renovation</a> and the <a href="#">clean energy for all Europeans</a> package - provide an important opportunity for Member States to introduce green social housing (social housing sustainability criteria) and to enhance investment in environmentally sustainable social housing. The Commission also refers to the (currently ongoing) revision of the Energy Efficiency Directive. In its <a href="#">proposal</a> , presented in July 2021, as mentioned, the public sector will be required to renovate 3% of its buildings each year (which seems less, however, than what the Commission announced in its reply where it spoke about extending the renovation obligation to all public buildings).	

<sup>115</sup> High Level Task Force on Investing in Social Infrastructure in Europe (known as the Prodi Report).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>It is important to recall that Commission Recommendation (EU) 2019/786 on building renovation provided a first overview of examples of good practices, notably as regards social housing and delivering advisory services to energy poor households. Furthermore, the new models of renewable and energy communities that have been promoted by the Clean Energy Package can be an opportunity for Member States to introduce green social housing and to introduce social housing sustainability criteria. In addition, improving living conditions of the most vulnerable through renovation of social housing would reduce energy poverty and bring long lasting social benefits<sup>116</sup>.</p>			
7)	<p>10. Calls on the Commission to ensure that under public procurement rules innovation and long-term partnerships for renovation in the social housing sector are possible, such as the smart neighbourhood approach proposed under the Affordable Housing Initiative in the Renovation Wave;</p>	<p>On the call to ensure that under public procurement rules innovation and long-term partnerships for renovation in the social housing sector are possible (paragraph 10), the Commission encourages managing authorities to make use of green, social and innovative criteria in their public procurement rules and of the guidance on social public procurement<sup>117</sup>, when implementing cohesion policy funding. This applies to the potential financial support provided to the renovation of buildings, including in social housing. For instance, to promote the use of strategic procurement in the context of cohesion policy, in joint work with the Organisation for Economic Co-operation and Development (OECD), the Commission finances a pilot project<sup>118</sup> to offer practical "hands-on" support to five</p>		<p>In its reply, the Commission states that it is currently already encouraging managing authorities to make use of green, social and innovative criteria in their public procurement rules, as well as to make use of its guidance on social public procurement, when implementing EU cohesion policy funding (e.g. joint pilot project with OECD). As regards the affordable housing initiative, the Commission announces the set-up of a European partnership and the start of several pilots to support the testing of practices in a district approach.</p> <p>It should be noted that the 2021 <a href="#">European pillar of social rights action plan</a> included an 'Affordable Housing Initiative' which was presented by the Commission in October 2021. As part of the renovation</p>	

<sup>116</sup> By way of example, Belgium and the Netherlands host several projects designed to moderate energy demand by focusing on retrofitting social housing: <https://aster.vlaanderen.nl/english-summary> <https://energiesprong.org>; <https://cordis.europa.eu/project/id/696186>

<sup>117</sup> [https://ec.europa.eu/info/policies/public-procurement/support-tools-public-buyers/social-procurement\\_en](https://ec.europa.eu/info/policies/public-procurement/support-tools-public-buyers/social-procurement_en)

<sup>118</sup> <https://www.oecd.org/gov/public-procurement/country-projects/public-procurement-and-cohesion-policy-objectives/>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>contracting and/ or managing authorities in the EU Member States for strategic procurement initiatives<sup>119</sup>.</p> <p>On the Affordable Housing Initiative (paragraph 10), the Commission recalls that the Renovation Wave will actively support renovation of worst-performing buildings and tackle energy poverty. The Commission will also help national, regional and local authorities use all available financial resources – including grants and subsidies – to focus upfront investments on the most vulnerable. In particular, the Commission will launch this Initiative to promote the smart neighbourhood approach in 100 districts. The Commission is currently coordinating all its services with competences in the field of housing, construction, energy policy, renovation and investments, as well as relevant funding instruments and policy guidance to prepare the ground. As a first step, the Commission will set up a European partnership bringing construction, social housing and public authorities together, and will start several pilots to support the testing of practices in a district approach. Such pilots will allow the demonstration of technology and new methods in construction, adapted to the need of social and affordable housing and with a focus on gaining scale efficiency in a district setup. At the same time, pilots should focus on integrated approaches driven by social innovation and testing engagement models of residents. This piloting will moreover make linkages to the New European Bauhaus. Next to these, a regional approach will be crucial, linking with the existing practices under cohesion policies on urban development.</p>		<p>wave strategy, the <a href="#">affordable housing initiative</a> intends to make sure social and affordable housing facilities benefit from the renovation wave. It is intended to guarantee local social housing projects' access to necessary technical and innovation capacity and project support by:</p> <ul style="list-style-type: none"> <li>- Piloting 100 lighthouse renovation districts with a smart neighbourhood approach focused on liveability and innovation, also providing blueprints for replication.</li> <li>- Mobilising cross-sectoral project partnerships and linking them to local actors, such as social economy, SMEs, local authorities, housing associations and civil society.</li> <li>- Promoting efficient access and use of innovative processes such as circular and modular building as well as social innovation and engagement models to empower residents in the renovation process.</li> </ul>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	12. Calls for an EU level goal to end homelessness by 2030; calls on the Commission to take more effective action to support Member States in reducing and eradicating homelessness as a priority in the context of the action plan on the EPSR;	On the link between housing, homelessness and the EU action (paragraphs 12, 13 and 33), the Commission believes that long-term and sustainable solutions are necessary to address housing exclusion in the EU and eradicate homelessness. In its European Pillar of Social Rights (EPSR) Action Plan (COM(2021) 102 final), the Commission proposes concrete actions to implement the Pillar principle 19 on "Housing and assistance for the homeless". Given the importance of cooperation between many stakeholders to end homelessness, the Commission has announced in the Action Plan the launch of a European Platform on Combating Homelessness to support Member States, cities and service providers in sharing best practices and identifying efficient and innovative approaches. The initiative will focus on mutual learning activities, such as peer reviews, and sharing best practices in the fight against housing exclusion. The goal is to identify transferable aspects of national policies, learning from good practice examples or supporting the implementation of emerging policies or practices in the fight against homelessness. The housing-led strategy applied for instance in Finland would be in this context a good policy example for future mutual learning activities.		<p>Regarding Parliament's call for an EU level goal to end homelessness by 2030, the Commission considers that it has been already working on action falling under the scope of this request (<a href="#">European pillar of social rights action plan</a>).</p> <p>It should be noted that under the <a href="#">European pillar of social rights action plan</a> of March 2021, the Commission stated that: 'Access to affordable housing is an increasing concern in many Member States, regions and cities. Homelessness is increasing in most Member States. While policies to end homelessness can only be successful through a tailored local or regional approach, many stakeholders have called for a European impetus to end homelessness across the EU by 2030. Moreover, energy poverty affects nearly 34 million Europeans who are unable to afford keeping their homes warm, pointing to the lack of access to affordable quality housing for many families. The implementation of the Green Deal, through the <a href="#">renovation wave initiative</a>, the <a href="#">Commission recommendation on energy poverty</a>, the <a href="#">proposal</a> for a recast of the energy efficiency directive and the steer and guidance for local action by the <a href="#">EU energy poverty observatory</a>, will contribute to alleviate energy poverty and increase the quality of housing, in particular for medium and low-income households.' The European pillar of social rights action plan also included an 'Affordable Housing Initiative' (presented in October 2021, as already mentioned). The EPSR action plan does not, however, set the goal to end homelessness by 2030, as requested by the EP.</p> <p>In relation to the EP request to support MS in reducing and eradicating homelessness as a priority, the Commission announced the launch of a European platform on combatting homelessness. The <a href="#">European</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				<p><a href="#">platform on combatting homelessness</a>, was launched on 21 June 2021.</p>	
9)	<p>13. Calls on the Commission to propose an EU framework for National Homelessness Strategies, and further calls on the Member States to adopt the principle of Housing First, and to prioritise the provision of permanent housing to homeless people including through proactive and reactive measures as part of their National Homelessness Strategies, on the basis of systemic consultation with NGOs working in the field of homelessness, poverty and discrimination;</p>	<p>On the proposal for an EU framework for National Homelessness Strategies (paragraph 13), the Commission supports the adoption of national strategies aiming at eradicating homelessness. The Staff Working Document on "Confronting homelessness in the European Union" (SWD(2013)42), which accompanied the 2013 Communication on a Social Investment Package (SIP) (COM(2013)83), referred to the importance of preventative measures to reduce the risk and magnitude of homelessness and of comprehensive strategies tackling homelessness, based on a range of measures, allowing the enjoyment of basic human and civil rights. Access to social services, healthcare system and emergency shelters are of primary importance. In its 2019 report<sup>120</sup>, the European Social Protection Network of experts (ESPN) confirmed an emergence of such integrated strategies in the Member States, although evidence of their effectiveness remains scarce. Similarly, on the adoption of the Housing First principle (paragraph 13), there is evidence of a growing presence of housing-led services (following the principles of "Housing First"), but so far with insufficient evidence to assess adequately the effectiveness of existing homelessness services in most of the 35 countries covered by the ESPN report. The Commission considers that the "Housing First" model has a potential to combat homelessness, since it combines the provision of social or public housing with enabling social and employment</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2013 SWD - 'Confronting homelessness in the European Union').</p>	

<sup>120</sup> <https://ec.europa.eu/social/main.jsp?langId=en&catId=1135&furtherNews=yes&newsId=9456>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		services, to support the social inclusion of homeless persons and their integration in the labour market.			
10)	14. Believes that the Commission should explore further the implementation of successful existing models, such as Housing First, through appropriate funding instruments such as the European Social Fund Plus and the European Regional Development Fund;	While the Commission does not explicitly refer to point 14, it does mention Housing First in its reply to point 13 (see above).		No further/specific actions proposed/promised to be taken by the Commission.	
11)	16. Stresses the importance of reliable data collection on homelessness, including youth homelessness, with the involvement of the relevant NGOs and authorities active in service provision for persons at risk of homelessness or experiencing homelessness; calls on the Commission and the Member States to adopt a shared framework definition and coherent indicators on homelessness in the EU which would enable common understanding, systematic comparison and assessment of the extent of homelessness across EU countries; And would allow homelessness rates to be systematically monitored at EU level via institutions such as Eurostat; calls for the use of existing tools like the European Typology of Homelessness and Housing Exclusion;	On the call to adopt a shared framework definition and coherent indicators on homelessness in the EU (paragraph 16), the Commission recognises that there is no homelessness indicator at EU level. While there are several indicators related to housing exclusion, measuring either housing affordability for lower income households, or housing conditions (e.g. severe housing deprivation), not all the Member States collect data on homelessness, or they do not collect in the same way. FEANTSA, the European federation of national associations working with the homeless, reports on EU trends through their network of service providers in all Member States <sup>121</sup> . There have been efforts at EU level to improve the understanding and measurement of homelessness in Europe and to provide a common "language" or common concepts to facilitate transnational exchanges on homelessness. The European Typology of Homelessness and housing exclusion (ETHOS) <sup>122</sup> agreed in 2010 helps to improve the collection of relevant and comparable data in the EU. The Commission promotes its use by the Member States in		No further/specific actions proposed/promised to be taken by the Commission.	

<sup>121</sup> <https://www.feantsa.org/en/about-us/faq>

<sup>122</sup> <https://www.feantsa.org/en/toolkit/2005/04/01/ethos-typology-on-homelessness-and-housing-exclusion>

		their national, regional, or municipal strategies addressing homelessness.			
	17. Calls on the Member States and the Commission to take measures and implement programmes for young people who reach the age of 18 and are at risk of being homeless; calls on the Commission to provide financial support for young people to move to independent living, improving access to information on funds for affordable housing, and ensuring that the revised Youth Guarantee contributes to tackling youth homelessness, which is increasing in many EU countries;	On the call for further attention on the issue of youth homelessness and the access of young people to affordable housing (paragraph 17), the Commission recalls that the Recommendation on reinforcing the Youth Guarantee <sup>123</sup> , adopted by the Council on 30 October, has a strong focus on vulnerable youth. The Commission Staff Working Document (SWD(2020)124) underpinning the proposal covers also homelessness. The new recommendation strongly emphasises outreach to and activation of vulnerable groups through tailored support that takes into account a young person's particular situation. For many homeless young people who are already experiencing social exclusion and living in extreme poverty, adequate housing needs to be provided before further re-integration into society and the labour market <sup>124</sup> . A major prerequisite, therefore, is the partnership between Youth Guarantee providers and other social services. The proposal for a Council recommendation on European Child Guarantee (COM(2021) 137 final) was adopted on 24 March and addresses also the issue of effective access to adequate housing by children in need.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (measures and programmes for young people who reach the age of 18 and are at risk of being homeless) as according to the Commission, it has been already working on action falling under the scope of the EP request (2020 <a href="#">Recommendation on reinforcing the youth guarantee</a> + <a href="#">accompanying staff working document</a> , <a href="#">European child guarantee</a> ).	
12)	20. [...] Calls on the Commission and the Member States to prohibit and tackle discrimination on the grounds of homelessness or other housing status, and repeal all laws and measures that criminalise or penalise people for being homeless or behaviours	On the call to prohibit and tackle discrimination on the grounds of homelessness or other housing status (paragraph 20), the Commission upholds the principles of non-discrimination and inclusion of the most vulnerable groups in the societies. However, under the Treaties, the		No further/specific actions proposed/promised to be taken by the Commission.	

<sup>123</sup> [https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32020H1104\(01\)&from=EN](https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32020H1104(01)&from=EN)

<sup>124</sup> See also the 2018 Commission study "Activation measures for young people in vulnerable situations: Experience from the ground", which was an important part of the evidence base for the Commission's proposal for a Council Recommendation on reinforcing the Youth Guarantee.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>associated with being homeless, such as sleeping or eating in public spaces, as well as to prohibit the forced expulsion of homeless persons from public spaces, unless a safe housing alternative is provided to them, and the destruction of their personal belongings;</p>	<p>Commission has no general powers to intervene with the Member States in the area of fundamental rights. It can only do so if an issue of European Union law is involved. In particular, the Charter of Fundamental Rights of the European Union does not apply to every situation of an alleged violation of fundamental rights. According to its Article 51(1), the Charter applies to Member States only when they are implementing European Union law. Moreover, Article 6(1) of the Treaty of the European Union states that, “[t]he provisions of the Charter shall not extend in any way the competences of the Union as defined in the Treaties.” In matters falling outside the remit of Union law, it is for Member States, including their judicial authorities, to ensure that fundamental rights are effectively respected and protected in accordance with their national legislation and international human rights obligations. EU legislation to combat discrimination can only be adopted as regards the grounds listed in Article 19 TFEU, which does not include homelessness or housing status. A similar reasoning is applied to the violation of the right to housing (paragraph 29)</p>			
13)	<p>22. [...] Calls on the Commission and the Member States to work together to promote unconditional access for all that need it to emergency shelter of adequate quality in situations of acute housing need;</p>	<p>Although the Commission does not explicitly mention para 22 in its reply, it does refer to emergency shelters in its reply to point 13, as follows: “[...] Access to social services, healthcare system and emergency shelters are of primary importance. In its 2019 report<sup>125</sup>, the European Social Protection Network of experts (ESPN) confirmed an emergence of such integrated strategies in the Member States, although evidence of their effectiveness remains scarce.”</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2013 Staff Working Document on "Confronting homelessness in the European Union", 2019 ESPN report)</p>

14)	23. Points out that women are particularly exposed to the housing crisis; emphasises that women are more affected by poverty, due in part to the wage and pension gap between women and men, and the fact that they more often have part time jobs; Emphasises that women's homelessness is often less visible, and that it needs to be specifically addressed; Calls on the Commission and Member States to develop a gendered approach in their National Homelessness Strategies in order to support women experiencing homelessness, who have often suffered complex trauma and face re-traumatisation, such as through domestic violence and abuse, separation from their children, stigmatisation and the lack of safe and secure spaces; Calls on the Commission and the Member States to develop a gendered approach in their housing policies, particularly by supporting women who face specific situations such as single parenthood;	On adopting a gendered approach in homelessness and housing policies (paragraph 23) and in line with the Gender Equality Strategy 2020-2025, the Commission will mainstream gender in all stages of policy design in all EU policy areas taking into account the crosscutting principle of intersectionality. Also on the call to provide further support to women victims of gender-based violence (paragraph 24), as announced in the EU Strategy on Victims' Rights (2020-2025) (COM(2020)258), the Commission will promote integrated and targeted support to victims with special needs, including victims of gender-based or domestic violence through EU funding possibilities and the EU awareness campaign. Instruments include notably the Rights, Equality and Citizenship (REC) Programme <sup>126</sup> , the Daphne strand of the future Citizens, Equality, Rights and Values (CERV) <sup>127</sup> , as well as the Justice Programme <sup>128</sup> . In particular, funding is made available to strengthen support services and protection measures for victims of violence, including domestic violence. The Commission is also ensuring correct implementation of the Victims' Rights Directive (Directive 2012/29/EU). It includes the enforcement of the Member States' obligation to ensure that shelters are available, or any other appropriate interim accommodation for victims in need of a safe place.		With regard to the EP call for a gendered approach in Homelessness Strategies and housing policies, the Commission's promise to 'mainstream gender in all stages of policy design in all EU policy areas' in line with the Gender Equality Strategy 2020-2025 is very general. It is thus difficult to assess whether the Commission is/will be living up to this commitment.  As to support to victims with special needs, including victims of gender-based or domestic violence, <b>no</b> further/specific actions proposed/promised to be taken by the Commission on this particular point as the Commission seems to consider that it has been already working on action falling under the scope of the EP request ( <a href="#">EU Strategy on Victims' Rights</a> , the <a href="#">Daphne strand of the future Citizens, Equality, Rights and Values (CERV)</a> , as well as the <a href="#">Justice Programme</a> ).	
15)	24. [...] Calls therefore on the Commission and the Member States to provide financial support for women victims of gender-based violence moving to independent living, and enhanced access to	Also on the call to provide further support to women victims of gender-based violence (paragraph 24), as announced in the EU Strategy on Victims' Rights (2020-2025) (COM(2020)258), the Commission will promote		As to the EP call for financial support to victims of gender-based violence, no further/specific actions proposed/promised to be taken by the Commission on this particular point as the Commission seems to

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	<p>26. Calls on Member States to ensure equal access to decent housing for all, fight against racism and antigypsism, and guarantee there is no discrimination on any of the grounds stipulated in Article 21 of the Charter of Fundamental Rights of the European Union; Calls on the Commission and Member States to ensure the implementation of the Charter, as well as of the Racial Equality Directive, the EU framework for the implementation of National Roma Integration Strategies and the UN Convention on the Rights of Persons with Disabilities; Demands that they pay particular attention to intersectional discrimination; Calls on the Council to swiftly adopt the horizontal antidiscrimination directive; Calls on the Commission to effectively evaluate the political commitment of Member States, and launch infringement procedures against those which do not enforce EU antidiscrimination legislation or which criminalise homeless;</p>	<p>Still on the issue of discrimination, the evaluation of the political commitment and the specific case of intersectional discrimination (paragraph 26), the Commission recalls several initiatives and legislation in place. The Racial Equality Directive (Directive 2000/43/EC) prohibits discrimination based on racial or ethnic origin in access to and supply of goods and services, including housing. On 19 March 2021, the Commission adopted a report (COM(2021)139 final) on the application of the Racial Equality Directive (Directive 2000/43/EC) and of the Employment Equality Directive' (Directive 2000/78/EC). The report focuses on both good practices and main challenges in the application of the Directives and also zoom in on the functioning of national equality bodies in light of the 2018 Commission Recommendation on Standards for Equality Bodies (C(2018)3850). In October 2020, the European Commission has adopted a new EU Framework for Equality, Inclusion and Participation<sup>132</sup>, including a proposal for a Council Recommendation to support Roma in the EU (COM(2020)621). There are seven key areas (equality, inclusion, participation, education, employment, health,</p>		<p>With a view to the EP's call to ensure equal access to decent housing, implementation of relevant EU legislation and international agreements, and to effectively evaluate political commitment of MS and launch infringement procedures), the Commission, while referring to existing EU legislation and initiatives (such as the 2020 <a href="#">EU Framework for Equality, Inclusion and Participation</a>, including an <a href="#">EU Roma strategic framework for equality, inclusion and participation 2020-2030</a>, 2020 <a href="#">LGBTIQ Equality Strategy</a>, <a href="#">European Social Fund Plus (ESF+)</a>) announces its intention to 'monitor progress towards the 2030 targets included in the EU Framework' and to carry out a mid-term evaluation.</p>	

<sup>132</sup> [https://ec.europa.eu/info/publications/new-eu-roma-strategic-framework-equality-inclusion-and-participation-full-package\\_en](https://ec.europa.eu/info/publications/new-eu-roma-strategic-framework-equality-inclusion-and-participation-full-package_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and housing) with new targets and recommendations for the Member States on how to achieve them. While the aim is full equality, the proposed minimum targets for 2030 build on progress made under the previous framework, which include also reducing the gap in housing deprivation by at least one third. The Member States are expected to submit national strategies by September 2021 and report on their implementation every two years. The Commission will monitor progress towards the 2030 targets, drawing on input from surveys carried out by the Fundamental Rights Agency and input from civil society. There will also be an in-depth mid-term evaluation of the new 10-year plan in its entirety.</p> <p>In the LGBTIQ Equality Strategy 2020-2025 (COM(2020)698), the Commission acknowledges that LGBTIQ people suffer from high rates of homelessness. The Commission will promote the use of the European Social Fund Plus (ESF+) to improve the socio-economic position of the most marginalised LGBTIQ people and will foster the exchange of best practice between the Member States to address LGBTIQ homelessness.</p> <p>In addition, concerning the reference to the horizontal antidiscrimination Directive (paragraph 26), the Commission continues to support its 2008 proposal for a horizontal Equal Treatment Directive (COM(2008)426), which provides for equal treatment in various areas of life regardless of age, sexual orientation, disability and religion and belief. The Commission supports the Council Presidencies in order to progress negotiations and to reach an agreement on the proposal.</p>		<p>As to the Commission's promise to 'promote the use of the European Social Fund Plus (ESF+) to improve the socio-economic position of the most marginalised LGBTIQ people and will foster the exchange of best practice between the Member States to address LGBTIQ homelessness', it is difficult to assess whether the Commission has lived up to this promise because of its general nature.</p>	
18)	28. [...] Urges the Commission and the Member States to utilise the planned Just Transition Fund as	No specific reply is provided to this particular point		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	intended for improving the housing, health and employment situation in order to leave no one behind, including Romani people;	(on the Just Transition Fund to improve housing, health and employment situation of inter alia Roma people).			
19)	29. [...] Calls on the Commission and the Member States to ensure that where these criteria are not met, evictions are deemed to have been forced, and to constitute a violation of the right to housing; [...]	On the call to better protect mortgage borrowers against evictions (paragraph 47), the Commission is taking stock of the insolvency framework at the Member State level. It agrees that national insolvency reforms need take into account implications for the mortgage loans for primary residence. [...]		No further/specific actions proposed/promised to be taken by the Commission.	
20)	30. [...] ; Reminds the Commission and the Member States that the Convention on the Rights of Persons with Disabilities imposes obligations on them; Calls for rapid deinstitutionalisation all across Europe, and for the use of available EU and national funds to create accessible, non-segregated housing and to provide the necessary community-based services for persons with disabilities for the sake of safeguarding their right to live independently in the community, and to have equal chances to participate in society;	On the situation of people with disabilities (paragraph 30), the Commission, adopted on 3 March the Strategy on the Rights of Persons with Disabilities 2021-2030 (COM(2021) 101 final). With this initiative, the Commission intends to continue its work to advance on deinstitutionalisation, and with EU funds support the process including through advancing accessibility and inclusive services in the community including social housing.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Strategy on the Rights of Persons with Disabilities 2021-2030</a> ).	
21)	31. Calls on the Commission and the Member States to ensure that no EU or Member State funds will be used for housing projects leading to segregation or social exclusion; Calls on the Member States to always consider the quality of housing in terms of urban development, architecture and functionality so as to improve well-being for all; Calls on the Commission and the Member States to promote programmes and incentives that foster and strengthen intergenerational ties enabling people, in particular older people, who have to leave their homes for financial or health reasons to find new accommodation that meets their needs without having to leave their communities;	On further investment across the EU in social, public, energy-efficient, adequate and affordable housing and in addressing homelessness and housing exclusion (paragraphs 31 and 53), Member States are invited to make use of Cohesion Policy support to invest in social housing. Particular focus should be on marginalized communities and their integration in the society, such as homeless people, Roma, people with a migrant background, low-income households, people with disabilities and other groups. Social housing investments should meet the needs of these groups so to provide access to affordable, energy-efficient community-based housing solutions. Social housing investments should also contribute to addressing and preventing spatial segregation, for instance, by investing in housing facilities in non-segregated areas.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (ensure that no EU or Member State funds will be used for housing projects leading to segregation or social exclusion, promote programmes and incentives that foster and strengthen intergenerational ties enabling people, in particular older people, who have to leave their homes for financial or health reasons to find new accommodation) as according to the Commission, it has been already working on action falling under the	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>They should be accompanied by complementary investments in mainstream services, e.g. in education, employment, health and social care. The Commission has recently taken steps to ensure that Member States operate EU funds in compliance with the Charter of Fundamental Rights. Its proposal for a new Common Provisions Regulation (CPR) (COM(2018)375), setting out rules for the next budget 2021-2027, requires that effective mechanisms are put in place to ensure that programmes supported by EU funds<sup>133</sup> and their implementation comply with the Charter. On 30 November 2020, the European Parliament and EU Member States reached a political agreement, which includes enabling conditions to ensure that the investment environment for the EU support is well prepared upfront. Member States must meet these conditions to be able to invest EU funds and make the most of them. An example is the enabling condition related to the compliance with the EU Charter of Fundamental Rights. Thus, managing authorities should establish and apply criteria and procedures for the selection of not discriminatory operations, including housing investments. Housing investments should also be in line with measures to prevent and combat segregation in all fields and prevent and eliminate segregation. Roma communities and other vulnerable groups are supported by the specific objectives under the ESF+, with the ultimate goal to mainstream their inclusion in the society. Member States should aim at making mainstream services inclusive and providing targeted programmes towards the marginalised communities.</p>		<p>scope of the EP request (<a href="#">proposal for new Common Provisions Regulation</a>, <a href="#">ESF+</a>).</p> <p>It should be noted that, as announced also in the European Pillar of Social Rights Action Plan, the Commission intends to present, according to the Commission Work Programme 2022 (<a href="#">CWP 2022</a>), a European care strategy in Q3 2022.)</p>	

<sup>133</sup> European Regional Development Fund, Cohesion Fund, European Social Fund Plus, European Maritime and Fisheries Fund, Asylum and Migration Fund, Internal Security Fund and Border Regulation.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		On accommodation and care services for elderly, the objective is to provide independent living conditions in the scope of long-term care services. Investments may include (assisted) social housing, personal assistance, and access to mainstream services and support the shift from institutional to family- and community-based services.			
22)	32. Calls on the Commission and the Member States to impose a general obligation to meet accessibility criteria in the planned Renovation Wave of public and private buildings, and to use its potential to improve accessibility for persons with disabilities and older persons, as well as for those with motor and sensory difficulties, in order to make housing comfortable for its inhabitants and 'future proof' in the light of the increasing demographic change;	The Commission, adopted on 3 March the Strategy on the Rights of Persons with Disabilities 2021-2030 (COM(2021) 101 final). With this initiative, the Commission intends to continue its work to advance on deinstitutionalisation, and with EU funds support the process including through advancing accessibility and inclusive services in the community including social housing. In particular on accessibility criteria (paragraph 32), the Affordable Housing Initiative will put forward the needs of renovation beyond energy relevant renovation (see above). Other aspects, such as accessibility, liveability and access to (social) services and mobility are key to embed in an integrated district renovation approach. The Commission continues to promote the opportunities in the deep renovations to address accessibility for persons with disabilities.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (impose a general obligation to meet accessibility criteria in the planned Renovation Wave of public and private buildings, and to use its potential to improve accessibility) as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Strategy on the Rights of Persons with Disabilities 2021-2030, 2021 Affordable Housing Initiative</a> ).	
23)	33. Calls on the Commission and the Member States to make housing one of the cornerstones of the Action Plan of the EPSR; Recalls that EU policies, funding programmes and financing instruments have a great impact on housing markets, the quality of the housing stock and on citizens' lives;	On the link between housing, homelessness and the EU action (paragraphs 12, 13 and 33), the Commission believes that long-term and sustainable solutions are necessary to address housing exclusion in the EU and eradicate homelessness. In its European Pillar of Social Rights (EPSR) Action Plan (COM(2021) 102 final), the Commission proposes concrete actions to implement the Pillar principle 19 on "Housing and assistance for the homeless". Given the importance of cooperation between many stakeholders to end homelessness, the Commission has announced in the Action Plan the launch of a European Platform on Combating Homelessness to support Member States, cities and service providers in sharing best practices		The <a href="#">European Platform on Combating Homelessness</a> , was launched 21 June 2021 (see also reply to para 12).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and identifying efficient and innovative approaches. The initiative will focus on mutual learning activities, such as peer reviews, and sharing best practices in the fight against housing exclusion. The goal is to identify transferable aspects of national policies, learning from good practice examples or supporting the implementation of emerging policies or practices in the fight against homelessness. The housing-led strategy applied for instance in Finland would be in this context a good policy example for future mutual learning activities.			
24)	33. [...] ; Calls on the Commission to urgently develop an integrated EU-level strategy for social, public, non-segregated and affordable housing, creating an enabling framework for national, regional and local authorities to ensure the provision of safe, healthy, accessible and affordable quality housing for all; Calls on the Commission, as part of this strategy, to improve its action to engage all levels of government in fully and consistently implementing the right to decent housing for all;	No specific reply is provided to this particular point (integrated EU-level strategy for social, public, non-segregated and affordable housing).		Not mentioned.	
25)	34. Welcomes the inclusion of housing affordability in the European Semester; Urges the Commission to ensure that all country-specific recommendations contribute positively to the full and consistent implementation of the principles of the EPSR, to the achievement of the UN SDGs, and the EU climate goals defined in the Green Deal; Urges the Member States to implement the country specific recommendations on housing affordability; states that national affordable housing plans should be included in National Reform Programmes, and demands that the Commission and Member States establish specific strategies to address obstacles to the right to housing, such as discrimination,	On the reference to the country-specific recommendations and their contribution to the implementation of the EPSR, the achievement of the United Nations Sustainable Development Goals (SDGs), and the goals defined in the Green Deal (paragraph 34), since 2017, the European Semester also integrates the Pillar and the 'Social Scoreboard'. This increases the social focus of the EU framework for the coordination of economic and employment policies. In addition, a large number of country-specific recommendations over the years aim at addressing its key principles, showing that a more social and fair Europe is a key priority for the Commission. On the European Green Deal, this strategy puts the well-being of citizens and sustainability, in all of its senses, at the centre		No further/specific actions proposed/promised to be taken by the Commission on this particular point (ensure that all country-specific recommendations contribute positively to the full and consistent implementation of the principles of the EPSR, to the achievement of the UN SDGs, and the EU climate goals defined in the Green Deal+ establish specific strategies to address obstacles to the right to housing) as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	speculation, predatory lending, land-grabbing, conflicts, forced evictions, environmental degradation and vulnerability to disasters;	of economic policy. Environmental sustainability, productivity gains, fairness and macro-economic stability are the four dimensions, closely interrelated and mutually reinforcing, which will guide structural reforms, investments and responsible fiscal policies across Member States in the years to come. These four key dimensions are also crucial to implement the UN SDGs, which are being integrated in EU's policymaking and action, including through the European Semester.		working on action falling under the scope of the EP request (integration of EPSR and Social Scoreboard in European Semester; <a href="#">European Green Deal</a> ).	
26)	36. Urges the Commission to provide more accurate, quality and comparable data on housing markets, and to monitor housing affordability across the EU, including at local and regional level, through Eurostat's European Statistics on Income and Living Conditions (EU-SILC) and the European Energy Poverty Observatory, taking into account the fragmentation of national housing markets and differences between Member States;	On the call to data on the housing markets and to assess the contribution of EU policies and regulations to their financialisation (paragraphs 36 and 45), the Commission monitors housing market developments within the European Semester as well as the Macroeconomic Imbalance Procedure (MIP), as evidenced in numerous country-specific recommendations relating to house price valuation risks, affordability as well as tax and benefits. The Commission has made efforts to develop indicators and methods to assess house price valuations and affordability at an aggregate level. Moreover, the Commission also reviews risks in the housing markets including potential overvaluation of house prices. Besides, the Commission has been trying to address the data gap on regional housing markets and affordability. The Commission is aware of the increasing involvement of large financial investors in the European residential real estate markets, including formerly public-owner flats, as well as their funding schemes. Efforts are made to better understand the impact on housing affordability and on regional housing markets.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (provide more accurate, quality and comparable data on housing markets, monitor housing affordability across the EU) as according to the Commission, it has been already working on action falling under the scope of the EP request (monitoring of housing market developments in European Semester and Macroeconomic Imbalance Procedure (MIP)).	
27)	41. Invites the Member States to pursue housing policies that are based on the principle of neutrality between home ownership, private rented accommodation and rented social housing; Calls on	On housing policies that are based on the principle of neutrality between home ownership, private rented accommodation and rented social housing (paragraph 41) the Commission has highlighted this issue in its country-			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the Commission to respect this principle in the European Semester; [...]	specific surveillance, as it affects social equity, the functioning of the rental market, and macroeconomic challenges. The surveillance has pointed to cases where tax or benefit advantages work to discriminate between mortgagees, private rentals and social rentals in a manner that does not reflect income groups or other social needs. This is reflected in the Commission's work on the user cost of housing and several country reports. In particular, removing such distortions underpins several country-specific recommendations, notably with respect to mortgage-interest deductibility on personal income tax. The Commission will continue to assess and review policies in this area.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (respect the principle of neutrality between home ownership, private rented accommodation and rented social housing in the European Semester) as according to the Commission, it has been already working on action falling under the scope of the EP request (work on the user cost of housing; country-specific recommendations).	
28)	45. Notes with concern the increased financialisation of the housing market, in particular in cities, whereby investors treat housing as a tradable asset rather than a human right; Calls on the Commission to assess the contribution of EU policies and regulations to the financialisation of the housing market and the ability of national and local authorities to ensure the right to housing; [...]	On the call to data on the housing markets and to assess the contribution of EU policies and regulations to their financialisation (paragraphs 36 and 45), the Commission monitors housing market developments within the European Semester as well as the Macroeconomic Imbalance Procedure (MIP), as evidenced in numerous country-specific recommendations relating to house price valuation risks, affordability as well as tax and benefits. The Commission has made efforts to develop indicators and methods to assess house price valuations and affordability at an aggregate level. Moreover, the Commission also reviews risks in the housing markets including potential overvaluation of house prices. 		social and ecological innovation are key in that regard. New experiments, for example in using developing technology, are equally important assets in terms of economic, environmental and social added-value.			

4.1.13.5.EMPL Resolution 5: EP resolution of 10 February 2021 on reducing inequalities with a special focus on in-work poverty

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Reducing inequalities with a special focus on in-work poverty</b>		10/02/2021 <a href="#">T9-44/2021</a> <a href="#">2019/2188(INI)</a> <b>EMPL</b>	<a href="#">SP(2021)247</a>	Final reply (SP) received 16 July 2021	Specific reply			
1)	1. [...] Recalls the fact that in implementing their policies, the Commission and the Member States should further strengthen the EU's social model and take into account requirements linked to the promotion of a high level of employment, the guarantee of a decent standard of living and adequate social protection for all, the fight against poverty and social exclusion;		The Commission is aware of the diversified and dynamic issues linked to poverty, social exclusion and inequality. Within the Europe 2020 Strategy, the headline indicator "At risk of poverty or social exclusion" (AROPE) has been used to investigate and address the multidimensional aspects of poverty and exclusion. Poverty and exclusion has been monitored in the European Semester in order to achieve the target of at least less 20 million people in AROPE by 2020.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Europe 2020 Strategy</a> ).	
2)	7. Calls on the Commission and the Member States to achieve the goal of comparable living conditions through upward social and economic convergence, to counter the increasing inequalities within and between Member States and to increase solidarity; Encourages the Member States to strengthen collective bargaining systems and to ensure minimum social protections and a social security system for all age groups; [...]		Poverty and exclusion has been monitored in the European Semester in order to achieve the target of at least less 20 million people in AROPE by 2020. In 2019, close to 12 million less people than in 2008 were in AROPE in the EU27, and around 17 million less than the peak in 2012, but the ambitious target was unfortunately not met. In the European Pillar of Social Rights (EPSR) Action Plan (COM(2021) 102 final) adopted on 4 March, the Commission set a target that entails a decline in the number of people in AROPE by at least 15 million by 2030 and a complementary ambition to reduce the number of children at risk of poverty or social exclusion by 5 million in the EU by 2030. The Action Plan reinforces and relaunches the EU commitment for action in the relevant areas, jointly with Member States, social partners and all relevant stakeholders. Fighting poverty, securing social inclusion and combating inequalities are at the core of several principles of the European Pillar of Social Rights, explicitly addressing inequalities in its principle 3, which sets out the right to equal opportunities for all. The third chapter of				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Pillar of Social Rights (EPSR) Action Plan</a> , <a href="#">European child guarantee</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the Pillar is entirely dedicated to social protection and social inclusion.			
3)	8. Reminds the Commission and the Member States that preventing and tackling in-work poverty must be part of the overall goal to eradicate poverty in the European Union;	No specific reply is provided to this particular point (preventing and tackling in-work poverty must be part of overall goal to eradicate poverty in the EU).		Not mentioned.	
4)	12. Calls on the Commission and the Member States, on the basis of their obligations under the ILO Conventions and the revised European Social Charter and their commitments to the European Pillar of Social Rights and the SDGs, to promote collective bargaining; [...]	As regards to the role of social partners concerning especially collective bargaining, minimum wages, capacity building and collective agreements (paragraphs 12, 42, 86 and 88) the Commission recognises and promotes the role of social partners, to facilitate the dialogue between them while fully respecting their autonomy as set out in Article 152 of the Treaty on the Functioning of the European Union, and under Articles 12 and 28 of the Charter of Fundamental Rights of the European Union. The Commission examines the functioning of social dialogue in the Member States as part of the European Semester and puts forward proposals for country-specific recommendations where it considered necessary. The proposal for a directive on adequate minimum wages in the EU (COM(2020) 682 final 2020/0310 (COD)) aims at establishing a framework to improve the adequacy of minimum wages and the access of workers to minimum wage protection in the EU, while fully respecting the specificities of national systems, national competencies, and social partners' autonomy. It requires Member States to promote the key role played by collective bargaining in ensuring access to adequate wages. An effective involvement of the social partners in minimum wage setting is an element of good governance that allows for an informed and inclusive decision-making process. Those Member States where collective bargaining coverage is below 70% would be required to make extra efforts, in consultation with the social partners. The draft directive is designed to safeguard access to employment and take into account the effects on job creation and competitiveness, including for small		No further/specific actions proposed/promised to be taken by the Commission on this particular point (promote collective bargaining) as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Semester, 2020 Proposal for directive on adequate minimum wages, 2021 European pillar of social rights action plan, report of Andrea Nahles, ESF +</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and medium-sized enterprises (SMEs). It proposes an appropriate monitoring framework that includes data on collective bargaining. At the same time, the report of Ms Andrea Nahles, Special Advisor on Social Dialogue to Nicolas Schmit, Commissioner for Jobs and Social Rights, highlighted some key issues at stake and presented a set of concrete proposals that fed into the Action Plan to implement the European Pillar of Social Rights. The Action Plan included the following actions with regards to the implementation of the Pillar Principle 8 on social dialogue: (1) the launch of a new award for innovative social dialogue practices; (2) an information and visiting programme for young future social partner leaders; (3) the review of sectoral social dialogue at EU level; and (4) a new supporting frame for social partner agreements at EU level. This shows that supporting social dialogue and the involvement of social partners remains a key political priority for this Commission. Furthermore, the European Social Fund Plus (ESF+) Regulation provides that all Member States shall allocate an appropriate amount of their ESF+ resources to support the capacity building of social partners and civil society organisations with regards to their activities in the areas of employment, education and training and social inclusion. For Member States who received a relevant country-specific recommendation, this compulsory allocation is set at 0.25% of their ESF+ resources. In addition, capacity building of social partners and civil society organisations can be supported regarding their involvement in the implementation of ESF+ programmes.</p>			
5)	<p>13. [...] Calls on the Commission and the Member States to strengthen investments in digital technology in rural areas in order to enhance public services, improve their quality and efficiency and create new modes of service delivery for remote and underserved</p>	<p>On investments in digital technology in rural areas to address inequalities and create better job opportunities (paragraph 13), the Commission agrees that digitalisation can act as an enabler to improve economic, social and environmental sustainability and quality of life. In rural areas, digital connectivity can likely contribute to improved attractiveness for both people and businesses and improved job opportunities. The prolonged</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	regions, in order to address inequalities and create better job opportunities;	lockdown has underlined the fundamental value of high-quality internet connections at home, not only for continuing economic activities, but also for social lives, educational and cultural needs, as well as access to public services. The crisis has also exposed the gap between the connected and the unconnected, exacerbating pre-existing inequalities, showing how much urban populations benefit from private and public investment in broadband networks, while rural citizens often depend on publicly supported infrastructure investments. Challenges require not only investing in infrastructure, but also development of relevant applications and adequate skills enabling uptake of digital technologies. In the 2014-2020 period, around EUR 6 billion of European Structural and Investment Funds were allocated by the Member States to connectivity infrastructures, providing fast broadband to around 14.5 million additional households. In particular, the European Regional Development Fund (ERDF) supported broadband deployment and the dissemination of high-speed networks in rural and underserved regions. The Commission also supported the WiFi4EU initiative providing 8802 vouchers across all the Member States. The vouchers, each worth EUR 15.000, are to be used to install free Wi-Fi hotspots or upgrade an existing network, also in rural and remote areas. Digital skills have been extensively supported by European Social Fund (ESF) resources. The Commission's strategy on Shaping Europe's digital future confirmed the objectives for fixed and mobile connectivity for all European citizens by 2025 (COM(2016)587). The Recovery and Resilience Facility (RRF) (Regulation (EU) 2021/241]) sets out that each Member State dedicates at least 20% of its national plan allocation to measures of the digital transition. Digital connectivity is one of the possible priority areas and the development of digital skills is a major focus of "Reskill and upskill", one of seven flagship areas on which Member States are invited to focus the reforms and investments		No further/specific actions proposed/promised to be taken by the Commission on this particular point (strengthen investments in digital technology in rural areas) as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Recovery and Resilience Facility (RRF)</a> , 2021-2027 <a href="#">MFF</a> , <a href="#">European Social Fund</a> , 2020 <a href="#">EU Strategy on shaping Europe's digital future</a> , 2021 <a href="#">EU Digital Compass</a> , 2021 <a href="#">European Pillar of Social Rights (EPSR) Action Plan</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>included in their plans<sup>142</sup>. Under the Multiannual Financial Framework 2021-2027, the proposal for the new Connecting Europe Facility in the digital area aims to continue to support the deployment of mobile 5G and glass fibre networks, including in rural areas and underserved regions. The Commission supports the national Broadband Competence Office of all Member States, especially for underserved regions, providing technical advice, training and support via an EU funded Support Facility. In addition, in the post-2020 period, the Digital Europe Programme (COM/2018/434 final) is dedicated to building the strategic digital capacities in the EU and on facilitating the wide deployment of digital technologies. The programme will support investments in advanced digital skills, capacity building and investment for data and digital service infrastructure in agriculture, among others. The Commission is currently taking the necessary steps for the implementation of a preparatory action on 'Increasing access to educational tools in areas and communities with low connectivity or access to technologies'. The action aims at enhancing inclusion and reducing the digital gap suffered by pupils from remote areas and communities with low connectivity. The Commission has proposed a cross-cutting objective under the future common agricultural policy in which digitalisation of agriculture and rural areas is an important component. The Commission also funds dedicated Research &amp; Innovation projects, including two large-scale projects that aim to establish digital service platforms for rural areas (AURORAL and dRURAL – EUR 30 million in total).</p> <p>Furthermore, in its Communication on '2030 Digital Compass: the European way for the Digital Decade' (COM(2021) 118 final), the Commission identified secure and performant sustainable digital infrastructures, and a digitally skilled population and</p>			

<sup>142</sup> 1) Power up, 2) Renovate, 3) Recharge and Refuel, 4) Connect, 5) Modernise, 6) Scale-up and 7) Reskill and upskill.

		<p>highly skilled digital professionals as two of the four 'cardinal points' for mapping the EU's trajectory, as part of a 'Digital Compass' to translate the EU's digital ambitions for 2030 into concrete targets and to ensure that these objectives are met. The Communication includes the objective of having all European households covered by a Gigabit network, with all populated areas covered by 5G by 2030. It also recalls that the European Pillar of Social Rights Action Plan includes the objective to increase the share of adults with basic digital skills to 80% by 2030, and includes the target to increase the number of employed ICT specialists to 20 million by the same year, with convergence between women and men.</p> <p>In the same Communication, the Commission refers to universal access to internet services and universal digital education and skills for people to take an active part in society and in democratic processes as principles that could be included in a possible set of digital principles and rights. The Commission will propose to include such a set of principles and rights in an interinstitutional solemn declaration between the European Commission, the European Parliament and the Council. The Commission hopes to achieve decisive progress with the other institutions on such declaration by the end of 2021.</p>			
6)	18. [...] Encourages the Commission and the Member States to offer coherent and comprehensive support for developing the digital skills required, including for older workers; [...]	No specific reply is provided to point 18. However, this particular point (offer support for developing the digital skills required, including for older workers) is dealt with rather extensively in the reply to point 13.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (see above)	
7)	19. Calls on the Commission and the Member States to provide young people with an adequate level of education and training that will enable them to meet the needs and challenges of the labour market and equip them with knowledge of their labour and	On youth and the issues of education and training as well as fighting against youth unemployment (paragraphs 19 and 22), the Commission has a clear commitment to ensure access to quality and inclusive education, training and life-long learning, including up- and reskilling opportunities for all, as strategic priorities recognised at the EU and national levels for many years, and as affirmed in the skills target of the European Pillar		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Commission Communication on achieving a</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	social rights so they do not fall into atypical and precarious employment;	<p>of Social Rights Action Plan, which establishes that adult participation in training should be increased to 60%. Reducing the rate of early leavers from education and training to lower than 10% by 2020 was one of the headline targets of the Europe 2020 Strategy and of the strategic framework for European cooperation in education and training ET2020. In addition, the ET2020 framework set a 15% target for 15 years-olds' underachievement in reading, mathematics and science. The Council Resolution on a strategic framework for European cooperation in education and training towards the European Education Area and beyond 2021-2030 (2021/C 66/01) has reaffirmed the target level of 15% for low achieving and set a new target of less than 9% for early leaving from education and training by 2030. Fighting underachievement in basic skills and early leaving from education and training are at the heart of the Commission Communication on achieving a European Education Area by 2025 (COM(2020) 625 final), which announces a number of initiatives under priority area 'inclusion and gender equality', among which 'Pathways to School Success'. This initiative intends to develop, in cooperation with the Member States, policy guidance to help all pupils reach a certain level of proficiency in basic skills and complete upper secondary education, by targeting disadvantaged groups more at risk of underachievement and early school leaving.</p> <p>The Skills Agenda for Europe (COM/2020/274 final) is the Commission's key strategic framework to implement the third principle of the Pillar. As set out in the first flagship action of the Skills Agenda, under the Pact for Skills, the reinforced European Alliance for Apprenticeships will mobilise new pledges to sustain apprenticeship offers despite the current economic downturn and to develop apprenticeship programmes. The renewed Alliance will launch new national apprenticeship coalitions. With the Council Recommendation on Vocational Education and Training (2020/C 417/01), with skills partnerships (i.e. Pact for Skills), skills strategies and skills intelligence, the</p>		<p><a href="#">European Education Area by 2025</a>, <a href="#">Council Recommendation on Vocational Education and Training</a>, <a href="#">Skills Agenda for Europe</a>, etc).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Skills Agenda also aims to ensure that the education and training are in line with the needs of the labour market. The Commission reinforced the Youth Guarantee (2020/C 372/01) to give opportunities to the most vulnerable young persons. The aim is to ensure that a quality offer is made to all young people under 30, in line with Principle 4 of the Pillar. It puts more emphasis on prevention and on cooperation with the education and training sector. It also facilitates upskilling and re-skilling geared mainly towards digital, green, language, entrepreneurial and career management skills, to help young people seize the opportunities in growing sectors, and preparing them for the needs of the changing labour market. The Youth Employment Support (YES) package of July 2020 emphasises the need for maximising potential synergies between various funds and instruments.</p> <p>Moreover, in the context of the recovery from the COVID-19 crisis, the Commission recommendation on Effective Active Support to Employment (EASE) calls on Member States to develop coherent packages of strengthened active labour market policies, with a focus on groups that are in a vulnerable position or are underrepresented in the labour market, in particular youth, and invites Member States to make full use of the funding opportunities under various EU financial instruments in support of these packages. Similarly, the Council Recommendation adopted in October 2020 on “A Bridge to Jobs – Reinforcing the Youth Guarantee” stresses the importance of making full use of the current EU funding instruments, in particular the Youth Employment Initiative (YEI), the European Social Fund (ESF) and the European Regional Development Fund (ERDF) (2014-2020) and mobilise a significant share of the additional funds provided under REACT-EU, as well as the ESF+ and the ERDF (2021-2027), the Recovery and Resilience Facility, the European Agricultural Fund for Rural Development (EAFRD), the InvestEU Programme, the Asylum, Migration and Integration Fund (AMIF), the Erasmus+</p>

		programme and the Technical Support Instrument. They can support youth employment, education and training, prevent unemployment and inactivity among young people and implement relevant policy reforms.			
8)	20. Reminds the Commission and the Member States that, in the event of conflicts between fundamental economic freedoms and fundamental social and labour rights, the latter is treated at the same level as the economic freedoms of the single market;	No specific reply is provided to this particular point.		Not mentioned.	
9)	22. Calls on the Commission and the Member States to make use of financial instruments such as the Youth Guarantee and EU programmes in order to tackle youth unemployment, boost young people's employability and encourage them to take up stable and non-precarious jobs;	See reply to point 19.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (YEI, ESF, etc).	
10)	23. Calls on the Commission and the Member States to take real measures to combat tax avoidance and tax fraud as an important means of reducing economic inequalities and improving the collection of tax revenue in the Member States;	On the fight against tax avoidance and tax fraud to help reduce economic inequalities (paragraph 23), in its 2020 Tax Action Plan (COM(2020) 312 final), the Commission committed to continue supporting the Member States in the fight against VAT fraud mainly by enhancing Eurofisc <sup>143</sup> and investing in modern and technology based cooperation (the network of Member States anti-fraud experts). In addition, the Commission plans to come forward with a communication in 2021 on what actions Member States can take to reduce the VAT gap, which could generate up to EUR 50 billion EU-wide. The Commission agrees that taxation is an important policy lever for addressing economic inequalities. In view of that, assessments of		While referring to its <a href="#">Tax Action Plan 2020</a> , the Commission also announces to present, in 2021, a communication on MS actions to reduce the VAT gap and, in 2022, a guidance to MS on ex-ante distributional impact assessments.  While the Commission did not adopt a communication on the VAT gap so far (as of January 2022), it should be noted that, according to the Commission Work Programme for 2022 ( <a href="#">CWP 2022</a> ), the Commission intends to present a revision of the VAT Directive and of	

<sup>143</sup> EUROFISC is a mechanism provided for Member States to enhance their administrative cooperation in combating organised VAT fraud and especially carousel fraud. 		redistributive capacities of policy packages, including the tax mix and social benefits, should be considered. In addition, taxation is essential for securing adequate financing of public expenditures on social policies. As announced in the Pillar Action Plan, the Commission will present in 2022 a guidance to Member States on ex-ante distributional impact assessments and their use in budgeting and planning of reforms.		the Council Regulation on VAT Administrative Cooperation in Q3 2022.	
11)	24. Calls on the Commission to update its framework for the establishment and development of cooperatives and social economy enterprises, which by nature place a stronger emphasis on fair working conditions and the empowerment of workers;	On cooperatives and social economy enterprises (paragraph 24), the Commission considers that social economy organisations in general, and cooperatives in particular, play a key role in empowering workers given their democratic governance. In addition, they contribute both to economic growth and social cohesion in the European Union and therefore have a great potential to help achieve a fair and sustainable recovery following the Covid-19 pandemic. The Commission has undertaken a number of initiatives and programmes to support the development of social economy and social enterprises, in particular since its Social Business Initiative of 2011. As announced in the Pillar Action Plan, the Commission remains committed to support social economy and will propose a specific action plan in the fourth quarter of 2021 that will include measures aiming to improve the framework conditions for these stakeholders.		On 9 December 2021, the Commission adopted a <a href="#">Social Economy Action Plan</a> .	
12)	25. Calls on the Commission and the Member States to introduce initiatives to promote women's empowerment through education, vocational training and lifelong learning, as well as access to finance, female entrepreneurship and women's representation in future-oriented sectors with a view to ensuring access to high-quality employment; Calls, in particular, for greater promotion of STEM subjects, digital education, artificial intelligence and financial literacy in order to	On women's empowerment, gender equality and equal opportunities between men and women (paragraphs 25, 57, 64 and 93), the Commission's communication on the European Education Area published on 30 September 2020 puts forward gender equality as one of the key elements. In addition, the European Pillar of Social Rights Action Plan sets a target for the female employment rate aiming at reducing at least by half the gender employment gap compared to 2019. Women's rights in digital are an important part of the EU Gender Equality Strategy 2020-2025 (COM/2020/152 final). In its new Industrial Strategy (COM(2020) 102 final), the Commission specifically underlines		While the Commission seems to consider that it has been already working on action falling under the scope of the EP request (promote women's empowerment through education, vocational training and lifelong learning, access to finance, female entrepreneurship and women's representation in future-oriented sectors) by referring,	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>combat prevailing stereotypes and ensure that more women enter these sectors and contribute to their development;</p>	<p>the imperative to encourage women to study Science, Technology, Engineering and Mathematics (STEM), consider a career in technology and invest in digital skills, thus improving the gender balance in creating and leading businesses. The representation of women in STEM is additionally addressed in the updated Digital Education Action Plan (COM(2020) 624 final) and through the implementation of the Ministerial declaration of commitment on 'Women in Digital', including its scoreboard. Moreover, the European Skills Agenda helps addressing horizontal segregation, stereotyping and gender gaps in education and training. The Council recommendation on vocational education and training will support improving gender balance in traditionally male or female-dominated professions and address gender stereotypes. The reinforced Youth Guarantee, also specifically addresses young women that are not in education, employment or training to ensure equal opportunities. Finally, the Commission is working to create a registry of European women in cyber as a reference for expert groups, event organisers, media, collaboration and business opportunities. The Commission will also launch an EU-wide communication campaign combatting gender stereotypes in all spheres of life, as announced in the Gender Equality Strategy 2020-2025. On 4 March 2021, the Commission adopted a proposal for a directive establishing minimum requirements on pay transparency to strengthen the application of the principle of equal pay for equal work or work of equal value between men and women. The objective of the proposal is to strengthen the enforcement of the principle of equal pay for equal work or for work of equal value. It is a tool for stimulating social dialogue and triggering discussion with social partners about equal pay. As such, it recognises the important role of social partners in addressing gender pay inequalities, including through pay transparency, whether through collective bargaining or otherwise. The directive therefore does not interfere with the autonomy of social partners and their contractual freedom and takes due account of the diversity of</p>		<p>inter alia, to the Gender Equality Strategy 2020-2025, Digital Education Action Plan, Council recommendation on vocational education and training, reinforced Youth Guarantee etc. However, it also announces the creation of a registry of European women in cyber as well as an EU-wide communication campaign to combat gender stereotypes.</p> <p>It should be noted that the registry of European women in cyber, the respective <a href="#">website</a> has in the meantime been archived. As of mid-January 2022, the EU-wide communication campaign to combat gender stereotypes had not been launched yet.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>national law and practice in this regard. The EU cohesion policy, and the ESF+ in particular, supports women's entrepreneurship, their (re)integration into the labour market and gender equality in specific, traditionally male, sectors. One of the main goals of the Microfinance and Social Entrepreneurship axis of the Employment and Social Innovation Programme (EaSI) is to increase the supply of, and access to, microfinance so as to meet demand from those who need it most, and in particular the unemployed, women and vulnerable people who wish to start up or develop a micro-enterprise, including on a self-employed basis, but who do not have access to credit. The Commission will also promote the presence of women in decision-making positions in private equity and venture capital funds and support funds investing with gender diversified portfolios through the InvestEU programme. This would help mobilise private and public investment in Europe for more sustainable, inclusive and innovative growth, as mentioned in the Gender Equality Strategy 2020-2025. The Regulation establishing the Recovery and Resilience Facility embeds considerations on gender equality. It sets out that Member States will present how the measures in the national recovery plan are expected to contribute to gender equality and equal opportunities for all and the mainstreaming of those objectives. As announced in the Gender Equality Strategy 2020-2025, targeted measures promoting the participation of women in innovation will be developed under the Horizon Europe European Innovation Council, including a pilot to promote women-led start-ups and innovative small and medium-sized enterprises. In addition, in the field of research and innovation, the Commission will introduce new measures to strengthen gender equality in Horizon Europe, such as the possibility to require a gender equality plan from applicants and an initiative to increase the number of women-led technology start-ups.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	31. Calls on the Commission to propose an EU strategic framework for national homelessness strategies in view of the links between in-work poverty and homelessness; Calls on the Member States to take urgent measures to prevent and tackle homelessness and to prevent forced evictions;	On homelessness (paragraph 31), while the responsibility for addressing homelessness remains with national, regional and local authorities, the EU has a key role in supporting and complementing the activities of the Member States through policy guidance, mutual learning activities and funding. As part of the future work to implement the Social Pillar principle 19, the Commission will support enhanced cooperation between stakeholders willing to make concrete progress towards the eradication of homelessness, including national and local authorities, service providers, and housing organisations, in the framework of the European Platform on Combatting Homelessness, announced in the Pillar Action Plan. This support will include mutual learning activities, with the goal of identifying transferable aspects of national policies, learning from good practice examples or supporting the implementation of emerging policies or practices in the fight against homelessness.		In June 2021, the Commission launched the <a href="#">European Platform on Combatting Homelessness</a> .	
14)	34. Calls on the Commission to present an EU framework on minimum income;	Principle 14 on minimum income, in particular, states that everyone lacking sufficient resources should have the right to adequate minimum income benefits, effective access to enabling goods and services and, for those who can work, incentives to (re)integrate the labour market. The Social Scoreboard accompanying the Pillar also includes a number of indicators related to poverty and inequalities. The Council Conclusions on Strengthening Minimum Income Protection to Combat Poverty and Social Exclusion in the COVID-19 Pandemic and Beyond (11721/2/20 REV 2) refer to the existing EU framework of minimum income protection and invited the Commission to “initiate an update of the Union framework to effectively support and complement the policies of Members States on national minimum income protection”. This framework is consistent with the 1992 Council Recommendation on common criteria on sufficient resources and social assistance in social protection systems (92/441/EEC), with the mentioned 2008 Recommendation on active inclusion		It should be noted that, in its CWP 2022, the Commission announced its intention to present a non-legislative recommendation on minimum income in Q3 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and relevant monitoring, and with policy coordination activities within the European Semester that are underpinned by the EU benchmarking framework on minimum income protection of the Social Protection Committee (SPC). This is further supported by the mutual learning activities under the Open Method of Coordination process of the same Committee. In the European Pillar of Social Rights Action Plan, the Commission announced its plan to propose a Council Recommendation on minimum income in 2022 to effectively support and complement the policies of the Member States.			
15)	35. Calls on the Commission and the Member States to invest in active labour policies so as to render European workers and economies more resilient and to endow workers with valuable skills;	On active labour policies (paragraph 35), evidence shows that participation levels and investments in active labour market policies differ significantly across the EU, particularly when it comes to labour market training and adult learning. Reinforcing active labour market policies has been high on the agenda in the European Semester for many years. Evidence shows that Member States with good labour market outcomes are also generally those with a system of well-established active labour market policies and labour market training institutions. The Commission believes that these policy areas are among the key priorities for the Recovery and Resilience Facility and will make EU labour markets more resilient and better prepared for any future economic downturns. The EASE recommendation also underlines the important role coherent packages of active labour market policies (comprising i) hiring and transition incentives and support to entrepreneurship; ii) upskilling and reskilling opportunities linked to labour market needs; and iii) enhanced support by employment services) could play in fostering a fair, green and digital recovery.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2021 <a href="#">Commission Recommendation for Effective Active Support to Employment</a> (EASE), RRF).	
16)	44. Calls on the Commission and the Member States to enforce the legislative framework on minimum working conditions for all workers, in particular for those workers employed under precarious working conditions, which also	With reference to working conditions and other aspects related to workers in the gig economy (paragraph 44), the Commission's Work Programme announces a legislative initiative on working conditions in platform work for the fourth quarter of 2021. The Commission consequently launched on		On 9 December 2021, the Commission presented a package of measures to improve the working conditions of people working through digital labour platforms. The proposed measures include the <a href="#">communication</a> 'Better working conditions for a stronger social Europe:	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>often affect atypical workers or non-standard workers in the gig economy, and to improve this framework by addressing gaps in the legislation and improving existing directives<sup>144</sup> or through new legal acts where relevant;</p>	<p>24 February the first stage of the formal consultation of the social partners to seek their views on the direction of EU action in this area. The second stage consultation is expected to be launched before the summer. In parallel, the Commission is studying new business/ working models through platforms and their relation and impact on working conditions.</p> <p>[...]</p> <p>On minimum working conditions for all workers, from platform workers to bogus self-employment and unpaid internships, also in view to combat working conditions adding to in-work poverty, such as undeclared overtime, unreliable or unpredictable working time, the Commission (paragraphs 44, 48, 51, 66 and 83) recalls that the Directive on Transparent and Predictable Working Conditions with the transposition deadline of 1 August 2022 (Directive 2019/1152/EU) will provide new and reinforced rights for all workers. This includes the right to know, within the first week, what their basic working conditions are, such as information on their remuneration, their working schedule and the duration of their contract. Further, the directive provides new material rights targeting in particular atypical workers, for instance on-demand, platform and domestic workers provided they have the status of employees. These rights include a limitation on probation periods, a ban on unjustified exclusivity clauses, and a right for workers on on-demand contracts to know within which timeslots they can be called to work, a right to compensation if an employer cancels a work assignment at short notice as well as measures to prevent abuse of on-demand, including zero-hour, contracts. The directive also stipulates that training which the employer is obliged to provide according to Union law, national law or collective agreements shall be provided to the worker free of</p>		<p>harnessing the full benefits of digitalisation for the future of work' and a <a href="#">proposed Directive</a>.</p>	

<sup>144</sup> Directive (EU) 2019/1152 of the European Parliament and of the Council of 20 June 2019 on transparent and predictable working conditions in the European Union (OJ L 186, 11.7.2019, p. 105).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		cost and shall count as working time. The Commission is supporting the Member States in the transposition of the directive. In accordance with its Article 23, the Commission shall, by 1 August 2027, review the implementation of the directive and propose, where appropriate, legislative amendments.			
17)	45. [...] Calls on the Commission to complement and support the Member States' activities regarding social security and social protection of workers;	On social security and social protection of workers (paragraph 45), the Commission is fully committed to promote the extension of social protection schemes for all workers and the self-employed, in particular through supporting the implementation of the 2019 Council Recommendation on access to social protection for workers and the self-employed. The Commission will continue to support the Member States in the area through mutual learning activities, support to structural reforms and the monitoring through the Social Protection Committee. The Commission will also monitor the implementation of the country specific recommendations adopted in this area in the European Semester.		The general nature of the commitment's wording makes it unclear to what extent the action was carried out.	
18)	46. [...] Calls on the Commission and Member States to remove the existing barriers to mobility in the European Union;	Although no specific reply is provided to paragraph 46,  The Commission states in the follow-up the  on labour mobility, mobile workers' rights and social security coordination (paragraphs 73, 77 and 98) that 'the Directive on Transparent and Predictable Working Conditions (see reply 44) requires employers to inform all workers at the start of their employment relationship about the essential elements of that employment, without specific provision as regards language. [...]. The ELA Translation Facility supports translation of the relevant labour mobility websites into other languages.'		See point 73 below.	
19)	48. Calls on the Commission and the Member States to combat strategies adding to in-work poverty, such as undeclared overtime,	As regards undeclared overtime (paragraph 48), in addition to the provisions of the Directive 2019/1152/EU mentioned above, the Commission recalls that the EU Court of Justice has		No further/specific actions proposed/promised to be taken by the Commission - co competences.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>adapting and modernising existing labour laws;</p>	<p>Guidelines for Employment Policies throughout the last decade, reinforced in the current guideline 7. The Framework Agreement on fixed-term work (Directive 1999/70/EC) recognises that contracts of an indefinite duration are the general form of employment while acknowledges that fixed-term contracts may respond to the needs of both employers and workers. Member States have to prevent their abusive use, including e.g. through limitations on the maximum number of renewals of such contracts. This also applies to part-time fixed term workers. This directive has greatly contributed to reducing the precariousness of part-time fixed-term work. The Commission continues monitoring its implementation and, in case of an incorrect transposition, may initiate infringement procedures. Progresses are yearly discussed within the multilateral surveillance by the Employment Committee (EMCO) and the European Semester process. In relation to petitions referring to individual cases, national authorities and, particularly, national courts are in a better position to clarify the facts and provide an appropriate redress to the affected workers. If the information in a petition has revealed an incorrect transposition of a directive in a Member State, the Commission may initiate infringement procedures, or may link that petition to an ongoing infringement. In those cases, the Commission provides in its reply to the petition as much information about the infringement as possible, and regularly updates the Petitions Committee about the state of play of the infringement. The Framework Agreement on part-time work (Directive 1999/70/EC) facilitates the development of quality voluntary part-time work, helps tackle the issue of involuntary part-time work and contributes to the flexible organisation by taking into account both employers and workers' needs. Under the Framework Agreement, employers should give consideration to requests from employees to transfer not only from full-time to part-time, but also from part-time to full-time and to otherwise increase working time, and they should provide timely information on the availability of both part-time</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and full-time positions. The Framework Agreement also prohibits any discrimination against part-time workers as regards employment conditions. According to Eurostat statistics, between the fourth quarter of 2019 and the third quarter of 2020, involuntary part-time rose in the EU. In several Member States, this increase was stronger for men than for women, reflecting the combined effect of sectoral composition of employment by gender and the effect of the containment measures. In the case of men, this increase is likely to be reabsorbed as labour market recovers. Conversely, the share of women in involuntary part-time is less cyclical than that of men. Women are indeed particularly affected by involuntary part-time work. The Commission is encouraging the Member States to tackle the gender gap in part-time work due to its negative consequences on adequacy of earnings and pensions. A considerable proportion of part-time work is due to lack of care services and reflect inequalities in the sharing of the care burden, which has increased in the wake of the Covid-19 crisis. The Work-Life Balance Directive (Directive (EU) 2019/1158) introduces a set of minimum standards to help reconcile work and care responsibilities, through better sharing of care responsibilities between women and men. The introduction of paternity leave and carer's leave, as well as non-transferable rights to parental leave, together with the availability of affordable and high quality care services for children and other dependents, should support female labour market participation. Next to the European Semester country-specific recommendations that address underemployment of women, including part time work, the Commission is assisting the Member States with the transposition of this directive.</p>			
27)	69. Welcomes Member States' initiatives aimed at reducing precarious employment and eliminating fraudulent practices intended to undercut wages and avoid social security contributions <sup>(80)</sup> and calls on the Commission	No specific reply is provided to this particular point (on putting forward proposals); see, however, reply to point 68.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to put forward proposals, within the limits of its competences, as defined by the Treaties;				
28)	71. [...] Calls on the Commission and Member States to tackle involuntary part-time work and to make strong efforts to promote open-ended employment and to restrict the use of continually renewed temporary contracts;	See reply to point 68.		No further/specific actions proposed/promised to be taken by the Commission.	
29)	73. Calls on the Commission and the Member States to ensure the proper enforcement of EU law on labour mobility and social security coordination and, in particular, to ensure that workers are informed about their rights, obligations and procedural safeguards in a language they understand before signing their contracts <sup>149</sup> ; [...]	On labour mobility, mobile workers' rights and social security coordination (paragraphs 73,77 and 98), the Directive on Transparent and Predictable Working Conditions (see reply 44) requires employers to inform all workers at the start of their employment relationship about the essential elements of that employment, without specific provision as regards language. In the Commission's Guidelines on Seasonal Workers in the EU in the Context of the Covid-19 Outbreak (C(2020) 4813 final), the Commission invites the Member States to require employers to provide the information to seasonal workers in a language they understand. The European Labour Authority (ELA) has been working to support the Member States in complying with their information obligations to individuals and employers also through a dedicated working group together with experts from national administrations, social partners, and an independent expert appointed by the European Parliament. The ELA Translation Facility supports translation of the relevant labour mobility websites into other languages. The Commission has been closely monitoring the situation of mobile workers, including the challenges brought on by the COVID-19 crisis and the compliance with the existing EU legal framework, to act swiftly if specific infringements occur. In 2016, the Commission launched a proposal to revise the EU rules on social security		No further/specific actions proposed/promised to be taken by the Commission on this particular point (ensure proper enforcement of EU law on labour mobility and social security coordination and, in particular, ensure that workers are informed in a language they understand) as according to the Commission, it has been already working on action falling under the scope of the EP request (Directive on Transparent and Predictable Working Conditions, EC guidelines on seasonal workers in the EU, ELA Translation Facility, EC proposal to revise EU rules on social security coordination).	

<sup>149</sup> As provided for by Directive (EU) 2019/1152 of the European Parliament and of the Council of 20 June 2019 on transparent and predictable working conditions in the European Union (OJL 186, 11.7.2019, p. 105).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		coordination with the aim of ensuring that the rules remain fair, clear and easier to enforce. The proposal updates and safeguards the rights of citizens moving to another EU country and facilitates the cooperation between national authorities.			
30)	79. Takes note of the high number of petitions received by the Committee on Petitions, which alert it to the abusive use of fixed-term contracts in both the public <sup>(82)</sup> and private <sup>(83)</sup> sectors and notes in this regard that the most frequently mentioned cause of work stress is job precarity; Calls on the Commission to examine these petitions and to provide a better response, in line with its competences and those of the Member States in order to tackle in-work poverty, social exclusion and precarious work effectively;	In relation to petitions referring to individual cases, national authorities and, particularly, national courts are in a better position to clarify the facts and provide an appropriate redress to the affected workers. If the information in a petition has revealed an incorrect transposition of a directive in a Member State, the Commission may initiate infringement procedures, or may link that petition to an ongoing infringement. In those cases, the Commission provides in its reply to the petition as much information about the infringement as possible, and regularly updates the Petitions Committee about the state of play of the infringement (see reply to point 68).		The general nature of the commitment's wording ('the Commission may initiate infringement procedures, or may link that petition to an ongoing infringement') makes it unclear if and to what extent the action was carried out.	
31)	83. [...] Calls on the Commission and Member States to end the practice of unpaid internships and to guarantee high-quality internships with decent pay;	See reply to point 66.		See point 66 above.	
32)	86. Calls on the Commission to promote the use of the ESF+ for building capacity among social partners with the aim of strengthening collective bargaining in Europe; [...]	The European Social Fund Plus (ESF+) Regulation provides that all Member States shall allocate an appropriate amount of their ESF+ resources to support the capacity building of social partners and civil society organisations with regards to their activities in the areas of employment, education and training and social inclusion. For Member States who received a relevant country-specific recommendation, this compulsory allocation is set at 0.25% of their ESF+ resources. In addition, capacity building of social partners and civil society organisations can be supported regarding their involvement in the implementation of ESF+ programmes.		No further/specific actions proposed/promised to be taken by the Commission.	
33)	88. Calls on the Commission to monitor and the Member States to ensure the right of all	See reply to point 12.		No further/specific actions proposed/promised to be taken by the Commission on this particular point	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	workers to organise and to negotiate and conclude collective agreements, and to take immediate action when this right is violated;			(promote collective bargaining) as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Semester, 2020 Proposal for directive on adequate minimum wages, 2021 European pillar of social rights action plan, report of Andrea Nahles, ESF +</a> ).	
34)	90. Urges the Commission to improve the Public Procurement Directives <sup>150</sup> to prevent competition at the expense of wages so that only those who do not undermine existing collective agreements can successfully bid; [...]	On the call to improve the Public Procurement Directives (paragraph 90), the existing directives (Directives 2014/23/EU, 2014/24/EU and 2014/25/EU) already include provisions requiring the Member States to take appropriate measures to ensure that in the performance of public contracts economic operators comply with applicable obligations in the fields of environmental, social and labour law, including those enshrined in collective agreements (see e.g. Article 18(2) of Directive 2014/24/EU). In addition, public authorities are encouraged to make use of green, social and innovative criteria in their public procurement rules and of the guidance on social public procurement. <sup>151</sup> Public buyers may exclude or may be required by national law to exclude bidders who fail to comply with such obligations (see e.g. Article 57(4)(a) of Directive 2014/24/EU). Furthermore, they must reject a bid that competes in the tender procedure at an abnormally low price due to the failure to respect these obligations (see e.g. Article 69(3) of Directive 2014/24/EU). The Commission will provide more information and indications to public buyers on these tools in its upcoming new guide on socially responsible public procurement. Finally, the Commission's proposal for a directive on adequate minimum wages in the EU includes a provision which would		No further/specific actions proposed/promised to be taken by the Commission on this particular point (improve Public Procurement Directives) as according to the Commission, it has been already working on action falling under the scope of the EP request (as, according to the EC, Directives 2014/23/EU, 2014/24/EU and 2014/25/EU, as well as the EC proposal for a directive on adequate minimum wages in the EU already include relevant provisions).	

<sup>150</sup> Directive 2014/23/EU of the European Parliament and of the Council of 26 February 2014 on the award of concession contracts (OJ L 94, 28.3.2014, p. 1); Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on public procurement (OJ L 94, 28.3.2014, p. 65); Directive 2014/25/EU of the European Parliament and of the Council of 26 February 2014 on procurement by entities operating in the water, energy, transport and postal services sectors (OJ L 94, 28.3.2014, p. 243).

<sup>151</sup> [https://ec.europa.eu/info/policies/public-procurement/support-tools-public-buyers/social-procurement\\_en](https://ec.europa.eu/info/policies/public-procurement/support-tools-public-buyers/social-procurement_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		require the Member States to ensure that “in the performance of public procurement or concession contracts economic operators comply with the wages set out by collective agreements for the relevant sector and geographical area and with the statutory minimum wages where they exist”.			
35)	92. [...]; Calls on the Commission, in this regard, to promptly introduce a digital European Social Security Number; [...]	On the digital European Social Security Number (paragraph 92), the Commission has been exploring the different technical and policy options for a possible initiative to digitise the cross-border verification of social security coverage and address challenges in citizens’ identification for social security coordination purposes. Based on the data gathered on the technological options, including their costs and benefits, the idea of creating a number did not prove to be a relevant or cost-effective solution to achieve the expected outcomes. Therefore, the Commission discontinued exploring further the introduction of a number, and instead announced in the European Pillar of Social Rights Action Plan launching of a pilot to explore the feasibility of a digital solution to facilitate the interaction between mobile citizens and national authorities, and improve the portability of social security rights across borders (European Social Security Pass), building on the initiative for a trusted and secure European e-ID (second quarter of 2021).		The European Commission confirmed the abandonment of a draft initiative to introduce a European national insurance number to MEPs in the Committee on Employment and Social Affairs (EMPL) on 16 June 2021, before giving details of the modalities and timetable for the ‘European Social Security Pass’. In On 3 June 2021, the Commission presented a framework for <a href="#">trusted and secure Digital Identity for all Europeans</a> (European e-ID). In 2021, the <a href="#">European Social Security Pass pilot project</a> was launched.	
36)	93. Calls on the Commission to set out an EU-level response to extend support to women-led SMEs during and after the crisis;	No specific reply is provided to this particular point (set out an EU-level response to extend support to women-led SMEs).		Not mentioned.	
37)	95. Calls on the Commission to pay particular attention to the economic impact of short-time work schemes, to people who have been permanently or temporarily laid off, and to the social impact on people living precariously; [...];	On short-time work schemes (paragraphs 95 and 102), the Commission has promoted the use of short-time work schemes and similar measures to protect all workers, including self-employed and atypical and precarious workers more hit by the COVID-19 crisis. At EU level, concrete support to this type of		No further / specific actions proposed/promised to be taken by the Commission on this particular point (pay particular attention to the economic impact of short-time work schemes and protect workers to help them keep	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Calls on the Commission and the Member States, to this end, to protect workers to help them keep their jobs, including by providing financial support such as via short-time schemes and support for those in precarious employment and some forms of atypical work, and to consider financial support for some types of solo self-employed individuals who have lost their financial base owing to the crisis; [...]</p>	<p>measures is being provided notably through the European structural funds, the Coronavirus Response Investment Initiatives (CRII and CRII+), the European instrument for temporary support to mitigate unemployment risks in an emergency (SURE), and the Recovery Assistance for Cohesion and the Territories of Europe (REACT-EU). As a temporary instrument, SURE provides for an emergency operationalisation of mitigating unemployment risk in the context of the COVID-19 crisis. Commission will carefully evaluate the successful experience of SURE in the coming years.</p> <p>Minimum income schemes can protect people facing loss of their job, lowered income, and find themselves without other income protection, while playing an economic stabilisation function by supporting household incomes in times of economic shocks. Such schemes are last-resort safety net for people with low income, whether in or out of work, granted following a means test.</p>		<p>their jobs, including by providing financial support) as according to the Commission, it has been already working on action falling under the scope of the EP request (Structural funds, CRII and CRII+, SURE and REACT-EU).</p>	
38)	<p>98. [...] ; Calls on the Commission and the Member States to tackle abusive practices and to safeguard the rights of seasonal and cross-border workers employed along the subcontracting and supply chain; [...]</p>	<p>On seasonal and cross-border workers employed along the subcontracting and supply chain (paragraph 98), given that the subcontracting in chain often implies a cross border dimension, efficient operational cooperation between the competent enforcement authorities is a key success factor of tackling abuses and protecting workers' rights. For posted workers, the Directive 2014/67/EU sets out that Member States must guarantee subcontracting liability covering at least the construction sector and minimum wages, and the direct link between the contractor and subcontractor. The Commission will launch a study in 2021 to look into the working conditions of posted workers in subcontracting chains. ELA will launch an action plan on cross-border seasonal workers, including an awareness-raising campaign on fair and safe working conditions for seasonal workers and actions supporting the enforcement of relevant labour mobility legislation. ELA coordinates and supports concerted and joint inspections between Member States while fully respecting the applicable</p>		<p>It should be noted that the study on working conditions of posted workers in subcontracting chains, as announced by the Commission for 2021, is currently (as of January 2022) not available (nor is any information about its launch). According to the reply, ELA will also launch an action plan on cross-border seasonal workers.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>national legislations and industrial relations models. During its first year of activity, ELA has already developed common tools and procedures for the organisation, execution and follow-up of cross-border labour inspections. It has also run a number of pilot inspections in cooperation with the Member States. Concerning in particular the fight against labour exploitation and human trafficking, ELA cooperates with the European Union's law enforcement agency (EUROPOL) in the organisation of the EMPACT (European Multidisciplinary Platform against Criminal Threats) Joint Action Days.</p>			
39)	<p>101. Calls on the Commission to adopt an EU care strategy, responding to the social impacts on those with caring responsibilities, who are disproportionately women; [...]</p>	<p>The Commission recalls that combating segmentation on the EU labour markets has been a key part of the EU Guidelines for Employment Policies throughout the last decade, reinforced in the current guideline 7. [...] The Work-Life Balance Directive (Directive (EU) 2019/1158) introduces a set of minimum standards to help reconcile work and care responsibilities, through better sharing of care responsibilities between women and men. The introduction of paternity leave and carer's leave, as well as non-transferable rights to parental leave, together with the availability of affordable and high quality care services for children and other dependents, should support female labour market participation. Next to the European Semester country-specific recommendations that address underemployment of women, including part time work, the Commission is assisting the Member States with the transposition of this directive. On an EU care strategy (paragraph 101), in addition to the Work-Life Balance Directive and the European Semester analysis and recommendations (see reply to point 97 above), the Commission has been working on various dimensions of care in the framework of social and employment policies, including through the Council Recommendation on High-Quality Early Childhood Education. The Pillar Action Plan has announced a specific policy initiative at EU level on long-term care, to be proposed in 2022. The ongoing public consultation on the Commission's green paper</p>		<p>It should be noted that under the Commission Work Programme 2022 (<a href="#">CWP 2022</a>), the Commission announced, for Q3 2022, a European care strategy (including a Communication on a European care strategy, accompanied by the revision of the Barcelona targets, and a proposal for a Council Recommendation on long-term care).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>on ageing also addresses long-term care challenges, among others. The Commission also supports the Member States in improving availability of quality care services for people in need, including people with disabilities and elderly, through the multiannual financial framework 2021-2027 period, as well as in the Recovery and Resilience Facility.</p>			
40)	<p>103. Calls on the Commission and the Member States to mitigate the worst consequences of COVID-19 through targeted EU and national support and the allocation of sufficient resources; [...] Calls on the Commission and the Member States to ensure that financial assistance is not provided to undertakings registered in countries listed in Annex I to the Council conclusions on the revised EU list of non-cooperative jurisdictions for tax purposes; Calls on the Commission and the Member States to ensure that beneficiaries comply with the fundamental values enshrined in the Treaties and that companies receiving public financial support protect workers, guarantee decent working conditions, respect trade unions and applicable collective agreements, pay their share of taxes, and refrain from share buybacks or paying out bonuses to management or dividends to shareholders;</p>	<p>On the link between financial assistance and tax payment, (paragraph 103), the Commission indeed recognizes the importance of protecting the internal market against income outflows towards “tax havens”. On 14 July 2020, the Commission addressed a Recommendation to Member States on making state financial support to undertakings in the Union conditional on the absence of links to countries that feature on the EU List of non-cooperative jurisdictions for tax purposes (C(2020) 4885 final). Member States should adopt measures to refuse financial support to their undertakings if these have direct or indirect links to other associated undertakings in EU listed jurisdictions. Some limited carve-outs are recommended but solely for the purpose of securing the continuity of real activity in the affected jurisdictions. This is mainly witnessed by the existence of a physical presence. The EU Financial Regulation does not allow the use of entities incorporated or established in EU listed jurisdictions when it comes to implementing (i) EU funds or (ii) financial instruments and budgetary guarantees. In the second case, entities may derogate only if the operation is physically implemented in one of those jurisdictions and does not present any indication that money laundering, terrorism financing, tax avoidance, tax fraud or tax evasion are involved.</p> <p>[...]</p> <p>On using targeted EU and national support to mitigate the consequences of COVID-19 (paragraph 103) [...], the Coronavirus Response Investment Initiatives (CRII) allowed for great flexibility in the use of the ERDF and the ESF, to address the</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		challenges raised by the Covid-19 pandemic concerning employment, education and social inclusion. Under the 2021-2027 Multiannual Financial Framework, the ESF+ and the ERDF will continue provide targeted support to those most affected by the pandemic, including youth, children living in precarious situations as well as the most deprived.			
41)	106. Calls on the Commission and the Member States to address the consequences of the crisis and to facilitate the transition by taking account of regional particularities, and therefore guarantee a swift allocation of available funding, such as through training in future-oriented jobs, upskilling and reskilling and by developing the ESF+ financially to this end;	On [...] guaranteeing the swift allocation of available funding (paragraph 106), the Coronavirus Response Investment Initiatives (CRII) allowed for great flexibility in the use of the ERDF and the ESF, to address the challenges raised by the Covid-19 pandemic concerning employment, education and social inclusion. Under the 2021-2027 Multiannual Financial Framework, the ESF+ and the ERDF will continue provide targeted support to those most affected by the pandemic, including youth, children living in precarious situations as well as the most deprived. The NextGenerationEU initiative, which includes the Recovery and Resilience Facility (RRF) and Recovery Assistance for Cohesion and the Territories of Europe (REACT-EU), will help repairing the economic and social damage caused by COVID-19 and rebuild a post-crisis Europe in which green, digital and social objectives are jointly pursued. Under the new objective of "Fostering crisis repair in the context of the COVID-19 pandemic and its social consequences and preparing a green, digital and resilient recovery of the economy", the ESF+ will provide support to the implementation of many actions, such as digital learning and digital skills, skills for the green transitions, addressing inequalities in education and training. In the 2021-2027 period, Member States can use the ESF+ for operations that include improving education and training systems, equal access to and completion of quality and inclusive education and training, supporting active inclusion, antidiscrimination and social services. Further to the adoption of the RRF Regulation Member States will soon submit their Recovery and Resilience Plans of reforms and investments to address the challenges identified in the European Semester		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (RRF, REACT-EU, ESF+, EASE...).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>country-specific recommendations, with many of them being in employment and social domains. The RRF regulation gives prominence to the employment, skills and social dimensions, as visible both in the scope of the Facility (Articles 3 and 4) and in the assessment criteria of the Recovery and Resilience Plans (Articles 18 and 19). The national plans are required to explain how Member States will strengthen job creation and their economic and social resilience and contribute to the implementation of the European Pillar of Social Rights. In this regard, the policies to facilitate job transitions promoted by the Commission Recommendation on Effective Active Support to Employment (EASE) can also be included in the national Recovery and Resilience Plans, if designed in line with the RRF Regulation.</p>			
42)	<p>107. Calls on the Commission and the Member States to monitor in particular sectors characterised by a high degree of job insecurity, in order to prevent the abuse of workers such as those in temporary positions in the agricultural sector, where seasonal workers face abusive employment conditions that in some cases violate not only labour rights, but also workers' fundamental rights;</p>	<p>On preventing the abuse of workers such as those in jobs with high insecurity (paragraph 107), on 26 March, the Commission organised together with the European Labour Authority (ELA) a dedicated hearing with the social partners to work together in order to improve the working and living conditions of mobile workers in temporary positions. This concerns in particular the situation of seasonal workers in the agricultural sector. The Commission will seek to strengthen the cooperation with Member States to enhance the monitoring of working conditions in all sectors, including agriculture, to ensure the respect of relevant legislation in relation to both permanent and temporary workers' conditions. At the end of 2020, the Commission addressed recommendations to each Member State, accompanied by a Communication for their Common Agricultural Policy Strategic Plans. In all cases, Member States were asked to ensure the protection of agricultural workers, particularly those in precarious, seasonal and undeclared circumstances.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (2021 ELA hearing)</p> <p>The general nature of the commitment's wording makes it unclear if and to what extent the action is to be carried out.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
43)	109. [...]; Calls on the Commission to propose as soon as possible a new strategic framework for health and safety at work post-2020 and calls on the Commission, in this regard, to identify the challenges faced and present instruments for workers in low-income sectors to address these challenges; Stresses that the strategy must include a focus on platform workers and workers in non-standard types of work; Calls on the Commission to amend Directive 2004/37/EC <sup>152</sup> to revise and expand the scope of occupational exposure limit values for a number of cancer- or mutation-causing substances;	On the urgency to propose a new strategic framework for health and safety at work post-2020 (paragraph 109), the prevention of occupational injuries and diseases is the cornerstone of all EU health and safety legislation, including the new EU Strategic Framework on Health and Safety at work, planned to be adopted in June 2021. The Commission is collecting stakeholders' feedback on the new Framework, both through a formal consultation and informally (Roadmap and ad hoc feedback). Many stakeholders have already highlighted the importance to consider occupational and safety health risks in view of the new ways of working. The Commission is working on the best way to address these issues in the new Strategic Framework. On 22 September 2020, the Commission adopted a fourth proposal for a directive amending the Carcinogens and Mutagens Directive 2004/37/EC ('the CMD') as part of a continuous revision process of the CMD launched in 2016 and during which the European Union already adopted three amendments, addressing 26 substances. It aims to improve the protection of more than 1.1 million workers by setting new or revised occupational exposure limit values for acrylonitrile, nickel compounds and benzene.		On 28 June 2021, the Commission published a <a href="#">new EU Strategic Framework on Health and Safety at work</a> .	

<sup>152</sup> Directive 2004/37/EC of the European Parliament and of the Council of 29 April 2004 on the protection of workers from the risks related to exposure to carcinogens or mutagens at work (OJL 158, 30.4.2004, p. 50).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Preparatory work continues on further carcinogens or mutagens through the scientific assessment by the Risk Assessment Committee of the European Chemicals Agency. In addition, further priority chemicals are currently being identified in close consultation with the tripartite Advisory Committee on Safety and Health at Work's Working Party on Chemicals to be addressed in the future.</p>		<p>As to the EP call on the Commission to amend Directive 2004/37/EC<sup>153</sup> to revise and expand the scope of occupational exposure limit values for a number of cancer- or mutation-causing substances, the general nature of the commitment's wording makes it unclear to what extent the action is to be carried out.</p>	
44)	<p>110. [...] Calls on the Commission and Member States, in close cooperation with national social partners, to propose a directive on work-related stress setting company guidelines to tackle work-related stress factors and requiring all companies to formulate a company policy on work-related stress;</p>	<p>On tackling work-related stress (paragraph 110), in the framework Directive on safety and health of workers at work (Directive 89/391/EEC) employers already have the obligation to identify and assess all risks to which workers are or can be exposed, including those of psychosocial nature and work-related stress, as well as to put in place the appropriate preventive and protective measures. However, stakeholders have very different views on how to best tackle psychosocial risks at the workplace. While some consider the existing legislation not being sufficient and call for a specific directive, others seem to consider that a directive would be too restrictive, almost impossible to implement, and would not be the most adequate way to solve issues at the workplace. Member States have implemented different approaches as well, with some having binding detailed legislation addressing psychosocial risks at the workplace, and others remaining with general legislation. At this stage, it seems focus should be on effective application and enforcement of the existing legislation, promoting a prevention culture for combatting psychosocial risks in the workplace with the view to achieve concrete and sustainable results. The involvement of all relevant stakeholders and social partners is crucial. Concrete, tailor made practical tools for employers can have the most direct and</p>		<p>As to the EP call on the Commission to propose a directive on work-related stress, the general nature of the commitment's wording makes it unclear to what extent the action will be carried out.</p>	

<sup>153</sup> Directive 2004/37/EC of the European Parliament and of the Council of 29 April 2004 on the protection of workers from the risks related to exposure to carcinogens or mutagens at work (OJL 158, 30.4.2004, p. 50).

		powerful impact to reduce work-related stress. The forthcoming new Strategic Framework on Health and Safety at work 2021—27 will certainly include this issue, with concrete calls on Member States and social partners.			

#### 4.1.13.6. EMPL Resolution 6: EP resolution of 10 March 2021 on implementation of Council Directive 2000/78/EC establishing a general framework for equal treatment in employment and occupation in light of the UNCRPD

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation of Council Directive 2000/78/EC establishing a general framework for equal treatment in employment and occupation in light of the UNCRPD</b>	10/03/2021 <a href="#">T9-075/2021</a> <a href="#">2020/2086(INI)</a> EMPL	<a href="#">SP(2021)261</a>	Final reply (SP) received 12 July 2021	Specific reply			
1)	3. Calls on the Commission and the Member States to adopt universal design standards and guidelines on the accessibility of environments, programmes, services and products, including workplaces, their equipment and facilities, in order to make them usable by all;	On universal design standards and guidelines on the accessibility of environments, programmes, services and products (paragraph 3) the Commission requested the European Standardisation organisations to develop European Standards on the built environment, information and communication technologies, and accessibility following a design for all approach. To that end, the Commission issued Mandates 376, 420, 473 and 554. This results in European standards EN 17210 on accessibility of the built environment, EN 301549 on accessibility of information and communications technology, and EN 17161 on accessibility following a design for all approach. These standards are available and can be used for the accessibility of environments, programmes, services and products, including workplaces, their equipment and facilities.				European standardisation mandates can be found in a dedicated <a href="#">Commission database</a> by DG GROWTH, with the latest mandate (554) dating from 2017. EN 17210 on accessibility of the built environment was issued in March 2021 ( <a href="#">CENELEC press release</a> ), as was the <a href="#">latest part of EN 301549</a> , <a href="#">EN 17161</a> (design for all) dates from 2019. The <a href="#">EU Disability Strategy 2021-2030</a> announces further work on standardisation and technical specifications. This work is in progress: in November 2021, the Commission consulted stakeholders on a <a href="#">draft standardisation request</a> , proposing to revise three existing accessibility standards.	
2)	4. Calls on the Member States to ensure the provision of reasonable accommodation for PwD in the workplace, without any cost being borne by workers; Calls on the Commission to prepare clear EU guidelines on reasonable accommodation	On EU guidelines on reasonable accommodation (paragraph 4), the Commission launched in 2019-2020 the #EUvsDiscrimination campaign raising awareness of the rights and obligations deriving from EU equality legislation. During the campaign, the <i>Guide of promising</i>				EU Guidelines <a href="#">How to put reasonable accommodation into practice</a> (2020).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>detailing what forms it might take in line with an individual's needs so that Article 5 of the Directive can be transposed effectively into national law; Calls on the Commission to launch infringement procedures and to encourage Member States to ensure that a sanction system is in place in case of non-provision of reasonable accommodation, as it constitutes a form of discrimination; considers that Parliament might use the option of calling on the Commission to launch such infringements procedures; Calls on the Member States to prepare support and guidance materials and provide relevant training in accessible formats for employers, duty bearers, workers and PwD in order to develop the necessary knowledge, skills and awareness about the practical implementation of reasonable accommodation, thereby also dispelling myths about its prohibitive costs;</p>	<p><i>practices: how to put reasonable accommodation into practice</i> was published<sup>154</sup>. It contains examples of the provision of reasonable accommodation in the public sector, the private sector and from civil society. The Commission will continue to take action in this direction including by supporting the European Network of Equality Bodies (EQUINET), which works on this issue, as well as other actions such as supporting training for judges and legal practitioners.</p>		<p>Regarding infringement procedures, the ECJ condemned Italy in 2013 for failure to transpose the provisions of Directive 2000/78/EC regarding the duty of employers to provide reasonable accommodation (Case C-312/11 Commission v Italy). More recent infringement cases against Member States have not been reported.</p> <p>The <a href="#">CWP 2022</a> announces a new legislative initiative to strengthen the role and independence of equality bodies for Q3.</p>	
3)	<p>10. Calls on the Commission and the Member States to urgently put in place measures to assess the key trends for the future of work from a disability perspective with the active involvement of PwD, in order to identify and launch specific actions to make the labour market more inclusive considering the diversity of PwD; Stresses in that context the importance of inclusive and accessible initiatives with appropriate funding aimed at lifelong learning, including vocational education and training (VET) and skills development for PwD from an early age, with a particular focus on digital and green skills in line with the fast-changing realities and demands of the current and future labour market; Underlines,</p>	<p>On the call to make the labour market more inclusive for persons with disabilities, and take action on skills (paragraph 10), in 2022, the Commission will present a package of measures to improve labour market outcomes of persons with disabilities, seeking cooperation with the European Network of Public Employment Services, social partners and organisations of persons with disabilities. In the European Skills Agenda, the Commission commits to join forces with the European Network of Public Employment Services to develop peer learning to shed light on the skills needed in the labour market and to step up the provision of guidance services for people in employment and for vulnerable groups, and on closing skills gaps. The Council Recommendation on vocational</p>		<p>According to the reply, the Commission will present a harassment.</p>

	<p>furthermore, the importance of providing appropriate support to PwD throughout their lives, making better use of innovative technologies to level the playing field and remove barriers to education and employment, and to help PwD gain access to digital tools and software that are indispensable for their independent living;</p>	<p>education and training (VET)<sup>155</sup> for sustainable competitiveness, social fairness and resilience invites the Member States to design vocational programmes so they are inclusive and accessible for vulnerable groups, such as persons with disabilities. As announced in the Digital Education Action Plan 2021-2027 (COM/2018/022), the Commission will support the Member States in securing assistive technologies and in providing an accessible digital learning environment and content. The Member States can make use of the reinforced Youth Guarantee to support young persons with disabilities.</p>			
4)	<p>13. Calls on the Member States to continuously assess, jointly with representatives of PwD, the characteristics, diversity and effectiveness of existing sheltered workshops in providing PwD with skills to gain employment in the open labour market, to ensure that they are covered and protected by legal frameworks covering social security, working conditions, minimum wages and non-discrimination, while phasing out provisions that violate the UNCRPD, especially its Article 27; Calls on the Commission to monitor this process; [...]</p>	<p>On the call to monitor the Member States' action on supporting the labour market outcomes of people with disabilities (paragraph 13), the Commission will continue monitoring the employment situation of persons with disabilities and the measures taken by the Member States via the European semester. Further, the Commission will address the fact that a large number of persons with severe disabilities do not work in the open labour market, but in sheltered employment. Such schemes are diverse and not all ensure adequate working conditions or labour-related rights for persons with disabilities, nor pathways to the open labour market. The Commission will, among others, explore the issue of quality jobs in sheltered employment, and pathways to the open labour market as part of its package to improve labour market outcomes of persons with disabilities.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) has been carried out.</p>	

<sup>155</sup> Council Recommendation ([2020/C 417/01](#)).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	17. Calls on the Commission and the Member States to guarantee that EU funds are not spent on segregated employment schemes for PwD with no prospect of finding non-sheltered employment;	On the use of EU funds (paragraph 17), the European Social Fund Plus (ESF+) Regulation requires the Member States to ensure that the ESF+ investments promote equal opportunities for all without discrimination, the inclusion in society of persons with disabilities on equal basis with others, and contribute to implementing the UNCRPD. These funds can also support employment opportunities for persons with disabilities in the open labour market. Moreover, the ESF+ should contribute to promoting accessibility for persons with disabilities to improve integration into mainstream employment, education and training, thereby enhancing their inclusion in all spheres of life. These principles should be taken into account in all dimensions and stages of preparing, monitoring, implementing and evaluating programmes.		No further/specific actions proposed/promised to be taken by the Commission.	
6)	18. Urges the Commission and the Member States to intensify their work with PwD, their representative organisations and equality bodies with the objective of preparing and launching comprehensive awareness-raising campaigns and targeted training in accessible formats and sign languages, aimed at employers, duty-bearers in all fields and society more broadly about the capabilities and contributions of PwD, and about	On the call to advance the awareness raising on the benefits of diversity, equality and non-discrimination (paragraph 18), the Commission emphasises the importance of information and awareness raising of the rights and obligations stemming from EU equality legislation, for example during the 2019-2020 #EUvsDiscrimination campaign. Under the Strategy for the rights of persons with disabilities 2021-30, the Commission will work with the Member States to		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the benefits of diversity, equality and non-discrimination, in order to eradicate the existing stigma and prejudice against PwD, to fight bullying, harassment and exploitation, and to achieve inclusive equality for all;</p>	<p>complement and support national campaigns, strengthen awareness-raising and combat stereotypes around disability. The Commission financially supports EU level disability organisations, including the European Disability Forum, and will continue to encourage information activities carried out by such organisations, and by supporting EQUINET, the European Equality Law Network, social partners and civil society. It will continue to support training for judges, lawyers and other professionals; and to organise dedicated events, notably to celebrate the International Day of Persons with Disabilities on 3 December.</p> <p>In addition, the Commission supports the work of equality bodies, including in their fight against discrimination on the ground of disability. The Commission financially supports EQUINET with an annual operating grant (C(2019)7824 final). EQUINET enables national equality bodies in Europe to share their expertise at the European level in order to learn from the successes achieved and the challenges raised during the implementation of their mandate at national level. In most Member States, this mandate includes combating discrimination against persons with disabilities. The 2018 Commission Recommendation on Standards for Equality Bodies (C(2018) 3850 final) promotes good practices on access and accessibility and encourages cooperation between equality bodies and the National Frameworks designated under the UNCRPD. The Commission Staff Working Document (SWD(2021) 63 final) on 'Equality bodies and the implementation of the Commission Recommendation on standards for equality bodies' recalls that it is essential that the premises of equality bodies are physically accessible for people with mobility impairment. Similarly, their online material and promotion campaigns must be accessible, among others, for people with visual or</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Fight against discrimination on the ground of disability)</p> <p><a href="#">Commission Recommendation on Standards for Equality Bodies.</a></p> <p>SWD '<a href="#">Equality bodies and the implementation of the Commission Recommendation on standards for equality bodies.</a>'</p>

			<p>hearing impairments. In its report (COM(2021)139 final) on the application of the Racial Equality Directive and of the Employment Equality Directive, the Commission has also announced that it will assess whether to propose new legislation to strengthen the role of national equality bodies by 2022.</p> <p>The Commission agrees that the Istanbul Convention offers the most comprehensive framework at international level to combat gender-based violence against women and domestic violence. Supporting the finalisation of the EU's accession to the Istanbul Convention remains a key priority for the Commission. In addition, as announced in the Commission's Work Programme 2021, the Commission is preparing a legislative initiative to prevent and combat violence against women and domestic violence, which will include an intersectional approach, covering also disability.</p>		<p>The <a href="#">CWP 2022</a> announces a legislative proposal to strengthen the role and independence of equality bodies for Q3 2022.</p> <p>The proposal for a directive on violence against women and domestic violence, which was announced in the 2021 CWP, is delayed and will only be presented in early 2022, according to an announcement made by Commissioner Helena Dalli during the plenary session on 25 November 2021.</p>	
7)	22. Calls on the Commission and the Member States to guarantee that inclusion policies pursued at sectoral and company level are established in consultation with workers' representatives;		<p>On guaranteeing that inclusion policies pursued at sectoral and company level are established in consultation with workers' representatives (paragraph 22), the Commission promotes social dialogue at EU level and provides support to national and European social partners. Issues related to inclusion policies can be addressed in the European Social Dialogue Committees organised by the Commission and through projects of social partners, which can receive financial support from the Commission under its call for proposals on social dialogue. In addition, the Commission will present a package of measures to improve labour market outcomes of persons with disabilities in 2022, seeking cooperation also with social partners and organisations of persons with disabilities, as well as the European Network of Public Employment Services.</p>		<p>Package of measures announced for 2022 (although not further specified).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	23. Calls on the Commission and the Member States to grant support to workers with disabilities resulting from an accident, continuing their employment or offering the person concerned an equivalent job that reflects their new skills, without loss of the rights and working conditions they enjoyed before the injury;	<p>The Staff Regulations include provisions on the support to workers with disabilities resulting from an accident (paragraph 23). The provisions establish that the employment of staff members who, in the course of their career, suffer from an injury resulting in disability will not be terminated on this ground, except in the event of total permanent invalidity preventing them from performing the duties corresponding to a post in their function group, in which case they will be entitled to an invalidity allowance. In line with the Staff Regulations and based on a case-by-case examination, the Commission provides reasonable accommodation in the event of disability incurred during the career, including via job re-structuring and modified working arrangements.</p> <p>The Commission as an employer provides a dedicated hotline – which has been operational for nearly two years - for its staff with disabilities, where a social assistant provides answers addressing specific needs, next to the information centralised on a dedicated website. In addition, trained Career Guidance Officers are available to offer one-to-one, tailor-made support, such as counselling on professional development and training, job-search strategy and tools and interview coaching to all staff, including with disabilities. In addition, Career Guidance Officers are available to provide specific assistance where needed.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p> <p>It appears however that the EP request refers to workers EU-wide, while the Commission's answer refers to the Staff Regulations of the EU institutions and is thus very narrowly framed.</p>	
9)	24. Calls on the Commission and the Member States to take a preventive and inclusive approach to occupational safety and health when supporting the recruitment and return to work of persons with disabilities; notes that this could be achieved via integrated pathways combining occupational safety and health (OSH) prevention with various forms of employability measures such as individualised	<p>On a preventive and inclusive approach to occupational safety and health (paragraph 24), the upcoming EU Strategic Framework on health and safety at work for the period 2021-2027 will aim at mobilising the Member States, social partners and other relevant stakeholders around common priorities on workers' protection. Building on the well-established tripartite approach, the new Strategic Framework will have inclusiveness as an essential element; efforts will be made to reach all</p>		<p>The <a href="#">EU's Strategic Framework on health and safety</a> was published on 28 June 2021.</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point.</p>

	support, counselling, guidance, and access to general and vocational education and training;	categories of workers, with special focus on return-to-work strategies.			
10)	25. Calls on the Commission and the Member States to address the existing gender, disability and ethnic pay gap, and in so doing to combat direct and indirect wage discrimination and the risk of in-work poverty for workers facing barriers at work and who are subject to multiple discrimination, especially LGBTI persons, women, Roma and refugees; Awaits the Commission's presentation of the announced legislation on pay transparency in the workplace in quarter one of 2021 to fight the pay gap faced by disadvantaged social groups, in particular PwD	As regards pay discrimination (paragraph 25), on 4 March 2021, the Commission proposed a Directive on pay transparency to strengthen the principle of equal pay for equal work between men and women (COM (2021) 93). The proposal recognises that gender-based pay discrimination may involve an intersection of various axes of discrimination, including on the ground of disability. A new definition aims at clarifying that, in the context of gender pay discrimination, such combination should be taken into account, thus removing any doubt that may exist in this regard under the existing legal framework. This will ensure that the courts or other competent authorities take due account of any situation of disadvantage arising from intersectional discrimination. Moreover, the Commission acknowledges the need to address intersectionality in all its equality strategies <sup>156</sup> . It has offered its support for the effective recognition of multiple and intersectional discrimination at national level by commissioning studies <sup>157</sup> and co-organising a seminar where government officials were able to explore challenges and good practices in addressing it in legislation and policymaking <sup>158</sup> .		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. ( <a href="#">4 March 2021, the Commission proposed a Directive on pay transparency to strengthen the principle of equal pay for equal work between men and women (COM (2021) 93)</a> ).	

<sup>156</sup> These include the Gender Equality Strategy 2020-2025 [COM(2020)152 final], EU anti-racism action plan 2020-2025 [COM(2020)565 final], the new Roma strategic framework for equality, inclusion and participation [COM(2020) 620 final], LGBTIQ Equality Strategy 2020-2025 [COM(2020) 698 final] and the Strategy for the Rights of Persons with Disabilities 2021-2030 [COM(2021) 101 final].

<sup>158</sup> The seminar was organised in cooperation with the Greek Ministry of Labour, Social Security and Social Solidarity and brought together the members of the EU High-Level Group on Non-Discrimination, Equality and Diversity on the issue.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	<p>29. Calls on the Commission to assess whether the Member States have detailed provisions in place to ensure that people can exercise their right to maternity leave, paternity leave, parental leave and care leave, as well as arrangements for flexible working, and whether these are adapted to the diverse needs of mothers with disabilities, mothers of children with disabilities or a long-term illness, or mothers in specific circumstances, such as those dealing with premature births; [...]</p>	<p>On paragraph 29 on safety and health at work, the Commission monitors the application of Directive 92/85 on improvements in the safety and health at work of pregnant workers, workers who have recently given birth or are breastfeeding, as well as Directive 2010/18 on the revised social partners' framework agreement on parental leave. In addition, the Commission assists the Member States in the implementation of the Work-Life Balance Directive 2019/1159, which aims at improving access to work-life balance measures and needs to be transposed by August 2022. In monitoring the implementation of these directives, the Commission takes as much as possible an intersectional approach. Especially the Work-Life Balance Directive requires the Member States to assess whether the conditions of access to and the detailed arrangements for parental leave should be adapted to the specific needs of parents in particularly disadvantaged situations. The Member States are also encouraged to assess whether the exercise of the right to paternity leave, carers' leave and flexible working arrangements should be adapted to particular needs (including those of single parents, adoptive parents, parents with a disability, parents of children with a disability or a long-term illness, or parents in particular circumstances, such as those related to multiple births and premature births). The Commission will monitor compliance with these obligations once the Directive is implemented into national law. Also, to help ensure that people can exercise their right to family-related leaves without losing their pension rights, the Commission and the Social Protection Committee are analysing the provision of pension credits during care-related career breaks in the 2021 Pension Adequacy Report, planned to be adopted in May 2021.</p>		<p>The Work-Life Balance Directive 2019/1159 needs to be transposed by August 2022.</p> <p>The <a href="#">2021 pensions adequacy report</a> was published in June 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	30. Calls on the Commission to propose legislation on the standards for equality bodies following consultations with organisations representing PwD, thereby providing them with a stronger mandate and adequate resources to safeguard the equal treatment of PwD and ensure accessible information dissemination for all;	On the call on the Commission to propose legislation on the standards for equality bodies (paragraph 30), the Commission Staff Working Document on 'Equality bodies and the implementation of the Commission Recommendation on standards for equality bodies' (SWD(2021) 63 final) concluded that key cross-cutting challenges remain. These include equality bodies' inadequacy of resources, which impacts negatively on the execution of all their responsibilities and activities, including data collection. Other challenges include a low awareness of the equality bodies' existence, limited independence (or insufficient legal safeguards to independence) and limited mandate for legal standing. In addition, not all equality bodies are competent for all the fields and grounds put forward by the Recommendation. The partial and uneven implementation of the Commission Recommendation leads to an unequal protection of victims of discrimination across the EU. Therefore, the Commission will assess whether to propose new legislation to strengthen the role of national equality bodies by 2022.		The <a href="#">CWP 2022</a> announces a legislative proposal to strengthen the role and independence of equality bodies for Q3 2022.	
13)	31. Calls on the Commission and the Member States to provide sustainable funding for capacity-building of representative organisations of PwD recognising their important role in tackling discrimination against PwD;	The Commission has been financially supporting organisations that work for the inclusion and the rights of persons with disabilities (paragraph 31) through the Employment and Social Innovation Programme and the Rights, Equality and Citizenship Programme in the 2014-2020 programming period. Through multi-annual cooperation mechanisms, these programmes have been supporting nine EU-level networks of NGOs (non-governmental organisations) whose statutory aim is to promote and protect the rights of persons with disabilities. These 4-year Framework Partnership Agreements (2018-2021) allow the networks to benefit from operating grants amounting to approximately a total of EUR 4 million per year. This support will be		The European Commission launched new calls for proposals under Citizens, Equality, Rights and Values Programme (CERV) setting up 4-year Framework Partnership Agreements for the period 2022-2025.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>continued under the new Multiannual Financial Framework 2021-2027, via new Framework Partnership Agreements for the period 2022-2025. The objective is to promote, protect and monitor the rights of persons with disabilities, to ensure full participation in society and the economy on equal basis with others. This partnership strengthens the capacity of these NGO networks and is of key importance to develop and implement evidence-based and impactful policy-making. This support contributes to implementing the UN Convention on the Rights of Persons with Disabilities and promotes the involvement of the national member organisations in the implementation.</p>		<p>The submission deadline ended on 28 September 2021.</p>	
14)	<p>32. Calls on the Commission and the Member States to harmonise the definition of disability and to ensure mutual recognition of disability status across Member States so as to ensure the free movement of PwD and the enjoyment of their EU citizenship rights; To this end, calls on the Commission and the Member States to conduct a study of the existing legislation and collect best practices from the Member States; acknowledges that free movement is a fundamental right in the EU; Calls on the Commission and the Member States, therefore, to extend the usage of the EU disability card to all the Member States and to widen its scope, through it allowing for the recognition of disability status and access to services throughout the EU, thereby making it easier for persons with disabilities to live and work abroad; Calls on the Commission to set up a central information point in national sign languages and in accessible formats for PwD about the services available for PwD in the different Member States</p>	<p>On a common definition of disability and mutual recognition of disability status across Member States (paragraph 32), as envisaged in the Strategy for the rights of persons with disabilities 2021-2030, the Commission will propose creating a European Disability Card by end of 2023 with a view to be recognised in all the Member States. It will build on the experience of the ongoing EU Disability Card pilot project in eight Member States and upon the European parking card for persons with disabilities. The study assessing the implementation of the pilot action on the EU Disability Card and associated benefits should be published in 2021. Moreover, the Commission will undertake a feasibility study for the new initiative on a European disability card that will provide also analysis of the legal environment. In addition, the Commission will work with the Member States to expand the scope of the mutual recognition of disability status, that is under the competence of the Member States, in areas such as labour mobility and benefits related to conditions of service provision.</p>		<p>Commission will propose creating a European Disability Card by end-2023.</p> <p>A <a href="#">study</a> assessing the implementation of the pilot action on the EU Disability Card was published in July 2021.</p>

15)	33. Calls on the Commission and the Member States to recognise and promote user-led personal assistance in line with General Comment No 5 of the UNCRPD Committee, to foster independent living and inclusion in the labour market; Recalls that owing to the special nature of personal assistance, free movement provisions need to be adapted to the needs of PwD; Calls for EU action to address personal assistance, especially concerning free movement of PwD and their personal assistants;	On the promotion of user-led personal assistance (paragraph 33), the Commission recognises the importance of personal assistance for independent living. Under the Strategy for the rights of persons with disabilities 2021-2030, the Commission will by 2023 issue guidance recommending to Member States improvements on independent living and inclusion in the community, in order to enable persons with disabilities to live in accessible, supported housing in the community, or to continue living at home (including personal assistance schemes).		The Commission will by 2023 issue guidance recommending to Member States improvements on independent living and inclusion in the community.	
16)	34. [...] Calls on the Commission to ensure, in line with the UNCRPD, full and effective accessibility of information and communication technologies and systems on an equal basis and apply, in this context, guidelines supporting AI developers to take into account the needs of PwD through the development processes, avoiding the creation of new discriminatory biases; Calls on the Commission and the Member States to support research programmes focused on the development of assistive technologies including robotics, digital technologies and artificial intelligence with the aim of enabling the full integration of PwD in all aspects of life; Calls on the Member States to ensure that PwD have access to affordable digital tools and software which are tailor-made to their needs and to build on the expertise of organisations representing PwD in defining the most suitable digital tools or software for the individual needs of the PwD;	The accessibility of new technologies including Artificial Intelligence (AI) developments (paragraph 34) is addressed through legislation like the European Accessibility Act Directive 2019/882 and through European standards such as EN 301549. The Horizon Europe programme offers opportunities for research in the area of assistive technologies including robotics, digital technologies and artificial intelligence.		No further/specific actions proposed/promised to be taken by the Commission.	
17)	35. Welcomes the Commission's public consultation on its post-2020 EU Disability Strategy; Calls on the Commission to place special emphasis in the Strategy on employment, as well as to cover all the	On the relation between the Strategy for the rights of persons with disabilities 2021-2030 and the UNCRPD (paragraph 35), the Strategy covers all the provisions of the UNCRPD and pays significant attention to		The <a href="#">EU Disability Strategy 2021-2030</a> was published in March 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>provisions of the UNCRPD, to set clear, measurable and ambitious targets relating to workplace diversity reflecting the heterogeneity of PwD, to address multiple and intersectional discrimination, and to monitor the efficiency of the strategy with the involvement of PwD and their representative organisations; Stresses that collaboration with authorities, social partners, organisations and civil society at European, national and local levels is indispensable to ensure the implementation of the Strategy and the UNCRPD; Calls on the Commission to propose measures to tackle the COVID-19-related challenges and rights violations of PwD; Stresses that disability discrimination has worsened during the COVID-19 pandemic, endangering the lives of PwD and threatening their physical and mental health; calls on the Commission to link the future Disability Strategy to the European Semester process;</p>	<p>employment. It announces a package to improve labour market outcomes of persons with disabilities, seeking cooperation with the European Network of Public Employment Services, social partners and organisations of persons with disabilities. It also pays attention to proper monitoring. The Commission will set up a framework to monitor the implementation of the Strategy, which will also provide input for the European Semester; and a new monitoring dashboard will present progress made in implementing the activities at EU level under this Strategy as well as those in which the Commission calls on Member States for action. The Commission intends to publish in 2024 a mid-term report of this Strategy, assessing the progress of its implementation and, if deemed necessary, updating its objectives and actions.</p>		<p>It announces a package to improve labour market outcomes of persons with disabilities as 'flagship initiative' for 2022 that seeks cooperation with the European Network of Public Employment Services, social partners and organisations of persons with disabilities. (p.14)</p> <p>The Commission envisages a mid-term report on the Disability Strategy by 2024.</p>	
18)	<p>38. Calls on the Commission and the Member States to mainstream the rights of PwD, taking into consideration the specific situation of those subject to multiple discrimination, in all employment-related proposals, including the ones concerning the expected transformations in the future of work, as well as when designing and implementing actions aimed at developing digital and green skills;</p>	<p>On mainstreaming the rights of people with disabilities (paragraphs 38 and 39), apart from the employment measures proposed in the Strategy for the Rights of Persons with Disabilities 2021-2030, the Commission will make efforts to mainstream disability into the general employment policies and measures. In addition, the Commission considers that mainstreaming of disability in EU policies, legislative initiatives and financing programmes is essential for ensuring rights of persons with disabilities and their equal access to employment. Moreover, the Commission acknowledges the need to address intersectionality in all its equality strategies. Equality mainstreaming is one of the tasks of the Task Force on Equality composed of representatives from all Commission's Directorates-General and the European External Action Service. The Commission will reinforce the</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) has been carried out.</p> <p>Task Force on Equality was created in 2020, see Commission <a href="#">press release</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Better Regulation toolbox to enhance disability-inclusiveness and ensure UNCRPD consistency. It will ensure the coherent inclusion and assessment of disability matters in impact assessments and evaluations where relevant, including through training of staff. Other EU institutions and agencies are also encouraged to promote disability mainstreaming in both, policy development and human resources in line with the UNCRPD. The Commission will also call on all EU institutions and bodies, agencies and delegations to designate disability coordinators for their institutions and disability strategies. The Commission will step up cooperation of EU institutions and Member States on disability mainstreaming as underlined by the Strategy for the Rights of Persons with Disabilities 2021-2030.</p>		<p>The Commission published the updated <a href="#">Better Regulation Toolbox</a> on 5 November 2021. Tool #29 addresses impacts on fundamental rights, incl. the promotion of equality. This tool includes a comprehensive checklist on ensuring non-discrimination and promoting equality. Moreover, disability is considered in other impact tools (e.g. employment, education, public health).</p> <p>The <a href="#">EU Disability Strategy 2021-2030</a> was published in March 2021.</p>	
19)	<p>39. Calls on the Commission, in particular the Equality Task Force, and the Member States to systematically mainstream the rights of PwD, with special attention to those subject to intersectional discrimination, in all the relevant laws, policies and programmes, since equality in employment is indivisible from equal access to education, health, housing, justice and social protection, and to expand the focus on accessibility to make progress towards an accessible built environment, public spaces, transport, and information and communication technologies, etc.; Stresses in this regard the need to appoint a disability focal point in all EU institutions, including in all Commission DGs and EU Agencies, in addition to establishing an interinstitutional coordination mechanism in order to ensure disability mainstreaming in all EU legislation;</p>	<p>On mainstreaming the rights of people with disabilities (paragraphs 38 and 39), apart from the employment measures proposed in the Strategy for the Rights of Persons with Disabilities 2021-2030, the Commission will make efforts to mainstream disability into the general employment policies and measures. In addition, the Commission considers that mainstreaming of disability in EU policies, legislative initiatives and financing programmes is essential for ensuring rights of persons with disabilities and their equal access to employment. Moreover, the Commission acknowledges the need to address intersectionality in all its equality strategies. Equality mainstreaming is one of the tasks of the Task Force on Equality composed of representatives from all Commission's Directorates-General and the European External Action Service. The Commission will reinforce the Better Regulation toolbox to enhance disability-inclusiveness and ensure UNCRPD consistency. It will ensure the coherent inclusion and assessment of disability matters in impact assessments and evaluations</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) has been carried out.</p> <p>Task Force on Equality created, see Commission <a href="#">press release</a>.</p> <p>The Commission published the updated <a href="#">Better Regulation Toolbox</a> on 5 November 2021. Tool #29 addresses impacts on fundamental rights, incl. the promotion of equality. This tool includes a</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>where relevant, including through training of staff. Other EU institutions and agencies are also encouraged to promote disability mainstreaming in both, policy development and human resources in line with the UNCRPD. The Commission will also call on all EU institutions and bodies, agencies and delegations to designate disability coordinators for their institutions and disability strategies. The Commission will step up cooperation of EU institutions and Member States on disability mainstreaming as underlined by the Strategy for the Rights of Persons with Disabilities 2021-2030.</p>		<p>comprehensive checklist on ensuring non-discrimination and promoting equality. Moreover, disability is considered in other impact tools (e.g. employment, education, public health).</p> <p><a href="#">EU Disability Strategy 2021-2030</a> published in March 2021.</p>	
20)	<p>47. Calls on the Commission to guarantee that EU funds will respect EU and international human rights standards and conventions such as the UNCRPD and will not support any measures and programmes that contribute to segregation or to social exclusion; Furthermore, calls on the Commission to fund actions creating accessible environments, products, services, practices and devices, fostering deinstitutionalisation and supporting personal assistance, and to guarantee that EU-funded actions reach PwD and ensure their active involvement in society;</p>	<p>On guaranteeing that EU funds respect EU and international human rights standards and conventions (paragraph 47), the Commission will support Member States to use EU Funds in compliance with the UNCRPD and respecting accessibility, ensuring that EU funds do not support actions that contribute to segregation or exclusion. The rules for the effective and efficient use of EU funds covered by the Common Provision Regulation for 2021-2027 require Member States to meet so-called horizontal 'enabling conditions'. These aim to ensure that the necessary conditions are in place for the effective application and implementation of the EU Charter of Fundamental Rights and UNCRPD. There are also thematic conditions requiring national or regional strategic policy frameworks and measures to prevent and combat segregation in all fields, to ensure social inclusion and poverty reduction and to promote the shift from institutional to family- and community-based care. The partnership with all relevant stakeholders remains a key principle to follow in the design and implementation of cohesion policy programmes. Stakeholders including at regional and local level, fundamental rights bodies and non-governmental organisations promoting the rights of persons with disabilities should be involved in the design</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and implementation of the programmes and as part of the monitoring committees. The Common Provisions Regulation also requires that accessibility for persons with disabilities be taken into account throughout the preparation and implementation of Member States' operational programmes.</p> <p>The Commission will support national, regional and local authorities in their efforts for deinstitutionalisation and independent living, including through the 2021-2027 shared management funds, the Renovation Wave, the Renovation Component of the Recovery and Resilience Plans, and the Technical Support Instrument.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was be carried out.</p>	

## 4.1.13.7.EMPL Resolution 7: EP resolution of 10 March 2021 on European Semester: employment and social aspects in the Annual Sustainable Growth Strategy 2021

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C	
European Semester: employment and social aspects in the Annual Sustainable Growth Strategy 2021	10/03/2021 <a href="#">T9-084/2021</a> <a href="#">2020/2244(INI)</a> EMPL	<a href="#">SP(2021)26</a> <a href="#">1</a>	Final reply (SP) received 12 July 2021	Mixed reply			
1)	1. Recalls that the Commission outlined, in the ASGS 2020 and the European Semester Spring and Summer Package 2020, that the European Semester should help to achieve the implementation of the European Green Deal, the EPSR and the UN SDGs;	In its Communication on the 2020 Annual Sustainable Growth Strategy (ASGS), the Commission rooted Europe's new growth strategy in <i>the aim of achieving competitive sustainability</i> , resting on four dimensions: environmental sustainability, productivity, social fairness and macroeconomic stability. The priorities identified in the 2020 ASGS are fully <i>in line with the relevant Articles TEU and TFEU</i> ; they remain at the heart of the European Semester and will continue to steer the implementation of the Recovery and Resilience Facility (RRF). The 2021 ASGS confirms competitive sustainability as a priority in the current context and highlights how it is strictly related to economic and social resilience. Resilience needs to be understood in a wider sense, covering all policy areas and ensuring the ability to undergo transitions in a sustainable, fair and democratic manner <sup>159</sup> .  The 2021 ASGS also calls on the Member States to adopt, in light of <i>the European Pillar of Social Rights</i> , measures to ensure equal opportunities, inclusive education, fair working conditions and adequate social protection. Delivering on the European Pillar of Social Rights is a shared political commitment and			No further/specific actions proposed/promised to be taken by the Commission.		

<sup>159</sup> The 2020 Strategic Foresight Report outlined how to strengthen the EU's resilience in four interrelated dimensions: social and economic, geopolitical, green, and digital.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>responsibility of the EU institutions, national, regional and local authorities, social partners and civil society, all of which have a role to play in line with their competences. The European Pillar of Social Rights Action Plan recalls this commitment and sets out the way forward, which should be confirmed at the highest political level during the Social Summit in Porto on 7-8 May 2021.</p> <p>The <i>European Semester</i>, which has been temporarily adapted to ensure consistent and effective implementation of <i>the Recovery and Resilience Facility</i>, provides a well-established framework to guide the Union and the Member States through the challenges of the recovery and twin transition, fully integrating the European Green Deal, the European Pillar of Social Rights, and the UN Sustainable Development Goals. The Employment Guidelines (revised in October 2020 to take into account the need for promoting fair digital and green transitions and to address the employment and social impact of the COVID-19 crisis) provide guidance to Member States to achieve socially balanced structural reforms that support an inclusive recovery, long-term growth and the twin transition. The 2021 Joint Employment Report highlights a number of priority areas in this respect.</p>			
2)	<p>2. [...] Urges the Commission to ensure that all of the Member States' socio-economic, macro-economic and fiscal policies contribute to and are fully consistent with the objectives and targets of the EPSR, the European Green Deal and the UN SDGs and that social and environmental targets and objectives are introduced in the framework of the multilateral surveillance procedure referred to in Article 121 of the Treaty on the Functioning of the European Union</p>	<p>[...]</p> <p>The Commission is exploring the possibility of developing a <i>Sustainable Development Goals (SDG) expenditure</i> tracking methodology for the EU budget (paragraph 2). The methodology should capture the transversal nature of the SDGs and the simultaneous contribution of programmes to different SDGs, in the light of interlinkages and co-benefits. This would</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) will be carried out.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>(TFEU), as well as in the context of a reinforced macro-economic imbalance procedure; [...] Calls on the Commission to develop without delay a UN SDG expenditure tracking methodology for the EU budget that can also be used to assess national recovery and resilience plan (NRRP) investments</p>	<p>ensure a holistic approach in addressing sustainable development.</p>			
3)	<p>4. [...] Calls on the Commission and the Member States to reform the financial legal framework and the European Semester process in order to strengthen democratic accountability and the involvement of the European Parliament, to strengthen the role and participation of EU and national social partners, and to protect social progress objectives relating to social welfare systems and quality employment in future adjustment programmes and in the European Green Deal framework;</p>	<p>As regards the need to <i>reform the financial legal framework and governance</i> (paragraph 4), one year ago, the Commission launched a public debate on EU economic governance, together with the publication of a review of the framework<sup>160</sup>. In light of the COVID-19 crisis and the need to focus on the immediate policy response and to develop a recovery strategy centred on the Recovery and Resilience Facility, that debate has been put on hold. The Commission intends to relaunch it when the recovery takes hold.</p> <p>In the meantime, the pandemic has significantly changed the context of the public debate, with higher public and private debt levels and higher public deficits, significant output and employment losses, increased investment needs, while at the same time new policy tools have been introduced at EU level. The general escape clause under the Stability and Growth Pact was activated for the first time. The Commission considers<sup>161</sup> that preliminary indications would currently suggest to continue applying the</p>		<p>Citizens, organisations and public authorities were invited to submit their contributions on the <a href="#">economic governance review</a> until 31 December 2021.</p> <p>The Commission aims to provide orientations on possible changes to the economic governance framework with the objective of achieving a broad-based consensus on the way forward well in time for 2023.</p>	

<sup>160</sup> The Communication on the economic governance review and the accompanying staff working documents can be found here: [https://ec.europa.eu/info/business-economy-euro/economic-and-fiscal-policy-coordination/eu-economic-governance-monitoring-prevention-correction/economic-governance-review\\_en](https://ec.europa.eu/info/business-economy-euro/economic-and-fiscal-policy-coordination/eu-economic-governance-monitoring-prevention-correction/economic-governance-review_en).

<sup>161</sup> As explained in the Commission Communication “One year since the outbreak of COVID-19: fiscal policy response” of 3 March 2021.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>general escape clause in 2022 and to de-activate it as of 2023. The crisis has highlighted the relevance of many of the challenges that the Commission intended to discuss and address in the public debate. Relaunching the public consultation on the economic governance framework will allow the Commission to reflect on these challenges and draw lessons.</p>			
4)	<p>6. [...] Calls on the Commission to carefully assess the dimensions of the Annual Sustainable Growth Survey to ensure they are fully in line with Article 3 TEU, which establishes sustainable development as the objective the EU has to work toward, based on balanced economic growth and price stability, a highly competitive social market economy, aiming at full employment and social progress, a high level of protection and improvement of the quality of the environment; Calls on the Commission and the Member States to focus, together with the European Parliament, on addressing these challenges through EU eco-social policies combining shared economic prosperity, social progress and sustainable development;</p>	<p>In its Communication on the 2020 Annual Sustainable Growth Strategy (ASGS), the Commission rooted Europe's new growth strategy in <i>the aim of achieving competitive sustainability</i>, resting on four dimensions: environmental sustainability, productivity, social fairness and macroeconomic stability. The priorities identified in the 2020 ASGS are fully <i>in line with the relevant Articles TEU and TFEU</i>; they remain at the heart of the European Semester and will continue to steer the implementation of the Recovery and Resilience Facility (RRF). The 2021 ASGS confirms competitive sustainability as a priority in the current context and highlights how it is strictly related to economic and social resilience. Resilience needs to be understood in a wider sense, covering all policy areas and ensuring the ability to undergo transitions in a sustainable, fair and democratic manner<sup>162</sup>.</p> <p>[...]</p> <p>The 2021 ASGS also calls on the Member States to adopt, in light of <i>the European Pillar of Social Rights</i>, measures to ensure equal opportunities, inclusive education, fair working conditions and adequate social protection. 	<p>investment in access and opportunities for children and young people related to education, health, nutrition, jobs and housing, in line with the objectives of the Child Guarantee and Youth Guarantee; Calls on the Commission to work with the European Parliament, social partners and civil society, in the context of the recovery and resilience dialogue, to define these indicators, in accordance with those established by the European Parliament resolution on a strong social Europe for just transitions, in order to assess the investments in and reforms of the NRRPs, as well as the proposed measures to ensure progress towards these goals;</p>	<p>With regard to <i>monitoring social progress</i> (paragraphs 8, 10 and 29) the European Pillar of Social Rights and the insights from the Social Scoreboard will guide this work.</p> <p>As part of the European Pillar of Social Rights Action Plan adopted on 4 March 2021, the Commission has proposed three EU headline targets on employment, adult learning and poverty reduction that are also meant to drive renewed policy impetus on these dimensions in the context of European Semester. The Action Plan has also put forward a revision of the Social Scoreboard, with new headline and secondary indicators envisaged, with the aim of better monitoring the progress of the policy actions set out in the plan against the Pillar principles. The Social Scoreboard feeds into the European Semester process. The monitoring of the employment and social dimensions in the Semester is further supported by the Joint Assessment Framework (JAF), the Employment Performance Monitor (EPM) and the Social Protection Performance Monitor (SPPM).</p>		<p>regulation, this somewhat contradicts the EP call to work with EP and other stakeholders.</p> <p>Regarding monitoring of social progress: no further/specific actions proposed/promised to be taken by the Commission.</p>	
6)	<p>10. Calls on the Commission to include the social indicators from the Social Scoreboard of the European Semester, in particular those related to decent work, social justice and equal opportunities, robust social welfare systems and fair mobility, in the common</p>	<p>With regard to <i>monitoring social progress</i> (paragraphs 8, 10 and 29) the European Pillar of Social Rights and the insights from the Social Scoreboard will guide this work.</p>		<p>On 2 December 2021, the <a href="#">Commission delegated regulation</a> setting out common indicators for and elements of the performance reporting system (Recovery and Resilience Scoreboard) entered into force. Moreover, on the same date, the <a href="#">Commission</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>indicators to be used in the RRF for reporting on progress and monitoring and evaluating the plans, as well as in the methodology for reporting on social investment, including for the Child Guarantee and Youth Guarantee; Stresses that the European Parliament will closely analyse the delegated act that the Commission will present on this matter, in order to establish if the social indicators, scoreboard and social methodology comply with the objectives, and to verify that there are no objections to be made;</p>	<p>As part of the European Pillar of Social Rights Action Plan adopted on 4 March 2021, the Commission has proposed three EU headline targets on employment, adult learning and poverty reduction that are also meant to drive renewed policy impetus on these dimensions in the context of European Semester. The Action Plan has also put forward a revision of the Social Scoreboard, with new headline and secondary indicators envisaged, with the aim of better monitoring the progress of the policy actions set out in the plan against the Pillar principles. The Social Scoreboard feeds into the European Semester process. The monitoring of the employment and social dimensions in the Semester is further supported by the Joint Assessment Framework (JAF), the Employment Performance Monitor (EPM) and the Social Protection Performance Monitor (SPPM). [...] The Commission has constantly advocated for <i>free and fair mobility</i>. This motivated the legislative proposals put forward by the Commission and adopted by the co-legislators in the past years (e.g. EURES Regulation, posting of workers Directive, establishment of the European Labour Authority) and revision of the Social Security Coordination Regulations (still under discussion). Furthermore, in the context of the COVID-19 pandemic, the Commission has issued several guidelines to support different categories of mobile workers.</p>		<p><a href="#">delegated regulation</a> defining a methodology for reporting social expenditure.</p> <p>On free and fair mobility: no further/specific actions proposed/promised to be taken by the Commission.</p>	
7)	<p>12. Calls on the Commission and the Member States, in their recovery measures, to address the needs of children and take measures to ensure equitable access for all children to early years support, education on</p>	<p>When it comes to <i>addressing the needs of children</i> (paragraph 12) the proposal for a Council Recommendation establishing the European Child Guarantee, adopted by the Commission on</p>		<p>It should be noted that under the <a href="#">European Pillar of Social Rights Action Plan</a>, published in March 2021, the Commission announced several initiatives, including an EU Strategy on the Rights of the Child and Council</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>new technologies, skills and the ethical and safe use of digital tools, and opportunities for social, mental, cultural and physical wellbeing; Calls on the Commission to propose an ambitious anti-poverty strategy and allocate a larger budget to the Child Guarantee; Calls on the Commission to ensure that the upcoming Child Guarantee guarantees equal access for children to free healthcare, free education, free childcare, decent housing and adequate nutrition;</p>	<p>24 March 2021, aims to combat poverty and prevent social exclusion of children. This can be done by guaranteeing that children in need have effective access to essential services across all regions including rural and remote areas. Effectiveness of access should be understood as: (i) service availability and affordability; (ii) timeliness of provision; and (iii) potential users' awareness of the services' existence and of their entitlements.</p> <p>However, even guaranteeing effectiveness of access may not be enough for the most vulnerable. Affordability is a relative concept and for many families living in poverty even moderate fees can be a barrier. Therefore, the proposal recommends making access to certain services effective and free of charge for the children in need – these cover early childhood education and care; education and school-based activities; healthy meal at school; and healthcare. The selection of services to be provided free of charge follows the calls from the European Parliament, and other stakeholders.</p> <p>Families and individuals with a low or middle income are at a higher risk when unemployment increases, which has a direct impact on the wellbeing of children. In this context, actions undertaken to support short-time work, including through the EU instrument for temporary Support to mitigate Unemployment Risks in an Emergency (SURE), and limit the rise in EU unemployment have played an important role also to protect children.</p> <p>The Commission is also committed to update by 2022, the Better Internet for Children (BIK) Strategy as announced in the Strategy for the Rights of the Child</p>		<p>Recommendation establishing the European Child Guarantee (to ensure that children at risk of poverty and social exclusion have effective access to key services such as healthcare and education). In line with these commitments, the Commission adopted an <a href="#">EU Strategy on the Rights of the Child</a> in March 2021. Based on a proposal from the Commission, a <a href="#">European Child Guarantee</a> adopted by Council in June 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Strategy adopted on 24 March 2021 (COM (2021) 142 final).			
8)	14. [...] Calls on the Commission and the Member States to ensure sustainable investment and to support SMEs and their employees in the transition to a more digital and greener economy and the resumption of economic activity, and to give adequate consideration to SMEs by analysing the possible effects of fiscal consolidation policies on them, as SMEs are one of the main engines of the EU economy and vital for sustainable growth;	Support for <i>investment and capacity building for SMEs</i> to master the triple transition towards sustainability, digitalisation and resilience is essential, especially in light of the COVID-19 crisis, which has hit SMEs particularly hard. As regards support to SMEs (paragraph 14), the SME Strategy adopted in March 2020 sets out several actions to address these priorities. The ongoing update of the industrial strategy will be closely linked to and complement the SME strategy, thus enabling SMEs to fully grasp the opportunities of the recovery efforts and ensure their involvement in all envisaged actions. Moreover, the Action Plan on the Social Economy will address access to finance of social economy organisations, which are particularly well placed to ensure that the twin transition takes place in a fair manner. It is imperative that financial support through the Recovery and Resilience Facility and the SME strategy go hand in hand. The Commission encourages Member States to target SMEs in their national reform plans to address SME priorities where relevant challenges exist. This is also reflected in the Commission Recommendation on Effective Active Support to Employment following the COVID-19 crisis (EASE) which puts forward guidance to foster job creation and ease job-to-job transitions based on a package of effective active labour market policies, skilling, reskilling and upskilling measures as well as targeted hiring incentives, The EASE Recommendation invites Member States, <i>inter alia</i> , to provide start-up grants, loans and equity to promote entrepreneurship, as well as to support apprenticeships especially in SMEs.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (support SMEs and their employees in the transition to a more digital and greener economy and give adequate consideration to SMEs by analysing the possible effects of fiscal consolidation policies on them) as according to the Commission, it has been already working on action falling under the scope of the EP request (2020 <a href="#">SME Strategy</a> , <a href="#">updated Industrial Strategy</a> , adopted in May 2021, <a href="#">Social Economy Action Plan</a> , adopted in December 2021, 2021 <a href="#">Recommendation on Effective Active Support to Employment following the COVID-19 crisis (EASE)</a> and 2021 <a href="#">Digital Compass</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The Commission Communication on ‘2030 Digital Compass: the European way for the Digital Decade’ emphasises the central role of SMEs as a critical source of innovation, indicating that, for example, with the support of over 200 Digital Innovation Hubs and industrial clusters, SMEs should have by 2030 the opportunity to access digital technologies easily and on fair terms.</p>			
9)	<p>15. [...] Calls on the Commission and the Member States, in the context of the Recovery and Resilience Dialogue and the interinstitutional agreement on better law-making, to work together with the European Parliament in order to propose the necessary economic governance changes that will ensure social progress and protect the most vulnerable from bearing the consequences of any potential future adjustment programmes;</p>	<p>Moreover, as set out in the European Pillar of Social Rights Action Plan, the Commission will present in 2022 guidance to enhance the Member States’ use of ex-ante distributional impact assessments in their budgeting and planning of reforms. The Commission continues to promote the strengthening of democratic accountability of the EU’s economic governance. The Commission notes that the Regulation establishing the Recovery and Resilience Facility<sup>165</sup> ensures transparency and democratic accountability in the implementation of the Facility by enabling a structured recovery and resilience dialogue with the European Parliament (paragraph 15). [...] Economic governance changes are not among the subjects that the Recovery and Resilience Dialogue is expected to cover based on Article 26(1) of Regulation (EU) 2021/241 on setting up the Recovery and Resilience Facility. It is important to make a distinction between the Recovery and Resilience Facility, which is a cohesion policy instrument, and the Economic Governance Review, which examines the functioning</p>		<p>While the Commission seems to consider that the existing structured recovery and resilience dialogue with the European Parliament is sufficient to guarantee the transparency and democratic legitimacy of the implementation of the RRF, it announces the presentation, in 2022, of guidance to enhance the Member States’ use of ex-ante distributional impact assessments in their budgeting and planning of reforms.</p> <p>Re economic governance changes: no further/specific actions proposed/promised to be taken by the Commission (argues that such changes are not among subjects covered by the Recovery and Resilience Dialogue). It should be noted, however, that the Commission intends to evaluate and review the EU economic governance as soon as the COVID-19 crisis comes to a hold (see under point 4).</p>	

<sup>165</sup> Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>of the 6-Pack and 2-Pack regulations (legislative packages to strengthen the Stability and Growth Pact) that refer to economic policy coordination.</p> <p>In relation to paragraph 15, the Commission would like to remind that while the Recovery and Resilience Facility works with milestones and targets, which have to be met by the Member States in terms of reforms and investment, this is not in any way linked to a macroeconomic adjustment programme. The Recovery and Resilience Facility is embedded in the regular surveillance process of the European Semester. In contrast, a macro-economic adjustment programme is governed by Regulation (EU) No. 472/2013 which puts in place a reinforced surveillance process for Member States experiencing or threatened with serious difficulties with respect to their financial stability or to the sustainability of their public finances, leading to potential adverse spill-over effects on other Member States in the euro area. It is also important to note that Regulation (EU) No. 472/2013 foresees in Article 7 that the draft macroeconomic adjustment programme prepared by the Member State has to fully observe Article 152 of the Treaty on the Functioning of the European Union and Article 28 of the Charter of Fundamental Rights of the European Union. Moreover, Article 8 of the regulation foresees that a Member State has to seek the views of social partners as well as relevant civil society organisations when preparing its draft macroeconomic adjustment programmes, with a view to contributing to building consensus over its content.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on macroeconomic adjustment programme (not part of Recovery and Resilience Facility).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	18. [...] Calls on the Commission to closely monitor the Member States' progress reports on the implementation of the NRRPs within the European Semester exercise in order to verify to what extent the objectives of the RRF have been met;	<p>The <i>European Semester</i>, which has been temporarily adapted to ensure consistent and effective implementation of <i>the Recovery and Resilience Facility</i>, provides a well-established framework to guide the Union and the Member States through the challenges of the recovery and twin transition, fully integrating the European Green Deal, the European Pillar of Social Rights, and the UN Sustainable Development Goals. The Employment Guidelines (revised in October 2020 to take into account the need for promoting fair digital and green transitions and to address the employment and social impact of the COVID-19 crisis) provide guidance to Member States to achieve socially balanced structural reforms that support an inclusive recovery, long-term growth and the twin transition. The 2021 Joint Employment Report highlights a number of priority areas in this respect.</p> <p>The Commission intends to follow-up on the implementation of reforms and investments in the framework of the national recovery and resilience plans in line with the provisions of the regulation. Upon completion of the relevant agreed milestones and targets indicated in the recovery and resilience plan, the Member State concerned shall submit to the Commission a duly justified request for payment of the financial contribution and, where relevant, of the loan. Such requests for payment may be submitted by the Member States to the Commission twice a year. The Commission shall assess at the latest within two months of receiving the request whether the relevant milestones and targets have been satisfactorily fulfilled. If this is not the case, the payment of all or part of the financial contribution and, where applicable, of the loan shall be suspended. The suspension shall only be lifted where the Member</p>		The general nature of the commitment's wording makes it unclear to what extent the action(s) will be carried out.

		State concerned has taken the necessary measures to ensure a satisfactory fulfilment of the milestones and targets set out in the Council implementing decision.			
11)	19. Stresses that the ASGS 2021 mentions delivering on the EU objective of competitive sustainability, but that this concept is not defined as an objective in the EU Treaties and it is not featured in the UN SDGs; Calls on the Commission, therefore, to deliver on the objectives defined in Article 3 TEU and Articles 8 to 11 TFEU, as well as to be more precise in the definition of resilience, understood to be an ability to not only withstand and cope with challenges, but also to undergo transitions in a sustainable, fair and democratic manner;	<p>The priorities identified in the 2020 ASGS are fully in line with the relevant Articles TEU and TFEU; they remain at the heart of the European Semester and will continue to steer the implementation of the Recovery and Resilience Facility (RRF). The 2021 ASGS confirms competitive sustainability as a priority in the current context and highlights how it is strictly related to economic and social resilience. Resilience needs to be understood in a wider sense, covering all policy areas and ensuring the ability to undergo transitions in a sustainable, fair and democratic manner<sup>166</sup>.</p> <p>The Commission intends to follow-up on the implementation of reforms and investments in the framework of the national recovery and resilience plans in line with the provisions of the regulation. Upon completion of the relevant agreed milestones and targets indicated in the recovery and resilience plan, the Member State concerned shall submit to the Commission a duly justified request for payment of the financial contribution and, where relevant, of the loan. Such requests for payment may be submitted by the Member States to the Commission twice a year. The Commission shall assess at the latest within two months of receiving the request whether the relevant milestones and targets have been satisfactorily fulfilled. If this is not the case, the payment of all or part of the financial contribution and, where applicable, of the loan shall be suspended. The</p>		The general nature of the commitment's wording makes it unclear to what extent the action(s) will be carried out.	

<sup>166</sup> The 2020 Strategic Foresight Report outlined how to strengthen the EU's resilience in four interrelated dimensions: social and economic, geopolitical, green, and digital.

		suspension shall only be lifted where the Member State concerned has taken the necessary measures to ensure a satisfactory fulfilment of the milestones and targets set out in the Council implementing decision.			
12)	22. Calls on the Commission and the Member States to actively tackle the digital divide in access to public services, many of which have been digitalised during the COVID-19 pandemic, by ensuring EU support, including financial support, for social innovation at local level aiming to make public services more easily accessible, including capacity-building and the scaling up of innovative bottom-up initiatives for e-inclusion and data literacy, so as to ensure that everyone in the EU has access to high-quality, accessible and user-friendly services of general interest;	<p>The Commission welcomes the call to ensure that everyone in the EU has <i>access to high-quality, accessible and user-friendly digital public services</i> (paragraph 22).</p> <p>An underlying principle of the eGovernment Action Plan 2016-2020 is 'inclusiveness and accessibility', meaning that public administrations should design digital public services that are inclusive by default and cater for different needs such as those of the elderly and people with disabilities. The Member States and EFTA (<i>European Free Trade Association</i>) States have also committed themselves to this principle in the Tallinn Declaration on eGovernment. The 2020 Berlin Declaration on Digital Society and Value-based Digital Government further emphasises the importance of inclusiveness, with one of its principles addressing 'social participation and digital inclusion to shape the digital world'.</p> <p>In the Action Plan on Integration and Inclusion 2021-2027, the Commission agreed to 'work on an inclusive EU e-government action plan that promotes human-centric digital public services for citizens'. The Member States are encouraged to 'ensure digital public services are inclusive by design, easily accessible and adapted to a diverse population'.</p> <p>In its Communication on '2030 Digital Compass: the European way for the Digital Decade' (COM(2021) 118 final), the Commission identified digitalisation of public services as one of the four 'cardinal points', as part of a 'Digital Compass' to translate the EU's digital</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point (tackle the digital divide in access to public services) as the Commission seems to consider that it has been already working on action falling under the scope of the EP request (eGovernment Action Plan 2016-2020, Action Plan on Integration and Inclusion 2021-2027, Digital Compass, RRF, Decision No 573/2014/EU on enhanced cooperation between Public Employment Services, ESF+).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>ambitions for 2030 into concrete targets and to ensure that these objectives are met. By 2030, the EU's objective is to ensure that democratic life and public services online will be fully accessible for everyone, including persons with disabilities, and benefit from a best-in-class digital environment providing for easy-to-use, efficient and personalised services and tools with high security and privacy standards. The Communication sets the target that by 2030 there will be 100% online provision of key public services available for European citizens and businesses.</p> <p>The Recovery and Resilience Facility (RRF) will make available EUR 672.5 billion for reforms and investments to mitigate the impact of the pandemic, help Member States embrace opportunities of the green and digital transitions and address the challenges identified in the country-specific recommendations in the context of the European Semester. Under the 'Modernise' Flagship, the Member States can set aside budget for digitalisation of public administrations, including investments that aim to improve the inclusiveness of digital public services. A minimum of 20% of expenditure contained in each national plan should support the digital transition.</p> <p>With a view to Public Employment Services (PES), Decision 573/2014/EU states that the European PES Network shall contribute to the modernisation and strengthening of the PES, having in mind challenges related to digitalisation. The Network shares knowledge and learning among PES on how to improve services through the use of digital tools and artificial intelligence, for example to ensure high quality labour market information and matching of jobseekers and jobs. The Network has studied how</p>

		<p>needs of groups such as those with limited digital skills, and limited access to internet, or those with certain disabilities can be assured.</p> <p>The European Social Fund Plus (ESF+) will continue to support the spurring of social innovations that respond to topical social issues, including access to services. This will be supported both through actions in Member States (shared management) as well as through EU-level projects via the Employment and Social Innovation (EaSI) strand (direct or indirect management).</p>			
13)	<p>27. Calls on the Commission and the Council to do their utmost to fight tax evasion and tax avoidance and effectively counter harmful tax practices adopted by some Member States;</p>	<p>As regards the <i>fight against tax evasion and tax avoidance</i> (paragraph 27), the Commission has pushed a number of important legislations (Anti-Tax Avoidance Directives and amendments to the Directive on Administrative Cooperation) to increase transparency and fight tax abuse and money laundering practices. Against the backdrop of the COVID-19 pandemic, the Commission also adopted a Recommendation on making state financial support to undertakings in the EU conditional on the absence of links to non-cooperative jurisdictions to ensure that the Member States disallow state financial support to businesses that have links to listed non-cooperative jurisdictions for tax purposes. The Communication on Tax good governance in Europe and beyond, adopted by the Commission on 15 July 2020, proposes to revisit and reform the code of conduct on business taxation and the EU list of non-cooperative jurisdictions. Furthermore, the Commission actively supports the ongoing OECD (Organisation for Economic Co-operation and Development) -led discussions to reform the global corporate tax framework, which would reallocate taxing rights, to better reflect the way of doing business in a</p>		<p>In its reply, the Commission seems to consider that it has been already working on action falling under the scope of the EP request (do utmost to fight tax evasion and tax avoidance and counter harmful tax practices), referring, in particular to the Anti-Tax Avoidance Directives and amendments to the Directive on Administrative Cooperation 2021, Recommendation on making state financial support to undertakings in the EU conditional on the absence of links to non-cooperative jurisdictions, Communication on Tax good governance in Europe and beyond and the <a href="#">FISCALIS programme</a>. As to the announced EU Tax Observatory, the latter was launched in June 2021 (see <a href="#">EU Tax Observatory</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>digitalised and globalised economy, and set a minimum effective tax rate for taxing multinational's profits.</p> <p>In addition, the Commission has analysed the issue under the European Semester leading to dedicated Country-Specific Recommendations to six Member States to address aggressive tax planning. The Recovery and Resilience Facility is also a good framework to address tax evasion, aggressive tax planning and money laundering issues. The Commission will continue to work with the Member States tax administrations to develop methodologies to estimate various tax gaps. This work can be supported financially by the FISCALIS programme. A new instrument to be launched in June 2021, the EU Tax Observatory, thanks to a preparatory action of the European Parliament, will promote high-quality research, create a public repository of data and information, and will be an active voice in the EU and internationally on tax evasion and avoidance issues.</p>			
14)	28. [...] Calls on the Commission to strengthen the implementation of anti-discrimination legislation, policy and practice in order to effectively counter discrimination on all grounds, including antigypsyism, and preserve social, mental, cultural and physical well-being in the recovery measures;	As regards the calls for the Commission to <i>effectively counter discrimination on all grounds</i> (paragraph 28), the Anti-Racism Action Plan 2020-2025, adopted by the Commission on 18 September 2020, sets out a wide series of measures and actions to mainstream the fight against racism into all EU policies, extending, among other things, to child protection, education, youth, digitalization and media. It is important to bear in mind that any discrimination on the grounds of racial or ethnic origin is already prohibited by EU law. The new EU Roma Strategic Framework is the first direct contribution to the implementation of the Action Plan and part of President von der Leyen's commitment to a Union of Equality. This new 10-year plan consists of an ambitious EU Roma Strategic		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Anti-Racism Action Plan 2020-2025, etc).</p> <p>It should be noted that in the CWP 2022 (<a href="#">CWP 2022</a>), the Commission announced a legislative initiative on strengthening the role and independence of equality bodies for Q3 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Framework for Equality, Inclusion and Participation, having already resulted in the Council Recommendation of 12 March 2021 on Roma equality, inclusion and participation (2021/C 93/01). The Recommendation includes a comprehensive list of measures to combat discrimination and anti-gypsyism, advance social inclusion, promote participation of Roma in society and active citizenship, and ensure effective equal access to quality mainstream education, employment, health and housing. The Recommendation establishes close links with the Union funds as well as with the European Semester and the European Pillar of Social Rights. On 19 March 2021, the Commission adopted a Report on the application of the Racial Equality Directive (Directive 2000/43/EC) and the Employment Equality Directive (Directive 2000/78/EC) and a Staff Working Document on Equality bodies and the implementation of the Commission Recommendation on standards for equality bodies (respectively, (COM(2021)139 final and SWD(2021)63 final).</p>			
15)	<p>29. [...] Calls on the Commission and the Member States to develop a sustainable quality employment package, taking into account diverse forms of national practices and the role of social partners and collective bargaining, including legislative initiatives aimed not only at improving wages but also at ensuring decent working conditions for all, with a particular focus on telework, the right to disconnect, work-life balance, mental well-being at work, parental and care-related leave, occupational health and safety, the rights of platform workers, ensuring quality jobs for essential workers, and strengthening democracy at work and the role of the social partners and collective bargaining;</p>	<p>As Europe moves from crisis response to recovery, the European Pillar of Social Rights Action Plan, adopted by the Commission on 4 March 2021, sets out elements of a forward-looking support to quality job creation and employment to build a sustainable path towards the 2030 employment rate target of 78% - cf. the Parliament's <i>call for a quality employment package</i> (paragraph 29). The Commission Recommendation for Effective Active Support to Employment following the COVID-19 crisis (EASE), adopted as well on 4 March 2021, provides guidance on coherent policy packages and corresponding available funding to promote job creation and job-to-job transitions from declining sectors to sectors with higher growth</p>		<p>As to the announced Commission action, the <a href="#">Occupational Safety and Health Strategic Framework 2021-2027</a> was adopted on 28 June 2021. In addition, on 9 December 2021, the Commission presented a package of measures to improve the working conditions of people working through digital labour platforms. The proposed measures include the <a href="#">communication</a> 'Better working conditions for a stronger social Europe: harnessing the full benefits of digitalisation for the future of work' and a <a href="#">proposed Directive</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	[...] Calls on the Commission to include these indicators in the guidelines for assessing social progress under the NRRPs; Points out that labour market reforms undertaken as part of the NRRPs must be in line with the attainment of these objectives;	potential and strategic value in the context of the green and digital transitions. In so doing, it also outlines a strategic approach to gradually transition between emergency measures taken to preserve jobs during the pandemic and new measures needed for a job-rich recovery. The Action Plan confirms an ambitious agenda to advance quality employment, including through a new Industrial Strategy for Europe and an Action Plan on the Social Economy. Following the October 2020 proposal for a directive on adequate minimum wages in the European Union, the Commission continues to pursue steps to strengthen fair working conditions as well as health and safety at work, notably through an initiative on the working conditions of platform workers <sup>167</sup> and a new Occupational Safety and Health Strategic Framework 2021-2027. The Commission will also ensure an appropriate follow-up to the European Parliament Resolution on the right to disconnect.			
16)	33. Calls on the Commission to give priority to the publication of its strategy on the rights of people with disabilities and urges the Member States to keep in mind and work on compensating the disproportionate negative effects that measures adopted in the context of the pandemic have on vulnerable groups;	The European Commission published the “Union of Equality: Strategy for the Rights of Persons with Disabilities” on 3 March 2021. It is available in all EU official languages (except Gaelic) to ensure the best possible dissemination (paragraph 33). The Commission also provides an English easy-to-read online version of the Strategy. The latter will become available in other EU languages later in 2021.		Easy-to-read version of the <a href="#">Strategy on the rights of people with disabilities</a> is available.	
17)	35. [...] Calls on the Commission and the Member States to overcome the barriers and restrictions arising from patents and intellectual property rights in	Regarding <i>production and distribution of vaccines</i> (paragraph 35) the Commission has the objective of ensuring broad and equitable access to COVID-19			

<sup>167</sup> A first phase consultation of social partners under Article 154 TFEU on possible action addressing the challenges related to working conditions in platform work was launched on 24 February 2021.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>order to ensure the widespread production of vaccines and their timely distribution to all countries and to all people;</p>	<p>treatments and vaccines. This is why the EU has organised advance purchase agreements with several companies to ensure sufficient and equitable access to vaccines to all EU Member States. Team Europe is a lead donor to COVAX with EUR 2.2 billion and is heavily involved in COVAX to support the international community in providing vaccines also to the poorest countries. Initial problems of access to vaccines were related to the lack of sufficient manufacturing capacity and shortage of essential components to produce the quantities required as fast as possible. The Commission wishes to promote the important role that public authorities play and to drive the increase of production, and to facilitate access to the vaccines and other treatments that are in need today. The Commission also seeks to promote global collaboration with the pharmaceutical industry, which should facilitate the transfer of the right know-how and technology. In this spirit, the EU has set-up a Task Force for Industrial Scale-up of COVID-19 vaccines to detect and help respond to issues in real-time.</p>		<p>No further:specific actions proposed/promised to be taken by the Commission.</p>	
18)	<p>36. [...] Calls for gender equality to be strengthened through the integration of gender mainstreaming, and for the Commission to accelerate the introduction of an effective, transparent, comprehensive, result-oriented and performance-based methodology for all EU programmes; [...] Calls on the Member States and the Commission to support entrepreneurship among women and facilitate access to financing for them; Calls on the Member States to unblock the negotiations on the Women on Boards Directive in the Council;</p>	<p>In the European Pillar of Social Rights Action Plan, the Commission reaffirms its commitment to a high employment rate. In this context, Europe must strive to at least halve the gender employment gap compared to 2019. This will be paramount to progress on <i>gender equality and achieve the employment target for the entire working-age population</i> (paragraph 36). The Recovery and Resilience Facility provides funding for a gender-responsive recovery. Gender equality and equal opportunities for all, and the mainstreaming of those objectives should be taken into account and promoted throughout the preparation and implementation of recovery and</p>		<p>No further/specific actions proposed/promised to be taken by the Commission as the Commission seems to consider that it has been already working on action falling under the scope of the EP request (strengthen gender equality through the integration of gender mainstreaming and introduce respective methodology for all EU programmes). Although not mentioned in the reply, it should be noted that the Commission delegated regulation defining a methodology for reporting social expenditure under the RRF provides</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		resilience plans. The Member States are expected to set out in their recovery and resilience plans the expected contribution to gender equality and equal opportunities. Moreover, the Commission is constantly reflecting on ways to <i>promote female entrepreneurship</i> and is committed to providing support via different funding lines, as stated in the European Gender Equality Strategy 2020-2025. Several reports in co-operation with the OECD assess relevant policies. These reports include a 2017 Policy Brief on Women's Entrepreneurship <sup>168</sup> , which describes extensively how policy can support women entrepreneurs. Furthermore, the 2020 Communication "Youth Employment Support: a Bridge to Jobs for the Next Generation" indicates that the Commission will support the strengthening of networks for aspiring young entrepreneurs. Particular attention will be paid to young women. In the European Skills Agenda (COM/2020/274 final), the Commission announced that it will leverage and connect existing entrepreneurs networks to provide support for aspiring entrepreneurs, focusing on young women entrepreneurs and self-employment opportunities in the digital and green economy.		that each (national) measure of a social nature that includes a focus on, inter alia, gender equality should be flagged, allowing for a specific reporting on expenditure on gender equality.	
19)	37. Calls on the Commission to expand the country-specific recommendations in the future to include an outcome regarding the involvement of social partners in wage-setting mechanisms and the effectiveness of their involvement;	Since 2016, social dialogue and social partners' involvement in policy design and implementation have become an ever-stronger focus in the European Semester (paragraph 37). A number of country-specific recommendations address directly or indirectly <i>the role of social partners including on wage-setting mechanisms</i> . Progress on these recommendations is monitored by the Commission		No further/specific actions proposed/promised to be taken by the Commission as the Commission seems to consider that it has been already working on action falling under the scope of the EP request (expand country-specific recommendations to include
