	design and implementation of European-Semester-related actions, in particular in the health and social fields, which often fall outside of economic and fiscal considerations;	<p>EU. Over the years, the <i>coverage of social issues was gradually strengthened</i> (paragraph 43). The 20 principles of the European Pillar of Social Rights and the Social Scoreboard are by now firmly embedded in the Semester.</p> <p>To counter the COVID-19 crisis, all the Member States received in 2020 a country-specific recommendation on healthcare. Many Member States were asked to mitigate the employment effects of the crisis (in particular through Active Labour Market Policies) and/or to take measures to strengthen their social protection systems (for example through improving coverage and adequacy of minimum income schemes). While the country-specific recommendations are addressed to the Member States, the Commission is <i>consistently encouraging the involvement of all relevant actors at all levels</i>. For the implementation of reforms and investments in the recovery and resilience plans, the Commission sees regional and local authorities as important partners. Regions and local authorities should be appropriately consulted and involved in the recovery and resilience plans in accordance with the national legal framework.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point (involve all relevant national, regional and local authorities in the design and implementation of European Semester-related actions, in particular in the health and social fields) as according to the Commission, it has been already working on action falling under the scope of the EP request (2020 country-specific recommendation on healthcare, mitigation of employment effects of the crisis and strengthening social protection systems).	
22)	44. [...] Calls on the Commission to propose an EU framework for national homelessness strategies, and further calls on the Member States to adopt the principle of housing first, which helps to substantially reduce the rate of homelessness, prioritising the provision of permanent housing to homeless people, proposing ways to tackle energy poverty, stopping forced evictions and stopping the criminalisation of homelessness;	When it comes to <i>decreasing homelessness and calls for better policies</i> (paragraphs 24 and 44), over the past decade, efforts have been made at EU level to improve the understanding and measurement of homelessness in Europe and to provide common concepts to facilitate transnational exchanges on homelessness. The European Commission, FEANTSA (European Federation of National Organisations Working with the Homeless), and other stakeholders agreed in 2010 on a European Typology of

		<p>level, through its EU Energy Poverty Observatory, which collects data, develops indicators and disseminates best practices for tackling energy poverty.</p> <p>[...]</p> <p>As regards the call to address <i>the problem of energy poverty</i> (paragraph 44), the implementation of the European Green Deal will contribute to alleviate energy poverty and increase the quality of housing, in particular for middle- and low-income households (notably through the Renovation Wave Initiative, the Commission Recommendation on Energy Poverty, the future revision of the Energy Efficiency Directive and the steer and guidance for local action by the EU Energy Poverty Observatory). The implementation of the Renovation Wave Strategy will contribute to the European Bauhaus project that brings together civil society, citizens, architects, urban developers,</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (address energy poverty) as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>designers, environmental and public health experts, investors and planning authorities in the search for the best ideas for high-quality deep renovations, which will help reduce homelessness and improve housing conditions, building on the principles of inclusiveness and sustainability.</p> <p>The imminent priority is to combat the virus and its dire socio-economic effects and secure the recovery, while implementing the new instruments established during the crisis, such as the European instrument for temporary Support to mitigate Unemployment Risks in an Emergency (SURE) and the Recovery and Resilience Facility. As a temporary instrument, SURE provides for an emergency mechanism to preserve jobs and incomes, and mitigate unemployment risks in the context of the COVID-19 pandemic, helping also to preserve productive capacity and human capital for a faster and more inclusive economic recovery<sup>171</sup> As announced in the European Pillar of Social Rights Action Plan, the Commission will evaluate the experience of SURE in the coming years.</p>		<p>On 22 March 2021, the Commission published the <a href="#">first bi-annual report</a> on the implementation of SURE, confirming its success. The <a href="#">2nd bi-annual report</a> was published on 22 September 2021.</p>	
23)	45. Calls on the Commission to present an instrument to mitigate the effects of asymmetric shocks that is effective in the long run, such as an adequate and workable unemployment (re)insurance scheme that would be able to back up national schemes when a part of the EU experiences a temporary economic shock;	<p>Although the reply does not specifically refer to paragraph 45, relevant elements for the EP call (to mitigate the effects of asymmetric shocks that is effective in the long run, such as an unemployment (re)insurance scheme) can be found:</p> <p><i>Preserving employment and promoting the creation of new jobs</i> is a priority for the EU, the more so in light of the socio-economic impact of the coronavirus crisis. The temporary Support to mitigate Unemployment</p>		<p>Although the Commission does not specifically address Parliament's call (to establish a permanent unemployment reinsurance system), it seems for the time being reluctant to come up with such an instrument, considering that the temporary instrument (SURE) is sufficient.</p> <p>In the <a href="#">European Commission's work programme 2020</a>, presented on 29 January 2020, the Commission announced its intention to put forward a proposal for a</p>	

<sup>171</sup> On 22 March 2021, the Commission published the first report on the use of financial assistance under SURE including a preliminary assessment of the impact of SURE. The report is available here: [https://ec.europa.eu/commission/presscorner/detail/en/ip\\_21\\_1209](https://ec.europa.eu/commission/presscorner/detail/en/ip_21_1209).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Risks in an Emergency (SURE) created the opportunity to provide financial assistance, in the form of loans granted on favourable terms from the EU to Member States, to preserve employment, supporting livelihood and keeping business afloat.</p> <p>[...]</p> <p>Families and individuals with a low or middle income are at a higher risk when unemployment increases, which has a direct impact on the wellbeing of children. In this context, actions undertaken to support short-time work, including through the EU instrument for temporary Support to mitigate Unemployment Risks in an Emergency (SURE), and limit the rise in EU unemployment have played an important role also to protect children.</p>		<p>European Unemployment Reinsurance Scheme. The work programme estimated that this would be introduced in the fourth quarter of 2020 (legislative, incl. impact assessment). In the beginning of April 2020, as part of the comprehensive economic response to the coronavirus pandemic, the Commission proposed a <a href="#">temporary Support to mitigate Unemployment Risks in an Emergency</a> (SURE). The SURE instrument is the emergency operationalisation of the EUBRS and is specifically designed to respond immediately to the challenges presented by the coronavirus pandemic. While the SURE instrument as such in no way precludes the establishment of a future permanent EUBRS, Commission has, as of December 2021, not presented any proposal for such a permanent scheme so far. Moreover, no proposal for a permanent EUBRS is foreseen under the <a href="#">European Commission's work programme for 2022</a>, adopted on 19 October 2021. Under the European Pillar of Social Rights Action Plan adopted in March 2021, the Commission only presented a new instrument for job creation and job transition from hard-hit sectors to expanding ones ('Effective Active Support to Employment - <a href="#">EASE</a>').</p>	
24)	<p>47. [...] Calls on the Commission to assess brain drains in certain regions and sectors and propose support measures where needed, as well as to support mobile workers by ensuring freedom of movement of workers, without restrictions, and strengthening the portability of rights and entitlements; Asks the Commission to put forward a proposal for a digital EU social security number;</p>	<p>Regarding "brain drain" (paragraph 47), in relation to the mobility of high skilled workers the Commission covered the topic in a specific chapter of the latest edition of the Intra-EU Labour Mobility Report (2020). The findings confirmed that only a third of EU mobile workers are included in the highly educated category while the medium educated mobile workers represent 40%. Furthermore, in particular mobility of high-skilled persons is associated with the circulation of knowledge and contributes to the EU's objective of the development of the knowledge-based economy.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (assess brain drain and propose support measures where needed) as according to the Commission, it has been already working on action falling under the scope of the EP request (the Intra-EU Labour Mobility Report (2020)).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In this context, the Commission is undertaking work to better understand return mobility and the problems a worker has to overcome when returning to his/ her home country.</p> <p>In the field of Social Security, the Commission will start in 2021 a pilot to explore by 2023 the <i>launching of a digital solution (European Social Security Pass)</i> to facilitate the interaction between mobile citizens and national authorities, and to improve the portability of social security rights across borders, while helping to reduce the risk of errors and fraud. The identification does not require the creation of a new social security number (paragraph 47), as other initiatives addressing the issues of identification and authentication of mobile citizens, such as the initiative for a trusted and secure European e-ID (foreseen for the second quarter of 2021), can be leveraged for this purpose.</p>		<p>As announced in the European Pillar of Social Rights Action Plan in March 2021, the Commission launched, in cooperation with the Italian social security institution Istituto Nazionale della Previdenza Sociale (INPS), a pilot project to explore by 2023 the feasibility of introducing an <a href="#">European social security pass pilot</a>. On 3 June 2021, the Commission presented a framework for <a href="#">trusted and secure Digital Identity for all Europeans</a> (European e-ID).</p>	

## 4.1.13.8. EMPL Resolution 8: EP resolution of 20 May 2021 on impacts of EU rules on the free movements of workers and services: intra-EU labour mobility as a tool to match labour market needs and skills

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Impacts of EU rules on the free movements of workers and services: intra-EU labour mobility as a tool to match labour market needs and skills</b>	20/05/2021 <a href="#">T9-249/2021</a> <a href="#">2020/2007(INI)</a> EMPL	<a href="#">SP(2021)507</a>	Final reply (SP) received 22 September 2021	Mixed reply			
1)	4. Is concerned about the current lack of harmonised interpretation of EU law by Member States, such as the recently revised Posting of Workers Directive <sup>172</sup> , which leads to a lack of legal clarity and to bureaucratic burdens for companies providing services in more than one Member State; calls on the Commission to directly assist Member States during the whole process of transposition so that a uniform interpretation of European law is ensured;	The Commission has supported the Member States in the transposition of the revised Posting of Workers Directive <sup>173</sup> 2018/957/EU (paragraphs 4 and 19) through the Expert Committee on Posting of Workers and its subgroup, whose aim was to assist the Member States in the transposition of the directive by finding common understanding regarding its provisions. The Commission has also published a practical guide on the posting of workers, which aims to ensure that workers are aware of their rights and that the rules are correctly and consistently applied by national authorities and employers throughout the EU.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Expert Committee on Posting of Workers</a> and the <a href="#">practical guide on posting of workers</a> ).	
2)	6. Regrets that only 4,2 % of EU citizens of working age reside in an EU country other than that of their citizenship in 2019 <sup>174</sup> ; Calls on the Commission and	Several instruments are in place to reduce mobility barriers for workers and businesses (paragraph 6), such as the EURES network, the coordination of national security systems, Europass to facilitate the				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

<sup>172</sup> Directive (EU) 2018/957 of the European Parliament and of the Council of 28 June 2018 amending Directive 96/71/EC concerning the posting of workers in the framework of the provision of services (OJ L 173, 9.7.2018, p. 16).

<sup>173</sup> Directive (EU) 2018/957 of the European Parliament and of the Council of 28 June 2018 amending Directive 96/71/EC concerning the posting of workers in the framework of the provision of services (OJ L 173, 9.7.2018, p. 16).

<sup>174</sup> European Commission, 2019 Annual Report on Intra-EU Labour Mobility, January 2020.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Member States to step up their efforts to reduce mobility barriers for workers and businesses;	European-wide recognition of qualifications and skills, and also by setting up the European Labour Authority (ELA). Many of these instruments have been introduced or improved recently.		working on action falling under the scope of the EP request, such as through the <a href="#">EURES network</a> and by setting up the ELA. To note is that the ELA is expected to reach its full operational capacity by 2024.	
3)	10. Calls on the Commission to conduct in-depth research into the trends affecting the working conditions of posted third-country nationals; Emphasises the need for possible policy measures at Union or national level based on the outcome of this research; Is deeply concerned about the current increase in the share of third-country nationals in sectors with a reputation for precarious working conditions and cases of abuse; Underlines that third-country nationals are often more vulnerable to exploitation and therefore need protection; highlights that exploitation includes abusive practices such as bogus posting, bogus self-employment, fraudulent subcontracting and recruiting agencies, letterbox companies and undeclared work; Underlines that third-country national workers can work with work permits in the EU, under the precondition that all safeguards in national and Union labour law effectively ensure protection and decent working conditions for third-country nationals as well, and that this will not result in labour market distortions; Calls on the Commission and the Member States to ensure compliance with applicable laws and rules on employment conditions when dealing with third-country nationals, in order to eliminate abuses; Calls on the Member States to implement the protective provisions in Directive 2009/52/EC, ensuring accessible and effective complaint mechanisms making it possible to effectively claim back wages due and social security contributions;	<p>As regards working conditions of posted third-country nationals (paragraphs 10 and 15), the Commission is launching a study to look into the working conditions of temporary cross border mobile workers and workers in subcontracting chains, mainly in the context of posting of workers. This study shall assess where and why posted workers, including from third countries, suffer from below-standard working conditions.</p> <p>In its new Pact on Migration and Asylum of September 2020, the Commission announced that, by the end of 2021, it would review the Single Permit Directive 2011/98/EU, to look at ways to simplify and clarify the scope of the legislation, including exploring measures to prevent and fight labour exploitation of third-country workers.</p> <p>Posting of third country nationals is one of the focus areas of ELA's inspections task. Several requests for cross-border inspections that ELA received so far concern precisely posting of third country nationals from one Member State to another. ELA will focus on helping to tackle irregularities in this field in the future as well.</p>		<p>The mentioned study on working conditions of temporary cross border mobile workers and workers in subcontracting chains is yet to be published. Studies that have been launched are not systematically, publicly flagged by the Commission. Therefore this point could not be verified but based on the Commission response can be assumed to be in motion.</p> <p>The <a href="#">Commission Work Programme 2021</a> announced the publication of the revised Single Permit Directive in the fourth quarter of 2021, but it has been postponed to April 2022.</p> <p>A recent ELA inspection included a <a href="#">concerted inspection in September 2021 between Belgium and Poland</a> at a chicory farm in Belgium during the EU week</p>

7)	<p>15. Calls on the Commission to examine protection gaps with view to ensuring decent working and living conditions for mobile workers and preventing abusive practices, and to properly enforce Union legislation on subcontracting;</p> <p>Calls on the Commission to ensure general joint and several liability throughout the whole subcontracting chain in order to protect workers' rights; emphasises that such an initiative should increase transparency and strengthen the liability of main contractors in subcontracting chains by legally guaranteeing the payment of all social security contributions and workers' entitlements due, and by urging national authorities to effectively impose dissuasive sanctions whenever necessary;</p> <p>Calls on the Commission to promote, and on the Member States to guarantee, trade union access to all workplaces, including workplaces outside the country of employment;</p> <p>Calls on the Commission and the Member States to take action to strengthen and promote social dialogue</p>	<p>Though the main responsibility for tackling undeclared work lies with national authorities, the EU can encourage them to learn from each other and cooperate, in particular through the European Platform tackling undeclared work created in 2016. The Platform, which addresses both the national and cross-border dimensions of undeclared work, has been re-established under the responsibility of ELA since the end of May 2021. It will continue to foster cooperation between relevant national authorities and social partners. The Platform plays an active role in the campaign on seasonal workers and will contribute to awareness-raising activities addressed to workers and employers. In January 2021, the Platform published a study on "Counteracting undeclared work and labour exploitation of third-country national workers". It provides an assessment of different pathways into as well as routes out of undeclared work and labour exploitations. It also contains some recommendations at operational level for enforcement authorities. A specific platform subgroup on undeclared work related to mobility of third country nationals will meet in the autumn 2021 to explore this issue more thoroughly. The Commission will continue mobilising instruments to monitor undeclared work and support Member</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request, also with regard to the study on <a href="#">"Counteracting undeclared work and labour exploitation of third-country national workers"</a> and <a href="#">the European Platform tackling undeclared work</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>and the autonomy of the social partners, and to encourage workers to organise as this is a key instrument for achieving high standards of employment;</p>	<p>States' efforts, such as the European Semester and the European Social Fund +.</p> <p>The Commission is closely monitoring the application of Article 12 of Directive 2014/67/EU, which sets an obligation to the Member States to introduce a subcontracting liability, which covers at least the construction sector, the direct contractor and workers claims for the minimum rates of pay. However, the Commission also recalls that substantial problems of subcontracting are not really linked to cross-border activities.</p> <p>[...]</p> <p><i>Social partners have a special role in the design and implementation of social policy in general and particularly during times of crisis, as they are best placed to find the most suitable solutions for a balanced recovery process (paragraphs 15 and 24). The Commission gives a significant importance to working together with the social partners, and promotes social dialogue, with due respect to their autonomy, in line with the provisions of the Treaty on the Functioning of the European Union. This is also highlighted in the documents issued by the Commission during the COVID-19 crisis</i></p>			

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	<p>16. Calls on the Commission to analyse negative developments related to labour mobility, particularly the brain drain in certain sectors and regions; stresses that measures to counter the brain drain must go hand in hand with those to promote upward social convergence; Insists that, despite the COVID-19 pandemic, Member States should permit and facilitate the crossing of borders for professional reasons, whenever professional activity in the sectors concerned is allowed in the host Member State, in order to safeguard equal treatment between local and mobile workers; Calls on the Commission to establish clear quantitative and qualitative indicators for the purposes of the European Semester and the publication of country-specific recommendations in order to monitor the implementation and enforcement of the rules on the free movement of worker; Calls on the Commission to table recommendations to ensure fair, equitable and decent living and working conditions for mobile workers;</p>		<p>As regards preventing <i>brain drain and ensure upward social convergence</i> (paragraph 16), the Commission aims to support workers who want to move to another Member State, irrespective of their age, level of qualification or other characteristics. The European structural funds provide targeted support to lacking regions and sectors. These funds should be used to increase the attractiveness of these areas. In accordance with Article 148(3) of the Treaty on the Functioning of the European Union (TFEU), as part of the annual Joint Employment Report, the Commission considers Member States' implementation of Employment Guideline no. 7, which recommends that Member States adequately support the mobility of workers and learners, including by tackling barriers to mobility in education and training, and in occupational and personal pensions. The Joint Employment Report is one of the analytical tools used by the Commission to monitor the intra-EU mobility of workers and learners in the context of the European Semester. It helps identifying key associated employment and social challenges and potential divergences relevant for in-depth analysis in the Semester Country Reports.</p>		<p>Specific reply provided, but no further concrete action mentioned with regard to analysing negative developments related to labour mobility. No recently published study on negative developments related to labour mobility or brain drain was identified and it is unclear if this was launched.</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">The Joint Employment Report</a>).</p>	
9)	<p>18. Urges the Commission to ensure that the ELA becomes fully operational as a matter of priority in order to monitor and promote the application and enforcement of Union law relating to labour mobility and social security coordination;</p> <p>urges the Commission to support and strengthen the capacity of and cooperation between competent national authorities, as well as social partners, in order</p>		<p>With regard to <i>cross-border collaboration and exchanges of experience and data</i> (paragraphs 18, 21, 22, 39, and 42), the Commission is encouraging cooperation between national authorities and facilitates dialogue via various bodies at EU level - e.g. (Advisory Committee on Free Movement of Workers, free movement bodies established in line with the provisions of Directive 2014/54/EU, the Administrative</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. 	<p>to ensure fair rights-based mobility, adequate information to workers and employers about their rights and obligations, and the effective cross-border enforcement of workers' rights, including the portability of rights and entitlements, and to effectively tackle social security fraud and abusive practices; Believes that the ELA should focus on better enforcement and implementation of current Union legislation so that competition within the single market is fair and just; Stresses that in order for the ELA to be effective in combating illegal practices, it should give priority to the development of a real-time database to validate information from foreign service providers; Stresses that the ELA must have sufficient resources to perform its tasks; Underlines that the partial integration of the EURES into the ELA should strengthen the link between the promotion of freedom of movement and information provision and compliance with the relevant legislative framework protecting mobile workers and citizens;</p>	<p>Commission for Social Security). This includes dialogue with social partners.</p> <p>The establishment of the ELA is key to ensure that EU rules on labour mobility and social security coordination are enforced in a fair and effective way and to make it easier for citizens and businesses to reap the benefits of the internal market.</p> <p>Despite the obstacles related to the pandemic and still being in a build-up phase, ELA has managed to perform its first activities aiming at enhancing cooperation and exchange of information and support between the Member States with the network of National Liaison Officers who are directly integrated into ELA's structure.</p> <p>Within the Action Plan on Seasonal Workers, ELA focuses on helping the Member States to tackle irregularities this year. ELA is also working with the European Agency for Safety and Health at Work (EU-OSHA), with a concrete focus on seasonal workers. With increasing capacity, ELA will aim to cover other pertinent sectors where enforcement action is needed. To support enforcement actions and enhance their better targeting, ELA will also assist Member States with national risk assessment practices, capacity building activities and facilitating cross-border cooperation between the national authorities.</p> <p>In addition, the EURES network participates in ELA information campaign on cross-border seasonal work in 2021. The ELA information campaign is focusing on workers and employers' rights and obligations in the agri-food sector, while the EURES campaign expands the sectoral scope also to other relevant sectors (such as tourism) and provides information on available recruitment and placement services for cross-border</p>		<p>Committee on Free Movement of Workers, free movement bodies established in line with the provisions of Directive 2014/54/EU, the Administrative Commission for Social Security).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>seasonal work. EURES constitutes an essential resource to match information activities with labour market needs, providing services to job seekers, employers and ensuring that cross-border recruitment takes place in a fair manner. Thanks to its extensive network of advisers, EURES has a real-time perspective on job seekers' needs, including in particular sectors, and on labour market demand in the EURES participating countries. EURES and the other functions of ELA have a strong degree of complementarity as regards the objective of fair and effective labour mobility and have mutual benefits to reap from developing synergies.</p> <p>ELA will seek to collect good practice examples in order to build up an internal inventory and it will organise relevant events to publicise these activities. ELA will also seek to create its own mutual learning and understanding programme specific to the areas in which the Authority is operational. [...]</p>			
10)	19. Calls on the Commission to propose EU framework provisions to combat unfair competition on labour costs in order to ensure full compliance with the principles of equal treatment and equal pay and labour costs for equal work in the same place;	The revised Posting of Workers Directive further improves the protection of posted workers, in particular by setting out the entitlement to all the elements of remuneration rendered mandatory by national law or by universally applicable collective agreements of the host Member State and thus enshrining the principle of "equal pay for equal work at the same place" for posted workers.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Expert Committee on Posting of Workers, practical guide on posting of workers</a> )	
11)	21. Stresses that the digitalisation of data exchanges between Member States could facilitate the free movement of workers on a fair and equitable basis as well as the enforcement of relevant Union rules; Calls on the Commission to launch, after an impact assessment, its proposal on a digital European social security number (ESSN) without any undue delay,	<p>Although the follow-up mentions point 21, no specific reply provided for this particular point on launching, (The proposal on a digital European social security number (ESSN) without any undue delay).</p> <p>The Electronic Exchange of Social Security Information system (EESSI), used by 32 countries, allows for a more</p>		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>while ensuring that ESSN will be subject to strict data protection rules, which is necessary to ensure legal certainty for workers and businesses, fair mobility and the effective protection, portability, traceability and enforcement of workers' rights, as well as to support fair competition, ensuring a level-playing field for businesses; Considers that the ESSN should complement national social security numbers and regulations and facilitate the Electronic Exchange of Social Security Information (EESSI) for the purpose of improving coordination and information exchange between competent national authorities;</p>	<p>efficient data and message exchange between social security institutions with secure handling of personal data. The EESSI system is being used increasingly (hundreds of thousands of messages exchanged monthly) and facilitates the enforcement of EU social security coordination rules by Members States and their institutions.</p>			
12)	<p>24. Recalls the importance of social dialogue, and in this regard encourages the stronger involvement of the social partners in Union agencies, public authorities, committees and institutions in order to ensure practice-oriented initiatives and legislation that take into account the various different European labour market models; Stresses the need to enhance EU-level tripartite dialogue in the design and implementation of regulations on the provision of services and the mobility of workers, as well as in the mutual recognition of professions, diplomas, qualifications and skills, in line with the principles enshrined in the European Pillar of Social Rights; Calls on the Commission, the Member States and local authorities to work together with the social partners to design and implement necessary support structures for upskilling and reskilling of workers, implementing relevant public policies and providing quality jobs;</p>	<p><i>Social partners have a special role in the design and implementation of social policy in general and particularly during times of crisis, as they are best placed to find the most suitable solutions for a balanced recovery process (paragraphs 15 and 24). The Commission gives a significant importance to working together with the social partners, and promotes social dialogue, with due respect to their autonomy, in line with the provisions of the Treaty on the Functioning of the European Union. This is also highlighted in the documents issued by the Commission during the COVID-19 crisis.</i></p> <p>In its European Pillar of Social Rights Action Plan, the Commission announced that it will, following consultation with social partners in 2021, present an initiative to support social dialogue at EU and national level in 2022. The Commission also encouraged Member States to promote and create the conditions for improving the functioning and effectiveness of collective bargaining and social dialogue.</p> <p>In addition, the Commission supports the social partners by funding projects that fulfil the applicable</p>		<p>In its <a href="#">European Pillar of Social Rights Action Plan</a>, the Commission announced that it will, following consultation with social partners in 2021, present an initiative to support social dialogue at EU and national level in 2022. In this context, on 21 October 2021, the European Commission launched a <a href="#">technical seminar focusing on social partner's contribution to policymaking</a>. Actions by the Commission were also already taken with regard to the Pact for Skills.</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>criteria, including from the prerogative budget lines dedicated to social dialogue.</p> <p>As a dedicated action of the European Skills Agenda, the Pact for Skills mobilises a concerted effort for quality investment in skills for all working age people across the Union. The Pact for Skills will bring together all stakeholders, including social partners, which share the objective of up- and re-skilling Europe's workforce. During this cooperation, these stakeholders will define the key principles that are essential to up and reskill the workforce, within their organisations and across their value chain or ecosystem.</p>			
13)	26. Calls on the Commission to present a new Strategic Framework on Health and Safety at Work post-2020 as soon as possible, and to commit to eliminating work-related deaths by 2030;		<p>The Commission adopted on 28 June a <i>new EU Strategic Framework on Health and Safety at Work 2021-2027</i><sup>187</sup> as one of the main initiatives of the Work Programme for 2021 (paragraphs 26 and 27).</p> <p>The new Strategic Framework was developed on the basis of an extensive consultation of stakeholders, including an open public consultation as well as on the outcome of a stock taking of the implementation of the previous Strategic Framework on Health and Safety at Work 2014-2020. Other important elements feeding into the development of the new Framework are Council conclusions adopted under Finnish, Romanian or Croatian Presidencies as well as input</p>		<p><a href="#">The Commission adopted on 28 June a new EU Strategic Framework on Health and Safety at Work 2021-2027</a>. One of the strategic priorities is striving towards a Vision Zero approach concerning work-related deaths.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	32. Underlines the need for further use of harmonisation and mutual recognition tools for the recognition of professional diplomas, skills and qualifications throughout the Union, avoiding red tape and facilitating trade and transport, respecting the fundamental principle of equal treatment and without lowering Member States' educational standards and validation mechanisms; Calls therefore on the Commission and the Member States to promote and improve current mutual recognition mechanisms and job mobility portals, facilitating and promoting transparent mobility, such as the EURES job mobility portal, the Europass online platform and the European skills, competences, qualifications and occupations classification system (ESCO); Calls in particular on the Member States to establish cross-border partnerships to help mobile workers in cross-border regions;	The Commission fully supports continuous improvement of the EURES Job mobility portal in line with evolving needs of EURES initiative, which is a key element in enabling <i>fair intra-EU mobility</i> . Furthermore, the role of Europass and the European skills, competences, qualifications and occupations classification system (ESCO) is acknowledged in promoting transparent mobility. The Commission supports transparent mobility by providing portals and services that can support the process of <i>recognition and validation of skills and qualifications</i> (paragraphs 32 and 41). Apart from the tools mentioned by the European Parliament, the European Qualifications Framework (EQF) is a translation tool to make national qualifications easier to understand and more comparable and seeks to support cross-border mobility of learners and workers. As part of the revised and strengthened 2018 EQF Recommendation, work is ongoing to bring the EQF closer to organisations and individuals. As indicated in the European Skills Agenda, everyone should be able to participate in up- and reskilling opportunities. More needs to be done to support people to acquire the skills they need, and to reinforce Upskilling Pathways for adults, in particular for those with lower levels of skills and qualifications. The new Europass has been developed to become the EU's online tool to help people effectively communicate their skills and qualifications and to proactively guide them to a job or learning opportunity.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Qualifications Framework (EQF)</a> , etc.).	
18)	36. Notes with concern the difficulties and lack of adequate access to social protection systems for mobile workers and especially cross-border and frontier workers; Stresses the importance of coordinated action at Union level, but acknowledges	As regards paragraph 36, the principle of equal treatment of EU mobile workers with national workers is enshrined in Article 45 of the Treaty on the Functioning of the European Union. It ensures the best protection for EU mobile workers, including for			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>and welcomes the successful bilateral agreements signed between Member States to guarantee social security rights for all workers as set out in the Council Recommendation on access to social protection for workers and the self-employed; Calls on the Commission and the Member States to ensure the social rights of mobile workers in the event of a health crisis and other crisis situations;</p>	<p>cross-border and frontier workers. The Council Recommendation on access to social protection for workers and the self-employed adopted in 2019 provides concrete guidance on the direction of reforms needed. At its heart lies the principle that all workers and the self-employed should be covered by social protection schemes including intra-EU mobile workers. The COVID-19 pandemic has revealed important gaps in the social protection coverage, including for non-standard workers. The exceptional measures taken during the pandemic to extend social protection to previously not covered groups are a source of inspiration for structural reforms in line with the 2019 Council Recommendation.</p> <p>ELA will enhance the exchange of information between national authorities, both via its National Liaison Officers and by promoting the use of electronic tools, procedures and databases to facilitate the access to data in real time and detection of fraud. ELA is foreseeing various actions to this end, including workshops and seminars and will start consultations with Member States on potential digitalisation processes. ELA Regulation does not envisage the set-up of a helpdesk. Instead, ELA will facilitate cooperation between the competent bodies designated in accordance with Directive 2014/54/EU and cooperate with Union information services, such as Your Europe Advice, the European network of Public Employment Services, the European Enterprise Network, and SOLVIT, thus enhancing the availability of services and information on applicable Union rules to individuals and employers.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission with regard to ensuring the social rights of mobile workers during health crises. Reference is made to the existing framework, including <a href="#">The Council Recommendation on access to social protection for workers and the self-employed adopted in 2019</a> and the on-going work of the ELA.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	<p>39. Calls on the Commission to proceed, within a reasonable time frame, with the evaluation of the ELA's mandate, after the Authority has become fully operational for at least two years;</p> <p>Urges the Commission to involve stakeholders with profound knowledge of different labour market models in the work and evaluations of the ELA;</p>	<p>In line with the provisions of ELA's founding Regulation, "by 1 August 2024, and every five years thereafter, the Commission shall assess the Authority's performance in relation to its objectives, mandate and tasks. The evaluation shall, in particular, address the experiences gained from the mediation procedure pursuant to Article 13. It shall also assess whether there is a need to modify the mandate of the Authority and the scope of its activities, including the extension of the scope to cover sector specific needs, and the financial implications of any such modification, taking into account also the work carried out by Union agencies in those areas. The evaluation shall also explore further synergies and streamlining with agencies in the area of employment and social policy."</p> <p>[...]</p> <p>While ELA does not have the task of carrying inspections on its own, it encourages, coordinates and supports cross-border joint and concerted inspections. It also builds up the capacity of national enforcement bodies, promotes sharing of best inspections practices, and develops enforcement guidelines in labour mobility with cross-border elements.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>However, no mention is made on the second point of concrete actions to involve stakeholders with profound knowledge of different labour market models.</p>	
20)	<p>40. Calls on the Commission to propose a legislative framework with a view to regulating teleworking conditions across the EU, and to ensure decent working and employment conditions; [...]</p>	<p>With regard to a legislative framework with a view to regulating teleworking conditions across the EU (paragraph 40), it is important to underline that social partners have a central role in dealing with issues linked to telework. In the past, social partners had already agreed on a cross-industry Framework Agreement on telework (2002). More recently, European social partners concluded a Framework Agreement on Digitalisation in 2020. This agreement</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (a Framework Agreement on Digitalisation in 2020).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>is currently being implemented at national, regional and local level.</p> <p>As indicated in the European Pillar of Social Rights Action Plan and in line with the recommendations laid down in the European Parliament’s Resolution of 21 January 2021 on the right to disconnect, the Commission will proactively support social partners in their endeavour, facilitating discussions and the identification of best practices, by assessing existing practices and rules related to the right to disconnect. In view of this, the Commission will continue to explore the context and implications of the right to disconnect and remote work in order to underpin social partners’ discussions on the matter. The insights gathered would complement ongoing and future exchanges between social partners and the Commission, and would also inform reflections on a potential EU legislative initiative on the right to disconnect, within the broader context of remote work. The future implementation report of the Working Time Directive will also provide an opportunity to reflect further on the implications of remote work on working time.</p>		<p>However, no concrete actions are indicated or proposed with regard to the Commission working on a legislative framework regulating teleworking conditions across the EU.</p>	
21)	<p>42. Is concerned that access to information for employees and employers on mobility of labour and services still remains a challenge; Notes that information on employment conditions and collective agreements which is made available on single official national websites is very often limited in nature and is accessible only in a few languages; Calls on the Commission, therefore, to improve access to information by creating a single template for official national websites;</p>	<p>ELA has placed requests for information as a priority for its first years of operation. While the provision of information remains a national responsibility, ELA has started work to support the Member States in meeting their information obligations. First, it has elaborated a template providing a methodology to present the content of applicable collective agreements on single posting websites. Second, further templates were created to support the provision of information on other aspects of posting, such as long-term posting rules, declaration obligations and sanctions and penalties. Third, ELA</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Translation Facility</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		has established a Translation Facility to support national administrations translating information content on labour mobility into other languages. Fourth, ELA has started a process of peer reviews of single national posting websites coupled with the offer of individualised assistance to the Member States to address technical level possible shortcomings in their websites.			
22)	45. Calls on the Commission to examine protection gaps and consider the need for a revision of Directive 2008/104/EC on temporary agency work in order to ensure decent working and employment conditions for temporary agency workers;	As regards paragraph 45, as indicated in the European Pillar of Social Rights Action plan, evidence is being gathered on the use of temporary agency work, in particular in the context of cross-border work. This will provide the basis for the Commission to assess the need for legislative or other action at EU level, notably a possible revision of the Temporary Agency Work Directive.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Pillar of Social Rights Action plan</a> ) and is considering a possible revision of the Temporary Agency Work Directive.	

## 4.1.13.9. EMPL Resolution 9: EP resolution of 9 June 2021 on old continent growing older - possibilities and challenges related to ageing policy post 2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
Old continent growing older - possibilities and challenges related to ageing policy post 2020	09/06/2021 <a href="#">T9-0347/2021</a> <a href="#">2020/2008(INI)</a> EMPL	<a href="#">SP(2021)598</a>	Final reply (SP) received 26 November 2021	Specific reply		
1)	2. Calls on the Commission and the Member States to strengthen their efforts to combat all forms of discrimination against older people, particularly against women, especially in the areas of employment, access to financial products and services, healthcare, housing, promoting autonomy, education, training and leisure activities; Calls, furthermore, on the Commission and the Member States to promote a positive perception of old age in society and the social inclusion of older people by stimulating age-friendly environments in the EU through appropriate measures, and to support the exchange of good practices at all governance levels and strengthen their support for the silver economy in the EU; Calls on the Commission to follow up on the implementation report of Directive 2000/78/EC after 20 years with a view to strengthening the framework for age discrimination in employment and occupation;	The Charter of Fundamental Rights of the EU (2012/C 326/02) prohibits discrimination based on any ground, including sex and age. The situation of older persons and the promotion and protection of their human rights remain high on the agenda of the European Union and its Member States. The European Pillar of Social Rights states that regardless of gender, racial or ethnic origin, religion or belief, disability, age or sexual orientation, everyone has the right to equal treatment and opportunities regarding employment, social protection, education, and access to goods and services available to the public. The European Commission, for the first time in its history, has a Commissioner for Equality, and a Vice-president for democracy and demography. The European Commission is engaged in achieving a Union of equality. Dedicated strategies <sup>195</sup> set out mechanisms and actions to create the conditions for everyone to live and thrive regardless of differences based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation. The strategies promote an intersectional perspective, addressing specific barriers			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>195</sup> The Gender Equality Strategy 2020-2025, the EU Anti-racism Action Plan 2020-2025, the EU Roma strategic framework for equality, inclusion and participation for 2020-2030, the LGBTIQ Equality Strategy, and the Strategy for the Rights of Persons with Disabilities 2021-2030.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>faced at the intersection of identities, socioeconomic situation or other vulnerabilities.</p> <p>In addition to targeted actions, enhanced mainstreaming of equality and accessibility in all relevant EU policies, legislation and funding programmes is key in achieving a Union of Equality.</p> <p>In this context, the Commission has set up an internal equality task force to help ensuring mainstreaming of equality in relevant legislation and policies.</p> <p>In March this year, the Commission published the Report on the application of Council Directive 2000/43/EC implementing the principle of equal treatment between persons irrespective of racial or ethnic origin ('the Racial Equality Directive') and of Council Directive 2000/78/EC establishing a general framework for equal treatment in employment and occupation ('the Employment Equality Directive'). The report contains in chapter 4.5 specific observations on the implementation of equal treatment in employment and occupation regarding age. The conclusion contains a list of follow-up actions to address the challenges identified the report.</p>		<p>The Task Force on Equality, set up under the Von der Leyen Commission, pursues an intersectional approach to equality mainstreaming. It is composed of representatives of all Commission services and the European External Action Service and is supported by a Secretariat based in the Secretariat General of the European Commission. (See <a href="#">Commission statement on the Union of equality</a>, 22 December 2020).</p> <p>The <a href="#">2021 Commission report on the application of the EED</a> lists the envisaged follow-up actions on pp. 25-26 (section: conclusions).</p>	
2)	<p>7. Calls on the Commission and the Council to establish a Year of Intergenerational Solidarity and Active Ageing complementing and building on the aims and spirit of the European Day of Solidarity between Generations and the 2012 European Year for Active Ageing and Solidarity between Generations, in order to raise awareness about the problems older people face and promote strategies to mitigate them, as well as to eliminate stereotypes and prejudice, strengthen the links and solidarity between the generations, counteract social</p>	<p>The Commission agrees that providing more visibility to the topic of ageing is important. This is why the Commission has made ageing a policy priority, by publishing a report on the impacts of demographic change and launching the Green paper on ageing.</p> <p>However, another year dedicated to ageing may have a limited impact on the situation of older people in the EU compared to other measures under way. The Commission has committed to adopt a number of policy initiatives in the context of the European Pillar of Social Rights, many of which are very relevant for the</p>		<p>The Commission is reluctant to establishing yet another age-related year.</p> <p>It adopted a <a href="#">report on the impact of demographic change</a>, COM(2020) 241, on 17 June 2020, and the <a href="#">Green paper on ageing: Fostering solidarity and responsibility between generations</a>, COM(2021) 50, on 27 January 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>exclusion and address sexual health issues; Stresses the importance of this initiative in not only the context of demographic change, but also the COVID-19 pandemic, which has hit vulnerable groups, including older people and their carers, particularly hard; Also invites the Member States to consult with academic experts and civil society organisations when addressing demographic challenges; Calls on the Commission and the Council to swiftly implement the Council conclusions on the human rights, participation and well-being of older persons in the era of digitalisation, including the creation of a 'platform for participation and volunteering after working life' and the promotion of intergenerational exchanges and ties;</p>	<p>quality of life of older people. These include a new European Care Strategy, a Council Recommendation on minimum income, an initiative on Individual Learning Accounts and EU report on access to essential services. Moreover, as the prevalence of disabilities increases with age, the implementation of the Strategy for the Rights of Persons with Disabilities 2021-2030 is of direct relevance to address the needs of an ageing population, notably by promoting accessibility and independent living.</p> <p>In parallel, the Commission's Green Paper on Ageing opened a broad consultation process on the opportunities and challenges of ageing, highlighting the importance of striking the right balance between sustainable solutions for our welfare systems and strengthening intergenerational solidarity.</p> <p>In addition, the Commission's Long-term Vision for Rural Areas addresses challenges for older people in rural areas, in particular.</p>		<p>Further actions are planned:</p> <p>The CWP 2022 includes a Communication on a European care strategy, accompanied by a proposal for a Council Recommendation on long-term care for Q3 of 2022.</p> <p>The Council recommendation on minimum income, taking into account the pandemic, is expected for 2022, (<a href="#">conclusions</a> adopted on 9 October 2020).</p> <p>The Individual Learning Accounts initiative was launched in March 2021 with an <a href="#">inception impact assessment</a>.</p> <p>The <a href="#">report on access to essential services</a> was published in 2020.</p> <p>The <a href="#">consultation on the green paper on ageing</a> was closed in April 2021.</p> <p>The Commission answer does not mention the implementation of the Council conclusions on the human rights, participation and well-being of older persons in the era of digitalisation.</p>	
3)	<p>9. Welcomes the Commission's Green Paper of 27 January 2021 entitled 'Ageing: Fostering solidarity and responsibility between generations' (COM(2021)0050); Calls on the Commission to prepare an EU action plan on demographic change and solidarity between generations, taking into account the diversity and complexity of the situation in specific age groups as well as differences in the Member States; Underlines that such a plan should be socially inclusive and aimed at enabling dignified, active and healthy ageing and should be developed in line with the WHO's Decade of Healthy Ageing with the involvement of representatives of</p>	<p>The Commission's growth strategy, the European Green Deal, stresses the importance of a socially just transition, which takes into consideration demographic challenges and responds to them in a socially just manner. Demographic aspects are being further integrated in relevant EU policies. For these reasons, a specific EU action plan on demographic change is not being considered. The Commission is actively supporting the Member States in addressing the impacts of demographic change at national, regional and local level.</p> <p>There is no one-size fits all solution to tackle the consequences of the ageing of Europe's population.</p>		<p>With regard to an EU action plan on demographic change and solidarity between generations, the Commission proposes no specific action proposed to be taken as, according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>all generations; calls on the Commission and the Member States to pay particular attention to the situation of older people when implementing the Sustainable Development Goals; Reiterates its call on the Member States to adopt without further delay the proposed Council directive on implementing the principle of equal treatment between persons irrespective of religion or belief, disability, age or sexual orientation, which is essential for combating discrimination on all grounds and in all spheres of social life and for fighting multiple discrimination;</p>	<p>There is a need for a mix of tools and policies, adapted to the specific circumstances of the Member States, their regions and different areas that face specific opportunities and challenges.</p> <p>The Green Paper on ageing launched a broad public debate on possible policy options to respond to the ageing trend in the EU. The results will be taken into account in reflections on next steps in addressing and anticipating demographic change.</p>		<p>In its response, the Commission does not touch upon the SDGs nor the horizontal equality directive.</p> <p>The <a href="#">consultation on the green paper on ageing</a> was closed in April 2021.</p>	
4)	<p>13. Calls on the Commission and the Member States to ratify and implement the Council of Europe Convention on preventing and combating violence against women and domestic violence;</p>	<p>Tackling gender-based violence is high on this Commission's agenda. The EU's accession to the Council of Europe Convention on preventing and combating violence against women and domestic violence (Istanbul Convention) remains a key priority. The EU signed the Istanbul Convention in June 2017, however, the process remains blocked by a minority of Member States.</p> <p>President von der Leyen has announced that the Commission will make a legislative proposal to prevent and combat gender-based violence against women and domestic violence. The initiative is included in Commission Work Programme as a key initiative for late 2021.</p> <p>The legislative initiative will have the same objective as the Istanbul Convention: ensuring that EU Member States have effective measures in place (in areas of EU competence) to prevent and combat violence against women and domestic violence. If the EU's accession to the Istanbul Convention is finalised, the measures of the new legislative initiative will implement the Convention in the areas of the EU competence.</p>		<p>The Commission announced a proposal on gender-based violence in the CWP2021, but eventually postponed it to 2022. The corresponding <a href="#">inception impact assessment</a> was published in December 2020.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	15. Calls on the Commission and the Member States to ensure a decent life for dependent persons; Underlines the need to promote strategies on personalised quality support for dependent persons; Stresses that the specific needs of persons with different diseases, including neurodegenerative diseases such as Alzheimer's and dementia, from diagnosis to treatment and long-term care, should be taken into account;	Although no specific reply is provided to this particular point, however in reply to point 53 the Commission states that For the programming period 2021-2027, providing quality care for older and dependent people continues to be a priority for ESF+ and ERDF, in the context of promoting the transition from institutional to family- and community-based care (deinstitutionalisation). The funds should be implemented in a way that promotes such transition. The goal is also supported by the enabling conditions for funding set out in the Common Provisions Regulation.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
6)	19. Calls on the Commission and the Member States to safeguard and advance sexual and reproductive rights and ensure universal access to sexual and reproductive health services and commodities;	Although no specific reply is provided to this particular point, however in reply to point 20 the Commission states that the Member States are responsible for the definition of their public health policy including sexual and reproductive health, and for organising and delivering health services and medical care. The Commission supports the Member States to ensure the resilience of their health systems, including services related to sexual and reproductive health, according to national laws. The European Pillar of Social Rights Action Plan 196 adopted in March 2021 reaffirms the shared commitment to improve access to healthcare. The European Commission calls on Member States' efforts to close country-specific gaps in access to healthcare and improve their health systems through the European Semester. The Member States can use European funds, including the Recovery and Resilience Facility and Cohesion Policy funds, to modernise their health systems and improve access to healthcare		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>196</sup> European Pillar of Social Rights Action Plan.

		<p>through addressing specific problems, which vary across and within countries.</p> <p>The Commission also supports the Member States in implementing the United Nations Sustainable Development Goals relevant to women’s health, such as on universal access to sexual and reproductive health and rights, family planning and education.</p>			
7)	<p>20. Calls on the Commission to take an evidence- and human-rights-based approach to tackling demographic challenges in the EU, ensuring that all EU residents can fully realise their sexual and reproductive health and rights; Condemns any attempt to instrumentalise demographic change in order to undermine gender equality and sexual and reproductive health and rights, and calls on the Commission and the Council to uphold Union values in this regard;</p>	<p>The Commission is committed to an evidence-based approach also in tackling demographic challenges in the EU, in line with EU values including those of human rights and dignity (Article 2 of TEU). In 2020, the Commission published a report on the impact of demographic change (COM(2020) 241 final), that drew on evidence and comparable data provided by Eurostat in particular. The report paved the way for the Green paper on ageing, which opened a wide debate on ageing, taking into account both the challenges that come with an ageing society as well as the new opportunities. Both the report and the green paper address, among others, the challenge of meeting a growing demand for adequate and sustainable health and long-term care services, in view of the EU’s ageing population.</p> <p>The Member States are responsible for the definition of their public health policy including sexual and reproductive health, and for organising and delivering health services and medical care. The Commission supports the Member States to ensure the resilience of their health systems, including services related to sexual and reproductive health, according to national laws. The European Pillar of Social Rights Action Plan<sup>197</sup></p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">report on the impact of demographic change</a>, <a href="#">European Pillar of Social Rights Action Plan</a>, <a href="#">Europe’s Beating Cancer Plan</a>).</p>	

<sup>197</sup> [European Pillar of Social Rights Action Plan](#)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>adopted in March 2021 reaffirms the shared commitment to improve access to healthcare. The European Commission calls on Member States' efforts to close country-specific gaps in access to healthcare and improve their health systems through the European Semester. The Member States can use European funds, including the Recovery and Resilience Facility and Cohesion Policy funds, to modernise their health systems and improve access to healthcare through addressing specific problems, which vary across and within countries.</p> <p>The Commission also supports the Member States in implementing the United Nations Sustainable Development Goals relevant to women's health, such as on universal access to sexual and reproductive health and rights, family planning and education. The European Centre for Disease Prevention and Control supports Member States in promoting the human papillomavirus (HPV) vaccination. Europe's Beating Cancer Plan (COM/2021/44 final) will further assist through a flagship action aiming to eliminate cervical cancer and other cancers caused by human papillomaviruses. The EU4Health programme's work programme for 2021 includes two actions to support consistent and efficient roll-out of HPV vaccination, with a total budget EUR 5 million. The Commission will also put forward by 2022 a proposal to update the Council Recommendation on cancer screening addressing also cervical cancer. In addition, the recently launched Commission Knowledge Centre on Cancer will provide new guidelines and quality assurance schemes on cancer screening, diagnosis, treatment rehabilitation, follow-up and palliative care for cervical cancer. These will include voluntary accreditation and certification</p>		<p>A proposal updating the recommendation on cancer screening is announced in the <a href="#">CWP 2022</a> for Q3/2022.</p> <p>Website <a href="#">Commission Knowledge Centre on Cancer</a></p>

		programmes for Cancer Centres and screening programmes.			
8)	<p>22. Calls on the Commission to put forward a care deal for Europe and a European carers' programme aimed at making the transition towards a care economy that entails relevant investment and legislation at EU level, taking a comprehensive approach towards all care needs and services and setting quality guidelines for care throughout the life course, including for children, older persons and persons with long-term needs, with a view to identifying and recognising the various types of informal care-giving, and guaranteeing financial support for carers, appropriate periods of leave and affordable services, among other things;</p>	<p>The European Pillar of Social Rights includes, among others, principles concerning long-term care and health care. The European Pillar of Social Rights Action Plan presented by the Commission on 4 March 2021 will contribute to turning the principles of the Social Pillar into reality, as a joint effort of the EU institutions, national, regional and local authorities, social partners and civil society. The Action Plan announces a Commission initiative on Long-Term Care in 2022 that would set a framework for policy reforms to guide the development of sustainable long-term care that ensures better access to quality services for those in need. The 2021 Long-term care report<sup>198</sup> and the input received through the public consultations for the Pillar Action Plan and the Green paper on ageing provide essential feedback. In parallel, the Commission will revise the Barcelona targets to increase participation in early childhood education and care, also with a view to strengthening female labour market participation by providing high-quality care for children. The President of the European Commission announced in the 2021 State of the European Union address<sup>199</sup> the new European Care Strategy that will encompass these initiatives and support men and women in finding the best care and the best life balance for them.</p> <p>In addition, the Council Recommendation establishing the European Child Guarantee<sup>200</sup> aims to ensure that</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">European Pillar of Social Rights Action Plan</a>).</p> <p>The CWP 2022 includes a Communication on a European care strategy, accompanied by a proposal for a Council Recommendation on long-term care for Q3 of 2022.</p>

		<p>children at risk of poverty or social exclusion enjoy equal opportunities and have free access to key services such as early childhood education and care, healthcare, a healthy meal during school-days and education, and also effective access to nutrition and housing.</p> <p>Furthermore, the European Commission recently published the report 'Early Childhood Education and Care: How to recruit, train and motivate well-qualified staff', which explores ways to address staff shortages in this sector and improve career opportunities. It complements the EU Quality Framework for early childhood education and care.</p> <p>Finally, under the Strategy for the Rights of Persons with Disabilities 2021-2030, the Commission will take dedicated action to further promote independent living and inclusion in the community (see reply to paragraph 60 below).</p>			
9)	24. Calls on the Commission and the Member States to pursue a Health in All Policies approach, assessing the health impact of policy choices in all relevant areas;	The Commission implements a health approach in all policies. Assessing the health impact forms a key part of the Commission's better regulation agenda, which seeks to design and evaluate EU policies and laws so that they achieve their objectives in the most efficient and effective way. The Commission's impact assessment system follows an integrated approach that assesses the environmental, social and economic impacts of a range of policy options. Health is a key component of the social impacts being considered.		<p>No further/specific actions proposed/promised to be taken by the Commission.</p> <p>Tool#32 (health impacts) of the <a href="#">updated Better Regulation Toolbox</a> (November 2021) details the rules for considering health impacts in new initiatives and evaluations/fitness checks.</p>	
10)	26. Calls on the Commission and the Member States to further explore user-friendly, safe and accessible assistive digital technologies, telecare and telemedicine, especially in regions affected by demographic decline and remote regions; [...]	The Commission has been active in promoting person-centred care, digital skills for the health sector and active and healthy ageing. The 2018 Communication on enabling the digital transformation of health and care in the Digital Single Market (COM/2018/233 final), for example, tackles the issues of integrated care, person-centred care and ageing at home. European Innovation		In addition to existing work falling under the scope of the EP request ( <a href="#">Active and Assisted Living Programme</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Partnership on Active and Healthy Ageing has facilitated exchanges across the EU to test scientific and medical innovations with the aim to scale them up at regional or national levels (see e.g. SWD/2018/437 final).</p> <p>The Commission supports also the Active and Assisted Living Programme (AAL), which aims to create better living conditions for older adults with the help of technology, as well as to strengthen the international industrial opportunities in the area of information and communication technology (ICT). It carries out its mandate through funding cross-national projects (at least three countries involved) that involve small and medium sized enterprises (SMEs), research bodies and end-user organisations (representing seniors). AAL projects are financed by the European Commission and the 26 countries that constitute the partner states of this joint initiative. Under Horizon Europe (2021-2027), a new partnership 'Transforming Health and Care Systems' will continue to support Active and Healthy Ageing research and innovation.</p> <p>As part of the upcoming European Health Data Space legislative proposal that is planned to be adopted in 2022, the Commission will aim at facilitating the provision of digital health in the EU, covering health services and products, including tele-health, tele-monitoring and mobile health, namely by overcoming limitations and fragmentation due to divergent national measures.</p> <p>Under the Web Accessibility Directive<sup>201</sup>, all public sector websites and mobile applications, including those for healthcare, have to be accessible for persons</p>		<p>(AAL), <a href="#">partnership 'Transforming Health and Care Systems'</a>, etc), the Commission is currently preparing a proposal for a regulation on a European Health Data Space, expected to be published in Q1/2022. An <a href="#">inception impact assessment</a> was issued in December 2020.</p> <p>(Website <a href="#">European Health Data Space</a>).</p>	

<sup>201</sup> Directive (EU) 2016/2102 of 26 October 2016 on the accessibility of the websites and mobile applications of public sector bodies.

			with disabilities. Essential for some, accessibility features can also be very useful for older digital users. The Commission will evaluate, in 2022, the application of the Web Accessibility Directive and assess whether the directive should be revised to address any gaps identified, such as scope, technological advances, and coherence with other relevant EU legislation. The European Accessibility Act <sup>202</sup> will extend accessibility requirements to a range of products and services with practical effect from 2025.		An evaluation of the Web Accessibility Directive is envisaged for 2022.	
11)	37. Calls on the Commission and the Member States to develop recommendations on reducing the risk of poverty and social exclusion in older age, focusing especially on the gender pension gap, older persons with disabilities, older migrants, older Roma, older persons belonging to ethnic, racial, linguistic or sexual minorities and other groups that are disproportionately affected by poverty and social exclusion;		Consolidated reply to point 37 and 48. The European Pillar of Social Rights Action Plan puts forward an integrated approach to address needs at all stages of life and target the root causes and manifestations of poverty and social exclusion. In line with the Treaties, the Member States are to play the key role. This integrated approach is underpinned by recent initiatives such as the Council Recommendation on access to social protection <sup>203</sup> and the European Platform on Combating Homelessness <sup>204</sup> , as well as the upcoming ones: proposal for a Council Recommendation on minimum income, an initiative to enhance the use by Member States of distributional impact assessment in their reforms and investments, a Commission report on access to essential services, and a High-Level Expert Group to study the future of the welfare state. The Commission is also committed to address poverty and social exclusion of disadvantaged groups at every stage of life through a series of actions		The Council recommendation on minimum income, taking into account the pandemic, is expected for 2022 ( <a href="#">conclusions</a> adopted on 9 October 2020).  The <a href="#">report on access to essential services</a> was published in 2020. 		<p>Ministers of Employment and Social Affairs committed to set national targets that will contribute to the common poverty target. The European Pillar of Social Rights has been embedded in the European Semester since 2017. A revised Social Scoreboard – now including indicators on people with disabilities and on housing - will reinforce the employment and social dimension of the Semester. The Pillar Action Plan set a complementary target to halve the gender employment gap in the EU by 2030.</p> <p>The Council recommendation establishing a European Child Guarantee, adopted unanimously on 14 June 2021, aims to ensure that all children at risk of poverty or social exclusion have access to services they need, including early childhood education and care, education and healthcare.</p>			
12)	<p>39. Emphasises, in this context, the need to strengthen the digital skills of older people, which can help them not only to benefit from online education, but also improves their access to healthcare and other digital services; Calls for accessible and affordable digital skills programmes catered to the needs of older people; Calls on the Commission to take specific actions targeting older people; Calls, furthermore, on the Commission and the Member States to support upskilling and reskilling initiatives, in particular for vulnerable groups, in order to help people find a quality job and in order to meet the needs of the labour market, counter the digital gap and ensure that these persons effectively adapt and benefit from innovative management and working methods and digital solutions, such as teleworking;</p>	<p>The European Commission puts an emphasis on adult learning, training and skills development as a means to put in practice the first principle of the European Pillar of Social Rights on education, training and life-long learning, to prepare people for the green and digital transition and to respond to the effects of the COVID-19 pandemic. The aim is to ensure a skilled workforce and an inclusive society, which enables and empowers individuals to have an active role. As part of the European Pillar of Social Rights Action Plan an ambitious target of 60% of all adults participating in training every year by 2030 has been set and was welcomed by the June 2021 European Council.</p> <p>The European Skills Agenda sets the goal to build comprehensive, quality and inclusive adult learning systems, which reach out to all, including seniors and in particular those most in need of access to learning.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>Work is ongoing on the <a href="#">European Digital Skills Certificate</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In most of today's jobs, but also to participate in society, people including older people need digital skills. The European Social Pillar Action Plan sets out that by 2030, 80% of adults should have at least basic digital skills.</p> <p>To respond to this challenge, the Digital Education Action Plan 2021-2027 (DEAP)<sup>206</sup> was updated. The development of digital skills and competences for the digital transformation among citizens of all ages and backgrounds are key priorities. Consequently, the European Digital Competence framework for citizens will be updated to include Artificial Intelligence and data-related skills.</p> <p>When it comes to adults and elderly people, digital transformation is among the four priorities of the Partnerships for cooperation under the new Erasmus+ programme. The calls for Partnerships are open to education and training institutions at all levels, including adult learning with the objective to support developing cooperation that contribute to increasing the relevance of their activities, exchanging and developing new practices and methods, including in digital education. The Commission recognises the important role digital technologies can play in boosting upskilling, reskilling as well as the recognition of digital skills. Current work on developing a European Digital Skills Certificate will enhance the transparency and mutual recognition of digital skills certification by governments, stakeholders and employers across Europe. Moreover, higher education staff and VET (vocational education and training) learners will now be included in the up-scaled Digital Opportunity</p>

		Traineeships, which aims to strengthen digital skills through cross-border traineeships.			
13)	44. Calls on the Commission and the Member States to ensure the proper implementation of the Work-Life Balance Directive and to support regional and local initiatives and projects aimed at striking a better balance between work and private life for men and women;	<p>Consolidated reply to point 44, 75, 76</p> <p>The Commission promotes equality between men and women, including on the labour market. In particular, the Directive on work-life balance (EU/2019/1158) introduced specific measures to ensure a better balance between work and care responsibilities and should be fully implemented in all the Member States by summer 2022. The EU also supports gender equality by equal treatment legislation and by promoting gender-equal policies as presented in the EU Gender Equality Strategy 2020-2025 (COM/2020/152 final).</p> <p>The EU also supports pensions reforms in the Member States with studies, common scenarios, peer reviews and in the European Semester policy review. Common reform trends include for example raising statutory and effective retirement ages, encouraging longer working lives for all, and allowing for combined pension and part-time work. EU funds are available to support these policy objectives; in particular, the ESF+ supports training, mobility and work experiences for older persons.</p>		The Directive on work-life balance to be implemented by Member States by Summer 2022.	
14)	46. Calls on the Commission and the Member States to bridge the digital divide and further explore the possibilities for social inclusion and integration into the labour market of older people of working age, particularly those who are housebound, by using the internet, other information technologies and artificial intelligence for cultural, entertainment, education, work, communication and medical purposes, including telecare and telemedicine in a safe manner, and ensuring the highest level of protection of personal data, while acknowledging	Although no specific reply is provided to this particular point, however the Commission states in the reply to point 26 that the Commission has been active in promoting person-centred care, digital skills for the health sector and active and healthy ageing. The 2018 Communication on enabling the digital transformation of health and care in the Digital Single Market (COM/2018/233 final), for example, tackles the issues of integrated care, person-centred care and ageing at home.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Communication on enabling the digital transformation of health and care in the Digital Single Market, 2021 Pension Adequacy Report).

	Ageing by drawing up healthy ageing plans in the EU that cover access to health and care services, as well as strategies for health promotion and prevention; Calls on the Commission to set up an ambitious research agenda on physical and mental health as part of the Horizon Europe programme; [...]				
28)	74. [...] Urges the Member States and the Commission to promote programmes, projects and actions that further the social, cultural and political participation of older people;	Although no specific reply is provided to this particular point, the Commission states in the reply to point 60 that the Commission calls on the Member States to promote and secure financing for accessible and disability-inclusive social housing, including for older persons with disabilities.		It is unclear to what extent the Commission kept its promise to 'call on the Member States to promote and secure financing for accessible and disability-inclusive social housing, including for older persons with disabilities.'	
29)	75. Calls on the Commission and the Member States to promote and support an inclusive labour market and societies that allow for equal participation and draw on the skills and talents of all [...] ; Calls on the Commission to emphasise psychosocial and physical, age-related risks for both women and men in the new strategic framework for health and safety in the workplace; underlines that occupational health and safety is crucial;	Consolidated reply to point 44, 75, 76. The Commission promotes equality between men and women, including on the labour market. In particular, the Directive on work-life balance (EU/2019/1158) introduced specific measures to ensure a better balance between work and care responsibilities and should be fully implemented in all the Member States by summer 2022. The EU also supports gender equality by equal treatment legislation and by promoting gender-equal policies as presented in the EU Gender Equality Strategy 2020-2025 (COM/2020/152 final). The EU also supports pensions reforms in the Member States with studies, common scenarios, peer reviews and in the European Semester policy review. Common reform trends include for example raising statutory and effective retirement ages, encouraging longer working lives for all, and allowing for combined pension and part-time work. EU funds are available to support these policy objectives; in particular, the ESF+ supports		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		training, mobility and work experiences for older persons.			
30)	76. Calls on the Commission and the Member States to facilitate access to work, for those who wish to, for people aged 60 and over, in particular women, as this would increase their lifetime incomes, and to introduce part-time, low-risk professional activities for older people when they are still healthy and able to take on responsibilities; [...]	<p>Consolidated reply to point 44, 75, 76.</p> <p>The Commission promotes equality between men and women, including on the labour market. In particular, the Directive on work-life balance (EU/2019/1158) introduced specific measures to ensure a better balance between work and care responsibilities and should be fully implemented in all the Member States by summer 2022. The EU also supports gender equality by equal treatment legislation and by promoting gender-equal policies as presented in the EU Gender Equality Strategy 2020-2025 (COM/2020/152 final).</p> <p>The EU also supports pensions reforms in the Member States with studies, common scenarios, peer reviews and in the European Semester policy review. Common reform trends include for example raising statutory and effective retirement ages, encouraging longer working lives for all, and allowing for combined pension and part-time work. EU funds are available to support these policy objectives; in particular, the ESF+ supports training, mobility and work experiences for older persons.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
31)	77. Calls on the Commission to adopt an EU strategy on carers; [...]	The European Pillar of Social Rights includes, among others, principles concerning long-term care and health care. The European Pillar of Social Rights Action Plan presented by the Commission on 4 March 2021 will contribute to turning the principles of the Social Pillar into reality, as a joint effort of the EU institutions, national, regional and local authorities, social partners and civil society. The Action Plan announces a Commission initiative on Long-Term Care in 2022 that would set a framework for policy reforms to guide the development of sustainable long-term care that ensures		The <a href="#">CWP 2022</a> includes a Communication on a European care strategy, accompanied by a proposal for a Council Recommendation on long-term care for Q3 of 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>better access to quality services for those in need. The 2021 Long-term care report<sup>215</sup> and the input received through the public consultations for the Pillar Action Plan and the Green paper on ageing provide essential feedback. In parallel, the Commission will revise the Barcelona targets to increase participation in early childhood education and care, also with a view to strengthening female labour market participation by providing high-quality care for children. The President of the European Commission announced in the 2021 State of the European Union address<sup>216</sup> the new European Care Strategy that will encompass these initiatives and support men and women in finding the best care and the best life balance for them.</p> <p>In addition, the Council Recommendation establishing the European Child Guarantee<sup>217</sup> aims to ensure that children at risk of poverty or social exclusion enjoy equal opportunities and have free access to key services such as early childhood education and care, healthcare, a healthy meal during school-days and education, and also effective access to nutrition and housing.</p> <p>Furthermore, the European Commission recently published the report 'Early Childhood Education and Care: How to recruit, train and motivate well-qualified staff', which explores ways to address staff shortages in this sector and improve career opportunities. It complements the EU Quality Framework for early childhood education and care.</p>		<p>Announced: revision of the Barcelona targets</p> <p><a href="#">Strategy for the Rights of Persons with Disabilities 2021-2030</a></p> <p>Planned action: The Commission will by 2023 issue guidance recommending to the Member States improvements regarding independent living and inclusion in the community.</p>

<sup>217</sup> <https://www.consilium.europa.eu/en/press/press-releases/2021/06/14/access-to-key-services-for-children-in-need-council-agrees-european-child-guarantee/>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Finally, under the Strategy for the Rights of Persons with Disabilities 2021-2030, the Commission will take dedicated action to further promote independent living and inclusion in the community (see reply to paragraph 60 below).			
32)	78. Calls on the Member States to devote greater attention to older people, who are particularly vulnerable to viral infections, including COVID-19; calls on the Commission and the Member States to combat the isolation, neglect and social exclusion experienced by older people during the COVID-19 pandemic by promoting awareness-raising campaigns, conducting research, facilitating exchanges of views, and combining EU structural and investment funds; [...] Calls on the Commission to devise and adopt an EU charter for the rights of older people on the basis of Article 25 of the Charter;	The Commission is committed to ensuring the respect of Article 25 of the Charter, within the remit of its competences. At the same time, the Commission would like to point out that Article 6(1) of the Treaty of the European Union states that, “[t]he provisions of the Charter shall not extend in any way the competences of the Union as defined in the Treaties.” In this context, the Charter cannot serve as a legal basis for further EU rules (primary or secondary law) and the Commission has no competence to lay down general fundamental rights obligations.		No further/specific actions proposed/promised to be taken by the Commission.	
33)	84. Recognises the potential of older people, including farmers, to become the driving force of a vibrant silver economy in rural areas based on social innovation, inclusive rural communities and a healthier living environment; calls on the Commission to carefully study this potential when building its long-term vision for rural areas and active ageing;	Ageing of the rural population is of concern. The common agricultural policy addresses generational renewal of farmers in particular. Similarly, the Long Term Vision for Rural Areas identifies demography as one of the most impactful drivers for the future of rural areas and puts forward initiatives contributing to their revitalisation. It looks at rural communities as a whole, without a particular emphasis on older generations, which is specifically addressed in the Commission’s Green Paper on ageing.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Green Paper on ageing</a> , <a href="#">Long Term Vision for Rural Areas</a> ).	

4.1.13.10. EMPL Resolution 10: EP resolution of 16 September 2021 on fair working conditions, rights and social protection for platform workers - New forms of employment linked to digital development

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Fair working conditions, rights and social protection for platform workers - New forms of employment linked to digital development</b>	16/09/2021 <a href="#">T9-0385/2021</a> <a href="#">2019/2186(INI)</a> EMPL	N.A. <sup>218</sup>					
1)	5. Notes that cases of misclassification are most prevalent in digital labour platforms that strongly organise, directly or by means of an algorithm, the conditions and remuneration of platform work; Calls on the Commission, with the aim of facilitating the correct classification of platform workers, to introduce into its forthcoming proposal a rebuttable presumption of an employment relationship for platform workers, in accordance with national definitions as set out in Member States' respective legislation or collective agreements, combined with the reversal of the burden of proof and possibly additional measures; Stresses, therefore, that whenever platform workers dispute the classification of their employment status in legal proceedings before a court or administrative body according to national legislation and practices, it is for the party who is claimed to be the employer to prove that there is no employment relationship; Stresses that the rebuttable presumption of an employment relationship must not lead to an automatic classification of all platform workers as workers; Considers that the classification of workers should be						

<sup>218</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>based on the facts relating to the actual performance of work and criteria, in accordance with national legislation, and not on the parties' description of the relationship; Stresses that such a rebuttable presumption ensures that workers who are genuinely self-employed are able to remain so and can continue to access work through platforms; Further calls on the Commission to clarify that establishing a new EU so-called third status between worker and self-employed person cannot be considered, as it would not help to solve the current problems and risks further blurring already confused concepts, and to ensure that platform workers are either classified as workers or as self-employed persons, in accordance with national law;</p>				
2)	<p>8. Welcomes the Commission's intention to present a proposal for a legislative initiative to improve the working conditions of platform workers by the end of 2021, as announced in the European Pillar of Social Rights Action Plan and preceded by a two-stage consultation of the social partners; Calls on the Commission, if the social partners do not express the wish to initiate the process provided for in Article 155 of the TFEU, and on the basis of the conclusions of public consultations, to put forward a proposal for a directive on platform workers in order to guarantee rights for all platform workers, and to address the specificities of platform work to ensure fair and transparent working conditions, guarantee a healthy and safe working environment, give access to adequate and transparent social protection, as well as their right to organise, to establish, freely join and be represented by, inter alia, trade unions and negotiate collective agreements, access to training and skills, as well as ensuring data protection in line</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	with the GDPR and transparent, ethical and non-discriminatory algorithmic management, while also ensuring a level playing field in all Member States and creating a predictable and stable business environment that fosters investment and innovation;				
3)	9. Calls on the Commission to recognise the status of digital labour platforms either as employer, (temporary) employment agency or intermediary, linked to their sector of activity, in order to ensure all obligations a particular status entails, for, inter alia, social security contributions, responsibility for health and safety, liability for income tax payments, due diligence and corporate social responsibility are met and a level playing field with other companies active in the sector can be preserved;				
4)	12. Calls on the Commission, when exploring ways to improve working conditions to: – Ensure that collective bargaining frameworks function properly and efficiently; And – better implement the prohibition of exclusivity clauses, and ensure all platform workers are permitted to work for different platforms (multi-apping) and not be subject to adverse treatment for doing so, in line with the Directive on Transparent and Predictable Working Conditions; – Ensure the portability of certifications of competencies and foster the interoperability of ratings across platforms; – Improve rights in case of restriction, suspension or termination by the platform by ensuring all platform workers have the right to a prior reasoned statement, and, if this is disputed, a right of reply and to effective and impartial dispute resolution				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>providing the possibility to re-establish compliance or rebut the statement, also including group claims;</p> <p>– Address the current lack of transparency while observing trade secrets in accordance with Directive 2016/943<sup>219</sup>, in particular Recitals 13 and 18, and Articles 3 and 5 thereof, by ensuring the provision of essential information regarding working conditions and rules of cooperation, the method of calculating the price or fee, the assignment of tasks and transparency in the event of a change in the terms, conditions and procedures for temporary or permanent deactivation, if any, which should be preceded by consultation; believes that the aforementioned communication should be made in a clear, comprehensive and easily accessible manner, provided both to workers and their representatives in compliance with existing EU and national legislation on workers’ rights;</p> <p>– Where AI is used, ensure platforms are transparent about the way AI is used and the algorithmic parameters which influence working conditions, in particular with regard to task distribution, ratings and interactions, and the provision of intelligible and up-to-date information concerning the functioning of the algorithm in view of the way tasks are assigned, ratings are granted, the deactivation procedure and pricing; take account of the fact that algorithms must always have human oversight and that their decisions must be accountable, contestable and, where relevant, reversible;</p>				

<sup>219</sup> Directive (EU) 2016/943 of the European Parliament and of the Council of 8 June 2016 on the protection of undisclosed know-how and business information (trade secrets) against their unlawful acquisition, use and disclosure (OJ L 157, 15.6.2016, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	– Examine the possibility of creating in-platform, optional and easily accessible features allowing workers to privately and securely identify each other and communicate between themselves should they be interested in doing so;				
5)	13. Calls on the Commission to examine the extent to which existing Union rules are applicable to the digital labour platform market and ensure adequate implementation and enforcement; Calls on the Member States, in collaboration with social partners and other relevant stakeholders, to assess, in a proactive way and based on the logic of anticipation, the need to modernise existing legislation, including social security systems, so as to stay abreast of technological developments while ensuring workers' protection; Calls on the Commission and the Member States to coordinate social security systems with a view to ensuring the exportability of benefits and aggregation of periods in accordance with Union and national legislation;				
6)	16. Strongly believes that formal and effective coverage, adequacy and transparency of social protection systems should apply to all workers including the self-employed; calls on the Member States to fully and immediately implement Council Recommendation of 8 November 2019 on access to social protection for workers and the self-employed, and to take measures in order to ensure the social protection of platform workers; Calls on the Commission to scrutinise Member States' progress in this regard in the framework of the European Semester's country-specific recommendations;				
7)	18. [...] ; Calls on the Commission to address such impediments in its proposal; stresses the need for				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	platform workers and platforms to be properly organised and represented in order to facilitate social dialogue and collective bargaining;				
8)	20. [...] And urges the Commission to clarify that collective agreements fall outside the scope of competition law in order to ensure they can unionise and negotiate collectively, and to guarantee a better balance in bargaining power and a fairer internal market;				
9)	21. [...] Calls on the Commission to address platform workers' education and training in the forthcoming proposals on a European approach for micro-credentials and individual learning accounts; [...]				
10)	22. Underlines that digital competences are of the utmost importance; believes that investment in vocational education and lifelong learning is necessary in order to ensure that workers are equipped with the right skills for the digital age; Calls on the Member States to adapt their education and training systems to the digital labour market, with a view to promoting digital literacy and skills, as well as fostering entrepreneurship; highlights that the labour platform economy has so far developed mainly in urban areas; Calls on the Commission and the Member States to take action to combat the digital divide and ensure access to digital services for everyone;				
11)	25. Calls on the Commission and Member States to ensure appropriate protection of platform workers' rights and well-being, such as non-discrimination, privacy, autonomy and human dignity in the use of AI and algorithmic management, including prediction and flagging tools to predict behaviour,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	real-time monitoring of progress, performance- and time-tracking software, automated behavioural nudges and undue surveillance practices; Stresses that workers should always be informed and consulted prior to the use of such devices and practices; believes that the training of algorithm developers in ethical, transparency and anti-discriminatory issues should be encouraged;				
12)	26. Is concerned about the weak respect of intellectual property rights for the creative works of self-employed platform workers, and calls on the Commission and the Member States to tackle this problem and ensure the proper enforcement of applicable legislation;				
13)	28. Calls on the Commission and the Member States to ensure that waiting time and being available on the platform is considered as working time for platform workers in an employment relationship;				
14)	29. Recalls that all online platforms must ensure full compliance with EU legislation, including non-discrimination and data protection law; Stresses that platform workers, and with their agreement, their representatives, should have full access to all data concerning their own activities, understand how their personal information is processed, be informed on any classification or evaluation of the worker by the platform which may impact their terms of employment or working conditions and have the right to export their ratings; Calls on the Commission and the Member States to ensure that platform workers have the effective right to data portability, as enshrined in Articles 20 and 88 of the GDPR; [...]				

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	32. Calls on the Commission to ensure that platform workers and those in any similar form of employment, made possible by technological innovation, are included in the proposals for establishment of a European social security number (ESSN) and that fair mobility rules are applied to platform work in a non-discriminatory manner;					
16)	33. Recognises that the labour platform economy can be used for social purposes; Calls on the Commission and the Member States to promote social economy models in the labour platform economy and to exchange best practices in this regard, given that social enterprises have proven to be resilient during the COVID-19 crisis;					
17)	34. Recalls that a considerable number of platforms are working on implementing internal regulations and programmes in order to create a more secure environment for their workers and considers that such practices should be encouraged by EU and national actions in the field; Calls on the Commission to consider establishing a European quality label following a thorough impact assessment, which would be granted to platforms implementing good practices for platform workers in order for users, workers and consumers to make informed decisions, and which would highlight platforms with quality working conditions based on collective agreements and a high degree of transparency;					
18)	35. Notes that data pertaining to the quantity of platform workers, as well as their distribution by sector, is still fragmented; Calls on the Commission, with the collaboration of the Member States, to collect robust and comparable data on platform workers in order to get a more accurate idea of the

	scale of digital labour platform activity and deepen the knowledge of the working and employment conditions of platform workers, including social security coverage and income range;				
19)	37. Calls on the Member States to encourage innovative forms of platform work in compliance with Union and national legislation, and calls on the Commission to reflect quality working conditions in its upcoming legal framework and maintain flexibility while ensuring workers' rights;				
20)	39. At the same time, invites the Commission and the Member States to consider innovative, effective and socially beneficial cross-border solutions, ensuring social coverage and protection;				

## 4.1.13.11. EMPL Resolution 11: EP resolution of 20 October 2021 on employment and social policies of the euro area 2021

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Employment and social policies of the euro area 2021</b>	20/10/2021 <a href="#">T9-0426/2021</a> <a href="#">2021/2062(INI)</a> EMPL	N.A. <sup>220</sup>					
1)	1. [...] Calls on the Commission to ensure that the European Semester is aligned with these goals and strategies, thereby making the European Semester a truly comprehensive tool;						
2)	4. Welcomes EU leaders' commitment to the implementation of the EPSR and to the three new EU headline targets to be achieved by 2030; Calls on the Commission to ensure the timely and rigorous implementation of the EPSR Action Plan, through concrete steps and achievements, and to make sure that each proposal delivers and reaches its goal; [...]						
3)	5. Calls on the Commission to draw lessons from this crisis and work towards the implementation of an improved sustainable governance architecture in the EU based on solidarity, social justice and integration, fair distribution of wealth, gender equality, high-quality public services, including a public, universal and high-quality education system, quality employment and sustainable growth; Calls on the Commission, prior to taking the decision to deactivate the general escape clause, to consider not only an overall assessment of the state of the economy based on quantitative criteria, but also one that properly reflects underlying inequalities, as well						

<sup>220</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	as the employment, social and health situations of the Member States affected; believes that the review of the EU economic governance framework should preferably take place prior to the deactivation of the general escape clause;				
4)	7. Notes that the COVID-19 pandemic has affected the well-being of everyone in the EU, and vulnerable population groups in particular; Recalls that the President of the Commission has committed to placing sustainability, social inclusion and citizens' well-being at the heart of the EU economic strategy <sup>221</sup> ; Believes that this is essential to ensure that Europe remains home to the world's most advanced welfare systems, becomes the first climate-neutral continent and is a vibrant hub of innovation and competitive entrepreneurship; Recalls that social, economic and territorial inequalities among and within Member States have deepened in the last decade; Calls on the Commission to integrate social and environmental imbalances into its analysis in the framework of the Semester;				
5)	9. Acknowledges that access to essential services, such as water and energy, are critical to ensuring social inclusion and basic sanitary standards; calls for support measures to ensure inclusive and affordable access to essential services in the framework of the implementation of the EPSR Action Plan; Calls on the Commission and the Member States to come up with specific proposals to adequately address the problem of energy poverty in the context of our

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Green Deal objectives and to assess the energy markets in order to avoid the negative effects of rising energy prices on SME competitiveness and on households;				
6)	10. [...] Calls on the Commission and the Member States to take real measures to combat tax avoidance and tax fraud as an important means of reducing economic inequalities and improving the collection of tax revenue in the Member States;				
7)	11. [...] Calls on the Commission to integrate sustainability and well-being into the Annual Sustainable Growth Strategy and the country-specific recommendations (CSRs), and to give prominence to the social impact of EU policy measures in its impact assessment; [...]				
8)	18. Stresses that a policy orientation and governance approach which aim to put people and their well-being at the centre of policy and decision-making are vital to the future of the European Union; Demands that the Commission present a comprehensive proposal to this end, detailing a series of specific social, ecological, and economic objectives which should reflect the EU's relevant commitments, both international and internal, including those stemming from Parliament's resolution of 17 December 2020 on a strong social Europe for Just Transitions <sup>222</sup> , the UN SDGs, the Paris Agreement, the European Climate Law's objective of reaching greenhouse gas neutrality by 2050 and related intermediate targets, the European Charter of Fundamental Rights, the EPSR, and the commitment				

<sup>222</sup> Texts adopted, P9\_TA(2020)0371.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to eliminating poverty in Europe by 2050 by means of an EU anti-poverty law;				
9)	22. Urges the Commission and the Member States to ensure that trade unions have access to the workplace and the workers themselves, including where work is carried out digitally; Stresses the need to guarantee that all workers, including those in the digital economy, have the right to collective bargaining and to take collective action;				
10)	26. [...] Calls on the Commission and the Member States to maximise their efforts to invest in affordable, accessible, inclusive and high-quality VET, to reinforce upskilling and reskilling measures, including digital and transferable skills, and to promote lifelong learning to prepare workers for the needs of the labour market in the light of the green and digital transformations; underlines that the mutual recognition of qualifications is key to overcoming skills shortages and skills mismatches;				
11)	27. Welcomes the Commission's proposal on strengthening the application of the principle of equal pay for equal work or work of equal value between men and women through pay transparency and enforcement mechanisms; Welcomes the fact that this proposal introduces binding pay transparency measures; urges the swift adoption of these measures in order to prevent further gender-based inequalities; Calls on the Member States and the Commission to support entrepreneurship among women and to facilitate their access to financing [...]				
12)	31. Calls on the Commission and the Member States to use a specific system to monitor the creation of quality jobs in all sectors including those created				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	from public investment, which should also include a dedicated section on green and digital jobs and take account of the gender and non-discrimination perspective, and to agree on a system of quality and green job creation conditionalities for companies seeking to access EU public funds; [...]				
13)	32. [...] Calls on the Commission to present an EU regulatory framework aimed at strengthening and ensuring decent working conditions, rights and access to social protection for platform workers and non-standard workers;				
14)	33. Calls on the Commission to update its framework for the establishment and development of cooperatives and social economy enterprises, which by their very nature place a greater emphasis on fair working conditions and the empowerment of workers;				
15)	35. Is concerned about the serious social impact of the COVID-19 crisis and its consequences for employment, especially for young people; Calls on the Member States and the Commission to make sure that every young European has access to education, training and the labour market; Calls on the Member States and the Commission to prioritise the fight against youth unemployment, not least in the context of the NextGenerationEU recovery instrument, to make full use of financial instruments such as the Youth Guarantee and European programmes such as Erasmus+, and to take appropriate measures to tackle youth unemployment and improve the employability of young people;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	36. Underlines the importance of intra-EU labour mobility and stresses that the free movement of workers contributes to economic growth and cohesion in the Union and creates job opportunities; underlines, moreover, that labour mobility must go hand in hand with fair and common rules based on the principle of equal treatment; Calls on the Commission, in this regard, to monitor the implementation and enforcement of the rules on the free movement of workers; Calls on the Commission to analyse brain drains in certain regions and sectors and to support mobile workers by ensuring fair mobility and strengthening the portability of rights and entitlements; Calls on the Member States to fully commit to the digitalisation of public services in order to facilitate fair labour mobility, particularly with regard to the coordination of social security systems; Asks the Commission, therefore, to put forward an ambitious proposal for a digital EU Social Security Pass;				
17)	39. [...] Demands that the Commission be more ambitious in the social dimension and ensure coherence between the CSRs and the general and specific objectives of the RRF Regulation;				
18)	41. Stresses that one of the objectives of the RRF Regulation is to foster the creation of high-quality employment; Stresses that labour reforms included in the NRRPs have to contribute to improving quality employment; calls on the Commission to analyse labour reforms in the NRRPs on this specific issue; Recalls that Article 152 of the Treaty on the Functioning of the European Union provides that the Union recognises and promotes the role of the social partners at its level and must respect their				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	autonomy; Warns that the Commission should in no way interfere with national social dialogue processes undertaken in the framework of NRRP reforms;				
19)	42. Calls on the Commission to include the social indicators from the European Semester social scoreboard, in particular those related to decent work, social justice and equal opportunities, robust social welfare systems and fair mobility, in the common indicators to be used in the RRF for reporting on progress and monitoring and evaluating the NRRPs, as well as in the methodology for social tracking, including for the Child Guarantee and Youth Guarantee; [...]				
20)	45. [...] Calls on the Commission and the Member States, in the light of the Long-Term Care Report 2021, to implement reforms that 'address the common objectives of ensuring good-quality long-term care, accessible and affordable to all, delivered in a financially sustainable way'; [...]				
21)	46. Highlights that greater investment in health and social care including workers' wages, working conditions and training is essential to improve recruitment and job retention, and to ensure adequate staffing levels and needs-oriented services; Calls on the Commission and the Member States to ensure that a significant amount of investment in the NRRPs is dedicated to improving healthcare, including working conditions and staffing levels, to training needs and increasing key services, to consolidating the provision of basic care, and to supporting long-term care and other public social services; insists that the weaknesses identified in the stress tests of the health and social sectors be addressed through the NRRPs, the next EU				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	programme for health (EU4Health) and the CSRs on these sectors				
22)	47. Stresses that the investment gap for affordable housing amounts to EUR 57 billion per year; Calls on the Commission and the Member States to ensure that there is enough adequate and affordable social housing to cover the housing needs of the population and to reduce the housing cost overburden rate; Calls on the Commission to include this objective in the CSRs [...]; Urges the Commission to propose a comprehensive antipoverty strategy;				
23)	48. Recalls that the RRF Regulation provides that the mainstreaming of equal opportunities for all during the preparation and implementation of the NRRPs should be safeguarded, which is duly explained by rising inequalities in several EU Member States; Calls on the Commission to place particular emphasis on monitoring the implementation of the NRRPs to this end, with the aid of the relevant civil society organisations and equality bodies in the Member States;				

## 4.1.13.12. EMPL Resolution 12: EP resolution of 16 September 2021 on democracy at work: European framework for employees' participation rights and the revision of the European Works Council Directive

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Democracy at work: European framework for employees' participation rights and the revision of the European Works Council Directive</b>	16/9/2021 <a href="#">T9-0508/2021</a> <a href="#">2021/2005(INI)</a> EMPL	N.A. <sup>223</sup>			
1)	5. Calls on the Commission to respect the agreements between European social partners at both cross-industry and sectoral level, as laid down in the Treaties; Highlights that respect for European social partner agreements includes their implementation, at the joint request of the signatory parties, in matters covered by Article 153 TFEU, by means of a Council decision following a proposal from the Commission;				
2)	8 [...] Calls on the Commission, in the context of its forthcoming evaluation of Directive (EU) 2019/2121, to take account of the existence of good practices and the results of studies and assessments of the positive socioeconomic effects and consequences of employee representation in corporate bodies, while also amending existing directives affecting this issue, which can help improve corporate governance; Calls on the Commission to develop initiatives to raise awareness and improve knowledge of national and EU rules governing employee representation in corporate bodies in the various Member States and to foster exchanges of best practices,				

<sup>223</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	assessing the different forms of worker participation and the socioeconomic effects thereof;				
3)	9. [...] Calls on the Commission and on the Member States to take urgent and decisive actions to ensure that European companies respect workers' information, consultation and participation rights and that, accordingly, they comply with existing EU and national legal obligations;				
4)	10. Calls on the Commission to make the necessary improvements to the frameworks regulating SEs and European Cooperative Societies and, on the basis of a timely evaluation by the Commission, to the Company Law Package, and to amend them to introduce minimum EU rules governing employee participation and representation on supervisory boards, including on gender equality;				
5)	11. Calls on the Commission and the Member States to establish the necessary conditions and requirements to ensure that at least 80% of corporations in the EU are covered by sustainable corporate governance agreements by 2030 <sup>224</sup> , while also recognising the particular administrative burden associated therewith for SMEs; Calls, to this end, for the establishment of strategies agreed with workers to positively influence environmental, social and economic development through governance practices and market presence, to strengthen the role of directors in pursuing the long-term interests of their company, to improve directors' accountability towards				

<sup>224</sup> Commission staff working document of 4 March 2021 accompanying its European Pillar of Social Rights Action Plan (SWD(2021)0046).

<sup>226</sup> [https://www.europarl.europa.eu/ReqData/etudes/STUD/2020/662491/IPOL\\_STU\(2020\)662491\\_EN.pdf](https://www.europarl.europa.eu/ReqData/etudes/STUD/2020/662491/IPOL_STU(2020)662491_EN.pdf)

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	complement the activities of the Member States to protect workers in exercising their right to freedom of association and in participating in the workplace;					
8)	15. Calls on the Commission and the Member States, together with social partners, to commit to reaching collective bargaining coverage of 90% by 2030 in those national systems that combine statutory and social partner regulation of employment and working conditions;					
9)	16. Underlines that reforms in the Member States should not negatively affect collective bargaining, which needs to be promoted at sectoral level, including by supporting the capacity-building of social partners; Urges the Commission and the Member States to fully involve social partners in EU policy-making; Stresses that labour reforms at national level must contribute to the implementation of the EPSR, including Principle 8 on social dialogue and the involvement of workers, collective bargaining and respect for the autonomy of social partners and the rights to collective action and to be informed and consulted in good time on the transfer, restructuring and merging of undertakings, and on collective redundancies; Calls on the Commission to analyse labour reforms in the national recovery and resilience plans on these specific aspects;					
10)	25. Calls on the Commission to follow up on the priorities included in the EU Gender Equality Strategy 2020-2025 and, in particular, to ensure that the proposal for a directive on improving the gender balance among non-executive directors of					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	companies listed on stock exchanges and related measures is released in the Council;				
11)	26. Calls on the Commission, following its anticipated impact assessment and in consultation with social partners, to introduce a new framework directive on workers' information, consultation and participation for European companies, and for companies that use EU company mobility instruments, in order to establish minimum standards on issues such as anticipating change, including with regard to measures concerning climate change, digital transformation and restructuring, in particular at company level;				
12)	29. Highlights the need to raise awareness of EWCs among employee and management representatives; Stresses that EWCs are unique transnational bodies <sup>227</sup> set up for the purpose of informing and consulting employees and building and promoting corporate identity, and that they are affected by the level or intensity of industrial relations and policy frameworks; Regrets the fact that the financial, material and legal resources needed to enable EWCs to perform their duties in an appropriate manner are not always provided by central management; Calls on the Commission to explore the actions needed to improve workers' participation and better enforcement of the European Works Council Directive, and, if needed, to propose a revision of the directive with a view to strengthening the right of employee				

<sup>227</sup> <https://www.eurofound.europa.eu/observatories/eurwork/industrial-relations-dictionary/european-works-councils>: 'European works councils (EWCs) are standing bodies that facilitate the information and consultation of employees in European companies and European groups of companies, as required by the 1994 European Works Council Directive'.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	representatives to information and consultation, particularly during restructuring processes;				
13)	30. Calls on the Commission and the Member States to promote the strengthening of information and consultation rights to ensure that the EWC's opinion is taken into account in company decisions and is delivered before consultation is completed at the respective level and before the governing bodies come to a decision; Calls on the Commission, moreover, to strengthen enforcement mechanisms, on Member States to ensure effective access to justice for special negotiation bodies, and on EWCs to introduce effective, dissuasive and proportionate penalties in order to secure compliance, put an end, after more than 20 years, to exemptions for old, so-called voluntary pre-directive agreements, to aim to clarify the concept of the 'transnational character of a matter' in the context of the European Works Council Directive, to prevent the abuse of confidentiality rules as a means to limit access to information and effective participation, to strengthen the subsidiary requirements and to ensure the efficient coordination of information, consultation and participation at local, national and EU levels;				

#### 4.1.14. ENVI

Between July 2019 and December 2021, the **Committee on Environmental and Rural Development (ENVI)** was responsible for eight 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of nine Parliament's resolutions ('ENVI resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent seven written replies to the Parliament’s eight ENVI resolutions. In five cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other two replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one ENVI resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted one specific, two general and two mixed replies. The Commission has not replied with written follow-up documents to 50 of Parliament's 422 requests. At the cut-off date of this study, the Commission had not yet replied to 90 of Parliament’s 422 requests.

### Analysis of the Commission actions

The Commission proposed/promised 128 genuine actions. In 64 cases, no further specific actions were proposed/promised to be taken by the Commission and in 43 cases it remained unclear if an action was carried out. In 68 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 128 actions proposed/promised by the Commission, the Commission already carried out the action in 46 cases. In the 82 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.14.1. ENVI Resolution 1: EP resolution of 16 September 2020 on the EU's role in protecting and restoring the world's forests

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>The EU's role in protecting and restoring the world's forests</b>	16/09/2020 <a href="#">T9-0212/2020</a> <a href="#">2019/2156(INI)</a> <b>ENVI</b>	<a href="#">SP(2020)597</a>	Final reply (SP) received 11 February 2021	General reply			
1)	2. calls, therefore, on the Commission and the Member States to ensure, in line with the European Green Deal and the 2030 Biodiversity Strategy, the highest standards of environmental protection and greater consistency between the task of protecting and restoring forests both within the EU and in its external action;	No specific reply to this particular point.				Not mentioned.	
2)	8.Calls on the Commission to step up its efforts to address deforestation holistically through a coherent policy framework, while ensuring the conservation of ecosystems;	The Commission also recognizes the multi-functionality of forest and the need for an integrated approach. As part of the follow up to the Communication on 'Stepping up EU Action to Protect and Restore the World's Forest', the Commission is developing an integrated and holistic approach to forests in its international cooperation. It intends to propose to interested countries Forest Partnerships for bilateral cooperation, which will address climate change, biodiversity, governance (particularly human rights, education and institutional building), forest-related value chains (including creation of decent and sustainable jobs). These Forest Partnerships - to be financed by the Neighbourhood, Development and International Cooperation Instrument (NDICI) - will also aim to address the linkages between agriculture and deforestation and support partner countries in complying with the envisaged legislation that the EU plans to put in place to prevent EU-driven deforestation. [...] To better understand and monitor the potential climate and biodiversity risks, the Commission is assessing the				The Commission is working on an integrated and holistic approach to forests in its international cooperation.  The assessment of the EU and global biomass supply and demand and related sustainability seems to be	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>EU and global biomass supply and demand and related sustainability and will publish this by the end of 2020 as part of its increased ambition to protect and restore forests ecosystems.</p> <p>This will inform the Commission’s policy-making, including the review and revision, where necessary, of the level of ambition of the Renewable Energy Directive, the Emissions Trading Scheme, and the Regulation on land use, land use change and forestry (LULUCF) set for 2021.</p>		<p>an <a href="#">ongoing</a> long-term project for which the Commission’s Joint Research Centre is mandated.</p>	
3)	<p>9. calls on the Commission and Member States to recognise that the protection of native forests provides an outstanding climate mitigation benefit, deriving from the size and longevity of their ecosystem carbon stocks;</p>	<p>The Commission, in the Biodiversity Strategy for 2030, has underlined the need to define, map, monitor and strictly protect all the EU’s remaining primary and old-growth forests, especially because of their importance for climate mitigation and biodiversity. The new EU Forest Strategy will build on the biodiversity strategy, in line with the EU’s wider biodiversity and climate neutrality ambitions as enshrined in the European Green Deal.</p>		<p><a href="#">New EU Forest Strategy for 2030</a> published on 16 July 2021.</p>	
4)	<p>10. Calls on the Commission and the Member States to ensure effective implementation of existing priority areas, and to include binding targets for the protection and restoration of forest ecosystems, especially primary forests, as part of the EU’s future forest strategy, which should be fully consistent with the proposal outlined in the EU 2030 Biodiversity Strategy for binding targets on restoration and protected areas;</p>	<p>The Commission is also conducting a fitness check of the EUTR and the Forest Law Enforcement, Governance and Trade (FLEGT) Regulation, which should contribute to enhancing the implementation of these regulations, as requested by the Parliament, as well as to assess their strengths and weaknesses with view to inform the legislative proposal on deforestation.</p>		<p>Fitness check of the EUTR and FLEGT Regulation <a href="#">available</a>.</p> <p>Legislative proposal on deforestation-free products <a href="#">published</a> in November 2021.</p>	
5)	<p>12. calls on the Commission and the Member States to ensure full transparency and public participation in forest and land use-related measures in order to prevent deforestation and forest degradation, promote forest protection and sustainable forest management, and support the protection and</p>	<p>The Commission has worked intensively on improving market transparency in the sector. From 1 January 2021 onwards, Member States will start to communicate regularly prices of various protein crops, oilseeds, and protein products such as meals.</p>		<p>Because of a general character of the promise, it is unclear whether the Commission has delivered or not.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	restoration of natural forests, at regional and global levels;				
6)	13. Stresses the crucial role, rights and need for support of indigenous peoples and local communities, including women, in the protection of the world's forests and in the decision-making process concerning those forests; recognises, furthermore, the threats and human rights violations they are facing; calls on the Commission, therefore, to take their role into account and involve them in the design, adoption, implementation and enforcement of forest protection measures, whether at global, EU, national or sub-national level;	In all of its work, the EU will strengthen the links between biodiversity protection and human rights, gender, health, education, conflict sensitivity, the rights-based approach, land tenure and the role of indigenous peoples and local communities.		Because of a general character of the promise, it is unclear whether the Commission has delivered or not.	
7)	16. Recalls the importance of adequate access to justice, legal remedies and effective protection for whistleblowers in natural resource-exporting countries in order to ensure the efficiency of any legislation or initiative; calls on the Commission and the Member States to step up their support for environmental and forest defenders in the EU and worldwide;	No specific reply to this particular point.		Not mentioned.	
8)	18. Calls on the Commission, in developing any such actions and initiatives, to also consider how these can best contribute to the protection of other relevant natural ecosystems at serious risk of degradation or conversion;	No specific reply to this particular point.		Not mentioned.	
9)	19. Takes the view that a single definition of the concept of a deforestation-free supply chain is central to addressing the problem of commodities contributing to deforestation, and calls on the Commission to propose an ambitious definition;	A core task of the impact assessment and related legislative work of the Commission is to establish a definition of 'deforestation-free' that can be used to assess products and commodities sold in the EU, a task aligned with the request of the Parliament.		Legislative proposal on deforestation-free products <a href="#">published</a> in November 2021.	
10)	21. Calls on the Commission to carry out without delay studies on certification and verification schemes	The Commission is also conducting a study on certification schemes, in line with the request of the		<a href="#">Study</a> on certification schemes published in August 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	in the forest sector and for wood-based products and on certification schemes for non-deforestation commodities; invites the Commission to submit these studies to Parliament for further consideration, together with the proposed follow-up actions and measures so as to encourage more stringent standards and ensure the transparency of certification and third party verification schemes;	Parliament, whose results are expected to be ready in the first quarter of 2021.			
11)	<p>Reiterates its request to the Commission to present, without delay, an impact-assessed proposal for an EU legal framework based on due diligence, in order to ensure sustainable and deforestation-free supply chains for products and commodities placed on the EU market, with a particular focus on tackling the main drivers of imported deforestation;</p> <p>calls on the Commission to declare its support on the issue of the sustainability of supply chains, including deforestation and forest degradation, in the relevant international commodity trade forums;</p>	<p>In line with its Better regulation principles, the Commission is assessing a variety of options, including due diligence, but not limited to it, while also taking into account the experience gained with the implementation of existing legislation, such as the EUTR and the EU Regulation to prevent, deter and eliminate illegal, unreported and unregulated fishing (IUU Regulation).</p> <p>Regarding the request to ensure “sustainable and deforestation-free supply chains,” the Commission is currently working on an impact assessment, has launched an open public consultation and intends to present a legislative proposal in the first half of 2021, as also announced in the Commission Work Programme 2021<sup>7</sup>. The objective is to minimise the risk of deforestation or forest degradation associated with products placed on the European market, and to promote forest-friendly imports and value chains.</p>		<p>Impact assessment accompanying the legislative proposal on deforestation-free products <a href="#">published</a> in November 2021.</p> <p>Legislative proposal on deforestation-free products <a href="#">published</a> in November 2021.</p>	
12)	24. Calls on the Commission to come forward with due diligence requirements for financial institutions to identify, prevent and mitigate the environmental, social and human rights impacts of EU-driven deforestation in order to guarantee that no EU finance or banking entity is linked – either directly or	In line with its Better regulation principles, the Commission is assessing a variety of options, including due diligence, but not limited to it, while also taking into account the experience gained with the implementation of existing legislation, such as the EUTR and the EU		Because of a general character of the promise, it is unclear whether the Commission has delivered or not.

	indirectly – to deforestation, forest degradation, the conversion or degradation of natural ecosystems or human rights violations;	Regulation to prevent, deter and eliminate illegal, unreported and unregulated fishing (IUU Regulation).			
13)	26. Calls, at the same time, on the Commission to step up cooperation with the private sector and to develop appropriate instruments to incentivise frontrunners based on the principle of shared responsibility; invites the Commission to step up the quality and scope of non-financial disclosures, in particular on environmental aspects, and to promote the integration of forest-relevant considerations into corporate social responsibility;	The Commission is fully committed to implementing the FLEGT action plan and considers that FLEGT VPAs can bring benefits beyond legality, such as governance, human rights and private sector competitiveness.		Because of a general character of the promise, it is unclear whether the Commission has delivered or not.	
14)	27. Calls on the Commission to assess, together with the private sector and other development actors, new disaster risk finance and insurance solutions against catastrophic events affecting a large number of hectares of forest;	A legislative initiative on sustainable corporate governance, as announced in the Commission Work Programme 2021, for adoption during the first half of 2021, is meant to include possible duties for corporations and boards to ensure that human rights, social, climate and environmental considerations, including risks and impacts, are properly taken into account in the corporate strategy, decisions and oversight.		The Commission <a href="#">proposal</a> on sustainable corporate governance is still pending.	
15)	28. Calls on the Commission to support and stimulate industry-driven innovation and initiatives to enhance sustainability in value chains;	No specific reply to this particular point.		Not mentioned.	
16)	29. recalls that by 31 December 2021, the Commission should assess the provisions required to extend the scope of the Taxonomy Regulation <sup>8</sup> to economic activities that significantly harm environmental sustainability;	No specific reply to this particular point.		Not mentioned.	

<sup>8</sup> Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment (OJ L 198, 22.6.2020, p. 13).

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	30 Calls on the Commission and the Member States to make efficient use of blended finance mechanisms to attract private sector finance into forest restoration;		The Commission is fully committed to implementing the FLEGT action plan and considers that FLEGT VPAs can bring benefits beyond legality, such as governance, human rights and private sector competitiveness.		Because of a general character of the promise, it is unclear whether the Commission has delivered or not.	
18)	31. Calls on the Commission and the Member States to propose specific measures to strengthen the political and regulatory framework supporting the protection and restoration of forests and sustainable forest management at global level, and to provide guidance and specific measures on sustainable land-use planning  calls on the Commission to promote an exchange of best practices among the Member States and with third countries  calls on the Commission, furthermore, to encourage legal reform processes in producer countries to be carried out with the effective and meaningful participation of all stakeholders, including civil society, indigenous peoples and local communities, with special attention for the effective participation of women;		The Commission welcomes the Parliament's call to recognize competences, responsibility and funds available in the area of forest protection, including European forests as part of the world's forests, in the framework of EU environmental policy.		No further specific actions proposed to be taken by the Commission.	
19)	32. calls on the Commission to promote sustainable forestry and agriculture and to develop incentive mechanisms for small farmers and local communities in partner countries to maintain and improve ecosystem services and products obtained through sustainable forestry and agriculture;		No specific reply to this particular point (on incentives for small farmers).		Not mentioned.

	sustainable policies in return for commitments, to protect Europe's strong pharmaceutical industrial base and to encourage the industry to locate its operations in the EU, from the production of APIs to medicine manufacturing, packaging and distribution [...]	Based on evidence, the Commission will consider the actions necessary to attain the objective of resilient pharmaceutical supply chains and European health security, integrating the objectives of the Green Deal and stimulating research and innovation in manufacturing, taking account of the calls of European Parliament in paragraphs 20.		Because of a general character of the promise, it is unclear whether the Commission has delivered or not.	
11)	21. Urges the Commission and the Member States to put the right economic framework in place to secure and modernise existing manufacturing capabilities of medicines, technology and APIs in Europe, for example by rewarding investments in the quality of medicines and in the security of supply;	<p>The COVID-19 crises underlined a need for a strong manufacturing value chain in Europe. The Commission will address this issue under the Pharmaceutical Strategy for Europe.</p> <p>The Commission will consider the actions necessary to attain the objective of resilient pharmaceutical supply chains and European health security, integrating the objectives of the Green Deal and stimulating research and innovation in manufacturing, taking account of the calls of European Parliament in paragraphs 21.</p>		<a href="#">Pharmaceutical Strategy for Europe</a> adopted on 25 November 2020.	
12)	24 [...] calls on the Commission, the Member States and the EU's multilateral partners, in particular the WHO and WTO, to establish an international framework to ensure the quality and integrity of global supply chains in order to limit the use of damaging protectionist measures, while upholding the highest labour and environmental standards in production worldwide; calls on the Commission, in that context, to include measures in the new pharmaceutical strategy to cope with any disruption in the global supply chains; calls on the Commission to address the issues relating to the supply of medicines, including in the context of the forthcoming trade policy review;	The Commission sees synergies between the efforts to ensure resilient supply chains and trade policy [...]. The Commission is promoting an initiative within the World Trade Organisation (WTO) that would aim at facilitating trade in healthcare products including through enhanced disciplines on export restrictions. The initiative is also intended to contribute to an effective response to the current and future public health emergency. In addition, the Commission is exploring with EU's trading partners a possibility to conclude a plurilateral agreement on tariff elimination on pharmaceutical and medical goods in the WTO. WTO members who are not part of the WTO Pharmaceutical Tariff Elimination Agreement are encouraged to join it. At the same time, the Commission continues its efforts to promote the highest quality standards worldwide, in particular through the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH),		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Facilitation of trade in healthcare products).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		through multilateral cooperation in the area of inspections (PIC/S), but also through bilateral cooperation, within the context of mutual recognition agreements and, free trade agreements.			
13)	25. calls on the Commission to accelerate the revision of the blood, tissues and cells legislation (Directive 2002/98/EC <sup>16</sup> and Directive 2004/23/EC <sup>17</sup> ) in order to reduce the risk of shortages of these essential life-saving medicinal products;	No specific reply to this particular point.		Not mentioned.	
14)	26. [...] calls on the Commission and the Member States to ensure that MAHs and wholesale distributors comply with the requirements of Directive 2001/83/EC in order to ensure appropriate and continued supplies of medicines; calls on the Commission to further clarify the obligations for MAHs under Directive 2001/83/EC and highlights the need to ensure that they report medicine shortages within the established timeframes	Consolidated reply 6-26-67 the Commission has launched a study expected to be finalised in the third quarter of 2021 [...]. The findings will provide greater information on the points laid out in paragraph 26 to inform the optimum approach to address these issues.		The study providing on overview of medicines shortages was <a href="#">published</a> in December 2021.	
15)	27. Calls on the Commission and the Member States to consider the establishment of harmonised shortage prevention and management plans requiring producers to identify medicines of major therapeutic interest for which preventive and corrective measures should be taken in order to avoid or alleviate any disruption in supplies	The Commission agrees that national initiatives on stockpiling must be proportionate to requirements and not create unintended consequences in other Member States. The Commission has called <sup>18</sup> on Member States to establish overview on needs for medical supplies, national production capacities and stockpiles of essential		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Shortage prevention and management plans).	

<sup>16</sup> Directive 2002/98/EC of the European Parliament and of the Council of 27 January 2003 setting standards of quality and safety for the collection, testing, processing, storage and distribution of human blood and blood components (OJ L 33, 8.2.2003, p. 30).

<sup>17</sup> Directive 2004/23/EC of the European Parliament and of the Council of 31 March 2004 on setting standards of quality and safety for the donation, procurement, testing, processing, preservation, storage and distribution of human tissues and cells (OJ L 102, 7.4.2004, p. 48).

	which operate in the public interest to manufacture medicinal products of health and strategic importance for healthcare, in the absence of existing industrial production, in order to complete and guarantee security of supply and prevent possible shortages of medicines in cases of emergency;				
19)	31. Calls on the Commission to carefully evaluate the positive contribution that artificial intelligence could make to the fast and reliable delivery of medical supplies;	No specific reply to this particular point.		Not mentioned.	
20)	34. Calls on the Commission to take action against the spread of falsified medicines from unauthorised websites and vendors, which are presently raising concerns; considers that this practice can cause serious harm and lead to severe health problems or worsen the health conditions of EU citizens	The Commission will continue to monitor the implementation of the falsified medicines Directive and ensure distribution of genuine product in the legal supply chain in line with the call in paragraph 34.		It is unclear to what extent the Commission kept its promise.	
21)	38. Calls on the Commission to provide an environment where the research-based pharmaceutical industry is incentivised to develop affordable solutions for unmet medical needs, such as the fight against antimicrobial resistance; calls on the Commission to maintain a robust European intellectual property system under the forthcoming pharmaceutical strategy, in order to encourage R&D and manufacturing in Europe and ensure that Europe remains an innovator and world leader, and, ultimately, to protect and strengthen Europe's strategic autonomy in the field of public health;	Based on evidence, the Commission will consider the actions necessary to attain the objective of resilient pharmaceutical supply chains and European health security, integrating the objectives of the Green Deal and stimulating research and innovation in manufacturing, taking account of the calls of European Parliament in paragraph 38.		Because of a general character of the promise, it is unclear whether the Commission has delivered or not.	
22)	39. Urges the Commission to propose measures to incentivise the greater inclusion of EU small and medium-sized enterprises (SMEs) in the medicine supply chain, given their key role in research and innovation and their inherent ability to quickly	No specific reply to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	adapt their production focus with a view to coping better with unexpected shocks;				
23)	40. Calls on the Commission and the Member States to provide an environment that ensures that Europe continues to be an attractive location for R&D investment, in order to preserve an active and competitive research-based pharmaceutical industry underpinned by more investment in R&D capabilities and infrastructure, including universities, taking into account the fact that the EU remains by far the leading region in the world for the manufacture of active ingredients for patent medicines; calls on the Commission to provide adequate financial resources, under Horizon Europe and other EU programmes, to strengthen the Union's research and investment (R&I) activities supporting manufacturing in key industrial sectors including the pharmaceutical industry, while ensuring geographical balance and the participation of low-R&I-performing Member States in collaborative EU projects and programmes while upholding the principle of excellence;	Although the follow-up does not mention point 40, the Commission however declares that regarding calls for promotion of transparency of public investments for the R&D costs, including the need for burden of proof, further work (e.g. detailed guidelines on costing principles and methods) will be carried out in the context of the review of the Regulation on orphan medicinal products. <sup>20</sup>		Roadmap on the Inception Impact Assessment for the revision of the EU legislation on medicines for children and rare diseases was <a href="#">published</a> on 25 November 2020. Commission proposal for revision of both the Regulation on orphan medicinal products (referred to in the Commission follow-up to the EP resolution) and the Regulation on medicinal products for paediatric use is expected in Q1/2022.	
24)	42. Calls on the Commission to take stock of the impact of the coronavirus on industry and SMEs, and to present a renewed EU industrial strategy which would prioritise the twin digital and ecological transformation of our societies and the building of resilience to external shocks; urges the Commission to enable the Member States to make every necessary effort to ensure that small and medium-sized pharmaceutical companies continue or resume their research activities and help ensure	No specific reply to this particular point.		Not mentioned.	

<sup>20</sup> Regulation (EC) No 141/2000 of the European Parliament and of the Council of 16 December 1999 on orphan medicinal products

	Single Point of Contact (SPOC) and Industry Single Point of Contact (i-SPOC) systems;				
41)	70.[...] ;encourages the Commission, in this context, to make use of and implement the digital and telematics tools at pan-European level, and to consider amending the Variations Regulation <sup>26</sup> and the Variations Classification Guidelines; calls on the Commission and the Member States to set up an early warning system both at national and European level in order to reinforce the obligation to notify pharmaceutical companies of any interruption or tension in the supply of medicines;	No specific reply to this particular point.		Not mentioned.	
42)	75 [...] Calls on the Commission to assess the possibility to allow manufacturers, on a voluntary basis and at no additional burden for them, to introduce a system of labelling – which should be visible and identifiable by patients and customers – concerning the origin and place of production of medicinal products and active ingredients;	No specific reply to this particular point.		Not mentioned.	
43)	84. [...] ;calls on the Commission to monitor strictly the use of these arrangements, to ensure that patient safety is not compromised and to keep them available in the event of difficulties or shortages;	Although the follow-up does not mentions point 84, the Commission however mentions the mechanisms to link aggregated data with industry supply data are under review. As per the request in paragraph 109, this approach will allow the Commission, EMA and the national regulatory authorities to capitalise on all the pragmatic efforts made during the COVID-19 crisis, with a view to better mitigating the shortage of medicines.		It is unclear to what extent the Commission kept its promise.	

<sup>26</sup> Commission Regulation (EC) No 1234/2008 of 24 November 2008 concerning the examination of variations to the terms of marketing authorisations for medicinal products for human use and veterinary medicinal products (OJL 334, 12.12.2008, p. 7).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
44)	85.[...] calls on the Commission to propose a revision of that regulation to provide for the possibility to temporarily authorise the granting of compulsory licenses in the event of a health crisis in order to allow the production of generic versions of life-saving medicines; recalls that this is one of the public health flexibilities in the field of patent protection already included in the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), as further reaffirmed by the 2001 Doha Declaration; calls on the Commission to ensure that the implementation of the EU free trade agreements (FTAs) does not interfere with the possibilities of invoking flexibilities provided by the TRIPS Agreement and to provide guidance to Member States in order to encourage voluntary licencing over immediate compulsory licencing;	Although the follow-up does not mentions point 85, the Commission however declares exploring with EU's trading partners a possibility to conclude a plurilateral agreement on tariff elimination on pharmaceutical and medical goods in the WTO. WTO members who are not part of the WTO Pharmaceutical Tariff Elimination Agreement are encouraged to join it. At the same time, the Commission continues its efforts to promote the highest quality standards worldwide, in particular through the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH), through multilateral cooperation in the area of inspections (PIC/S), but also through bilateral cooperation, within the context of mutual recognition agreements and, free trade agreements.		It is unclear to what extent the Commission kept its promise.	
45)	86. [...] calls on the Commission to consider, in the context of its upcoming pharmaceutical strategy, the possibility for harmonised rules on granting compulsory licensing of medicinal products, such as vaccines, which would allow Member States to respond faster and more effectively to future European public health crises;	No specific reply to this particular point.		Not mentioned.	
46)	87. [...] Stresses that compulsory licensing schemes need to be part of wider EU action to address the issue of access to medicines; calls on the Commission to propose a European action plan in this regard;	Although the follow-up does not mentions point 87, the Commission however has launched a study expected in 2021. The study will assess the requirement for continuous supply for marketing authorisation holders and distributors and the obligations on pharmaceutical		The work on the study appears to be in progress.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		manufacturers to submit notifications of supply disruption provided for in the EU legislation <sup>27</sup> .			
47)	89. [...] urges the Commission to ensure that all final or intermediate medicinal products destined for the European market fulfil applicable European quality and safety standards, and are not counterfeit	Although the follow-up does not mentions point 89, the Commission however mentions that Europol works with international partners to cooperate on action against trafficking in counterfeit medicines.		It is unclear to what extent the Commission kept its promise.	
48)	91. Calls on the Commission and the Member States to ensure the swift and full implementation – and, if needed, revision – of the FDI Screening Regulation, in which healthcare should be included as a strategic sector	No specific reply to this particular point.		Not mentioned.	
49)	92. <i>Recalls that the COVID-19 crisis has tested the resilience of public health systems; takes the view that the introduction of stress tests to assess the resilience of public health systems in emergencies could help to identify structural risk factors and would provide an effective means of countering shortages in the event of pandemics; calls on the Commission and the Council, on the basis of the results of these tests, to draw up recommendations addressed to the Member States, in order to strengthen their health systems and to cover any essential needs that could arise in the event of a health emergency;</i>	Although the follow-up does not mentions point 92, the Commission however declares it has called <sup>28</sup> on Member States to establish overview on needs for medical supplies, national production capacities and stockpiles of essential medicines and medical devices (e.g. diagnostics) especially those use in hospitals and intensive care units.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Overview on needs for medical supplies, national production capacities and stockpiles of essential medicines and medical devices).	
50)	93. <i>Believes that EU healthcare systems need more common standards and better interoperability in order to avoid medicine shortages and provide quality healthcare for all in society; calls on the Commission, therefore, to propose a directive setting minimum</i>	Although the follow-up does not mentions point 93, the Commission however raises that the Commission continues its efforts to promote the highest quality standards worldwide.		It is unclear to what extent the Commission kept its promise.

	treatment for all citizens regardless of their place of residence;		opinion is expected on the use of public procurement in healthcare <sup>30</sup> .			
60)	118. Calls on the Commission to exercise global leadership to ensure that developing countries have guaranteed access to and supply of essential medicines, especially in emergencies;		No specific reply to this particular point.		Not mentioned.	

<sup>30</sup> See [https://ec.europa.eu/health/sites/health/files/expert\\_panel/docs/mandate\\_procurementhealthcare\\_en.pdf](https://ec.europa.eu/health/sites/health/files/expert_panel/docs/mandate_procurementhealthcare_en.pdf)

## 4.1.14.3. ENVI Resolution 3: EP resolution of 10 February 2021 on new Circular Economy Action Plan

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C	
New Circular Economy Action Plan	10/02/2021 <a href="#">T9-40/2021</a> <a href="#">2020/2077(INI)</a> ENVI	<a href="#">SP(2021)247</a> -	Final reply (SP) received 16 July 2021	Specific reply			
1)	2. Calls on the Commission to bring forward all the initiatives under the Action Plan in line with the dates set out in the Annex of the Communication and to base each legislative proposal on a comprehensive impact assessment, underlines the importance of taking into account also the costs of non-action;	<p>Although no specific reply provided for this particular point, the Commission declares that the European Green Deal (COM(2019) 640 final) considers that the transition to a circular economy is key to achieve a climate neutral economy by 2050 where economic growth is decoupled from resource use. With the new CEAP (COM (2020) 98 final), the Commission proposes a comprehensive agenda to change how Europe consumes and produces, building upon the implementation of the first action plan (COM (2015) 614). Circular Economy is also integrated in other European Green Deal's initiatives, such as the Farm to Fork Strategy (COM (2020) 381), the Biodiversity Strategy for 2030 (COM (2020)380 final), the Chemical Strategy for Sustainability towards a Toxic-Free Environment (COM (2020) 667), the Renovation Wave for Europe - greening our buildings, creating jobs, improving lives (COM (2020) 662) as well as the upcoming Zero Pollution Action Plan to be adopted this year. Their implementation will be crucial to achieve the transition towards a circular economy at EU and national level. The engagement of Member States is also central.</p> <p>The Commission will take this resolution duly into account in the implementation of the action plan. The Resolution requests the Commission to consider a number of specific points. The Commission's reply to these points is set out below and preceded by the numbers of the relevant paragraphs of the Resolution.</p>			The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	4. [...] therefore urges the Commission and the Member States to direct investments in order to scale up circular economy initiatives and support innovation; [...]	The Commission considers that circular economy is an essential element to ensure a resilient and sustainable recovery. The Commission encourages the Member States to reap the benefits of NextGenerationEU and the new Recovery and Resilience Regulation and to ensure that circular economy projects feature high in their National Recovery Plans. The Commission will also make use of programmes under the Multiannual Financial Framework (Horizon Europe, Cohesion Policy, InvestEU, ect.) to support circular economy activities and business models.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">NextGenerationEU</a> and <a href="#">Recovery and Resilience Regulation</a> ).	
3)	6. [...]; calls on the Commission to propose science-based binding EU mid-term and long-term targets for the reduction in the use of primary raw materials and environmental impacts; [...]	The Commission considers that the CEAP's initiatives will contribute to achieving the long-term vision of keeping EU's resource consumption within planetary boundaries and to strive to reduce EU's consumption footprint and double its circular material use rate in the coming decade (by 2030).		The Commission adopted a <a href="#">new circular economy action plan (CEAP)</a> in March 2020. The Commission will implement all 35 actions listed in the action plan. The full list of actions can be found in the <a href="#">implementation tracking table</a> .	
4)	7. Calls on the Commission to propose binding EU targets for 2030 to significantly reduce the EU material and consumption footprints and bring them within planetary boundaries by 2050, using the indicators to be adopted by end of 2021 as part of the updated monitoring framework; calls on the Commission to build on the examples set by the most ambitious Member States while taking due account of differences in starting points and capabilities between the Member States;	The Commission considers that the CEAP's initiatives will contribute to achieving the long-term vision of keeping EU's resource consumption within planetary boundaries and to strive to reduce EU's consumption footprint and double its circular material use rate in the coming decade (by 2030).		The Commission adopted a <a href="#">new circular economy action plan (CEAP)</a> in March 2020. The Commission will implement all 35 actions listed in the action plan. The full list of actions can be found in the <a href="#">implementation tracking table</a> .	
5)	8. Urges the Commission to introduce by 2021 harmonised, comparable and uniform circularity indicators, consisting of material footprint and consumption footprint indicators, as well as a number of sub-indicators on resource efficiency and ecosystem services; [...]	The Commission will revise the monitoring framework of indicators, adopted in 2018, in order to include new indicators that will take account of the interlinkages between circularity, climate neutrality and the zero pollution ambition as well as the focus areas of the action plan (e.g. textiles).		The Commission adopted a <a href="#">new circular economy action plan (CEAP)</a> in March 2020. The Commission will implement all 35 actions listed in the action plan. The full list of actions can be found in the <a href="#">implementation tracking table</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>In this context, the Commission will further develop indicators on resource use, including consumption and material footprints to account for material consumption and environmental impacts associated to our production and consumption.</p>			
6)	<p>11. Highlights the opportunities that lie in the optimised use of products and services, in addition to measures that extend life-cycles and material use; in this context, stresses in particular the opportunities to combine circular economy solutions and digitalisation; calls on the Commission and the Member States to develop policies to support new sustainable and circular business models, such as product-as-a-service (PaaS) approaches that save resources and reduce environmental impacts while ensuring protection for consumers invites the Commission to facilitate such PaaS approaches in the new Sustainable Products Initiative and calls on the Commission and Member States to remove undue regulatory and fiscal barriers to them and promote the development of infrastructures that enable circularity and a sustainable digital economy; recalls that digitalisation also has considerable climate and environmental impacts, such as a growing energy demand, raw material extraction and the generation of electronic waste; calls on the Commission to assess and address these challenges by establishing a methodology for monitoring and quantifying the environmental impact of digital technologies, structures and services including data centres, and by proposing measures - including where appropriate legislative measures - to ensure the environmental sustainability of digital solutions putting energy efficiency, reduction of GHG emissions and</p>	<p>The Commission aims to present by the end of 2021 a Sustainable Products Policy legislative Initiative, which will have at its core the broadening of the scope of the Ecodesign Directive, beyond energy-related products so as to make the Ecodesign framework applicable to the broadest possible range of products and make it deliver on circularity, and which also include complementary legislative proposals as necessary to deliver on the commitments made in the CEAP.</p> <p>The initiative will regulate, among other things product durability, reusability, upgradability and reparability, reduce carbon and environmental footprints, address the presence of hazardous chemicals in products and increase their recycled content in products.</p> <p>In line with the CEAP, it will also foresee measures to ban the destruction of unsold durable goods, restrict single-use and counter premature obsolescence as well as foresee incentives for product-as-a-service or other models where producers keep the ownership of the product or the responsibility for its performance throughout its lifecycle.</p> <p>No specific reply is provided to the issues of removing regulatory and fiscal barriers.</p>		<p>The Commission is working on a legislative proposal, <a href="#">Sustainable Products Policy Initiative</a>, which will be published in the first quarter of 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	resource use and the establishment of a circular economy at the centre of a sustainable digital transition;				
7)	12. Calls on the Commission to identify regulatory measures and other actions that would be needed to remove the administrative and legal obstacles to a circular sharing and service economy and to incentivise its development; in particular calls on the Commission to explore solutions to challenges such as liability issues and ownership rights related to the sharing and service economy, keeping in mind that improved legal certainty both for producers and consumers is vital to enable these concepts; [...]	No specific reply is provided to this particular point (liability issues and ownership rights).		Not mentioned.	
8)	18. Calls on the Commission to establish a regulatory framework for certification of all nature-based and technological carbon removal solutions, including carbon capture and storage and utilization (CCSU);	As regards of nature-based and technological carbon removals solutions, including solutions relying on technologies for carbon capture and utilization or storage, the Commission will assess the various options for the certification of carbon removals and propose by 2023 a regulatory framework based on robust and transparent accounting to monitor and verify the authenticity of carbon removals.		The Commission is working on a <a href="#">legislative proposal for carbon removal certification</a> expected in the final quarter of 2022.	
9)	23. Strongly endorses the broadening of the scope of the Ecodesign Directive <sup>31</sup> to include non-energy-related products and set horizontal sustainability principles and product-specific standards for performance, durability, reusability, reparability, non-toxicity, upgradability, recyclability, recycled content, and resource and energy efficiency in products placed on the EU	The Commission aims to present by the end of 2021 a Sustainable Products Policy legislative Initiative, which will have at its core the broadening of the scope of the Ecodesign Directive, beyond energy-related products so as to make the Ecodesign framework applicable to the broadest possible range of products and make it deliver on circularity, and which also include complementary		The Commission is working on a legislative proposal, <a href="#">Sustainable Products Policy Initiative</a> , which will be published in the first quarter of 2022.	

<sup>31</sup> Directive 2009/125/EC of the European Parliament and of the Council of 21 October 2009 establishing a framework for the setting of ecodesign requirements for energy-related products (OJ L 285, 31.10.2009, p. 10).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	market, and invites the Commission to present a proposal for this in 2021; at the same time, reiterates its call on the Commission to be ambitious in the implementation of ecodesign for all energy-using products under the current scope of the Ecodesign Directive, including with regard to circular economy aspects;	legislative proposals as necessary to deliver on the commitments made in the CEAP.			
10)	25. Calls on the Commission to propose binding material and environmental footprint targets for the whole product lifecycle for each product category placed on the EU market, including the most carbon-intensive semi-products; also calls on the Commission to propose product-specific and/or sector-specific binding targets for recycled content, while ensuring the performance and safety of the products concerned and that they are designed for recycling; urges the Commission to establish supporting technological, regulatory and market conditions to achieve these objectives and to take into account the required industrial changes and the investment cycles in each sector; at the same time, urges the Commission to consider mandatory requirements to increase the sustainability of services;	The Commission aims to present by the end of 2021 a Sustainable Products Policy legislative Initiative, which will have at its core the broadening of the scope of the Ecodesign Directive, beyond energy-related products so as to make the Ecodesign framework applicable to the broadest possible range of products and make it deliver on circularity, and which also include complementary legislative proposals as necessary to deliver on the commitments made in the CEAP. The initiative will regulate, among other things product durability, reusability, upgradability and reparability, reduce carbon and environmental footprints, address the presence of hazardous chemicals in products and increase their recycled content in products. In line with the CEAP, it will also foresee measures to ban the destruction of unsold durable goods, restrict single-use and counter premature obsolescence as well as foresee incentives for product-as-a-service or other models where producers keep the ownership of the product or the responsibility for its performance throughout its lifecycle.		The Commission is working on a legislative proposal, <a href="#">Sustainable Products Policy Initiative</a> , which will be published in the first quarter of 2022.	
11)	26. Supports the plan to introduce digital product passports in order to help companies, consumers and market surveillance authorities, to keep track of a product's climate, environmental, social and other impacts throughout the value chain and provide reliable, transparent and easily accessible information about the durability of the product	The Commission aims to present by the end of 2021 a Sustainable Products Policy legislative Initiative, which will have at its core the broadening of the scope of the Ecodesign Directive, beyond energy-related products so as to make the Ecodesign framework applicable to the broadest possible range of products and make it deliver on circularity, and which also include complementary		The Commission is working on a legislative proposal, <a href="#">Sustainable Products Policy Initiative</a> , which will be published in the first quarter of 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and its maintenance, reuse, repair and dismantling possibilities and end-of-life handling as well as its composition in terms of materials and chemicals used and their environmental and other impacts; calls on the Commission to assess the options for a label in this regard; considers that the product passports should be introduced in a way that avoids undue regulatory burden for companies in particular SMEs; [...]	legislative proposals as necessary to deliver on the commitments made in the CEAP. [...] Digital product passport will be an integral part of the Sustainable Product Policy legislative Initiative aiming to improve business and consumer access to information on product characteristics.			
12)	29. Calls on the Commission to support the development of digital tools for consumer information to empower the consumer in the digital age; [...]	No specific reply is provided to this particular point (on development of digital tools).		Not mentioned.	
13)	33. [...] ; asks the Commission, when preparing its review of Directive (EU) 2019/771 <sup>32</sup> , to consider extending both the legal guarantee rights and the reversed burden of proof rules for some product categories that have a higher estimated lifetime, and introducing direct producer liability;	The Commission is preparing a legislative proposal on empowering consumers in the green transition. The ambition of this proposal is to improve consumer information on environmental aspects such as durability and reparability of products. The Commission is also exploring the feasibility of measures strengthening the existing consumer rules in the areas of obsolescence and greenwashing (including non-transparency logos) that may include amending Annex I of the Unfair Commercial Practices Directive. In addition, the Commission is also working on a legislative initiative to substantiate green claims according to Product and Organisation Environmental Footprint methods.  The articulation of ongoing initiatives aimed at improving the reparability of products (latest implementing measures in the context of the Ecodesign Directive, which entered into force in March 2021 and upcoming work in the		The Commission is working on a legislative proposal on <a href="#">environmental performance of products &amp; businesses</a> , expected in Q1 of 2022.  The Commission is working on a legislative proposal on <a href="#">empowering consumers in the green transition</a> , expected in Q1 2022.  As announced in the <a href="#">New Consumer Agenda of November 2020</a> , the Commission will update the guidance documents on the Unfair Commercial Practices Directive and the <a href="#">Consumer Rights Directive</a> by 2022.	

<sup>32</sup> Directive (EU) 2019/771 of the European Parliament and of the Council of 20 May 2019 on certain aspects concerning contracts for the sale of goods, amending Regulation (EU) 2017/2394 and Directive 2009/22/EC, and repealing Directive 1999/44/EC (OJ L 136, 22.5.2019, p. 28).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Sustainable Products Initiative) and providing better information to consumers, including on their reparability will support the implementation of the right to repair. Concerning the access to repair services, Member States are already obliged, under the new provisions of Directive 2008/98/EC on waste to be transposed by mid-2020, to take the necessary measures to encourage the availability of spare parts, instruction manuals, technical information, or other instruments, equipment or software enabling the repair and re-use of products.</p> <p>As regards of the review of the Directive 2019/771/EU (Sale of Goods Directive – SGD), it should be noted that this Directive is currently being transposed into national laws. Member States can already on the basis of the SGD decide to extend periods of both the legal guarantee (beyond minimum 2 years) and the reversal of the burden of proof (from 1 year to 2 years) periods. The SGD, as a horizontal instrument, applies to all products. Setting different rules depending on the lifetime of specific product categories would create legal uncertainty and practical difficulties for all parties in the supply chain to manage such a complicated legal framework.</p> <p>As announced in the New Consumer Agenda, the Commission will examine what more can be done to promote repair, and encourage more sustainable products in the context of the SGD review. For example, the Commission might look at various options regarding consumer remedies, such as giving preference to repair over replacement, extending the minimum liability period for new or second-hand goods or restarting a new liability period after repair.</p>		<p>The Commission is working on a legislative proposal, <a href="#">Sustainable Products Policy Initiative</a>, which will be published in the first quarter of 2022.</p>	
12)	38. Urges the Commission to come forward with a legislative proposal to green public procurement procedures; [...] ; also asks the Commission to	Although no specific reply provided for this particular point, the Commission states in the follow-up that as stated in the action plan, the Commission, when preparing sectorial initiatives, will propose minimum mandatory		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	provide guidelines to support sustainable corporate procurement; [...]	<p>green public procurement (GPP) criteria and targets. The Commission will explore the feasibility of introducing this type of criteria in the upcoming initiatives in key value chains. For instance, the Commission proposal for a new legislative framework for batteries, adopted in December 2020, includes a provision to establish such mandatory green public procurement criteria. Some of the other sector and initiatives possibly concerned are the revision of the packaging and packaging waste Directive, the review of the energy efficiency Directive and the new legislative framework for sustainable food systems.</p> <p>The Commission is also exploring how to phase in compulsory reporting to monitor the uptake of GPP without creating unjustified administrative burden for public buyers.</p>			
13)	40. Urges the Commission and the Member States to support the development of high-quality collection, sorting and material reuse and recycling infrastructures, and to support research into the development of new innovative technologies that minimise resource use and residual waste generation, enhance the yield and quality of recyclable and reusable secondary materials, decontaminate recyclates, and reduce the overall environmental footprint - including energy and climate footprints - in relation to other technologies; [...]	No specific reply is provided to this particular point.		Not mentioned.	
14)	41. Calls on the Commission to ensure that the health, environmental and climate impacts of processes and outputs of new recycling and recovery technologies are thoroughly evaluated at the industrial level prior to their incentivisation, and to guarantee transparency throughout the evaluation;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	42. Considers that chemical recycling needs to fulfil the definition of recycling pursuant to the Waste Framework Directive to ensure that the reprocessing into materials and substances that are to be used as fuels is not considered to be chemical recycling; urges the Commission to provide legal confirmation in this regard;	On chemical recycling, the Commission will continue to support innovation through Horizon Europe based on real life cycle assessment of impacts of the various chemical processing approaches and a robust traceability measurement of the inputs and outputs of these processes. The Commission notes that the EU rules do not allow counting waste as recycled if after/ during its processing it is used as fuel.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	
16)	43. Urges the Commission and the Member States to enable digital technologies, such as blockchain and digital watermarking, and make them interoperable so that they can support the development of the circular economy through the tracking, tracing and mapping of resource use and product flows through all stages of the life cycle;	Although the follow-up does not mention point 53, the Commission however states that it will mobilise the necessary funding to ensure industry and SMEs' (small and medium sized enterprises) engagement in the transition towards a circular economy and to unleash the opportunities of digitalisation.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	
17)	44. Emphasises the importance of improving access to funds for research and innovation projects on the circular economy; therefore calls on the Commission to steer the activities of the Horizon Europe programme towards supporting research and innovation for:  –recycling processes and technologies; –the resource efficiency of industrial processes; –innovative and sustainable materials, products, processes, technologies and services, as well as their industrial scale-up; –the bioeconomy, through bio-based innovation encompassing the development of bio-based materials and products; –earth observation satellites, as they can play an important role in monitoring the development of a	The Commission will continue supporting the transition towards a circular and sustainable bioeconomy via research and innovation in circular bio-based materials and products through Horizon Europe. On chemical recycling, the Commission will continue to support innovation through Horizon Europe based on real life cycle assessment of impacts of the various chemical processing approaches and a robust traceability measurement of the inputs and outputs of these processes.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	circular economy by evaluating the pressure on virgin raw materials and emissions levels;				
18)	50. Recalls the Commission communication of 1 June 2016 entitled 'European Standards for the 21st century' and the work carried out on the Joint Initiative on Standardisation (JIS); calls on the Commission to further strengthen the JIS and to adopt new actions and projects aiming to improve the functioning of the European Standardisation Organisations;	The Commission is engaged in a close dialogue with the European Standardisation Organisations and other stakeholders on actions and projects aimed at continuously improving the European Standardisation System and its responsiveness to EU policy priorities.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	
19)	52. [...] ; reiterates its call on the Commission to implement as a matter of urgency the provisions of Directive 2014/53/EU <sup>33</sup> on radio equipment, and in particular, to introduce a common charger for smartphones and all small and medium-sized electronic devices to best ensure standardisation, compatibility and interoperability of charging capabilities, including wireless charging, as part of global strategy to reduce electronic waste; asks the Commission to prepare, in a timely manner, a decoupling strategy that ensures consumers are not obliged to buy new chargers with new devices to allow for greater environmental benefits, cost savings and convenience for consumers; reiterates the importance for consumers of receiving, through harmonised labelling in an easy-to-read format, trustworthy and relevant information about relevant features of chargers such as interoperability and charging performance, including compliance with USB 3.1 or higher, to	The Commission is preparing a legislative proposal for adoption in July 2021. Possible elements of the proposal, which are currently being considered, are: the harmonisation of the charging interface (receptacle) on the device-end side (mobile phones and possibly other portable electronic devices); interoperability of the communication protocols; and unbundling of the charger (selling the charger separately from the electronic device). The proposal would aim at reducing the environmental impact due to the use of multiple chargers and enhancing consumers' convenience.		In September 2021, the Commission published a <a href="#">proposal</a> for a directive of the European Parliament and of the Council amending Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment.	

<sup>33</sup> Directive 2014/53/EU of the European Parliament and of the Council of 16 April 2014 on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC (OJ L 153, 22.5.2014, p. 62).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	enable them to make the most convenient, cost-efficient and sustainable choices;				
20)	53. [...] calls on the Commission to address any possible existing regulatory inconsistencies or barriers or legal uncertainties that hamper the full deployment of a circular economy; [...] ; furthermore, calls on the Commission to focus on the implementation of the legislation related to the circular economy to ensure a level playing field for circular production processes and business models;	<p>Although the follow-up does not mentions par.53, the Commission however states that it continues implementing the EU Strategy for Plastics in a Circular Economy (COM (2018) 028). The Commission is already working on measures to restrict the use of intentionally added microplastics in products (through a REACH restriction file) and to tackle unintentional emissions for example from textiles and tyre abrasion and from primary plastic production i.e. pellets.</p> <p>[...]</p> <p>The Commission will also present a proposal to review the various legislative rules on cars and waste cars to bring them into line with the circular economy principles, in particular by giving first priority to prevention of waste, by addressing the design of cars and availability of information about the parts and materials used in cars to repair, by promoting recycled content in new cars, by increasing the recycling ambition and improving enforcement.</p>		<p>The Commission is working on a legislative initiative on <a href="#">Microplastics pollution – measures to reduce its impact on the environment</a>. This is expected in the last quarter of 2022.</p> <p>The Commission is working on a revision of the <a href="#">End-of-life Vehicles Directive and the Directive on the Type Approval of Motor Vehicles</a>. This is expected in the last quarter of 2022.</p>	
21)	57. [...] and calls on the Commission to investigate the possibility of providing consumer information on the distinction between corrective and user-driven updates and the carbon impact of data consumption;	No specific reply is provided to this particular point (on investigating the possibility of providing consumer information on the distinction between corrective and user-driven updates and the carbon impact of data consumption).		Not mentioned.	
22)	63. [...] ; requests the Commission to assess options for a viable legislative framework to ensure the ethical sourcing of materials and the introduction of a mandatory due-diligence legislation to	No specific reply is provided to this particular point (on assessing options for a viable legislative framework to ensure the ethical sourcing of materials and the introduction of a mandatory due-diligence legislation to		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	address adverse environmental and human rights effects within an international context;	address adverse environmental and human rights effects within an international context).			
23)	64. Welcomes the Commissions plans to review the End of Life Vehicles Directive <sup>34</sup> ; Calls on the Commission to update that Directive to fully reflect and respect the principles of circular economy, including designing out waste, upgradability, modularity, reparability, reusability, and recyclability of the materials in the highest level of the value, giving the first priority on reuse: calls on the Commission to work to ensure effective reuse chains, with car manufacturers and extended producer liability schemes; Calls on the Commission to improve the reporting of end-of-life vehicles, through a European database; calls on the Commission to clarify, fortify and supervise the principle that dismantling of the car and reuse of the parts must always precede the scrapping and shredding of cars;	The Commission presented a proposal for a Regulation for batteries in December 2020 that addresses the areas highlighted by the resolution. The Commission will also present a proposal to review the various legislative rules on cars and waste cars to bring them into line with the circular economy principles, in particular, by giving first priority to prevention of waste, by addressing the design of cars and availability of information about the parts and materials used in cars to repair, by promoting recycled content in new cars, by increasing the recycling ambition and improving enforcement. The Commission will propose rules on the sustainable treatment of waste oils in the context of the broad review of the Waste Framework Directive in 2023.		The Commission is working on a revision of the <a href="#">End-of-life Vehicles Directive and the Directive on the Type Approval of Motor Vehicles</a> . This is expected in the last quarter of 2022.	
24)	66. [...] calls for the Commission to present a legislative proposal without delay, including waste reduction measures and targets and ambitious essential requirements in the Packaging Waste Directive to reduce excessive packaging, including in e-commerce, improve recyclability and minimise the complexity of packaging, increase recycled content, phase out hazardous and harmful substances, and promote reuse; [...]	The Commission will propose a revision of Directive 94/62/EC on packaging on packaging waste by strengthening the essential requirements for packaging and bringing them in line with the waste hierarchy to ensure that all packaging is reusable or recyclable in an economically viable way by 2030 while respecting the objectives on food waste prevention, food safety or hygiene. This revision will also propose measures to prevent packaging waste, including by setting targets. The Commission is also committed to support the Member States in the attainment of the separate collection objectives on single use plastic bottles by sharing and		The Commission is working on a revision of <a href="#">Directive 94/62/EC on packaging on packaging waste</a> , expected in the third quarter of 2022.	

<sup>34</sup> Directive 2000/53/EC of the European Parliament and of the Council of 18 September 2000 on end-of life vehicles (OJ L 269, 21.10.2000, p.34).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		promoting best practices, including on the deposit refund systems.			
25)	69. Calls on the Commission to analyse various types of packaging used in e-commerce to determine best practices in optimising packaging to reduce over-packaging; calls on the Commission to endorse re-use of the packaging materials to deliver several items as an alternative to single-use packaging materials;	Although no specific reply provided to this particular reply nevertheless the Commission states that (66) it will propose a revision of Directive 94/62/EC on packaging waste by strengthening the essential requirements for packaging and bringing them in line with the waste hierarchy to ensure that all packaging is reusable or recyclable in an economically viable way by 2030 while respecting the objectives on food waste prevention, food safety or hygiene. This revision will also propose measures to prevent packaging waste, including by setting targets. The Commission is also committed to support the Member States in the attainment of the separate collection objectives on single use plastic bottles by sharing and promoting best practices, including on the deposit refund systems.		The Commission is working on a revision of <a href="#">Directive 94/62/EC</a> on packaging waste, expected in the third quarter of 2022.	
26)	70. Stresses the major role that bulk sales can play in reducing the use of packaging, and calls on the Commission and Member States to encourage this type of measure while ensuring food safety and hygiene;	Although no specific reply provided to this particular point 70, the Commission however declares that the Commission will propose a revision of Directive 94/62/EC on packaging waste by strengthening the essential requirements for packaging and bringing them in line with the waste hierarchy to ensure that all packaging is reusable or recyclable in an economically viable way by 2030 while respecting the objectives on food waste prevention, food safety or hygiene. This revision will also propose measures to prevent packaging waste, including by setting targets. The Commission is also committed to support the Member States in the attainment of the separate collection objectives on single use plastic bottles by sharing and promoting best practices, including on the deposit refund systems.		The Commission is working on a revision of <a href="#">Directive 94/62/EC</a> on packaging waste, expected in the third quarter of 2022.	
27)	72. [...] ; urges the Commission to take measures to ascertain that all online sellers, regardless of their	No specific reply is provided to this particular point (on online sellers).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	location, comply with the essential requirements and report and contribute financially to the EPR systems in the EU Member States where the products are placed on the market;				
28)	73. Calls on the Commission to support the separate collection and sorting of packaging waste as enshrined in Directive (EU) 2018/852 and ensure its timely transposition by Member States; calls on the Commission to assess the possibility to revise the identification system for packaging materials (Decision 97/129/EC <sup>35</sup> ) to facilitate separate collection for citizens according to the recyclability of packaging;	Although the follow-up does not mention par.73, the Commission states it is committed to support the Member States in the implementation of the separate collection systems for bio-waste and scaling up recycling that generates high quality compost, in particular, by providing financial support and technical assistance by sharing of best practices.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	
29)	74. Calls on the Commission to support and explore the potentials for compatible national deposit return schemes to reach the needed collection rate of 90 % of plastic beverage containers and as a step towards establishing a single market for packaging, especially for neighbouring Member States. [...]	No specific reply is provided to this particular point (on national deposit return scheme).		Not mentioned.	
30)	75. Urges the Commission to continue its implementation of the European Strategy for Plastics in a Circular Economy, notably in driving better design, circular business models and innovative products and product-as-a-service approaches that offer more sustainable consumption patterns;	The Commission continues implementing the EU Strategy for Plastics in a Circular Economy (COM (2018) 028).		No further specific actions proposed/promised to be taken by the Commission.	
31)	76. Calls on the Commission to tackle plastics, including microplastics, in a comprehensive way; urges the Commission to adopt a general phase-	The Commission is already working on measures to restrict the use of intentionally added microplastics in products (through a REACH restriction file) and to tackle		The Commission is working on a legislative initiative on <a href="#">Microplastics pollution – measures to reduce its</a>	

<sup>35</sup> Commission Decision 97/129/EC of 28 January 1997 establishing the identification system for packaging materials pursuant to European Parliament and Council Directive 94/62/EC on packaging and packaging waste (OJ L 50, 20.2.1997, p.28).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	out of intentionally added microplastics and to reduce, through new mandatory regulatory measures, the unintentional release of all microplastics at source, including for example from tyres, textiles, artificial turf and production of plastic pellets; [...] ; calls on the Commission to look into the sources, distribution, fate and effects of both macro- and micro-plastics in the context of wastewater treatment and storm water management; [...]	unintentional emissions for example from textiles and tyre abrasion and from primary plastic production i.e. pellets.		<a href="#">impact on the environment</a> . This is expected in the last quarter of 2022.	
32)	77. [...] calls on the Commission to consider legislative measures, including an extension of the Single Use Plastics Directive in the context of the review of that Directive; calls on the Commission to work on developing standards for reusable packaging and substitutes for single-use packaging, tableware and cutlery;	The Commission is as well working on the implementing measures on single use plastics (SUP) and, as part of its evaluation, by the deadline foreseen in the legal text, will assess, among other elements, the need to enlarge its scope. The review of the essential requirements for packaging will aim to increase the re-usability of packaging.		The Commission shall carry out an evaluation of this Directive by 3 July 2027. <a href="#">Commission Implementing Decision (EU) 2021/1752 of 1 October 2021</a> laying down rules for the application of Directive (EU) 2019/904 of the European Parliament and of the Council as regards the calculation, verification and reporting of data on the separate collection of waste single-use plastic beverage bottles C/2021/6995, OJ L 349. <a href="#">Commission Implementing Decision (EU) 2021/958 of 31 May 2021</a> laying down the format for reporting data and information on fishing gear placed on the market and waste fishing gear collected in Member States and the format for the quality check report in accordance with Articles 13(1)(d) and 13(2) of Directive (EU) 2019/904 of the European Parliament and of the Council, C/2021/3765, OJ L 211. <a href="#">Commission Implementing Regulation (EU) 2020/2151 of 17 December 2020</a> laying down rules on harmonised marking specifications on single-use plastic products listed in Part D of the Annex to Directive (EU) 2019/904 of the European Parliament and of the Council on the reduction of the impact of	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				certain plastic products on the environment (Text with EEA relevance). <i>C/2020/9199, OJ L 428</i> . <a href="#">A corrigendum to this implementing regulation</a> was also published.	
33)	80. Urges the Commission and Member States to create a consistent transparency framework and reporting obligations for all value chain players on the production, trade, use and end-of-life management of plastics;	No specific reply is provided to this particular point (on creation of the create a consistent transparency framework).		Not mentioned.	
34)	81. Urges the Commission to develop EPR schemes that hold producers accountable for the end-of-life of plastic products;	Although the follow-up does not mentions par. 81, it claims that the Commission will also enhance the implementation of the recently adopted requirements for extended producer responsibility schemes by providing guidance.		<a href="#">Study</a> requested by the Commission on guidance for extended producer responsibility scheme, May 2020.	
35)	85. Calls on the Commission to implement the 'Renovation Wave' initiative fully in line with the circular economy principles, while taking into account the diversity of the sector; calls on the Commission to set horizontal and product specific requirements; stresses the potential for greenhouse gas savings and environmental gains by prolonging the lifetime of buildings as opposed to demolition; asks the Commission to consider setting reduction targets for the carbon footprint and material footprint of EU buildings and applying the Levels(s) framework on sustainable buildings as a binding framework for construction performance; believes it to be necessary to include minimum legal requirements on the environmental performance of buildings in order	The Commission is working to develop a 2050 whole life-cycle performance roadmap, with the aim to set out how to gradually reduce carbon emissions from buildings. This is an action from the Renovation Wave and is inspired by the work that a number of front runner Member States have done already. Excavated soil should as a priority be re-used and therefore excluded from the rules on waste management and contaminated soil should indeed be subject to the treatment according to waste hierarchy.		The Commission published a proposal for a directive <a href="#">on the energy performance of buildings (recast)</a> in December 2021. The Commission is working on a <a href="#">revision of the construction products regulation</a> expected in the first quarter of 2022. The Commission published in October 2020 a <a href="#">Recommendation on Energy Poverty (C (2020)9600)</a> . The Commission published in July 2021 a <a href="#">proposal</a> for a directive of the European Parliament and the Council on energy efficiency (recast) (COM/2021/558).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to improve the resource efficiency and energy performance of buildings;				
36)	86. Recalls the Commission's obligation under the Waste Framework Directive to consider a revision of material recovery targets set in EU legislation for construction and demolition waste and its material-specific fractions and believes that this should include a material recovery target for excavated soils; suggests to include reuse and recycling targets and the use of secondary raw materials in construction applications while making them more easily traceable; calls the Commission to revise the Construction Products Regulation and welcomes the announcement of a Strategy for a Sustainable Built Environment in 2021; believes that the adoption of digital solutions in the built environment, such as waste tracing, would allow better energy performance of buildings and greater circularity in the construction sector;	The Commission recognises the significance of a building's carbon footprint. After the publication of Level(s) in 2020, which provides a common language to define what a sustainable building is, the Commission will start including these aspects in different policy initiatives. Ongoing revisions of key pieces of legislation impacting on building performance, such as the Energy Performance of Buildings Directive and the Construction Products Regulation, will consider how to reduce carbon emissions over the full life cycle, and other environmental impacts of buildings. Level(s) will play an important role in these developments.		The Commission published a proposal for a Directive <a href="#">on the energy performance of buildings (recast)</a> in December 2021.  The Commission is working on a <a href="#">revision of the construction products regulation</a> in the first quarter of 2022.	
37)	89. Urges the Commission to make a legislative proposal to implement the goal of halving food waste by 2030 in line with the commitments under the Farm to Fork Strategy, and based on data reported by Member States in accordance with the Waste Framework Directive; calls on the Commission to integrate the prevention of food loss and food waste along the entire food value chain in relevant EU policies, as set out in the Farm to Fork Strategy, and recalls that these measures should be in line with the waste hierarchy; [...]	As outlined in the Farm to Fork strategy, the Commission is committed to halving per capita food waste at retail and consumer levels by 2030 (SDG Target 12.3). Using the new methodology for measuring food waste, adopted in 2019, and the data expected from the Member States in 2022, by the end of 2023 it will set a baseline and propose a legislative proposal setting legally binding targets to reduce food waste across the EU.		The Commission launched in October 2021 a consultation on an initiative on <a href="#">food waste – reduction targets</a> . This initiative is expected in the second quarter of 2023.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
38)	90. Calls on the Commission to take measures to close the agricultural nutrient loop, reduce Europe’s dependency on imports of vegetable proteins for animal feed and to increase the use of recycled animal manure and other organic nutrients, such as compost and digestate, instead of synthetic fertiliser while ensuring a high level of protection of health and of the environment and ecosystems;		Closing the agricultural nutrient loop will be part of the Integrated Nutrient Management Action Plan (INMAP), which is included in the CEAP and a key action identified in the new Biodiversity Strategy (BDS) and the Farm to Fork Strategy to be presented in 2022. It aims to address nutrient pollution that is negatively affecting ecosystems by ensuring more sustainable application of nutrients, addressing nutrient pollution at source, increasing the sustainability of the livestock sector and stimulating the markets for recovered nutrients.		The Commission will work with Member States to develop an <a href="#">Integrated Nutrient Management Action Plan</a> in 2022.	
39)	91. [...] calls on the Commission to fully integrate the water-energy nexus in European policies and recalls that the quality of and access to water resources rely on a good implementation of control at source and the polluter pays principle; supports a circular approach in waste water treatments and management in view of fostering urban wastewater recovery; [...] ; calls to the Commission to assess the possibility to take legislative measures to address the water efficiency in buildings;		The Commission intends to undertake effective measures to promote water reuse and water efficiency, including in industrial processes. The new Water Reuse Regulation, which will start applying in June 2023, will contribute to addressing water scarcity issues and facilitate improved water management in agriculture. Guidance to support the application of the rules and further legal acts, which the regulation empowers the Commission to draft, are under development. The Commission will look into further possible areas of promotion and application for water reuse including through research and innovation actions in the context of Horizon Europe. As for water reuse in industry, the ongoing review of the Industrial Emissions Directive provides an opportunity to assess strengthening the water-related elements of the Directive; in addition, the Commission is looking into promoting water reuse and water efficiency in the BAT (Best Available Techniques) reference documents (BREFs). Most of the actions on water efficiency are pursued through the Common Implementation Strategy for the Water Framework Directive and the Floods Directive (ongoing), in particular giving attention to water permitting system, water allocation mechanism, cost recovery through water pricing, use of nature-based solutions, drought management, flood risk management, as well as climate change impacts. The Communication on the new EU		<p><a href="#">Regulation (EU) 2020/741 of 25 May 2020</a> of the European Parliament and of the Council on minimum requirements for water reuse (applies from 26 June 2023).</p> <p>Series of actions planned:</p> <p>The Commission proposes a <a href="#">revision of the Directive 2010/75/EU on industrial emissions</a> expected in the second quarter of 2022.</p> <p><a href="#">Implementation Reports</a> of the Common Implementation Strategy for the Water Framework Directive and the Floods Directive.</p> <p>Communication from the Commission to the European Parliament, to the Council, the European Economic and Social Committee, and to the Committee of the Regions on forging a climate-resilient Europe - the new EU Strategy on Adaptation to Climate Change (<a href="#">COM/2021/82</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Adaptation Strategy will contribute to ensuring resilient water management, including concrete measures for better quantitative water management (including water efficiency). Water efficiency is part of the high environmental standards foreseen in the Renovation Wave initiative.</p> <p>The Commission has acknowledged the need to align the 30-year-old Urban Waste Water Treatment Directive (91/271/EEC) with the principles of the circular economy. This is also stressed in the roadmap that was published for the launch of revision of the Directive, which is due by 2022. In addition to the recovery of valuable materials from waste water and sewage sludge, the Commission will also assess in its impact assessment the potential to reduce energy consumption of the waste water sector and even consider the potential of clean energy production by the sector. In this context, the Commission also notes that the evaluation of the Sewage Sludge Directive is ongoing and the interlinkages between the two Directives are subject to close scrutiny during the revision process.</p>		<p>The Commission will publish a revision of the Directive on <a href="#">water pollution – EU rules on urban wastewater treatment</a> in the third quarter of 2022.</p> <p>The Commission finalised in March 2021 an evaluation of the <a href="#">Directive 86/278 on sewage sludge use in farming</a>.</p>	
40)	94. Calls on the Commission and Member States to ensure that the separate collection of bio-waste, as introduced by the Waste Framework Directive, aims at producing high-quality compost to support soil enhancement non-hazardous chemicals and other products and renewable energy, where feasible and environmentally beneficial;	The Commission is committed to support the Member States in the implementation of the separate collection systems for bio-waste and scaling up recycling that generates high quality compost, in particular, by providing financial support and technical assistance by sharing of best practices.		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
41)	96. [...] ; calls on the Commission to propose binding targets for overall waste reduction and for the reduction of waste in specific waste streams and product groups, as well as targets to cap the generation of residual waste, in the review of the Waste Framework Directive and Landfill Directive foreseen for 2024; [...]	<p>The Commission is already working on a feasibility assessment to underpin proposals for new EU waste reduction targets for specific streams and a broader set of measures on waste prevention in particular in the context of the upcoming and ongoing reviews of Directives, 2000/53/EC and 2008/98/EC. As such, they have been included in the legislative proposal for a new regulatory framework for batteries. The Commission will also enhance the implementation of the recently adopted requirements for extended producer responsibility schemes by providing guidance.</p> <p>[...]</p> <p>With regard to the treatment of residual waste, the Commission will support the Member States in the application of the existing EU rules on landfilling which envisage an obligation to divert all recyclable and recoverable waste from landfilling as of 2030. The existing and future prevention and recycling targets reinforce the waste hierarchy in limiting the scope for thermal residual waste treatment.</p>		<p>The Commission is working on a revision of the <a href="#">End-of-life Vehicles Directive and the Directive on the Type Approval of Motor Vehicles</a>. This is expected in the last quarter of 2022.</p> <p>The Commission finalised in March 2021 a <a href="#">public consultation</a> on a modernisation of <a href="#">Directive 2006/66/EC on batteries</a>.</p> <p>The Commission last <a href="#">revised</a> Directive 2008/98/EC in 2018. Directive (EU) 2018/851 of the European Parliament and of the Council of 30 May 2018 amending Directive 2008/98/EC on waste, <i>OJ L 150</i>. It will be revised again in 2023.</p> <p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.</p>	
42)	97. [...] ; calls on the Commission to ensure effective and full implementation by all Member States of both the current waste targets and of the 2018 Waste package, and urges all Member States to fully transpose the 2018 legislation without further delay;	The Commission remains committed to facilitating compliance with Union's legislation in all the Member States, in particular on separate collection obligations and waste management targets, by providing financial and technical assistance and ultimately by taking enforcement measures. With regard to separate collection, the Commission intends to propose legislative measures harmonising separate collection models that lead to		No further specific actions proposed to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		strong participation by citizens and high quality secondary materials.			
43)	98. [...] ; asks the Commission to assess measures to make secondary raw materials more competitive while contributing to a toxic-free environment;	No specific reply is provided to this particular point (on assessing whether secondary raw materials more competitive while contributing to a toxic-free environment).		Not mentioned.	
44)	100. [...] calls on the Commission to propose harmonised European end-of-waste criteria for key waste streams in line with the Waste Framework Directive, in order to remove market barriers and ensure high-quality material recovery; [...]	The Commission has committed to watch the scoping of waste streams to identify those that should be prioritised for the development of EU end of waste criteria based on factors such as contribution to the circular economy, scale of shipments across the EU, volumes generated, benefits for human health and environment, success rate nationally and added value for the circular economy. The Commission is in the process of defining that priority list of materials to start the development of the End-of-waste criteria in 2022 with the involvement of the Joint Research Centre.		The Commission is in the process of <a href="#">assessing</a> the waste streams and for that purpose, it has organised several stakeholder consultations and workshops. The Commission intends to finalise that assessment by the end of 2021 to commence the development of the EU end of waste criteria in 2022.	
45)	101. Calls on the Commission to pay attention to the rules on transboundary movements of waste for recovery between EU Member States and to consider adapting them in order to increase their clarity and comprehensibility, remove administrative barriers while maintaining the effectiveness of legislation in protecting human health and the environment, and harmonise their implementation across EU Member States, including through the establishment of a single EU electronic system for recording waste shipments;	The Commission is working to review EU rules on waste shipment. This review aims first at facilitating shipments of waste for recycling within the EU. This should allow getting more waste treated in the EU. The review also looks at the possibility to restrict exports of waste that cause negative environmental and health impacts in third countries. The review might consider a proposal to move to fully electronic information exchange system which has proven essential during the pandemic. Finally, the review will look at enforcement actions to counteract illegal shipments. In parallel, the Commission is also working closely with Member State enforcement agencies and third countries to avoid that export of our waste becomes a problem for them.		On 18 November 2021, the Commission adopted a <a href="#">proposal</a> for a regulation of the European Parliament and of the Council on shipments of waste and amending Regulations (EU) No 1257/2013 and (EU) No 2020/1056 (COM (2021) 709).

## 4.1.14.4. ENVI Resolution 4: EP resolution of 10 March 2021 on towards a WTO-compatible EU carbon border adjustment mechanism

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Towards a WTO-compatible EU carbon border adjustment mechanism	10/03/2021 <a href="#">T9-0071/2021</a> <a href="#">2020/2043(INI)</a> ENVI	<p>On 3 May 2021, the Parliament received "<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – March I 2021 part-session" informing that the Commission will not be responding formally to the requests addressed in the resolution. The Commission will not be responding formally to the requests addressed in the resolution as it considers that the main elements were addressed in plenary by Commissioner Paulo Gentiloni. The Commission has taken good note of the recommendations made in the resolution and will consider them as part of the preparation of the CBAM (carbon border adjustment mechanism) legislative proposal scheduled for June 2021. Moreover, the Commission will continue working closely and constructively with the European Parliament on the matter once the Commission has presented the CBAM legislative proposal as part of the "Fit for 55" Package under the European Green Deal.</p> <p>The <a href="#">plenary debate</a> took place on 8 March 2021.</p>			
1)	2. [...] calls on the Commission and the Council to uphold a transparent, fair and inclusive decision-making process in the UNFCCC;				
2)	3. [...] strongly encourages the Commission and the Member States to intensify their climate diplomacy ahead of and after the adoption of the legislative proposal for a CBAM and, in particular, to ensure continuous dialogue with trade partners in order to incentivise global climate action; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	11. Emphasises that product standards can ensure low-carbon, resource-efficient manufacturing as well as help to guarantee minimal negative environmental impacts from product use; therefore asks the Commission to propose, as a complement to the introduction of a CBAM, more ambitious and binding norms and standards on products placed on the EU market in terms of GHG emission reduction and savings on resources and energy, in support of the Sustainable Product Policy Framework and the new Circular Economy Action Plan;				
4)	15. [...] calls on the Commission to also include in the impact assessment the consequences for the EU budget of the revenue generated from the CBAM as an own resource, depending on the design and modalities chosen;				
5)	19. [...] calls on the Commission to assess carefully the impact of the different CBAM options on Least Developed Countries;				
6)	21. Urges the Commission to minimise the risk of exporters to the EU trying to bypass the mechanism or compromise its effectiveness, for example by re-routing production between markets or exporting semi-finished goods;				
7)	23. Expresses its deep concern over the erosion of the multilateral trading system; calls on the Commission to actively engage with trade partners' governments to ensure a continued dialogue on this initiative, thereby providing incentives for climate action both within the Union and by its trading partners; underlines that trade policy can and should be used to promote a positive environmental agenda and to avoid major differences in the levels of environmental ambition between the EU and the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	rest of the world, and that a CBAM should be designed as an action complementing actions under the trade and sustainable development chapters of the EU's FTAs; underlines that global action which makes the CBAM redundant must be the final goal of the initiative, as the rest of the world catches up with the level of ambition the EU has set for reducing CO <sub>2</sub> emissions; is therefore of the view that the CBAM should be regarded as a means to help the acceleration of this process and not as a means of protectionism; expects the Commission to initiate negotiations on a global approach within the framework of the WTO or the G20;				
8)	25. Calls on the Commission to pursue multilateral WTO reforms that bring international trade law into line with the goals of the Paris Agreement and other aspects of international law, in particular the conventions of the International Labour Organization (ILO); [...]				
9)	26. Underlines that the CBAM can help to contribute to the SDGs; recalls that the promotion of decent work is also an SDG and urges the Commission to ensure that goods placed on the EU market are produced under conditions that respect the ILO conventions;				
10)	29. [...] urges the Commission, therefore, to consider the possible introduction of export rebates, but only if it can fully demonstrate their positive impact on climate and their compatibility with WTO rules; [...]				
11)	33. Supports the Commission's intention to use revenues generated by the CBAM as new own resources for the EU budget, and asks the Commission to ensure full transparency about the use of those revenues; highlights, however, that the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	budgetary role of the CBAM should only be a by-product of the instrument; believes that those new revenues should allow for greater support for climate action and the objectives of the Green Deal, such as the just transition and the decarbonisation of Europe's economy, and for an increase in the EU's contribution to international climate finance in favour of Least Developed Countries and Small Island Developing States, which are most vulnerable to climate change, in particular to support them to undergo an industrialisation process based on clean and decarbonised technologies; calls on the Commission to take into account the social effects of the mechanism in its upcoming proposal with a view to minimising them;				
12)	34. Recalls that Parliament, the Council and the Commission agreed to the creation of new own resources, including the CBAM, during the next multiannual financial framework under the Interinstitutional Agreement of 16 December 2020 on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources (IIA) <sup>38</sup> ; [...]				
13)	39. [...] calls on the Commission to evaluate the different practices of Member States in that matter in the light of the polluter pays principle;				
14)	42. [...] encourages the Commission to design the mechanism with a clear and ambitious timeline for its implementation and evolution; recalls that some				

<sup>38</sup> OJ L 433 I, 22.12.2020, p. 28.

	<p>technical solutions for mitigating CO<sub>2</sub> are still at the pilot stage and thus calls on the Commission to continue efforts to develop them further; calls on the Commission to design the mechanism as part of a comprehensive and long-term-oriented policy package that is consistent with achieving a highly energy- and resource-efficient, net-zero GHG economy by 2050 at the latest;</p>				
15)	<p>45. Calls on the Commission to provide technical advice and support to industries at home and abroad, especially for SMEs, in setting up reliable GHG emission accounting systems for imports in order to maintain a strong European industry without causing technical obstacles for trading partners;</p>				
16)	<p>48. Emphasises its importance in ensuring that European citizens and their interests are represented and in contributing to the achievement of EU priorities such as climate protection, sustainable growth and international competitiveness; calls on the Commission and the Council, therefore, to fully involve Parliament, as co-legislator, in the legislative process to establish the mechanism;</p>				

4.1.14.5. ENVI Resolution 5: EP resolution of 25 March 2021 on the implementation of the Ambient Air Quality Directives: Directive 2004/107/EC and Directive 2008/50/EC

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<p><b>The implementation of the Ambient Air Quality Directives: Directive 2004/107/EC and Directive 2008/50/EC</b></p>	<p>25/03/2021 <a href="#">T9-0107/2021</a> <a href="#">2020/2091(INI)</a> ENVI</p>	<p><a href="#">SP(2021)409</a></p>	<p>Final reply (SP) received 1 September 2021</p>	<p>Mixed reply</p>			
<p>1)</p>	<p>3. Recognises the fact that air pollution has no boundaries, and that there is a significant exchange of air pollutants between Member States, and also between EU and non-EU countries as noted in the Second Clean Air Outlook; points out that Member States are not able to take any action on emission sources outside their territory; encourages the Commission to take into account the complex nature of air pollution (e.g. secondary particulate matter formation, global and EU transfer of air pollution) when designing new air quality policy to ensure an integrated and holistic approach;</p>	<p>Consolidated reply for 3, 4, 6, 7, 14, 15, 66 <i>Under 'policy area 1' of the revision of the Ambient Air Quality Directives</i> – as announced in the inception impact assessment of 17 December 2020, the Commission will assess policy options for closer alignment of the EU air quality standards with scientific knowledge including the latest recommendations of the World Health Organisation (WHO). The revised WHO Air Quality Guidelines, expected for the first half of 2021, will entail updated recommendations for a number of air pollutants, including the most harmful fine particulate matter (PM<sub>2.5</sub>). The impact assessment will consider and assess different policy options and scenarios, in line with the Green Deal ambition of more closely aligning the current EU air quality standards with the revised WHO Air Quality Guidelines. Subject to the findings of the revised Guidelines, the Commission will also consider introducing air quality standards for emerging pollutants, like black carbon or ultrafine particles, as well as a possible mechanism to adjust air quality standards to technical and scientific progress. In the impact assessment, the Commission will pay particular attention to lessons learnt for air pollution from the COVID-19 pandemic.</p>				<p><a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.</p>	
<p>2)</p>	<p>4. [...] calls on the Commission to align PM<sub>10</sub>, PM<sub>2.5</sub>, SO<sub>2</sub> and O<sub>3</sub> values with WHO guidelines, and benzene</p>	<p>Consolidated reply for 3, 4, 6, 7, 14, 15, 66</p>

		<p>scenarios, in line with the Green Deal ambition of more closely aligning the current EU air quality standards with the revised WHO Air Quality Guidelines. Subject to the findings of the revised Guidelines, the Commission will also consider introducing air quality standards for emerging pollutants, like black carbon or ultrafine particles, as well as a possible mechanism to adjust air quality standards to technical and scientific progress. In the impact assessment, the Commission will pay particular attention to lessons learnt for air pollution from the COVID-19 pandemic.</p> <p>Consolidated reply for 6, 10, 13, 14, 48</p> <p><i>Under 'policy area 3' of the revision of the Ambient Air Quality Directives, the Commission will explore solutions to improve, simplify and increase precision and coherence of requirements with regard to air quality monitoring, modelling and plans. The Parliament's detailed recommendations will be considered in that context. It should be noted, however, that Article 28 of Directive 2008/50 is not an appropriate legal basis for guidance on air quality monitoring, modelling and plans as it goes beyond the mandate conferred to the Commission based on that provision.</i></p>		<p><a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.</p>	
	<p>18. Points to the fact that clear decreasing trends in air pollution can be observed mainly when policies are implemented in combination, and therefore a coherent approach across the EU in the design and implementation of local policies is fundamental to their success; underlines that achieving policy coherence also requires cooperation between different authorities, and calls on the Commission and Member States to collaborate closely with national, regional and local authorities in this regard; calls on Member States to develop coherent and long-term strategies for cleaner air; calls on the Commission to</p>	<p>Consolidated reply to 18, 48, 56, 57, 58, 60</p> <p><i>Under 'policy area 2' of the revision of the Ambient Air Quality Directives, the Commission will consider options to improve the air quality legislative framework, including provisions on penalties, access to justice and public information, in order to enhance effectiveness, efficiency and coherence. This policy area will also look into ways of improving coherence in action between different levels of governance to ensure that air quality plans and measures are fully effective. The Commission will consider actions to raise awareness on the health effects of air pollution also targeted at vulnerable</i></p>		<p><a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	establish new legal provisions in the AAQ Directives to prevent local policies and measures that have proven to be effective in improving air quality from being reversed without in-depth analysis or assessment;	groups and to improve information tailored to health professionals. In addition, as announced in the Zero-Pollution Action Plan, the Commission will develop, together with the European Environment Agency, the Air Quality Index App that will make the available real-time, comparable EU-wide air quality data easier to access.			
10)	19. Welcomes the Commission's fitness check of the AAQ Directives published in 2019; calls on the Commission to explore means for swift and more efficient cooperation with national, regional and local authorities in order to promote compliance with air quality legislation, including through EU funding; calls on the Commission to provide technical assistance and expertise to national, regional and local authorities encountering difficulties in enforcing and implementing air quality legislation;	Consolidated reply to 9, 12, 19, 67  The Commission will continue to provide implementation as detailed in the Commission Communication 'A Europe that protects: Clean air for all' (COM(2018) 330), including by facilitating exchanges of good practices and supporting capacity building through Clean Air Dialogues with Member States, the bi-annual Clean Air Forum as well as exchanges under the TAIXE-EIR-Peer2peer tool, Urban Agenda for the EU and Urban Innovative Actions to further addressing air pollution in urban areas. In addition, under the zero-pollution ambition of the European Green Deal, the Commission is considering ways to bring together environmental and other enforcement authorities (e.g. those in charge of EU transport, energy, agriculture or consumer protection legislation) to exchange best practices and devise cross-sectorial compliance actions towards zero tolerance for pollution at national and cross-border level.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
11)	21 [...] urges the Commission to establish an annual award for the cities or regions that have taken the best measures with visible effects and concrete results in reducing air pollution to encourage local and national authorities to be more active and efficient and to promote these measures at European level;	In paragraph 21, the resolution calls for the establishment of an annual award recognizing cities and regions that have taken the best measures in reducing air pollution and encouraging local and national authorities to be more active and efficient in addressing air pollution.  The Commission is actively working to promote and encourage local action to reduce air pollution. The		No further / specific actions proposed/promised to be taken by the Commission on this particular point as	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Commission currently leads initiatives aiming at this objective, through the European Green Capital and European Green Leaf Awards. Air quality is one of the awards' 12 environmental indicators on which both the Expert Panel and the Jury assess the environmental action of applicants. The Commission also recently introduced the Green City Accord, a voluntary initiative aiming at improving the quality of life of all Europeans, and accelerate the implementation of relevant EU environmental laws. By signing the Accord, cities commit to addressing five areas of environmental management, one of which is air quality. The implementation of the Zero-Pollution Action Plan will further incite and reward action by cities and regions towards zero-pollution including addressing air pollution. The Commission will by 2024 reward the cities reporting the most progress over 2021-2023, and present a Scoreboard of EU regions' green performance to achieve pollution-relevant targets, rewarding the best performances and granting an award for the Green Region of the Year.</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request ( European Green Capital and European Green Leaf Awards , Green City Accord.</p>	
12)	<p>25. Welcomes the announcement of the Commission's Zero Pollution Action Plan; [...]. calls on the Commission and the Member States to cooperate more closely in all areas and at all levels, and to consider all technical solutions to reduce emissions in a technologically neutral way in order to help local authorities embark on an ambitious, yet challenging path towards zero emissions and achieve cleaner air;</p>	<p>Paragraph 25 refers to the need for ensuring air quality is properly prioritised and mainstreamed in all EU policies, and calls on the Commission (and the Member States) to cooperate on technical solutions to reduce emissions in a technologically neutral way.</p> <p>The Commission welcomes efforts towards reinforcing policy coherence, to ensure reductions of air pollution as a policy priority. In addition, as part of the actions under the Zero-Pollution Action Plan, the Commission will develop and share good practices on cross-cutting topics such as financing for zero pollution innovation and jobs, boosting sustainable production and consumption as well as create thematic hubs, such as the Clean Air Tech Hub.</p>		<p>The activity (Development and sharing of good practices) appears to be in progress.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	<p>27. Urges the Commission and the Member States to assess the effectiveness of all emissions legislation, and to strengthen it, while ensuring its effective implementation;</p>	<p>In paragraph 27, the resolution urges the Commission (and the Member States) to assess the effectiveness of all emissions legislation, and to strengthen it and ensure effective implementation.</p> <p>In relation to transport emissions, the Sustainable and Smart Mobility Strategy sets a clear pathway for the progressive increase in the share of zero-emission road transport vehicles in our fleet, leading to almost all vehicles on our road being zero-emission by 2050; this transition will progressively reduce the amount of air pollutant emissions from road transport. Additionally, the Commission announced in the European Green Deal that new, more stringent air pollutant emission rules for road transport vehicles will be adopted this year; the proposal is currently under preparation (see also response to paragraph 37). The FuelEU Maritime initiative, which the Commission will adopt this year, and the provision of on-shore power supply as required by the Alternative Fuels Infrastructure Directive, will also help reduce air pollution from waterborne transport.</p> <p>Air quality will also benefit from the EU legislative framework on energy efficiency. The Energy Efficiency Directive aims at improving energy efficiency and moderating the energy demand throughout the full energy chain and in all sectors. Amongst others, energy efficiency improvement measures have a positive impact on indoor and outdoor air quality. The moderation of energy demand through energy efficiency measures should lead to a decrease of energy consumption and the use of fossil fuels. In addition, the Energy Efficiency Directive provides incentives for promoting vehicles that are more efficient, a modal shift to cycling, walking and collective transport, or mobility and urban planning that reduces demand for transport. The Energy Efficiency Directive encourages Member</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>States to uptake schemes, which accelerate the uptake of new, more efficient vehicles or policies fostering a shift to better performing fuels that reduce energy use per kilometre. Under the Energy Efficiency Directive, Member States should make use of all available means and technologies, including by promoting sustainable technologies in efficient district heating and cooling systems, efficient heating and cooling infrastructure and energy audits or equivalent management systems. Energy efficiency measures promoting more energy efficient buildings including through the Energy Performance of Buildings Directive contribute to reducing the demand for heating fuels, including solid heating fuels. Energy efficiency measures therefore contribute to improving indoor and outdoor air quality and help achieve, in a cost effective manner, the objectives of the Union's air quality policy. The European Commission is assisting Member States and closely monitoring the implementation of the EU legislative framework on energy efficiency. In addition, the Commission is reviewing the existing legislative framework and propose revisions, if needed, to ensure that the legislative energy efficiency framework contributes to the efforts needed to deliver on the decarbonisation target by 2030, which itself contributes to improving the air quality.</p> <p>[...]</p> <p>Paragraph 27 also underlines the need to incorporate the EU air quality and emission standards into its trade policy to prevent the transfer of emissions outside the EU.</p> <p>EU Trade policy promotes air quality and emissions standards based on international standards as much as these are covered by the multilateral environmental agreements (MEAs). The EU trade agreements, under</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( multilateral environmental agreements (MEAs).</p>

14)	28. Calls on the Commission to rapidly start infringement proceedings to enforce the emission reduction commitments under the NEC Directive; [...]	<p>In paragraphs 28 and 29, the resolution calls on the Commission to rapidly start infringement proceedings regarding emission reduction commitments under the National Emission Reduction Commitments Directive (2016/2284), as well as to limit the use of emission inventory adjustments.</p> <p>The Commission has taken early enforcement action, notably on Member States' failure to submit the National Air Pollution Control Programmes (NAPCPs) - which are key instruments in achieving the emission reduction commitments - initiating infringement procedures against several Member States in February and July 2020. In parallel, the Commission pursues infringement procedures due to non-conform transposition of the Directive into national law. Particular attention will be given to the submission of emission inventories in 2022 when Member States will report 2020 data against the new emission reduction commitments under the Directive for the first time. In the meantime, the Commission will follow up closely on the Member States' obligation to update their policies and measures if they are not sufficient to reach the emission reduction commitments. As regards emission inventory adjustments, the relevant rules are set out in the National Emission Reduction Commitments Directive. As regards paragraph 29, the Commission as Guardian of the Treaties monitors the correct implementation of EU law, and in the case of emission inventory adjustment has an explicit obligation according to Article 5(6) of the Directive to review their application in line with the conditions established by law. The Commission is however not in a position to limit the use of these rules and the rights they grant to Member States under the Directive.</p> <p>[...]</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Paragraph 28 highlights that EU measures to reduce emissions across sectors must draw a clear pathway towards zero emissions and calls for a coherent policy approach to greenhouse gases and pollutant emission regulation.</p> <p>The European Green Deal requires synergies to be developed across all policy areas in order to deliver all possible benefits, not only in terms of greenhouse gases emission reduction but also in terms of health and quality of life, including for vulnerable population groups and those most exposed to environmental degradation and climate change risks and hazards. This is why the Commission is working at enhancing synergies and reducing trade-offs between its policies, so that both greenhouse gases and air pollutants emissions are reduced, for instance in the transport, industry and energy sectors. In the heating sector, air pollution from biomass burning remains a challenge in particular in devices without adequate emissions abatement technologies that are detrimental to clean air and need to be avoided. The Commission will promote the integration of the zero pollution ambition with clean energy and energy efficiency objectives, such as in the renovation wave and New European Bauhaus initiatives, recovery and reuse of construction waste and when reviewing eco-design and energy labelling requirements for heating appliances, as a priority in particular those for solid fuel heating by the beginning of 2024 at the latest.</p>		<p>working on action falling under the scope of the EP request.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	<p>30. Highlights that methane emissions are not regulated under EU air pollution legislation, and not specifically regulated under EU climate policy; welcomes the recently published 'EU strategy to reduce methane emissions', and encourages the Commission to effectively address the need to minimise methane emissions, especially from agriculture and waste;</p>	<p>In paragraph 30, the resolution encourages the Commission to effectively address the need to minimise methane emissions, especially from agriculture and waste.</p> <p>Methane is a powerful greenhouse gas. It also contributes to tropospheric ozone formation, a potent local air pollutant which itself causes serious health problems. Methane emissions are regulated along with other greenhouse gases under the Effort Sharing Regulation, which is now subject to review and will be strengthened under the "Fit for 55" package.</p> <p>Acknowledging the need of action, the Commission has established an EU strategy to reduce methane emissions with cross sectoral, sectoral and international actions, covering the main emitters sectors: energy, agriculture and waste. The Commission has announced in the Methane Strategy that, in the context of the review of the National Emission Reduction Commitments Directive by 2025, it will explore the possible inclusion of methane among the regulated pollutants. This follows from the Commission Declaration attached to the Directive.</p> <p>In parallel, the Commission also closely follows discussions and developments on the air pollution aspects of methane in the framework of the UNECE Air Convention.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Effort Sharing Regulation</a> , <a href="#">National Emission Reduction Commitments Directive by 2025</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	<p>31. [...] asks the Commission and Member States to also look into options to mitigate these emissions within the Industrial Emissions Directive<sup>39</sup> (IED);</p>	<p>As part of the Zero Pollution Ambition, the European Green Deal foresees a revision of the IED, to ensure consistency with EU's climate, energy and circularity objectives. The Commission welcomes that the resolution underlines also the need for this consistency.</p> <p>This IED revision is ongoing and the Commission confirms that the resolution points at options which are currently being considered for this revision. Extension of the IED scope, including intensive rearing of cattle as well as biological treatment of waste, is being examined as well as improved access of public to information, through enhanced transparency of information, specifically on the permitting process, permit decisions and operation of the plant.</p> <p>The climate neutrality in 2050 is a central objective of the European Green Deal and in the framework of the IED revision, the Commission is looking at options to accompany the industry transformation towards decarbonisation. Decarbonisation technologies will often contribute to both carbon neutrality and pollutant emission reduction. Once viable, such technologies would qualify as Best Available Techniques, and the IED would foster their roll-out and promote a level playing field. In other cases, decarbonisation techniques may have negative impacts on pollutant emission.</p> <p>Promotion of innovation is a central pillar of the IED revision. The Commission is considering a number of amendments to the IED that would reward those operators investing in highly environmentally performing innovative techniques, thus allowing also a</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">IED revision</a> - Commission proposal expected in Q2/2022).</p>	

<sup>39</sup> Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control) (OJ L 334, 17.12.2010, p. 17).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>faster and increased uptake of innovative techniques by industry. This would be supported by the work of the Industrial Emissions Innovation Observatory that would ensure the identification and evaluation of innovative technologies.</p> <p>The IED revision supports also the transition towards a more circular economy by looking at options for industry to improve resource efficiency (water, materials and energy consumption and use) such as through the implementation of a Resource Efficiency and Circular Economy Plan.</p>			
18)	32. [...] calls on the Commission to introduce an obligation on Member States to make publicly available information on compliance and permits;	No specific reply is provided to this particular point.		Not mentioned.	
19)	37. Recalls that road transport is the main source of NO <sub>x</sub> in Europe; calls on the Commission to develop stringent EU car emissions standards for air pollutants (future Euro 7 standards for light-duty vehicles and Euro VII standards for heavy-duty vehicles) in a technology-neutral manner which doesn't discriminate between fuels; <i>underlines that the new testing procedures for vehicles should be reviewed to broaden the scope of regulated pollutants measured, to increase their accuracy and effectiveness, and to eliminate loopholes, thereby ensuring emission standards are indeed met under real driving conditions;</i>	<p>Consolidated reply 37,42</p> <p>The Commission recognises the high contribution of transport to NO<sub>x</sub> and particle emissions in Europe. The Commission has already embarked in preparatory work for a future Euro 7 standard for light and heavy duty vehicles, with the help of an Advisory Group on Vehicle Emission Standards (AGVES). A proposal for the new Regulation is expected in the fourth quarter of 2021, according to the Commission Work Programme.</p> <p>With the entry into force of Regulation (EU) 2018/858 in September 2020, Member States and the Commission have now more responsibilities to effectively enforce market surveillance for emission standards of motor vehicles. The Commission in particular has entrusted this role to the Joint Research Center and its state-of-the-art laboratories in Ispra, Italy.</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Proposal on post-Euro 6/VI emission standards expected in Q2/2022).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
20)	<p>39. [...] calls on the Commission to assist Member States in carrying out regular quality checks of their transport infrastructure in order to identify the areas in need of decongestion and optimisation, and to take appropriate measures in these areas to make air quality a priority in its own right, including by making use of available EU funding, and by better targeting of the principal funding mechanisms, such as the European Regional Development Fund and Cohesion Fund;</p>	<p>A more sustainable (and less polluting) transport system is at the core of the Commission smart and sustainable mobility strategy adopted in December 2020.</p> <p>In this framework, the Commission has launched relevant action with a 3-year project called NEMO launched last year following the Horizon 2020 call 'Mobility for Growth' Topic LC-MG-1.9-2019 "Upgrading Transport Infrastructure in order to monitor noise and emissions", with 4 pilots covering road or rail infrastructure.</p> <p>Moreover, under the Connecting Europe Facility (CEF) programme, the support of railway, inland waterway and maritime infrastructure (including the deployment of alternative fuel infrastructures and digital elements for all transport modes) significantly contribute to clean air objectives. In particular, these interventions aim at optimising all transport modes and enhance modal shift, with important impact on the level of air pollutants. Furthermore, it is considered that the CEF programme principally contributes to clean air objectives when co-funding the electrification of railway lines and supporting infrastructure projects in urban nodes (including alternative fuels infrastructures and digital elements), aiming at decongesting densely populated urban areas, promoting the interconnection of long distance sustainable transport modes with urban transport and supporting the use of alternative fuels. The CEF II regulation set itself in continuation with the above CEF priorities, placing particular emphasis on the modernisation of the transport networks through enhanced support to transport sustainability, digitalisation elements and climate resilience.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>During the 2014-2020 period, it is estimated that the CEF Transport programme has contributed with more than EUR 7 billion co-funding to infrastructural investments addressing clean air objectives.</p> <p>At the same time, funding under the European Regional Development Fund and the Cohesion Fund will be better targeted in the 2021-2027 programming period with support to a specific objective dedicated to “enhancing protection and preservation of nature, biodiversity, and green infrastructure, including in urban areas, and reducing all forms of pollution”. Furthermore, funding under the European Regional Development Fund shall be concentrated on policy objective 2, which also covers the specific objective referred to above, with at least 30% of the funding allocated to clean and fair energy transition, green and blue investment, the circular economy, climate change mitigation and adaptation, risk prevention and management, and sustainable urban mobility.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	42. Calls on the Commission and the Member States to ensure that emission standards in current legislation are better enforced, and to raise awareness of the opportunities for the alignment of second-hand cars with environmental standards, such as through retrofitting;	<p>The Commission recognises the high contribution of transport to NOx and particle emissions in Europe. The Commission has already embarked in preparatory work for a future Euro 7 standard for light and heavy duty vehicles, with the help of an Advisory Group on Vehicle Emission Standards (AGVES). A proposal for the new Regulation is expected in the fourth quarter of 2021, according to the Commission Work Programme.</p> <p>With the entry into force of Regulation (EU) 2018/858 in September 2020, Member States and the Commission have now more responsibilities to effectively enforce market surveillance for emission standards of motor vehicles. The Commission in particular has entrusted this role to the Joint Research Center and its state-of-the-art laboratories in Ispra, Italy.</p> <p>A study funded by the European Parliament as pilot project, is currently under way, in order to study possible retrofitting solutions for older vehicles. The results of the study are expected to be made available in early 2022.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Proposal on post-Euro 6/VI emission standards expected in Q2/2022).</p> <p>The results of the study are expected in 2022.</p>	
22)	44. Points to the need to take account of structural constraints that may affect the introduction of alternative transport modes in outermost regions and islands; calls for the Commission and the governments of the outermost regions to envisage an action plan aimed at providing incentives and specific funding for transport in these regions;	Promoting sustainable transport, including developing and improving environmentally-friendly (including low-noise) and low-carbon transport Systems, is one of the investment priorities of the European Regional Development Fund. The fund recognises the specific situation of the outermost regions: the regions benefit from the highest co-financing rate (85%) and from a specific allocation and can, by way of derogation, invest funds from the European Regional Development Fund in airports infrastructure. The Connecting Europe Facility (CEF) can support transport works specifically in the outermost regions with a co-financing rate of 70% (default co-financing rate of 30%).		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Regional Development Fund</a> , <a href="#">Connecting Europe Facility (CEF)</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
23)	45. [...] calls on the Commission to urgently fulfil its commitment to regulate access to ports for the most polluting ships, and to oblige docked ships to use the available recharging and refuelling infrastructure, such as shore-side electricity, to decrease polluting emissions, thereby protecting coastal areas and their populations; calls on the Commission and Member States to implement a 'zero emission at berth standard' in all European ports;	Sustained efforts to tackle air pollution from maritime transport remain a priority to improve the environment and the health of EU citizens. The Commission is in the final phase of preparing the FuelEU Maritime initiative, to be adopted in July 2021, which will deliver on the European Green Deal ambitions to curb emissions from shipping by stimulating demand for renewable low-carbon fuels from shipping. The initiative will include more stringent measures targeting ship emissions at berth, where the most polluting ship will be required to plug into on-shore power supply or use an equally performant zero-emissions technology. This will be complemented by the review of the Directive on Alternative Fuels Infrastructures which will mandate the use of shore side electricity to the most polluting ships. The creation of Emission Control Areas is a further effective measure to address air pollution in coastal areas. It can be decided by the littoral states in a regional context to protect a sea basin and established under global rules. Furthermore, ongoing climate policies developments may lead to positive co-benefits in the reduction of air pollution emission. In 2021, the designation of an Emission Control Areas in the Mediterranean Sea may be proposed by the riparian states and the EU, with the active support of the Italian government in the framework of the Barcelona Convention, to the International Maritime Organization for further approval by the end of 2022 and possible entering into force after 2025.		On 14 July 2021, the Commission submitted <a href="#">the FuelEU Maritime initiative</a> .  The Commission <a href="#">delivered</a> on the Emission Control Areas in the Mediterranean on 10 December 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	48. [...] calls on the Commission to establish as soon as possible through an implementing act in accordance with Article 28 of Directive 2008/50/EC a set of minimum requirements and best practices for both the drafting and implementation of AQPs in order to make sure AQPs set time-bound action which is commensurate with the pollution problem they need to address; calls on the Commission to guarantee that there is enough funding to carry out the planned action, and that reliable reduction calculations to measure implementation are included;	Consolidated reply for 6, 10, 13, 14, 48 <i>Under 'policy area 3' of the revision of the Ambient Air Quality Directives</i> , the Commission will explore solutions to improve, simplify and increase precision and coherence of requirements with regard to air quality monitoring, modelling and plans. The Parliament's detailed recommendations will be considered in that context. It should be noted, however, that Article 28 of Directive 2008/50 is not an appropriate legal basis for guidance on air quality monitoring, modelling and plans as it goes beyond the mandate conferred to the Commission based on that provision.		<a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.	
25)	49. [...] calls on the Commission to establish a more transparent and responsive system for exchanging information and the yearly reporting obligation on the implementation of AQPs, as well as an evaluation procedure for AQPs submitted to ensure that Member States' measures are quick and effective in improving air quality;	Although point 49 is not directly addressed by the Commission's reply, however, the consolidated answer on paragraphs to 18, 48, 56, 57, 58, 60 is relevant. <i>Under 'policy area 2' of the revision of the Ambient Air Quality Directives</i> , the Commission will consider options to improve the air quality legislative framework, including provisions on penalties, access to justice and public information, in order to enhance effectiveness, efficiency and coherence. This policy area will also look into ways of improving coherence in action between different levels of governance to ensure that air quality plans and measures are fully effective. The Commission will consider actions to raise awareness on the health effects of air pollution also targeted at vulnerable groups and to improve information tailored to health professionals. In addition, as announced in the Zero-Pollution Action Plan, the Commission will develop, together with the European Environment Agency, the Air Quality Index App that will make the available real-time, comparable EU-wide air quality data easier to access.		<a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
26)	51. [...] urges the Commission to review the current enforcement procedure for the AAQ Directives;	<p>Consolidated reply 9, 51, 53</p> <p>The Commission will continue to act determinedly to address non-compliance, and ensure appropriate follow-up of the 31 ongoing infringement cases against 18 Member States for bad application of the Ambient Air Quality Directives. When it comes to air quality monitoring in particular, the Fitness Check of the Ambient Air Quality Directives (SWD(2019) 427) concluded that based on the available evidence there are no <i>systemic</i> shortcomings in the EU-wide monitoring network. Where there are indeed <i>specific</i> shortcomings in the EU-wide air monitoring network, the Commission has, in several instances, initiated infringement procedures and is constantly encouraging further compliance efforts, which have led to the result that the total number of sampling points has in general increased. Furthermore, information about Commission decisions on infringements is available online. The Commission also publishes an annual report reviewing key aspects of the application of EU law and presenting infringement cases by policy area and country.</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
27)	53. Calls on the Commission to take legal action as soon as it becomes aware that EU air quality laws are not being implemented, and to swiftly follow up with court referrals and sanctions when violations are established; calls on the Commission to regularly produce clear and comprehensive overviews of open infringement procedures, and to publish without delay its exchanges of communication with the non-compliant Member States; calls on the Commission to make available the necessary resources to ensure swift follow-up in cases of non-compliance by Member States;	<p>Consolidated reply 9, 51, 53</p> <p>The Commission will continue to act determinedly to address non-compliance, and ensure appropriate follow-up of the 31 ongoing infringement cases against 18 Member States for bad application of the Ambient Air Quality Directives. When it comes to air quality monitoring in particular, the Fitness Check of the Ambient Air Quality Directives (SWD(2019) 427) concluded that based on the available evidence there are no <i>systemic</i> shortcomings in the EU-wide monitoring network. Where there are indeed <i>specific</i> shortcomings in the EU-wide air monitoring network, the Commission has, in several instances, initiated</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.

		<p>infringement procedures and is constantly encouraging further compliance efforts, which have led to the result that the total number of sampling points has in general increased. Furthermore, information about Commission decisions on infringements is available online. The Commission also publishes an annual report reviewing key aspects of the application of EU law and presenting infringement cases by policy area and country.</p>			
28)	<p>56. Considers that public information and awareness have a critical role in addressing air pollution and enabling citizens to be directly involved in actions to improve air quality; draws attention to the fact that Member States, regions and cities define air quality indices differently, and that information and alert thresholds are currently missing for some pollutants; urges the Commission and Member States to establish a standardised air quality classification system applicable across the EU; calls on the Commission, Member States and relevant regional and local authorities to launch programmes to facilitate investments that improve air quality;</p>	<p>Consolidated reply to 18, 48, 56, 57, 58, 60 <i>Under 'policy area 2' of the revision of the Ambient Air Quality Directives</i>, the Commission will consider options to improve the air quality legislative framework, including provisions on penalties, access to justice and public information, in order to enhance effectiveness, efficiency and coherence. This policy area will also look into ways of improving coherence in action between different levels of governance to ensure that air quality plans and measures are fully effective. The Commission will consider actions to raise awareness on the health effects of air pollution also targeted at vulnerable groups and to improve information tailored to health professionals. In addition, as announced in the Zero-Pollution Action Plan, the Commission will develop, together with the European Environment Agency, the Air Quality Index App that will make the available real-time, comparable EU-wide air quality data easier to access.</p>		<p><a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
29)	57. [...] calls on the Commission, Member States and relevant regional and local authorities to launch updated public information and awareness campaigns on topics such as different types of air pollutants and their impact on human health or existing levels of air pollution in the territory, including information targeted at vulnerable groups, and to publish rankings of the best and worst progress made by air quality zones; [...]	Consolidated reply to 18, 48, 56, 57, 58, 60 <i>Under 'policy area 2' of the revision of the Ambient Air Quality Directives</i> , the Commission will consider options to improve the air quality legislative framework, including provisions on penalties, access to justice and public information, in order to enhance effectiveness, efficiency and coherence. This policy area will also look into ways of improving coherence in action between different levels of governance to ensure that air quality plans and measures are fully effective. The Commission will consider actions to raise awareness on the health effects of air pollution also targeted at vulnerable groups and to improve information tailored to health professionals. In addition, as announced in the Zero-Pollution Action Plan, the Commission will develop, together with the European Environment Agency, the Air Quality Index App that will make the available real-time, comparable EU-wide air quality data easier to access.		<a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.	
30)	58. Calls on the Commission and Member States to implement and promote tools to encourage public participation in the implementation of the AAQ Directives, such as development by Member States of an online tool or/and app that informs citizens about air quality and its impact on human health, gives them a possibility to call for air monitoring stations or sampling points, reports on air quality violations or provides feedback to the Commission on issues related to Member States actions on air quality;	Consolidated reply to 18, 48, 56, 57, 58, 60 <i>Under 'policy area 2' of the revision of the Ambient Air Quality Directives</i> , the Commission will consider options to improve the air quality legislative framework, including provisions on penalties, access to justice and public information, in order to enhance effectiveness, efficiency and coherence. This policy area will also look into ways of improving coherence in action between different levels of governance to ensure that air quality plans and measures are fully effective. The Commission will consider actions to raise awareness on the health effects of air pollution also targeted at vulnerable groups and to improve information tailored to health professionals. In addition, as announced in the Zero-Pollution Action Plan, the Commission will develop, together with the European Environment Agency, the		<a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Air Quality Index App that will make the available real-time, comparable EU-wide air quality data easier to access.			
31)	60. Urges the Commission to update the AAQ Directives to include explicit provisions that guarantee the right of citizens to justice in line with the Aarhus Convention; [...]	Consolidated reply to 18, 48, 56, 57, 58, 60 <i>Under 'policy area 2' of the revision of the Ambient Air Quality Directives</i> , the Commission will consider options to improve the air quality legislative framework, including provisions on penalties, access to justice and public information, in order to enhance effectiveness, efficiency and coherence. This policy area will also look into ways of improving coherence in action between different levels of governance to ensure that air quality plans and measures are fully effective. The Commission will consider actions to raise awareness on the health effects of air pollution also targeted at vulnerable groups and to improve information tailored to health professionals. In addition, as announced in the Zero-Pollution Action Plan, the Commission will develop, together with the European Environment Agency, the Air Quality Index App that will make the available real-time, comparable EU-wide air quality data easier to access.		<a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.	
32)	61. Calls for the Commission to consider regulating indoor air quality independently or as a part of sustainable buildings legislation, covering indoor air quality in confined spaces at least in public and commercial real estate;	The Commission is committed to addressing indoor air quality as expressed in the 7 <sup>th</sup> Environmental Action Plan. EU policies already address different emission sources such as construction materials or consumer products as well as environmental tobacco smoke. These actions will be reinforced in the implementation of the recently adopted Zero Pollution Action Plan, whereby the Commission will undertake an analysis of the knowledge and policy gaps as well as further assessing pathways and policy options to improve indoor air quality, focusing on key determinants and		<a href="#">Zero Pollution Action Plan</a> However, the implementation of the plan is in progress.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		pollution sources and exploring ways to raise public awareness and reduce risks.			
33)	65. Stresses that innovation and research in low-emission and emission-reducing technologies will help to reduce emissions in all sectors; urges the Commission to honour the principle of technology neutrality; stresses the need for innovative solutions such as filtration systems in vehicles and on streets, fleet renewal and similar initiatives;	The Commission welcomes the Parliament recognition of the importance of technology neutral R&I towards delivering the innovative solutions needed to tackle air pollution. Addressing this challenge will be an important task for Horizon Europe where activities will be aligned with an ambition of zero emissions and aim to prioritise those solutions where the largest beneficial impacts towards health and the environment can be achieved.		The activity appears to be in progress.	
34)	66. Encourages the Commission and the Member States to ensure that air quality policies guarantee innovation and competitiveness in the related sectors while striving towards achieving zero pollution ambitions;	Consolidated reply for 3, 4, 6, 7, 14, 15, 66		<a href="#">Revision of the Air Quality Directives</a> is expected in quarter three of 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p><i>Under 'policy area 1' of the revision of the Ambient Air Quality Directives – as announced in the inception impact assessment of 17 December 2020, the Commission will assess policy options for closer alignment of the EU air quality standards with scientific knowledge including the latest recommendations of the World Health Organisation (WHO). The revised WHO Air Quality Guidelines, expected for the first half of 2021, will entail updated recommendations for a number of air pollutants, including the most harmful fine particulate matter (PM<sub>2.5</sub>). The impact assessment will consider and assess different policy options and scenarios, in line with the Green Deal ambition of more closely aligning the current EU air quality standards with the revised WHO Air Quality Guidelines. Subject to the findings of the revised Guidelines, the Commission will also consider introducing air quality standards for emerging pollutants, like black carbon or ultrafine particles, as well as a possible mechanism to adjust air quality standards to technical and scientific progress. In the impact assessment, the Commission will pay particular attention to lessons learnt for air pollution from the COVID-19 pandemic.</i></p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
35)	67. Calls on the Commission and the Member States to continue to support forums and encourage consultations with other countries as part of an effort to identify effective solutions and facilitate the implementation of European, national and local policies seeking to achieve acceptable air quality standards;	<p>Consolidated reply for 9, 12, 19, 67</p> <p>The Commission will continue to provide implementation as detailed in the Commission Communication 'A Europe that protects: Clean air for all' (COM(2018) 330), including by facilitating exchanges of good practices and supporting capacity building through Clean Air Dialogues with Member States, the bi-annual Clean Air Forum as well as exchanges under the TAIEX-EIR-Peer2peer tool, Urban Agenda for the EU and Urban Innovative Actions to further addressing air pollution in urban areas. In addition, under the zero-pollution ambition of the European Green Deal, the Commission is considering ways to bring together environmental and other enforcement authorities (e.g. those in charge of EU transport, energy, agriculture or consumer protection legislation) to exchange best practices and devise cross-sectorial compliance actions towards zero tolerance for pollution at national and cross-border level.</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

4.1.14.6. ENVI Resolution 6: EP resolution of 9 June 2021 on EU Biodiversity Strategy for 2030: Bringing nature back into our lives

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>EU Biodiversity Strategy for 2030: Bringing nature back into our lives</b>		9/06/2021 <a href="#">T9-0277/2021</a> <a href="#">2020/2273(INI)</a> ENVI	<a href="#">SP(2021)625</a>	Final reply (SP) received 19 November 2021	General reply		
1)	5. Calls on the Commission to base each legislative proposal on a comprehensive impact assessment considering individual and cumulative effects, the impact on the social and economic sustainability of the relevant sectors, on food security and food prices, and on the potential risk of displacing biodiversity losses to non-EU countries by replacing local production with imports, and both the costs of action and inaction in terms of immediate and long-term impacts;		The Commission will continue to systematically present impact assessments with each legislative proposal, in line with Better Regulation and the Parliament’s call (paragraph 5). As announced in the recent Better Regulation Communication ( <a href="#">COM(2021) 219 final</a> ), the Commission will work to strengthen the impact assessment process and the Better Regulation toolkit, ensure that the “do no significant harm” principle is applied across all policies in line with the European Green Deal oath, and improve our understanding of the environmental, social and economic impacts of proposed EU legislation, within as well as outside of the EU.			No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( Better Regulation Communication ( <a href="#">COM(2021) 219 final</a> ) ).	
2)	6. Calls on the Commission, for the purposes of carrying out impact assessments, to complement the sole tool currently used to assess environmental aspects with tools examining impacts relating to biodiversity, resource use and pollution;		It also will revise the Better Regulation toolkit to enable better analysis and reporting of impacts relating to the green transition, including biodiversity, resource use and pollution. The Commission has called on the European Parliament and the Council to live up to the commitments in the Inter-institutional Agreement on Better Law-Making to document the effect of their amendments in terms of anticipated impacts (paragraph 6).			The revised Better Regulation toolkit is <a href="#">available</a> since November 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	10. Stresses that the Biodiversity Strategy for 2030 needs to fully deliver on its targets; urges the Commission and the Member States to commit to substantial and additional measures on biodiversity conservation and restoration to fully meet the new objectives, which should be clearly defined and measurable;	No specific reply is provided to this particular point (on biodiversity conservation and restoration).		Not mentioned.	
4)	13. Urges the Member States and the Commission to fully take into account the scientific evidence, reports and recommendations on zoonosis and pandemics, including the IPBES workshop report on biodiversity loss and pandemics <sup>40</sup> , the United Nations Environment Programme report of 6 July 2020 entitled 'Preventing the next pandemic – Zoonotic diseases and how to break the chain of transmission' <sup>41</sup> , and the tripartite concept note of the World Health Organization (WHO), the FAO and the World Organisation for Animal Health (OIE) of April 2010 on sharing responsibilities and coordinating global activities to address health risks at the animal-human-ecosystems interfaces partnership, to combat human-animal-environment health risks <sup>42</sup> ;	No specific reply is provided to this particular point.		Not mentioned.	
5)	18. Stresses that a clear definition of strict protection needs to be produced; notes the Council conclusions of 16 October 2020 on biodiversity, which state that a stricter level of protection may allow for certain human activities to be carried out in line with the conservation objectives of the protected area; considers that human activities that are compatible with protection goals, or even positively contribute to biodiversity, should be	The discussion with the Member States and stakeholders on the definition of strict protection (paragraph 18) is still ongoing. The definition should be consistent with the strategy, which states that natural processes should be left essentially undisturbed in strictly protected areas. Strictly protected areas should therefore include both areas in which non-intervention will be the general rule		It <a href="#">appears</a> that, following the discussions with Member States, a guidance document was <a href="#">published</a> in October 2021.	

<sup>40</sup> Ibid.

<sup>41</sup> United Nations Environment Programme report of 6 July 2020 entitled 'Preventing the next pandemic – Zoonotic diseases and how to break the chain of transmission'.

<sup>42</sup> The FAO-OIE-WHO tripartite concept note of April 2010 on sharing responsibilities and coordinating global activities to address health risks at the animal-human-ecosystems interfaces.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	admissible in areas under strict protection; calls on the Commission, in cooperation with Member States, to clarify what kind of human activities might potentially be considered as allowed under strict protection status when they leave natural processes essentially undisturbed and are compatible with the ecological requirements of the areas, on the basis of a case-by-case assessment based on the best available science;		(with possible exceptions for necessary activities such as pest or fire control) as well as areas in which human activities are necessary to reach the conservation objectives, such as mowing and grazing of grasslands, and should therefore be allowed under well-defined and controlled conditions. Furthermore, the target on strict protection applies to the EU as a whole and not to any individual Member State or ecosystem. Strict protection should be applied where such a level of protection is the most effective tool for ecosystem restoration and preservation.			
6)	26. [...] calls on the Commission and the Member States to conduct more targeted capacity building and provide better guidance on management effectiveness for the assessment and improvement of Natura 2000 management, including through the use of global standards for protected area management effectiveness (PAME) evaluations, such as the IUCN Green List of Protected and Conserved Areas; also calls on the Commission to update the adaptive management guidance on Natura 2000, which involves considering the potential impacts of climate change on species and ecosystems;		The Commission will continue to support the implementation efforts of the Member States to strengthen the network of terrestrial and marine protected areas, through the provision of capacity building and guidance. In this context, work is currently under way to update the existing <a href="#">Guidelines on climate change and Natura 2000</a> and is expected to be completed in early 2023 (paragraph 26).		The action is expected to be completed in 2023.	
7)	28. Regrets that the Member States have not met the 2020 objective of good environmental status for marine waters specified in the Marine Strategic Framework Directive; calls on the Commission to strengthen the network of MPAs through improved connectivity, enhanced management, stronger spatial planning, and systematic evaluations and enforcement;		No specific reply is provided to this particular point.		Not mentioned.	
8)	34. Underlines that forests, especially primary forests, are of particular relevance in protecting biodiversity and calls for their protection; calls, in this regard, on the Commission and Member States to bring in a definition		As concerns the definition and protection of primary and old-growth forests (paragraphs 34 and 35), the Commission is working with the Member States and stakeholders in the Forests and Nature Expert Group			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	of old-growth forests to be prepared by the Standing Forestry Committee as a part of the future EU Forest Strategy;	to agree, by the end of 2021, on a common definition and a strict protection regime. The new EU Forest Strategy ( <a href="#">COM(2021) 572 final</a> ) calls on the Member States to engage in completing the mapping and monitoring of these forests, and to ensure no deterioration until they start to apply the protection regime.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( new EU Forest Strategy ( <a href="#">COM(2021) 572 final</a> ).	
9)	35. Calls on the Member States to improve national legislation strengthening protection against illegal logging; calls on the Commission and the Member States to harmonise existing data, to fill in the gaps regarding the location of primary and old-growth forests, to create a database of all potential sites fulfilling the criteria for old-growth and primary forests retroactively in the year 2020, and to introduce a temporary moratorium on logging of all the respective sites to prevent their purposeful destruction and to legally ensure the non-intervention status of confirmed sites without delay;	As concerns the definition and protection of primary and old-growth forests (paragraphs 34 and 35), the Commission is working with the Member States and stakeholders in the Forests and Nature Expert Group to agree, by the end of 2021, on a common definition and a strict protection regime. The new EU Forest Strategy ( <a href="#">COM(2021) 572 final</a> ) calls on the Member States to engage in completing the mapping and monitoring of these forests, and to ensure no deterioration until they start to apply the protection regime.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( new EU Forest Strategy ( <a href="#">COM(2021) 572 final</a> ).	
10)	41. Recalls its objection of 23 October 2019 as regards the assessment of the impact of plant protection products on honeybees <sup>43</sup> and regrets that the EFSA bee guidance document has not been formally adopted by the Member States; calls on the Commission and the Member States to ensure that the revision of the EFSA bee guidance document and the future implementing acts ensures as a minimum an equal level of protection as that laid down in 2013, addressing both acute and	As concerns EU action on pollinators (paragraphs 40 and 41), the Commission will revise the EU Pollinators Initiative ( <a href="#">COM(2018) 395 final</a> ) in 2022, drawing on the recently published progress report ( <a href="#">COM(2021) 261 final</a> ), and further stakeholder consultation planned for the second half of 2021. The revision will look into possible gaps and strengthening efforts to address key drivers behind the decline of insect pollinators.		Revisions scheduled for 2022.	

<sup>43</sup> European Parliament resolution of 23 October 2019 on the draft Commission regulation amending Regulation (EU) No 546/2011 as regards the assessment of the impact of plant protection products on honeybees (texts adopted, P9\_TA(2019)0041).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	chronic toxicity and larvae toxicity, and also covering wild pollinators;	Work on the review of the <a href="#">EFSA Guidance on the risk assessment of plant protection products on bees (<i>Apis mellifera</i>, <i>Bombus spp.</i> and solitary bees)</a> is ongoing with the aim to strengthen the risk assessment process for the authorisation of pesticides. The review undertaken by EFSA covers the aspects raised by the Parliament (paragraph 41). Following the broad support at the AGRIFISH Council on 28 June 2021 for the Specific Protection Goal (SPG) for honeybees proposed by the Commission, EFSA will start work on the SPG for wild bees. The revision of the Directive on the sustainable use of pesticides ( <a href="#">Directive/2009/128/EC</a> ) is currently assessing several options to reduce risks and use of pesticides.			
11)	44. Highlights that soil biodiversity provides vital ecosystem services and mitigates climate change, making it one of the most important elements of terrestrial carbon sinks; notes with concern the increase in soil degradation and the lack of specific EU legislation on this topic; acknowledges that there are some provisions in different laws that indirectly contribute to soil protection, but considers that this has resulted in partial protection and highly fragmented governance in the EU; calls, therefore, on the Commission to submit a legislative proposal for the establishment of a common framework, with full respect for the subsidiarity principle, for the protection and sustainable use of soil and for the effective integration of that protection in all relevant EU policies;	The Commission welcomes Parliament’s call to submit a proposal to establish a common EU framework, in full respect of the subsidiarity principle, for the protection and sustainable use of soil and for the effective integration of that protection in all relevant EU policies (paragraph 44 and 45) and to present an EU strategy on desertification and land degradation (paragraph 49). The Commission is committed to filling in policy gaps in soil protection. It is currently exploring the best ways to respond to the Parliament’s resolution. In the context of the Green Deal, the Commission announced a new Soil Strategy to be adopted in 2021. The strategy will aim to consolidate, complement and steer action in the different policy areas that have a bearing on soil. The Commission is considering possible legally binding provisions on soil. It will also respond to the recommendations of the European Court of Auditors to better understand land degradation and desertification in the EU, to assess the need to enhance the EU legal framework for soil, and to step up actions towards delivering EU and international		<a href="#">EU Soil Strategy for 2030</a> adopted. On 17 December 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		commitments on desertification and land degradation neutrality.			
12)	47. Invites the Commission to review Directive 2010/75/EU on industrial emissions <sup>44</sup> and Directive 2006/21/EC on the management of waste from extractive industries <sup>45</sup> in order to better address soil degradation caused by industrial and mining activities; recalls its call for a material recovery target for excavated soils <sup>46</sup> ;	As part of the “Fit for 55 package” ( <a href="#">COM(2021) 550 final</a> ) published on 14 July, the Commission presented a proposal ( <a href="#">COM(2021) 554 final</a> ) to review the Land use, land use change and forestry (LULUCF) Regulation, the legislation that addresses the reporting and accounting of emissions and removals associated with lands and their carbon pools, including changes in soil organic carbon. This proposal will help to create stronger interlinkages with initiatives to protect and enhance nature-based carbon removals, improve the resilience of the EU’s forests and lands to climate change, restore degraded land and ecosystems and rewet wetlands and peatlands. Finally, the Zero Pollution Action Plan for air, water and soil has set actions to address soil pollution. Progress will be monitored through the EU Soil Observatory. As concerns industrial emissions and extractive waste (paragraph 47), the Commission is undertaking an impact assessment in order to table a proposal for the revision of the Industrial Emissions Directive ( <a href="#">Directive 2010/75/EU</a> ) in early 2022. A revision of the Extractive Waste Directive ( <a href="#">Directive 2006/21/EC</a> ) is currently not planned. The Commission takes note of the Parliament’s call and		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">COM(2021) 554 final</a> , <a href="#">COM(2021) 550 final</a> ).	

<sup>44</sup> Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control) (OJ L 334, 17.12.2010, p. 17).

<sup>45</sup> Directive 2006/21/EC of the European Parliament and of the Council of 15 March 2006 on the management of waste from extractive industries and amending Directive 2004/35/EC - Statement by the European Parliament, the Council and the Commission (OJ L 102, 11.4.2006, p. 15).

<sup>46</sup> European Parliament resolution of 10 February 2021 on the New Circular Economy Action Plan (texts adopted, P9\_TA(2021)0040).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		will consider if such a revision is necessary drawing on lessons from its <a href="#">implementation</a> .			
13)	49. [...] calls on the Commission, therefore, to be more ambitious and present without delay an EU-level strategy on desertification and land degradation;	The Commission welcomes Parliament’s call to [...] present an EU strategy on desertification and land degradation (paragraph 49). The Commission is committed to filling in policy gaps in soil protection. It is currently exploring the best ways to respond to the Parliament’s resolution. In the context of the Green Deal, the Commission announced a new Soil Strategy to be adopted in 2021. The strategy will aim to consolidate, complement and steer action in the different policy areas that have a bearing on soil. The Commission is considering possible legally binding provisions on soil. It will also respond to the recommendations of the European Court of Auditors to better understand land degradation and desertification in the EU, to assess the need to enhance the EU legal framework for soil, and to step up actions towards delivering EU and international commitments on desertification and land degradation neutrality.		<a href="#">EU Soil Strategy for 2030</a> adopted on 17 December 2021.	
14)	51. Supports the intention of the Commission to set up an EU platform for urban greening; calls on the Commission to set specific ambitious binding targets on urban biodiversity, nature-based solutions and ecosystem-based approaches, and green infrastructure, benefiting both humans and wildlife and contributing to the overall biodiversity targets; stresses the need to include measures such as a minimum share of green	The Commission further agrees on the importance of tackling the drivers of biodiversity loss also outside of protected areas (paragraph 19) and is therefore working to propose measures to this effect and support the Member States in their implementation. Such measures range from the designation of ecological corridors and the deployment of green infrastructure to re-connect natural areas (paragraph			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>roofs on new buildings, supporting urban farming, including the use of fruit trees, where appropriate, ensuring no chemical pesticides are used and reducing fertiliser use in EU urban green areas, and increasing the number of green spaces according to the number of inhabitants, while also addressing inequalities in access to green spaces; calls further on the Commission and the Member States to extend terrestrial and marine ecological corridors in urban areas, including by developing a Trans-European Network for Green Infrastructure (TEN-G) linked to a Trans-European Nature Network (TEN-N);</p>	<p>51), as part of the development of a truly coherent Trans-European Nature Network, through to the reduction of key pressures, such as pesticide or nutrient pollution, and the restoration and sustainable use of species and ecosystems, as set out in the Strategy's Nature Restoration Plan.</p> <p>[...]</p> <p>An impact assessment of options for restoration targets is under preparation by the Commission, in order to underpin its upcoming proposal for an EU Nature Restoration Law. The Commission has taken note of the Parliament's calls for an overarching EU restoration target of at least 30% of the EU's land and seas, to be fully implemented by each Member State on the basis of its specific characteristics [...]</p> <p>In relation to urban ecosystems (paragraph 51), the EU Biodiversity Strategy for 2030 aims to ensure that cities with more than 20,000 inhabitants put in place an urban biodiversity plan, as well as to extend terrestrial and marine ecological corridors, including through the development of green infrastructure. The Commission is working to produce guidance for the Member States on these measures. In addition, the feasibility of setting binding targets on urban ecosystem restoration is being considered as part of the ongoing impact assessment that will underpin the upcoming nature restoration law. Further measures to mitigate the use of pesticides in sensitive areas are being considered in the context of the ongoing revision of the Sustainable Use of Pesticides Directive (<a href="#">Directive/2009/128/EC</a>).</p>		<p>The activities appear to be ongoing.</p>	
15)	<p>53. [...] calls on the Commission to follow the recommendations of the ECA on biodiversity on</p>	<p>Although the follow-up does not mention point 53, the Commission however states in reply to point 49 that the Commission is considering possible legally binding provisions on soil. It will also respond to the</p>		<p><a href="#">EU Soil Strategy for 2030</a> adopted</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	farmland and to build on the lessons learned in the Biodiversity Strategy for 2030 <sup>47</sup> ;	recommendations of the European Court of Auditors to better understand land degradation and desertification in the EU, to assess the need to enhance the EU legal framework for soil, and to step up actions towards delivering EU and international commitments on desertification and land degradation neutrality.		on 17 December 2021.	
16)	57. Calls on the Commission to develop a strategy to support local value chains in reaching the proposed targets and stresses that small-scale agricultural businesses require specific support in contributing to the strategy;	The Commission is currently focusing on a voluntary approach combined with support and incentives for farmers and actions along the value chain in order to achieve these targets (point 57 and 61).		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
17)	60. Notes that Member States will contribute differently to these Union-wide targets depending on the level of development of their organic sector and therefore calls for the definition of national targets; highlights that these targets will not be met without strong financial support, solid training programmes and advisory services; calls on Member States to shape their CAP Strategic Plans accordingly and on the Commission to make sure that these Strategic Plans are up to the task;	Although the follow-up does not mention par. 60, the Commission however states in reply to par. 66: 'The Commission continues exchanges with the Member States to ensure that the CAP Strategic Plans integrate high-diversity landscape features.'		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (CAP Strategic Plans).	
18)	61. Recalls the importance of encouraging a collective approach and taking advantage of its multiplier effect in order to promote the actions of the Biodiversity Strategy, and calls on the Commission to promote and support associative enterprises, such as agri-food cooperatives, in the implementation of measures to protect biodiversity in a collective manner;	The Commission is currently focusing on a voluntary approach combined with support and incentives for farmers and actions along the value chain in order to achieve these targets (paragraphs 57 and 61). The new Organic Action Plan ( <a href="#">COM(2021) 141 final</a> ) will help to bring at least 25% of agricultural land under organic farm management by 2030, by means of a coherent set of measures that will stimulate		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (The new Organic Action Plan ( <a href="#">COM(2021) 141 final</a> )).	

<sup>47</sup> Idem.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		conversion as well as demand, reinforcing the entire food supply chain.			
19)	63. Reiterates that the CAP should be fully consistent with the EU's increased climate and biodiversity goals; urges the Commission and the Member States to use the CAP strategic plans to implement the objectives of the Biodiversity Strategy for 2030 and the Farm to Fork Strategy, including on further mainstreaming biodiversity-friendly and agro-ecological approaches, and urges the Member States to set ambitious baselines for sustainability and biodiversity when establishing conditionality standards and to ensure the ambitious and prompt development and uptake of measures, in particular eco-schemes and agri-environment-climate measures;	Although the follow-up does not mention par. 63, the Commission however states as reply for par. 65 that the Commission will continue to work with the Member States to ensure that their common agricultural policy (CAP) strategic plans sufficiently support the targets on organic agriculture as well as on high-diversity landscape feature (paragraph 65).		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
20)	65. Stresses the need to strengthen the monitoring framework within the CAP, including through the development of more reliable indicators to measure its impacts; calls on the Commission to carry out an independent assessment of their aggregated expected impact once national strategic plans are approved; calls on the Commission, where this analysis considers insufficient the efforts to achieve the goals of the European Green Deal, to take appropriate action such as asking the Member States to amend their strategic plans or reviewing the CAP Strategic Plan Regulation as part of the mid-term review;	The Commission will continue to work with the Member States to ensure that their common agricultural policy (CAP) strategic plans sufficiently support the targets on organic agriculture as well as on high-diversity landscape features (paragraph 65). The CAP is the main policy to ensure that 10% of agricultural land is devoted to high biodiversity landscape features through conditionality and incentives. Farmers will be supported in the transition, including through access to eco-schemes in the context of CAP direct payments that will reward sustainable farming practices, addressing specific environmental and climate needs in the Member State.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
21)	68. Calls on the Commission to assess whether the development of natural capital accounting can limit and rationalise the exploitation and impact on ecosystems and therefore contribute to halting and reversing biodiversity loss; [...]	In relation to Natural Capital Accounting and its key contribution to halting biodiversity loss (paragraph 68), the EU INCA project has shown that the production of a wide range of ecosystem accounts is feasible, following the guidance of the System of			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Environmental Economic Accounting – Experimental Ecosystem Accounting (SEEA EEA), and that it is possible to produce consistent and comparable information on ecosystems and the services they provide to society at the scale of the EU. The latest INCA report on <a href="#">Accounting for ecosystems and their services in the European Union – INCA – 2021 edition</a> presents examples of the effective use of ecosystem services accounts and existing policy applications.</p> <p>The Commission fosters networks of financial institutions and business cooperating on natural capital in order to align internationally management accounting principles for natural capital and biodiversity. The cooperating projects <a href="#">Transparent</a> and <a href="#">Align - Aligning accounting approaches for nature</a> supports businesses, financial institutions and other stakeholders in developing standardised natural capital accounting practices, including a standardised approach to biodiversity measurement. In this context, the Natural Capital Accounting and Valuation of Ecosystem Services project (2016-2021), funded by the EU’s Partnership Instrument, contributes to advancing the knowledge agenda on ecosystem accounting in several EU strategic partner countries where biodiversity is at stake.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
22)	71. Regrets that the EU's commitment to fully respect maximum sustainable yields (MSY) by 2020, a key objective of the common fisheries policy (CFP), has not been achieved; stresses that all fish populations should be restored to levels above those that are able to produce MSY while respecting the precautionary principle, ensuring they exhibit a population age and size distribution indicative of a healthy stock; calls on the Commission and the Member States to commit to the full recovery of marine habitats and fish stocks with respect for MSY using an ecosystem-based approach to fisheries management without delay, to improve selectivity and the survival of non-target species, and to reduce the impact of fisheries on marine ecosystems when implementing this approach, including by limiting practices or uses that have detrimental impacts;	The Commission is committed to the recovery of marine habitats and species, including fish stocks (paragraph 71), as well as to reducing the impact of fisheries on non-target species and on marine ecosystems. The Action plan to conserve fisheries resources and protect marine ecosystems will provide recommendations and actions that link the implementation of the common fisheries policy (CFP) with environmental legislation and policy to protect and restore marine ecosystems, notably the Birds, Habitats and the Marine Strategy Framework Directives.		The work on the Action plan <a href="#">appears</a> to be ongoing.	
23)	73. Calls on the Commission to address ocean degradation, eutrophication and acidification by presenting an ambitious action plan to protect marine ecosystems and conserve fisheries resources; [...]	The action plan will highlight areas where more needs to be done to protect sensitive species and habitats (paragraph 73), and will look into how to address the impact of certain fishing gear on the marine environment and seabed. The Commission is working with Member States' experts to address bycatch of sensitive species and seafloor damage, and to develop seabed integrity threshold values in the implementation of the Marine Strategy Framework Directive (descriptor 6: seabed integrity).		The work on the Action plan <a href="#">appears</a> to be ongoing.	
24)	76. Calls on the Commission to establish an ecosystem approach to all drivers of marine biodiversity loss, which takes account of the pressure of fishing on	The Commission will also look into climate change mitigation and adaptation in the fisheries context,		The report on the implementation of the CFP is expected in 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>stocks, biodiversity and marine ecosystems, but also of other factors such as pollution, climate change, shipping and coastal and near-shore uses, including through ecosystem impact assessments of all fishing and other marine activities, taking into account the capacity of ecosystems to contribute to the mitigation of and adaptation to climate change and prey-predator interactions;</p>	<p>and will report on it in next year's report on the functioning of the CFP.</p> <p>The Commission shares the view that fisheries-related measures should follow an ecosystem approach (paragraph 76). Member States having management interest may submit joint recommendations for fisheries conservation measures deemed necessary. The Commission can then adopt legislation on the basis of these recommendations, effectively turning them into binding EU law. The Member States' maritime spatial plans, that had to be delivered by March 2021, will need to be consistent with the marine strategies that the Member States have reported under the Marine Strategy Framework Directive. The new European Maritime Fisheries and Aquaculture Fund<sup>48</sup> (EMFAF) is also a key contributor to the European Green Deal objectives. It supports low-impact and sustainable blue economy sectors, including fisheries, as well as actions that contribute to the good environmental status of the marine environment. The Commission is determined to use all tools at its disposal, domestically and internationally, to build climate—resilient fisheries and aquaculture sectors. In negotiating their content with the Member States, the Commission will ensure that EMFAF programmes contribute to the achievement of the overall environment, climate and biodiversity targets established in the Multiannual Financial Framework (MFF) 2021-2027, through a series of actions such as the promotion of sustainable, low-impact and low-carbon fishing activities (e.g. collection of scientific data, elimination of discards,</p>			

<sup>48</sup> Regulation (EU) 2021/1139 of the European Parliament and of the Council of 7 July 2021 establishing the European Maritime, Fisheries and Aquaculture Fund and amending Regulation (EU) 2017/1004.

		<p>protection of sensitive species and habitats, improvement of energy efficiency of fishing vessels). For this purpose, each programme will be monitored through a system of pre-defined climate and environmental markers attached to types of interventions, measuring the overall contribution to climate and environmental objectives and targets. Data collection, management and use is also co-financed under the European Maritime and Fisheries Fund/ the European Maritime Fisheries and Aquaculture Fund, as is control and enforcement. [...]</p>			
25)	<p>77. Invites the Commission and the Member States to take measures to promote the development and implementation of higher welfare methods of fish capture, landing and slaughter on the basis of the best available science;</p>	<p>As regards higher welfare methods (paragraph 77), in 2017 the Commission carried a <a href="#">study on “The welfare of farmed fish: common practices during transport and slaughter</a>. In 2018, the Commission addressed a report to the European Parliament and the Council on the possibility of introducing certain requirements regarding the protection of fish at the time of killing (<a href="#">COM/2018/087 final</a>). Under the EU Platform on Animal Welfare, a voluntary initiative on the welfare of fish, developed <a href="#">Guidelines on water quality and handling for the welfare of farmed vertebrate fish</a> which the Platform welcomed in 2020 and invited for dissemination. The Commission will continue to encourage further stakeholder's dialogue on fish welfare. The Commission considers that the Member States have sufficient technical (e.g. World Organisation for Animal Health standards) and scientific information (e.g. European Food Safety Authority opinions and other) to develop their own rules and instructions reflecting their national context if deemed necessary.</p> <p>As announced in the Farm to Fork Strategy, the Commission is currently carrying out an evaluation of the animal welfare legislation for farmed animals</p>		<p>The action is planned for 2023.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		(including legislation applicable at the time of killing and during transport) and an impact assessment in view of its review by the end of 2023. In this context, the Commission will review EU animal welfare requirement applicable to farmed fish at the time of killing, during transport and at farm level.			
26)	78. [...] asks the Commission to update its guidance on aquaculture and Natura 2000 areas if necessary;	The criteria and guidance will not have a mandatory character but aim to facilitate the Member States in the designation and management of sites, in order to ensure a coherent protected areas network across the EU. At the same time, the legal requirements for the Natura 2000 network continue to apply, including the obligation for Member States to complete the network where gaps still remain, which is particularly the case in the marine environment. Member States will need to show, by 2023, significant progress in legal designations and effective management of protected areas. The Commission will assess in 2024 whether the EU is on track to meet the protection targets, or whether stronger actions, including EU legislation, are needed.		Actions planned for 2024.	
27)	79. [...] calls on the Commission and Member States, therefore, to ensure full and effective implementation of Regulation (EU) 2016/2336 <sup>49</sup> , including in relation to seamounts; calls further on the Commission, following limitations in the Mediterranean <sup>50</sup> , to limit, where	Where necessary, measures will be proposed to limit the use of fishing gear most harmful to biodiversity,			

<sup>49</sup> Regulation (EU) 2016/2336 of the European Parliament and of the Council of 14 December 2016 establishing specific conditions for fishing for deep-sea stocks in the north-east Atlantic and provisions for fishing in international waters of the north-east Atlantic (OJ L 354, 23.12.2016 p. 1).

<sup>50</sup> Council Regulation (EC) No 1967/2006 of 21 December 2006 concerning management measures for the sustainable exploitation of fishery resources in the Mediterranean Sea (OJ L 409, 30.12.2006, p. 11).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	necessary in order to protect coastal ecosystems, the use of bottom trawling in other coastal areas, including in its upcoming action plan to conserve fisheries resources and protect marine ecosystems, to ensure the most sustainable and least damaging practices;	including bottom-contacting fishing gear (paragraphs 79 and 82).		Because of the general character of the answer, it is unclear whether the Commission has proposed such measures.	
28)	81. Calls on the Commission to produce a definition of super trawlers and to consider measures restricting their activities in EU waters, in particular prohibiting their activities in protected areas;	No specific reply is provided to this particular point.		Not mentioned.	
29)	86. Insists that the priority for protected areas must be environmental conservation and restoration and that no activity in these areas should undermine this goal; calls on the Commission and the Member States to prohibit harmful human activity within MPAs; urges the Commission to ensure that sensitivity of species and habitats to human pressures in all sea areas are addressed in national marine spatial plans;	The Commission is working with the Member States to provide guidance and criteria on the protection of 30% of EU land and sea areas, including 10% strict protection (paragraph 86), and is further assessing options for binding targets to restore marine ecosystems as part of its upcoming proposal for a Nature Restoration Law.		The action is ongoing.	
30)	87. Underlines the importance of strengthening and effectively implementing existing MPAs, especially in biodiversity hotspots; calls on the Commission and the Member States to draw up, as a matter of priority, specific management plans for these areas, establishing clear conservation objectives and effective monitoring, surveillance and control measures; urges, in particular, the Member States to expedite the development and submission of joint recommendations for the management of fisheries in their MPAs under Article 11 CFP; considers that the effects of climate change on marine species should be fully taken into account; calls further on the Commission, in cooperation with the Member States, to put forward criteria and guidance for appropriate management planning of designated MPAs, including in ecological corridors, based on the	Although the follow-up does not mention par.87, the Commission however states that it will continue to support the implementation efforts of the Member States to strengthen the network of terrestrial and marine protected areas, through the provision of capacity building and guidance.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	best available science, and to facilitate cooperation between Member States;				
31)	88. Calls on the Commission to count MPAs in international targets only once they are appropriately managed;	Although the follow-up does not mentions par. 88, the Commission however states that the Commission will continue to support the implementation efforts of the Member States to strengthen the network of terrestrial and marine protected areas, through the provision of capacity building and guidance.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
32)	101. Welcomes the commitment to plant at least three billion additional trees in the EU; stresses that the EU's tree planting initiatives should be based on clear ecological principles, proforestation, sustainable reforestation, greening of urban and peri-urban areas, restoration, enhancement of connectivity and agroforestry, in line with the latest scientific knowledge; calls on the Commission to ensure that these initiatives are carried out only in a manner compatible with and conducive to the biodiversity objectives, making sure that this planting does not replace existing old-growth and biodiverse forests, and contributing to making sure forests are resilient, mixed and healthy;	The new EU Forest Strategy ( <a href="#">COM(2021) 572 final</a> ) announced that the Commission as part of its upcoming proposal for a legally binding instrument for ecosystem restoration will also propose to include targets for restoring forest ecosystems (paragraph 91), as well as develop guidelines on biodiversity-friendly afforestation and reforestation by early 2022 (paragraph 101). The Strategy includes an annex with a roadmap of the Commission's action to implement the pledge to plant 3 billion additional trees by 2030 in the EU.		The activity appear to be ongoing.	
33)	103. Asks the Commission to investigate the possibility of creating a legal framework, primarily within the World Trade Organization (WTO), allowing for the prohibition of trade in certain raw materials, products and services that endanger biodiversity;	No specific reply is provided to this particular point.		Not mentioned.	
34)	104. Stresses that the environmental footprint of the EU's production and consumption should urgently be	As concerns the footprint of EU consumption and production (paragraph 104), drivers of biodiversity		No further / specific actions proposed/promised to be taken by the Commission on this particular point as	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>reduced in order to stay within planetary boundaries; calls on the Commission to propose binding EU targets for 2030 to significantly reduce the EU's material and consumption footprints and bring them within planetary boundaries by 2050<sup>51</sup>; supports the Commission in taking a life-cycle approach to measuring the environmental footprint of products and organisations; considers that plastic production and use should be reduced; considers that economic activities affecting and exploiting ecosystems and their biodiversity should incorporate all possible safeguards to mitigate their negative impact on these ecosystems;</p>	<p>loss are so far only indirectly covered by some of the 16 impact categories under the Environmental Footprint methods. In the preparatory phase of the <a href="#">Green Claims initiative</a>, Product Environmental Footprint Category Rules on feed for food producing animals were developed as part of the Environmental Footprint pilot phase. These are calculation rules for quantifying the life cycle environmental impacts (including on climate change) of various feeds.</p> <p>Building on existing business practice on natural capital accounting, the Commission is supporting business-driven development of generally accepted accounting principles and methodologies for natural capital and biodiversity for businesses. The CSRD proposal refers to related projects in recital 38, which puts emphasis on developing standardised natural accounting practices within the EU and internationally. The recital refers to the Transparent Project financed under the LIFE programme which develops the first natural capital accounting methodology that will make existing methods easier to compare and more transparent. It also refers to the Natural Capital Protocol as an important reference tool.</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

<sup>51</sup> Resolution on the New Circular Economy Action Plan.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
35)	106. Calls on the Commission to assess the impact of climate change on the abundance and geographical distribution of species, to take this assessment into account when implementing the Biodiversity Strategy for 2030, and to help the Member States to incorporate the results into their national policies and in future reporting under the nature directives;		Understanding and tackling the inevitable impacts of climate change on ecosystems (paragraph 106), and the role of ecosystem conservation and restoration for climate change mitigation and adaptation (paragraph 107), are among the main priorities of this Commission. The upcoming proposal for a Nature Restoration Law will propose an enhanced legal framework to restore ecosystems, improve their resilience and boost climate-related services. The EU strategy on adaptation to climate change ( <a href="#">COM(2021) 82 final</a> ) adopted in February 2021 foresees measures to increase the resilience of terrestrial and marine ecosystems, species and fisheries. By the end of 2022, the Commission will report on the functioning of the Common Fisheries Policy, looking, among other elements, at how the current policy framework caters for the effects of climate change on fisheries and aquaculture and exploring possible adaptation solutions for increased ecosystems resilience. The ongoing review of the Marine Strategy Framework Directive will also look into climate aspects in relation to the protection of the marine environment.		The activities appear to be ongoing.	
36)	108. Calls on the Commission, following the adoption of the European Climate Law <sup>52</sup> and considering the important role of natural carbon sinks in achieving climate neutrality, to propose an ambitious science-based EU 2030 target for the removal of greenhouse gas emissions by natural carbon sinks, which should be consistent with the Biodiversity Strategy for 2030 and set in legislation; recalls, furthermore, that a swift reduction of emissions must remain the priority;		Regarding the Parliament’s call to set in legislation a science-based target for the removal of greenhouse gas emissions by carbon sinks (paragraph 108), the Commission takes note of the call to present a long-term EU action plan on climate and biodiversity (paragraph 109). The Commission confirms that a coherent effort and synergies between biodiversity and climate policies are already systematically being promoted under the EU Climate Adaptation Strategy,		The activity appears to be ongoing.	

<sup>52</sup> Provisional agreement on a regulation of the European Parliament and of the Council establishing the framework for achieving climate neutrality and amending Regulation (EU) 2018/1999 (European Climate Law) (COM(2020)0080 – C9 0077/2020 – 2020/0036(COD)).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the upcoming Nature Restoration Law and other actions under the EU Biodiversity Strategy for 2030 aimed at promoting nature-based solutions, the European Climate Pact and the “Fit for 55” package, including the proposal for a revision of the land use, land use change and forestry (LULUCF) Regulation as well as the EU Forest Strategy. The Commission confirms that evidence on the contribution of natural carbon sinks in Europe is taken into account in preparation of legislative proposals such as the upcoming proposal on EU nature restoration targets. In addition, the Circular Economy Action Plan (COM(2020) 98 final) and the Farm to Fork Strategy (COM(2020) 381 final) have announced two initiatives on the certification of carbon removals and on carbon farming set in the context of the European Green Deal. They will aim at stepping up climate removals, including nature-based removals, at scale conducive to the EU objective of climate neutrality and in full respect of the biodiversity objective.</p>			
37)	<p>109. Calls on the Commission to present as soon as possible a long-term EU action plan on climate and biodiversity, including on the respective targets, that improves coordination and ensures coherence, sustainability and interconnections for future actions, and includes commitments under the post-2020 Global Biodiversity Framework, the Paris Agreement, its nationally determined contributions and the SDGs;</p>	<p>[...] The Commission takes note of the call to present a long-term EU action plan on climate and biodiversity (paragraph 109). The Commission confirms that a coherent effort and synergies between biodiversity and climate policies are already systematically being promoted under the EU Climate Adaptation Strategy, the upcoming Nature Restoration Law and other actions under the EU Biodiversity Strategy for 2030 aimed at promoting nature-based solutions, the European Climate Pact and the “Fit for 55” package, including the proposal for a revision of the land use, land use change and forestry (LULUCF) Regulation as well as the EU Forest Strategy. The Commission confirms that evidence on the contribution of natural carbon sinks in Europe is taken into account in preparation of legislative proposals such as the</p>		<p>The activity appears to be ongoing.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>upcoming proposal on EU nature restoration targets. In addition, the Circular Economy Action Plan (COM(2020) 98 final) and the Farm to Fork Strategy (COM(2020) 381 final) have announced two initiatives on the certification of carbon removals and on carbon farming set in the context of the European Green Deal. They will aim at stepping up climate removals, including nature-based removals, at scale conducive to the EU objective of climate neutrality and in full respect of the biodiversity objective.</p>			
38)	<p>115. Calls on the Commission to set clear and ambitious baselines for these targets and, together with the Member States, determine for each Member State fair contributions to the EU-wide targets reflecting their different starting points and circumstances; insists that each Member State should implement robust measures to meet their targets;</p>	<p>Progress towards the first pesticides target in the Farm to Fork Strategy (paragraph 115) will be measured using a modified version of the methodology for Harmonised Risk Indicator 1, established under Directive 2009/128/EC. Progress towards the second pesticides target will be measured using sales data, which the Member States report to the Commission under Regulation (EC) No 1185/2009. As announced by the Farm to Fork Strategy, the Commission has proposed a revision of the Pesticides Statistics Regulation (<a href="#">COM(2021) 37 final</a>) to overcome data gaps and promote evidence-based policy making. The improvement of the EU legal framework for collecting pesticide statistics is an important step in this process, as the resultant data is necessary to develop new harmonised risk indicators. The Commission will also revise the current harmonised risk indicator 2 (based on the numbers and properties of emergency authorisations) to better reflect the risks associated with these authorisations. This is now possible, as from 1 March 2021, Member States are required to report additional data on emergency authorisations to the Commission, in line with a revised Guidance Document on emergency authorisations.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
39)	117. Recalls its resolution of 16 January 2019 on the Union's authorisation procedure for pesticides <sup>53</sup> , and expects the Commission and the Member States to address all its calls without delay; calls on the Commission to include in its revision of the implementing measures of the Plant Protection Products framework provisions to support the EU-wide pesticide reduction objective, such as by strengthening and clarifying the environmental criteria for granting market access to pesticides; stresses that when EFSA concludes that there are unacceptable impacts on the environment, an approval decision should not be granted; calls on the Commission to make regulatory risk data more transparent and accessible;	As regards the Parliament's opposition to the renewal of approval of glyphosate beyond 2022 (paragraph 116), the Commission would like to point out that <a href="#">a new scientific assessment of whether glyphosate meets the approval criteria of Regulation (EC) No 1107/2009 on plant protection products is currently ongoing.</a>		The activity appears to be ongoing.	
40)	119. Calls on the Commission to swiftly finalise the revision of Directive 2009/128/EC on the sustainable use of pesticides <sup>54</sup> , including therein the pesticide reduction targets, and to take all measures to ensure that Member States commit to its implementation, including in their national action plans;	No specific reply is provided to this particular point.		Not mentioned.	

<sup>53</sup> OJ C 411, 27.11.2020, p. 48.

<sup>54</sup> Directive 2009/128/EC of the European Parliament and of the Council of 21 October 2009 establishing a framework for Community action to achieve the sustainable use of pesticides (OJ L 309, 24.11.2009, p. 71).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
41)	122. Calls on the Commission and the Member States to ensure equal standards and effective checks on agricultural products imported from non-EU countries;	Regarding standards and checks on agricultural products imported from non-EU countries (paragraph 122), all imports of meat and meat products entering the single market have to comply with the conditions for entry into the EU (food safety and animal health). Border controls are a key factor to ensure that products entering the European Union are safe and meet the specific import conditions. Those products are subject to specific controls at their point of entry, in the so called Border Control Posts, and released on the EU market only if they have satisfactorily undergone the relevant checks. According to Article 134 of the Union Customs Code (UCC), goods brought into the EU customs territory shall be subject to customs supervision and may be subject to customs controls. Where applicable, they shall be subject to such prohibitions and restrictions as are justified on grounds of, inter alia, the protection of the health and life of humans, animals or plants and the protection of the environment. Furthermore, based on Articles 46 and 47 UCC, customs authorities may carry out any customs controls they deem necessary, in close cooperation with other competent authorities. The Commission proposal for a Regulation establishing the EU Single Window Environment for Customs ( <a href="#">COM(2020) 673 final</a> ) aims to facilitate and digitalise the exchange of documents between competent authorities and customs, thus strengthening the overall robustness of controls and the coordination between customs and competent authorities. Finally, the European Commission carries out audits in third countries aimed at monitoring the implementation and enforcement by these countries of EU legislation on food and feed safety, animal health, animal welfare and plant health in relation to		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (EU food safety and animal health , Border Control Posts, etc).</p> <p>Integrated Nutrient Management Action Plan planned for 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>establishments which are authorised to export to the EU</p> <p>As concerns the target to reduce nutrient losses and pollution from fertilisers, the Commission is focusing as priority on the implementation and enforcement of current environmental legislation, on implementing the relevant actions in the Zero Pollution Action Plan and on preparing a robust Integrated Nutrient Management Action Plan, to be presented in 2022. The Action Plan will address nutrient pollution at source, supporting the implementation and enforcement of environmental and climate legislation, identifying with Member States the nutrient load reductions needed to achieve the targets, applying balanced fertilisation and sustainable nutrient management and managing nitrogen and phosphorus better throughout their lifecycle.</p>			
42)	123. Calls on the Commission to review Regulation (EC) No 396/2005 on maximum residue levels of pesticides <sup>55</sup> to incorporate animal health and environmental risks as criteria of the legislation;	The Commission is currently not planning a revision of <a href="#">Regulation (EC) No 396/2005</a> on maximum residue levels of pesticides in or on food and feed of plant and animal origin (paragraph 123), and points out that this regulation already allows for a number of factors to be taken into account when setting Maximum Residue Levels of Pesticides. Furthermore, <a href="#">Regulation (EC) No 1107/2009</a> on the placing of plant protection products on the market aims to ensure that pesticides can only be authorised and used in the EU when it has been demonstrated that they have no harmful effects on human and animal health, and no unacceptable effects on the environment.		No further specific actions proposed/promised to be taken by the Commission.	

<sup>55</sup> Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin (OJ L 70, 16.3.2005, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
43)	127. Calls on the Commission and the Member States to ensure that the objectives of the Biodiversity Strategy for 2030 are fully reflected in the implementation of the Farm to Fork Strategy, the Chemicals Strategy for Sustainability and in the upcoming zero pollution action plan, which should also address light and noise pollution, including underwater noise;	The Zero Pollution Action Plan aims to tackle, among other pressures, noise and light pollution (paragraphs 127 and 128). In line with the findings of the 2017 evaluation of the Environmental Noise Directive and the 2020 evaluation of the Outdoor Noise Directive, the Commission will focus on better tackling noise at source, review progress in 2022 and consider whether there is a need to set noise reduction targets at EU level in the Environmental Noise Directive. The Commission will also review the Marine Strategy Framework Directive by 2023, taking into account the need to reduce plastic and other sources of marine litter, underwater noise and contaminants. The Commission will work with Member States on EU threshold values for maximum levels of underwater noise stemming from maritime transport, construction, dredging and other offshore activities. Horizon Europe will continue to support research on pollution of emerging concern such as light pollution and its impacts on biodiversity. Achieving the target set in the EU Biodiversity Strategy for 2030, to improve the status of 30% of the species currently not in favourable conservation status, may require specific actions for reducing the negative impacts of light pollution on certain nocturnal species, where this is identified as a significant pressure.	C C	Commission' action planned for 2022.  Revision of the Marine Strategy Framework Directive planned by 2023.	C C
44)	128. Calls on the Commission to set an ambitious reduction target for 2030 on the use of outdoor artificial light and to propose guidelines on how artificial light at night can be reduced by the Member States;	[...] a review of the EU ecodesignact for light sources will be carried out as from 2024. It will consider relevant available evidence, including on potential adverse effects of lighting on biodiversity, and may result in additional actions.	C C	A review of the EU ecodesign act for light sources planned for 2024.	C C
45)	129. Stresses the need for the Biodiversity Strategy for 2030 to include dedicated measures on reducing pollution with a direct impact on biodiversity and	No specific reply is provided to this particular point.	C C		C C

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	health, such as plastic, microplastic and chemical pollution; calls on the Commission to ensure the swift implementation of all actions of the new circular economy action plan and related legislation;			Not mentioned.	
46)	131. Regrets that the list of Invasive Alien Species of Union concern represents less than 6 % of the IAS present in the EU; calls on the Commission to step up action and ensure that IAS that affect threatened species are included in the list; calls further on the Commission to improve prevention by introducing mandatory risk assessments prior to the first import of non-native species and by proposing EU-wide white lists of species permitted for import, keeping, breeding and trade as pets on the basis of a scientific risk assessment and ecological characteristics in the EU as soon as possible;	The Commission is actively engaging with the Member States and experts in work to further complement the list of Invasive Alien Species (IAS) of Union concern (paragraph 131), [...] As concerns the Parliament's call to introduce mandatory risk assessments prior to first import of non-native species and to propose EU-wide white lists of species permitted for import, keeping, breeding and trade, the Commission notes that EU legislation is oriented towards the use of negative lists because of the WTO obligations: one cannot ban trade unless a risk is demonstrated. The white list approach was considered but not taken up at the very early stages of preparation of the IAS Regulation. While current EU secondary law does not allow for this approach at Union level, a few Member States have adopted it, mainly for the pet trade. In order to apply a white list approach to the import of species into the EU, we would need to ban a very high number of species (in the range of thousands) and only allow import after an assessment of those considered not to pose a significant risk. The cost could be very high, and it does not help in the case of invasive alien species introduced by accident such as by ballast water.		No further specific actions proposed/promised to be taken by the Commission.	
47)	133. Regrets that only one marine species has been included in the List of Invasive Alien Species of Union concern <sup>56</sup> ; calls on the Commission to address this	The Commission is actively engaging with the Member States and experts in work to further complement the list of Invasive Alien Species (IAS) of

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	disproportionately low number of marine IAS to ensure proper alignment with Regulation (EU) No 1143/2014 <sup>57</sup> ;	Union concern (paragraph 131), including the addition of marine IAS (paragraph 133) based on comprehensive risk assessments. The Commission will publish in 2021 its first report on the review of the application of the IAS Regulation. The EU Biodiversity Strategy has committed the EU to tackling as priority IAS that affect threatened species (paragraph 132). As concerns the Parliament’s call to introduce mandatory risk assessments prior to first import of non-native species and to propose EU-wide white lists of species permitted for import, keeping, breeding and trade, the Commission notes that EU legislation is oriented towards the use of negative lists because of the WTO obligations: one cannot ban trade unless a risk is demonstrated. The white list approach was considered but not taken up at the very early stages of preparation of the IAS Regulation. While current EU secondary law does not allow for this approach at Union level, a few Member States have adopted it, mainly for the pet trade. In order to apply a white list approach to the import of species into the EU, we would need to ban a very high number of species (in the range of thousands) and only allow import after an assessment of those considered not to pose a significant risk. The cost could be very high, and it does not help in the case of invasive alien species introduced by accident such as by ballast water.		<a href="#">Report</a> on invasive alien species published on 13 October 2021.	

<sup>57</sup> Regulation (EU) No 1143/2014 of the European Parliament and of the Council of 22 October 2014 on the prevention and management of the introduction and spread of invasive alien species (OJ L 317, 4.11.2014, p. 35).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
48)	<p>134. Highlights that the societal and environmental benefits of prevention and restoration exceed the investment costs; calls on the Commission to ensure effective biodiversity mainstreaming and proofing across EU spending and programmes on the basis of the EU taxonomy; calls for the effective application of the 'do no significant harm' principle across EU spending and programmes; calls on the Commission to provide a comprehensive assessment of how the EUR 20 billion per year as a minimum needed for nature could be mobilised, to make corresponding proposals for the EU's annual budget and to examine the need for a dedicated funding instrument for TEN-N; notes the agreement to mainstream spending for biodiversity of 7.5 % from 2024 and 10 % from 2026 onwards; considers that efforts should be made to reach at least 10 % annual spending on biodiversity under the multiannual financial framework as soon as possible from 2021 onwards; stresses the need to ensure consistency between climate and biodiversity funding; urges the Member States to include biodiversity actions in the recovery and resilience plans; insists that biodiversity-related EU spending should be tracked in accordance with an effective, transparent and comprehensive methodology to be set out by the Commission, in cooperation with the European Parliament and the Council;</p>	<p>The Commission welcomes Parliament's emphasis on the need for effective biodiversity mainstreaming and proofing across the EU spending and programmes and for the implementation of the "do no significant harm" principle, as well as for assessing how the necessary funding of at least EUR 20 billion/ year for biodiversity could be mobilised in the framework of the commitments under the Interinstitutional Agreement on the Multiannual Financial Framework (MFF) planning 10% of the EU budget addressing biodiversity priority in 2026 and 2027 (paragraph 134).</p> <p>The Commission has provided guidance on biodiversity-proofing the EU budget and fund-specific methodologies in the past MFF. The Commission is currently updating the guidance on biodiversity tracking for the 2021-2027 MFF. Under the new MFF, the 'do no harm' principle is reflected across EU funds and programmes. The 'sustainability proofing guidance' recently adopted in the context of InvestEU contains meaningful biodiversity provisions, as well as the Recovery and Resilience Facility 'do no significant harm' checklist, and guidance on the application of the principle during the programming of cohesion policy funds. Amongst other objectives, each measure must demonstrate that no significant harm is done to the protection and restoration of biodiversity and ecosystems. The agreement on the Multiannual Financial Framework for the next seven years, in combination with NextGenerationEU, provide substantial means for all the Member States to address the environmental challenges including an increased share of climate-related action and an increase of the EU's level of ambition by dedicating at least 7.5% in 2024 and 10% in 2026 and 2027 of</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>The update of the guidance appears to be ongoing.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		annual spending under the MFF to biodiversity for which the Commission is developing a new tracking methodology.			
49)	135. Calls on the Commission and the Member States to assess by 2022 which subsidies are harmful to the environment, with a view to phasing them out without further delay; calls for the reorientation of financial incentives towards biodiversity-positive investments and taxation systems towards an increased use of environmental taxation and environmental revenues;	It is also important to increase the efficiency of spending and to urgently address the drivers of biodiversity loss, including environmentally harmful subsidies (paragraph 135). The Commission also welcomes the Parliament's emphasis on the need for action in this regard. To support this important assessment work, the Commission is working with stakeholders on a toolbox to help Member States and stakeholders identify and phase out environmentally harmful subsidies (including for biodiversity). Phasing out and redirecting subsidies and incentives harmful to biodiversity is also a key issue and EU priority in the context of ongoing Convention on Biological Diversity (CBD) negotiations on the post-2020 global biodiversity framework. [...]		The action is ongoing : the Commission is working with stakeholders on a toolbox to help Member States and stakeholders identify and phase out environmentally harmful subsidies (including for biodiversity).	
50)	136. Recalls the EU's commitment to fulfil the objectives of the Paris Agreement; calls on the Commission and the Member States to end all indirect and direct fossil fuel subsidies <i>as early as possible and by 2025 at the latest</i> ;	No specific reply is provided to this particular point.		Not mentioned.	
51)	139. Calls on the Commission to provide clear guidelines and incentives to mobilise private finance for biodiversity and to align investments with the objectives of the European Green Deal and the Biodiversity Strategy for 2030; calls further on the Commission to provide an ambitious and forward-looking framework integrating	On 6 July, the Commission published a new <a href="#">Strategy for financing the transition to a sustainable economy</a> that proposes action in a number of areas, including extending the EU taxonomy framework and sustainable finance standards and labels to recognise transition efforts, and providing the right tools and incentives to access transition finance. It provides a framework for both the public and private sector to		Strategy for financing the transition to a sustainable economy <a href="#">published</a> in July 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	legislative measures and financial incentives for both the public and private sector to support the achievement of the goals and targets under the Biodiversity Strategy for 2030 as part of the upcoming renewed sustainable finance strategy	support the goals and targets under the Biodiversity Strategy for 2030 (paragraph 139), and also highlights the necessity for the financial system to become more resilient to the risks posed by climate change and environmental degradation – and the steps needed to achieve this. Finally, the strategy presents the Commission’s international approach, including work on global convergence on standard setting, such as on taxonomy and disclosures.			
52)	140. Calls on the Commission and Member States to ensure policy coherence and align EU and national policies with the Biodiversity Strategy for 2030; calls further for all treaty principles to be upheld throughout EU policies, in particular the precautionary principle and the polluter-pays principle;	Although the follow-up does not mention point 14, the Commission however states that in international negotiations, the EU should advocate that marine minerals in the international seabed area cannot be exploited before the effects of deep-sea mining on the marine environment, biodiversity and human activities have been sufficiently researched, the risks are understood and the technologies and operational practices are able to demonstrate no serious harm to the environment, in line with the precautionary principle and taking into account the call of the European Parliament (paragraphs 184 and 185).		No further specific actions proposed/promised to be taken by the Commission.	
53)	141. Highlights the need for a legally binding biodiversity governance framework – a biodiversity law – following a comprehensive impact assessment which steers a path to 2050 through a set of objectives, including targets for 2030 and the COP15 commitments, and which establishes a monitoring mechanism with SMART indicators, within and beyond protected areas; calls on the Commission to submit a legal proposal to this end in 2022; stresses that ensuring sufficient human and financial resources will be critical for effective governance;	The Commission takes note of the Parliament’s call to submit a proposal for a legally binding biodiversity governance framework by 2021 (paragraph 141). The Commission is following the approach announced in the EU Biodiversity Strategy for 2030. As a first step, a renewed, cooperation-based biodiversity governance framework will be put in place in 2021. It will build on the lessons learnt from the governance framework that was set up to track progress in implementing the 2020 Biodiversity Strategy. [...] [...] The Commission welcomes the Parliament’s emphasis on the importance of sufficient human and financial		Two new tools - an online <a href="#">actions tracker</a> and a <a href="#">targets dashboard</a> strengthening the biodiversity governance framework - are <a href="#">available</a> as of 15 December 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>resources for effective governance (paragraph 141). Human resources are a constraint for the full implementation and enforcement of biodiversity (and wider environmental) policy at the EU, national and sub-national levels. In 2022, the Commission will consider capacity building needs and may provide guidance to the national authorities on support that exists under EU instruments. For the Commission itself, the workload has been, and will remain very high over the next years. To reduce the important gap between the available resources and those needed for delivering on the biodiversity commitments and actions of the Biodiversity Strategy, the Commission is building synergies within and across the Commission services working on various Green Deal work-streams, which also helps to increase the mainstreaming of environmental and biodiversity objectives across policy areas.</p>			
54)	<p>142. Calls on the Commission to consider establishing an independent scientific European panel on biodiversity or similar body to assess the consistency of EU measures with the ambition of the Biodiversity Strategy for 2030 and to make policy recommendations accordingly, avoiding any potential overlap with policies of the EEA or other EU and international bodies;</p>	<p>[...] The Commission has also suggested a standing discussion point with the Parliament and the Council in order to exchange on progress achieved in implementing the EU Biodiversity Strategy for 2030. As part of its deliberations on the setup of the new biodiversity governance framework, the Commission will consider the need and feasibility of establishing an independent scientific European panel on biodiversity or similar body to assess the consistency of EU measures with the ambition of the Biodiversity Strategy for 2030 (paragraph 142), as well as the possibility of strengthening existing relevant bodies to this effect.</p> <p>The Commission will review the effectiveness of the governance framework in 2023, and may propose</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p> <p>The revision planned for 2023.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		additional measures, including a binding approach if considered necessary to ensure implementation.			
55)	144. Calls on the Commission to reinforce biodiversity within EU youth programmes such as the European Voluntary Service, and to launch a Green Erasmus programme as part of the overall Erasmus programme focused on the exchange of knowledge, students and professionals in the field of restoration and conservation;	<p>Education and the involvement of young people will be of the utmost importance for the green transition. The Commission takes note of the Parliament's proposal to create a Green Erasmus Programme (paragraph 144) and stresses that environment and the fight against climate change are already key priorities for the new Erasmus+ programme for the period 2021-2027. The Programme will therefore be a key instrument to increase learning and exchange and develop skills in green forward-looking fields, with special attention to subjects such as rural development, sustainable farming, the management of natural resources or soil protection. Priority will be given to projects that support the contribution of education, training and culture to the sustainable development goals, enable behavioural changes for individual preferences, cultural values and awareness for sustainable development, consumption habits, and lifestyles; and equip young people and adults with the skills and competences needed for the green transition. Erasmus+ is also a powerful instrument to reach out to and engage with a wide spectrum of players in our society (schools, universities, vocational education and training (VET) providers, youth and sport organisations, non-governmental organizations (NGOs), local and regional authorities, civil society organisations, etc.).</p> <p>To help integrate sustainability into schools, higher education and professional training, the Commission</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (new Erasmus+ programme for the period 2021-2027).</p> <p>The proposal for a Council recommendation was <a href="#">published</a> on 13 April 2021.</p>

Calls on the Commission to ensure that trade and sustainable development chapters include a roadmap with concrete and verifiable commitments upon which progress in other chapters will be made; stresses the importance of systematically conducting regular ex post sustainability evaluations and impact assessments of trade agreements to ensure consistency with the EU's international commitments on biodiversity; invites the Commission to update existing chapters of trade and investment agreements by making use of active and timely review clauses to ensure alignment of existing FTAs with the European Green Deal at the earliest opportunity, and to present its results and planned adjustments to Parliament;</p>	<p>The Commission fully agrees that EU trade policy should contribute to enhanced cooperation and ambitious biodiversity commitments in third countries. In line with the calls made by the Parliament (paragraphs 168, 169, 170, 171 and 173), all recent free trade agreements concluded by the EU have a Chapter on Trade and Sustainable Development with the aim to foster mutual supportiveness between economic growth, social development and environmental protection – including biodiversity provisions. Trade policy must actively support and be part of the ecological transition. In line with the EU Biodiversity Strategy for 2030 and the Trade Policy Review<sup>62</sup>, the Commission will ensure full implementation and enforcement of the biodiversity provisions in all trade agreements. The upcoming review of the 15-point Action Plan on Trade and Sustainable Development will provide an opportunity to make further progress on that front. The Commission is also committed to better assess the impact of EU free trade agreements on biodiversity and ecosystems, such as forests and wetlands. In May, the Commission published a new methodology for assessing the impacts of trade agreements on biodiversity and ecosystems. It will contribute to further improve the sustainability impact assessments and ex-post evaluations of EU Free Trade Agreements. The methodology is already being tested in the context of the ex-post evaluation of the EU-Colombia/Ecuador/Peru trade agreement.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Chapter on Trade and Sustainable Development).</p>	

<sup>62</sup> COM(2021) 66 final.

67)	173. Calls on the Commission and the Member States to make sure that imported products meet the same standards required of European producers, in order to protect the environment and biodiversity, and to ensure respect for human and labour rights; stresses the need to promote a global level playing field and to take measures to prevent the potential displacement of biodiversity losses abroad; calls on the Commission to provide a study on the effects of EU exports and their production methods on biodiversity;	The Commission fully agrees that EU trade policy should contribute to enhanced cooperation and ambitious biodiversity commitments in third countries. In line with the calls made by the Parliament (paragraphs 168, 169, 170, 171 and 173), all recent free trade agreements concluded by the EU have a Chapter on Trade and Sustainable Development with the aim to foster mutual supportiveness between economic growth, social development and environmental protection – including biodiversity provisions. Trade policy must actively support and be part of the ecological transition. In line with the EU Biodiversity Strategy for 2030 and the Trade Policy Review <sup>63</sup> , the Commission will ensure full implementation and enforcement of the biodiversity provisions in all trade agreements. The upcoming review of the 15-point Action Plan on Trade and Sustainable Development will provide an opportunity to make further progress on that front. The Commission is also committed to better assess the impact of EU free trade agreements on biodiversity and ecosystems, such as forests and wetlands. In May, the Commission published a new <a href="#">methodology for assessing the impacts of trade agreements on biodiversity and ecosystems</a> . It will contribute to further improve the sustainability impact assessments and ex-post evaluations of EU Free Trade Agreements. The methodology is already being tested in the context of the ex-post evaluation of the EU-Colombia/Ecuador/Peru trade agreement.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Chapter on Trade and Sustainable Development).	

<sup>63</sup> COM(2021) 66 final.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
68)	174. Calls on the Commission to take action to prohibit the export from the EU of hazardous substances banned in the EU, in line with the 'do no harm principle', the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade and the European Green Deal;		As concerns exports from the EU of hazardous substances banned in the EU (paragraph 174), in line with the "do no significant harm" principle, the Chemicals strategy for sustainability adopted by the Commission on 14 October 2020 proposes the EU to lead by example and ensure that hazardous chemicals banned in the EU are not produced for export, including by amending relevant legislation if and as needed.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( Chemicals strategy for sustainability).	
69)	175. [...] encourages the Commission to consider the inclusion of expertise on trade and environment in disputes arising from conflicts between trade commitments and environmental protection exceptions; urges the Commission to promote this proposal in the context of its WTO climate and trade initiative; asks for an independent in-depth analysis of the effects of the remaining investor-state dispute settlement and investment court system provisions in trade agreements;		Regarding the call to the Commission to promote, in the context of the WTO climate and trade initiative, the inclusion of expertise on trade and environment in disputes arising from conflicts between trade commitments and environmental protection exceptions (paragraph 175), the Commission points out that WTO rules already allow WTO Members to adopt legislation in order to achieve their environmental objectives. The Commission is currently engaging with like-minded countries to pursue a strong climate and environmental agenda at the WTO. Through the dedicated forum created to this end, the Trade and Environmental Sustainability Structured Discussions, co-coordinators are currently working to prepare a statement for the 12 <sup>th</sup> Ministerial Conference. Draft elements have been shared with all the membership and currently include: i) launching dedicated discussions on how WTO members could reach long-term climate targets (including net-zero emissions) and how to foster the transition to low-carbon economies; ii) Develop best practices and voluntary actions and partnerships that Members could take to promote the transition to a green economy as well as sustainable supply chains;		The activity appears to be ongoing	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		iii) support developing countries', in particular LDCs, transition to green trade; and iv) explore modalities for possible future negotiations on environmental goods and services, including non-tariff measures.			
70)	176. Regrets the implementation gaps of the EU Wildlife Trade Regulations as they do not cover all critical species and do not provide the same protection for captive-bred animals; calls on the Commission to jointly address legal commercial trade and illegal trade in the review of the EU Wildlife Action Plan against Wildlife Trafficking, which should be fully in line with the Biodiversity Strategy for 2030 and receive adequate funding, including assistance to non-EU countries and to wildlife rescue centres and sanctuaries; calls further on the Commission to propose legislation to ensure that the import, transshipment, purchase and sale of	The Commission is currently evaluating the 2016 EU Action Plan against Wildlife Trafficking ( <a href="#">COM(2016)87 final</a> ) and also remains fully engaged in its fight against forest crime and IUU fishing.		The evaluation of the 2016 EU Action Plan against Wildlife Trafficking appears to be <a href="#">ongoing</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	wildlife taken, processed, transported or sold in violation of laws in the country of origin is prohibited;	Regarding the suggested prohibition of export of nationally protected endangered species (paragraph 176), and if this refers to exports from the EU it would be redundant as relevant species are already covered by the EU Wildlife Trade Regulations, with commercial exports prohibited for the most endangered species. If the reference is to exports from other countries to the EU, such a prohibition would first and foremost have to be established by the source countries. Those countries can always propose the listing of relevant species under CITES, the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and the EU generally supports such efforts. The listing of species under CITES entails obligations on all Parties to the Convention (including the EU) to control the legality and sustainability of international trade.		No further specific actions proposed/promised to be taken by the Commission.	
71)	177. Calls on the Commission and the Member States to lead efforts to end the commercial trade in endangered species and their parts; stresses the importance of developing SMART targets to this end;	The Commission has adopted a delegated act amending the EU rules on ivory trade to further reduce any risk of the EU market indirectly contributing to illegal ivory trading and elephant poaching, in line with the EU Biodiversity Strategy and the Parliament's call (paragraph 177). This act is currently under scrutiny by the European Parliament and the Council. Revised legal provisions will in particular remove exemptions for intra-EU ivory trade without certificates, thus facilitating the control of trade also in antique items and closing a potential loophole. The revised legal provisions will be supplemented by updated Commission guidance on ivory trade, recommending that Member States suspend the issuing of import and export permits for commercial ivory trade in the vast majority of hitherto tradeable items, while retaining exemptions for scientific and cultural exchanges and for trade in		Partial delivery on the EP call (Ivory only). No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		musical instruments, also in line with the Parliament's call.			
72)	178. Calls on the Commission and the Member States to assist the global community in addressing risks linked to commercial trade and sales of wild animals; calls on the Commission to use the regulatory dialogues provided for in FTAs to promote stringent EU sanitary and phytosanitary standards and animal welfare in order to minimise the risks of future epidemics and pandemics; calls further on the Commission to consider, if necessary, the adoption of a moratorium on imports of wild animals or other species from emerging infectious disease hotspots in order to address any safety concerns;	The EU is fully engaged in promoting a "One health" approach as part of the response to COVID 19, the Building Back Better agenda, and prevention of future similar pandemics. Regarding adopting a moratorium on imports of wild animals from reported emerging infectious disease hotspots (paragraph 178), the Commission is not aware of such places being reported somewhere in a systematic, internationally (or even nationally) agreed manner. Public and animal health rules are already in place in the EU to prevent the incursion and spread of animal diseases and zoonoses through the movements of kept live animals, including captive wild animals. In particular, the Animal Health Law provides for an appropriate EU legal framework, which allows a systematic "One Health" approach and rapid reaction to existing or emerging health problems in or arising from both kept and wild animals.		No further specific actions proposed/promised to be taken by the Commission.	
73)	181. Takes note of the failure of the WTO members to conclude the negotiations on fisheries subsidies by the end of 2020; deeply regrets the failure to achieve the commitment under the SDGs (SDG 14.6) of phasing out harmful fisheries subsidies by 2020; supports the call for a global agreement to ban harmful fisheries subsidies; calls therefore for the EU to play a more prominent role in the negotiations and on the Commission to guarantee that fisheries provisions in trade agreements are consistent with protecting marine biodiversity;	As concerns the negotiations on a global agreement to ban harmful fisheries subsidies, (paragraph 181), the EU's objective is to effectively prohibit harmful subsidies while maintaining those that are not harmful to fish stocks or ecosystems. These negotiations are a direct implementation of the United Nations Sustainable Development Goals, and thus in line with the EU's objective that trade policy should support wider values such as the stewardship of the environment.		No further specific actions proposed/promised to be taken by the Commission.	
74)	184. [...] and calls on the Commission and the Member States to promote a moratorium, including at the International Seabed Authority, on deep-seabed	In international negotiations, the EU should advocate that marine minerals in the international seabed area cannot be exploited before the effects of deep-sea			

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	mining until such time as the effects of deep-sea mining on the marine environment, biodiversity and human activities at sea have been studied and researched sufficiently and deep seabed mining can be managed to ensure no marine biodiversity loss nor degradation of marine ecosystems; emphasises the need for the Commission to cease funding for the development of seabed mining technology in line with a circular economy based on minimising, reusing and recycling minerals and metals;		mining on the marine environment, biodiversity and human activities have been sufficiently researched, the risks are understood and the technologies and operational practices are able to demonstrate no serious harm to the environment, in line with the precautionary principle and taking into account the call of the European Parliament (paragraphs 184 and 185). The role of the European Commission so far at the Council meetings of the International Seabed Authority has been limited to its capacity of observer. Following a mapping of EU competences involved – in particular in relation to the protection of the marine environment, the Commission presented in January 2021 a proposal for a Council decision on the position to be taken on behalf of the EU at the meetings of the Council and the Assembly of the International Seabed Authority ( <a href="#">COM(2021) 1 final</a> ), in view of achieving a coordinated position with the Member States at the next Council meeting of the International Seabed Authority in 2021, and ensuring a robust draft Exploitation Regulations (“Mining Code”) of the International Seabed Authority.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (COM(2021)1).	
75)	185. Reiterates its call <sup>64</sup> on the Member States and the Commission to work through the International Seabed Authority in order to ensure transparency in its working methods as well as the effective protection of the marine environment from harmful effects and the protection and preservation of the marine environment, as required under Parts XI and XII of the UN Convention on the Law of the Sea, and calls on the Member States to assume a proactive and progressive role within international bodies in order to put forward		In international negotiations, the EU should advocate that marine minerals in the international seabed area cannot be exploited before the effects of deep-sea mining on the marine environment, biodiversity and human activities have been sufficiently researched, the risks are understood and the technologies and operational practices are able to demonstrate no serious harm to the environment, in line with the precautionary principle and taking into account the call of the European Parliament (paragraphs 184 and		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (COM(2021)1).	

<sup>64</sup> Resolution on international ocean governance.

	transparency reforms and increase the overall environmental ambition of actions undertaken;	185). The role of the European Commission so far at the Council meetings of the International Seabed Authority has been limited to its capacity of observer. Following a mapping of EU competences involved – in particular in relation to the protection of the marine environment, the Commission presented in January 2021 a proposal for a Council decision on the position to be taken on behalf of the EU at the meetings of the Council and the Assembly of the International Seabed Authority ( <a href="#">COM(2021) 1 final</a> ), in view of achieving a coordinated position with the Member States at the next Council meeting of the International Seabed Authority in 2021, and ensuring a robust draft Exploitation Regulations (“Mining Code”) of the International Seabed Authority.			
76)	187. Calls on the Faroe Islands to stop its controversial annual hunt on pilot whales, also known as the Grindadráp; calls on the European Commission and Member States to continuously engage with the Faroe Islands on this issue with a view of abolishing the practice;	No specific reply is provided to this particular point.		Not mentioned.	
77)	188. Urges the Member States to fully implement and comply with the obligations set out in existing EU environmental legislation; calls on the Commission to more swiftly, effectively, and transparently, including through the regular follow-up of cases, pursue infringement procedures to remedy all cases of non-compliance, and to improve by 2022 its public database in order for the steps taken by Member States and the Commission in response to environmental infringements to be tracked in a clearly understandable and accessible way; calls further on the Commission to allocate sufficient resources in order to overcome the current delays; believes that a sufficient level of	As stated in the EU Biodiversity Strategy for 2030, the Commission will step up measures to ensure the implementation and enforcement of environmental legislation with impacts on biodiversity, including effective and transparent follow-up of non-compliance cases (paragraphs 188 and 189). This includes ongoing work on the implementation and enforcement of the Nature Directives, the Water Framework Directive and the Marine Strategy Framework Directive as well as the Environmental Impact Assessment Directive and the Strategic Environmental Assessment Directive.		The general nature of the commitment’s wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	qualified staff and resources is crucial for the successful implementation and enforcement of EU policies;				
78)	189. Calls on the Commission, more specifically, to swiftly pursue infringement procedures on illegal logging cases, collaborating with other European organisations such as the European Anti-Fraud Office (OLAF), and on non-compliance with the Water Framework Directive <sup>65</sup> and the Marine Strategy Framework Directive <sup>66</sup> in order to meet the requirements to achieve Good Environmental Status for European seas and waters;	As stated in the EU Biodiversity Strategy for 2030, the Commission will step up measures to ensure the implementation and enforcement of environmental legislation with impacts on biodiversity, including effective and transparent follow-up of non-compliance cases (paragraphs 188 and 189). This includes ongoing work on the implementation and enforcement of the Nature Directives, the Water Framework Directive and the Marine Strategy Framework Directive as well as the Environmental Impact Assessment Directive and the Strategic Environmental Assessment Directive.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
79)	190. Calls on the Member States, including regional and local authorities, to speed up implementation and enforcement, and on Member State governments to update their national biodiversity strategies and to submit biennial implementation reports to the Commission on the Biodiversity Strategy for 2030 at national level; calls on the Commission to conduct a mid-term evaluation and to review the strategy if needed;	As stipulated in the EU Biodiversity Strategy for 2030, the Commission will review the strategy in 2024 and if needed step up efforts (paragraph 190). In addition, as part of the new biodiversity governance framework to be put in place by the end of 2021, the Commission will introduce new online tools to track the implementation of the biodiversity actions and progress towards the biodiversity objectives. It will draw on the reporting tools to present concise annual technical progress notes on the implementation of the Strategy. The Commission suggests a standing annual discussion point with the Parliament and the Council in order to exchange on progress achieved in		The review of the EU Biodiversity Strategy for 2030 is scheduled for 2024.	

<sup>65</sup> Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

<sup>66</sup> Directive 2008/56/EC of the European Parliament and of the Council of 17 June 2008 establishing a framework for community action in the field of marine environmental policy (Marine Strategy Framework Directive) (OJ L 164, 25.6.2008, p. 19).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the implementation of the EU Biodiversity Strategy to 2030.			
80)	<p>192. Believes that the fight against environmental crime needs to be strengthened in Member States and across their borders; considers that there are major disparities in EU Member States that prevent criminal environmental law from being effective; urges the Commission therefore to revise the Environmental Crime Directive<sup>67</sup> in order to address these disparities; calls for environmental crimes and offences, such as IUU fishing, and wildlife crime to be recognised as serious crimes that should be adequately penalised with strong deterrents, especially in the context of organised crime;</p> <p>calls on the Commission furthermore to explore the possibility of adding a protocol on wildlife crime to the UN Convention against Transnational Organized Crime;</p>	<p>The Commission considers the international dimension of wildlife trafficking crucial and will promote the adoption of an additional protocol under the <a href="#">UN Convention against Transnational Organized Crime</a> (paragraph 192), as outlined in the recent Strategy against Organised Crime (COM(2021) 170 final).</p> <p>[...]</p> <p>As concerns environmental crimes and offences (paragraph 192), the <a href="#">EU Strategy to tackle Organised Crime 2021-2025</a> recognised environmental crime as one of the specific forms of crime requiring a dedicated response from a legislative and policy perspective. Additionally, the <a href="#">Commission Work Programme</a> plans for December 2021 a proposal for a revision of the Directive on the protection of the environment through criminal law ((<a href="#">Directive 2008/99/EC</a>).</p>		<p>The activity appears to be ongoing.</p> <p>The proposal for a Directive on the protection of the environment through criminal law and replacing Directive 2008/99/EC was <a href="#">published</a> on 15 December 2021.</p>	
81)	<p>194. Expresses its deep concern at the situation of environmental defenders and activists, especially in developing countries and calls on the Commission and the Member States to support them across the world;</p>	<p>Although the follow-up does not mentions point 194, the Commission however takes note of the call by the European Parliament to dedicate a specific strategy to the protection of local communities and defenders of environmental human rights and land rights (paragraph 195). The Commission shares the view that such support is of fundamental importance and that supporting the rights of Indigenous Peoples and Local Communities and environmental defenders and their involvement in programs benefiting biodiversity is crucial to rebalance our relationship with nature.</p>		<p>No further specific actions proposed/promised to be taken by the Commission.</p>	

<sup>67</sup> Directive 2008/99/EC of the European Parliament and of the Council of 19 November 2008 on the protection of the environment through criminal law (OJL 328, 6.12.2008, p. 28).

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
82)	195. Urges the Commission to define a specific protection and support strategy for local communities and defenders of environmental human rights and land rights, which should be coordinated across all external assistance programmes; also calls for enhanced support for civil society organisations working to protect the environment and biodiversity, in particular through the establishment of partnerships and the building up of capacity to defend the rights of indigenous peoples and local communities;		The Commission takes note of the call by the European Parliament to dedicate a specific strategy to the protection of local communities and defenders of environmental human rights and land rights (paragraph 195). The Commission shares the view that such support is of fundamental importance and that supporting the rights of Indigenous Peoples and Local Communities and environmental defenders and their involvement in programs benefiting biodiversity is crucial to rebalance our relationship with nature. EU development cooperation and partnerships systematically defend a rights-based approach and the Commission is fully supportive of associating Indigenous Peoples and Local Communities (IPLCs) to conception, steering and implementation of action to protect, conserve, sustainably use and restore ecosystems and biodiversity, as part of an integrated approach at global, regional, national and local levels.		No further specific actions proposed/promised to be taken by the Commission.	
83)	196. Reiterates that Member States must ensure the conservation of Natura 2000 areas and the maintenance or restoration of the favourable conservation status of protected species and habitats; calls for the Habitats Directive to be fully implemented aligning conservation actions with the latest technical and scientific progress; is aware of the issues arising from the coexistence of livestock farming with large carnivores in some Member States; calls on the Commission and the Member States therefore to take adequate measures to address socio-economic conflicts linked to the coexistence with large predators, such as preventive and compensation measures, ensuring their protection;		Concerning conflicts and coexistence with large carnivores (paragraph 196), the Commission has initiated a range of measures to encourage cooperation between Member States, engage in dialogue with stakeholders at the EU Platform on Coexistence between People and Large Carnivores and the Regional Platforms on People and Large Carnivores, and to promote best practices in management methods. It is for the relevant authorities in the Member States to make the best use of the available EU and national technical tools and funding opportunities to design and implement the most suitable solutions to improve coexistence between humans and large carnivores, in accordance with the existing legislation and with our common goals as stated in the EU Biodiversity Strategy for 2030.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
84)	197. Underlines that the successful implementation of the strategy depends on the involvement of all relevant actors and sectors; underlines the need to involve and incentivise these actors and sectors to advance the goals of the Biodiversity Strategy for 2030; calls on the Commission to create a stakeholder platform for discussion with the various stakeholders and communities represented and to ensure an inclusive, equitable and just transition; believes that this platform should facilitate active and representative participation of communities and stakeholders in the decision-making process;	The Commission is following the approach announced in the EU Biodiversity Strategy for 2030. As a first step, a renewed, cooperation-based biodiversity governance framework will be put in place in 2021. It will build on the lessons learnt from the governance framework that was set up to track progress in implementing the 2020 Biodiversity Strategy. The renewed governance framework will strengthen the coordination structure of Commission expert groups and other bodies in order to ensure a coherent and participatory implementation of the EU Biodiversity Strategy for 2030, with the representation and engagement of stakeholders and communities (paragraph 197). It will also include a mechanism for monitoring and review of progress, as well as a strengthened science-policy interface. The Commission has also suggested a standing discussion point with the Parliament and the Council in order to exchange on progress achieved in implementing the EU Biodiversity Strategy for 2030.		Two new tools - an online <a href="#">actions tracker</a> and a <a href="#">targets dashboard</a> strengthening the biodiversity governance framework - are <a href="#">available</a> as of 15 December 2021.	

4.1.14.7. ENVI Resolution 7: EP resolution of 20 October 2021 on an EU strategy to reduce methane emissions

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>An EU strategy to reduce methane emissions</b></p>	<p>20/10/2021  <a href="#">T9-0436/2021</a>  <a href="#">2021/2006(INI)</a>  <b>ENVI</b></p>	<p>On 23 November 2021, the Parliament received “<a href="#">Replies of the Commission to positions and resolutions adopted by the European Parliament –October II 2021 part-session</a> ” informing that the Commission will not be responding formally to the requests addressed in the resolution. The concerns raised in the resolution are fully shared by the Commission will not be responding formally to the requests addressed in the resolution, as they were comprehensively addressed in plenary by Commissioner Kadri Simson. Moreover, the European Commission is working on a proposal on methane emissions reduction in the energy sector which will be presented by the end of the year.</p> <p>The <a href="#">plenary debate</a> took place on 18 October 2021.</p>			
<p>1)</p>	<p>1. Welcomes the cross-sectoral approach outlined in the EU strategy to reduce and mitigate methane emissions; calls on the Commission to propose a fair, comprehensive and clear legislative framework, setting binding measures and methane reduction targets covering all sectors, leading to a significant reduction of methane emissions in the EU by 2030, in line with the Paris Agreement and with the modelled pathways that limit global warming to 1,5°C from the IPCC 1,5°C Special Report, the IPCC Sixth Assessment Report and the UNEP Global Methane Assessment, in order to achieve the EU’s environmental and climate objectives in synergy with European and international business;</p>				
<p>2)</p>	<p>2. [...] calls on the Commission and the Member States to suggest and negotiate a binding global agreement on methane mitigation at the COP26 meeting in Glasgow in line with the modelled pathways that limit global warming to 1,5°C from the IPCC 1,5°C Special Report, the IPCC Sixth Assessment Report and the</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	UNEP Global Methane Assessment; notes that the UNEP Global Methane Assessment quantified the global benefits for all market and non-market impacts to be approximately USD 4 300 per tonne of methane reduced and that approximately 1 430 annual premature deaths could be prevented per million tonne reduced; [...]				
3)	4. [...] calls on the Commission to seek effective tools to improve the quality of measurement and reporting of these emissions in all sectors concerned; [...]				
4)	5. Underscores the need to revise EU climate and environmental legislation in a coherent manner to reflect enhanced ambition in line with the goals of the Paris Agreement; calls on the Commission to propose an overarching and binding legislative framework on methane emissions, to avoid unnecessary overlaps between the legislation, to ensure the consistency of the National Emission Reduction Commitments Directive <sup>68</sup> with meeting the EU's objectives on air quality, its 2030 climate goals, and its objective of achieving climate neutrality by 2050 at the latest, as enshrined in the European Climate Law and, accordingly, to revise the National Emission Reduction Commitments Directive as soon as possible; [...]				
5)	6. [...] calls on the Commission, furthermore, to include methane in the list of polluting substances laid down in Annex II to the IED and to expand the scope of the IED to better cover the methane-emitting sectors; [...]				

<sup>68</sup> Directive (EU) 2016/2284 of the European Parliament and of the Council of 14 December 2016 on the reduction of national emissions of certain atmospheric pollutants (OJ L 344, 17.12.2016, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	11. Calls on the Commission to analyse the implications for policies and measures of using a 20-year time horizon for global warming potential, as a complement to the 100-year timeframe currently used in accordance with the UNFCCC guidelines on greenhouse gas inventories; [...]				
7)	12. Calls on the Commission to include methane in the zero-pollution monitoring framework;				
8)	13. Points to the lack of global leadership on the mitigation of methane emissions, with very little action being taken on methane internationally; calls on the Commission to make methane emissions reduction a top priority in its climate diplomacy and to take action, notably through a UN-based pathway, within the framework of the EU's diplomatic and external relations in order to spearhead an international agreement on methane mitigation, promoting coordinated action to reduce methane emissions, as well as updating methane mitigation requirements;				
9)	14. Calls on the Commission to support the establishment of an independent international methane emissions observatory in partnership with the UNEP, the Climate and Clean Air Coalition and the International Energy Agency, which should be tasked with collecting, reconciling, verifying and publishing anthropogenic methane emissions data at a global level and developing a methane supply index; [...]				
10)	20. Notes that some non-EU countries have already introduced a ban on venting and flaring; calls on the Commission to propose legislation for the energy sector with binding rules on MRV, building on the methodology of the Oil and Gas Methane Partnership (OSGMP) Framework 2.0 and mandatory LDAR,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	including on imports, which should be built on best practices and applied right across the supply chain; [...]				
11)	21. Notes that fossil gas and oil are used in the energy and petrochemical sectors and that both sectors therefore contribute to the methane emitted at fossil gas and oil well pads and processing plants; notes that according to the International Energy Agency, petrochemicals account for 8 % and 14 % of total primary demand for fossil gas and oil and that these shares are bound to increase; calls on the Commission to ensure that MRV and LDAR obligations and routine venting and flaring rules apply equally to fossil gas and oil used in the petrochemical sector;				
12)	22. Invites the Commission, when preparing its future legislation on methane emissions, to properly take into account that the investments undertaken by infrastructure operators to tackle methane leaks should be recognised within the scope of regulated activities as a signal of the importance of both safety and of sustainable activities, which might be incentivised by regulatory authorities;				
13)	24. [...] calls on the Commission to make all fossil fuel imports into the Union conditional on their compliance with EU regulations on MRV and LDAR and the rules on venting and flaring, applicable to the entire fossil fuel supply chain, up to and including production; [...]; calls on the Commission, moreover, to support the establishment and use of a third-party verification system in conjunction with other monitoring methods as a possible solution to verifying emissions data across the supply chain, including in relation to imports; [...]				
14)	25. Calls on the Commission to adopt specific measures to identify and address methane leaks from super-emitters in all sectors, and not limited to the energy				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	sector, including through the use of the international methane emissions observatory;				
15)	28. [...] calls on the Commission to adopt measurement equipment standards and impose a measuring requirement for all mines; stresses that the European Pollutant Release and Transfer Register should follow the new reporting to ensure policy coherence;				
16)	29. Stresses the importance of clean-up works aimed at preventing and eventually eliminating methane emissions from closed sites; calls on the Commission to develop a specific programme to address methane emissions from closed and abandoned coal mines by providing incentives to former coal mines to address their methane emissions, without this leading to the promotion of benefits or neglect of the responsibilities of the owners responsible for their sealing, in line with the polluter pays principle, as enshrined in Article 191(2) TFEU, and to support the just transition of coal regions in developing alternative activities which are in line with the objective of climate neutrality by 2050; calls on the Commission and the Member States, moreover, to consider a specific programme or other actions, including financial support on MRV and emissions mitigation in abandoned oil and gas sites without known ownership, while having full regard for the polluter pays principle; highlights the importance of adequate decommissioning of such infrastructure;				
17)	30. [...] calls on the Commission to analyse these thoroughly before approving the plans with the aim of ensuring policy coherence; stresses that tightening the framework conditions for methane emissions in the agricultural sector, in particular the livestock sector, should not entail production being shifted abroad;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
18)	31. Points out that in agriculture a significant share of global methane emissions originates from outside the EU and calls on the Commission to ensure that food continues to be produced in the most environmentally sustainable locations; [...]				
19)	33. Recalls that a significant amount of methane emission in the agri-food sector is due to imports; calls on the Commission to ensure a level playing field for EU producers by insisting that imports from third countries meet the same high standards as in the EU;				
20)	34. Calls on the Commission to estimate the contribution of imported agri-food products to EU anthropogenic methane emissions through the EDGAR-FOOD database;				
21)	37. Notes that while extensive livestock production may result in lower methane emissions from farms, it increases the emissions per unit of product produced; calls on the Commission and the Member States to take into account the effects of mitigation strategies on global methane emissions;				
22)	41. Urges the Commission to support Member States in the collection of data regarding the carbon sequestration potential of grassland in order to allow for a more targeted approach to climate policy;				
23)	42. Acknowledges that animal production is the key activity on permanent grassland, allowing for the survival, economic stability and existence of rural farms in hill and mountain regions, thus preventing the overgrowth of such areas; calls on the Commission to focus investment efforts on funding innovation in methane inhibitors, including those for pasture-based systems, and to collaborate with third countries involved in similar research;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	44. [...] calls on the Commission to develop such recommendations and specific actions to effectively promote healthy, sustainable and more balanced diets;					
25)	45. Stresses that technologies and practices to limit methane emissions from agriculture, including sustainable livestock management practices, are developing at a fast pace and should be advanced and implemented as soon as possible; calls on the Commission to ensure that proven effective and cost-efficient innovations that mitigate methane measures in agricultural production are quickly implemented in the EU and that those already available are utilised by EU producers in order to continue to reduce methane emissions within the framework of the common agricultural policy (CAP) and the national strategic plans, including through specific, dedicated eco-schemes and carbon farming initiatives under the CAP and through other private or public funding streams; [...]					
26)	46. Highlights that there are already well demonstrated practices in place to help reduce emissions from manure management; notes that these practices also reduce the level of ammonia released by the agriculture sector; calls on the Commission to propose regulatory measures to ensure the uptake of these techniques, with realistic and ambitious targets and timelines; stresses, furthermore, that nitrogen-based fertilisers are responsible for a large amount of methane emissions; calls on the Commission to take appropriate action to reduce associated emissions as part of the Farm to Fork Strategy;					

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
27)	47 [...] calls on the Commission to ensure the timely revision of the Feed Additives Regulation <sup>69</sup> ;					
28)	48. [...] calls on the Commission, accordingly, to ensure full coherence between the European Climate Law, the CAP and the Methane Strategy;					
29)	49. Welcomes the Methane Strategy's acknowledgement that biogas derived from food or feed crops increases methane emissions and can therefore undermine any mitigation benefits, and that biogas developments should be based primarily on waste or residues; calls on the Commission to develop a robust, independent certification of origin scheme for biogas production methods and feedstock; [...]					
30)	51. Calls on the Commission to further analyse methane emissions from sludge and waste water and to revise the Sewage Sludge Directive <sup>70</sup> and Urban Waste Water Treatment Directive <sup>71</sup> in 2022, which should also address air pollutant and greenhouse gas emissions, notably methane; calls on the Commission, furthermore, to be ambitious and to integrate a strong focus on methane emissions in the 2024 review of the Landfill Directive <sup>72</sup> and the upcoming revision of the IED; highlights the need for measures to require landfill sites to use the bio-methane they produce until its energy content drops below a useful value and, once it is no longer viable to use the bio-methane produced at a landfill site, for the use of bio-oxidation and other					

<sup>69</sup> Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition (OJ L 268, 18.10.2003, p. 29).

<sup>70</sup> Council Directive 86/278/EEC of 12 June 1986 on the protection of the environment, and in particular of the soil, when sewage sludge is used in agriculture (OJ L 181, 4.7.1986, p. 6).

<sup>71</sup> Council Directive 91/271/EEC of 21 May 1991 concerning urban waste-water treatment (OJ L 135, 30.5.1991, p. 40).

<sup>72</sup> Council Directive 1999/31/EC of 26 April 1999 on the landfill of waste (OJ L 182, 16.7.1999, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	technologies in hot spots in order to reduce the remaining methane emissions; recalls, in this regard, that methane emissions from the waste sector partly originate from leaks from biogas plants; calls on the Commission to publish guidelines on the best methods to build and operate biogas plants to address leaks due to poor maintenance, operation and design; [...]				
31)	52 [...] calls on the Commission to develop a comprehensive strategy to ensure that Member States that are not in compliance with that target take corrective measures and actions; calls on the Commission to support Member States in their efforts to move away from landfills; [...]				
32)	53. Calls on the Commission, in the light of the above: <ul style="list-style-type: none"> <li>– to set binding EU targets for commercial and industrial waste, as there are still no specific targets on this;</li> <li>– to propose targets to cap the generation of residual waste in the planned review of the Waste Framework Directive<sup>73</sup> and Landfill Directive in 2024;</li> <li>– to align the Landfill Directive with the EU’s overall climate change and greenhouse gas emissions reduction objectives, following an in-depth analysis to better address greenhouse gas-related issues;</li> <li>– to produce a BREF document for landfilling, including provisions on methane;</li> </ul>				
33)	54. Calls on the Commission to monitor the Member States’ progress regarding the separate collection of bio-waste, a rule due to be implemented by 2023; recalls that in accordance with the hierarchy of waste				

<sup>73</sup> Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJL 312, 22.11.2008, p. 3).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	treatment, Member States are legally required to take measures to encourage the recycling of bio-waste, which include composting and digestion of bio-waste, bearing in mind that bio-waste is usually collected and treated at a local level; stresses, therefore, that the Commission should encourage further cooperation between the regions and the Member States and harmonisation through the exchange of best practices;				
34)	56. Emphasises that closure and after-care procedures for landfill cells are key to reducing leakages, taking into account the entire life cycle of landfill sites; calls on the Commission to provide support suited to the conditions of each Member State in order to ensure full application of the waste hierarchy, emphasising waste prevention, the achievement of the 31 December 2023 target for source separation and separate collection of bio-waste, including by encouraging cooperation between the public and private sectors to secure a high degree of separate collection, recycling and recovery of biodegradable waste, so as to ensure efficient diversion from landfill without providing EU funding for incineration; [...]				

#### 4.1.14.8. ENVI Resolution 8: EP resolution of 24 November 2021 on a Pharmaceutical Strategy for Europe

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			Action of the Commission
<b>A Pharmaceutical Strategy for Europe</b>	24/11/2021 <a href="#">T9-0470/2021</a> <a href="#">2021/2013(INI)</a> ENVI	N .A. <sup>74</sup>			
1)	4. Underlines that COVID-19 has brought about unprecedented challenges for health systems and their sustainability, but has also had a dramatic impact on patients, including those suffering from chronic conditions, and their ability to access treatments and care; calls on the Commission and Member States to assess and address the overall impact of the pandemic on patients and on the resilience of healthcare systems and to work collaboratively to ensure that no patient is left behind and that continuity of care is guaranteed even during emergency situations;				
2)	6. Calls on the Commission to start the process of defining unmet medical needs, under the coordination of the European Medicines Agency (EMA), in order to establish a commonly accepted definition that would help to better orientate research needs and prevent the use of various definitions for unmet medical needs which, at an early stage, lead to exorbitant pricing in the marketing of medicines;				
3)	7. Calls on the Commission to leverage and coordinate the pharmaceutical, industrial, digital strategies, the renewed EU trade policy and other relevant policies to promote European competitiveness and ensure that				

<sup>74</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the EU is capable of competing with challenger regions;				
4)	10. Welcomes the Commission's intention to assess and review the existing incentive framework; calls on the Commission to stimulate competition by adapting its regulatory framework and stimulating investments in off-patent orphan and paediatric medicines, including for oncology, paediatric cancers and neurological diseases;				
5)	12. Considers that AMR constitutes a serious threat to public health; calls on the Commission and Member States to fund projects aimed at improving diagnostics and developing new antibiotics, as well as developing a protocol for the prudent use of antibiotics and an awareness campaign for health professionals to encourage more targeted treatment based on patients' actual needs;				
6)	15. Underlines that the 'One Health' approach should guide the reduction and use optimisation of antimicrobials, as well as the development of new medicines, including antimicrobial agents; calls on the Commission and Member States to assess the existing legislative framework related to AMR and, where appropriate, come forward with a proposal to revise it;				
7)	16. Calls on the Commission to assess, and revise where appropriate, the system of incentives to promote research into and the development of new medicines for unmet diagnostic and therapeutic needs, prioritising public interests and patient safety when assessing projects promoted by the pharmaceutical industry to combat cancers, including paediatric cancers, in particular to incentivise first-in-child development of paediatric anticancer medicines, rare diseases, neurodegenerative and mental illnesses, and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	AMR, with the aim of finding more therapeutic options and meeting the needs of patients and health systems;				
8)	17. Calls on the Commission to promote the creation of an EU framework to guide and regularly evaluate the implementation of national plans to fight these diseases, and calls on the Member States to support R&D that focuses on unmet medical needs; stresses that a system based solely on research incentives will not achieve the necessary objectives in the fight against rare diseases;				
9)	18. Calls on the Commission to provide public research funding to investigate the use of repurposed, off-label and off-patent products that can be used safely and effectively in patients; stresses that medicines resulting from publicly funded research must be equally available across the Union for a fair and affordable price and that, where appropriate, the marketing authorisation holder (MAH) may consider voluntary non-exclusive licensing for these products; emphasises that EU funding should be steered towards projects where research is needed the most;				
10)	19. Stresses the importance of continuous innovation, including in the off-patent segment, to address patients' unmet needs; calls on the Commission to design a fit-for-purpose regulatory framework that will enable the development of value added medicines, as well as recognise this category of affordable innovation, through appropriate incentives, for its value for healthcare systems;				
11)	21. Calls on the Commission, in dialogue with the Member States, to work on a framework for pharmaceutical legislation and a reimbursement system that favours meaningful innovation for patients and incentivises fewer 'me-too' pharmaceuticals which				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	have no added value or highly expensive pharmaceuticals that offer only minor improvements for patients;				
12)	22. Calls on the Commission to revise Regulation (EC) No 141/2000 and Regulation (EC) No 1901/2006 ; calls for an assessment of the effectiveness of funding and of public-private partnership projects, especially with a view to improving the relationship between local health authorities, universities and industry; recognises that further improvements are needed to address the needs of the patients that these regulations aim to cover and calls on the Commission to allow for measures targeting important underserved areas in order to streamline, simplify and adjust regulatory procedures;				
13)	24. Calls on the Commission to support additional research in underrepresented populations, such as the elderly, children, women and patients with comorbidities, including obesity as a primary morbidity, as well as where it exists as a gateway chronic disease to other non-communicable diseases; stresses the need to take gender into account in research, diagnosis and treatment and in the impact of medicines and therapeutics, as women across their lifespan remain underrepresented in biomedical and health research and data; underlines that consequently, the evidence base is weaker for women, as well as for older people, leading to many conditions being underdiagnosed in women, such as cardiovascular disease;				
14)	25. Calls on the Commission to build on the work of Europe's Beating Cancer Plan and ensure that Europe becomes the worldwide centre of excellence for R&D in emerging, innovative fields of medicine; underlines				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	that state-of-the art technologies, such as nanomedicines, stand to provide solutions to current treatment challenges in areas such as cancer and cardiovascular diseases; highlights that these innovative fields of medicine should be authorised by the centralised approval framework for nanomedicines;				
15)	26. Calls on the Commission to ensure that EU funding for biomedical research and development is made conditional on the full transparency and traceability of investments, on ensuring supply in all Member States, and on facilitating the best outcome for patients, including in terms of the accessibility and affordability of manufactured medicines;				
16)	28. Calls on the Commission to promote the development of research in the field of pain therapy drugs;				
17)	29. Welcomes the Commission's publication on 5 February 2021 of the SAMIRA Action Plan; calls on the Commission, when revising pharmaceutical legislation, to draw up a regulatory framework geared to the deployment of radiological and nuclear technologies for therapeutic, and not solely diagnostic, purposes;				
18)	33. Calls on the Commission to promote dialogue with the Member States and all relevant stakeholders to promote 'Made in Europe' pharmaceuticals by strengthening manufacturing and supply resilience, by assessing additional criteria for national pricing, at no additional cost to patients and without prejudice to the sustainability of the health system; stresses that these criteria should include high environmental manufacturing standards, robust supply chain management and investment in innovation and research;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	35. Underlines that such dialogue should further encourage cooperation in pricing negotiations and, where appropriate, joint procurement; recalls that national pricing should be based on the transparency of factors such as public and private research, development costs and added therapeutic value; calls on the Commission to promote information sharing among Member States on net medicine prices through the European Integrated Price Information Database (EURIPID) collaboration;				
20)	36. Calls on the Commission to explore the possibility of establishing, subject to conditionalities, an EU fund, co-financed by the Member States, for negotiating and purchasing orphan medicines and other new, personalised medicines, so as to guarantee equal access for patients from different Member States to effective therapeutics and treatments and prevent individual healthcare units from having to bear excessive costs when treating rare diseases;				
21)	37. Calls on the Commission to work with Member States to introduce measures to increase transparency in the area of research into and the development and production of medicinal products; calls for greater price transparency and invites Member States to continue to share their best pricing practices on a voluntary basis; stresses that pricing should remain a national competence, taking account of diversity across the EU;				
22)	38. Calls on the Commission to periodically evaluate and review the incentive system, increase price transparency, and highlight the factors limiting affordability and patient access to medicinal products; further calls on the Commission to address the root causes of shortages of pharmaceuticals and propose sustainable solutions that also promote on- and off-				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	patent competition and the timely entry into the market of generic and biosimilar medicines;				
23)	40. Further calls on the Commission, especially its Directorate-General for Competition, and national competent authorities to be alert to anti-competitive conduct and investigate anti-competitive practices in the pharmaceutical industry;				
24)	44. Stresses the importance of generic, biosimilar and value added medicines for consistently increasing equitable access for patients and making healthcare systems sustainable in a European Union where access is still uneven; calls on the Commission to ensure healthy competition at the expiry of intellectual property (IP) exclusivities as a matter of urgency by ensuring accessibility to biosimilar medicines from day one and by removing all barriers to access to competition, for example through patent linkage, by banning IP evergreening practices that unduly delay access to medicines and by allowing single global development;				
25)	45. Calls on the Commission to take measures to support the greater market presence of these medicines, and to harmonise at EU level the interpretation of the Bolar provision concerning possible exemptions from the legal framework for the Unitary Patent system for generic drug manufacturers;				
26)	46. Calls on the Commission to take action that promotes research, development and the production of generic and biosimilar medicines in the EU and to propose EU protocols for the interchangeability of biosimilar medicines, as defined by the EMA, with respect for individual patient needs and clinicians'				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	freedom to prescribe the best treatment for each patient, while always keeping the patient informed and at the centre of all decision making;				
27)	47. Encourages Member States to evaluate measures to promote the use of financial savings generated in the national health system from the use of biosimilar medicines and reinvest them in a transparent and tangible way to improve the quality of care services; calls on the Commission to encourage Member States to support transparent practices with regard to biosimilar-related cost savings; calls on the Commission to facilitate arrangements such as gainsharing programmes;				
28)	49. Stresses the importance of improving education on biosimilar medicines; calls on the Commission to promote relevant educational and communication activities among healthcare professionals by setting up a dedicated Europe-wide online resource centre;				
29)	50. Welcomes the fact that the Commission will launch a pilot project to better understand the root causes of the delayed arrival of medicines on the market; calls on the Commission to look at the huge differences across the EU of the average number of days between the approval of a medicine and the moment it become available to patients and to propose new ways to improve the regulatory process and its implementation and implement innovative solutions to reduce delays to the market entry of medicines;				
30)	55. Calls on the Commission to ensure that the European Partnership for Health Innovation is driven by public interest considerations; calls on the Commission to adopt and implement a general policy on such conditionalities under Horizon Europe;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
31)	59. Calls on the Commission to ensure that HERA is public-interest driven and contributes effectively to the development, availability and affordability of safe and effective medical countermeasures;				
32)	60. Reiterates its position that the Commission should consider the creation of a European version of the US Biomedical Advanced Research and Development Authority; welcomes the fact that the Commission has made a proposal for a European HERA but expresses its disappointment that Parliament has not been involved in its proper role as co-legislator;				
33)	65. Welcomes the reference in the strategy to the fact that actions in the area of public procurement can foster competition and improve access to medicines; urges the Commission, in the context of Directive 2014/24/EU <sup>75</sup> , to swiftly propose guidelines for the Member States, notably on how to best implement the most economically advantageous tender (MEAT) criteria, looking beyond the lowest price criteria alone; [...]				
34)	67. Calls on the Commission and the Member States to consider introducing procurement procedures under which contracts may be awarded to a number of successful tenderers, including joint tenderers;				
35)	69. Calls on the Commission to look into policy options that help guarantee that centrally authorised medicines are marketed in all Member States and not just in those that are commercially interesting; stresses the need to ensure that any form of incentive at EU level leads to the fair and affordable pricing of				

<sup>75</sup> Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on public procurement (OJ L 94, 28.3.2014, p. 65).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	pharmaceuticals, particularly innovative ones, across all Member States;				
36)	72. Calls on the Commission to consider new processes for promoting the repurposing of medicinal products; calls on the Commission to facilitate broader off-label use of medicines, including less expensive medicines and medicines used for rare cancers, among others, whenever there is strong scientific evidence of efficacy and safety for patients; highlights, in addition, the opportunity for a new framework to support the marketing and use of drugs with new approved indications in order to make drug repurposing more attractive in the EU;				
37)	73. Calls on the Commission to develop European health strategies on the basis of a common basket of medicines for the treatment of cancer, infections and rare diseases and in other areas particularly affected by shortages; calls on the Commission to consider the option of common pricing criteria to make such medicines affordable;				
38)	76. Welcomes the strong focus and several initiatives included in the pharmaceutical strategy on the need to optimise and modernise the existing regulatory framework, such as through revision of the variations legislation, more digitalised and efficient regulatory processes, implementation of electronic product information (ePI), streamlined active pharmaceutical ingredient (API) assessment, and better good manufacturing processes (GMPs)/manufacturing management and resources; urges the Commission to make swift progress on this agenda, making the best use of existing digital tools at EU level (telematics);				
39)	77. Urges the Commission and the Member States to introduce financial incentives, where appropriate, to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>preserve and expand the EU's pharmaceutical industrial base, from the production of active pharmaceutical ingredients to medicine manufacturing, packaging and distribution; emphasises the strategic significance of this sector and the importance of investing in European companies in order to diversify resources and encourage the development of innovative production technologies capable of enhancing the responsiveness of entire production lines; recalls that all public funding should facilitate the best outcomes for patients, including in terms of the accessibility of manufactured medicines, by respecting transparency, traceability and supply obligation conditionalities;</p>				
40)	<p>78. Recalls the Commission communication of 5 May 2021 entitled 'Updating the 2020 New Industrial Strategy: Building a stronger Single Market for Europe's recovery', which analyses the EU's strategic dependencies, including the production of active pharmaceutical ingredients and other health-related products, which could lead to vulnerabilities for the EU and affect its core interests, and which refers to the pharmaceutical strategy as a means to address these issues;</p>				
41)	<p>79. Recalls the critical need for global health and for global supply chains to develop local production and distribution capacities in the EU and in developing countries, notably in terms of pharmaceutical research, development and production and always in accordance with social standards and industry due diligence; calls on the Commission to use the industrial, intellectual property and pharmaceutical strategies to facilitate bridging the persisting gap in research and medicine production through product-development partnerships and the creation of open centres for research and production;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
42)	80. Considers that pharmaceutical manufacturing plants are part of Europe's critical health infrastructure; calls therefore on the Commission and the Member States to monitor foreign direct investment in the sector; suggests applying the European Programme for Critical Infrastructure Protection to the health infrastructure sector;				
43)	82. Urges the Commission to propose the inclusion of environmental standards, especially on waste and wastewater management, in the Good Manufacturing Practice guidelines at international level;				
44)	84. Highlights the latest evolution of pharmaceutical products towards disease and patient-specific therapeutics, involving scrupulous manufacturing steps and the need to take into account the high sensitivity to environmental and transport conditions and complicating supply chain logistics; invites the Commission to maximise synergies between European funds and other EU instruments and policies in order to support the design and operation of robust manufacturing processes and distribution networks ensuring agile, responsive and reproducible manufacturing;				
45)	85. Calls on the Commission to expand the role of the EMA in the assessment of drug-device/diagnostic combination products to simplify the fragmented supervisory framework; believes that greater regulatory agility and efficiency can be achieved by adopting a more expertise-driven scientific assessment of marketing authorisations within the EMA;				
46)	87. Calls on the Commission to include in the EU Statistics on Income and Living Conditions (EU-SILC)				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	data on self-reported lack of access to medicines, as so far access to medicines is not measured in the EU-SILC;				
47)	88. Supports the adaptation of existing frameworks for the acceptability in decision making and adoption of AI technologies so as to provide a pathway through which AI can be developed, adopted and implemented in healthcare systems through inclusivity, capacity-building and trust; reiterates that, as with all AI-based technologies, human oversight must be guaranteed at all times; believes that legislation should not lag behind innovation; calls on the Commission to introduce a degree of regulatory flexibility in order to be able to respond more rapidly and effectively to new requirements and products, while respecting safety and ethical criteria;				
49)	89. Calls on the Commission to facilitate assessment processes that allow for early and iterative dialogue on data and evidence as they are generated; calls on the EMA and national medicine agencies to prioritise the submission of data from randomised controlled clinical trials that compare investigational medicines according to the EMA definition against the standard treatment;				
50)	92. Calls on the Commission to evaluate the added value of the supplementary protection certificate (SPC) mechanism in order to prevent delays in access to generic medicines and improve the financial sustainability of healthcare systems;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
51)	93. Draws attention to differences in the validity of patents and SPCs in the various Member States; calls on the Commission to revise the use of SPCs on the basis of technological and scientific advances so as to enable generic and biosimilar medicines to become more competitive within and outside the EU;				
52)	94. Calls on the Commission to evaluate the impact that a proposal for a unitary SPC would have on the market entry of generic and biosimilar medicines and on equitable patient access to treatments, and on the basis of such an evaluation propose a unitary SPC where appropriate;				
53)	97. Highlights the fact that gene and cell therapies, personalised medicine, radionuclide therapy, nanotechnology, next-generation vaccines, including tmRNA derivatives, e-health and the '1+ Million Genomes' initiative can bring enormous benefits in relation to the prevention, diagnosis, treatment and post-treatment of all diseases if they prove their added value compared to existing health technologies; underlines the transformative potential of these novel therapies and technologies for patients as well as societies at large, for example by enabling a shift from chronic management and care to one-time treatment, thereby contributing to reducing costs for health systems, and strengthening their efficacy, sustainability and resilience; urges the Commission to promote sufficient expertise, develop appropriate regulatory frameworks, guide new business models, consistently ensure high standards for safe products, and run information campaigns to raise awareness and ensure the uptake of these innovations; urges the Commission				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to propose adequate resources for the EMA to meet these objectives effectively;				
54)	99. Calls on the Commission to ensure that the existing coordinating bodies will facilitate cross-border treatments based on ATMP and that patients across Europe enjoy equitable access to innovative therapies;				
55)	100. Urges the Commission to work with the EMA to create a one-stop shop for ATMP developers so as to provide them with guidance and a forum for communication on their applications;				
56)	101. Urges the Commission and the EMA to consider the full lifecycle of all innovative medicines and therapies, including gene and cell therapies, personalised medicine, nanotechnology and next-generation vaccines, and ensure a fit-for-purpose framework for off-patent competition at the time of loss of exclusivity; calls on the Commission to establish a regulatory framework for nanomedicines and nanosimilar medicines, and calls for these products to be approved through a compulsory centralised procedure;				
57)	102. Highlights that the take-up of new and innovative treatments, as well as their successful delivery to patients, depends on the knowledge, preparedness				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and technical base at the disposal of medical personnel; calls on the Commission and Member States to further cooperate with each other by sharing knowledge and best practices regarding emerging innovative medicines and treatments in order to better prepare their medical professionals;				
58)	103. Calls on the Commission to fully implement the Clinical Trials Regulation <sup>76</sup> to facilitate the launch of large clinical trials carried out in a harmonised and coordinated manner at EU level; stresses that patient associations should be more involved in defining research strategies for public and private clinical trials, in order to ensure that they meet the unmet needs of European patients; welcomes the revision of pharmaceutical legislation to reduce red tape and to adapt it to cutting-edge products, scientific advances and technological transformation; supports clinical trials that are more patient-centred, as well as a new framework for the design of innovative trials, and the pilot project to adopt a framework for the reuse of off-patent medicines; welcomes the launch of a vaccine platform to monitor vaccine efficacy and safety, supported by an EU-wide clinical trials network; urges the Commission to ensure more transparency in clinical trial results, with pharmaceutical companies sharing participant-level data, both positive and negative results, protocols and other trial documents in a timely manner;				

<sup>76</sup> Regulation (EU) No 536/2014 of the European Parliament and of the Council of 16 April 2014 on clinical trials on medicinal products for human use, and repealing Directive 2001/20/EC (OJL 158, 27.5.2014, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
59)	104. Calls on the Commission to ensure continuous dialogue between the European Centre for Disease Control, the EMA and vaccine developers on the establishment and functioning of the vaccine platform to monitor vaccine efficacy and safety;				
60)	105. Calls for full implementation of the rules governing clinical trials in order to consolidate a clear and proportionate set of rules to ensure legal certainty for operators; calls on the Commission to improve the participation of public researchers in clinical trials and to allow clinical trials to be carried out in several Member States simultaneously for long-term research;				
61)	109. Urges the Commission, based on the experience of the authorisation of COVID-19 vaccines, to work with the EMA to consider extending the application of rolling reviews to other emergency medicines and evaluate if further regulatory flexibilities could contribute to a more efficient authorisation system, while safeguarding a high level of safety, quality and effectiveness;				
62)	111. Calls on the Commission to work with the EMA and the EU regulatory network, including industry and all relevant stakeholders, to develop and implement the use of ePI for all medicines in the EU in all the languages of the Member States where the medicines are marketed;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
63)	112. Calls on the Commission to reassess the system which leads from conditional marketing authorisation to standard marketing authorisation or to the exceptional renewal of the authorisation, on the basis of robust clinical data; [...]				
64)	113. Encourages the Commission, in cooperation with the EMA, to consider how established tools such as accelerated authorisation, early dialogue, the PRIME scheme and expanded guidance can be used to make medicine available to patients at a faster pace, especially medicine that has the potential to address an urgent public health threat or an unmet medical need; calls on the Commission to further the application of the EMA's PRIME scheme for life-saving medicines and to include a PRIME designation in the legislative framework, without affecting the safety of patients; recalls that accelerated schemes should not be misused where sufficient evidence on regular marketing authorisation is lacking;				
65)	114. Calls on the Commission, the EMA and the competent authorities to capitalise on all the pragmatic efforts made during the COVID-19 crisis, in particular as regards regulatory flexibility, with a view to effectively tackling medicine shortages, including in emergency situations;				
66)	116. Calls on the Commission to create an innovation ecosystem that facilitates the exchange of experience and access for SMEs and contributes to the EU's becoming a hub for global medical innovation; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
67)	120. Recalls that the EU's open strategic autonomy is linked to the constant and sufficient availability of medicines in all Member States; reiterates, in this regard, the recommendations stated in its resolution of 17 September 2020 on the shortage of medicines; calls on the Commission, the Member States and the EMA to develop an early warning system for medicine shortages, based on a European innovative, user-friendly, transparent and centralised digital platform to exchange information and data on shortages and focusing on supply problems; considers that such a system should be capable of determining the volume of existing medicine stock and demand and provide data capable of detecting, predicting and preventing shortages of medicinal products; calls on the Commission, moreover, to increase public-private collaboration and to monitor the obligation on the part of all relevant supply stakeholders to provide early and transparent information on the availability of medicines, demand for medicines, parallel trade activities, export bans and market distortions, without undue regulatory and administrative burdens;				
68)	121. Calls on the Commission to develop a mechanism to safeguard transparency in production and supply chains in the event of emergencies and beyond; stresses, in this regard, the importance of monitoring and fighting counterfeit pharmaceuticals				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
69)	122. Underlines that the pharmaceutical sector remains an important industrial pillar, as well as a driving force in terms of job creation; stresses the importance of creating high-quality jobs in the EU along the entire pharmaceutical value chain and in the medical field, including the health workforce, with the support of the Next Generation EU instrument; calls on the Commission to propose measures to promote employment and skill-building in the pharmaceutical and medical sectors in all Member States, facilitating geographical balance, talent retention and employment opportunities across the EU as a whole;				
70)	123. Calls on the Commission and the Member States to develop innovative and coordinated strategies and to step up the exchange of good practice in the area of stock management; takes the view that the EMA is the body best suited to be designated as the regulatory authority tasked with preventing shortages of medicines at EU level during emergencies and beyond;				
71)	124. Calls on the Commission to extend the mandate of the EMA further so as to allow it to monitor medicine shortages even beyond health crises and to ensure that it has the necessary resources;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
72)	125. Reiterates its call on the Commission and the Member States to ensure that MAHs and wholesale distributors comply with the requirements of Directive 2001/83/EC in order to secure appropriate and continued supplies of medicines, as well as respecting notification obligations in the event of temporary or permanent supply interruption, and to further clarify these obligations to ensure that MAHs report medicine shortages within the established timeframes; stresses the need to apply dissuasive and proportionate sanctions in the event of non-compliance with these legal obligations, in line with the existing legislative framework;				
73)	126. Insists that the public service obligation established in Article 81 of Directive 2001/83/EC is not sufficient to ensure that the EU as a whole is adequately supplied; calls on the Commission to implement the recommendations of the EU Executive Steering Group on Shortages of Medicines Caused by Major Events in order to prevent and mitigate supply disruption during the pandemic and beyond;				
74)	128. Calls on the Commission to therefore ensure that the revision of the general pharmaceutical legislation builds on a good understanding of the root causes of medicine shortages; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
75)	129. Considers it important that the single market for medicines is safeguarded and that unjustified import and export restrictions, which can cause harm to the single market and decrease affordability, are avoided and addressed by the Commission if they occur; calls on the Commission to assess, and where necessary address, the impacts of parallel trade with regard to medicine shortages in the Member States and to tackle problems adequately by taking the necessary action to ensure that medicines reach all patients in the EU in a timely manner;				
76)	130. Calls on the Commission to use all the means at its disposal to prevent counterfeit medicinal products from entering the market, since such products are often of low quality and dangerous to health, and have a major economic impact;				
77)	133. Calls on the Commission to consider creating a European contingency reserve for critical medicinal products that are at a high risk of shortage, along the lines of the RescEU mechanism, in order to alleviate recurrent shortages;				
78)	135. Calls on the Commission to draft a harmonised definition of 'shortages' and to standardise reporting requirements across Member States in order to enable closer cooperation and enhanced data exchange across Europe;				
79)	137. Requests that the Commission work with Member States to ensure the full and harmonised application of the GDPR with regard to conducting clinical research across the EU;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
80)	141. Recalls the essential role that new technologies, digitalisation and AI can play in enabling researchers from European laboratories to work in a network and share their objectives and results, while fully respecting the European Data Protection Framework; calls on the Commission to support measures favouring open science in order to accelerate the sharing of data and research results within the scientific community in Europe and beyond;				
81)	146. Supports the Commission in its efforts to conduct a structured dialogue with relevant actors in the pharmaceutical value chain, public authorities, non-governmental patient and health organisations, healthcare professionals, including pharmacists, and the research community as one of the tools to address the root causes of medicine shortages and the weaknesses in the global manufacturing and supply chain for critical medicines, pharmaceutical raw materials, intermediate products and active pharmaceutical ingredients, as well as identify opportunities for innovation; calls on the Commission to ensure the balanced representation of stakeholders;				
82)	147. Urges the Commission, the Member States and stakeholders to draw up, as soon as possible and on the basis of this structured dialogue, a clear and ambitious policy roadmap to secure and modernise Europe's existing manufacturing capacity for medicines, technology and active pharmaceutical ingredients;				
83)	150. Stresses the need for the pharmaceutical industry to be environmentally friendly and climate-neutral throughout the lifecycles of medicinal products, while ensuring access to safe and effective pharmaceutical treatments for patients; calls on the Commission to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	strengthen inspection and auditing throughout the production chain, particularly outside the EU; urges the Commission to ensure quality environmental sustainability standards for active pharmaceutical ingredients imported from non-EU countries; calls on the Commission to address the problem of pharmaceutical household waste, through measures to reduce packaging and the size of containers to ensure that they are no larger than necessary, while ensuring convenient and safe handling for patients or consumers with limited mobility, and to bring medical prescriptions into line with real therapeutic needs; encourages the Commission to consider the potential of e-leaflets as a measure complementary to the current paper information tools, in order to reduce the use of paper in packaging, while also maintaining equal access to important information; acknowledges the steps already taken by the pharmaceutical industry such as, for example, the Eco-Pharmaco-Stewardship initiative;				
84)	152. Stresses that pharmaceutical waste should be handled in line with the objectives and targets of the circular economy; believes that the pharmaceutical industry should have the same requirements and standards for packaging and waste management as other sectors; calls on the Commission to create a uniform framework for packaging that takes into account user-friendliness and the characteristics of the industry;				
85)	153. Calls on the Commission to develop clear guidance on the role of procurement policy in promoting greener pharmaceuticals;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
86)	154. Calls on the Commission to respond to the demands made by Parliament in its resolution of 17 September 2020 on a strategic approach to pharmaceuticals in the environment <sup>77</sup> , in particular that it revise the pharmaceutical legislation to strengthen the environmental risk assessment requirements and conditions for the approval and use of medicines, provided that marketing authorisations are not delayed or refused solely on the grounds of adverse environmental impacts; further calls on the Commission to speed up the catch-up procedure for environmental risk assessments of human medicines authorised before 2006, where they are not available;				
87)	158. Calls on the Member States and the Commission to support research, development and innovation in the field of pharmaceuticals that are equally effective for patients and intrinsically less harmful for the environment;				
88)	160. Calls on the Commission to further facilitate access to global markets for the EU pharmaceutical industry, including SMEs, through a level playing field and a robust and clear regulatory framework promoting the highest standards of quality and safety at international level and facilitating trade agreements that prize innovation-based competitiveness, in order to make the pharmaceutical sector a strategic pillar of the EU; calls on the Commission to ensure that trade agreements contribute to improved access to safe, effective and affordable medicines in the EU and in third countries; highlights the importance of removing trade and non-tariff barriers in third countries, and				

<sup>77</sup> OJ C 385, 22.9.2021, p. 59.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	ensuring fair access to international markets for companies operating in the EU;				
89)	161. Calls on the Commission to facilitate agreements between the EMA and non-EU regulatory agencies on preventing emergencies and coordinating responses to them with full respect for the highest EU standards of personal data protection; encourages the Commission to work with World Trade Organization members to facilitate trade in health products, increase resilience in global supply chains through stable access to raw materials, and contribute to an effective response in the event of a health emergency;				
90)	163. Notes that patent protection is a key incentive for companies to invest in innovation and produce new medicines; notes, at the same time, that the exclusionary effect of patents may lead to limited market supply and reduced access to medicines and pharmaceutical products; stresses that a balance should be struck between encouraging innovation through the exclusionary effect of patents and ensuring access to medicines and protecting public health; recalls that a company that markets a medicine can enjoy data exclusivity for a period of eight years as of the first marketing authorisation pursuant to Article 14(11) of Regulation (EC) No 726/2004; calls on the Commission to propose a revision of that regulation to provide for the possibility of temporarily authorising the granting of compulsory licences in the event of a health crisis in order to allow for the production of generic versions of life-saving medicines; recalls that this is one of the public health flexibilities in the field of patent protection already included in the WTO's TRIPS				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Agreement, as further reaffirmed by the 2001 Doha Declaration; calls on the Commission to ensure that the implementation of EU free trade agreements (FTAs) does not interfere with the possibility of invoking flexibilities provided by the TRIPS Agreement and to encourage voluntary licensing over immediate compulsory licensing; stresses that FTAs should not focus exclusively on enforcing intellectual property standards in third countries, but should take into account the impact on generic and biosimilar medicines in the EU and in third countries, as well as ensure coordination of regulatory standards;</p>				

#### 4.1.15. FEMM

Between July 2019 and December 2021, the **Committee on Women’s Rights and Gender Equality (FEMM)** was responsible for seven ‘ordinary’ own-initiative reports and no legislative own-initiative reports leading to the adoption of seven Parliament's resolutions ('FEMM resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents, as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent six written replies to the Parliament’s seven FEMM resolutions. In two cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other four replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one FEMM resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted two specific replies. The Commission has not replied with written follow-up documents to 127 of Parliament’s 174 requests. At the cut-off date of this study, the Commission had not yet replied to 13 of Parliament’s 174 requests.

### Analysis of the Commission actions

The Commission proposed/promised 11 genuine actions. In 21 cases, no further specific actions were proposed/promised to be taken by the Commission and in six cases it remained unclear if an action was carried out. In four cases, due to the lack of reply to the Parliament’s request, no action was mentioned.

Among the 11 actions proposed/promised by the Commission, the Commission already carried out the action in three cases. In the eight remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.15.1. FEMM Resolution 1: EP resolution of 23 October 2020 on Gender Equality in EU's foreign and security policy

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Gender Equality in EU's foreign and security policy</b>	23/10/2020 <a href="#">T9-0287/2020</a> <a href="#">2019/2167(INI)</a> FEMM	On 10 December 2020, the Parliament received "Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – October II 2020 part-session" informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by the High Representative / Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 22 October 2020.			
1)	2. Urges the Commission, the VP/HR and the Member States to further strengthen their support for gender equality, the full enjoyment of human rights by all women and girls and their empowerment across the globe, and to play a key and increasing role in streamlining and leveraging resources to that end;				
2)	3. [...] calls therefore for greater efforts by the Commission, the VP/HR and all Member States to fully implement the GAP and attain the performance standards set out therein; [...]				
3)	8. Calls on the EEAS, the relevant Commission services, the European agencies working outside the European Union's borders and the Member States to systematically integrate gender mainstreaming and an intersectional perspective into the EU's foreign and security, enlargement, trade and development policy, including in multilateral forums and in all policy formulation, political and strategic dialogues, public statements, global human rights reporting and monitoring, evaluation and reporting processes;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	insists that gender equality should be a core value in all EU external action;				
4)	12. [...] calls on the EEAS, the Commission and the EU Member States to recommit, through the new GAP, to gender mainstreaming in all sectors; calls on the EEAS, the relevant Commission services and the EU Member States to propose further gender-targeted actions;				
5)	16. Calls on the Commission to step up its efforts to implement a structured gender-budgeting approach to accurately track all related spending, including in the area of external action, and to organise ex-ante and ex-post gender impact assessments of the different programmes financed by the EU and to report back to the European Parliament; stresses that this evaluation should be based on gender- and age-disaggregated data and that its result should be integrated into the programming cycle;				
6)	18. Calls on the Commission, the EEAS and the EU delegations to recognise girls and young women as drivers of change and to support their safe, meaningful and inclusive participation in civic and public life, including by taking into consideration the feedback of youth-led organisations and supporting them through capacity building; [...]				
7)	19. [...]; calls on the Commission and Member States to give high priority to gender equality and SRHR in their humanitarian aid response, as well as accountability and access to justice and redress for sexual and reproductive rights violations and gender-based violence, including in terms of training for humanitarian actors and existing and future funding; [...]; calls on the Commission and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Member States to advocate for the inclusion of women's rights organisations, as well as women-led organisations and defenders of women's human rights, in humanitarian coordination and decision-making structures;				
8)	21. Calls on the Commission to put in place a values-based EU trade policy that ensures a high level of protection for labour and environmental rights and respect for fundamental freedoms and human rights, including gender equality; [...]				
9)	25. [...] calls on the current VP/HR to take the necessary steps to remedy this situation; [...]				
10)	27. Calls on the VP/HR to ensure that Heads of EU Delegations abroad have formal responsibility for ensuring that gender equality is mainstreamed throughout all aspects of the delegations' work and for ensuring that they report on it; calls on the VP/HR to ensure that there are specific, dedicated gender focal points in the EU delegations in order to ensure smooth workflows and keep bureaucracy to a minimum; [...]				
11)	35. [...] ; calls on the VP/HR, the EEAS and the Member States to safeguard the rights of girls and women and ensure their full and meaningful participation across the various stages of the conflict cycle, in the context of EU conflict prevention and mediation activities;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	38. Calls on the VP/HR, the EEAS and the Member States to ensure full implementation of the EU Guidelines on Human Rights Defenders and to adopt an annex aiming to recognise and develop additional strategies and tools to better and more effectively respond to and prevent the specific situations, threats and risk factors faced by women human rights defenders, including girls and young women activists; [...]				
13)	39. [...] urges the Commission, the EEAS, Member States and Heads of EU Delegations to ensure support, by promoting a proper level of capacity building, for local civil society, including women's organisations and human rights defenders, and to make cooperation and consultation with them a standard element of their work;  urges the Commission and Member States to support initiatives that aim to challenge and transform negative gender norms and stereotypes in all contexts;				
14)	40. Calls on the Commission and the EEAS to systematically support SRHR, which will contribute to the achievement of all the health-related SDGs, such as prenatal care and measures to avoid high-risk births and reduce infant and child mortality; [...]  calls on the Commission to counter the impact of the 'global gag rule' by significantly supporting SRHR funding through the financing instruments available in the EU's external dimension;				
15)	44. Condemns all forms of violence against women and girls, including trafficking in human beings; calls on the Commission and Member States to enhance cooperation with third countries				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	in order to combat all forms of trafficking in human beings, paying particular attention to the gender dimension of trafficking so as to specifically combat child marriage, the sexual exploitation of women and girls and sex tourism; [...]				

4.1.15.2. FEMM Resolution 2: EP resolution of 21 January 2021 on the gender perspective in the Covid-19 crisis and post-crisis period

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>The gender perspective in the Covid-19 crisis and post-crisis period</b></p>	<p>21/01/2021  <a href="#">T9-0024/2021</a>  <a href="#">2020/2121(INI)</a>  <b>FEMM</b></p>	<p>On 2 March 2021, the Parliament received "<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – January 2021 part-session " informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Helena Dalli.</p> <p>The <a href="#">plenary debate</a> took place on 21 January 2021.</p>			
1)	<p>2. Underlines the need to apply the lessons learned from past and current crises to future policy development and implementation so as not to repeat past mistakes, as well as the need to prepare gender-sensitive responses for all stages of future crises to prevent negative consequences for women's rights; calls on the Commission to facilitate the creation of a standing network for sharing best practices between Member States on how to tackle the gender-related aspects of COVID-19;</p>				
2)	<p>4. Urges the Commission to examine the prevalence of the virus among workers in essential sectors during the current crisis, particularly the female and minority ethnic populations in view of their disproportionately high representation in these sectors; urges the Commission and the Member States to respond with appropriate action to bolster their safety at work and calls on the Member States to improve their working conditions, including through the Framework</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Directive <sup>7</sup> , Directive 92/85/EEC and the post-2020 EU Strategic Framework on Health and Safety at Work;				
3)	5. Calls on the Member States, the Commission, Eurostat and EIGE to regularly gather data on COVID-19 disaggregated by sex, age and intersecting discrimination, amongst other factors, as well as data on the socio-economic impact of the virus;				
4)	7. Calls on the Commission and Member States to closely monitor and strongly respond to disinformation, negative public discourses, insufficient prioritisation, restricted or denied access to relevant services and regressive initiatives related to women’s rights, LGBTQI+ rights and gender equality; calls on the Commission to monitor the shrinking space for civil society organisations and demonstrations related to the aforementioned topics due to confinement measures as matters of democracy and fundamental rights during the COVID-19 crisis and post-crisis period; [...]				
5)	8. Expresses its concern at the high mortality rate from COVID-19; notes the initial higher mortality rate among men and urges the World Health Organization (WHO) and relevant EU agencies to examine the different health impacts on men and women; calls on the Commission to continue to monitor the situation with a view to understanding the long-term health impacts of the virus on women and men;				

<sup>7</sup> Council Directive 89/391/EEC of 12 June 1989 on the introduction of measures to encourage improvements in the safety and health of workers at work (OJ L 183, 29.6.1989, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	10. [...] calls on the Commission to facilitate the exchange of best practices among Member States while also involving civil society organisations, who are often expert in these areas, as regards new methods in delivering SRHR-related care and ways of addressing gaps in the provision of services; [...]				
7)	12. Urges the Commission to factor in emergency circumstances such as COVID-19, including their impact on gender-specific healthcare considerations such as SRHR, in its health-related policy responses, for example the EU4Health Programme, the EU Beating Cancer Plan and the EU Health Strategy; calls on the Commission and the Member States to address the health-related aspects of the 2020-2025 Gender Equality Strategy when implementing the EU4Health Programme, such as SRHR being an integral part of health and an essential aspect of well-being and the advancement of gender equality; [...]				
8)	14. [...] calls on the Commission to organise an EU-wide mental health campaign;				
9)	15. [...] calls on the Member States to ensure that support services take a coordinated approach to identifying women at risk, to ensure that all these measures are available and accessible to all women and girls within their jurisdiction, including those with disabilities, regardless of their migration status, and to provide gender-sensitive training for healthcare workers as well as front line police officers and members of the judiciary; invites the Member States to share national innovations and best practices in addressing gender-based violence to better identify and

	promote efficient practices, and calls on the Commission to promote those practices;				
10)	16. In the light of the pandemic, calls on the Member States to ensure a coordinated approach between governments and public services, support facilities and the private sector and to update protocols for victims of gender-based violence to help them to seek help, report crimes and access health services, as well as encouraging witnesses to report such crimes; calls on the Commission to develop a European Union protocol on violence against women in times of crisis and emergency to prevent violence against women and to support victims of gender-based violence during emergencies such as the COVID-19 pandemic; [...]				
11)	17. Calls on the Commission to promote awareness-raising, information and advocacy campaigns tackling domestic and gender-based violence in all its forms such as physical violence, sexual harassment, cyber-violence and sexual exploitation, particularly in relation to newly created prevention measures and flexible emergency warning systems, in order to encourage reporting in coordination and cooperation with recognised and specialised women's organisations; calls on the Commission to work with technology platforms in the scope of the Digital Services Act to address illegal online activities, including online violence against women and girls in all its forms, as the internet has been widely used since the beginning of the pandemic for work, education and entertainment, and will continue to be;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	19. Calls on the Council to add violence against women to the list of criminal offences in the EU, and calls on the Commission to propose a directive to tackle all forms of gender-based violence so as to put in place a strong legal framework, to coordinate the sharing of best practices between the Member States, to promote accurate and comparative data collection, to accurately measure the extent of such violence, to consider the possibility of producing forecasts, and to assess the impact of COVID-19 on the provision of key services to victims;					
13)	20. [...] calls on the Member States and the Commission to consider this when submitting national COVID-19 response plans, with due regard to existing measures and funding, and with gender equality at the heart of the economic recovery; calls on the Member States and the Commission to apply gender mainstreaming and gender budgeting in the recovery measures;					
14)	21. [...] calls on the Commission and the Member States to ensure that all COVID-19-specific initiatives regarding domestic, gender-based and sexual violence take the increased risk to and specific challenges of LGBTQI+ people into account, and that victim support services and special COVID-19 initiatives responding to domestic violence explicitly reach out to LGBTQI+ victims of domestic violence;					
15)	22. Calls on the Member States to ensure the provision of effective, accessible, affordable and quality medical and psychological support for victims of gender-based violence, including sexual and reproductive health services, especially in					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	times of crisis where such support must be deemed essential; asks the Commission to work closely with the Member States to ensure the full implementation of the Victims' Rights Directive <sup>8</sup> , with a focus on the gender perspective following its recent implementation report <sup>9</sup> , and with a view to strengthening the rights of victims of gender-based violence in the new Victims' Rights Strategy;				
16)	23. Calls for the Commission, Parliament and the Council to take into account the fact that the COVID-19 crisis disproportionately affects women in the socio-economic sphere, including their income and employment rate, and will result in even more profound inequalities between men and women and discrimination in the labour market, and calls on them to work with the Member States to closely examine and make specific provision for women's and men's socio-economic needs following the crisis, and to examine horizontal and vertical labour market segregation when implementing programmes within the 2021 EU budget, the next MFF and Next Generation EU, ensuring all programmes incorporate the gender perspective and gender budgeting as well as ex-post gender impact assessments as indicated in the Commission's 2020-2025 Gender Equality Strategy; calls for the strategy's effective implementation and monitoring; [...]				

<sup>8</sup> Directive 2012/29/EU of the European Parliament and of the Council of 25 October 2012 establishing minimum standards on the rights, support and protection of victims of crime (OJ L 315, 14.11.2012, p. 57).

<sup>9</sup> Commission report of 11 May 2020 on the implementation of Directive 2012/29/EU of the European Parliament and of the Council of 25 October 2012 establishing minimum standards on the rights, support and protection of victims of crime (COM(2020)0188).

19)	26. [...] calls on the Commission to facilitate the exchange of best practices on the quality, accessibility and affordability of care services, as well as the different models of care services; urges the Commission to examine the situation of informal carers and to share best practices on how Member States can regularise their work; [...]					
20)	27. [...] urges the Member States to fully transpose and implement without delay the Work-Life Balance Directive and calls on the Commission to closely and systematically monitor the implementation of the Directive by the Member States on an annual basis; [...]					
21)	29. Recognises the uniquely challenging circumstances that single parents, of whom a large majority (85 %) are women, have been faced with during the pandemic and post-crisis period as a result of multiple burdens, including the continuous provision of care, concerns as to custody arrangements, potential economic concerns and loneliness; calls on the Commission					

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and the Member States to take into account and further examine their specific situation, including the additional burdens in terms of working, schooling and caring, access to lawyers and the implementation of custody agreements;				
22)	31. Stresses that equal pay for equal work or work of equal value between women and men must be a guiding principle for the Commission, Parliament and all Member States when designing response measures to the COVID-19 crisis; urges the Commission to meet its commitment to present binding measures on pay transparency promptly in order to effectively address gender pay and pension gaps, as economic indicators suggest that these gaps are further widening as a consequence of the pandemic; calls, in this regard, on the Commission to consider the Member States' best practices, while taking due account of the unique conditions of small and medium-sized enterprises (SMEs) and the different labour market models in the EU; calls, furthermore, on the Commission to revise Directive 2006/54/EC;				
23)	34. Calls on the Commission to support entrepreneurs, in particular women entrepreneurs, as they seek to develop and build on skills or interests gained during the COVID-19 period, including through entrepreneurship opportunities for mothers, lone parents and others who less frequently engage in entrepreneurial activity, to advance their economic independence and to improve access to and awareness of loans, equity finance and microfinancing through EU programmes and funds so that the crisis becomes an opportunity to progress through adaptation and transformation as part of the green and digital

	<p>economies; calls on the EU institutions and the Member States to place special emphasis on supporting SMEs, particularly SMEs led by women that often face unique challenges when it comes to accessing requisite financing and will also require support during the recovery phase; calls on the Commission, EIGE and Eurostat to increase data collection on female-led SMEs, self-employed women and women-led start-ups, and on the impact of the COVID-19 pandemic;</p>				
24)	<p>35. Calls on the Commission and the Member States to increase the presence in and contribution of women to the artificial intelligence the science, technology, engineering and mathematics and the digital sectors, as well as the green economy; calls for a multi-level approach to address the gender gap in all levels of digital education and employment in order to bridge the digital divide that has been revealed as work and schooling, as well as many services and facilities, have suddenly moved online; stresses that closing the digital gap will increase gender equality not only in terms of the labour market but also through access to technologies in the personal sphere; calls on the Commission to gender mainstream the Single Market Strategy and the Digital Agenda with a view to effectively addressing the under-representation of women in growing sectors for the future EU economy; welcomes the Commission's Women in Digital Scoreboard, which monitors women's participation in the digital economy, internet use, internet user skills, specialist skills and employment; stresses its importance in helping the Member States and the Commission to make</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	informed decisions and set relevant targets, particularly given the implications of COVID-19;				
25)	40. Underlines that due to a higher life expectancy and higher likelihood of experiencing health problems, older women often account for the majority of residents in long-term care facilities <sup>10</sup> , which have become virus hotspots in many countries due to, inter alia, a lack of sufficient resources and knowledge to guarantee the safety and protection of residents; calls on the Commission to analyse the different settings of formal, long-term care provision and their level of resilience during the COVID-19 pandemic;				
26)	46. Deplores instances of xenophobic and racial discrimination, which increased in the light of the crisis, and urges the Commission and the Member States to take a zero-tolerance approach to racist attacks and to adopt an intersectional approach in their responses that addresses the needs of marginalised population groups, including racial and ethnic minorities;				
27)	49. [...] ; calls on the Commission and the Member States to ensure that financial support given to partner countries to cope with the crisis is also allocated to support women and girls; [...]				
28)	51. Calls on the Commission to put in place a values-based EU trade policy that ensures a high level of protection for labour and environmental rights and respect for fundamental freedoms and human rights, including gender equality; [...]				

<sup>10</sup> <https://eige.europa.eu/covid-19-and-gender-equality/gender-impacts-health>.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
29)	52. Calls on the Commission to put women and girls at the heart of its global response and to fully involve them, listen to their voices and empower them to be an active part of the response to the pandemic;					
30)	53. Calls on the Commission and the Member States to fully assess the gender-specific impacts of and needs arising from the crisis and its socio-economic consequences; calls on the Commission and the Member States to allocate extra and targeted budgetary resources to help women recover from the crisis, including in the implementation of the recovery package, particularly in the fields of employment, violence and SRHR, as well as to monitor this spending and gender mainstream all budgetary, policy and legislative proposals, in line with its commitments in the Gender Equality Strategy; calls on the Commission to strengthen the connection between climate change policies, digital policies and gender equality in its upcoming proposals; emphasises that preparatory action is the best way to build resilience in all areas for future crises;					

## 4.1.15.3. FEMM Resolution 3: EP resolution of 21 January 2021 on the EU Strategy for Gender Equality

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>The EU Strategy for Gender Equality</b>	21/01/2021 <a href="#">T9-0025/2021</a> <a href="#">2019/2169(INI)</a> FEMM	On 2 March 2021, the Parliament received " <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – January 2021 part-session " informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Helena Dalli.  The <a href="#">plenary debate</a> took place on 21 January 2021.			
1)	2. Stresses, however, the need for an opportunities-based approach within the gender equality strategy; asks the Commission to take 'equal opportunities for women' as the starting point to further roll out the strategy;				
2)	4. Welcomes the announcement of several complementary EU initiatives, such as a European disability strategy with binding measures post-2020, the LGBTI+ strategy and the Post-2020 EU Framework on Roma Equality and Inclusion Strategies, and calls for a strategic framework to connect them, and for an intersectional approach to be adopted in all of them; stresses the importance of monitoring the situations being addressed and of flexibly adapting the gender equality and other relevant strategies to results, as well as to the upcoming challenges, using current policies or suggesting new tools, as the recent COVID-19 crisis has demonstrated; reiterates the need to step up specific measures for non-discrimination, and the equality and protection of women subject to structural gender inequalities,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and reminds the Commission that further efforts in this direction are needed;				
3)	5. Regrets the fact that the strategy remains vague on the issue of timelines for several, highly welcomed, measures and that it sets neither concrete gender equality targets to be achieved by 2025 nor clear monitoring tools; calls, therefore, on the Commission to establish a concrete roadmap with timeframes, objectives, a yearly review and monitoring mechanism, clear and measurable indicators of success and additional targeted actions; calls in addition for guidelines to be put forward, as well as a roadmap on how to implement the intersectional and gender mainstreaming approaches, including gender budgeting, effectively in EU policy making, and for specific tools (such as indicators, targets and monitoring tools) to be developed, as well as for adequate human and financial resources to be allocated, allowing their application in all EU policies; [...]				
4)	6. Calls on the Commission to respect the commitments of the 2020 Work Programme in any revision and to deliver a proposal for binding pay transparency measures, an EU strategy on victims' rights and a new EU strategy towards the eradication of trafficking in human beings regrets that the proposal for binding pay transparency measures was not introduced in 2020 as planned;				
5)	8. Recalls the need to combat multi-layered discrimination, especially against vulnerable groups, including women with disabilities, black women, migrant, ethnic minority and Roma women, older women, single mothers, LGBTIQ+				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>people and homeless women, and stresses the importance of ensuring that they benefit from the objectives and actions of the EU strategy for gender equality 2020-2025; calls on the Commission to lay down explicit guidelines on the implementation of the intersectional framework, which should prioritise the participation of the groups affected by the intersecting forms of discrimination in order to assess the differential impact of policies and actions so as to tailor responses in each area that are grounded in the principle of non-discrimination;</p>				
6)	<p>9. Calls on the Commission and the Member States, in line with the aims of the strategy, to systematically incorporate a gender perspective at all stages of the response to the COVID-19 crisis and promote women's involvement at all levels of the decision-making process; underlines that it would be a wrong signal to postpone some elements of the new strategy and urges the Commission therefore to stay on track with the new strategy; calls on the Commission and the Member States to take due account of women's needs while designing and distributing funds agreed within the 'NextGenerationEU' recovery plan for Europe;</p>				
7)	<p>15. Regrets the lack of reference in the gender equality strategy 2020-2025 to the protection of women and girls at risk of social exclusion, poverty and homelessness; calls on the Commission to address these issues in the forthcoming action plan on integration and inclusion, in order to prevent these women from being excluded from social and economic policies, thus further deepening the poverty cycle;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	21. Calls on the Commission and the Member States to safeguard inclusive equality for women and girls with disabilities in all areas of life, to ensure their sexual and reproductive rights, to provide them with protection from domestic violence and violence by care and support service providers, and to launch sensitisation and capacity-building programmes to this end for professionals in the fields of healthcare, social and care services, education, training and employment services, law enforcement and the judiciary;				
9)	23. Regrets the lack of reference to the gender dimension of trafficking for purposes of labour exploitation, especially in the case of domestic workers, due to the limitations inherent to the family home as a workplace with respect to the possibilities of carrying out inspections and monitoring work activity; recalls its resolution of 28 April 2016 on women domestic workers and carers in the EU, and asks the Commission and the Member States to promote investigations in this area, in order to improve the mechanisms for the identification and protection of the victims, and to involve NGOs, trade unions, public authorities and all citizens in the detection process;				
10)	24. Is deeply worried about the nature, extent and gravity of violence and harassment in the world of work, and the impact of all forms of violence against women and girls in work situations; welcomes in this regard the recently adopted ILO Convention 190 on violence and harassment at work and calls on the Member States to ratify and implement it without delay; calls also on the Commission and the Member States to introduce				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	effective and binding measures to define and prohibit violence and harassment in the world of work, including effective access to gender-responsive, safe and effective complaint and dispute resolution mechanisms, training and awareness-raising campaigns, support services and remedies;				
11)	26. Condemns the campaign against the Istanbul Convention that targets violence against women and the deliberate campaign to discredit it; is worried about the rejection of the zero-tolerance norm for violence against women and gender-based violence, which is based on a strong international consensus; points out that this questions the essence of human rights, such as equality, autonomy and dignity; stresses the key role played by CSOs in combating gender-based violence and supporting victims, and urges the Commission, therefore, to provide adequate funding for associations pursuing these aims; welcomes the commitment within the new victims' rights strategy to address the specific needs of women and girls who are victims of violence, especially with a view to ensuring victims' rights, protection and compensation;				
12)	29. Is concerned about the lack of an explicit prohibition of discrimination on the grounds of a person's gender identity and gender expression in EU law; notes the persistence of discrimination, harassment and exclusion from the labour market of LGBTIQ+ people; recalls its resolutions of 14 February 2019 on the future of the LGBTI List of				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Actions<sup>11</sup> and of 18 December 2019 on public discrimination and hate speech against LGBTI people<sup>12</sup>; welcomes the adoption of the first ever LGBTI+ strategy, and calls on the Commission to follow up on its LGBTI List of Actions 2016-2019 with specific measures to tackle discrimination at work on grounds of sexual orientation, gender identity, gender expression and sex characteristics;</p>				
13)	<p>30. Welcomes the recently adopted, first ever EU Strategy on victims' rights (2020-2025) which will address the specific needs of victims of gender-based violence, in particular a specific approach for psychological violence against women and the impact on their mental health on the long run; stresses the need to address the current gaps in the EU legislation and asks the Commission to put forward, without delay, a proposal for a review of the Victims' Rights Directive with regard to international standards on violence against women, such as the Istanbul Convention, with a view to enhancing the legislation on victims' rights and the protection and compensation of victims;</p>				
14)	<p>32. Urges the Commission to present the long-awaited EU strategy on the eradication of trafficking in human beings and underlines the need for a clear recognition of the gendered nature of human trafficking and sexual exploitation, where women and girls are the most</p>				

<sup>11</sup> Texts adopted, P8\_TA(2019)0129.

<sup>12</sup> Texts adopted, P8\_TA(2019)0101.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>affected; acknowledges that sexual exploitation for surrogacy and reproductive purposes or purposes such as forced marriages, prostitution and pornography is unacceptable and a violation of human dignity and human rights; requests, therefore, that the strategy look closely at the situation of women in prostitution, with a special focus on the link between prostitution and the trafficking of women and minors, in the EU and worldwide, and the emerging use of the internet for purposes of exploitation; highlights the important role and work of the EU-Anti-Trafficking Coordinator and urges the Commission to appoint the new Coordinator without further delay, to closely monitor the implementation of the Anti-Trafficking Directive by the Member States; insists on the importance of including measures and strategies to reduce demand;</p>				
15)	<p>33. Calls for stronger measures concerning legislation on sexual offences and underlines that sex must always be voluntary; calls on the Commission to include recommendations to all Member States to amend the definition of rape in their national legislation so that it is based on the absence of consent;</p>				
16)	<p>36. Underlines the fact that violence against women is often the main reason why women experience homelessness; urges the Commission, therefore, to take the necessary measures to prevent violence against women leading to or prolonging homelessness;</p>				
17)	<p>38. Reiterates its calls on the Commission and the Member States to further develop and improve</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the collection of gender-disaggregated data<sup>13</sup>, statistics, research and analysis, as well as support for and measures to improve institutional and CSO capacity-building as regards data collection and analysis, in particular regarding the participation of women in the labour market and in areas such as informal employment, entrepreneurship, access to financing and to healthcare services, unpaid work, poverty and the impact of social protection systems; also urges the EIGE and all other relevant EU institutions and agencies to work on and incorporate new indicators, such as in-work poverty, time-poverty, gaps in time use, the value of care work (paid and/or unpaid), and the take-up rates of women and men, including in relation to the Work-Life Balance Directive; calls on the Commission to use these data to effectively implement gender impact assessments of its policies and programmes, and those of other EU agencies and institutions;</p>				
18)	<p>40. Calls on the Commission to put forward a Care Deal for Europe, taking a comprehensive approach towards all care needs and services, and setting minimum standards and quality guidelines for care throughout the life cycle, including for children, elderly persons and persons with long-term needs; invites the Commission and the Member States to collect disaggregated data on the provision of care services; urges the Member States to swiftly and fully transpose and implement the Work-Life Balance Directive so as</p>				

<sup>13</sup> See Parliament’s resolution of 30 January 2020 on the gender pay gap.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>to ensure a fair division of work and family life, and invites them to go beyond the Directive's minimum standards by introducing measures such as fully paid leave, the promotion of men's equal role as carers, thereby tackling gender stereotypes in take-up of paternity and/or maternity leave, the recognition of the role of informal carers by ensuring their access to social security and their right to pension entitlements, support for services adapted to the specific challenges and needs of parents and/or family members taking care of persons with disabilities or long-term illnesses or of the elderly, and flexible working arrangements that are not to the detriment or at the expense of the worker's wages, access to social and labour rights and allowances, and that respect workers' right to disconnect; urges the Commission to monitor annually, closely and systemically the implementation by the Member States of the Work-Life Balance Directive;</p>				
19)	<p>45. Calls for the Commission, the Parliament and the Council to closely examine women's needs and participation in the labour market, as well as horizontal and vertical labour market segregation, while designing programmes within the next multiannual financial framework (MFF), as well as the recovery plan NextGenerationEU;</p>				
20)	<p>48. Calls on the Commission to collect data on the provision of different types of care (childcare, care for older people and persons with disabilities or persons requiring long-term care), feeding into a study examining the care gap to act as the basis of an initiative for a European care strategy; [...]</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	50. Welcomes the instrument for temporary support to mitigate unemployment risks in an emergency (SURE); calls on the Commission and the Member States to ensure that SURE addresses losses in income for women;				
22)	52. Welcomes the Commission's commitment to table binding measures on pay transparency which can be a useful tool to detect gaps and discrimination within the same sector and bridge the gender pay gap; regrets nonetheless the delay in publishing this proposal and asks the Commission to put forward the proposal as soon as possible;				
21)	54. Calls on the Commission to present, within the next year, a revision of Directive 2006/54/EC in line with the recent evaluation of the functioning and implementation of the EU's equal pay laws, and in accordance with the case law of the Court of Justice of the European Union; considers that such a revision should include a definition of 'work of equal value' across all occupational sectors, which incorporates the gender perspective, as well as a reference to multiple forms of discrimination and additional measures to ensure the enforceability of the Directive;				
22)	55. Recalls its resolution of 30 January 2020 on the gender pay gap; calls for an immediate revision of the action plan and for an ambitious new gender pay gap action plan by the end of 2020, which should set clear targets for the Member States to reduce the gender pay gap over the next five years and ensure that such targets are taken account of in the country-specific recommendations; highlights, in particular, the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	need to include an intersectional perspective in the new action plan; calls on the Commission and the Member States to involve the social partners and CSOs in developing the new policies to close the gender pay gap and to improve and further develop statistics, research and analysis in order to better measure and monitor progress in closing the gender pay gap, paying particular attention to groups experiencing multiple and intersectional forms of discrimination; calls on the Commission to pay attention to the factors leading to the pension gap and to support Member States in their measures to reduce it by establishing a gender pension gap indicator to assess the accumulated inequalities experienced by women throughout their lives;				
23)	57. Recalls that funding and taxation policies have a strong gender component; welcomes the Commission's commitment to gender mainstreaming throughout the MFF, in particular with regard to the European Social Fund Plus (ESF+), in order to promote women's participation in the labour market, work-life balance and female entrepreneurship, but regrets the lack of gender budgeting in the new MFF and Structural Funds; calls on the Commission to further promote and improve the use of gender budgeting, and on the Member States to integrate the gender perspective in taxation policies, including gender audits of fiscal policies, in order to eliminate tax-related gender biases;				
24)	60. Calls on the Commission and the Member States, in consultation with the social partners, to develop gender-sensitive workplace health and safety guidelines specifically targeted to frontline				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>professions, in order to protect workers in these professions in the event of future outbreaks; underlines that changes in labour conditions such as teleworking, while offering opportunities for improving flexible working arrangements and work-life balance, can also impact on the ability to disconnect and increase the workload, with women being affected far more than men owing to their predominant or traditional role as home and family caretakers; calls, therefore, on the Commission to come forward with a gender-sensitive legislative proposal on the right to disconnect, as well as a directive on mental well-being in the workplace aimed at recognising anxiety, depression and burnout as occupational diseases, and to establish mechanisms for prevention and for the reintegration of affected employees into the workforce;</p>				
25)	<p>61. Calls on the Commission to revise Directive 92/85/EEC, with a view to ensuring that women throughout Europe can benefit on an equal footing with men from the free movement of workers<sup>14</sup>;</p>				
26)	<p>63. Calls on the Commission to present a European strategy on social protection to address the free movement of workers and, in particular, the feminisation of poverty, with a special focus on lone-parent households headed by women;</p>				
27)	<p>65. Calls on the Commission to have a specific approach for single mothers, as single mothers are</p>				

<sup>14</sup> Directive 2014/54/EU of the European Parliament and of the Council of 16 April 2014 on measures facilitating the exercise of rights conferred on workers in the context of freedom of movement for workers (OJ L 128, 30.4.2014, p. 8).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>particularly economically vulnerable since they often earn less than men and are more likely to leave the labour market when they become a parent; calls on the Commission to enhance, in this context, the enforcement of existing legal tools on the cross-border collection of alimony, with public awareness-raising about their availability; urges the Commission to work closely with the Member States to identify practical problems linked with alimony collection in cross-border situations and to develop tools to effectively enforce payment obligations;</p>				
28)	<p>69. Calls on the Commission and the Member States to ensure equal participation and opportunities in the labour market for men and women, and to address the feminisation of poverty in all its forms, including poverty in old age, particularly by factoring gender into the availability of and access to adequate pension entitlements in order to eliminate the gender pension gap, and by improving working conditions in feminised sectors and professions such as hospitality, tourism, cleaning services and the care sector; points out the importance of addressing the cultural undervaluation of jobs dominated by women, the need to combat such stereotypes and the over-representation of women in atypical forms of work; calls on the Member States to ensure equal treatment for migrant women (also through a revision of the system of recognition of professional qualifications), as well as for other particularly vulnerable groups of women; calls on the Commission and the Member States to strengthen collective bargaining coverage at sectoral level and the involvement of the social partners in</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	policymaking, in order to foster stable and quality employment; stresses the need for strategies to encourage and support women’s entrepreneurial initiatives;				
29)	70. [...] calls on the Commission to closely monitor the implementation of Directive 2010/41/EU;				
30)	75. Urges the Commission to campaign for more women in economic decision-making positions by highlighting the economic and societal advantages thereof, and sharing best practices such as public indices on companies’ equality performance; urges the Commission to continue working with the Member States, as well as the current and incoming EU presidencies, to urgently break the deadlock in the Council and adopt the proposed Directive on ‘Women on Boards’ and to develop a strategy with Member States for meaningful representation of all women from diverse backgrounds in decision-making roles, including in all EU institutions;				
31)	77. Calls on the Commission and the Member States to adopt measures to combat the phenomenon of the glass ceiling, such as extensive parental leave, access to high-quality, affordable childcare, and the elimination of all forms of direct and indirect discrimination linked to promotions in the labour market;				
32)	79. Welcomes the Commission’s commitment to promote the participation of women as voters and candidates in the 2024 European Parliament elections; in this regard, stresses the need for a revision of the Electoral Act in order to provide for the possibility of the temporary replacement of Members of the European Parliament who are				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	availing themselves of their right to maternity, paternity or parental leave; calls on the Commission to revise the Electoral Act accordingly and on the Council to endorse this revision;				
33)	81. Emphasises the active and crucial role of women in the economy of rural areas, and regrets the fact that significant gender differences persist within agricultural employment and regarding access to social security, training, maternity leave and retirement pensions; calls on the Commission, the Member States and regional and local authorities to support projects addressed to women in particular, on creating innovative agricultural activities in rural and depopulated areas in order to strengthen their position in the agricultural market, which can be a source of new jobs; calls, furthermore, on the Commission to identify funding opportunities under the second pillar of the common agricultural policy (CAP) in order to increase women's access to land and to address their working conditions in rural areas, especially those of seasonal workers;				
34)	82. Calls on the Commission to step up its efforts in putting forward concrete measures and specific funds to combat the feminisation of poverty and of precarious work, with a particular focus on women facing multiple forms of discrimination;				
35)	83. Reiterates its call on the Commission and the Member States regarding its resolution of 28 April 2016 on women domestic workers and carers in the EU; urges the Commission to introduce a framework for the professionalisation of domestic work and care, leading to the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	recognition and standardisation of the relevant professions and skills and to the possibility of career building, and to encourage the Member States to establish systems for professionalisation, training, continuous skills development and recognition of women domestic and care workers' qualifications, as well as to create public employment agencies to strengthen professionalisation;				
36)	86. Regrets the under-representation of women in the digital economy, AI, ICT and STEM sectors in terms of education, training and employment, and points out the risk of this reinforcing and reproducing stereotypes and gender bias through the programming of AI and other programs; highlights the possible benefits and opportunities, but also the potential challenges of digitalisation for women and girls, and urges the Commission to ensure the adoption of concrete gender mainstreaming measures in the implementation of the single market strategy and the digital agenda preventing, in good time and in advance, any negative impact of digitalisation on women and girls, and ensuring a clear link between commitments on ending stereotypes and comprehensive actions to ensure women's independence in the formation of the digital labour market; calls on the Commission to propose concrete measures for technologies and AI to be transformed into tools in the fight to eradicate gender stereotypes and to empower girls and women to enter STEM and ICT fields of study and to stay on these career paths;				
37)	87. Calls on the Commission and the Member States to address horizontal and vertical				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	segregation in employment and discriminatory practices in decisions concerning recruitment and promotion, including policies that promote the integration of women from marginalised groups into the labour market;				
38)	90. Welcomes the Commission's commitment to use Horizon Europe to provide insights and solutions on addressing potential gender biases in AI; asks, however, that all possible funding be used to support projects which encourage girls and women to improve their digital skills, and which make them familiar with STEM;				
39)	91. Notes that, in times of events such as the ongoing coronavirus pandemic, the role of and opportunities for teleworking and distance working increase; calls on the Commission to include the role of teleworking and distance working in the strategy as an important factor in achieving work-life balance;				
40)	93. Reiterates the importance of gender mainstreaming as a systematic approach to achieving gender equality; welcomes, therefore, the Commission's newly established task force on equality and calls for this task force to be adequately trained and resourced and to periodically report to the Committee on Women's Rights and Gender Equality about its work; underlines the importance of transparency and the involvement of women's rights organisations and CSOs from diverse backgrounds; urges the Commission to incorporate provisions making the consideration of inputs from the task force compulsory for Directorates-General and develop training courses for all staff, as well as processes to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	monitor and assess mainstreaming in accordance with its mission;				
41)	94. Calls for the Commission, Parliament and the Council to create a thematic sub-programme for women in rural areas through the Common Agricultural Policy Strategic Plans financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD); stresses that this sub-programme should seek to encourage women's employment and female entrepreneurship, using opportunities linked to agro-tourism and the development of digital villages, improving female farmers' access to land, credit and financial instruments, skills and performance through education, training and advisory services, increased participation in local action groups and the development of local partnerships under the Leader programme; calls in this regard for the earmarking of EU funds for better living and working conditions in rural areas, including better access to services and the development of infrastructure, with a particular focus on access to broadband internet, as well as supporting entrepreneurial initiatives and access to credit, thereby empowering women in rural areas; calls on the Member States to exchange best practices on professional status for assisting spouses in the agricultural sector, thereby addressing women's social security rights, including maternity leave or pension entitlements, and requests that the Commission prepare guidance in this regard;				
42)	95. Calls on the Commission to advance female entrepreneurship and access to loans and equity finance through EU programmes and funds, and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	welcomes its intention to introduce new measures to promote women-led start-ups and innovative small and medium-sized enterprises in 2020, and to strengthen gender equality under Horizon Europe; [...]				
43)	97. Is deeply concerned about the fact that the European Green Deal and related initiatives include neither a gender perspective nor any reference to gender equality; urges that gender mainstreaming be incorporated into EU environmental and climate policies, such as the Green Deal, and stresses that these policies must be informed by gender impact assessments to ensure that they address existing gender inequalities and other forms of social exclusion; calls on the Commission to step up financial and institutional support to promote gender-just climate action and establish strong policy measures to encourage the equal participation of women in decision-making bodies and national- and local-level climate policy, which is vital for achieving long-term climate justice, and that recognition and support be given to women and girls as agents for change;				
44)	98. Calls on the Commission to design a roadmap to deliver on the commitments of the renewed Gender Action Plan agreed at COP25 and to create a permanent EU gender and climate change focal point, with sufficient budget resources, to implement and monitor gender-responsible climate action in the EU and globally;				
45)	99. Stresses the need to increase the resources available to the EU programmes dedicated to the promotion of gender equality and women's rights;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>calls on the Commission to step up its efforts to implement gender budgeting as an integral part of the budgetary procedure at all stages and in all its budget lines, and include independent budget lines for targeted actions; underlines that every new measure, mechanism or strategy should undergo a gender impact assessment; calls on the Commission and the Council, in this context, to invest in the care economy and to adopt a Care Deal for Europe, to complement the European Green Deal; welcomes the fact that, for the first time ever, gender mainstreaming will be a horizontal priority in the MFF and will be accompanied by a thorough gender impact assessment and monitoring of the programmes;</p>				
46)	<p>100. Calls on the Commission to take gender equality and a life cycle perspective into account in shaping the latest European policies and strategies, which will contribute to increasing women's economic independence and reducing inequalities in this area in the long term;</p>				
47)	<p>101. Calls on the Commission and the Member States to take action in order to ensure that women can benefit from the opportunities created by the green transition; underlines that gender should be mainstreamed in the employment policies related to sustainability and just transition in order to deliver policies that allow for proper work-life balance and ensure equal pay, a decent income, personal development and adequate social protection; urges that projects financed under environmental programmes and access to investments for climate action should incorporate a gender perspective;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
48)	102. Calls on the Member States and the Commission to increase gender equality and women's empowerment in sport at large, given the powerful and undeniable role sport can play in helping women and girls break down gender stereotypes, in building confidence and in strengthening their leadership skills; calls on the Member States and the Commission to provide effective platforms to promote female role models and leaders with international, national and local reach; calls on the Member States to promote and develop policies to combat the gender-based remuneration gap and disparities in prize monies, any kind of violence against women and girls in sports and to ensure more coverage of women in the sports media and in decision-making positions; calls on the Commission to include sport in the planned campaign against stereotypes;				
49)	105. Recalls its resolution of 29 November 2018 on the situation of women with disabilities <sup>15</sup> ; urges the Commission to put forward a consolidated proposal in the framework of the post-2020 European disability strategy that includes the development of positive actions targeting women with disabilities to ensure their full and effective participation in the labour market and to eliminate the discrimination and prejudices they face, including measures to promote employment, training, job placements, equal career paths, equal pay, accessibility of and reasonable accommodation in the workplace and				

<sup>15</sup> OJC 363, 28.10.2020, p. 164.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>further learning, paying attention to their digital inclusion and the need to safeguard work-life balance; also requests that measures regarding the gender pay, pension and care gaps explicitly address the needs of parents and carers of children with disabilities, especially women and single-parent households; takes note of the need for a Disability Rights Guarantee with specific measures that address the needs of women with disabilities, as well as for a reinforcement of the Youth Guarantee;</p>				
50)	<p>106. Asks the Commission to reach the most vulnerable women in particular; calls, therefore, for the Commission to make sure that all relevant actions of the strategy leave no woman behind;</p>				
51)	<p>107. Draws attention to the lack of a gender perspective in the field of health and safety at work; stresses that gender mainstreaming should be an integral part of the development of occupational safety and health (OSH) policies and prevention strategies across all sectors, including in the upcoming Commission review of the strategic framework for health and safety at work post-2020; urges the Commission, the Member States and the social partners to consider as occupational diseases and work-related illnesses those that have not yet been recognised as such, which are particularly prevalent in feminised jobs, as well as diseases affecting women specifically, to mainstream gender equality in health and safety in professions dominated by men, where there are still many gaps, including in relation to sanitary installations, work equipment or personal protective equipment, to ensure maternity protection and safety at the workplace and return-</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to-work measures after maternity leave, and to evaluate labour risks in feminised sectors, including the home, when dealing with domestic work and care;				
52)	108. Asks the Commission, in the light of the proven benefits of human milk for newborns, to promote breastfeeding, especially for pre-term infants; calls on the Commission to support policies which enhance the uptake of human milk, including both breastfeeding and donated milk, for pre-term infants, and to promote the cross-border use of milk banks to ensure that women in border regions can avail themselves of this support when necessary;				
53)	110. Reiterates the need for a regular exchange of best practices between Member States, the Commission and key stakeholders (such as healthcare professionals, regulators and CSOs) on gender aspects in health, including guidelines for comprehensive sexuality and relationship education, SRHR and gender-sensitive responses to epidemics; calls on the Commission for further measures and support to guarantee SRHR during the implementation of the current gender equality strategy and to include SRHR in its next EU health strategy; calls on the Commission to support Member States in strengthening their health systems and providing high-quality and universal access to all healthcare services, and to reduce disparities in access to healthcare services, including SRHR services, between and within Member States;				
54)	111. Asks the Commission to address health inequalities within the forthcoming EU health				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>strategy which should focus on access to preventive healthcare at all stages of life, the health and safety of women in the workplace, and a specific gender focus in the Europe's beating cancer plan; underlines once more the importance of gender-specific medicine and research, and stresses, therefore, that investment in the differences between women and men in relation to their health should be supported through Horizon Europe in order to enable healthcare systems to be more responsive to the different needs of women and men;</p>				
55)	<p>112. Calls on the Commission to support research into non-hormonal contraception for women, providing them with more alternatives, as well as to support research on contraceptives for men, aiming to provide for equality in access to and the use of contraceptives, as well as shared responsibility;</p>				
56)	<p>113. Demands support for women's rights defenders and women's rights organisations in the EU and worldwide, including organisations working on SRHR and LGBTI+, through increased and earmarked financial support in the next MFF; underlines in addition their financial difficulties resulting from the current crisis and calls for increased funding in order to sufficiently fund their continued work; is deeply concerned about the backlash against established women's rights and gender equality in some Member States and, in particular, about the attempts to further criminalise abortion care and undermine young people's access to comprehensive sexual education in Poland, and about the adopted reform that attacks transgender and intersex</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	rights in Hungary; calls for continuous monitoring of the state of play in relation to women's rights and gender equality, including disinformation and regressive initiatives in all Member States, and for an alarm system to highlight regression; calls on the Commission to support studies analysing the link between anti-democratic movements and attacks and disinformation campaigns on women's rights and gender equality, as well as on democracy, and calls on the Commission to analyse their root causes and strengthen its efforts to counter them, developing fact checks, counter-narratives and awareness-raising campaigns;				
57)	114. Calls on the Commission to carry out a global campaign against the increasing attacks they are suffering and to secure the release of human rights defenders, focusing special attention on women's rights defenders; calls for the immediate introduction in the EU Guidelines on Human Rights Defenders of an annex aiming to recognise and develop additional strategies and tools to better and more effectively respond to and prevent the specific situation, threats and risk factors faced by women's human rights defenders;				
58)	115. Urges the Commission and Member States to protect women who are particularly vulnerable to multiple discrimination, recognising the intersectional forms of discrimination that women experience based on gender, ethnicity, nationality, age, disability, social status, sexual orientation and gender identity, and migration status, and to ensure that the actions implemented take account of and respond to the specific needs of these groups;				

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
59)	117. Urges the Commission to establish a concrete framework for the rights and protection of sex workers during and after a crisis; further insists on the importance of including measures and strategies that tackle the discrimination faced by sex workers in access to funding, housing, healthcare, education and other services;					
60)	118. Highlights that the audiovisual and print media is one of the sectors with considerable cultural, social and economic weight, both reflecting and shaping society and culture; regrets the fact that women are severely under-represented in key creative positions in this sector, including in the film industry across Europe and worldwide; calls on the Commission to address gender stereotypes in the media and promote gender-equal content; stresses the importance of fostering media literacy and providing all relevant stakeholders with gender-sensitive media education initiatives; calls on the Member States to adopt legislation prohibiting sexist advertising in the media and promoting training and practical courses on countering gender stereotypes in schools of journalism, communication, media and advertising; calls on the Commission to help with the sharing of best practices in the field of fighting sexist advertisements; calls on the Member States to develop and implement policies to eradicate persisting inequalities within the whole audiovisual sector in order to provide and improve opportunities for women and girls;					
61)	121. Calls on the Commission, in partnership with the Member States, to monitor and work towards the full implementation of the Beijing Platform for Action, the ICPD Programme for Action and the

	outcomes of their review conferences, and of all the SDG targets, including targets 3.7 and 5.6, both within and outside the EU, using indicators in line with the UN global indicator framework for the SDGs;				
62)	122. Calls on the Commission to further strengthen the role of the EU as a catalyst for gender equality worldwide;				

4.1.15.4. FEMM Resolution 4: EP resolution of 21 January 2021 on closing the digital gender gap: women’s participation in the digital economy

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>Closing the digital gender gap: women’s participation in the digital economy</b></p>	<p>21/01/2021  <a href="#">T9-0026/2021</a>  <a href="#">2019/2168(INI)</a>  <b>FEMM</b></p>	<p>On 2 March 2021, the Parliament received “<a href="#">Replies</a>” of the Commission to positions and resolutions adopted by the European Parliament – January 2021 part-session” informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Helena Dalli.</p> <p>The <a href="#">plenary debate</a> took place on 21 January 2021</p>			
<p>1)</p>	<p>1. Calls on the Commission and the Member States to align the measures fostering the digital transition with the Union’s goals on gender equality; stresses that the digital transition should not leave anyone behind; welcomes the Commission’s commitments to boosting the participation of women in the digital economy and information society included in the Gender Equality Strategy 2020-2025; calls on the Commission to continue to address the serious gender gap within the ICT sector in the digital agenda, the European digital strategy and all other digitalisation skills and education policies and initiatives, with concrete measures aimed specifically at increasing the participation of women and girls in the sector; stresses that increasing women’s participation in the digital sector can have an important impact on combating gender inequalities, stereotypes and discrimination, improving access to the labour market for women and their working conditions, as well as addressing the gender pay gap; calls on the Commission and the Member States to</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	provide appropriate funding to programmes aimed at attracting more girls and women to study and work in STEM, to set up entrepreneurship programmes that finance women and girls who start tech projects or new companies, to develop strategies aimed at increasing girls' and women's digital inclusion, and digital financial inclusion, in fields relating to STEM, AI and the research and innovation sector, and to adopt a multi-level approach to address the gender gap at all levels of education and employment in the digital sector;				
2)	2. Calls on the Commission to take equal opportunities for women and men and the digital gender gap into due account while negotiating programmes within the next multiannual financial framework and funds and loans under the Recovery Plan, and to increase awareness of these mechanisms among women; stresses that gender mainstreaming and gender budgeting with measurable indicators should be part of the policies supporting ICT development; calls on the Commission to ensure the gender mainstreaming of the Digital Services Act and all upcoming proposals related to the digital realm;				
3)	3. Calls on the Commission and the Member States to ensure the full implementation of the Ministerial Declaration of Commitment on 'Women in Digital'; calls on the Commission to monitor the implementation of Member States' cross-sectoral national plans on women in digital;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	5. Encourages the Commission and the Member States, as well as developers, businesses and universities, to address the gender gap in the ICT sector and cooperate in finding solutions and sharing best practices on better inclusion of girls in subjects relevant for digital education from an early age onwards;				
5)	6. Calls on the Commission to thoroughly address the issue of the low numbers of women participating in ICT studies and careers, and ensure a strong gender perspective in the digital Europe programme and updated digital education action plan, including accessibility and affordability of digital equipment; calls on educational entities to include a gender component in all STEM and ICT-related curricula, educational materials and teaching practices from an early age to encourage girls to take up and continue studying mathematics, coding, ICT classes and science subjects in schools; encourages the Commission and the Member States to work with educational institutions and civil society organisations to assess and redesign ICT educational formats;				
6)	8. Calls on the Commission and the Member States to take into account the gender perspective in the development of digital education policies to enable both male and female students to face future challenges; calls on the Commission and the Member States to set up mentoring schemes with female role models in ICT within all levels of education; calls on the Commission and the Member States to promote awareness-raising campaigns directed at both students and their parents to fight gender				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	stereotypes in school projects and jobs; stresses the importance of crediting women for their work so that girls do not see only male names in science books, but also have female role models;				
7)	9. Calls on the Commission and the Member States to support lifelong learning in order to facilitate women's professional transition to ICT-related positions, as well as training and schemes to boost the e-skills, upskilling and reskilling of girls and women;				
8)	10. Calls on the Commission and Member States to adopt policies and measures to address the leaky pipeline phenomenon;				
9)	12. Urges the Member States to fully transpose and implement the Work-Life Balance Directive and calls on the Commission to monitor it effectively to ensure that both parents can benefit from paternity, parental and carer's leave; encourages the Member States to consider ICT as a means to promote work-life balance and to observe trends in the digitalisation of the world of work, including the digital sector, in order to adapt their existing work-life balance measures, if necessary, and to promote and strengthen their systems aimed at an equal distribution of caregiving responsibilities; in this context, encourages the Commission and Member States to introduce policies to address the situation of the self-employed, particularly women entrepreneurs in the ICT and digital sectors, and their need for access to social protection systems, maternity leave and childcare; points out that teleworking allows women to work from home				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and has the potential to lead to a better work-life balance; notes, however, that it has to be monitored and properly regulated by the Member States;				
10)	14. Calls on the Commission and Member States to promote gender equality in companies in the ICT and related sectors and in the digital economy, and to adopt horizontal policies to reduce the gender gap in the digital economy through targeted measures, including European funds to finance female-led projects in the digital sector, the promotion of a minimum number of women researchers participating in ICT projects, training courses for HR departments on 'unconscious gender-discriminatory bias' to promote gender-balanced recruitment, the designing of prizes and incentive schemes for companies and organisations actively implementing gender-neutral policies linked to measurable targets, the promotion of gender mainstreaming in companies' strategies in the production, design and marketing of ICT products, annual reports on diversity and the gender pay gap by ICT companies, public procurement policies and/or guidelines on the purchase of ICT services from providers that apply a gender balance in the composition of their companies and boards, facilitating the distribution of European funds to companies that take into account gender balance criteria and encouraging the implementation of gender equality plans and protocols to improve and monitor companies' performance as regards women's participation, including at management				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and leadership levels, as well as mentorship programmes;				
11)	15. Calls on the Commission and the Member States to fully assess the causes and factors that lead to a high drop-out rate of women from digital careers; calls on the Commission and the Member States to analyse the effect that the lack of work-life balance has on women's ability to participate in the upskilling training needed to keep up the required skill level in the ICT sector; calls on the Commission and Member States to develop mechanisms and programmes to integrate women and girls into education, training and employment initiatives in the digital sector, irrespective of their legal migration status;				
12)	16. Calls on the Commission and the Member States to foster women's entrepreneurship and engagement in innovation and to increase financing opportunities for female entrepreneurs and female-led digital start-ups, and to improve the accessibility of existing funds so that they have equal opportunities to compete in the digital single market and encourage a more gender-balanced composition of financing institutions;				
13)	17. Encourages the Commission and the Member States to reinforce the funding for research on gender-related issues in ICT;				
14)	22. Stresses that ICTs can greatly increase women's ability to take part in electoral processes, public consultations, surveys and debates, as well as to organise and advocate				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	women's rights; calls on the Commission and the Member States to take the gender dimension into account when devising e-government initiatives; underlines the effectiveness of using the internet for campaigns, forums and boosting the visibility of female role models;				
15)	23. Calls on the Commission and the Member States to engage constructively with and support digital civil society organisations and to encourage such organisations to get involved in internet governance; calls on the Commission and the Member States also to work closely with and involve women and women's civil society organisations in order to better respond to and alleviate the concerns that exist in the everyday life of women and girls when designing and implementing public tech policies, and to promote women's economic and digital inclusion;				
16)	24. Encourages the Member States and the Commission to organise awareness-raising, training and gender mainstreaming campaigns to highlight the impact of ICT proficiency on the economic empowerment of women;				
17)	27. Calls on the Commission and the Member States, as well as platforms and businesses, to collect comparable gender- and age-disaggregated data on the use of ICT, as well as to propose initiatives, including research, to understand and address the root causes of the digital gender gap; urges the Commission and the Member States to collect and utilise existing sex-disaggregated data to promote more				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	research into the interaction of the different factors which impede women's and girls' digital inclusion; stresses that harmonised data collection facilitates the comparison and sharing of data and examples of best practices by the Member States;				
18)	29. Calls for the EU institutions, agencies and bodies, as well as the Member States and their law enforcement agencies, to cooperate and take concrete steps to coordinate their actions to counter the use of ICT to commit crimes, including online sexual harassment and trafficking in human beings for the purpose of sexual exploitation, and to collect sex-disaggregated data concerning online gender-based violence; welcomes the Commission's announcement of a survey on gender-based violence; urges the Commission and the Member States to provide appropriate funding for the development of AI solutions that prevent and combat cyber violence, online sexual harassment, the exploitation of women and girls, and harassment at the workplace; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	30. Considers it essential for the achievement of gender equality to create comprehensive, age-appropriate sexual and relationship education which includes combating cyber violence and online sexual harassment, as well as combating online objectification and the hyper-sexualisation and sexual exploitation of women; calls on the Commission and the Member States to adopt policies and measures to address the occurrences of sexual harassment at STEM educational sites and schools, as well as within the ICT sector;				
20)	31. Calls for further legally binding measures and for a directive to prevent and combat gender-based violence, including cyber violence, which is often directed at women such as public figures, politicians and activists, as well as online hate speech against women; calls on the Commission to ensure that the forthcoming proposal for a Digital Services Act and the new framework for cooperation between internet platforms address online platforms' responsibilities regarding user-disseminated hate speech and other harmful, abusive and sexist content, to protect women's safety online; calls on the Commission to develop harmonised legal definitions of cyber violence and a new Code of Conduct for online platforms on combating online gender-based violence;				

## 4.1.15.5. FEMM Resolution 5: EP resolution of 10 June 2021 on promoting gender equality in science, technology, engineering and mathematics (STEM) education and careers

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Promoting gender equality in science, technology, engineering and mathematics (STEM) education and careers	10/06/2021 <a href="#">T9-0296/2021</a> <a href="#">2019/2164(INI)</a> FEMM	<a href="#">SP(2021)531</a>	Final reply (SP) received on 23 September 2021	Specific replies			
1)	4. Reaffirms the importance of integrating the awareness of gender bias across all relevant sectors, including in the initial and continuous training of teachers; highlights the need to address structural barriers, such as socio-economic disadvantage and hostile working environments and working conditions for women, which hinder girls and women from entering a predominantly male-dominated field, and the need to increase the visibility of hitherto undervalued role models in order to inspire women and girls; calls on the Commission to introduce and support awareness-raising campaigns and other programmes and initiatives to reduce these barriers in the academic world; [...]	<p>The Commission welcomes the references to the importance of combatting gender stereotypes (paragraphs 2, 3 and 4) as an important barrier to people's education and career choices throughout their educational and professional lives. Gender stereotypes are a root cause of gender inequality because they create expectations based on fixed norms for women and men, girls and boys, thereby limiting their aspirations, choices and freedoms. As announced in the Gender Equality Strategy, the Commission will conduct an EU-wide communication campaign to raise awareness about and challenge gender stereotypes in all areas of life, including education. The campaign will take an intersectional approach and be mindful that of the fact that gender stereotypes are frequently combined with stereotypes based on other factors as race, disability or sexual orientation.</p> <p>Several actions have been launched by the Commission to increase the visibility of women in science, technology, engineering and mathematics (STEM). These actions recognise their achievements, and propose inspirational models to the next generation. Examples are the one-year #EUwomen4future campaign launched in March 2020, which showcased remarkable European women in STEM fields, or the annual EU Prize for Women Innovators, which celebrates since 2011 women entrepreneurs, a majority of</p>				While the Commission seems to consider that it has been already working on action falling under the scope of the EP request (introduce and support awareness-raising campaigns and other programmes and initiatives to reduce structural barriers for women and girls), it announces an EU-wide communication campaign to raise awareness about and challenge gender stereotypes.

		<p>which in STEM, which lead the charge in bringing life-changing innovations to the market.</p> <p>A number of actions have been funded under the Horizon 2020 programme, to debunk gender stereotypes about women in STEM research and innovation. Examples include the project "HYPATIA", in which science centres and museums worked together with schools, industries and academics to promote gender-inclusive STEM education. They also produced a ready-to-use digital collection of activities for teachers, informal learning organisations, researchers and industry across Europe.</p>			
2)	<p>6. Calls on the Commission and the Member States to take specific account of the situation of women and girls from disadvantaged socioeconomic backgrounds, such as those with disabilities or those living in outermost regions or rural areas, women in poverty, single mothers, students in precarious situations, migrant women and Roma women, and to ensure their full access to and inclusion in digital education and STEM careers in order to prevent the digital divide from widening;</p> <p>calls on the Commission and the Member States to pay careful attention to intersectional discrimination and bias due to ethnicity, religion, sexual orientation, age or disability when devising their action plans;</p> <p>calls on the Commission and the Member States to collect comparable, harmonised data to track the progress of women from different socioeconomic backgrounds or racial and ethnic origins through all educational levels, including</p>	<p>Concerning the calls on the Commission to take specific account of the situation of women and girls from disadvantaged socioeconomic backgrounds (paragraph 6), the Commission informs that the <a href="#">Pathways to School Success</a>, an initiative to help all pupils to reach a baseline level of proficiency in basic skills, announced in the Communication on '<a href="#">Achieving the European Education Area by 2025</a>'. The initiative will address the challenges of giving all young people the chance to reach a certain level of proficiency in basic skills; minimising the number of young people leaving education without at least an upper secondary degree and ensuring pupils' well-being at school. The Commission also informs about the Strategy for the Rights of Persons with Disabilities 2021-2030, which recognises the additional burden of intersectional discrimination and that women with disabilities need particular attention. The gender perspective will be taken into account during the implementation and is especially highlighted in employment, access to justice, protection from violence and healthcare. The Commission takes heed of the Parliament's request to extend the indicators used in the Women in Digital Scoreboard so that they include</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Pathways to School Success</a>, '<a href="#">Achieving the European Education Area by 2025</a>', Strategy for the Rights of Persons with Disabilities 2021-2030).</p>

3)	<p>8. [...] calls on the Commission and the Member States to create new channels to connect with girls and ensure that digital education reaches them all, and to recognise and invest in teachers as the drivers of cultural change given their potential to boost the continuing participation of girls in science at school; [...]</p>	<p>In relation to paragraph 8, the Commission welcomes the support of the European Parliament for the <a href="#">Digital Education Action Plan 2021-2027</a> and its action to encourage women in STEM (action 13). Action 13 is part of the second priority of the Action Plan - enhancing digital skills and competences for the digital transformation - and aims to increase participation and careers of women in digital and STEM fields, including entrepreneurship. The action is divided into two parts: the first one consists in a series of trainings activities on digital and entrepreneurial skills for sustainability for girls at primary, secondary and tertiary education. With this initiative, the Commission acknowledges that interventions are needed from an early age to sustain girls' interest in these fields and fight harmful stereotypes on gender roles for both girls and boys. The objective of this first strand is to engage 8,000 schools girls in 2021 and then further extend the activities in 2022-2025 to reach 40,000 girls and women along the entire education chain. The second strand of the action focuses on developing new higher education programmes for engineering and information and communications technology based on the STEAM approach. This will be done by setting STEM as a priority for cooperation projects in higher education in the <a href="#">Erasmus+ 2021 Work Programme</a>, by building on the EU STEM Coalition to support the establishment of national STEM platforms, and by disseminating the results from the Erasmus+ funded forward-looking cooperation projects launched in February 2020 and good practices available within the European Universities alliances. Regarding the call to mainstream gender equality in the future EU youth strategy and policies, the Commission recalls the dual approach of the Gender Equality Strategy, which systematically includes a gender perspective in all stages of policy design in all EU policy areas.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (ensure that digital education reaches all girls and invest in teachers to boost participation of girls in science at school) as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Digital Education Action Plan 2021-2027, Erasmus+ 2021 Work Programme</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>11. [...] calls on the Commission and the Member States to find more attractive and creative ways to showcase female role models with successful careers in ICT and STEM in order to boost girls' self confidence in digital skills and encourage them to pursue ICT and STEM-related studies;</p>	<p>In relation to paragraphs 10 and 11, the Commission is stimulating the interest of children, youngsters and in particular, girls and women in research careers and STEM topics through outreach initiatives such as the <a href="#">European Researchers' Night</a>, the largest science outreach event in Europe funded by the Marie Skłodowska-Curie Actions. Moreover, within this last initiative the European Commission is launching <i>Researchers at Schools</i> activities, which will bring EU-funded researchers to schools everywhere in Europe throughout the year. These activities will allow teachers and pupils to engage with researchers on important topics, provide strong role models for girls and young women and heighten young people's interest in science and research careers, including in ICT and STEM fields.</p> <p>[...]</p> <p>Regarding paragraphs 11 and 18 the Commission is encouraging a growing number of women into research and innovation through the Horizon Europe programme. Gender equality is a strengthened crosscutting priority in Horizon Europe, involving in particular a target of 50% women in all the Horizon Europe programme related boards and evaluation committees, and gender balance among research teams is a ranking criterion for ex aequo proposals. In particular, the Marie Skłodowska-Curie Actions (MSCA) pays great importance to gender mainstreaming at all levels. [...]</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (find more attractive and creative ways to showcase female role models with successful careers in ICT and STEM) as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">European Researchers' Night</a>, <a href="#">Researchers at Schools activities</a>, Horizon Europe).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	14. [...] ; calls on the Commission and the Member States to set up mentoring schemes with female role models in STEM within all levels of education; calls on the Commission to adopt a targeted gender approach in the rollout of traineeships for digital opportunities to give young women from different backgrounds the chance to get hands-on digital, ICT and STEM experience in fields that are in demand on the labour market, and strongly encourages the promotion of internships in STEM businesses during education; [...]	[...] in relation to paragraph 14, the Commission is placing great importance in the promotion of strong models in STEM on social media and communication campaigns, as exemplified by the actions taken during the yearly International Day of Women and Girls in Science (11 February) or the promotion around targeted initiatives such as the EU Prize for Women Innovators.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (set up mentoring schemes with female role models in STEM within all levels of education, adopt a targeted gender approach in the rollout of traineeships for digital opportunities) as according to the Commission, it has been already working on action falling under the scope of the EP request.	
6)	15. Notes that in its conclusions of May 2015 on the European Research Area Roadmap for 2015-2020, the Council – to no avail – called on the Commission and the Member States to start translating national equality legislation into effective action in order to combat gender imbalances in research institutions and decision-making bodies and integrate the gender dimension better into research and development policies, programmes and projects; [...]	In relation to paragraph 15, combating the underrepresentation of women in entrepreneurship, economic leadership, and the technology sector has been a strategic priority for the European Institute of Innovation and Technology (EIT). The EIT has developed a number of dedicated Women Entrepreneurship and Leadership Activities. The EIT Woman Leadership and Entrepreneurship Awards are awarded each year to recognise the contribution of outstanding women to the innovation and entrepreneurship ecosystems within the EIT Community. In addition, the Women@EIT initiative addresses the limited access for women entrepreneurs and innovators to business networks. It is a vibrant, unique network of more than 600 women from the EIT Community, connecting students, alumni and senior business community members, with the aim to encourage women to start their own businesses and promote inspiring women in entrepreneurship and technology.  Moreover, to address the underrepresentation of women entrepreneurs as company founders, in decision-making roles, and in the investment space the “Women TechEU” initiative was launched on 13 July under the European Innovation Council. The initiative provides support to		No further/specific actions proposed/promised to be taken by the Commission on this particular point (combat gender imbalances in research institutions and decision-making bodies and integrate gender dimension better into research and development policies) as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>women leading deep tech start-ups by offering funding and first-class coaching and mentoring. As part of the EIC Business Acceleration Services, the Women Leadership Programme will also provide access to coaching, mentoring and business partners to all women in EIC funded projects and companies, and the EU Prize for Women will continue to celebrate women entrepreneurs, which have founded a successful company and brought their innovation to the market.</p> <p>The newly established European Women in Venture Capital Group presented a report on 15 July with concrete recommendations to the European Commission and the European Investment Bank on how to increase venture capital for women-led companies. The Commission will carefully analyse it as part of the ongoing reflection on an interconnected, cohesive and more inclusive European innovation policy.</p> <p>Concerning the call to combat gender imbalances in research institutions and decision-making bodies (paragraph 15), the Commission recalls the European Research Area (ERA) Progress Report 2018 and latest “She Figures” (2018 and forthcoming 2021). These show some progress, with ERA National Action Plans and actions funded under the Horizon 2020 programme, to support institutional change through the implementation of gender equality plans and a range of networking and community and capacity building actions, having acted as catalysers for gender equality action in several Member States.</p> <p>However, as progress remains limited, the Horizon Europe programme introduced strengthened requirements for gender equality, including a new eligibility criterion. As of 2022, all public bodies, research organisations and higher education establishments from Member States and Associated countries will need to have a gender equality plan in place in order to participate in the Programme and</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>receive funding. Within the new ERA (Communication of 30 September on "A new ERA for Research and Innovation"), the under-representation of women in STEM is particularly highlighted, and funding will be provided by the Horizon Europe programme to implement inclusive gender equality plans. Opening gender equality policies to intersectionality and considering women from diverse racial and ethnic backgrounds, women with disabilities and LGBTI+ people. Funding will also be allocated to an ERA Talent Platform, which will have a specific focus on fostering gender equality in talent recognition, including through targeted support for women researchers, and also addressing mobility-related dual career and work-life balance issues.</p> <p>Additionally, through a specific action under the Horizon Europe programme, the Commission will specifically address in 2021 the impact of the COVID-19 pandemic on the work and productivity of women researches and innovators, and on gender equality in research and innovation in general.</p>			
7)	<p>16. Highlights the number of cases of sexual harassment suffered by female STEM students in tertiary education and calls on the Member States and educational institutions to enact zero tolerance policies for sexual harassment, to agree on strict codes of conduct and protocols, to create safe and private reporting channels for women and girls, and to report all cases of sexual harassment to the relevant authorities; calls on the Commission, the Member States and educational institutions to adopt preventive measures and adequate sanctions for the perpetrators of sexual harassment in order to tackle sexual harassment in schools and STEM educational facilities;</p>	<p>Concerning the call on the Commission to adopt preventive measures and adequate sanctions for the perpetrators of sexual harassment in order to tackle sexual harassment in schools and STEM educational facilities (paragraph 16), the Commission recalls that sexual and sex-based harassment is prohibited under EU laws on equality at work. Tackling sex-based harassment is part of the Commission's work on combating violence against women and a top priority under the EU Gender Equality Strategy. The Commission will present a new legislative initiative in late 2021 with the same objective as the Istanbul Convention: to ensure that EU Member States have effective measures in place (in areas of EU competence) to prevent and combat violence against women and domestic violence. To address harassment at work, the Commission has proposed the authorization of</p>		<p>With regard to the Commission's announcement to present a new legislative initiative to prevent and combat violence against women and domestic violence, it should be noted that the Commission included a legislative proposal to prevent and combat specific forms of gender-based violence in its 2021 work programme. At Parliament's plenary session on 25 November 2021, Commissioner Helena Dalli reaffirmed the importance of an EU instrument, with binding obligations on the Member States, enforceable by the Commission. She informed Parliament that the Commission will table a directive on violence against women and domestic violence in early 2022.</p> <p>In the meantime, in December 2021, the Commission put forward a proposal to include hate speech and hate</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the Member States to ratify the International Labour Organization (ILO) Violence and Harassment Convention.</p> <p>The Commission also supports the project “<a href="#">UniSAFE</a>” specifically addressing gender based violence (GBV) in Academia, under the Horizon 2020 programme. GBV is one of the recommended areas to be addressed in the mandatory Gender Equality Plans for applying to the Horizon Europe programme, and funding will be dedicated to a transnational policy coordination network which among other tasks will establishing a zero-tolerance policy on gender-based violence including sexual harassment in research and innovation organisations.</p>		<p>crime, including hate speech and hate crime based on sex and sexual orientation, in Article 83(1) TFEU.</p>	
8)	<p>18. [...] urges the Member States to fully transpose and implement the Work-Life Balance Directive<sup>16</sup> and calls on the Commission to monitor it effectively;</p> <p>calls on the Commission and the Member States to fully assess the causes and factors that lead to a high drop-out rate from STEM careers among women, to formulate recommendations for action to prevent this, if necessary, and to develop mechanisms and programmes to involve women and girls in education, training and employment initiatives and adopt adequate policies and measures to this end; emphasises that COVID-19 is opening a new chapter in the world of work, education, governance and everyday life and has highlighted the particular importance of digital literacy and skills and the</p>	<p>Regarding paragraphs 11 and 18 the Commission is encouraging a growing number of women into research and innovation through the Horizon Europe programme. Gender equality is a strengthened crosscutting priority in Horizon Europe, involving in particular a target of 50% women in all the Horizon Europe programme related boards and evaluation committees, and gender balance among research teams is a ranking criterion for ex aequo proposals. In particular, the Marie Skłodowska-Curie Actions (MSCA) pays great importance to gender mainstreaming at all levels. From the onset, it ensures gender balance in its selection panels and provides training on implicit gender biases in the evaluation and selection process. In addition, the MSCA include the gender dimension as a key award criteria in its evaluation process. By doing so, they promote gender balance in research and research management teams and full consideration of the gender dimension in research and innovation content, thus contributing to improving the quality and societal relevance of research</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (monitor implementation of Work-Life Balance Directive effectively, assess causes leading to high drop-out rate from STEM careers among women, formulate recommendations for action, if necessary, and develop mechanisms/programmes to involve women and girls in education, training and employment initiatives) as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">MSCA Work Programme 2021-2022, EU Work-Life Balance Directive for Parents and Carers</a>).</p>	

<sup>16</sup> Directive (EU) 2019/1158 of the European Parliament and of the Council of 20 June 2019 on work-life balance for parents and carers and repealing Council Directive 2010/18/EU (OJ L 188, 12.7.2019, p. 79).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>need for new conditions on teleworking, which have shown a significant gender divide during the pandemic and ensuing lockdowns; [...]</p>	<p>results. Moreover, gender balance is a key aspect when selecting the MSCA doctoral and postdoctoral programmes and research teams that will train the innovators and research leaders of tomorrow and provide them with new skills and career development opportunities. The MSCA also address the gender pay gap and support equal opportunities through the provision of an equal pay for all fellows. They already include work-life balance provisions that encourage in particular women to apply and thus contribute to the high participation rate of female researchers. These include family allowances, maternity and parental leave and part-time work for family and personal reasons. In addition, the European Commission has introduced new measures in the <a href="#">MSCA Work Programme 2021-2022</a> under Horizon Europe to make this support fairer, more gender-friendly and even more inclusive than it currently is. The new measures will make family allowances more accurate and inclusive and overcome obstacles to hire women researchers.</p> <p>The Commission fully recognises the importance of reconciliation measures between work and private life. A dedicated principle 9 of the European Pillar of Social Rights refers to the right of working parents and people with care responsibilities to suitable leave, flexible working arrangements and access to care services. The <a href="#">EU Work-Life Balance Directive for Parents and Carers</a> was adopted in August 2019 and is a key deliverable of the Pillar. The Directive introduces a set of minimum standards to help reconcile work and family responsibilities for parents and carers. The general objective of the Directive is to address women's under-representation in the labour market, and to promote equality between men and women with regard to labour market opportunities. The specific objective is to improve access to suitable leave and flexible working arrangements. This will allow parents with children or workers with dependent relatives, to better balance caring</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and professional responsibilities. The Commission is now working with the Member States to support them in the transposition by the deadline of August 2022.</p> <p>In the 2020 European Skills Agenda, the Commission announced a range of actions to attract girls and women in STEM careers and studies and to encourage them to develop entrepreneurial and digital skills.</p>			
9)	<p>22. [...] calls on the Commission and the Member States to further engage with all ICT, digital, telecoms, media, audiovisual and technological business partners to promote an inclusive and gender-balanced working culture and environment, including by introducing measures such as awareness campaigns to promote gender equality in the private STEM sectors and public-private partnerships to facilitate access to the STEM labour market for recently graduated students, with the promotion of apprenticeship schemes and internships for girls and young women to enhance their transition to the labour market, through such initiatives as mentorships and scholarships for disadvantaged girls, and with public-private partnerships between education systems, governments and companies that work in emerging technologies, such as 3D technologies, AI, nanotechnology, robotics and gene therapy, and to share information and good practices across the Member States to this end;</p>	<p>In relation to the calls on the Commission to engage further with all ICT, digital, telecoms, media, audio-visual and technological business partners to promote an inclusive and gender-balanced working culture and environment (paragraph 22), the Commission supports gender balance in vocational education and training. This is one of the elements in the Council Recommendation on vocational education and training adopted in November 2020. This also applies to apprenticeships. In the framework of the European Alliance for Apprenticeships (EAfA), an online "Live Discussion" was organised on 24 June 2021, focussing on gender balance in apprenticeships.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (further engage with all ICT, digital, telecoms, media, audiovisual and technological business partners to promote an inclusive and gender-balanced working culture and environment, including by introducing awareness campaigns) as according to the Commission, it has been already working on action falling under the scope of the EP request (Council Recommendation on vocational education and training, online "Live Discussion" on 24 June 2021 in the framework of the European Alliance for Apprenticeships (EAfA)).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	<p>25. Stresses that the quality of the data sets used is paramount for the performance of AI technologies, that AI must not reinforce gender inequalities and stereotypes by transforming bias and prejudices from the analogue to the digital sphere on the basis of algorithms, and that AI can contribute significantly to promoting gender equality, provided that an appropriate legal framework is developed and conscious and unconscious biases are eliminated; highlights that one of AI's most critical weaknesses relates to certain types of bias such as gender, age, disability, religion, racial or ethnic origin, social background or sexual orientation as a result of a homogeneous workforce; notes that intersectional types of discrimination leave women marginalised from emerging technologies, such as women of colour owing to errors in facial recognition technology; emphasises the need for diverse teams of developers and engineers to work alongside key societal actors to prevent gender and cultural biases from being inadvertently included in AI algorithms, systems and applications; supports the creation of educational curricula and public-awareness activities concerning the societal, legal and ethical impact of AI; calls on the Commission and the Member States to take all possible measures to prevent such biases and to ensure the full protection of fundamental rights;</p>	<p>Action 13 of the <a href="#">Digital Education Action Plan</a> (2021-2027) sets out to increase participation and careers of women in digital and STEM fields, including entrepreneurship. The action will contribute to closing the gender gap in the STEM and Artificial Intelligence (AI) field in the future labour market (paragraph 25). The Commission agrees that a more diverse STEM workforce can contribute to eliminating gender biases and stereotypes in AI algorithms.</p> <p>Action 6 of the Digital Education Action Plan is dedicated to artificial intelligence and data. Its basic goals are to promote understanding of emerging technologies and their applications in education, develop ethical guidelines on AI and data usage in teaching and learning for educators, and support related research and innovation activities through the Horizon Europe programme. This Action follows the need for public-awareness activities concerning the societal, legal and ethical impact of AI to prevent gender biases and ensure the full protection of fundamental rights.</p> <p>The ethical guidelines will be developed by an informal Commission Expert Group, led by the Commission. Following an open call for experts, which closed on 25 May 2021, 25 members have been selected, representing academia, non-governmental organisations, think tanks, private sector and international organisations. The Expert Group was launched on 8 July 2021 and will continue its work for approximately a year. The guidelines, expected to be presented in September 2022 within the context of a "Back to School initiative", will be accompanied by a training programme for researchers and students on the</p>		<p>While the Commission seems to consider that it has been already working on action falling under the scope of the EP request (prevent gender bias in artificial intelligence and ensure full protection of fundamental rights), it nevertheless announced the development of ethical guidelines by the informal Commission Expert Group in September 2022. According to the Commission, the guidelines will be accompanied by a training programme for researchers and students on the ethical aspects of AI and include a target of 45% of female participation in the training activities.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>ethical aspects of AI and include a target of 45% of female participation in the training activities.</p> <p>Regarding the need to ensure that AI does not reinforce gender inequalities and stereotypes (paragraphs 25 and 26), the Commission notes that it has recently adopted a <a href="#">proposal for a regulation laying down harmonised rules for AI in the internal market</a> that specifically aim to address risks to safety and fundamental rights, including equality and social rights. The proposal envisages mandatory requirements for specific high-risk AI systems concerning the use of high quality data, data governance procedures, accuracy and robustness and testing to help ensure that uses of high risk AI systems are not affecting protected groups (e.g. based on racial or ethnic origin, gender, sex, age etc.) in a discriminatory way. Under the proposal, users would, moreover, be obliged to monitor and exercise human oversight over the high-risk AI system and use input data that is relevant in view of the intended purpose of the AI system.</p> <p>In addition, for non-high-risk AI systems the Commission will promote voluntary codes of conduct similar to the High-level Expert Group's Ethics Guidelines for Trustworthy AI that require diversity, non-discrimination and fairness, including the need to ensure diversity in developer teams.</p>		<p>Because of the general character of the promise, it is unclear if and to what extent the Commission will carry out this action.</p>	
11)	<p>27. [...] calls on the Commission to help Member States' competent authorities to devote particular attention to new forms of gender-based violence such as cyber harassment and cyberstalking<sup>17</sup> and to carry out ongoing</p>	<p>The Commission fully shares the Parliament's view that when properly designed and used, AI systems could actually positively contribute to reducing bias and existing structural gender discrimination and bring significant benefits to address the challenges faced by women and</p>		<p>See point 16 above.</p>	

<sup>17</sup> EU Agency for Fundamental Rights, *Violence against women: an EU-wide survey*, 2014, p. 87.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	evaluations and address these issues more effectively;		<p>enhance women’s health, well-being and contribute to gender equality, digital literacy, innovation and creativity, including access to finance, higher education and flexible work opportunities (paragraph 27).</p> <p>Concerning the call to devote particular attention to new forms of gender-based violence (paragraph 27), the Commission recalls the new legislative initiative on gender-based violence against women and domestic violence, as announced in the Gender Equality Strategy 2020-2025 and Commission Work Programme 2021, to be adopted at the end of 2021, which will cover all forms of gender-based violence, including online violence. A fitness check evaluation of the existing legal framework to evaluate the impact of relevant legal provisions on gender-based violence and domestic violence is being carried out in preparation of this initiative.</p> <p>The gender gap in the AI sector is part of the larger picture of women’s underrepresentation in the digital economy. The Commission’s study “Women in the digital age” has mapped out the barriers: insufficient digital skills especially advanced ones; few women choose to study ICT and hence, enter the sector, and fewer remain in it; weak business networks in digital entrepreneurship and risk aversion. The Commission’s High-Level Expert Group on AI presented in June 2019 33 policy and investment recommendations supporting the development of trustworthy AI in the EU through a human-centric approach to AI, as one of the most transformative technologies to drive innovation and productivity. The recommendations follow the group’s Ethics Guidelines for Trustworthy AI, published in April 2019. They are part of a wider EU effort to boost the AI industry and researchers within an appropriate ethical and regulatory framework.</p>			
12)	28. [...] calls on the Commission and the Member States to enact policies to support and unleash		Concerning the call on the Commission to enact policies to support and unleash the entrepreneurial potential of			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the entrepreneurial potential of women, who remain an untapped source of economic growth, innovation and job creation, to provide more and better information about entrepreneurship as an attractive career option, especially for young women in school, and to implement public policies that promote female entrepreneurship; [...]	women (paragraph 28), the Commission recalls that under the InvestEU programme, the Commission will pursue improving access to finance for women-led companies and women's participation in the investment decision-making through an integrated approach to stimulate investment across the EU, with actions focusing on investment, capacity building and stimulating change ("gender-smart" financing).		Because of the general character of the promise, it is unclear if and to what extent the Commission will carry out this action.	
13)	30. Calls on the Commission and the Member States to increase financing opportunities to loans and equity finance for women start-up entrepreneurs and innovators through EU funds and programmes, to facilitate women's access to existing funds, to create dedicated funds, and to seek new and innovative ways to support women financially and help them to overcome the barriers they face; [...]	The Commission supports the building of evidence regarding women entrepreneurship (paragraph 30). For instance, in 2018, a joint "Policy Brief" with the Organization for Economic Co-operation and Development (OECD) on Women's Entrepreneurship was published. It entails extensive description on how policy can support women entrepreneurs. A specific chapter is also dedicated to women entrepreneurship in the last EU Commission-OECD "Missing Entrepreneurs Report" (2019). The Commission also supports women entrepreneurship with EU funding. For instance, under the Employment and Social Innovation (EaSI) programme, it finances a project, which will make several business incubators more mindful to the situation of underrepresented groups in entrepreneurship such as women (see <a href="https://betterincubation.eu/">https://betterincubation.eu/</a> ). The social investment and skills window of InvestEU will provide micro finance to support job creation and income-generating activities, in particular, for persons of under-represented, vulnerable and disadvantaged groups e.g. women who wish to start up or develop a micro-enterprise, including on a self-employed basis.		No further/specific actions proposed/promised to be taken by the Commission on this particular point (increase financing opportunities for women start-up entrepreneurs and innovators through EU funds and programmes) as according to the Commission, it has been already working on action falling under the scope of the EP request (joint "Policy Brief" with OECD on Women's Entrepreneurship, Employment and Social Innovation (EaSI) programme, InvestEU).	
14)	31. Welcomes the Commission's initiative establishing the EU Prize for Women Innovators, which is awarded every year to European women who have founded a successful company and brought an innovation to market; calls on the Commission and the Member States	No specific reply is provided to this particular point.		Not mentioned.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to find additional ways to encourage more women to start up their own companies and to celebrate inspiring female leaders in innovation;					
15)	32. Calls on the Commission and the Member States to implement the Declaration of Commitment on Women in Digital adopted in April 2019 and to develop concrete actions to promote gender equality in the STEM sector, including the creation of the European Girls in ICT and STEM day; calls on the Commission to monitor and report on Member States' efforts and actions and to ensure the exchange of information and good practices;		<p>The <a href="#">Ministerial declaration of women in digital</a> Member States signed in April 2019 is now part of the Commission's Equality Strategy of March 2020 (paragraph 32). The Commission is working with national representatives to implement the declaration's actions, which are:</p> <p>Member States to develop national plans, focusing on education and qualification; non-discrimination in the labour market and sex-disaggregated data; motivating girls early on to explore tech studies; re-skilling/upskilling of women; digital skills for unemployed women and women from vulnerable groups; work-life balance.</p> <p>Broadcasters to combat stereotypes, promote gender equality in broadcasts dealing with tech and science.</p> <p>European Girls &amp; Women in ICT Day on the 4th Thursday of every April coinciding with the International Telecommunications Union's Girls in ICT Day.</p> <p>Promote non-discriminatory work conditions in companies through e.g. awards or other incentives; private sector sponsored partnerships with schools, universities, recruitment agencies, media and start-up incubators offering tech vocational guidance, mentoring, scholarships and venture capital for women entrepreneurs.</p> <p>Balanced composition of national and European bodies dealing with digital.</p> <p>Monitoring women's participation in the digital economy and society through the <a href="#">Women in digital scoreboard</a> as part of the Digital Economy and Society Index.</p>		According to the information provided in the Commission's reply, it can be concluded that the Commission is complying with the EP request (to implement the 2019 Declaration of Commitment on Women in Digital and to develop concrete actions to promote gender equality in the STEM sector, including the creation of the European Girls in ICT and STEM day).	

## 4.1.15.6.FEMM Resolution 6: EP resolution of 24 June 2021 on sexual and reproductive health and rights in the EU, in the frame of women's health

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Sexual and reproductive health and rights in the EU, in the frame of women's health	24/06/2021 <a href="#">T9-0314/2021</a> <a href="#">2020/2215(INI)</a> FEMM	<a href="#">SP(2021)557</a>	Final reply (SP) received 25 October 2021	Specific reply			
1)	11. Urges the Commission and the Member States to systematically collect robust equality data disaggregated by various grounds including gender, age, racial and ethnic origin and sexual orientation, cultural and socio-economic background, as well as statistics on all SRHR services, on an anonymous basis, so as to detect and address possible differences in outcomes in the provision of SRH care;	<p>The Commission systematically provides survey-based statistics disaggregated by sex and age on health status, health determinants, health care, and disabilities, causes of death, and health and safety at work.</p> <p>Socio-economic background data is collected based on a list of 38 common key social variables used in surveys conducted by Eurostat (EU-SILC, EU-LFS, HBS, AES, EHIS, HETUS and ICT HH). The implementing guidelines on the social variables reflect the various datasets under Regulation (EU) 2019/1700 establishing a common framework for European statistics related to persons and households<sup>18</sup>. In addition, Eurostat is coordinating the 'EU survey on gender-based violence against women and other forms of inter-personal violence' (EU-GBV survey), which is expected to produce new data on gender-based violence in 2023.</p> <p>No EU data collection considers ethnic or racial origin, or sexual orientation as variables. These topics are considered sensitive<sup>19</sup> and discussions on how this collection could be done are ongoing, particularly in the context of the</p>				<p>Ongoing</p> <p>(see '<a href="#">EU survey on gender-based violence against women and other forms of inter-personal violence' (EU-GBV survey)</a>, which is expected to produce new data on gender-based violence in 2023).</p> <p>It should be noted that in September 2021, the Commission organized a <a href="#">roundtable on equality data</a>. Following the roundtable, the <a href="#">guidance note on the</a></p>	

<sup>18</sup> [EUR-Lex - 32019R1700 - EN.](#)

		implementation of the EU Anti-racism Action Plan 2020-2025 <sup>20</sup> .		<a href="#">collection and use of equality data based on racial or ethnic origin</a> has been produced by the subgroup on equality data.	
2)	12. Urges the Commission to make full use of its competence in health policy, and to provide support to Member States in guaranteeing universal access to SRHR in the framework of the EU4Health Programme for the period 2021-2027; [...]	<p>According to Article 168, paragraph 7 of the Treaty on Functioning of the European Union (TFEU)<sup>21</sup>, the organisation and provision of health services and medical care is a national competence. Definition and provision of health services related to sexual and reproductive health and rights is therefore a competence of the Member States.</p> <p>As mentioned below, the Commission recognises that SRHR are at the core of gender equality. The European Pillar of Social Rights Action Plan<sup>22</sup> adopted in March 2021 reaffirms the shared commitment to improve access to healthcare. The Commission calls on the Member States' efforts to close country-specific gaps in access to healthcare and improve their health systems through the European Semester. The Member States can use funds, including the Recovery and Resilience Facility and cohesion funds, to modernise their health systems and improve access to healthcare through addressing specific problems, which vary significantly across and within countries.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Pillar of Social Rights Action Plan</a> ).

<sup>22</sup> [European Pillar of Social Rights Action Plan](#).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>15. Emphasises the importance of illness prevention through education; further stresses the importance of vaccinations in illness prevention where vaccinations exist; calls, therefore, on the Member States and on the Commission to extend the EU's purchase of vaccines to combat COVID-19 to the purchase of the human papillomavirus (HPV) vaccine, ensuring that every person in Europe can have access to this vaccine;</p>	<p>The Commission supports the Member States in maintaining or achieving high vaccination coverage rates for public health reasons. Concerning vaccination against human papillomaviruses (HPV) specifically, the Commission recognises that many cancers can be prevented and lives saved. In its "Europe's Beating Cancer Plan"<sup>23</sup>, it has therefore set the target of vaccinating at least 90% of the EU target population of girls and significantly increasing the vaccination of boys by 2030. The Commission will support Member States in reaching this target with dedicated funds under the EU4Health programme and other funding instruments. Whereas the Commission plays a supportive role for Member States in the area of vaccination, vaccination remains a national competence and responsibility. Vaccination against HPV is included in European Union/European Economic Area countries' routine vaccination programmes, and vaccines for such programmes are usually procured at national level. Whereas the Commission is aware of the risk of global shortages of HPV vaccines as well as of the risk of disruptions of routine vaccination programmes due to the COVID-19 pandemic, it is currently not planning any joint purchase of vaccines against HPV, which would require a wide call from interested Member States.</p>		<p>No specific further/specific actions proposed/promised to be taken by the Commission on this particular point (extend EU's purchase of vaccines to combat COVID-19 to the human papillomavirus (HPV) vaccine, as the Commission considers that it has been already working on action falling under the scope of the EP request (<a href="#">Europe's Beating Cancer Plan</a>, <a href="#">EU4Health programme</a>, <a href="#">HPV vaccination</a>, etc). Other than requested by the EP, the Commission is currently not planning any joint purchase of vaccines against HPV, which would require a wide call from interested Member States.</p> <p>As to the Commission's very general promise to support MS in reaching the vaccination targets for the human papillomavirus vaccine by 2030 (90% of EU target population of girls and significant increase in vaccination of boys) with dedicated funds under the EU4Health programme and other EU funds, it is unclear if and to what extent the Commission will live up to its promise.</p>	
	<p>16. Recalls that all medical interventions related to SRHR must be undertaken with prior, personal and fully informed consent; calls on the Member States to combat gynaecological and obstetrical violence by reinforcing procedures that guarantee respect for free and prior informed consent and protection from inhuman</p>	<p>The Commission acknowledges that SRHR are essential to advancing gender equality.</p> <p>However, legislative powers on sexual and reproductive health and rights, including abortion, lie with the Member States. The Union's competence is in general limited to</p>		<p>At Parliament's plenary session on 25 November 2021, Commissioner Helena Dalli reaffirmed the importance of an EU instrument, with binding obligations on the Member States, enforceable by the Commission. She informed Parliament that the Commission will table a directive on violence against women and domestic</p>	

<sup>23</sup> [EUR-Lex - 52021DC0044 - EN](#).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and degrading treatment in healthcare settings, including through the training of medical professionals; calls on the Commission to tackle this specific form of gender-based violence in its activities;	<p>encouraging cooperation between Member States and, if necessary, lending support to their action.</p> <p>Tackling all forms of gender-based violence is a key priority, thus the Commission will continue to raise awareness, increase knowledge and support interventions on specific forms of gender-based violence, such as gynaecological and obstetrical violence. Moreover, tackling violence against women and domestic violence is a key policy objective of the EU Gender Equality Strategy 2020-2025. In line with the Strategy, the Commission is taking a comprehensive set of actions to combat this kind of violence. In line with the Commission Work Programme 2021, the Commission intend to publish a legislative proposal on preventing and combatting gender-based violence against women and domestic violence in late 2021.</p>		violence in early 2022 (see <a href="#">public consultation</a> from 8 February till 10 May 2021).	
	20. [...] calls on the Commission to provide information on the contribution of EU programmes to advancing and supporting reproductive health;	<p>The EU4Health programme is the main financial instrument to support health policies and the fight against health inequalities in general. The annual work programme 2021<sup>24</sup> addresses several of the European Parliament's requests. Others will follow in future annual work programmes, according to the agreements with Member States. The annual work programme for 2021, adopted 18 June 2021, has approved two actions in the framework of cancer prevention:</p> <p>Grants to improve access to human papillomavirus vaccination, addressed to civil society organisations to complement the Member States' actions according to national and regional needs related to HPV vaccination policies and programmes (EUR 1.2 million);</p> <p>Direct grants to Member States' authorities to assist roll out of large scale human papillomavirus vaccination campaigns (EUR 3,8 million). This supports directly the implementation of</p>		No further / specific actions proposed/promised to be taken by the Commission on this particular point (provide information on contribution of EU programmes to advancing and supporting reproductive health) as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU4Health 2021 Work Programme</a> , etc).	

<sup>24</sup> [Annual work programme 2021.](#)

			with regard to ethnic minorities and racism, climate change and health, improving public information on the health effects of air pollution, integrative oncology and pharmaceutical strategy were the topics chosen.			
6)	42. Calls on the Commission to develop common EU standards in maternity, pregnancy and birth-related care, and to facilitate the sharing of best practices among experts in the field; calls on the Member States to encourage and ensure that healthcare providers have training in women’s human rights and the principles of free and informed consent and informed choice in maternity, pregnancy and birth-related care;		<p>The Commission takes a holistic approach to address non-communicable diseases and to support the Member States in reaching the internationally agreed targets such as the Sustainable Development Goals (SDGs). This comprehensive approach focuses on health promotion and disease prevention instead of having disease specific strategies. Through the Steering Group on Health Promotion, Disease Prevention and Management of Non-Communicable Diseases, the Member States work closely with each other to exchange relevant policies and best practices between each other.</p> <p>Within this approach, the Member States authorities, experts and stakeholders are welcome to submit their good practices to the Best Practice Portal<sup>26</sup> both under regular open calls as well as anytime of the year. The proposals can also be related to SRH.</p> <p>Each year the Steering Group defines priority areas for best practice selection and implementation. In 2021, this was prevention of non-communicable diseases including risk factors for which an open call for best practices was carried out in view of national and EU level implementation.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point (develop common EU standards in maternity, pregnancy and birth-related care and facilitate sharing of best practices in the field as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Best Practice Portal</a> ).	
7)	43. Recalls that the WHO European region has the lowest instance of breastfeeding in the world; highlights the need for greater awareness of and information on the benefits of breastfeeding; calls on the Member States and		No specific reply is provided to this particular point (on high-profile campaigns to stress the benefits of breastfeeding).		Not mentioned.	

<sup>26</sup> [Best Practice Portal](#).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the Commission to launch high-profile campaigns to stress the benefits of breastfeeding;				
8)	50. Calls on the Commission to address the impact of emergency circumstances such as COVID-19 on gender-specific healthcare considerations, such as access to SRHR in the EU in its health-related policy response; further calls on the Commission to recognise that SRHR are grounded in fundamental human rights and, as such, are a priority during the current health crisis and beyond, and to take all necessary measures, including by supporting actions by Member States and SRHR civil society organisations, to guarantee full access to SRHR services, keeping in mind resources such as the ESF+ and the Citizens, Equality, Rights and Values Programme;	The COVID-19 pandemic caused delays in access to healthcare for broad groups of the population, having a disproportionate impact on more vulnerable groups. The 2020 Country Specific Recommendations <sup>27</sup> addressed to all the Member States within the European Semester call for addressing the immediate and more longer-term structural challenges health systems face. To build more resilient health systems, which provide care according to the needs of the population, the Member States were encouraged to use the Recovery and Resilience Facility and cohesion funds to address their country-specific challenges. According to the commitment expressed in the European Pillar of Social Rights Action Plan, the Commission has also published a report <sup>28</sup> prepared with the Healthcare System Performance expert group, which encourages efforts to put in place better tools to measure gaps in access to healthcare, and ensure that they take into account the perspective of patients, especially vulnerable groups. The Commission will develop further measures to leverage policies addressing very specific accessibility challenges and to improve the resilience of health systems. The planned actions are outlined in the EU4Health 2021 work programme <sup>29</sup> .		While the Commission considers that it has been already working on action falling under the scope of the EP request to guarantee full access to SRHR services despite the COVID-19 pandemic ( <a href="#">2020 Country Specific Recommendations</a> , <a href="#">European Pillar of Social Rights Action Plan</a> , <a href="#">EU4Health 2021 work programme</a> , <a href="#">Citizens, Equality, Rights and Values Programme (CERV) programme</a> ), it announces its intention to develop further measures to leverage policies addressing very specific accessibility challenges and to improve the resilience of health systems, referring to the actions outlined in the EU4Health 2021 work programme.

<sup>29</sup> [C\(2021\) 4793 final](#).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Gender equality is a fundamental value of the EU, enshrined in the Treaty and sexual and reproductive health and rights are key in this respect. The Commission fully recognises every person’s fundamental right of access to healthcare as enshrined in the Charter of Fundamental Rights, while acknowledging that healthcare, including sexual and reproductive healthcare, is a Member State responsibility. The Commission closely monitors and analyses the gendered impact of the COVID-19 pandemic and recognises the impact of the health crisis on SRH. The Commission will continue to support regular exchanges of good practices between the Member States and stakeholders on gender equality and health, including on SRHR. In line with this, the Commission will organise a Mutual Learning Seminar on gender equality and gender mainstreaming in health policies taking place in the fourth quarter of 2021 under the Mutual Learning Programme in Gender Equality. Funding to civil society organisations promoting gender equality, combating gender-</p>		<p>The announced <a href="#">Mutual Learning Seminar on gender equality and gender mainstreaming in health policies</a> took place in November 2021.</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>based violence and promoting women’s rights, including SRHR in all the Member States, will be provided.</p> <p>In the past months, several beneficiaries of the Rights Equality and Citizenship programme<sup>30</sup> have contacted the Commission to seek solutions to their difficulties related to the COVID-19 crisis and solutions are found on a case-by-case basis. This case-by-case approach includes for instance, the replacement of initially planned activities that cannot take place due to the crisis by alternative solutions, the reallocation of funding in particular towards staff costs where needed and justified, the eligibility of costs that would normally not be considered eligible (cancellation costs of non-incurred events). A flexible approach has been put in place and will continue to be applied under the Citizen Equality Rights and Values (CERV) programme<sup>31</sup> as far as difficulties linked to the crisis remain.</p>		<p>As to the Commission’s very general promise to ‘continue to support regular exchanges of good practices between the Member States and stakeholders on gender equality and health, including on SRHR.’ and to ‘provide Funding to civil society organisations promoting gender equality, combating gender-based violence and promoting women’s rights, including SRHR in all the Member States’, it is difficult to assess if and whether the Commission will live up to this promise.</p>	
9)	<p>55. Calls on the Commissioner for Democracy and Demography to take an evidence- and human rights-based approach to tackling demographic challenges in the EU, ensuring that every EU resident, including those residing in more remote areas, such as the outermost regions, can fully realise their SRHR, and to take special note of and confront those who instrumentalise SRHR in order to undermine EU values and the principles of democracy;</p>		<p>The Commission is taking an evidence-based approach in tackling demographic challenges in the EU, in line with EU values including those of human rights and dignity (Article 2 TEU). In 2020, the Commission published a report on the impact of demographic change (<a href="#">COM(2020) 241 final</a>), which drew on hard evidence and comparable data provided by Eurostat in particular. The report kick-started this Commission's work in this area and helped to identify how the people, regions and communities most affected by demographic change can best be supported. Early in 2021, the Commission launched a wide public debate on the impacts of ageing of the EU population with the help of a green paper (<a href="#">COM(2021) 50 final</a>). The Commission is currently analysing the responses received to the public consultation. Ensuring a high level of human health</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point (ensure that every EU resident, including those residing in more remote areas, such as the outermost regions, can fully realise their SRHR) as according to the Commission, it has been already working on action falling under the scope of the EP request (Commission <a href="#">report on the impact of demographic change of 2020</a>, 2021 <a href="#">EC Green Paper on Ageing</a>, regular exchanges of good practices between MS and stakeholder on gender equality on health, including on SRHR).</p>	

<sup>30</sup> [Rights Equality and Citizenship Programme.](#)

			<p>protection is stipulated in the EU Charter of Fundamental Rights<sup>32</sup> (Article 35). Both the report and the green paper address, among others, the challenge of meeting a growing demand for adequate and sustainable health and long-term care services, in view of the EU's ageing population. The Commission recognises that sexual and reproductive health and rights are at the core of achieving/ guaranteeing gender equality. All Member States must respect fundamental rights, which bind them by virtue of their national constitutions and commitments under international law. In line with Article 168 TFEU and the fundamental right to gender equality, the Commission supports regular exchanges of good practices between Member States and stakeholders on gender equality and health, including on SRHR. The Commission equally provides full support to Member States' efforts in implementing the United Nations SDGs relevant to women's health, such as on universal access to sexual and reproductive care, family planning and education. Furthermore, entities are eligible for funding under the CERV programme and in particular under its strands 2 and 4 to promote gender equality, advance gender mainstreaming and combat gender based violence against women (see also paragraph 57). Also, combating inequality in the area of health is one of the Commission's objectives under the LGBTIQ Equality Strategy 2020-2025.</p>			
10)	56. Calls on the Commissioner for Health and Food Safety to facilitate and promote the protection of SRHR as a vital part of achieving the right to health, safety and gender equality; to monitor and promote the full implementation of SDG 3, including target 3.7,		<p>The Commission supported the G7 Health Ministers declaration adopted of 4 June 2021<sup>33</sup> where the text related to SRHR reads <i>"We affirm our commitment to sexual and reproductive health and rights of all persons and to promoting safe and respectful maternal health, new-born health and child</i></p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (support to par; 10 of <a href="#">G7 Health ministers declaration, support to HIV, Hepatitis and Sexually</a></p>	

<sup>32</sup> [EU Charter of Fundamental Rights.](#)

<sup>33</sup> [G7 Health ministers declaration, paragraph 10.](#)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>in the EU, using the UN global indicator framework; in partnership with the Member States, to collect systematic, comparable, disaggregated data and conduct studies to better measure gender inequalities in health and unmet needs in access to SRH services in the EU with an intersectional perspective; to promote health information and education, including on SRH; to support the upward convergence of healthcare standards and policies in order to reduce health inequalities within and between Member States and, in the light of the welcomed inclusion of SRH services in the EU4Health Programme, to support actions by the Member States and SRHR civil society organisations to achieve access to SRH services through the programme; stresses the need to boost investment in all services considerably, particularly in healthcare, in order to contribute towards the independence, equality and emancipation of women;</p>	<p><i>health – free from discrimination, coercion, exploitation and violence.”</i></p> <p>The Commission supports the World Health Organization (WHO) regional action plan for HIV, Hepatitis and Sexually Transmitted Infections and participated in the regional consultation for Developing Global Health Sector Strategies on HIV, Viral Hepatitis and Sexually Transmitted Infections, 2022–2030. The reinforcement of health competences for surveillance, preparedness and response to communicable diseases, included the ones mentioned above, is included in the European Health Union proposals. The EU financial instruments, especially the EU4Health Programme will support health systems reinforcement and prevention. The Commission follows and supports policies aiming to tackle discrimination, harmful stereotypes, and biases. The global effort to respond to COVID-19 has had an impact on the response to other diseases, as the scarce resources had to be used to treat COVID-19 patients and the implementation of other measures to fight the pandemic. The EU extraordinary funding intends to mitigate this situation, reinforcing health services, especially primary healthcare and prevention services.</p> <p>At global level, the Commission supports the work of the UN with a view to strengthening SRHR, for example through assisting in the coordination of Member States positions in the context of the 2021 Political Declaration on HIV and AIDS and ending inequalities and getting on track to end AIDS by 2030.</p>		<p>(WTO) , <a href="#">EU4Health Programme</a> , healthcare under European Semester).</p>

		<p>close look at how gender affects health and access to health services on mental health and SRHR. The index will provide recommendations on ways to prevent and overcome gender and health-related challenges during and after the pandemic. A new score for gender equality in the EU and all Member States will be provided. Each country can see if it has improved its ranking.</p>		<p>On 28 October 2021, <a href="#">the European Institute for Gender Equality (EIGE)</a> published the <a href="#">Gender Equality Index 2021: health</a>.</p>	
11)	<p>57. Calls on the Commissioner for Equality to facilitate and promote the protection of SRHR and to include them in the implementation of the EU Gender Equality Strategy and the EU LGBTIQ Equality Strategy; [...]</p>	<p>The Commission provides full support to the Member States' efforts in implementing the United Nations SDGs relevant to women's health, such as on universal access to sexual and reproductive care, family planning and education. In the fight against gender-based violence, EU accession to the Council of Europe Convention on preventing and combating violence against women and domestic violence remains a Commission priority. In addition, this year, the Commission will submit a legislative proposal to prevent and combat gender-based violence against women and domestic violence.</p>		<p>At Parliament's plenary session on 25 November 2021, Commissioner Helena Dalli reaffirmed the importance of an EU instrument, with binding obligations on the Member States, enforceable by the Commission. She informed Parliament that the Commission will table a directive on violence against women and domestic violence in early 2022 (see <a href="#">public consultation</a> from 8 February till 10 May 2021).</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>Promoting gender equality, advancing gender mainstreaming and combating gender based violence against women are among the specific objectives of the CERV programme. The programme’s funding will cover activities to support the implementation and development of the EU legal framework and the policy developments in the Member States, to measure the situation of gender equality and evaluate its progress. The programme will also fund activities to promote the dialogue and the exchange of good practices between stakeholders, to raise awareness and to provide training. Regular exchanges of good practices between the Member States and stakeholders on gender equality and health, including on SRHR, will continue to be supported. In particular, victims of gender based violence, such as sexual violence, need access to adequate specialised support services, including sexual and reproductive health services.</p>		<p>As to the Commission’s very general promise to continue to support regular exchanges of good practices between the Member States and stakeholders on gender equality and health, including on SRHR, it is difficult to assess if and to what extent the Commission will live up to this promise.</p>	
12)	<p>58. Calls on the Commissioner for International Partnerships to uphold the European Consensus on Development and the SDGs, in particular targets 3.7, 5.6 and 16, in order to ensure that SRHR remain a development priority in all EU external activities and relations; welcomes the commitment to promoting SRHR in the new Gender Action Plan III and calls on the Commissioner for International Partnerships to propose concrete measures to fulfil this objective; emphasises the need to prioritise the removal of all barriers to accessing SRHR services in its development policy;</p>		<p>The multi-annual new financing instrument for international partnerships, the Neighbourhood, Development and International Cooperation Instrument – Global Europe (NDICI – Global Europe)<sup>35</sup> includes a defined spending target of a minimum of 20% for investments in human development including support to SRHR and fighting gender based violence. The NDICI – Global Europe, echoes the GAP III targets regarding gender mainstreaming in projects and programs, stating that at least 85 % of new actions implemented under this regulation, should have gender equality as a principal or a significant objective, as defined by the gender equality policy marker of the OECD Development Assistance Committee, and at least 5% of these actions should have gender equality and women’s and girls’ rights and empowerment as a principal objective.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Global Europe: Neighbourhood, Development and International Cooperation Instrument NDICI, GAP III</a>).</p>	

<sup>35</sup> [Global Europe: Neighbourhood, Development and International Cooperation Instrument.](#)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	59. Calls on the Commissioner for Promoting our European Way of Life to ensure that the new Special Envoy for Freedom of Religion and Belief is dedicated to a human-rights based approach, thus respecting SRHR and dedicated to jointly working on guaranteeing the right to health for all, in the EU and globally, without any discrimination;	No specific reply is provided to this particular point. (on ensuring the new Special Envoy for Freedom of Religion and Belief is dedicated to a human-rights based approach).	Red	Not mentioned.	Grey
14)	60. Calls on the Commissioner for Crisis Management to include a gender equality perspective in the EU and Member States' humanitarian aid response, and a perspective on SRHR, as access to sexual and reproductive healthcare is a basic need for people in humanitarian settings;	The Commission recognises that natural hazards and human-made crises are not gender neutral: they have a different impact on women, girls, boys, and men of all ages. Aid that is not gender- and age-sensitive is less effective. Integrating gender and age enhances the quality of humanitarian programming, in line with the EU's humanitarian mandate and other international commitments. Therefore, to respond effectively to the different needs of various gender-related groups, EU humanitarian assistance must consider gender.	Green	No further specific actions proposed/promised to be taken by the Commission.	Blue
15)	62. Calls for full access to physical and psychological care by interculturally sensitive and trained personnel; urges all EU countries to ratify the Istanbul Convention; calls on the Commission to examine the synergies between internal and external EU programmes to ensure a coherent long-term approach to stopping FGM both within and outside the EU; [...]	No specific reply is provided to this particular point (on examination of the synergies between internal and external EU programmes to ensure a coherent long-term approach to stopping FGM both within and outside the EU).	Red	Not mentioned.	Grey

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	69. Calls on the EU and the Member States to secure adequate and well-targeted funding for SRHR in their development cooperation policy and in their external action instruments, such as the Neighbourhood, Development and International Cooperation Instrument; in this regard, asks the Commission, the European External Action Service and the Member States to consider SRHR as a priority in the EU programming process, including in joint programming;		In addition to direct country support through bilateral programmes on health and SRHR, gender equality and women's empowerment, the Commission contributions will include support to SRHR at global and regional level as well as in the Neighbourhood. Through a Call for Proposal directed to civil society organisations with an investment of EUR 30.5 million, the Commission is increasing the support to SRHR with focus on vulnerable adolescents in Africa.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was or will be carried out.	
17)	74. Calls on the Commission to strongly condemn the backsliding in women's rights and SRHR, and to use its full capability to strengthen its actions to counter it; calls on the Commission and the Member States to step up their political support for human rights defenders, healthcare providers working to advance SRHR, women's rights and SRHR civil society organisations which are key actors for gender-equal societies and crucial providers of SRH services and information, particularly those working in challenging contexts in Europe, and to continuously monitor and allocate sufficient financial support accordingly, through the ongoing programmes such as the Citizens, Equality, Rights and Values Programme;		The Commission recognises that strong women's rights are an asset and an achievement of which the whole of Europe should be proud. The Commission strongly condemns any backsliding on women's rights. The Commission will continue to fund civil society organisations working on gender equality, combatting gender-based violence, and promoting women's rights under the Citizens, Equality, Rights and Values Programme.		No further / specific actions proposed/promised to be taken by the Commission on this particular point.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
18)	<p>75. Calls on the Commission to implement gender budgeting throughout all the instruments of the multiannual financial framework 2021-2027, including the Citizens, Equality, Rights and Values, the ESF+ and the Neighbourhood, Development and International Cooperation Instrument;</p>	<p>The Commission will continue to track expenditure on gender equality of Official Development Assistance (ODA) funding as per the OECD Development Assistance Committee (DAC) gender marker guidelines. As pointed out in the Gender Action Plan III, the Commission aims to support for gender-responsive budgeting of partner countries via budget support operations or projects supporting public finance management (PFM) reforms that include a gender budgeting component.</p> <p>The Citizens, Equality, Rights and Values programme will pursue the European Union's funding activities to promote gender equality and advance gender mainstreaming. This is clearly defined in two strands /specific objectives of the new programme:</p> <p>The Equality, Rights and gender equality strand,</p> <ul style="list-style-type: none"> <li>- The Daphne strand which includes a specific indent on gender-based violence against women.</li> </ul> <p>The Citizens, Equality, Rights and Values programme includes a commitment to have sex-disaggregated data and mid-term and final evaluations that will analyse the impact of the programme on gender equality. In the inter-institutional agreement (IIA) of 16 December 2020, accompanying the 2021-2027 Multiannual Finance Framework (MFF), it has been agreed that the Commission will examine how to develop a methodology to measure the expenditure linked to achieving equality between women and men in the 2021-2027 MFF. The Commission will use this methodology as soon as it is available and will implement it as a pilot project for selected programmes in 2022. According to the IIA, Commission agreed to deploy the methodology for the whole EU budget.</p>		<p>While the Commission considers that it has already been working on this particular point (implement gender budgeting throughout all the EU financial instruments), it announces the development of a tracking methodology for all programmes under the MFF 2021-2027, including ODA, CERF etc.), to be used as a pilot project for selected programmes in 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The CERV programme will be part of this exercise as one of the pilots for developing the necessary methodology.</p> <p>Gender equality and non-discrimination, notably on the basis of sex, have been set as horizontal principles in the Common Provisions Regulation (CPR) and should be taken into account at all stages of the design, implementation, monitoring and evaluation of the programmes. To this mainstreaming obligation, the European Social Fund Plus (ESF+) introduces additional obligations notably to support specific targeted actions for equality between men and women and to break down all personal data by gender (men, women, 'non-binary' persons).</p> <p>Regarding EU external action, the first pillar of the Gender Action Plan III focus on making EU engagement on gender equality more effective as a cross-cutting priority in its policy and programming work. The Commission commits that at least 85% of all new external actions will have gender equality and women's and girl's empowerment as a significant or as a principal objective by 2025. A second target foresees that at least one action with gender equality as principal objective will be implemented over the period. Targets are aligned with the Regulation establishing the Neighbourhood, Development and International Cooperation Instrument (NDICI).</p> <p>Gender mainstreaming remains the primary means to achieve gender equality. Its purpose is to ensure that all policies and programmes maximise their benefits for all and contribute to stop the perpetuation of inequality. The Commission is committed to gender mainstreaming in all policies and actions as a responsibility for all.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	76. Calls on the Commission to take concrete steps in protecting SRHR, starting with the establishment of an EU Special Envoy on Sexual and Reproductive Health and Rights and the addition of a designated chapter on the 'State of play of SRHR' in the EU Annual Report on Human Rights and Democracy;	<p>The current EU Annual Report on Human Rights and Democracy<sup>36</sup> follows the structure of the EU Action Plan for Human Rights and Democracy. The 2020 Annual Report contains a chapter, which focuses on SRHR "Gender equality, sexual orientation and gender identity, eliminating sexual and gender-based violence and continued commitment to SRHR as per the new European Consensus on Development. This chapter contains all key actions and achievements relevant to SRHR. Given that the Annual Report covers all human rights and is very broad in scope, it would not be feasible to single out specific topics under gender equality into separate subchapters, but rather present them in groups according to the structure of the EU Action Plan.</p> <p>As to the proposal for establishment of an EU Special Envoy on Sexual and Reproductive Health and Rights: SRHR continues on being addressed in EU's internal and external policies, including the EU's multilateral and bilateral engagement, and as part of the political and programming work of EU delegations globally. Promoting and protecting SRHR is an important priority theme for the EU, as outlined in the EU Action Plan on Human Rights and Democracy 2020-2024<sup>37</sup> and the Gender Action Plan III 2021-2025. This is part of the mandate of the EUSR for Human Rights and the Advisor on Gender and Diversity.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point (establishment of EU Special Envoy on SRHR and addition of a designated chapter on the state of play of SRHR in the EU Annual Report on Human Rights and Democracy) as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Action Plan on Human Rights and Democracy 2020-2024</a> , <a href="#">EU Action Plan on Human Rights and Democracy 2020-2024</a> ). As to a special Envoy on SRHR, the Commission does not seem to see the need arguing that this is part of the mandate of the <a href="#">EUSR for Human Rights</a> and the <a href="#">Advisor on Gender and Diversity</a> .

4.1.15.7.FEMM Resolution 7: EP resolution of 15 December 2021 on equality between women and men in the European Union in 2018-2020

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Equality between women and men in the European Union in 2018-2020	15/12/2021 <a href="#">T9-0500/2021</a> <a href="#">2021/2020(INI)</a> FEMM	N.A. <sup>38</sup>			
1)	1. [...] calls on the Commission and the Member States to promote policies that aim to eliminate precarious work and involuntary part-time work in order to improve the situation for women in the labour market; [...]				
2)	5. [...] calls on the Commission and the Council to ensure that all budget appropriations under the 2021-2027 multiannual financial framework respect the principle of equality between men and women and promote gender mainstreaming and gender budgeting in all EU policies; [...]; calls on the Commission to propose proactive measures through the European Agricultural Fund for Rural Development to support women's employment in rural areas;				
3)	9. Urges the Commission and the Member States to better apply the principle of equal pay for equal work or work of equal value between men and women across the different economic sectors; calls, to this end, for the creation of gender-neutral job evaluation tools and classification criteria, in close cooperation				

<sup>38</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	with social partners and with respect for their autonomy and for collective agreements and national labour market traditions and models, which can contribute to a better valuation and thus fairer remuneration of work in female-dominated sectors;				
4)	21. [...] calls on the Commission to prioritise the prevention of trafficking for sexual exploitation, including through information, awareness-raising and education campaigns, by adopting measures and programmes to discourage and reduce demand, and by adopting dedicated legislation in future;				
5)	24. [...] calls on the Commission and the Member States to step up their political support for human rights defenders, healthcare providers working to advance SRHR and women's rights and SRHR civil society organisations, which are key actors for gender-equal societies and crucial providers of services and information regarding sexual health and the market of reproductive health;				
6)	25. [...] calls on the Commission to strongly condemn the backsliding over women's rights, SRHR and LGBTIQ+ people in some Member States and to use all the powers at its disposal to strengthen action to counter it, including strengthening support for women's rights defenders and women's rights organisations in the EU, as well as organisations working on SRHR and LGBTIQ+;				
7)	27. [...] calls on the Commission and the Member States to meet these objectives,				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>which are key to boosting gender equality and the equal earner-equal carer model;</p>				
8)	<p>30. Recalls the need to combat intersectional forms of discrimination, especially against marginalised groups, including women with disabilities, Black women, migrant, ethnic minority and Roma women, older women, single mothers, LGBTIQ+ people and homeless women; stresses the importance of addressing their needs and concerns in EU policies and initiatives; calls on the Commission to devise specific guidelines on the implementation of the intersectional framework and to present an EU action plan with specific measures to improve the socioeconomic situation of women who face intersectional forms of discrimination and combat the feminisation of poverty and precarious work;</p>				
9)	<p>32. Is deeply concerned that the European Green Deal and related environmental and climate initiatives do not include a gender perspective; urges the Commission to meet its obligation to incorporate gender mainstreaming into all EU policies, including EU environmental and climate policies; urges that these policies be informed by rigorous gender analyses to ensure that they address gender inequalities and other forms of social exclusion; calls on the Commission to design a roadmap to deliver on the commitments of the Gender Action Plan agreed at COP25 to the UN Framework Convention on Climate Change and to appoint a permanent EU gender and climate change focal point, with sufficient budgetary resources, to implement</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and monitor gender-responsible climate action in the EU and worldwide;				
10)	39. [...] calls on the Commission, therefore, to implement the Court of Auditors' recommendations to strengthen the institutional framework for supporting gender budgeting, to carry out gender analyses of the needs and impacts and update its better regulation guidelines, to systematically collect, analyse and report on existing sex-disaggregated data for EU funding programmes, to make use of gender-related objectives and indicators to monitor progress, to develop a system for tracking the funds allocated and used to support gender equality, and to report annually on the results achieved in terms of gender equality;				
11)	40. Welcomes the commitment to take gender equality into account under the Recovery and Resilience Facility, the largest part of the NextGenerationEU instrument; deeply regrets the fact, however, that it will be difficult to monitor the gender impact of these funds and follow up on the results given the lack of gender-specific indicators and objectives; calls on the Commission, therefore, to use gender-disaggregated data and indicators, notably in the recovery and resilience scoreboard, to assess the gender impact of the implemented measures and results during the evaluation of the Member States' national plans setting out their reforms and investment agendas, and to impose gender-balanced governance of the Recovery and Resilience Facility and European Semester;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	41. Regrets the weak link between the new EU Strategy for Gender Equality and the European Green Deal; calls on the Commission to strengthen the connection between climate change policies and gender equality in its upcoming proposals;				
13)	42. Calls on the Commission to mainstream gender equality into all policymaking and to carry out gender impact assessments when setting up any new policy to help ensure a more coherent and evidence-based EU policy response to gender equality challenges; calls on the Member States to undertake corresponding measures at national level;				

#### 4.1.16. FEMM/JURI

Between July 2019 and December 2021, the **Joint Committees - the Committee on Women’s right and Gender Equality (FEMM) and the Committee on Legal Affairs (JURI)** were responsible for one ‘ordinary’ own-initiative report (INI) and no legislative own-initiative report (INL) leading to the adoption of a one Parliament’s resolution (‘FEMM/JURI resolution’). The table below provides a summary of the analysis based on the data contained in the resolution and the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one reply, within the 3-month period, in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions.

### Analysis of the Commission actions

No analysis possible, due to the lack of a written Commission reply.

## 4.1.16.1.FEMM/JURI Resolution 1: EP resolution of 6 October 2021 on the impact of intimate partner violence and custody rights on women and children

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>The impact of intimate partner violence and custody rights on women and children</b></p>	<p>6/10/2021  <a href="#">T9-0406/2021</a>  <a href="#">2019/2166(INI)</a>  <b>FEMM JURI</b></p>	<p>On 23 November 2021, the Parliament received "<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – October II 2021 part-session " informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Helena Dalli.</p> <p>The <a href="#">plenary debate</a> took place on 4 October 2021.</p>			
1)	<p>2. Recalls that the UN Special Rapporteur on violence against women has noted that the COVID-19 crisis has illustrated the lack of proper implementation of international conventions to protect and prevent gender-based violence; [...]; calls on the Commission to promote those practices;</p> <p>[...] calls on the Commission to develop a European Union protocol on violence against women in times of crisis and emergency to prevent violence against women and to support victims during emergencies such as the COVID-19 pandemic, to establish a safe and flexible emergency warning system and to consider protection services for victims, such as helplines, safe accommodation and health services, to be 'essential services' in the Member States; [...]</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	5. [...] calls on the Commission to continue developing a comprehensive framework of policies, programmes and other initiatives to tackle violence against women and domestic violence, and to allocate sufficient and appropriate resources to actions related to the implementation of the Istanbul Convention through its funding programmes safeguarded in the provisions of the 2021-2027 multiannual financial framework and through the Daphne strand; [...]				
3)	6. Calls on the Commission and on the Council to add gender-based violence to the list of areas of crime in Article 83(1) TFEU, taking into account the particular need to combat this crime on a common basis; calls on the Commission to use this as a legal basis to propose binding measures and a holistic EU framework directive to prevent and combat all forms of gender-based violence, including the impact of intimate partner violence on women and children, that contains uniform standards and a due diligence obligation to collect data, to prevent and investigate violence, to protect victims and witnesses, and to prosecute and punish perpetrators; [...]				
4)	7. Calls on the Member States and the Commission to adopt specific measures to eradicate cyber violence, including online harassment, cyberbullying and misogynistic hate speech, which disproportionately affects children and especially girls, and to specifically address the increase in these forms of gender-based violence during the COVID-19 pandemic; calls on the				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Commission to put forward relevant regulations and any other possible actions to eradicate hate speech and online harassment;				
5)	8. Deplores the underfunding by the Commission and the Member States of the fight against domestic violence given the scale of the phenomenon; [...]; calls on the Commission and the Member States to increase the funds dedicated to the fight against domestic violence; is concerned about the fragmentation of funding, short-term funding and administrative burden, which can reduce the access of associations to funding and therefore have an impact on the quality of support for victims of domestic violence and their children; calls on the Commission and the Member States to favour stable and long-term financing;				
6)	12. [...] calls on the Commission and the Member States to examine the possibility of dedicating EU funds to this issue, in particular funds dedicated to regional development;				
7)	13. Welcomes the EU Strategy on victims' rights (2020-2025), which addresses the specific needs of victims of gender-based violence, in particular the specific approach to psychological violence against women and the impact on their mental health on the long run; calls on the Commission, in its evaluation of the Victims' Rights Directive, to address the current gaps in the EU legislation, to examine whether the gender aspect of victimisation is properly and effectively taken into account, particularly with regard to international				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	standards on violence against women such as those set in the Istanbul Convention, and to adequately enhance the legislation on victims' rights and the protection and compensation of victims; calls for the continued promotion of victims' rights, including through existing instruments such as the European protection order; urges the Commission to ensure that all Member States translate the Victims' Rights Directive into national legislation and calls for its full and accurate implementation, so that victims of intimate partner violence get full access to a range of support services, including through specialist and generic services such as the 116 006 helpline for victims of crime;				
8)	15. [...] calls on the Commission and the Member States to promote and support such independence; [...]				
9)	16. [...] calls on the Commission to assess the establishment of minimum standards for protection orders across the EU; [...]				
10)	17. [...] calls on the Commission and the Member States to allocate adequate funds to relevant authorities, including through projects, and calls for funding for the establishment and expansion of shelters, as well as other appropriate measures enabling women who are victims of violence to benefit, with confidentiality, from a safe and local environment;				
11)	26. [...] urges the Commission and the Member States to take concrete measures to combat child sexual abuse and child sexual exploitation by				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	investing in preventive measures and treatment programmes aimed at preventing perpetrators from reoffending, with more effective support for victims, and by enhancing cooperation between law enforcement authorities and civil society organisations; [...]				
12)	27. Urges the Commission and the Member States to take concrete measures to end child sexual abuse by investing in preventive measures and identifying specific programmes for potential offenders and more effective support for victims;				
13)	29. [...] calls on the Commission to facilitate and coordinate this type of training, focusing especially on cross-border cases;				
14)	30. [...] calls on the Commission and the Member States to enhance their cooperation in order to take measures to improve the identification of victims of domestic and intimate partner violence, as well as to empower the victims and the witnesses to come forward and report the crime, as in many cases the intimate partner violence remains unreported;				
15)	31. Calls on the Commission and the European Judicial Training Network to set up an EU platform for mutual learning and the sharing of best practices between legal practitioners and policymakers from different Member States working in all relevant fields;				
16)	35. Calls on the Commission and the Member States to involve relevant civil society organisations, in particular those working with				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and for children as well as victims of domestic and gender-based violence, in the development, implementation and evaluation of policies and legislation; [...]				
17)	40. [...] calls on the Commission and the Member States to tackle the issue of anonymous complaints and retracted complaints by guaranteeing effective and rapid procedures to protect victims as well as by ensuring the accountability of violent partners; encourages the creation of law enforcement databases that keep record of all details pertaining to intimate partner violence statements made by the victim or a third party in order to monitor and prevent further episodes of violence; calls for more community education and awareness raising as well as training and education on intimate partner violence for police and social services in rural and remote areas stressing the importance of education in informing and supporting children as well as programmes for conflict resolution, positive role models and cooperative play;				
18)	42. Highlights the importance of awareness-raising campaigns that enable witnesses (particularly neighbours and co-workers) in spotting the signs of intimate partner violence (in particular non-physical violence), and providing guidance on how to support and assist victims; calls on the Commission and the Member States to promote awareness raising, information and advocacy campaigns tackling gender bias and stereotypes as well as domestic and gender-based violence in all its forms, such as physical				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	violence, sexual harassment, cyber-violence, psychological violence and sexual exploitation, particularly in relation to newly created prevention measures and flexible emergency warning systems, and to encourage reporting on coordination and cooperation with recognised and specialised women's organisations;				
19)	43. [...] calls on the Commission to support programmes that aim to prevent gender-based violence, including through the Daphne strand of the Citizens, Equality, Rights and Values Programme in order to ensure effective prevention measures;				
20)	46. Calls on the Commission to promote EU-wide public awareness and educational campaigns and the exchange of best practices as a necessary measure for the prevention of domestic violence and gender-based violence and for the creation of a climate of zero tolerance towards violence and a safer environment for victims; highlights the strategic role of the media in this regard; stresses, however, that in some Member States, femicide and cases of gender-based violence are still presented in terms which absolve the violent partner of their responsibility; highlights that the media and advertising must not spread misogynist and sexist messages, including by trying to excuse, legitimise or minimise violence and the responsibilities of violent partners; considers that domestic violence also originates from a gender-stereotyped approach to parenthood; calls on the Commission and the Member States, therefore, to fight gender				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>stereotypes and to promote gender equality in parental responsibilities, where parental burden is fairly distributed, ensuring women are not assigned a subordinate status; calls on the Commission to facilitate the exchange of best practices at EU level on prevention, protection and prosecution measures and measures to combat violence, as well as on their practical implementation; calls on the Member States to complement this EU campaign by disseminating information about where victims and witnesses can report this kind of violence, including after the end of the campaign, taking into account the specificity of the COVID-19 crisis to also focus on the impact on children; calls on the Commission to support activities in schools and other settings which raise the awareness of crime and trauma issues, where to find help, how to report issues, and how to build resilience among children and those working with children;</p>				
21)	<p>47. [...] ; calls on the Commission and the Member States to ensure enforcement and the effective implementation of the Brussels IIa Regulation; regrets in this regard that its latest revision failed to extend the scope to registered partnerships and unmarried couples; is of the opinion that this leads to discrimination and potentially dangerous situations for victims and children of registered partnerships and unmarried couples; recalls that the scope and objectives of the Brussels IIa Regulation are based on 'the principle of non-discrimination on the grounds of nationality between citizens of the Union' and on the principle of mutual trust between the Member</p>

	the Single Market Programme for 2021-2027; calls on the Commission and the Member States to ensure that data are disaggregated by age, sexual orientation, gender identity, sex characteristics, race and ethnicity and disability status, among others, to ensure that the experiences of women in all their diversity are captured;				
24)	51. Calls on the Commission to promote EU-wide public awareness campaigns as a necessary measure in the prevention of domestic violence and the creation of a climate of zero tolerance towards violence;				

#### 4.1.17. FEMM/LIBE

Between July 2019 and December 2021, **the Joint Committees - Committee on Women’s right and Gender Equality (FEMM) and Committee on Civil Liberties, Justice and Home Affairs (LIBE)** were responsible for one ‘ordinary’ own-initiative report (INI) and two legislative own-initiative reports (INL) leading to the adoption of three Parliament's resolutions ('FEMM/LIBE resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent one written replies to the Parliament's FEMM/LIBE resolution. In one cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). In total, the Commission submitted one specific reply.

### Analysis of the Commission actions

The Commission proposed/promised six genuine actions. In 18 cases, no further specific actions were proposed/promised to be taken by the Commission and in 11 cases it remained unclear if an action was carried out. In two cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the six actions proposed/promised by the Commission, the Commission already carried out the action in two cases. In the four remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.17.1. FEMM/LIBE Resolution 1: EP resolution of 10 February 2021 on implementation of the Anti-Trafficking Directive

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C	
<b>Implementation of the Anti-Trafficking Directive</b>		<b>10/02/2021</b> <a href="#">T9-0041/2021</a> <a href="#">2020/2029(INI)</a> <b>FEMM LIBE</b>	<a href="#">SP(2021)247</a>	Final reply (SP) received 16 July 2021		Specific reply		
1)	2. [...] calls on the Commission to ensure the continuity of the work being done by appointing a full-time EU Anti-Trafficking Coordinator with the relevant expertise and a clear mandate, working with a network of national representatives from the Member States and civil society to ensure consistent cooperation;		Commissioner for Home Affairs, Ylva Johansson, confirmed the appointment of a new EU Anti-trafficking Coordinator at the European Parliament plenary debate on the Implementation of the Anti-Trafficking Directive on 8 February 2021.			No further specific actions proposed/promised to be taken by the Commission. The new <a href="#">EU anti-trafficking coordinator</a> took up its position on 1 July 2021.		
2)	4. Highlights that the lack of consistent, comparable and detailed data continues to hamper the adequate and evidence-based assessment of the scale of and trends in THB; calls on the Member States to increase their efforts in and funding for research, analysis and collection of data on all forms of THB, and to improve coordination among data sources at national and EU level, as well as the collection of more up-to-date, centralised and comprehensive data disaggregated by type of trafficking, age and gender, racial and ethnic origin, and including internally trafficked people, by compiling statistical information with due respect for the rights to privacy and personal data protection, in cooperation with the institutional actors involved, civil society, the EIGE and all relevant international organisations; calls on the Commission to		Since 2010, the Commission carries out with the support of Eurostat regular and extensive EU-wide data collection on trafficking in human beings disaggregated by forms of trafficking, age, sex and citizenship, forms of exploitation and publishes regularly reports with analysis and findings on such data. As a result, EU level data is available for every year since 2008.  The most recent <a href="#">2020 Data collection report</a> shows that data availability has significantly improved over the years. The new EU Strategy on Combatting Trafficking in Human Beings 2021-2025 provides for further improving data recording and data reporting across the EU Member States on trafficking in human beings, including through cooperation between national data institutes. It calls on the Member States to improve national data recording and data collection.			No further specific actions proposed/promised to be taken by the Commission.		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	regularly compile and publish such data for the EU;				
3)	5. Urges the Commission and the Member States to ensure differentiation between trafficking and smuggling, which require deeper analysis and different responses in law and policy; highlights that the confusion between them often leads to failings in correctly identifying victims and in ensuring that they can access protection measures and avoid secondary victimisation;	The Commission continuously stresses the difference between the two phenomena, including in publications and reports on progress made in the fights against trafficking in human beings ("Working together to address trafficking in human beings: Key concepts in a nutshell", European Commission 2018). Victims are also trafficked in mixed migration flows to the EU. The EU Security Union Strategy highlights that trafficking in human beings and smuggling of migrants are often intertwined and announces that the Commission will present a new EU Action Plan against migrant smuggling for the period 2021-2025.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.  On 29 September 2021 the Commission presented its <a href="#">renewed EU action plan against migrant smuggling 2021-2025</a> where both phenomena are mentioned correlatively.	
4)	6. Calls on the Commission and the Member States to assess and evaluate the use of digital technologies, social media and internet services as the predominant tools used to recruit trafficking victims, and that they empower law enforcement authorities and civil society organisations in the fight against THB by providing them with the necessary technical knowledge and dedicated resources to respond to the challenges posed by the new technologies; further calls on them to adopt third-party liability rules for technology companies hosting exploitative material, to improve the legislative tools used in judicial proceedings and in the prosecution of traffickers, to promote the exchange of information and cooperation between the relevant authorities, internet service providers and social media companies, to promote public information campaigns across the EU on THB while respecting the victims' right to privacy and safety, as well as ensuring their	The new EU Strategy to tackle Organised Crime and the EU Strategy on Combatting Trafficking in Human Beings address the challenges posed by the rapidly increasing use of internet and digital technologies by criminals and underline the need to tackle the digital business model of traffickers as well as for a modern law enforcement response to technological developments. They include actions that will improve the digital capabilities of law enforcement and increase relevant expertise to keep up with technological developments and that will foster national and EU-level multi-stakeholder dialogue with relevant internet companies, competent authorities and civil society.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	fundamental rights and data protection, and to increase support for building transnational expertise and technology-based solutions, for example to block the recruitment of victims;				
5)	7. Urges the Commission and the Member States to make cyber-awareness a priority in campaigns aimed at schools, universities, companies and research bodies, and to build on existing expertise such as the Better Internet for Kids portal; underlines that awareness-raising in relation to online human trafficking on social media is essential to prevent new victims from entering into the trafficking networks; calls on the Commission to actively engage with platforms in developing common guidelines and action plans that prevent and combat online trafficking;	The new EU Strategy to tackle Organised Crime and the EU Strategy on Combatting Trafficking in Human Beings address the challenges posed by the rapidly increasing use of internet and digital technologies by criminals and underline the need to tackle the digital business model of traffickers as well as for a modern law enforcement response to technological developments. They include actions that will improve the digital capabilities of law enforcement and increase relevant expertise to keep up with technological developments and that will foster national and EU-level multi-stakeholder dialogue with relevant internet companies, competent authorities and civil society.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
6)	13. Points out the high vulnerability of Roma communities to all forms of trafficking and exploitation, especially of women and children, according to the Commission's three progress reports; calls on the Commission and the Member States to design specific measures to combat trafficking through the national Roma integration strategies for 2020-2030; calls on the Commission and the Member States to collect statistical data on the victims of trafficking based on their ethnic background;	The Commission adopted on 7 October 2020 the EU Roma strategic framework for equality, inclusion and participation to ensure effective equality, socioeconomic inclusion and promote participation of Europe's largest ethnic minority (COM(2020) 620 final). It aims to combat poverty, antigypsyism and discrimination. The new Strategy on Combatting Trafficking in Human Beings will address the situation of vulnerable groups, including from ethnic minority backgrounds, such as marginalised Roma.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Roma strategic framework for equality, inclusion and participation to ensure effective equality, socioeconomic inclusion and promote participation of Europe's largest ethnic minority</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	<p>15. Highlights that while the full impact of the COVID-19 pandemic is not yet measurable, it is nevertheless clear that the crisis disproportionately affects the most vulnerable victims of THB, especially women, children and those in precarious situations, and that it has forced many shelters to close or suspend their services as a result of reported infections, leaving victims of trafficking without housing, healthcare, and legal assistance; in this context, stresses that access to care and social services should be guaranteed without discrimination; recalls that the root causes driving THB have been exacerbated by the pandemic, exposing vulnerable populations to higher risks of trafficking, increasing the number of online advertisements featuring victims of THB, of sexual predators targeting children, of cases of sexual exploitation online, and the demand for child pornography; calls on the Member States to take effective action with the support of civil society organisations and EU agencies such as Europol, which released a report entitled 'Pandemic profiteering: how criminals exploit the COVID-19 crisis' in March 2020; calls on the Commission to carry out a deeper analysis of the effects of the COVID-19 pandemic on potential victims of THB, and on the structure and functioning of THB in general, in order to create specific measures to eliminate THB;</p>	<p>The impact of the pandemic is not yet measurable. International organisations and civil society organisations have been monitoring and flagged outstanding concerns, which the Commission has and will continue to take into account.</p>		<p>Because of a general character of the promise, it is unclear the Commission kept its promise to continue taking into account identified concerns.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	17. Calls on the Commission to monitor and assess the situation of compensation to victims in the Member States and across borders in terms of access, enforcement and actual payments, and to come forward with specific measures to ensure better, faster and free legal aid and access to compensation in all Member States without prejudice to other forms of reparation;	The European Commission have been monitoring this issue in its progress reports (COM(2018) 777 final, COM(2020) 661 final) and in a dedicated report "Strengthening victims' rights: from compensation to reparation" by Joëlle Milquet, Special Adviser to the President of the European Commission (2019). Moreover, the EU Victims' Rights Strategy 2020-2025 prioritise victims' access to compensation.		No further specific actions proposed/promised to be taken by the Commission.	
9)	18. Welcomes the adoption of the establishment of the Mechanism for the Review of the Implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto in 2018 and the launch of its review process in 2020; calls on the Commission to position itself as a role model in this review process; underlines the importance of increasing the understanding of THB as a complex and evolving crime; calls on the Member States and the EU institutions to ensure that a human rights-based response remains at the core of the analysis of and the responses to THB, and recalls the need to engage with citizens and civil society organisations; stresses the important role played by the European Parliament and national parliaments; invites the Commission and the Member States to join the UN's international campaign against trafficking in persons;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	<p>20. Urges, therefore, the Member States to adopt specific measures to address gender-based violence, violence against women and minors, the social acceptance of violence and the culture of impunity, and structural gender inequalities and stereotypes as root causes of trafficking, especially through education, information and awareness-raising campaigns complemented with an exchange of best practices, including programmes and training courses to engage with men and boys; recommends that the Commission strengthen and develop the gender dimension in the monitoring of the implementation of EU anti-trafficking legislation and urges the Commission to continue to monitor this in its assessment of Member States' compliance with and implementation of the Anti-Trafficking Directive;</p>	<p>(consolidated reply para. 20-23, 58 and 62 )</p> <p>The EU Strategy on Combatting Trafficking in Human Beings will propose concrete actions in this regard, notably an assessment on the possibility of having minimum EU rules that criminalise the use of services exacted from victims of trafficking; an EU-wide awareness raising campaign in high-risk environments; taking into account gender in capacity building of professionals; reducing demand that fosters trafficking; and breaking the criminal model to traffic victims for exploitation purposes.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p>	
11)	<p>21. Calls on the Commission, in cooperation with the Member States, to examine how the demand for sexual services drives trafficking, as Europol has reported that 'there are Member States where prostitution is legal, making it much easier for traffickers to use a legal environment in order to exploit their victims'<sup>7</sup>;</p>	<p>The EU Strategy on Combatting Trafficking in Human Beings will propose concrete actions in this regard, notably an assessment on the possibility of having minimum EU rules that criminalise the use of services exacted from victims of trafficking; an EU-wide awareness raising campaign in high-risk environments; taking into account gender in capacity building of professionals; reducing demand that fosters trafficking; and breaking the criminal model to traffic victims for exploitation purposes.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p>	

<sup>7</sup> Europol, Situation Report 'Trafficking in Human Beings in the EU', 18 February 2016.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	22. Calls on the Commission to prioritise the prevention of the crime of trafficking for sexual exploitation, including through information, awareness-raising and education campaigns, adopting measures and programmes to discourage and reduce demand, and to possibly adopt future dedicated legislation, and calls on the Member States to include the knowing use of the services of victims of trafficking as a criminal offence in their national statutes, as recommended by Article 18 of the Anti-Trafficking Directive and reiterated by the Commission in 2018 <sup>8</sup> , and to provide for effective, proportionate and dissuasive penalties; urges the Member States to work closely with civil society organisations working with trafficked persons;	The EU Strategy on Combatting Trafficking in Human Beings will propose concrete actions in this regard, notably an assessment on the possibility of having minimum EU rules that criminalise the use of services exacted from victims of trafficking; an EU-wide awareness raising campaign in high-risk environments; taking into account gender in capacity building of professionals; reducing demand that fosters trafficking; and breaking the criminal model to traffic victims for exploitation purposes.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
13)	23. Urges the Member States and the Commission to focus on the recurring and emerging patterns of THB for sexual exploitation, such as the increasing exploitation of children and women, including through grooming and sextortion, and the use, among other things, of the 'lover boy' method as the most frequent means of recruiting victims and making them compliant by using online technologies, through developing digital skills, including online safety, in cooperation with all relevant actors; notes that the increased use of technology by criminal networks engaged in THB has significantly transformed their	The EU Strategy on Combatting Trafficking in Human Beings will propose concrete actions in this regard, notably an assessment on the possibility of having minimum EU rules that criminalise the use of services exacted from victims of trafficking; an EU-wide awareness raising campaign in high-risk environments; taking into account gender in capacity building of professionals; reducing demand that fosters trafficking; and breaking the criminal model to traffic victims for exploitation purposes. 	traditional modus operandi, especially during some stages of the trafficking process;				
14)	26. [...] calls on the Commission, in cooperation with the Member States, to examine how the demand for cheap labour services drives trafficking for labour exploitation; [...]	The EU Strategy on Combatting Trafficking in Human Beings addresses trafficking for labour exploitation with targeted actions for the identification of victims of this form of trafficking, improving capacity of relevant actors and cooperation with a multi-stakeholder approach, including EU agencies such as Europol and the European Labour Authority.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Strategy on Combatting Trafficking in Human Beings</a> ).	
15)	27. Urges the Member States and the Commission to focus on the recurring and emerging patterns of all forms of THB, including for labour exploitation, forced begging, forced and sham marriage, and forced criminality, among other purposes;	The Commission will take into account recurring and emerging patterns of the crime and encourages Member States to continue focusing on all forms of exploitation in their criminal justice responses and prevention initiatives. The EU Strategy on Combatting Trafficking in Human Beings addresses trafficking for labour exploitation with targeted actions for the identification of victims of this form of trafficking, improving capacity of relevant actors and cooperation with a multi-stakeholder approach, including EU agencies such as Europol and the European Labour Authority.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Strategy on Combatting Trafficking in Human Beings</a> ).	
16)	29. [...]; calls on the Commission and the Member States to enhance cooperation with third countries in order to combat all forms of THB and to strengthen opportunities for joint investigations and specialised prosecutions;	The EU Strategy on Combatting Trafficking in Human Beings addresses this crime as a global problem with an impact on the EU's internal security. It will provide for advancing international cooperation and partnerships by making best use of external policy instruments and cooperation tools and funding, including closer cooperation between EU Member States and countries of origin and transit of victims and with relevant international organisations.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Strategy on Combatting Trafficking in Human Beings</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	39. Is concerned that the recovery and reflection period is linked to cooperation by the victim during the investigation and is granted by law enforcement agencies; deplores the fact that in some Member States <sup>9</sup> the period is provided neither to victims of trafficking who are EU and/or EEA nationals nor to asylum seekers; calls on the Commission to monitor the implementation of available legal solutions at Member State level, in particular the granting of a recovery and reflection period;	The EU Anti-trafficking Directive sets minimum requirements, including on the support and protection of victims. The Commission will assess how identified concerns related to the Anti-trafficking Directive can be better addressed, including through a strong gender dimension in supporting and protecting victims, the non-punishment of victims for crimes they were compelled to commit, and in relation to the 2004 Council Directive on residence permit for victims of trafficking (2004/81/EC).		No further/specific actions proposed/promised to be taken by the Commission.	
18)	46. Calls on Member States to ensure that consular staff pay particular attention to the correct verification of the identity of minors and the link with the person or persons exercising parental authority or legal guardianship when taking the minor's biometric data in the visa application procedure; calls on the Commission, in close cooperation with Europol and civil society organisations, and on the Member States to provide targeted and effective education and training, as well as information on the methods used by the traffickers, to national, local and regional authorities in order to prevent child trafficking;	A wide range of training activities in relation to trafficking in human beings have taken place in the Member States, including on specific aspects of the crime and forms of trafficking and with a focus on child victims. Training activities have been organised across the EU for police officers, investigators, prosecutors and judges, but also labour inspectors, border guards, frontline practitioners dealing with asylum, refugees, youth welfare and child protection services, diplomatic and consular personnel, psychologist or medical personnel (For more details: COM(2020) 661 final and SWD(2020) 226 final). The Commission sets out specific actions in the EU Strategy on Combatting Trafficking in Human Beings to enhance capacity building and sharing of best practices for the identification of victims of trafficking, in particular among vulnerable groups, through training police, social workers, inspector services, and border guards.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Strategy on Combatting Trafficking in Human Beings</a> ).	
19)	49. Notes the use of means such as the internet and social media to recruit and attract potential victims; calls for special attention by the internet platforms to develop adequate tools;			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

<sup>9</sup> 9th General Report on GRETA's activities, p. 57.

		account the available resources under the current MFF (2021-2027).			
21)	58. Notes that women are disproportionately criminalised owing to their socio-economic situation or migration status and are prevented from enjoying equal access to justice as a result of gender stereotyping, discriminatory laws, intersecting or compounded discrimination, and procedural and evidentiary requirements and practices; calls on the Commission and the Member States to ensure that access to justice is physically, economically, socially and culturally available to all women; calls on the Commission and the Member States to address the obstacles to access to justice by women;	The EU Strategy on Combatting Trafficking in Human Beings will propose concrete actions in this regard, notably an assessment on the possibility of having minimum EU rules that criminalise the use of services exacted from victims of trafficking; an EU-wide awareness raising campaign in high-risk environments; taking into account gender in capacity building of professionals; reducing demand that fosters trafficking; and breaking the criminal model to traffic victims for exploitation purposes.		The general nature of the commitment's wording makes it unclear to what extent the action(s) will be carried out especially in relation to access to justice.	
22)	61. Stresses the importance of financial investigation and 'following the money' as a key strategy for investigating and prosecuting the organised crime networks that profit from THB; calls on the Member States to launch financial investigations and work with money laundering specialists when starting a new trafficking investigation; calls on Member States to strengthen cooperation in freezing and confiscating the assets of individuals involved in trafficking and in providing compensation to victims, including by using confiscated proceeds to support victims' assistance and protection, as encouraged by Recital 13 of the Anti-Trafficking Directive; calls on the Commission to assess and promote the use of existing judicial and police cooperation, and the available tools, such as mutual recognition of court judgments, joint investigation teams and the European investigation order; in this regard,	The European Commission have been promoting such tools, for example in its 2020 Progress report (COM(2020) 661 final and SWD(2020) 226 final). The Commission addresses trafficking comprehensively as a security matter, with links to policies on migration, employment, justice, gender, health, etc. The EU Strategy to tackle Organised Crime proposes actions to boost law enforcement and judicial cooperation.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">2020 Progress report</a> , <a href="#">EU Strategy to tackle Organised Crime</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	calls for an enhanced holistic approach which seeks to increase joined-up thinking across all sectors, such as migration, employment, workplace health and safety, and many other sectors;				
23)	62. Recalls the role of EU agencies in the early identification of victims and the fight against THB; calls for more resources for the Justice and Home Affairs (JHA) Agencies to enable their staff to be trained and capacity-building instruments to be developed in the area of detecting victims, including the appointment of adequately trained staff in gender- and child-sensitive approaches, especially in Member States faced with increased mixed migration flows; calls on the Commission to develop guidelines to mainstream gender and human rights expertise in the activities of law enforcement authorities across the EU, including by developing sustained programmes of improving gender balance in decision-making processes and in the staffing of the JHA agencies, particularly those relevant to THB;	The EU Strategy on Combatting Trafficking in Human Beings will propose concrete actions in this regard, notably an assessment on the possibility of having minimum EU rules that criminalise the use of services exacted from victims of trafficking; an EU-wide awareness raising campaign in high-risk environments; taking into account gender in capacity building of professionals; reducing demand that fosters trafficking; and breaking the criminal model to traffic victims for exploitation purposes.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
24)	67. Calls on the Commission to revise the Anti-Trafficking Directive after a thorough impact assessment in order to improve the measures for the prevention, tackling and prosecution of all forms of trafficking, especially for sexual exploitation as the largest area of THB; to address the use of online technologies in both the proliferation and the prevention of THB; to improve measures for prevention and the early identification of victims and easy and unconditional access to assistance and	(consolidated reply para. 67 and 71)  The EU Anti-trafficking Directive is the backbone of the EU's efforts in combatting human trafficking. (.../...). The monitoring of the implementation of the Directive in the Member States, conducted by the Commission in inter alia biennial progress reports (COM(2016) 267 final, COM(2018) 777 final, COM(2020) 661 final) as well as various stakeholders' reports indicate that the decade old instrument may not be fit for purpose any longer. Despite prevention initiatives undertaken, the demand for using exploited victims' services has not been reduced.		There are <a href="#">ongoing consultations</a> in view of the revision of the Directive; this review of the Anti-Trafficking Directive – which will be based on the findings of an evaluation – will aim to modernise EU anti-trafficking rules.  It will specifically explore the possibility of making the use of the services of exploited victims of trafficking a mandatory criminal offence.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	protection, while strengthening a horizontal gender- and child-sensitive perspective across all forms of trafficking;	The Commission will continue to support the Member States in the implementation of the Directive and will use its powers conferred by the Treaties, including infringements, as appropriate. The Commission will evaluate the implementation of the EU Anti-trafficking Directive and, based on the outcome and if necessary, propose revising it to make it fit for purpose.			
25)	68. Calls on the Commission to amend the Anti-Trafficking Directive with a view to ensuring that Member States explicitly criminalise the knowing use of all services provided by victims of trafficking which involve exploitation, as suggested by Article 18 of the Anti-Trafficking Directive, given the serious and extensive nature of this crime across the EU and the low number of prosecutions; regrets the fact that proving knowledge in using the services of a victim of human trafficking is a difficult matter for the prosecution authorities;	Although there is no specific reply to para. 68, the Commission states in relation to para. 67 and 71 that it will evaluate the Directive and carry out an assessment on the possibility to establish minimum EU rules to criminalise the use of exploited services of trafficking victims.		There are <a href="#">ongoing consultations</a> in view of the revision of the Directive; this review of the Anti-Trafficking Directive – which will be based on the findings of an evaluation – will aim to modernise EU anti-trafficking rules.  It will specifically explore the possibility of making the use of the services of exploited victims of trafficking a mandatory criminal offence.	
26)	69. Calls on the Commission to publish a specific and dedicated EU Strategy towards the Eradication of Trafficking in Human Beings without further delay, to address THB in the EU as a priority area, and through a comprehensive, gender- and child-specific and victim-centred legal and policy framework;	The Commission adopted on 14 April 2021 a dedicated EU Strategy on Combatting Trafficking in Human Beings (COM(2021) 171 final), in parallel with and accompanying the EU Strategy to Tackle Organised Crime 2021-2025 (COM(2021) 170 final). This strategy takes a comprehensive approach to trafficking, from prevention through prosecution and conviction of traffickers to protection of victims with concrete actions taking a gender-specific and child sensitive approach.		<a href="#">EU Strategy on anti-trafficking in human beings 2021-2025</a> <a href="#">EU Strategy to Tackle Organised Crime 2021-2025</a> (COM(2021) 170).	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
27)	70. Recalls that the Anti-Trafficking Directive needs to be fully implemented and consistently and diligently applied by all actors in the field, including legislators, judges, prosecutors, police and public administrations; stresses that the proper training of all these actors is essential, as are preventive awareness-raising campaigns and cooperation between public administrations and civil society organisations; urges the Commission and the Member States to step up efforts in this direction;		<p>Although no specific reply is provided to paragraph 70, but instead to para. 67 and 71. The Commission states that the monitoring of the implementation of the Directive in the Member States, conducted by the Commission in <i>inter alia</i> biennial progress reports (COM(2016) 267 final, COM(2018) 777 final, COM(2020) 661 final) as well as various stakeholders' reports indicate that the decade old instrument may not be fit for purpose any longer. Despite prevention initiatives undertaken, the demand for using exploited victims' services has not been reduced.</p> <p>The Commission will continue to support the Member States in the implementation of the Directive and will use its powers conferred by the Treaties, including infringements, as appropriate. The Commission will evaluate the implementation of the EU Anti-trafficking Directive and, based on the outcome and if necessary, propose revising it to make it fit for purpose.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Third report on the progress made in the fight against trafficking in human beings (2020) as required under Article 20 of Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims</a>).</p> <p>There are <a href="#">ongoing consultations</a> in view of the revision of the Directive; this review of the Anti-Trafficking Directive – which will be based on the findings of an evaluation – will aim to modernise EU anti-trafficking rules.</p> <p>It will specifically explore the possibility of making the use of the services of exploited victims of trafficking a mandatory criminal offence.</p>	
28)	71. Calls on the Commission to regularly assess and review the implementation of the Anti-Trafficking Directive by the Member States and submit a report in line with Article 23(1), assessing the extent to which the Member States have taken the necessary measures in order to comply with that Directive and the impact of existing national law, and to introduce urgently infringement procedures where there has been a lack of effective implementation, report to the European Parliament and to come forward with proposals to revise it;		<p>The EU Anti-trafficking Directive is the backbone of the EU's efforts in combatting human trafficking. Ensuring the correct and complete transposition and implementation of the Directive is therefore a priority for the Commission. To that end, the European Commission has monitored and supported the transposition and implementation of the Directive in the Member States bound by it. In its 2016 transposition report (COM(2016) 722 final), the Commission found that while Member States made substantial efforts to transpose the Directive, there is still room for improvement. The Commission requested further information in 2019 from Member States with regard to the findings of its 2020 report (COM(2020) 661 final). In parallel, the Commission has been supporting the Member States to implement effectively the Directive. The monitoring of the implementation of the Directive in the Member States, conducted by the Commission in <i>inter alia</i></p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Third report on the progress made in the fight against trafficking in human beings (2020)</a> as required under Article 20 of Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims).</p>

		<p>biennial progress reports (COM(2016) 267 final, COM(2018) 777 final, COM(2020) 661 final) as well as various stakeholders' reports indicate that the decade old instrument may not be fit for purpose any longer. Despite prevention initiatives undertaken, the demand for using exploited victims' services has not been reduced.</p> <p>The Commission will continue to support the Member States in the implementation of the Directive and will use its powers conferred by the Treaties, including infringements, as appropriate. The Commission will evaluate the implementation of the EU Anti-trafficking Directive and, based on the outcome and if necessary, propose revising it to make it fit for purpose.</p>			
29)	72. Calls on the Commission to assess a review of the Residence Permit Directive with a view to ensuring that victims are not returned on the expiry of the reflection period and that residence permits for trafficked persons are not made conditional on the participation or willingness to participate of the trafficked person in the investigation or criminal proceedings of the case;	The EU Anti-trafficking Directive sets minimum requirements, including on the support and protection of victims. The Commission will assess how identified concerns related to the Anti-trafficking Directive can be better addressed, including through a strong gender dimension in supporting and protecting victims, the non-punishment of victims for crimes they were compelled to commit, and in relation to the 2004 Council Directive on residence permit for victims of trafficking (2004/81/EC).		No further specific actions proposed/promised to be taken by the Commission.	
30)	73. Calls on the Member States and the Commission to define, allocate and earmark adequate funds in the battle against THB, either at national or European level, through the funding possibilities provided by European funds and projects, such as the Asylum, Migration and Integrational Fund (AMIF), the ISF and the Daphne strand of the citizens, equality, rights and values programme in the new multiannual financial framework;	Although no specific reply is provided to paragraph 73, the Commissions states (para. 29) that the EU Strategy on Combatting Trafficking in Human Beings addresses this crime as a global problem with an impact on the EU's internal security. It will provide for advancing international cooperation and partnerships by making best use of external policy instruments and cooperation tools and funding, including closer cooperation between EU Member States and countries of origin and transit of victims with relevant international organisations. Also (para. 57): The Commission continues to ensure funding to the EU agencies within their respective mandate. The Commission will fund and coordinate a set of actions to support Member States in implementing the EU Anti-trafficking Directive under the Internal Security Fund to		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU Strategy on Combatting Trafficking in Human Beings</a> ).

		<p>further improve the policy and operational work to combat trafficking in human beings and enhance exchanges of best practices (.../....). The European Multidisciplinary Platform Against Criminal Threats (EU EMPACT) has delivered significant results in EU crime priorities and is an important instrument for cooperation at EU level to fight organised crime. The Commission will propose to streamline EU EMPACT and reinforce its funding. All indicative actions mentioned above will be implemented taking into account the available resources under the current MFF (2021-2027).</p>			
31)	<p>74. Calls on the Commission and the Member States to organise information campaigns reaching out to potential victims and informing them about assistance, protection and their rights across all EU countries;</p>	<p>The Commission will organise a communication campaign, together with Member States and civil society, targeting high-risk sectors and high-risk environments, including for sexual exploitation.</p>		<p>A communication campaign has not yet been announced. <a href="#">Comprehensive Policy Review of Anti-Trafficking Projects.</a></p>	
32)	<p>75. Calls on the Commission to conduct evidence-based research on the risk factors for potential victims and on how different policy areas intersect with THB in risk sectors;</p>	<p>Although no specific reply is provided to this particular point, nevertheless the Commission states that the EU Anti-trafficking Directive sets minimum requirements, including on the support and protection of victims. The Commission will assess how identified concerns related to the Anti-trafficking Directive can be better addressed, including through a strong gender dimension in supporting and protecting victims, the non-punishment of victims for crimes they were compelled to commit, and in relation to the 2004 Council Directive on residence permit for victims of trafficking (2004/81/EC).</p>		<p>Not mentioned.</p>	
33)	<p>76. Calls on the Commission and the Member States to implement a human rights-based approach to the prevention of trafficking with a focus on the rights of the victims, to work with civil society in providing the necessary services and assistance to victims, and to ensure that they have access to justice, compensation and reparation;</p>	<p>No specific reply is provided to this particular point (on implementation of the human-based approach), but  (para. 17) The European Commission have been monitoring this issue in its progress reports (COM(2018) 777 final, COM(2020) 661 final) and in a dedicated report "Strengthening victims' rights: from compensation to reparation" by Joëlle Milquet, Special Adviser to the President of the European</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Commission (2019). Moreover, the EU Victims' Rights Strategy 2020-2025 prioritise victims' access to compensation. (para. 39 and 72) The EU Anti-trafficking Directive sets minimum requirements, including on the support and protection of victims. The Commission will assess how identified concerns related to the Anti-trafficking Directive can be better addressed, including through a strong gender dimension in supporting and protecting victims, the non-punishment of victims for crimes they were compelled to commit, and in relation to the 2004 Council Directive on residence permit for victims of trafficking (2004/81/EC).			
34)	77. Emphasises the importance of a coherent approach to improve the identification of potential victims in the context of migration flows and in the hotspots, of improving access to asylum procedures and of ensuring their complementarity with the procedures related to trafficking; calls on the Commission to assess the implementation of the Anti-Trafficking Directive and to come forward with proposals to revise it;	Although the follow-up does not mentions paragraph 77, (para. 67 and 71) the Commission will evaluate the Directive and carry out an assessment on the possibility to establish minimum EU rules to criminalise the use of exploited services of trafficking victims.		There are <a href="#">ongoing consultations</a> in view of the revision of the Directive; this review of the Anti-Trafficking Directive – which will be based on the findings of an evaluation – will aim to modernise EU anti-trafficking rules.  It will specifically explore the possibility of making the use of the services of exploited victims of trafficking a mandatory criminal offence.	
35)	78. Calls on the Commission and the Member States to take urgent measures against criminal groups active in migrant smuggling and trafficking in human beings, given the likelihood of smuggled persons becoming victims of trafficking, and to assess the risk faced by migrants and the most vulnerable, especially unaccompanied minors, separated children and women; underlines, in this context, the need for more legal and safe routes for migration in order to prevent the exploitation of vulnerable people with irregular status;	No specific reply is provided to this particular point (urgent measures), but the Commission states (in relation to para. 5) that the EU Security Union Strategy highlights that trafficking in human beings and smuggling of migrants are often intertwined and announces that the Commission will present a new EU Action Plan against migrant smuggling for the period 2021-2025.		On 29 September 2021 the Commission presented its <a href="#">renewed EU action plan against migrant smuggling 2021-2025</a> where both phenomena are mentioned correlatively.  No further specific actions proposed/promised to be taken by the Commission.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
36)	80. Calls on the Commission to ensure the continuity of the EU Anti-Trafficking Coordinator's work by appointing a full-time EU Anti-Trafficking Coordinator, and to include this in the new strategy on THB;		Commissioner for Home Affairs, Ylva Johansson, confirmed the appointment of a new EU Anti-trafficking Coordinator at the European Parliament plenary debate on the Implementation of the Anti-Trafficking Directive on 8 February 2021.		As of 1 July 2021, the new <a href="#">EU Anti-trafficking Coordinator</a> is Diane Schmitt.	

#### 4.1.18. IMCO

Between July 2019 and December 2021, the **Committee on Industry, Research and Energy (IMCO)** was responsible for six 'ordinary' own-initiative reports (INI) and one legislative own-initiative report (INL) leading to the adoption of seven Parliament's resolutions ('IMCO resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent six written replies to the Parliament’s six IMCO resolutions. In all six cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). In total, the Commission submitted one specific and five mixed replies.

### Analysis of the Commission actions

The Commission proposed/promised 49 genuine actions. In 83 cases, no further specific actions were proposed/promised to be taken by the Commission and in 13 cases it remained unclear if an action was carried out. In 15 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 49 actions proposed/promised by the Commission, the Commission already carried out the action in 21 cases. In the 28 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.18.1. IMCO Resolution 1: EP resolution of 25 November 2020 on towards a more sustainable single market for business and consumers

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Towards a more sustainable single market for business and consumers</b>	25/11/2020 <a href="#">T9-0318/2020</a> <a href="#">2020/2021(INI)</a> IMCO	<a href="#">SP(2021)129</a>	Final reply (SP) received 2 June 2021	Mixed reply		
1)	3. Calls on the Commission to show strong political ambition when designing, adopting and implementing the relevant upcoming proposals, such as on 'empowering the consumer in the green transition' and a sustainable product policy initiative, which should be fully aligned with the EU's climate targets and other environmental objectives so as to improve the circularity of value chains, resource efficiency and the uptake of secondary raw materials, minimise waste generation and achieve a toxic-free circular economy;	The Commission mentions consumer right in relation to the green transition, the Sustainable Products Initiative and sector specific EU actions. However, this does not happen in the context of point 3, but is linked to other points, such as 10 and 11 as well as 30 and 32. The Commission will, in line with the Circular Economy Action Plan 2020, explore the abovementioned aspects within the framework of the Sustainable Products Initiative, that is aimed to provide the basis for ensuring high environmental performance for the broadest possible range of products placed on the EU market, by setting out sustainability principles and specific requirements, giving priority to addressing product groups set out in the context of the value chains identified in the Circular Economy Action Plan, such as electronics, ICT (Information and Communication Technologies), textiles, but also furniture and high impact intermediate products such as steel, cement and chemicals.			The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.  <a href="#">Roadmap</a> for the Sustainable Products Initiative mentioned in <a href="#">CWP 2021</a> and postponed to <a href="#">Q1 2022</a> .	
	3. [...] stresses the importance of timely implementation and compliance with existing obligations and standards; urges the Commission not to postpone them further;	No specific reply is provided to this particular point (on not postponing the timely implementation and compliance with existing obligations and standards).			Not mentioned.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	(c) reinforce the role of the EU ecolabel to increase industry uptake and raise awareness among consumers;	<p>The Commission welcomes the call in point 6c to reinforce the industry uptake and consumer awareness of the EU Ecolabel. The new Circular Economy Action Plan recognises the valuable role of EU Ecolabel criteria and the need to build, where appropriate, on criteria and rules established under the EU Ecolabel Regulation. It also announces that the Commission will include more systematically durability, recyclability and recycled content in the EU Ecolabel criteria. It is to be noted that from 2016, the number of EU Ecolabel products and services available on the European market has nearly doubled and was at 75,796 in September 2020. The EU Ecolabel currently covers 24 product/ service groups (such as detergents, paper, textile, tourist accommodations etc.) and new EU Ecolabel criteria for retail financial products are planned to be established end 2021. [...]</p> <p>The feasibility of embedded use meters, also called for in point 6c, and consumer feedback mechanisms regarding optimized use and maintenance to be applied on products is being analysed (along with the related environmental impacts), in general terms, in the framework of the preparatory activities for the envisaged next Ecodesign Working Plan<sup>8</sup>.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (new <a href="#">Circular Economy Action Plan</a>).</p> <p><a href="#">Roadmap</a> for Ecodesign and energy labelling Working Plan 2020-2024, planned for <a href="#">Q1 2022</a>.</p>	
	(d) assess which categories of goods are most suited to being equipped with a usage meter, on the basis of a cost/environmental-efficiency analysis, with the aim of improving consumer information and product maintenance, encouraging long-term use of products through facilitated reuse, and boosting reuse and second-hand business models;	No specific reply is provided to this particular point (Goods to be suited to being equipped with a usage meter).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>e) in the preparation of the review of Directive (EU) 2019/771, assess how to bring the duration of legal guarantees more into line with the estimated lifetime of a product category, as well as how an extension of the reversed burden of proof period for non-conformity would enhance the possibility for consumers and businesses to make sustainable choices; calls for this impact assessment to consider the possible effects of such potential extensions on prices, the expected lifetime of products, commercial guarantee systems and independent repair services;</p>				
		<p>Regarding the period for reversal of the burden of proof, also called for in point 6e, Directive (EU) 2019/771 already extended this period from 6 months to 1 year. Moreover, this Directive allows the Member States to set a period of 2 years instead.</p> <p>With regard to bringing the duration of legal guarantees under Directive (EU) 2019/771 in line with the estimated lifetime, called for in point 6e, it must be noted that the concept of estimated lifetime is different for each specific product. Without prejudice to the future evaluation of the Directive referred to in the New Consumer Agenda, it should be recognized that aligning the length of the legal guarantee with the estimated lifetime would mean that each product would have a different legal guarantee period, which could create legal uncertainty and practical difficulties, for sellers to manage such a complicated legal framework. Directive (EU) 2019/771 is a horizontal instrument that applies to all types of goods and products, and provides for a single legal guarantee period. In addition, the legal guarantee period is subject to minimum harmonisation, with the result already now, that Member States are allowed to extend this period.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>f) in the preparation of the review of Directive (EU) 2019/771, study the feasibility of strengthening the position of sellers in relation to manufacturers by introducing a joint manufacturer-seller liability mechanism under the legal guarantee regime;</p>	<p>In relation to suggestions in point 6f the Commission points out that Directive (EU) 2019/771 applies to sales contracts, which are concluded between the consumer and the seller. The remedies available to consumers under this Directive are based on the non-conformity with the contract to which only the consumer and the seller are parties. Moreover, some of the remedies, such as a price reduction or termination of the contract can only be granted by the seller.</p> <p>If the manufacturer is liable for the lack of conformity, this Directive gives the seller a right to redress against the manufacturer. This approach allows the consumers to have a single contact point, which they can address in case of any lack of conformity.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	
	<p>(g) tackle the premature obsolescence of products by considering adding to the list set out in Annex I to Directive 2005/29/EC practices which effectively shorten the lifetime of a product to increase its replacement rate and unduly constrain the reparability of products, including software; stresses that these practices should be clearly defined based on an objective and common definition, taking into account the assessment of all stakeholders involved, such as research establishments and consumer, business and environmental organisations;</p>	<p>The earlier mentioned initiative to empower consumers in the green transition will also aim to better protect consumers against certain commercial practices, such as early product obsolescence practices, including planned obsolescence invoked in point 6g. The new Circular Economy Action Plan sets out a number of specific initiatives<sup>9</sup> to fight early obsolescence and promote durability, recyclability, reparability, and accessibility of products, and to support action by business.</p>		<p>As the Commission mentions the <a href="#">New Circular Economy Action Plan</a> in relation to premature obsolescence, it avoids directly responding to the EP suggestion to add to the list set out in Annex I to Directive 2005/29/EC practices, which shorten a product's lifetime to increase its replacement rate and constrain the products' reparability. In the Circular economy action plan, however, specific initiatives for a sustainable product policy and on substantiating the green claims are spelled out.</p> <p>New Circular Economy Action Plan <a href="#">COM(2020)98</a>.</p>	

<sup>9</sup> Notably, the initiatives for a sustainable product policy and on substantiating the green claims.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	8. considers that Member States should carry out information campaigns to increase consumer protection and confidence, especially among vulnerable groups, and calls on the Commission to give consumers adequate information on their rights through the Single Digital Gateway;	Strengthening redress and enforcement of consumer rights, stressed in point 8, is also one of the main priorities of the New Consumer Agenda where enforcement of provisions fighting misleading green claims and unfair commercial practices in relation to online influencing techniques and personalisation is one of the two strategic priorities. Moreover, the forthcoming initiative on empowering consumers for the green transition will also aim to improve enforceability for consumers as well as for businesses. This might be done by building upon the existing EU horizontal consumer law framework, including the improvements recently brought forward in relation to enforcement of consumer instruments (including the changes brought by the “New Deal for consumers”).	C C	No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request: <a href="#">New Consumer Agenda (website)</a> <a href="#">New Consumer Agenda</a> prioritizes this issue, and notes that the forthcoming initiative on empowering consumers for the green transition will improve enforceability for consumers and businesses.	C C
		Although the follow-up mentions point 8, no specific reply is provided to this particular point (to give consumers adequate information on their rights through the Single Digital Gateway).	C C	Not mentioned.	C C
5)	9. calls on the Commission and the Member States to urgently take action to ensure a level playing field for EU companies with international competitors, as well as to ensure safe and sustainable products for consumers through improved market surveillance and equivalent customs control standards throughout the EU for both traditional and online businesses; [...]	In relation to point 9 the Commission is preparing implementing acts for Regulation (EU) 2019/1020, in particular in relation to controls of products entering the Union market, and guidelines for the application of Article 4, which requires an economic operator established in the EU for certain products. Work with Member States on the creation of the new interface between national customs systems and the Information and Communication System for pan-European Market Surveillance (ICSMS) has also started. The Commission would also like to underline that in order to carry out this task not only market surveillance authorities but also customs authorities must be provided with appropriate financial, technical, information and human resources in accordance with Regulation (EU) 2019/1020. Since January 2021, the Commission is	C C	No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  Two ongoing draft implementing regulations: <a href="#">Draft implementing regulation</a> Electronic interface between the EU market surveillance information system (ICSMS) and national customs systems; <a href="#">Draft implementing regulation</a> Statistical data on controls of products entering the EU with regard to product safety and compliance.  <a href="#">ICSMS - European Commission website</a>	C C

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the preparation of the review of Directive (EU) 2019/771 and in the light of a cost-efficiency analysis for both consumers and businesses, and by ensuring that sellers always inform consumers of the option of repair and related guarantee rights;</p> <p>(f) by assessing how repairs could be facilitated by establishing, at EU level, a legal guarantee for the parts replaced by a professional repairer when goods are no longer under legal or commercial guarantee in the preparation of the review of Directive (EU) 2019/771;</p>	<p>[...] the future review provides an opportunity to examine what more can be done to promote repair, and encourage more sustainable, circular products (as mentioned in the Parliament report points 6 (e, f), 7 (a, b, c), 11 (e, f)).</p> <p>As regards point 11f, Directive (EU) 2019/771 applies to a contractual relationship between a consumer and a seller. Moreover, it lays down the obligations of the sellers and consumers' rights that apply within the period of the legal guarantee. It does not apply to contracts between a consumer and a professional repairer for repairs undertaken outside the legal or commercial guarantee of the goods.</p> <p>The set of Ecodesign regulations adopted in October 2019 provides that, before giving access to information and spare parts to professional repairers, a manufacturer may require the proof that the repairer has a professional insurance covering potential liability associated with repair activities. Such professional insurance may compensate for the lack of legal guarantee in the case of repair.</p> <p>The review of Directive (EU) 2019/771 will assess whether and to what extent the use of second-hand goods and refurbished goods can play a role to encourage more sustainable, circular products. More generally, the future review provides an opportunity to examine what more can be done to promote repair, and encourage more sustainable, circular products (as mentioned in the Parliament report points 6 (e, f), 7 (a, b, c)).</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">set of Ecodesign regulations</a> adopted in October 2019).</p> <p>See EC <a href="#">website</a> on consumer sales and guarantees.</p>	
	<p>(g) by encouraging Member States to create incentives, such as a 'craftsman's bonus', which promote repairs, particularly after the end of the legal guarantee for consumers undertaking</p>	<p>In relation to point 11g, the Commission is looking into various options to facilitate repair for consumers throughout product's lifespan. That also includes the stage of product's use beyond the period of seller's liability for product's conformity and how repair could be facilitated after 2-year term.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was be carried out.</p>

13)	<p>22 [...] calls on the Commission to develop standards and protocols for access to and the use of interoperable data in order to effectively share data between companies, investors and authorities and enable new data-driven circular business opportunities;</p> <p>calls on the Commission and Member States to increase funding for research and innovation in the area of sustainable technologies in the new MFF;</p>	<p>In its proposal for a regulation in the data governance (Data Governance Act, COM 2020 767) the Commission intends to establish a Data Innovation Board as an expert group. The Board should support the Commission in coordinating national practices and policies in supporting cross-sector data use in line with point 22. Work on technical standardisation may include the identification of priorities for the development of standards and obligations, including establishing and maintaining a set of technical standards and formalised legal obligations related to the transmission of data between two processing environments enabling data spaces to be organised without recourse to an intermediary. The Board should cooperate with sectoral bodies, networks or expert groups, or other cross-sectoral organisations dealing with re-use of data.</p> <p>Actions to enable new data-driven circular business will be included in the Digital Europe Programme and in the Horizon Europe research and innovation Programme.</p> <p>Lastly, to support the explore the role of standards in the transition towards a circular economy, the European Multi Stakeholder Platform on ICT Standardisation formed a study group on circular economy in 2020. The group authored an exhaustive report on standardisation activities (on-going or needed) relevant to the circular economy. This report to a major extent fed into a new circular economy chapter for the Rolling Plan for ICT standardisation 2021, which is expected to be published in March 2021.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>As far as the <a href="#">Data Governance Act</a> is concerned, the Commission presented its proposal on 25 November 2020 and held a public consultation until 8 February 2021.</p> <p>The process of establishing a <a href="#">Data Innovation Board</a> is thus currently ongoing.</p> <p><a href="#">Digital Europe Programme</a>, <a href="#">Horizon Europe Programme Rolling Plan for ICT standardisation 2021</a>, published in November 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	23 [...] calls for the Commission to assess how an EU digital sustainability index based on an analysis of product life cycles would mainstream the sustainable production and consumption of digital technologies; points out that practices to reduce such an environmental impact, such as reduction of packaging and development of more sustainable packaging, should be part of a strategy towards a sustainable single market;	<p>On point 23, the Commission is currently revising the Packaging and Packaging Waste Directive (1994/62/EC) as mandated in Article 9(5) of the Directive itself (that is, to revise the essential requirements for packaging in order to improve design for reuse and promoting high quality recycling, as well as strengthening their enforcement) as well as the Green Deal and the new CEAP. In the new CEAP, packaging is one of the key product groups and the Commission is mandated to revise the Directive with the objective to reduce the generation of packaging and packaging waste, promote reuse and high quality recycling. With this objective in mind, the Commission is also looking at possible targets and other measures to stimulate the uptake of recycled materials in certain packaging applications, in particular for plastic packaging, where the secondary raw materials market is not functioning properly on its own.</p> <p>The revision will also examine – among other measures – how to improve the sorting of packaging in order to lead to better recycling results. One of the possible measures and technologies is digital watermarking, which is being promoted by AIM (the HolyGrail 2 project)<sup>13</sup>.</p> <p>The Commission organised a public consultation, which closed on 6 January; the Commission’s proposal is expected to be adopted in the fourth quarter of 2021.</p> <p>The revision of the Packaging and Packaging Waste Directive is intended to be based on Article 114 of the Treaty of the Functioning of the European Union (TFEU) (internal market), which is also the current legal basis of the <i>Packaging and Packaging Waste Directive</i>.</p>		<p><a href="#">Roadmap</a> for Reducing packaging waste – review of rules</p> <p>A proposal envisaged in the CWP 2021 for Q4 2021 but postponed to <a href="#">Q1 2022</a>.</p>	

<sup>13</sup> <https://www.aim.be/wp-content/themes/aim/pdfs/Digital%20Watermarks%20Initiative%20HolyGrail%202.0%20-%20general%20presentation%20for%20PDF.pdf? t=1602239412>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	24. [...] calls on the Commission to assess the impact of digital practices and infrastructure in terms of their carbon and environmental footprint, as well as their impact on consumer practices, and to consider appropriate measures to reduce it;	Regarding point 24 and in line with the commitments announced in the European Digital Strategy of February 2020, the Commission is exploring initiatives to achieve climate-neutral, highly energy-efficient and sustainable data centres by no later than 2030, and is looking into transparency measures for telecoms operators on their environmental footprint. Furthermore, the Commission is encouraging the Member States (Commission Recommendation 2020/1307) to develop criteria for assessing the environmental sustainability of future networks and provide incentives to operators to deploy environmentally sustainable networks. Additionally, the Commission has published recently EU Green Public Procurement (GPP) Criteria for Data Centres, Server Rooms and Cloud Services, aimed at helping public authorities to ensure that data centres' equipment and services are procured in such a way that they deliver environmental improvements that contribute to European policy objectives for energy, climate change and resource efficiency, as well as reducing life cycle costs.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">European Digital Strategy</a> , February 2020).	
16)	25. [...] Insists that the Commission take account of Parliament's decisions concerning the establishment of a common charger system, in order to reduce production volumes and electronic waste;	On point 25, the Commission is working on a proposal on common charging interface for possible adoption by summer 2021.  The option of combining both common charging interface and de-coupling (e.g. selling mobiles phones without charger) is being examined and additional studies to support the impact assessment have been launched in October 2020.		Proposal for a Directive amending Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment <a href="#">COM(2021)547</a> , presented on 23 September 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	27. [...]; recalls, in this respect, the Commission's commitment to taking action through sector-specific measures and guidance on green public procurement, while maintaining the current public procurement legislation framework, and calls on the Commission to be ambitious in making sustainable criteria in public procurement the default choice; emphasises the importance of supporting second-hand, reused, recycled and reconditioned products and low-energy consumption software programmes by setting targets for public purchases;	On point 27, the Commission is working on introducing measures related to green and circular public procurement in several sector-specific initiatives. These include, for example, the green public procurement obligations in the recent proposal for the new Batteries Regulation, and the development of mandatory green public procurement criteria in the context of the Farm to Fork strategy. Furthermore, the Commission will develop a comprehensive guidance on public investment into sustainable infrastructure projects, to guide public buyers on how to align their procurement to the EU Taxonomy on sustainable finance. Finally, the Commission will publish a guidance on socially responsible public procurement in the first half of 2021.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (new <a href="#">Batteries Regulation</a> , <a href="#">Farm to fork strategy</a> , etc.).  Investing in green infrastructure <a href="#">website</a> .  EC <a href="#">guidance</a> on public investment into sustainable infrastructure projects and <a href="#">guidance</a> on socially responsible public procurement.	
18)	29. [...] asks the Commission, in this respect, to improve its guidance and to lead by example by publishing targets and statistics related to the environmental impact of their purchasing;	Regarding point 29, the Commission has been working on several initiatives to make sure its own procurement is in line with the EU's climate, environmental and social goals. While training, support and internal guidance is already available to promote the use of green and social considerations, the Commission will continue working to ensure that its own procurement practices are aligned with the ambition of the Green Deal.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
19)	30. [...] calls on the Commission to develop updated guidelines for the uniform implementation of this Directive with regard to environmental claims and to provide guidance for market surveillance activities;	In points 30 [...], the resolution calls for strengthening the fight against the current misleading claims about environmental qualities ('greenwashing') of products both online and offline. Indeed, also this is one of the main objectives for the forthcoming Commission initiative on empowering consumers for the green transition. In addition to better information, consumers need to be better protected against misleading advertising and information that is not true or presented in a confusing or misleading way to give the impression that a product or		<a href="#">Roadmap</a> for Consumer policy – strengthening the role of consumers in the green transition.

		enterprise is more environmentally sound, called "greenwashing" as previously mentioned.			

## 4.1.18.2. IMCO Resolution 2: EP resolution of 25 November 2020 on addressing product safety in the single market

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Addressing product safety in the single market</b>	25/11/2020 <a href="#">T9-0319/2020</a> <a href="#">2019/2190(INI)</a> <b>IMCO</b>	<a href="#">SP(2021)129</a>	Final reply (SP) received 2 June 2021	Mixed reply			
1)	<p>1. [...] calls on the Commission to pay particular attention to the safety of medical devices when procuring crisis equipment supplies; notes that products based on AI, IoT or robotics can offer solutions which can help to combat current and future crises that might undermine the EU's strategic position;</p> <p>[...] calls, therefore, on the Commission and the Member States to strengthen their coordinated actions within the product safety framework and its relevant networks;</p>	<p>The Commission agrees with the Parliament that the COVID-19 crisis has shown the importance to ensure that the safety of products is efficiently tackled during this and other possible future emergencies.</p>				No further specific actions proposed/promised to be taken by the Commission.	
		<p>Given the current situation and expectations of significantly increased circulation of products with a protective purpose against COVID-19, the Commission launched an urgent procedure to finance the organisation of a coordinated activity on the safety of those products among the Member States. The main purpose of this project is the organisation of coordinated testing and communication activities on the safety of COVID-19 related products: protective masks, hand sanitizers and protective gloves.</p> <p>Furthermore, national authorities responsible for enforcement have to exchange relevant information to rapidly alert the other Member States and inform consumers on dangerous products. These alerts are sent through the rapid alert system for dangerous non-food products - "Safety Gate/RAPEX". In 2020, the system registered more than 200 alerts from around 20 countries on COVID-19 related products, mostly about faulty safety masks. The number of measures relating to protective masks has reached around 23 million articles. Belgium, Croatia, Denmark, Estonia, Germany, France, Hungary,</p>				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Island, Italy, Latvia, Luxembourg, Malta, Poland, Portugal, Romania, Spain and the United Kingdom reported measures. On 13 March 2020, the Commission adopted Recommendation (EU) 2020/403 providing guidance to the Member States on conformity assessment and market surveillance procedures in the context of COVID-19. This recommendation aims to help addressing the critical shortage in protective equipment and medical devices and calls upon market surveillance authorities in the Member States to focus their controls on protective equipment or medical devices that could pose serious risks to users.</p> <p>Several actions have been taken to address issues related to covid-19 for customs from 2 perspectives: firstly to ensure customs officers are adequately protected when carrying out their tasks and secondly to ensure an adequate coordination and support to customs activities related to the movement of covid-19 related goods. On 4 February 2020, a crisis management alert was created in the customs risk management system (CRMS) in order to streamline information provided to customs, give clear instructions on the control of goods and ensure adequate communication about issues that customs may be encountering and that could hinder a proper protection of the external borders.</p> <p>Guidelines from the Commission on prioritising risks for customs controls and managing the impact of the common risk criteria and standards related to covid-19 were issued in May 2020. More than 700 alerts were shared between the Member States customs authorities to protect citizens against the risk of dangerous, non-compliant or counterfeit personal protection equipment. Detailed guidance and explicative notes were shared with customs experts, for prohibitions and restrictions, for risk management and controls, and for trade. Since the</p>

		<p>beginning of the crisis, the Commission is alerted and ready to provide any support required by Member States' customs and trade authorities with a view to ensure the protection of citizens from dangerous products, the quick provision of necessary goods and the less possible disturbance of legitimate trade.</p>			
2)	<p>2. [...] urges the Commission to update and establish aligned market surveillance rules for both harmonised and non-harmonised products placed on the market offline or online, and to make them fit for purpose in the digital age in order to ensure a level playing field and improve product safety;</p>	<p>The Commission shares the Parliament's view on the need to update EU market surveillance rules for non-harmonised products and to better align the legislative framework for harmonised and non-harmonised products to ensure coherence and improve product safety, in particular as far as market surveillance is concerned. In 2013, the Commission adopted two proposals with the aim to regulate in a coherent way the safety of harmonised and non-harmonised products. The two proposals have been finally withdrawn by the Commission in September 2020 due to the difficulties in finding an agreement. In June 2019, Regulation (EU) 2019/1020, applicable to harmonised products, except Chapter VII on customs controls, that covers not only harmonised products listed in the regulation but also all products and taking up part of the 2013 proposal, has been adopted.</p> <p>The revision of the GPSD will also take up this challenge. The Commission work in view of the revision will examine how to better align the legislative framework for non-harmonised products with the one existing for harmonised products under Regulation (EU) 2019/1020. In its work for the revision of the GPSD, the Commission will examine the current definitions of "safety", "product" and "placing on the market" to see whether they are still fit for purpose in view of new technologies.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>On 30 June 2021, the College adopted revisions of two sets of EU rules to enhance consumer rights in a world reshaped by digitalisation and the COVID-19 pandemic. A <a href="#">Proposal for a Regulation on General Product Safety COM(2021)346</a> and a Proposal for a Directive on consumer credits <a href="#">COM(2021)347</a>. The Commission is trying to reinforce its safety net for EU consumers. The proposal updates both the existing <a href="#">General Product Safety Directive</a> as well as the <a href="#">EU rules on consumer credit to safeguard consumers</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>3. [...] asks the Commission to address the challenges of emerging technologies such as AI, IoT, robotics, 3D printing and others in its revision of the GPSD, and to identify and close gaps within existing legislation, such as the Machinery Directive and the Radio Equipment Directive, avoiding duplicating legislation and ensuring a consistent approach towards product safety in all sectoral legislation, such as the Toy Directive and other product-specific legislation, in order to achieve the highest level of consumer safety while removing potential barriers to the development of disruptive technologies;</p>	<p>The Commission recognises the important challenges brought by new technologies - such as connected products and products based on Artificial Intelligence (AI) - to product safety and consumer protection in general. The Commission has highlighted the importance of these issues in the White Paper on AI published in February 2020, together with a Report on the safety and liability implications of new technologies. The Commission will adopt further initiatives such as proposals for the revision of the GPSD and the Machinery Directive and delegated acts under the Radio Equipment Directive. Furthermore, the Commission aims to adopt in spring 2021 a proposal for a legal act laying down requirements for AI, with the objective of ensuring the development and uptake of lawful and trustworthy AI across the Single Market.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s).  <a href="#">General Product Safety Directive – review</a>,                      Revision of the Machinery Directive - ongoing: <a href="#">Machinery Directive - revision</a> (started before November 2020)                      Revision RED : <a href="#">Radio Equipment Directive (RED)   Internal Market, Industry, Entrepreneurship and SMEs</a>,  <a href="#">Artificial Intelligence package</a>.</p>	
4)	<p>4. [...] Calls on the Commission to redefine the terms ‘product’ and ‘safe product’ as part of its revision of the GPSD, in coordination with the possible revision of other legislative acts such as the Product Liability Directive, so that they reflect the complexity of emerging technologies, including products with AI, IoT and robotics embedded in them, stand-alone software and software or updates which entail substantial modification to the product leading to a de facto new product;</p> <p>[...] urges the Commission to prioritise consumer rights and legal certainty for consumers when revising the GPSD;</p>	<p>The revision of the GPSD will also take up this challenge. The Commission work in view of the revision will examine how to better align the legislative framework for non-harmonised products with the one existing for harmonised products under Regulation (EU) 2019/1020. In its work for the revision of the GPSD, the Commission will examine the current definitions of “safety”, “product” and “placing on the market” to see whether they are still fit for purpose in view of new technologies.</p> <p>No specific reply is provided to this particular point (on the revision of the Product Liability Directive).</p> <p>No specific reply is provided to this particular point (to prioritise consumer rights and legal certainty for consumers when revising the GPSD).</p>	<p>Green Red Red</p>	<p><a href="#">Proposal for a Regulation on General Product Safety COM(2021)346</a>.</p> <p>Not mentioned.</p> <p>Not mentioned.</p>	<p>Green Dark Grey Dark Grey</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	5. [...] urges the Commission to consider whether 'placing on the market' being the decisive moment for the economic operator to guarantee the safety of the product is an approach still fit for purpose and outlines that continued conformity of the product with the relevant product safety legislation, including after the installation of software, could be more fit for purpose in the digital age;	In its work for the revision of the GPSD, the Commission will examine the current definitions of "safety", "product" and "placing on the market" to see whether they are still fit for Although the follow-up mentions point 4, no specific reply is provided to this particular point purpose in view of new technologies.		<a href="#">Proposal for a Regulation on General Product Safety COM(2021)346.</a>	
6)	6. [...] asks the Commission to take the recommendations of the HLEG fully into consideration	Although the follow-up mentions point 6, no specific reply is provided to this particular point (the Commission does not mention HLEG).		Not mentioned.	
	[...] stresses that the Commission should assess how AI technology and blockchain could be used to enhance product safety through, for instance, the development of interoperable databases on injuries caused by unsafe products circulating in the single market;	[...] The Commission aims to adopt in spring 2021 a proposal for a legal act laying down requirements for AI, with the objective of ensuring the development and uptake of lawful and trustworthy AI across the Single Market.  [...] The Commission agrees that it is important to make recalls of dangerous products more effective. In April 2019, the Commission published the results of an EU-wide survey on consumers' perceptions and experiences with product recalls. In October 2019, it organised an expert workshop to take stock of existing best practices and reflect on ways to improve recall effectiveness.		<a href="#">Artificial Intelligence package.</a>  Proposal for a Regulation on Artificial Intelligence (AI Act) and amending certain EU legislative acts <a href="#">COM/2021/206 final.</a>	
7)	7. [...] stresses that the Commission should screen the existing AI standards and consult with relevant stakeholders to assess which new standards are needed, that it should carry out a periodic assessment of the EU regulatory framework related to AI in order to ensure product safety and consumer and data	The Commission recognises the important challenges brought by new technologies - such as connected products and products based on Artificial Intelligence (AI) - to product safety and consumer protection in general. The Commission has highlighted the importance of these issues in the White Paper on AI published in February 2020, together with a Report on the safety and liability		<a href="#">Artificial Intelligence package</a>  Proposal for a Regulation on Artificial Intelligence (AI Act) and amending certain EU legislative acts <a href="#">COM/2021/206 final.</a>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	protection, and that it should intervene in areas where it is necessary to promote legal certainty and ensure the harmonisation of rules within the EU;		implications of new technologies. [...] Furthermore, the Commission aims to adopt in spring 2021 a proposal for a legal act laying down requirements for AI, with the objective of ensuring the development and uptake of lawful and trustworthy AI across the Single Market.			
8)	8. [...] urges the Commission, therefore, to further harmonise the methodology and, together with the relevant stakeholders, to thoroughly assess the feasibility of risk-based assessment schemes, adapting their application for products with a high risk level, and conformity assessment mechanisms, where they do not yet exist, to ensure the safety and security by design or default of products with embedded emerging technologies;		Although the follow-up mentions point 8, no specific reply is provided to this particular point (on harmonising the methodology).		Not mentioned.	
9)	9. [...] urges the Commission to also take into account the 'think small first' principle when assessing the impact of future legislation, which should take due account of the need to provide support to SMEs to reduce the burden these measures can create and to ensure a stable, predictable and properly regulated environment in which SMEs can run their businesses;		The Commission will adopt in spring 2021 a proposal for a legal act laying down requirements for AI. The Commission aims to explore ways to provide the necessary support to operators, and notably small and medium sized enterprises (SMEs), to adapt to new legislation and to facilitate their path to compliance assessment. In this context, it recognises the value that digital innovation hubs could play for that purpose.		<a href="#">Artificial Intelligence package.</a>  Proposal for a Regulation on Artificial Intelligence (AI Act) and amending certain EU legislative acts <a href="#">COM/2021/206 final</a> .	
10)	10. [...] Urges the Commission to consider EU benchmarks for 'regulatory sandboxes', without abandoning the precautionary principle, since they can enhance the safety of products by giving expert input on how to assess the compliance of a product with the applicable legislation in a modern way;		The Commission will also explore the links between Analytics and safety in its work on a proposal on the revision of the GPSD. Furthermore, as announced in the new EU Cybersecurity Strategy for the Digital Decade (JOIN(2020) 18 final), the Commission will consider new horizontal rules to improve the cybersecurity of all connected products and associated services placed on the Internal Market and complement measures regulatory sandboxes under development, which would address specific types of products, such as mandatory requirements to be		<a href="#">Proposal for a Regulation on General Product Safety COM(2021)346.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		proposed for market access of certain wireless products (through the adoption of a delegated act under the Radio Equipment Directive), cybersecurity rules for all new motor vehicle types as from July 2022, as well as related actions in the context of the revision of the Machinery Directive.			
11)	11. [...] Asks the Commission and the Member States to take into account the autonomous self-learning behaviour of AI throughout a product's lifetime and assess the feasibility of setting up mechanisms to avoid emerging risks;	The Commission agrees with the Parliament's call on the need to avoid emerging risks and is considering how to ensure human oversight especially in self-learning machines.		No further specific actions proposed/promised to be taken by the Commission.	
12)	12. [...] asks the Commission to analyse whether the durability, reusability, upgradability and reparability of products can influence their safety; notes, however, that many economic operators do not always exercise effective control over their products through their entire lifecycle, and that several other parties may be responsible for various product components;	Although the follow-up mentions point 12, no specific reply is provided to this particular point (on analysing whether the durability, reusability, upgradability and reparability of products can influence their safety).		Not mentioned.	
13)	13. [...] Calls on the Commission and the Member States to ensure that in connectivity infrastructure, including new communication technologies such as 5G, security and privacy is embedded by design and by default in order to improve the safety of connected products;	The Commission will also explore the links between cybersecurity and safety in its work on a proposal on the revision of the GPSD. Furthermore, as announced in the new EU Cybersecurity Strategy for the Digital Decade (JOIN(2020) 18 final), the Commission will consider new horizontal rules to improve the cybersecurity of all connected products and associated services placed on the Internal Market and complement measures under development, which would address specific types of products, such as mandatory requirements to be proposed for market access of certain wireless products (through the adoption of a delegated act under the Radio Equipment Directive), cybersecurity rules for all new motor vehicle types as from July 2022, as well as related		Proposal for a Regulation on machinery products <a href="#">COM/2021/202 final</a> . The Commission will also explore the links between cybersecurity and safety in its work on a proposal on the revision of the GPSD.		<a href="#">Proposal for a Regulation on General Product Safety COM(2021)346.</a>	
14)	14. Is convinced that a lack of or the weak cybersecurity of connected devices and interlinked services can compromise product safety, and that this needs to be addressed in the horizontal revision of the relevant rules and recommendations;  therefore calls on the Commission to ensure that the scope of the revision of the GPSD also takes into account cybersecurity challenges and emerging trends by ensuring all devices remain up-to-date with continuously evolving industry web standards;	The Commission will also explore the links between cybersecurity and safety in its work on a proposal on the revision of the GPSD. Furthermore, as announced in the new EU Cybersecurity Strategy for the Digital Decade (JOIN(2020) 18 final), the Commission will consider new horizontal rules to improve the cybersecurity of all connected products and associated services placed on the Internal Market and complement measures under development, which would address specific types of products, such as mandatory requirements to be proposed for market access of certain wireless products (through the adoption of a delegated act under the Radio Equipment Directive), cybersecurity rules for all new motor vehicle types as from July 2022, as well as related actions in the context of the revision of the Machinery Directive.		<a href="#">Proposal for a Regulation on General Product Safety COM(2021)346.</a>  Proposal for a Regulation on machinery products <a href="#">COM/2021/202 final.</a>  Delegated Act to Radio Equipment Directive <a href="#">C(2021)7672.</a>	
15)	15. [...] calls on the Commission to assess the need both for an EU cybersecurity certification scheme covering products with embedded emerging technologies, such as AI, IoT and robotics, in accordance with the EU cybersecurity framework, always taking into account sector-specific aspects, and the need to develop corresponding mandatory certification schemes for consumer products that can be quickly updated to adapt to current risks without hindering innovation; accordingly calls	The Commission will also explore the links between cybersecurity and safety in its work on a proposal on the revision of the GPSD. Furthermore, as announced in the new EU Cybersecurity Strategy for the Digital Decade (JOIN(2020) 18 final), the Commission will consider new horizontal rules to improve the cybersecurity of all connected products and associated services placed on the Internal Market and complement measures under development, which would address specific types of products, such as mandatory requirements to be proposed for market access of certain wireless products		<a href="#">Proposal for a Regulation on General Product Safety COM(2021)346.</a>  Proposal for a Regulation on machinery products <a href="#">COM/2021/202 final.</a>  Delegated Act to Radio Equipment Directive <a href="#">C(2021)7672.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	on the Commission to assess the need for legislation on mandatory cybersecurity requirements and proper market surveillance mechanisms;	(through the adoption of a delegated act under the Radio Equipment Directive), cybersecurity rules for all new motor vehicle types as from July 2022, as well as related actions in the context of the revision of the Machinery Directive.			
16)	16. [...] encourages the Commission and the Member States, to the extent that their respective competences allow them, to increase the resources and expertise of their market surveillance authorities, to enhance cooperation among them and develop joint actions, including at cross-border level and for online markets, to improve the efficiency and effectiveness of checks, and to properly staff market surveillance authorities, including customs authorities, so as to be able to identify unsafe products, in particular from third countries, and prevent their circulation in the internal market;	[...] Coordinated activities on safety of products are a powerful instrument in the area of market surveillance across the European Union to ensure a safe Single Market, by providing national market surveillance authorities with the necessary tools to jointly test products, determine their risks and draw up common positions and procedures. Facilitating discussions and knowledge sharing among national market surveillance authorities, and reaching out to external stakeholders, is also a fundamental aspect of coordinated activities in this area. The objective of these horizontal activities is to focus on specific challenges including the growing use of e-commerce, global value chains, fragmentation of market surveillance, limited resources, and difficulties in online sampling.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s).	
17)	17. [...] call on the Commission and the Council to increase and provide adequate resources and a dedicated budget line.	In that respect, the Commission has dedicated around EUR 23.5 million from 2011 to 2020 to support Member States' coordinated activities on the safety of products, including the joint sampling and testing of consumer products.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s).	
18)	18. [...] urges the Commission, therefore, to get a better and clearer picture of the counterfeiting phenomenon and of the possible role that market surveillance authorities and online marketplaces could play in better protecting the	Coordinated activities on safety of products are a powerful instrument in the area of market surveillance across the European Union to ensure a safe Single Market, by providing national market surveillance authorities with the necessary tools to jointly test products, determine their risks and draw up common positions and procedures. Facilitating discussions and knowledge sharing among national market surveillance authorities, and reaching out to external stakeholders, is also a		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s).	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	health and safety of EU consumers, including through the effective enforcement of customs legislation and the harmonisation of customs controls throughout the EU;		fundamental aspect of coordinated activities in this area. The objective of these horizontal activities is to focus on specific challenges including the growing use of e-commerce, global value chains, fragmentation of market surveillance, limited resources, and difficulties in online sampling.			
19)	19. [...] Urges the Commission and the Member States to set minimum sampling rates; asks market surveillance authorities to carry out sector-specific mystery shopping, including on online shopping marketplaces, on a regular basis or during sweep days like the ones carried out by the Consumer Protection Cooperation Network (CPC);		The objective of [...] activities is to focus on specific challenges including [...] difficulties in online sampling. the Commission will explore the possibility of funding a laboratory (e-enforcement lab) to test and apply advanced IT solutions that could be integrated into or linked to existing structures, such as the Consumer Protection Cooperation Network.		Because of a general character of the promise, it is unclear whether the Commission funded an e-enforcement lab.	
20)	20. [...] Calls on the Commission to swiftly adopt implementing acts in accordance with Regulation (EU) 2019/1020, and in particular Article 25 thereof, laying down benchmarks and techniques for checks on harmonised and non-harmonised products, and to include minimum requirements on checks for products entering the Union market so as to ensure consistent, effective and uniform enforcement of Union law;		The Commission is also working on implementing acts under Regulation (EU) 2019/1020 in relation to controls at the external borders as highlighted in its Communication to the Parliament and the Council "Taking the Customs Union to the Next Level: a Plan for Action" of 28 September 2020 (Customs Union Communication). Such controls are a unique opportunity to stop unsafe and non-compliant products before they are released for free circulation on the EU market. The regulation will improve the sharing of data at customs clearance between national inspectors and customs authorities, including through the EU Single Window Environment for Customs ("Customs Single Window") between national customs and the Information and Communication System for pan-European Market Surveillance (ICSMS). The implementing acts will also define benchmarks and techniques for controls based on common risk analysis at customs across the EU.		<a href="#">Implementing acts</a> (4) based on Regulation (EU)2019/1020.	
21)	21. [...] calls on the Commission to explore the option of requiring non-EU economic operators		The Commission also agrees with the Parliament on the importance to ensure more stringent control on products		<a href="#">Proposal for a Regulation on General Product Safety COM(2021)346.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to designate an economic operator in the EU for non-harmonised products that would provide information or documents relating to the safety of the product to the market surveillance authorities and cooperate with them to make sure that corrective action is taken to remedy cases of non-compliance;	coming from third countries. With Regulation (EU) 2019/1020 the Union has introduced for a certain number of products, the requirement for EU and non-EU economic operators to have a person responsible in the EU for certain tasks. The Commission is examining, with the revision of the GPSD, whether the same provision could be introduced for non-harmonised products as well.		<a href="#">Regulation (EU) 2019/1020</a> of the European Parliament and of the Council of 20 June 2019 on market surveillance and compliance of products and amending Directive 2004/42/EC and Regulations (EC) No 765/2008 and (EU) No 305/2011.	
22)	22. Asks the Commission to cooperate with the regulatory authorities of third countries, to exchange market-surveillance-related information on dangerous products with them, and to include provisions related to market surveillance and enforcement in all EU free trade agreements, so that companies from outside the EU which sell goods in the internal market are subject to the same product safety requirements as EU companies;	<p>The Commission also agrees with the Parliament on the importance to ensure more stringent control on products coming from third countries.</p> <p>[...] The Parliament calls on the Commission to improve market surveillance by providing resources and technological means. In that respect, the Commission has dedicated around EUR 23.5 million from 2011 to 2020 to support Member States' coordinated activities on the safety of products, including the joint sampling and testing of consumer products. Coordinated activities on safety of products are a powerful instrument in the area of market surveillance across the European Union to ensure a safe Single Market, by providing national market surveillance authorities with the necessary tools to jointly test products, determine their risks and draw up common positions and procedures. Facilitating discussions and knowledge sharing among national market surveillance authorities, and reaching out to external stakeholders, is also a fundamental aspect of coordinated activities in this area. The objective of these horizontal activities is to focus on specific challenges including the growing use of e-commerce, global value chains, fragmentation of market surveillance, limited resources, and difficulties in online sampling. [...]</p> <p>EU market surveillance authorities have specifically demanded developments in this area, particularly in view of the constantly growing share of online sales.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>[...] At the same time, the Commission cooperates with the regulatory authorities of third countries, in particular in light of the fact that half of the dangerous products notified in Safety Gate/RAPEX comes from outside the EU, in particular from China. Since 2006, the Commission has engaged in product safety cooperation through the RAPEX-China system with the Chinese authorities. The Chinese authorities follow up on products of Chinese origin reported by the Member States in the Safety Gates/RAPEX System and report back to the Commission on actions taken. Furthermore, to help in this effort, it could be envisaged the inclusion of a provision enabling the exchange of information on safety and compliance of non-food products and related market surveillance in trade agreements currently under preparation (similar to what has already been done with Canada).</p>			
23)	<p>23. Urges the Commission to increase, at EU and international level, cooperation between consumer protection, market surveillance and customs authorities and other relevant competent authorities so as to guarantee harmonised and uniform controls at all points of entry into the Union, to enable the swift transfer of information on unsafe products, and to enhance coordination of enforcement measures, such as checks on compliance with the EU regulatory framework and penalties; in this context, calls on the Commission and the Member States to strengthen the interaction between EU and national public databases on illegal products; urges the Commission, within the framework provided by Regulation (EU) 2019/1020, to enable the use of the Information and Communication System on Market Surveillance, which should run in parallel with</p>	<p>The Commission, in co-operation with the Member States, is currently overhauling the Import Control System (ISC). Its replacement, "ICS2", will improve the quality and availability of customs data for advance cargo risk management. This new platform will help strengthen operational collaboration across the Customs Union in the identification of goods movements, which may involve safety or security risks before they arrive at the external borders of the EU.</p> <p>The Commission announces in the Custom Union Communication its intention to launch an EU "Joint Analytics Capabilities" initiative to facilitate the collection and better use of data from customs and non-customs sources, in order to help customs authorities with risk management, customs clearance and post-clearance and anti-fraud actions.</p> <p>The Customs Union Communication also announces the Commission's intention to explore the imposition of</p>		<p><a href="#">Import Control System 2 (ICS2)</a>, <a href="#">Modernising VAT for cross-border e-commerce</a>, <a href="#">Taxation and Customs Union</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the Common Customs Risk Management System, in order to increase the level of cooperation and exchange of information between the Member States and the Commission;	<p>customs reporting obligations on online platforms facilitating distance sales of goods in order to address the challenges of e-commerce. These reporting obligations would build on the VAT information reporting obligations with which online platforms must comply under the rules of the Import One Stop Shop (IOSS) from 1 July 2021. While platforms are not typically involved in arranging the customs clearance of goods bought online, they have and could share data showing entire sales chains, from the original seller to the final end-buyer. This data would supplement information provided in customs declarations and could enhance customs actions against the range of non-financial risks. Actions planned for 2021 to 2023 are pilot testing, and subject to the results of an impact assessment, a legal amendment to Union Customs Code package to impose customs reporting obligation on platforms.</p> <p>Not least, to improve the cooperation between consumer protection, market surveillance and customs authorities, the Commission is examining the possibility to establish an automated process for exchange of information between the Safety Gate/RAPEX internal application and the newly developed Customs Risk Management System.</p>			
24)	24. Urges the Commission to prioritise product safety in its action plan for customs;	<p>[...] from 2017 to 2020, in the context of the E-Enforcement Academy, the Commission has provided high-quality training and learning material to support the work of national consumer protection and consumer product safety authorities, with a view to create common tools and methods for the control of online trade (e-enforcement). The Commission plans to launch a second phase of the project in 2021.</p> <p>The Commission has also proposed a new financial instrument, namely the Customs Control Equipment Instrument, to allow the purchase, maintenance, upgrade</p>		<p>E-Enforcement Academy II <a href="#">contract award notice</a>.</p> <p><a href="#">Customs Control Equipment Instrument</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		and testing of relevant, state-of-the-art customs control equipment (soft detection equipment such as x-rays, scanners, handheld devices, Radiation Portal Monitors, laboratory equipment, automated recognition of number plates etc.) under the 2021-2027 Multiannual Financial Framework.			
25)	25. [...] calls on the Commission to encourage other online marketplaces to join the initiative and display clear information to consumers regarding their rights and the retailer, and to evaluate the role online marketplaces could play in limiting the circulation of unsafe products and to propose mandatory rules on obligations and the responsibilities of marketplaces established in and outside the EU as part of the Digital Services Act, the revision of the GPSD and any other relevant legislation;	The Parliament acknowledges the positive impact of the Commission's cooperation with platforms on a voluntary basis under the so-called Product Safety Pledge. It calls on the Commission to encourage other online marketplaces to join it. On 9 November 2020, two more online marketplaces joined the Product Safety Pledge, bringing the number of participants to nine. The Commission publishes progress reports of the Safety Pledge twice a year to monitor the actions to which the signatories committed to, among them the commitment to react within two working days to government notices and to inform consumers about recalls or corrective actions. One of the shortcomings that emerged through the implementation of the Pledge is the lack of detailed key performance indicators, as underlined by the Parliament. For the next reporting periods, all signatories have committed to improve this. Furthermore, with the proposal for the Digital Service Act (DSA), adopted on 15 December 2020, and with the proposal for a revision of the GPSD that could be adopted in May 2021, the Commission aims to strengthen the obligations and responsibilities of online marketplaces to ensure that, as requested by the Parliament, consumers are offered equally safe products whether sold online or offline. In particular, the proposed DSA includes certain obligations		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s) ( <a href="#">Digital Services Act</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>for online marketplaces to ensure a trustworthy and transparent environment for consumers, as well as better enforcement of the law by authorities. The Commission, in the preparatory work for the proposal on the revision of the GPSD, is also looking at the possibility to make compulsory at least part of the commitments contained in the Safety Pledge in addition to and in consistency with the relevant provisions and principles in the DSA.</p> <p>The Commission admits the initiative is already ongoing and are integrated into different pieces of legislation, [...] such as the new Regulation (EU) 2019/1020 on market surveillance and compliance of products (Regulation (EU) 2019/1020) or the proposal for a Digital Services Act adopted on 15 December 2020 (COM(2020)825).</p>			
26)	<p>26. [...] calls on the Commission, together with the market surveillance authorities, to conduct research on the safety of products from third countries, to scrutinise online marketplaces more actively and to increase their responsibility; urges the Commission, in cooperation with consumer organisations and the Member States, to better inform consumers about the possible dangers of non-compliant products from third countries purchased on online marketplaces; invites the Commission to require online marketplaces to apply the same rules to all entities that offer products to consumers in the EU, including those established in third countries;</p>	<p>The Commission also agrees with the Parliament on the importance to ensure more stringent control on products coming from third countries. With Regulation (EU) 2019/1020 the Union has introduced for a certain number of products, the requirement for EU and non-EU economic operators to have a person responsible in the EU for certain tasks. The Commission is examining, with the revision of the GPSD, whether the same provision could be introduced for non-harmonised products as well.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s) (<a href="#">Revision of GPSD</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
27)	27. [...] asks the Commission to establish obligations requiring online marketplaces to react effectively to unsafe products, including by informing consumers if they have purchased an unsafe or otherwise non-compliant product;	The Commission publishes progress reports of the Safety Pledge twice a year to monitor the actions to which the signatories committed to, among them the commitment to react within two working days to government notices and to inform consumers about recalls or corrective actions. One of the shortcomings that emerged through the implementation of the Pledge is the lack of detailed key performance indicators, as underlined by the Parliament. For the next reporting periods, all signatories have committed to improve this. Furthermore, with the proposal for the Digital Service Act (DSA), adopted on 15 December 2020, and with the proposal for a revision of the GPSD that could be adopted in May 2021, the Commission aims to strengthen the obligations and responsibilities of online marketplaces to ensure that, as requested by the Parliament, consumers are offered equally safe products whether sold online or offline. In particular, the proposed DSA includes certain obligations for online marketplaces to ensure a trustworthy and transparent environment for consumers, as well as better enforcement of the law by authorities. The Commission, in the preparatory work for the proposal on the revision of the GPSD, is also looking at the possibility to make compulsory at least part of the commitments contained in the Safety Pledge in addition to and in consistency with the relevant provisions and principles in the DSA.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s) ( <a href="#">Digital Services Act</a> ).	
28)	28. Asks the Commission and the Member States to ensure that online marketplaces enhance their cooperation via joint activities between themselves and the competent authorities, consult the RAPEX system before placing products on their websites, remove products identified as unsafe by RAPEX immediately, exchange information on sellers that break the	The Commission agrees with the Parliament's requests to improve the cooperation between online marketplaces and Member States' authorities. Regulation (EU) 2019/1020 obliges economic operators to cooperate with market surveillance authorities regarding actions that could eliminate or mitigate risks presented by products made available on the market by those operators. It also obliges information society service providers to cooperate		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action(s) falling under the scope of the EP request(s) ( <a href="#">revision of the GPSD</a> , <a href="#">Safety Gate/RAPEX</a> ).

4.1.18.3.IMCO Resolution 3: EP resolution of 20 January 2021 on strengthening the single market:the future of free movement of services

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Strengthening the single market: the future of free movement of services</b>		20/01/2021 <a href="#">T9-0007/2021</a> <a href="#">2020/2020(INI)</a> IMCO	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	Specific reply			
1)	2. [...] calls on the Commission to define a schedule of specific actions regarding the conclusions of the Commission communications of 10 March 2020 on identifying and addressing barriers to the Single Market (COM(2020)0093) and a long-term action plan for better implementation and enforcement of single market rules (COM(2020)0094);	Concerning the further implementation of the Single market enforcement action plan as well as the Communication on identifying and addressing barriers to the Single Market (COM(2020)0093), hereinafter “Single market barriers report”, the Commission takes note of the Parliament’s call to deliver a schedule of specific actions (paragraph 2). The Commission, in partnership with the Member States, is working on the implementation of all actions in these initiatives. As regards the timeline and next steps, the Commission plans to put forward an updated New Industrial Strategy for Europe on 27 April 2021, which will include an update on progress and the state of play in relation to the Single market enforcement action plan and remaining Single market barriers.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">New Industrial Strategy for Europe</a> ).		
2)	4. Highlights that the European professional card is only used for five regulated professions and is therefore not being used to its full potential; calls, therefore, on the Commission to increase the number of professions to which the European professional card applies, including engineering in particular;	In relation to the Parliament’s call to extend the European Professional Card (EPC) to other professions (paragraph 4), including engineering, the Commission notes that while no initiative is currently ongoing, it might explore the possibilities to expand the EPC procedure to other professions that meet the criteria of mobility, interest of stakeholders and regulation in a significant number of Member States.				The general nature of the commitment’s wording makes it unclear to what extent the action(s) was to be carried out.		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	8. Regrets that unjustified legal complexities and administrative barriers for public procurement in the field of services within the EU due to diverging national implementations of Directive 2014/24/EU <sup>14</sup> remain in place; calls on the Commission to monitor and encourage further sector-specific harmonisation of and guidance on public procurement procedures with the ultimate aim of yielding the potential benefits and reducing the costs of cross-border procurement for SMEs, microenterprises and the self-employed; [...]	In relation to public procurement (paragraph 8), the EU public procurement directives harmonise an important number of rules, thereby contributing to a real Single Market for public procurement, while allowing a certain degree of flexibility to the Member States. The directives also introduce specific provisions aimed at reducing administrative burden and facilitating cross-border procurement, which are particularly relevant for SMEs. Such provisions include eCertis, an online system helping identify the certificates that bidders may be required to submit across the EU, and the European Single Procurement Document (ESPD), allowing bidders to submit a self-declaration on their capacities instead of providing full documentation as previously required.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">New guidance on public procurement of innovation</a> (from 21 June 2021); <a href="#">New guide on socially responsible procurement</a> (from 26 May 2021)).	
4)	12. Notes that two thirds of service activities are included in the scope of the Services Directive and encourages the Commission to evaluate and improve its implementation to strengthen the single market legal framework;	As regards monitoring in relation to the Services Directive specifically, the Commission is preparing a comprehensive report of the application of the Directive in all the Member States, identifying and assessing the types of restrictions retained by them.		<a href="#">Study</a> : Mapping and assessment of legal and administrative barriers in the services sector 04/2021.  Implementation of the Services Directive, <a href="#">website</a> .	
5)	14. Recalls that the principles of the Services Directive and the Professional Qualifications Directive facilitate the free movement of services; calls on the Commission to issue updated guidelines on the Services Directive with the objective to strengthen enforcement and harmonisation and compliance across Member States and service providers;	The Commission is continuously looking at issues where further guidance would be useful. As regards guidelines on the Services Directive (paragraph 14) specifically, the Commission is currently preparing an update on the Handbook on implementation of the Services Directive.		Implementation of the Services Directive, <a href="#">website</a> .  Latest version of the Handbook on implementation of the Services Directive is from 2018.

6)	17. Urges against the citing of COVID-19 as a justification for limiting the free movement of services within the single market unless appropriately justified and instructs the Commission to remain vigilant against any abuse of this justification;		SMET has approved its Terms of Reference and has agreed to its work programme for the coming months, which is based on three pillars: (1) abolishing the remaining COVID-19 related barriers; (2) addressing priority barriers identified by the Member States and the Commission; (3) reinforcing the single market to support the recovery, based on an industrial ecosystems approach. Since the onset of the pandemic, SMET has successfully helped to address issues concerning the removal of COVID-19 related barriers that hampered the correct functioning of the single market, including when it comes to border controls and export restrictions affecting service providers.		Single Market Task Force (SMET), <a href="#">website</a> .  Related: Communitation on updating the New Industrial Strategy <a href="#">COM(2021) 350</a> .  First report on the work of the Single Market Task Force, <a href="#">September 2021</a> .	
7)	25. Calls on the Commission to provide structured assistance and issue guidance to Member States on how to conduct ex ante proportionality assessments of new national regulations relating to services in line with the Proportionality Test Directive;		Moreover, regarding assistance and guidance for the Member States for the implementation of the Proportionality Test Directive (paragraph 25) the Commission will continue to provide structured assistance via expert group meetings and will publish in due course a guidance document on how to conduct ex ante proportionality assessments of new national regulations relating to services in line with the Directive.		No guidance published yet on Directive 2018/958.	
8)	29. Points out that businesses and consumers across the European Union benefit from adequate implementation and enforcement of existing legislation; encourages the Commission to use all means at its disposal to fully enforce existing rules and to promptly decide on complaints to ensure that relevant issues from an end-user perspective are effectively handled; calls for the assessment of alternative resolution mechanisms and infringement procedures to be		The Commission agrees with the European Parliament resolution that a well-functioning single market is fundamental to boost businesses and offer the best choice to consumers and that in this context, it is necessary to use all means available to fully enforce existing rules (paragraph 29). To this end, the Commission's long term action plan for better implementation and enforcement of single market rules (COM(2020)0094), hereinafter "Single market enforcement action plan", put forward 22 actions to		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (" <a href="#">Single market enforcement action plan</a> ").	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>applied stringently and without undue delay whenever breaches of the relevant legislation which contravene the proper functioning of the internal market are identified and disproportionate burdens are introduced;</p>	<p>address barriers to a well-functioning single market for businesses and consumers and to maximise the effectiveness and efficiency of compliance and enforcement across the EU. In the first year of implementation of the Single market enforcement action plan, the Commission, in close co-operation with the Member States, has completed a number of those actions while progressing with others.</p> <p>[...]</p> <p>In addition to SMET, the Commission has put in place a number of actions to improve enforcement (paragraph 29), such as specific guidance to national authorities, organising package meetings with individual Member States to find solutions on specific issues, as well as better prioritisation and handling of complaints and infringement action.</p>			
9)	<p>31. Calls on the Commission to improve the monitoring of Member State performance and quality in transposing, implementing and enforcing legislation, including an annual report on these issues, and to develop with Member States, social partners and other stakeholders transparent and participative evaluations that are based on quantitative as well as qualitative criteria;</p>	<p>The single digital gateway also offers an online tool for citizens and businesses to report obstacles they encounter in the single market (paragraph 31). The feedback will be combined with existing data from other sources to get a more integrated and representative overview of which obstacles are particularly cumbersome and costly for the users of the single market, providing input for addressing barriers and for evaluating the effectiveness of EU law.</p> <p>[...]</p> <p>In relation to monitoring the Member States' performance and the quality in transposing, implementing and enforcing legislation in services (paragraph 31), the Commission agrees that there is room to further reinforce</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">SOLVIT</a>, <a href="#">single digital gateway</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>efforts and is taking a number of actions in this regard, including when it comes to the Single Market Scoreboard. [...]</p> <p>More specifically, regarding the Single Market Scoreboard (paragraphs 31 and 56), the Commission agrees on the need for an updated Single Market Scoreboard that would better reflect the real situation for users on the ground and would provide a more comprehensive Member States' performance assessment. The Commission is currently working towards reinforcing how the services dimension of the single market is reflected in the Scoreboard. The Commission plans to expand the scope of the Scoreboard by adding new areas to monitor and to add qualitative information within existing sections, where needed and possible. [...]</p> <p>Moreover, the Commission will analyse SOLVIT cases in the area of services to identify relevant structural issues (paragraph 51 and 31). The Commission is engaged in targeted awareness raising activities related to SOLVIT, and is also encouraging the Member States to develop similar national strategies to increase the use of SOLVIT, in particular by businesses.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.</p> <p><a href="#">Single Market Scoreboard</a></p>	
10)	32. Regrets that as many as twenty Member States were late in transposing the Services Directive into national law; recalls that the range	While such coordination and information exchange rely heavily on the commitment, mutual trust and concrete actions of the Member States, the Commission continues			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	of instruments, such as the points of single contact, are still limited and that service providers are not sufficiently informed about all the possibilities available to them; calls therefore on the Commission to inform interested parties through, inter alia, internet advertising of the possibilities provided by the Directive;	to facilitate those by all means available, such as the multilingual and cost-free Internal Market Information system (IMI).		The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out. <a href="#">Internal Market Information System</a>	
11)	33. Stresses that the establishment of a dynamic market and a level playing field for cross-border provision of information society services is a key component of the future competitiveness of the EU economy; calls on the Commission and the Member States to address the remaining barriers to the cross-border provision of information society services in the digital services legislative package;	As regards remaining barriers to the cross-border provision of information society services (paragraph 33), the Commission has recently tabled two legislative proposals upgrading the European Union rules governing digital services. The proposed Digital Services Act and Digital Markets Act lay down harmonised rules to ensure legal certainty for digital services providers offering services in the EU. The Digital Services Act aims at creating a safe environment online by establishing due diligence obligations and a clear accountability framework for digital intermediary services providers offering their services in the EU in order to ensure the uniform protection of users against illegal content online across the internal market and to protect their fundamental rights. The Digital Markets Act aims at ensuring that markets where large online platforms operate (so-called "gatekeepers") remain fair, open and contestable. Both proposals also foster innovation, growth and competitiveness in the single market.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Digital Services Act</a> and <a href="#">Digital Markets Act</a> ).	
12)	34. Calls for increased vigour from the Commission to ensure efficient coordination and exchange of information between Member States so as to avoid duplication of procedures and checks for the cross-border provision of services;	The Commission takes note of the Parliament's call for increased vigour from the Commission to ensure efficient coordination and exchange of information between the Member States to avoid duplication of procedures and checks (paragraph 34). While such coordination and information exchange rely heavily on the commitment, mutual trust and concrete actions of the Member States,		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>the Commission continues to facilitate those by all means available, such as the multilingual and cost-free Internal Market Information system (IMI) that supports mandatory administrative cooperation and mutual assistance in line with EU single market law, including the Services Directive and the Professional Qualifications Directive.</p>			
13)	<p>35. Urges the Commission and the Member States to define the structure and modus operandi of the newly created Single Market Enforcement Task Force (SMET), including its practical dimension, and to deliver a schedule of specific actions in line with the priorities set by SMET<sup>15</sup> by establishing a new long term action plan for better implementation and enforcement of single market rules so as to maximise the potential of the single market for services; [...]</p>	<p>In this context, the Commission welcomes the Parliament's support of the Single Market Enforcement Task-Force (SMET). Composed of the Member States and the Commission, SMET was set up to assess the state of compliance of national law with the single market rules, to prioritise the most pressing barriers and to tackle horizontal enforcement problems. When it comes to the structure, modus operandi, actions and transparency of SMET (paragraph 35), the role of SMET is clearly defined in the Single market enforcement action plan. SMET has approved its Terms of Reference and has agreed to its work programme for the coming months, which is based on three pillars: (1) abolishing the remaining COVID-19 related barriers; (2) addressing priority barriers identified by the Member States and the Commission; (3) reinforcing the single market to support the recovery, based on an industrial ecosystems approach. Since the onset of the pandemic, SMET has successfully helped to address issues concerning the removal of COVID-19 related barriers that hampered the correct functioning of the single market, including when it comes to border controls and export restrictions affecting service providers. As indicated in the Single market enforcement action plan, SMET will regularly inform the Internal Market and Consumer Protection Committee and the Competitiveness Council</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p> <p>Single Market Task Force (SMET), <a href="#">website</a>.</p>

		of its work. Furthermore, the Commission will set up a SMET web page with information on its meetings and actions.			
14)	39. Recommends that the Commission and the Member States systematically provide user-friendly information via the single digital gateway on all new EU legislation that creates rights or obligations for consumers and businesses; recommends that for this purpose, the Commission and the Member States frequently consult with stakeholders; highlights that transparency, equal treatment and non-discrimination are essential to the free movement of services;	The Commission welcomes the Parliament's support for the single digital gateway and the related requests put forward in the resolution. When it comes to user-friendly information and consulting with stakeholders in this context (paragraph 39), the single digital gateway launched in December 2020 provides access to information on rights, rules and procedures as well as a number of relevant assistance services. As part of this, the points of single contact (PSCs) are well integrated in the gateway. The gateway was designed to respond to the needs of consumers and SMEs, who are the most active actors in the single market. The user data collection systems and user feedback tools allowing users to state their preferences will enable the Commission services to improve the existing offer so that the gateway responds to the real needs of citizens and businesses.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">single digital gateway</a> ).	
15)	40. Notes that the Member States need to ensure that all feasible administrative procedures regarding company establishment and freedom to provide services can be completed in a digital environment in accordance with Single Digital Gateway Regulation; urges the Member States to speed up their digitalisation work, especially for procedures that affect businesses and consumers, to enable them to conduct administrative procedures remotely and online; urges the Commission to redouble the efforts of	No specific reply is provided to this particular point. 	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	<p>48. Calls on the Commission and the Member States to promote the use of digital tools and on the Member States to provide labour inspectorates with sufficient resources to tackle all forms of abuse; calls on the Commission to propose an initiative for an EU social security number, which would provide legal certainty for workers and businesses, while effectively controlling subcontracting practices and combatting social fraud, such as bogus self-employment and posting and letterbox companies; calls, furthermore, on the Member States to ensure that the checks carried out are proportionate, justified and non-discriminatory; urges the Commission to make the ELA fully operational as soon as possible to ensure better coordination between the national labour inspectorates and to tackle cross-border social dumping;</p>		<p>In relation to tackling abuse and fraud, and issues related to social security coordination (paragraph 48), the Commission is working on many fronts. The Commission launched a proposal in 2016 to revise the European rules on social security coordination with the aim of ensuring that the rules remain fair, clear and easier to enforce. The proposal updates and safeguards the rights of citizens moving to another EU country and facilitates the cooperation between national authorities. In particular, the new rules will strengthen the administrative tools related to the social security coordination of posted workers, to ensure that national authorities have adequate means to verify the social security status of such workers and to address potentially unfair practices or abuses. Furthermore, during the ongoing negotiations, appropriate means to combat letterbox companies are being discussed.</p> <p>The Commission is also exploring different technical and policy options for a possible initiative to digitise the cross-border verification of social security coverage and address challenges in citizens' identification for social security coordination purposes (paragraph 48). The Commission will consider the next steps based on the data gathered on the technological options.</p> <p>During its build-up phase, the European Labour Authority (ELA) (paragraph 48) has focused on coordinate and support joint and concerted labour inspections as well as on the provision of information to individuals, employers and social partner organisations. ELA has developed the</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">single digital gateway regulation</a>).</p> <p>EU Social Security Coordination, <a href="#">website</a>.</p> <p>European Labour Authority, <a href="#">website</a>.</p> <p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was be carried out.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>necessary tools and procedures to facilitate inspections, in close cooperation with national labour enforcement authorities, social partner organisations and other stakeholders. Moreover, the European Platform tackling undeclared work that will soon be integrated into ELA has produced substantial recommendations on how to fight letterbox companies and combat bogus self-employment. On the issue of subcontracting, ELA supports cross-border cooperation between competent enforcement authorities with a view to tackling possible abuse in this area. Finally, the posting of workers enforcement Directive (2014/67/EC) foresees measures to tackle fraud and abuse in subcontracting chains in the context of posting specifically.</p>			
20)	<p>49. Urges the Commission to ensure that any new directives, regulations, or recommendations concerning the single market for services include a requirement to strengthen the points of single contact in their functions and devote adequate resources to fulfil possible additional functions in the framework of the Services Directive without prejudice to the allocation of functions and powers among the authorities within national systems;</p>	<p>Although the follow-up does not mention par 49, the reply states that the single digital gateway launched in December 2020 provides access to information on rights, rules and procedures as well as a number of relevant assistance services. As part of this, the points of single contact (PSCs) are well integrated in the gateway.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>Single Digital Gateway, <a href="#">website</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
21)	50. Supports the Commission's preliminary initiative to update the single market scoreboard with a new set of indicators with which to evaluate Member State implementation of relevant single market legislation; encourages the Commission to supplement the data published with relevant data arising from IMI, SOLVIT, the CHAP central complaints registry and other relevant resources; underlines that there should be a focus on the quality of the implementation;	Key indicators on the performance of the Internal Market Information system (IMI) and of the Member States when using this system are included in the Scoreboard (paragraph 50). The Commission is in close dialogue with stakeholders and the Member States on the evolution of Scoreboard.		No further/specific actions proposed/promised to be taken by the Commission.	
22)	52. Urges the Commission to adopt a quantitative and qualitative evaluation method involving all relevant stakeholders encompassing in particular the general interest objectives and the quality of the service provided; [...]	No specific reply is provided to this particular point. (on adopting a quantitative and qualitative evaluation method involving all relevant stakeholders).		Not mentioned.	
23)	53. Recommends that an updated single market scoreboard links the quality of implementation with existing restrictiveness indicators, and maps restrictions on services in new and existing policy fields and the differing levels of implementation and enforcement of EU legislation; recommends further that the European Semester is also utilised to strengthen the single market, as the removal of the most problematic regulatory and administrative burdens is an ongoing concern; encourages the Commission to include the mid-term activities of the Member States which aim to further remove the remaining administrative and regulatory barriers in the single market for services when presenting country-specific recommendations;	No specific reply is provided to this particular point (on including mid-term activities).		Not mentioned.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	55. Invites the Commission to update existing indicators and introduce new indicators that help Member States to identify where efforts could be made to improve their policy results, and monitor their efforts in reducing restrictions;		As far as indicators are concerned (paragraph 55), the Commission is planning to update in 2021 the Retail Restrictiveness Indicator that measures Member States' efforts to reduce retail restrictions and the impact of such reforms. The Commission is also updating the restrictiveness indicator for professional services in the context of the planned update of the 2017 recommendations for reforms in existing regulation of professional services.		No update found on the Retail Restrictiveness Indicator.  <a href="#">Roadmap</a> on Regulation of professional services - update of reform recommendations to Member States  Communication on taking stock of and updating the reform recommendations for regulation in professional services of 2017 <a href="#">COM/2021/385 final</a> .	
25)	56. Urges the Member States to set annual national targets for opening up the services trade and carry out evaluations in this regard; recommends that the Commission utilise the single market scoreboard to demonstrate the openness of the services trade in the Member States, as exemplified in the European innovation scoreboard, as this would enable the Member States to make credible, concrete and measurable commitments to improve their implementation and enforcement performance in the area of intra-EU services trade;		Regarding the Single Market Scoreboard (paragraphs 31 and 56), the Commission agrees on the need for an updated Single Market Scoreboard that would better reflect the real situation for users on the ground and would provide a more comprehensive Member States' performance assessment. The Commission is currently working towards reinforcing how the services dimension of the single market is reflected in the Scoreboard. The Commission plans to expand the scope of the Scoreboard by adding new areas to monitor and to add qualitative information within existing sections, where needed and possible.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was be carried out.	

4.1.18.4. IMCO Resolution 4: EP resolution of 10 March 2021 on implementation of the Construction Products Regulation

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Implementation of the Construction Products Regulation</b>		10/03/2021 <a href="#">T9-074/2021</a> <a href="#">2020/2028(INI)</a> <b>IMCO</b>	<a href="#">SP(2021)361</a>	Final reply (SP) received 3 August 2021	Mixed reply		
1)	5. [...] calls on the Commission, to that end, to ensure the active involvement of the industry and relevant stakeholders in order to ensure that new standards are as relevant as possible;	The CPR acquis process replies both to the call for an active involvement of industry and relevant stakeholders and for an active participation of the Member States in the standardisation process. By means of a technical dialogue with the Member States' experts and stakeholders on each product area, the Commission intends to reduce the gap between the regulatory needs of the Member States and the ones of the industry. The Commission will coordinate the process and will ensure high technical and legal quality of the deliverables.				The general nature of the commitment's wording makes it unclear to what extent the action(s) was to be carried out.	
2)	8. Urgently calls on the Commission to find a quick and viable solution to improve standardisation processes and remove the backlog of non-cited standards;	The Commission continues to recognise the importance of the public-private partnership between the Commission and the European Standardisation Organisations, as well as of the engagement of the Member States, the industry and other relevant stakeholders in the standardisation process. With regard to standards for construction, the Commission has identified short- and long-term measures to address the situation.  Despite efforts to define short-term solutions, most of the issues affecting the standardisation system in the construction sector remain unresolved. For these reasons, the Commission has also envisaged long-term measures.  The core measure is the upcoming revision of the CPR, complemented by the review of the CPR acquis (i.e. harmonised technical specifications and collateral legal acts) to trigger a substantial change of the situation. The Commission started work on the process of reviewing the				<a href="#">Ongoing revision</a> of Construction Product Regulation (CPR) mentioned in CWP 2021 and <a href="#">postponed to 2022</a> .  <a href="#">Harmonised standards, CPR.</a>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>CPR acquis as of early 2020. This process, aiming at preparing the content of future draft standardisation requests or technical specifications, will be needed independently from the final provisions of the revised CPR.</p> <p>The CPR acquis process, together with the CPR revision, are also expected to contribute to better targeting the European Organisation for Technical Assessment (EOTA) route at innovative products only, while other products currently covered by the EADs may be eligible for becoming covered through standardisation.</p>			
3)	<p>9. [...] calls on the Commission to closely consult with all the relevant stakeholders during the preparatory phase, in line with the Standardisation Regulation, and stresses the importance of balanced representation and of transparency and openness of all parties involved in order to find workable solutions; highlights the need to ensure that the standardisation requests issued by the Commission are of high quality and the necessity to provide clear and pragmatic guidance;</p> <p>[...]</p> <p>encourages the Commission to develop comprehensive and horizontal guidelines for standardisation bodies outlining the structure and requirements of a requested standard;</p>	<p>On the importance of stakeholders' engagement, the Commission wishes to recall that the review process of the CPR was initiated in 2017 and has ensured a proper involvement of all stakeholders ever since. A significant number of studies and wide stakeholders' consultation led to the publication of the evaluation of the CPR<sup>16</sup> on 24 October 2019, dedicated to examining how the CPR has functioned and delivered so far. Further consultation activities have taken place afterwards, including an informal consultation on the Options paper<sup>17</sup>, a survey among the companies in the construction sector and an intensified dialogue with the Member States, the European Parliament and the industry. An open public consultation took place between August and December 2020.</p> <p>The Commission values the feedback and inputs received from the stakeholders and the proposal for a revision of the CPR, planned for end of 2021, will take due account of the results of all studies and consultations.</p>		<p><a href="#">Ongoing revision</a> of Construction Product Regulation (CPR) mentioned in CWP 2021 and <a href="#">postponed to 2022</a>. <a href="#">Initial roadmap</a> and <a href="#">revised roadmap</a> of CPR revision, including the open public consultation.</p>

4)	10. calls on the Commission to further support and simplify the financial arrangements for the translation of harmonised standards;	No specific reply is provided to this particular point (on translation of harmonised standards).		Not mentioned.	
5)	17. Calls on the Commission to consider and thoroughly assess the possibility of gradually enhancing the CPR by including therein additional information obligations and product performance requirements with regard to health, safety and environmental aspects following an impact assessment and the assessment of Union and Member States' regulatory needs for each product category; calls on the Commission, furthermore, to evaluate which approach would prove to be effective for the CPR;	<p>The Commission values the feedback and inputs received from the stakeholders and the proposal for a revision of the CPR, planned for end of 2021, will take due account of the results of all studies and consultations.</p> <p>In this context, the impact assessment for the revision will analyse different possible regulatory choices and careful consideration will be given to the costs of different options for the stakeholders concerned, including industry and more particularly SMEs.</p> <p>Regardless of the option considered in the end as the most effective one for the proposed revision, the European Commission will strive to employ all the appropriate measures necessary to ensure a smooth transition process between the current system and the new system to be put in place. These shall guarantee continuity for all stakeholders concerned and reduce adaptation costs to a minimum.</p>		<a href="#">Ongoing revision</a> of Construction Product Regulation (CPR) mentioned in CWP 2021 and <a href="#">postponed to 2022</a> .	
6)	18. [...] calls on the Commission to evaluate the benefits of using such technologies and to develop solutions towards the smart integration of existing data that can be utilised throughout different information systems;	With regard to the importance of digital technologies, the Commission considers that the limited use of digital technologies has repercussions in all the phases of the life cycle of construction products, from the manufacturing to the use at the end of life of the products. The Commission is aware of this shortcoming and considers addressing this issue in the context of the CPR revision. The aim is to allow for as much compatibility as possible of data provided under the CPR (Declaration of Performance) with other instruments currently under development, like the digital logbook for buildings <sup>18</sup> or the assessment scheme for		<a href="#">Ongoing revision</a> of Construction Product Regulation (CPR) mentioned in CWP 2021 and <a href="#">postponed to 2022</a> .	

<sup>18</sup> [https://ec.europa.eu/growth/content/study-developing-eu-framework-digital-logbook-buildings\\_en](https://ec.europa.eu/growth/content/study-developing-eu-framework-digital-logbook-buildings_en).

		sustainable buildings <sup>19</sup> ("Level(s)"). This would facilitate the use of one single dataset for these different instruments for all relevant stakeholders. In this context, the importance of appropriate training for the users of these instruments needs to be emphasised.			
7)	24. Calls on the Commission to swiftly adopt implementing acts under Regulation (EU) 2019/1020 in order to further align the performance of market surveillance authorities by determining the uniform conditions of checks, criteria for the determination of the frequency of checks and the amount of samples to be checked in relation to certain products or categories of products, and by laying down benchmarks and techniques for checks on harmonised products, taking due account of the specificities of the sectors involved, including construction products, and of the impact on a reviewed CPR;	No specific reply is provided to this particular point (on swift adoption of adoption implementing acts under Regulation (EU) 2019/1020).		Not mentioned.	
8)	30. Calls on the Commission to continue to effectively monitor and address unjustified barriers in the internal market stemming from national regulatory measures;	Considering the European Parliament's observations regarding market surveillance, the Commission recognises these challenges that have also been previously identified in its own evaluation of the CPR <sup>20</sup> . The Commission wishes to recall that some initiatives aimed at improving the situation have been launched under the new Market Surveillance Regulation <sup>21</sup> . These initiatives cover also market surveillance authorities under the CPR and will already trigger some improvements. The European Commission also refers to the		<a href="#">Ongoing revision</a> of Construction Product Regulation (CPR) mentioned in CWP 2021 and <a href="#">postponed to 2022</a> .

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>measures envisaged in the framework of the so-called Options paper<sup>22</sup>, which was the basis for various surveys and the latest public consultation. The Options paper, dated early 2020, encompasses already a majority of measures suggested by the European Parliament within the remit of the CPR and some more. Whilst it cannot be assessed at this point in time which measures will finally be retained, the Commission notes the vast alignment of views. However, the Commission also notes a difference with regard to the particular importance the European Parliament attributes to online sales. Contrary to other sectors, online sales constitute currently only a marginal fraction for construction products, although that fraction might well increase in the future. Therefore, our efforts to strengthen market surveillance in the area of CPR are equally focused on online and offline sales.</p>			
9)	<p>33. Calls on the Commission to envisage incorporating certain requirements regarding environmental performance and sustainability criteria across the lifecycle of products into the harmonised standards for specific product categories under the CPR, while taking account of market and technological developments and national regulatory requirements for the construction sector or buildings policies, in order to provide manufacturers with one single framework for the assessment and testing of products where relevant common compliance requirements arise;</p>		<p>The Commission welcomes again the support of the European Parliament for the ideas on how to materialise the green transition for construction products, as already outlined in the above-mentioned Options paper<sup>23</sup>. This applies in particular to the wish of the European Parliament to establish “one single framework for the assessment and testing of products” and “making more consistent the legislation on construction products with horizontal environmental policies”. The Commission is indeed committed to pursue these objectives. The same goes for the goal of increasing re-use, remanufacturing, and recycling, where in line with the ambitions of the Circular</p>		<p><a href="#">Ongoing revision</a> of Construction Product Regulation (CPR) mentioned in CWP 2021 and <a href="#">postponed to 2022</a>.</p> <p>See also Commission Communication on the Circular Economy Action Plan <a href="#">COM(2020)98</a>.</p>

		always respect the goal of ensuring safety, which is also very much emphasised by the Member States.			
11)	36. [...] calls on the Commission, therefore, to clarify the relationship of the CPR to related internal market legislation, such as the Ecodesign Directive <sup>27</sup> , the Energy Labelling Regulation <sup>28</sup> , the Waste Framework Directive <sup>29</sup> and the Drinking Water Directive <sup>30</sup> in order to avoid possible overlaps and, where necessary, to streamline the relevant provisions in order to ensure legal clarity for businesses;	This applies in particular to the wish of the European Parliament to establish “one single framework for the assessment and testing of products” and “making more consistent the legislation on construction products with horizontal environmental policies”.		Ongoing revisions of Ecodesign Directive, the Energy Labelling Regulation mentioned in <a href="#">CWP 2021</a> and <a href="#">postponed to 2022</a> . The revision of the Waste Framework Directive is planned in the <a href="#">CWP 2022</a> .	
12)	39. Is concerned that any revision of the CPR and, in particular, the review of the CPR <i>acquis</i> will take significant time, while manufacturers, builders, contractors, planners, architects and other end-users need immediate solutions to overcome the legal uncertainty resulting from, among other issues, the lack of updated harmonised standards and regulatory gaps; calls on the Commission to address these issues as part of its expected review of the CPR, including devising a solution to get to grips with the urgent legal and technical challenges;	The CPR <i>acquis</i> process, together with the CPR revision, are also expected to contribute to better targeting the European Organisation for Technical Assessment (EOTA) route at innovative products only, while other products currently covered by the EADs may be eligible for becoming covered through standardisation.  The Commission expects the CPR revision to address this ambiguity. In addition, to ensure that the technical specifications are useful for the end-users e.g. designers, contractors, building managers, authorities and occupants, additional information and guidance (on safety, on installation, on maintenance, etc.) are needed. The CPR <i>acquis</i> process is already addressing the issue of missing information and national regulatory requirements. This depends significantly on the cooperation of the Member States’ authorities with a view to improving the quantity and		<a href="#">Ongoing revision</a> of the Construction Product Regulation (CPR) mentioned in <a href="#">CWP 2021</a> and <a href="#">postponed to 2022</a> .

		quality of information on their requirements, their professional input in the requests for technical specifications and finally in the assessment of the draft final technical specifications for construction products. Nevertheless, a revision of the CPR is necessary to include these aspects in future harmonised technical specifications.			

4.1.18.5. IMCO Resolution 5: EP resolution of 25 March 2021 on the implementation of Directive 2009/81/EC, concerning procurement in the fields of defence and security, and of Directive 2009/43/EC, concerning the transfer of defence-related products

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<p><b>The implementation of Directive 2009/81/EC, concerning procurement in the fields of defence and security, and of Directive 2009/43/EC, concerning the transfer of defence-related products</b></p>	<p>25/03/2021 <a href="#">T9-0102/2021</a> <a href="#">2019/2204(INI)</a> <a href="#">IMCO</a></p>	<p><a href="#">SP(2021)409</a></p>	<p>Final reply (SP) received 1 September 2021</p>	<p>Mixed reply</p>			
<p>1)</p>	<p>6. Recalls the Commission’s interpretative guidance as to the conditions under which Article 346 TFEU can be invoked in the field of defence procurement, which aims to prevent potentially abusive recourse to, misuse and misinterpretation of this provision by the Member States; calls on the Member States to strictly follow the Commission’s interpretative guidance and asks the Commission to ensure that it is implemented and enforced consistently;</p>	<p>The resolution states that a revision of the Defence Procurement and Transfers Directives is not necessary but rather emphasises the importance of the correct implementation of the existing regulatory framework. In this respect, it calls on the Commission to ensure the effective enforcement of the directives, and in particular to address abusive use of exemptions and offset requirements in defence procurement (points 6, 7, 11 and 27). The Commission is fully committed to ensure a uniform application of the directives, with a continuous monitoring and a proactive enforcement approach to prevent the misuse of exemptions in defence procurement. The Commission will continue to monitor the implementation of the Defence Procurement Directive and step up its enforcement efforts, including by initiating <i>ex officio</i> proceedings, <i>i.e.</i> in the absence of complaints from industry, as it has already done in the past.</p>				<p>The general nature of the commitment’s wording makes it unclear to what extent the action(s) was carried out. European Commission Defence Procurement <a href="#">website</a>.</p>	
<p>2)</p>	<p>7. [...] urges the Commission, therefore, to step up its efforts and take bold and proactive measures to prevent the misuse of exceptions</p>	<p>The resolution states that a revision of the Defence Procurement and Transfers Directives is not necessary but rather emphasises the importance of the correct</p>				<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and adopt a more assertive enforcement policy, in particular by ensuring the effectiveness of infringement procedures;	implementation of the existing regulatory framework. In this respect, it calls on the Commission to ensure the effective enforcement of the directives, and in particular to address abusive use of exemptions and offset requirements in defence procurement (points 6, 7, 11 and 27). The Commission is fully committed to ensure a uniform application of the directives, with a continuous monitoring and a proactive enforcement approach to prevent the misuse of exemptions in defence procurement. The Commission will continue to monitor the implementation of the Defence Procurement Directive and step up its enforcement efforts, including by initiating <i>ex officio</i> proceedings, <i>i.e.</i> in the absence of complaints from industry, as it has already done in the past.		according to the Commission, it has been already working on action falling under the scope of the EP request. European Commission Defence Procurement <a href="#">website</a> .	
3)	11. Calls, therefore, on the Commission to monitor the implementation of the directives, to improve their transparency and provide guidance to the Member States in order to ensure their consistent and full enforcement and therefore fully achieve their objectives, as the lack of reciprocity could disincentive Member States with a higher degree of implementation;	The resolution states that a revision of the Defence Procurement and Transfers Directives is not necessary but rather emphasises the importance of the correct implementation of the existing regulatory framework. In this respect, it calls on the Commission to ensure the effective enforcement of the directives, and in particular to address abusive use of exemptions and offset requirements in defence procurement (points 6, 7, 11 and 27). The Commission is fully committed to ensure a uniform application of the directives, with a continuous monitoring and a proactive enforcement approach to prevent the misuse of exemptions in defence procurement. The Commission will continue to monitor the implementation of the Defence Procurement Directive and step up its enforcement efforts, including by initiating <i>ex officio</i> proceedings, <i>i.e.</i> in the absence of complaints from industry, as it has already done in the past. [...]		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		The Commission will pursue its efforts to provide support and guidance to the Member States in their implementation of the directives as recommended by the resolution (points 8 and 11), including by assessing the need to develop new guidance notices or recommendations, in particular through the work in the framework of the Commission Expert Groups on Defence and Security Procurement and EU Transfers of Defence-related Products.			
4)	17. Calls on the Commission to improve the Transfers Directive's implementation in individual Member States by insisting that national authorities resolve outstanding issues;	The Commission is however, convinced that a significant potential for improving the implementation of the Defence Transfers Directive (point 17) [...] can be achieved through the constant work with the Member States in the framework of the Expert Group on the EU Transfers of Defence-related Products by sharing the difficulties encountered and best practices (point 42), and through the provision of guidance from the Commission. This is without prejudice to the possibility for the Commission to take the appropriate actions in cases where the legally binding obligations stemming from the Transfers Directive are not respected.		No further/specific actions proposed/promised to be taken by the Commission.	
5)	19. Calls on the Member States to take due account of the Commission recommendations on the scope of application and conditions of GTLs and to avoid adding conditions for transfers under GTLs, which would contradict or undermine the conditions listed in the recommendations; underlines the need to provide translations of national transfer licence regulations, at least in English; calls on the	As stressed in point 19 of the resolution, but also in the supporting study by the EPRS (European Parliamentary Research Service) <sup>31</sup> , the implementation of the European Defence Fund (EDF) provides a key opportunity to mobilise the instruments foreseen by the Defence Transfers Directive. The Fund will support collaborative defence R&D projects with strong incentives for cross-border participation of SMEs and mid-caps at all tiers of the supply		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (EDF).	

<sup>31</sup> EU Defence Package: Defence Procurement and Intra-Community Transfers Directives (19 October 2020). [https://www.europarl.europa.eu/thinktank/en/document.html?reference=EPRS\\_STU\(2020\)654171](https://www.europarl.europa.eu/thinktank/en/document.html?reference=EPRS_STU(2020)654171)

	Commission to fully support and assist Member States in developing harmonised global and individual transfer licences for EDIDP and EDF projects;	chain. The smooth implementation of supported cooperative projects can greatly benefit from the simplification of intra-EU transfers that the directive enables. In relation to this, the Commission stands ready to assist the Member States in developing and deploying exemptions, GTLs and global transfer licences for projects supported by the EDF (point 19) and will propose to discuss this topic in the Expert Group on EU Transfers of Defence-related Products in order to assess the added value and feasibility of such mechanisms. Following point 40 of the resolution on the limited application of the certification scheme, the Commission will also explore how to promote the use of GTLs for certified recipients in collaboration with the dedicated Expert group, notably while assessing the added value and feasibility of developing GTLs and global transfer licences for projects supported by the EDF.			
6)	21. Calls on the Commission to make the follow-up to the recommendations on the scope of application and conditions of GTLs a priority, including by considering the possibility of converting the recommendations into binding provisions, with a view to a progressive harmonisation as an overarching objective for the coming years;	The Commission shares the view of the European Parliament that the Defence Transfers Directive has only partially achieved its main objectives (point 14). To follow up on the recommendations on the scope of application and conditions of GTLs (point 21), the Commission is currently monitoring and assessing the progress of the Member States in the implementation of GTLs and in the harmonisation of their scope of application and conditions, in light of the different recommendations.		EU transfers of defence-related products, Commission <a href="#">website</a> includes links to the evaluation report and EC recommendations.	
7)	22. Calls on the Commission and the Member States to increase efforts in raising awareness of the Transfer Directive's tools and benefits, in particular among SMEs;	In relation to the call to increase awareness of the Transfer Directive's tools and benefits, in particular among SMEs (point 22), the Commission has recently published a Handbook <sup>32</sup> on the Transfers Directive specifically targeted to SMEs, to help them reaping the full benefits of the		On 10th May 2021, the Commission published <a href="#">Defence Transfers Directive Handbook for SMEs</a> .	

<sup>32</sup> The Defence Transfers Directive Handbook for SMEs (europa.eu).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		opportunities provided by this directive. The Handbook will convey concrete recommendations and will outline, through practical examples, how SMEs can approach the different processes foreseen by the directive, to make procedures less burdensome.			
8)	24. Calls on the Commission and Member States to improve the quality, transparency, consistency and availability of data and consider the creation of dedicated statistical classification codes in order to facilitate the monitoring of the implementation of these two directives and provide meaningful scrutiny;	<p>As highlighted in point 24 of the resolution, the Commission agrees that the current very limited availability of data, including quantitative data, is an issue to monitor adequately developments in the EU defence market and industry. Beyond the issue of data sensitivity inherent to the defence sector, the Commission acknowledges that the EU statistical apparatus does not allow distinguishing well defence economic activities from other economic activities (point 24). Consequently, the Commission agrees that statistical classifications need to be updated regularly to accommodate new needs for, e.g. economic or social analysis. A general characteristic of clarifications is that they should be clear and should be able to shed light on the underlying economic (or social) phenomena. The Commission is currently updating the NACE classification used to classify enterprises by economic activities and the related CPA product classification. A particular issue in the area of defence is that many enterprises are engaged in activities where the outputs (products) could be used for both defence and civilian purposes. The Commission is engaged with the National Statistical Institutes to assess if changes in the classifications on activities and products could facilitate the monitoring of the defence industry. It should be underlined that it will take several years before the first statistics using the revised NACE/CPA will become available.</p> <p>The Commission is also exploring with the Member States' experts possible ways to improve the quality and availability of data on defence procurement, in particular on</p>		<p><a href="#">NACE/CPA classification.</a></p>

11)	34. Calls on the Commission to continue its work and thoroughly examine the causes behind the lack of SME participation;	<p>With the particular aim of increasing the participation of SMEs in the defence industrial sector (point 34), the Commission issued in 2018 a Recommendation on cross-border market access for sub-suppliers and SMEs in the defence sector. As noted in point 30 of the resolution, the implementation of the Recommendation is in the hands of the Members States.</p> <p>The Commission actively seeks to promote cross-border cooperation and enhance SMEs and non-traditional players access to the defence sector by mobilising all available instruments. The European Defence Fund and its pre-cursor programmes (the Preparatory Action on Defence Research and the European Defence Industrial Development Programme) incorporate strong incentives for the inclusion of SMEs, especially in a cross-border context. The first results of the pre-cursor programmes are already very encouraging and show a high-level of cross-border cooperation and SME participation.</p> <p>The Commission will further reinforce its efforts to support the inclusion of SMEs. In particular, one of the key actions included in the SME Strategy adopted by the Commission in 2020<sup>34</sup> states that “The Commission will facilitate cross-border cooperation with and among SMEs under the European Defence Fund and map strengths in its research and innovation eco-system”. In addition to the strong incentives already embedded in the EDF Regulation, this will also include calls for proposals targeted at SMEs and initiatives to connect SMEs with the wider defence community.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p> <p>On 10th May 2021, the Commission published <a href="#">Defence Transfers Directive Handbook for SMEs</a>.</p>

## 4.1.18.6. IMCO Resolution 6: EP resolution of 20 May 2021 on digital future of Europe: digital single market and use of AI for European consumers

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Digital future of Europe: digital single market and use of AI for European consumers</b>	20/05/2021 <a href="#">T9-261/2021</a> <a href="#">2020/2216(INI)</a> IMCO	<a href="#">SP(2021)538</a>	Final reply (SP) received 9 November 2021	Specific reply		
1)	6. Calls on the Commission to promote and support the uptake and development of sustainable technology in the realisation of the Green Deal including by assessing the environmental impact of data sharing and the infrastructures required to ensure a sustainable digital deployment;	Concerning point 6, the Commission set out its views on the matter in its Digital Strategy and in the Digital Decade Communication. In particular, the Digital Strategy announced 'initiatives to achieve climate-neutral, highly energy-efficient and sustainable data centres by no later than 2030'. To meet this goal, the Commission will rely on a mix of existing instruments, including the Ecodesign Regulation on servers and data storage products ((EU) 2019/424), the EU Code of Conduct on Data Centre Energy Efficiency, the EU Green Public Procurement criteria for data centres, server rooms and cloud services. As part of the 'Fit for 55' package, the Commission proposed to revise the Energy Efficiency Directive (2012/27/EU), which aims to set measures for the recovery of waste heat, strengthen the provisions for the energy management and energy audits by large energy consumers like data centres and propose a scheme for a transparent reporting of the data centres' sustainability. The Commission also adopted a delegated act related to the Taxonomy Regulation ((EU) 020/852), which sets the framework for investments to be qualified as sustainable, covers data centres and is currently subject to the scrutiny of the Parliament and of the Council. Concerning the management of networks and services needs in the context of an integrated energy system, the Communication on an Action Plan on the Digitalisation of the Energy Sector (PLAN/2021/11398) aims at supporting the reduction of the carbon footprint of Information and			No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request:  - <a href="#">Ecodesign Regulation on servers and data storage products (EU) 2019/424</a> . - <a href="#">EU Code of Conduct on Data Centre Energy Efficiency</a> . - <a href="#">EU Green Public Procurement criteria for data centres, server rooms and cloud services, Fit for 55 package</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Communication Technology (ICT) solutions, with measures that increase energy efficiency, reuse waste heat, and promote the use of renewable energy sources. Furthermore, funding from various programmes (Horizon Europe, the Connecting Europe Facility, Digital Europe, InvestEU, the Recovery and Resilience Facility) can also be directed towards the greening of data centres. The Commission is also currently conducting a study to address the lack of commonly accepted definitions and methods to assess the energy-efficiency, climate-neutrality and overall sustainability of data centres. The study will be useful for development of a common measurement framework to assess progress in achieving the Digital Strategy goal of having climate neutral, highly energy-efficient and sustainable data centres by no later than 2030, as well as proposing policy options to meet those goals. AI is also prominent in Clusters 4 ('Digital, Industry and Space'), but also 5 ('Climate, Energy and Mobility') and 6 ('Food, Bioeconomy, Natural Resources, Agriculture and Environment') of the Horizon Europe programme, in ways that can contribute to the Green Deal objectives. The Digital Europe Programme can fund the testing and experimentation of AI-based solutions in sectors such as manufacturing, agri-food, smart cities and communities. Moreover, the funding support from both funding programmes for edge AI developments and optimised AI chips with very low power consumption is expected to contribute to greener AI as well. Finally, as announced in its SME Strategy, the Commission will launch a green tech investment initiative to pool funding from the EU, the Member States and the private sector to increase access to equity finance for innovative SMEs and start-ups that develop and adopt green tech solutions.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	7. Stresses that enabling sharing and access to essential and well-defined data sets will be key to fully unlock the potential of the Green Deal; calls on the Commission to assess which datasets are essential to that purpose;	The Commission fully agrees with the Parliament that the success of the Green Deal relies, inter alia, on the accessibility of interoperable data (point 7). The latter, combined with digital infrastructure (e.g. supercomputers, cloud, ultra-fast networks) and AI solutions, can facilitate evidence-based decisions and the understanding and addressing of environmental challenges. A Common European Green Deal data space, announced by the Data Strategy (COM(2020) 66 final) in February 2020, will use the potential of high-value datasets in support of the Green Deal priority actions on climate change, the circular economy, zero-pollution, biodiversity, deforestation and compliance assurance.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">A Common European Green Deal data space</a> ).	
3)	9. Highlights that the Commission should adopt a balanced, future proofed and evidence based approach to legislation based on the subsidiarity principle that creates a digital single market that ensures the provision of public services, is competitive, fair, accessible, technologically neutral, innovation-friendly, consumer-friendly, human-centric and trustworthy, and that builds a secure data society and economy;	The Commission recognises the need for a balanced, future-proof and evidence-based approach to legislation (point 9). It refers the Parliament to its Communication on Better Regulation (COM(2021) 219), which foresees, among others, a more streamlined, inclusive and simpler consultation system, a 'one in, one out' approach to minimise burdens for citizens and businesses, the mainstreaming of the United Nations Sustainable Development Goals, the improvement of the way in which better regulation addresses and supports sustainability and digital transformation, and the integration of strategic foresight into policymaking.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Communication on Better Regulation (COM(2021) 219)</a> ).	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	12. Calls on the Commission to keep in line with its guiding principles in its future legislative proposals, and to avoid the fragmentation of the digital single market, remove any existing unjustified barriers and unnecessary administrative requirements, support innovation especially for SMEs, and use the appropriate incentives that create a level playing field, and equal access to investment opportunities;		Concerning point 12, the Commission refers the Parliament to the Digital Strategy and the Digital Decade Communication and to its recent proposal for a regulation on a horizontal regulatory framework for AI ('AI Act', COM(2021) 206 final). Its principal objective is to facilitate the protection of safety and fundamental rights of people, and to ensure the proper functioning of the single market by creating harmonised rules for the development and use of trustworthy AI in the Union.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Digital Strategy</a> and the <a href="#">Digital Decade Communication</a> and recent proposal for a regulation on a horizontal regulatory framework for AI ( <a href="#">AI Act</a> ).	
5)	13. Asks the Commission to ensure an effective and efficient enforcement of both current and any new legislative requirements; believes that enforcement needs to work effectively across borders and across sectors, with greater cooperation between authorities, and with due regard for the expertise and relevant competence of each authority; believes that the Commission should provide a guiding framework to ensure coordination for any new regulatory requirements on AI or related fields;		The Communications on 'EU law: Better results through better application' (C(2016) 8600) and on the 'Long term action plan for better implementation and enforcement of single market rules' ('Single Market Action Plan', COM(2020) 94 final) provide the framework for the strategic enforcement policy of EU law (point 13) and a proactive dialogue with the Member States. As stated in the former communication, the Commission believes it important to use its discretionary power in a strategic way to focus and prioritise its enforcement efforts on the most important breaches of EU law affecting the interests of EU citizens and businesses. As stated in the Single Market Action Plan, the Commission agrees with the Parliament that the effective enforcement of single market rules requires collaboration at all levels of governance in the EU, starting from local and regional administrations and courts, all the way up to the European level, and that it is crucial that the Member States and the Commission support each other in their respective roles to live up to their shared responsibility. To strengthen such cooperation, the Commission set up a joint Single Market Enforcement Task-Force in April 2020, which is composed of the Member States and the Commission. As of July 2021, the Task Force had met seven times, the last one		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request: - ' <a href="#">EU law: Better results through better application</a> ' ( <a href="#">C(2016) 8600</a> ), - ' <a href="#">Long term action plan for better implementation and enforcement of single market rules</a> '. - <a href="#">a joint Single Market Enforcement Task-Force</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>in June 2021, where it discussed progress on the work to remove some of the most pressing and long-standing barriers in the single market to ensure its proper functioning in supporting recovery and the digital and green transitions.</p>			
6)	<p>14. Calls on the Commission to aim at both an innovation and consumer friendly regulatory environment, strengthening the financial and institutional support for the European digital economy in close coordination with Member States and stakeholders through measures such as: investing in education, research and development, supporting innovations in Europe, providing increased and broader access to easily readable and interoperable high quality industrial and public data, building digital infrastructure, increasing the general availability of digital skills within the population, promoting technological leadership for the business environment, and creating a proportionate and harmonised regulatory environment;</p>	<p>The Commission agrees with the Parliament on the importance of a regulatory framework and policies that support innovation, consumer protection, and a strong and fair single market for Europe to successfully navigate the digital transformation (point 14), in line with better regulation principles. In this respect, it refers the Parliament to the Digital Decade Communication, the Digital Strategy and the Data Strategy, as well as to the proposed Digital Services Act and the proposal for an AI Act.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Digital Strategy</a> and <a href="#">Digital Decade Communication</a>, <a href="#">Digital Services Act</a> and recent proposal for a regulation on a horizontal regulatory framework for AI (<a href="#">AI Act</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	18. Calls on the Commission to ensure wider coordination of investment in the NextGenerationEU recovery plan; calls on the Commission to propose concrete actions within this plan to support high impact technologies and infrastructure in the EU such as artificial intelligence, high performance computing, quantum computing, cloud infrastructure, platforms, smart cities, 5G and fibre infrastructure;	The Commission's SME Strategy (COM(2020) 103 final) also supports European SMEs in becoming more digital, including, for example, with the network of European Digital Innovation Hubs (see also under point 18, further below), as well as Digital Crash Courses for SME employees and a 'digital volunteers' programme matching young skilled people and experienced seniors. Concerning the call for a 'fitness check', the Commission already systematically reviews how newly proposed legislation affects SMEs. This review, referred to as 'the SME test', is mandatory for all impact assessment processes that precede legislative proposals.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  See also: Revision of the European Commission Better Regulation <a href="#">toolbox and guidelines</a> (tool #23 SME test).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	19. Recalls that SMEs are the backbone of Europe's economy and need special support from EU funding programmes to make the digital transition; Calls on the Commission and the Member States to strengthen their support to start-ups and Micro, Small and Medium Enterprises (MSMEs), via the Single Market Programme, Digital Innovation Hubs and the Recovery and Resilience Facility, in the development and application of digital technologies, in order to further drive digital transformation and thus enable them to fully develop their digital potential and competitiveness for growth and jobs in Europe;	Concerning the Parliament's call in point 19, the Single Market Programme (Regulation (EU) 2021/690) provides support for the competitiveness and sustainability of enterprises, especially SMEs, including when it comes to their digital transition, as reflected in the first work programme of the SME pillar (C(2021)3046, Annex 2). The Commission will also enhance and upgrade the Enterprise Europe Network including with sustainability and digitalisation services, in collaboration with other support services such as the Network of European Digital Innovation Hubs (see more on this below). The Joint Cluster Initiative will improve industrial ecosystems, boost their resilience and improve technologies and supply chains. Other actions concern tourism SMEs, the EU Built environment and the Single Digital Gateway. In this context, the above-mentioned network of European Digital Innovation Hubs is also relevant. The RRF is also expected to give a major boost to implementing the SME strategy. In this regard, it is worth noting that the Recovery and Resilience Plans assessed and officially endorsed by the Commission until now show that the Member States are dedicating to the digitalisation of businesses, including SMEs, around one fifth of the part of their budgets devoted to the digital transition <sup>38</sup> .		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">Single Market Programme</a> ).  <a href="#">The Joint Cluster Initiative</a>  <a href="#">Enterprise Europe Network</a>	

<sup>38</sup> Based on the methodology for digital tagging set out in Annex VII of the Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility, OJ L 57, 18.2.2021, p. 17–75

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	<p>20. Notes that there is a significant lack of European venture and seed capital, as well as of private equity funding, when compared to other markets; considers that this often leads European start-ups to scale-up in third country markets rather than expanding in the EU; believes that this prevents the wider European economy from gaining as many spill over benefits from ventures originating in Europe; Highlights the disproportionately large role of public entities in the innovation and research funding that currently exists and the significant differences in start-up ecosystems and available financing between Member States; calls on the Commission and the Member States to propose a comprehensive European approach to broaden the sources of capital for technological investments in the EU, including initiatives to support angel investing by European private sector leaders, as well as to ensure facilitate the availability of venture and seed capital for European companies and start-ups;</p>		<p>Furthermore, to address the substantial investment gap for innovative digital start-ups and SMEs in Europe (point 20), the Commission will use the InvestEU Fund to ensure availability of risk capital for early and growth-stage equity investments into European SMEs (including start-ups). The European Commission also developed a dedicated AI and Blockchain Investment Fund, which enhances access to finance in the form of equity, to innovative and higher risk AI and blockchain SMEs and start-ups that develop and deploy innovative AI and blockchain technologies. The total investment volume of the fund is reaching approximately EUR 900 million for 2020/2021 through co-investments from venture capital funds and the European Investment Bank's co-investment facility. This dedicated fund is expected to be scaled-up and broadened in the form of a Strategic Digital Technology Fund for investments in innovative digital start-ups and SMEs that are developing and deploying breakthrough technologies.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests (<a href="#">InvestEU Fund</a>, <a href="#">Blockchain Investment Fund Strategic Digital Technology Fund</a>).</p> <p>See also: Access to investment for SMEs <a href="#">portal</a>.</p>	
10)	<p>21. Underlines that the Digital Europe programme as well as the Horizon Europe and Connecting Europe programmes are necessary to drive the digital transformation of Europe and should receive adequate funding; urges the Commission to ensure that these programmes are deployed as soon as possible; recalls that the Member States must uphold their commitment under the Europe 2020 strategy to invest 3 % of their GDP in research and development;</p>		<p>Concerning point 21, the Commission recalls that it has adopted the work programme of Horizon Europe for the period 2021-2022, for a total of EUR 14.7 billion in funding. It is estimated that 34 % of funds in the presented work programmes, and 35 % of funds across all parts of Horizon Europe, contribute to the digital transition. This equals to overall investments of EUR 8.49 billion during 2021-2022. The overall investment into main digital activities, i.e. the development of core digital technologies, is estimated at EUR 4 billion in the same period. The Commission is also finalising the first work programme for the Digital Europe</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests (<a href="#">Horizon Europe for the period 2021-2022</a>).</p> <p>Digital Europe work programme 2021-2022 <a href="#">C(2021)7914</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		programme and for the Connecting Europe Facility – Digital.			
11)	22. Calls on the Commission to work to position the EU as leader in the adoption and standardisation process for new technologies, ensuring that AI is human-centric and consistent with European values, fundamental rights and norms ; highlights the need to work with standardisation organisations, industry and also with international partners on setting global standards, given the global nature of technology leadership and development; considers the use of CEN Workshops Agreement in specific areas, such as AI and new emerging technologies, as a way to increase efficiency in creating harmonised standards;	As regards global standards (point 22), the Commission will work with international and European standardisation organisations, and has called for cooperation between the various stakeholders and standardisation organisation in the ICT standardisation rolling plan. The Commission agrees with the need of using the different tools existing in the standardisation system, including schemes such as the European Committee for Standardisation (CEN) Workshop Agreements and the European Telecommunications Standards Institute (ETSI) Industry Specification Groups in specific areas when relevant. Furthermore, based on the successful EU acquis on product safety, the proposed AI Act was conceived as a New Legislative Framework legislation. This means that harmonised standards are a key tool for the implementation of the future legislation and contribute to ensure that AI systems are safe and trustworthy.		<a href="#">Roadmap</a> for a European standardisation strategy - EC adoption planned for Q3 2021 <a href="#">postponed to Q1 2022</a> . European Standardisation policy, <a href="#">website</a> .	
12)	25. Notes that in the fulfilment of public services or in the course of public procurement contracts public undertakings generate, collect and process a significant amount of non-personal data, that represents a considerable value for its commercial reuse and benefit for society; encourages the Commission and the Member states to make such data more broadly available for the re-use in the general interest, in the	The Commission also fully agrees with the Parliament on the need of making more data available for re-use for the general interest in Europe, including data generated by public undertakings (point 25). In this regard, the Open Data Directive ((EU) 2019/1024) aims to minimise the risk of data lock-in in the case of public-private agreements concerning public sector data. An implementing regulation planned for 2021 is intended to further contribute to unleashing the socio-economic potential of data as public good by defining the list of specific high-value datasets		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">Open Data Directive</a> ((EU) 2019/1024)).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	furtherance of the objectives of the Open Data Directive;	within six thematic categories (geospatial, earth observation and environment, meteorological, statistics, mobility, and companies). Such datasets will have to be made available for free, in machine-readable formats, via application program interfaces (APIs) and (where relevant) as bulk downloads.		<a href="#">Roadmap</a> of the open data - implementation act planned for 2021, but postponed and still pending.	
13)	30. Welcomes the New Consumer Agenda proposed by the Commission, and encourages the Commission to update consumer protection legislation, where appropriate, to take better account of the impact of new technologies and potential consumer harm, especially for the most vulnerable groups and considering the impact of the COVID-19 pandemic; considers that European consumers should be empowered to play an active role in the digital transition and that consumer trust and the adoption of digital technologies depends on their rights being protected in all circumstances;	Concerning point 30, the Commission will provide more guidance on how the existing EU consumer law framework can be applied to new problematic practices in the digital area by updating the guidance documents on the Unfair Commercial Practices Directive (2005/29/EC) and on the Consumer Rights Directive (2011/83/EU) based on the recent amendments to EU consumer law. The Commission further investigates, including through studies, new practices that raise fairness concerns for consumers and also works on the modernisation of the relevant legislation. For example, the Commission's recent proposal to replace the General Product Safety Directive (2001/95/EC) with a new General Product Safety Regulation also addresses the safety of products linked to new technologies and AI as well as on the challenges posed by the growth of online sales and the role of online marketplaces in the constantly developing supply-chain. The new Commission proposal for a directive on consumer credits also aims at addressing developments brought by digitalisation, including the use		<p><a href="#">Guidance</a> on unfair commercial practices directive adopted in December 2021.</p> <p>Proposal for a regulation on general product safety, amending Regulation (EU) No 1025/2012 of the European Parliament and of the Council, and repealing Council Directive 87/357/EEC and Directive 2001/95/EC of the European Parliament and of the Council, <a href="#">COM(2021)346</a>.</p> <p>Digital Services Act, <a href="#">website</a> and</p> <p>Proposal for a regulation on a Single Market For Digital Services (Digital Services Act) and amending Directive 2000/31/EC, <a href="#">COM (2020)825</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>of automated processing for providing personalised offers to consumers and for creditworthiness assessments. The proposed Digital Services Act is also very relevant in this context, in particular as regards the dissemination of illegal content, including selling dangerous products or infringing consumer protection rules. The Commission's proposals on the Digital Services Act and on the General Product Safety Regulation are fully aligned and are building on each other. The Commission is also working closely with the Member States on the transposition of recent amendments to EU consumer law. The Commission works with the competent national authorities to strengthen their cooperation within the Consumer Protection Cooperation network, and will continue investing in digital enforcement capacities. In the coming years, an e-lab is planned to be set up at EU level (the 'EU eLab'), which should place technologies (software, other tools and devices) at the disposal of national authorities to conduct various investigations, mystery shopping, accessing the offers and interacting with traders' technologies in the same manner as typical consumers.</p> <p>The Commission is also about to deploy a modern digital e-surveillance tool by the end of 2021, which will support market surveillance authorities in their investigations, monitoring and efforts to ensure offers of dangerous products sold online can be effectively removed.</p>		<p>No actions found on the modern digital e-surveillance tool 2021. See the EC <a href="#">website</a> on the implementation of market surveillance in Europe and the EC <a href="#">website</a> on Product Compliance Network.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	31. Recalls that the unjustified geo-blocking of online services constitutes a significant barrier to the Single Market, and an unjustified discrimination between European consumers; notes the Commission's first short-term review of the Geo-blocking Regulation and urges the Commission to continue its assessment, and to engage in stakeholder dialogue taking into account the increasing demand for cross-border access to audiovisual services with a view to fostering circulation of quality content across the EU;	As regards geo-blocking (point 31), the Commission is fully engaged with the national competent authorities with a view to strengthening their cooperation within the Consumer Protection Cooperation network and to provide further guidance. It will also monitor developments with regard to the effects of other measures that aim at facilitating the engagement of traders in cross-border trade, in view of its stocktaking exercise in 2022. As indicated in the Commission's Media and Audiovisual Action Plan (COM(2020) 784 final), in the course of 2021 the Commission will launch a dialogue with the audiovisual sector to agree on concrete steps to improve access to and availability of audiovisual content across borders.		According to Commissioner Thierry Breton, the Commission has launched a dialogue with the audiovisual industry in order to agree on concrete steps to improve the access to and availability of audiovisual content across the EU.  (Answer to Parliamentary Question <a href="#">E-004086/2021</a> ).	
15)	40. Calls on the Commission and the Member States to continuously improve the part of the public administration that will be responsible for implementing future legislation on AI;	With regard to point 40, the Commission refers the Parliament to Article 59 of the proposed AI Act, which provides for, among others, appropriate competence and expertise of national competent authorities as well as regular assessments of their financial and human resources and exchange of experience. Furthermore, the European AI Board, mentioned above, is meant to have an important role in the improvement of the relevant governance framework. It will be supported by the administrative structure of the Commission and an expert group providing additional expertise where required.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	41. Welcomes the Commission's white paper on AI, and calls on the Commission to develop a common EU regulatory framework for AI that is human-centric, risk-based, clear and future-proof; believes this is needed to oversee automated decision making systems and that this should complement existing legislation relevant to AI and ensure it is proportionate according to the level of risk;	The Commission fully recognises the importance of developing a human-centric, risk-based, clear and future-proof EU regulatory framework for AI (point 41) and agrees with the Parliament that the scope and stringency of any regulatory requirements in that regard should be scaled in accordance with the level of risk posed by the AI applications. This approach is reflected in the legislative proposal for the AI Act, which lays down four categories of AI systems according to the level of risk for fundamental rights and safety: (i) certain limited uses of AI systems pose unacceptable risks and shall be prohibited as contravening Union fundamental rights and values, (ii) high-risk AI systems interfering with important aspects of people's lives, which shall be subject to strict requirements related to data and data governance, documentation and record keeping, transparency and provision of information to users, human oversight, robustness, accuracy and cybersecurity, (iii) certain AI systems (e.g. chatbots or emotion recognition systems) that shall be subject to transparency obligations ensuring that persons are informed that they are exposed to an AI system, and (iv) minimal to no risk which is in fact the large majority of AI applications that will be allowed insofar as they are compliant with already applicable legislation, including consumer protection rules. The proposed regulatory framework for AI is capable of responding in a timely manner to the dynamic market and technological developments in the area through the possibility to update certain elements, such as the list of high-risk AI systems, by way of delegated acts on the basis of clear conditions and criteria.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> ).	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	44. Notes that, while to varying degrees, AI is already subject to current European legislation, AI raises new, so far unresolved, legal questions that affect consumers and thus calls on the Commission to issue clear guidance on the functioning and synergy between any current applicable legislation and any proposed new measures in order to fill the existing legal gaps and to achieve a proportionate and consistent legal framework; considers cooperation between Member States to be important to strengthen the digital single market;		The Commission fully agrees with the Parliament that clarity and consistency in the interaction between applicable legislation in force and the proposed new rules is very important (point 44). While the EU has a strong legal framework for product safety and fundamental rights that applies also to AI systems, the specific features of certain AI systems pose challenges to the enforcement of that legislation and create novel risks to safety, security and fundamental rights. The proposal for an AI Act aims to address those challenges with specific requirements for trustworthy AI that are complementary, consistent with existing legislation and facilitating its effective enforcement. The Commission takes note of the Parliament's call on the Commission to issue guidance on the functioning and synergy between any current applicable legislation and the new rules.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> ).	
18)	45. Calls on the Commission and the Member States to ensure close cooperation when enforcing the regulatory framework in order to prevent a fragmented Single Market;		Concerning the need to ensure close cooperation between the Commission and the Member States in the enforcement of the AI Act (point 45), the Commission proposed a coherent governance mechanism and, in particular, the creation of a European AI Board with the purpose to assist the national supervisory authorities and the Commission in ensuring the consistent and effective application of the proposed new rules across the digital single market. The Board is to support the smooth coordination between national supervisory authorities and the Commission and coordinate and contribute to guidance and analysis with regard to matters covered by the proposal (point 13). At the same time, the Member States will be responsible for facilitating the coordination between market surveillance authorities and other relevant national – e.g. sectoral – authorities supervising the application of other Union legislation that may be of relevance to AI.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> , <a href="#">European AI Board</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	47. Points out that the use of self-learning algorithms enables businesses to gain a comprehensive insight about consumer's personal circumstances and behaviour patterns; thus calls on the Commission to comprehensively regulate AI technologies in order to prevent an unfair or abusive use of such systems;	The Commission agrees that the risks posed by certain AI systems that collect data and adapt in real time to the personal needs and preferences of users (point 47) require a comprehensive regulatory approach combining existing and novel legal instruments. It is indispensable that data controllers using such systems implement effectively the GDPR and protect the personal data of natural persons and their fundamental rights. The New Consumer Agenda will further strengthen the rights of consumers, while the proposal for a Digital Services Act aims to enhance the accountability and transparency of digital services and to contribute to a safe online environment. The AI Act proposal is meant to complement these safeguards with specific requirements before high-risk AI systems can be placed on the Union market. The AI Act proposal also envisages the prohibition of a number of unacceptable AI-driven manipulative practices enabled by the vast amount of personal information available, in particular AI systems that use subliminal techniques or exploit vulnerabilities related to age and disabilities in a way that causes or is likely to cause physical or psychological harm.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">New Consumer Agenda</a> , <a href="#">proposal for a Digital Services Act</a> , <a href="#">legislative proposal for an AI Act of 21.04.2021 COM(2021)206</a> ).	
20)	53. Calls on the Commission to promote the exchange of information related to algorithmic systems between the Member States' authorities and to support the development of a common understanding of algorithmic systems in the Single Market by issuing guidance, opinions and expertise;	Regarding point 53, the AI Act proposal sets uniform requirements and obligations for high-risk AI systems that are proposed to be operationalised through harmonised technical standards, thus supporting a common understanding and implementation of the new rules. National authorities responsible for their enforcement will have a new mechanism for cooperation at EU level and exchange of information, with an important role for the new European AI Board as explained above. The Board is also meant to issue recommendations and opinions to the Commission, act as a competence centre that national		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		authorities can consult and support standardisation activities in the area.			
21)	55. [...] calls on the Commission to develop an objective methodology for calculating the risk of harm, in addition to what already by exists in current consumer legislation; [...]	The Commission agrees that the assessment of the risk of harm posed by AI applications should be based on an objective methodology focused on the context, application and specific use of the technology (point 55). Section 5.4.2. of the Impact Assessment (SWD(2021) 84 final) of the proposed AI Act outlines in particular the rationale behind the identification of AI systems to be prohibited or subjected to mandatory requirements and obligations. In addition, Articles 6 and 7 of the proposed AI Act provide for the specific conditions and criteria that shall be fulfilled for an AI system to be classified as high-risk. For the specific case of algorithmic tools used by online platforms, the proposed Digital Services Act includes detailed risk assessment and mitigation obligations for very large online platforms, which pose the highest societal risks, including as regards the design and use of their algorithmic systems. In accordance with the proposal, the obligations shall be monitored through independent audits, public and regulatory oversight, and be subject to dedicated guidelines.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">Impact Assessment (SWD(2021) 84 final), legislative proposal for an AI Act of 21.04.2021 COM(2021)206</a> ).	
22)	59. Calls on the Commission and the Member States to make use of innovative regulatory tools such as ‘regulatory sandboxes’ consistent with the precautionary principle, to help provide a clear path to scale-up for start-ups and small companies; [...]	Welcoming the comments of the Parliament on the importance of innovative regulatory tools such as ‘regulatory sandboxes’ that are conducive to innovation (point 59), the Commission notes that the AI Act proposal provides for common rules for ‘regulatory sandboxes’ implementation as well as for other measures to support small-scale providers and users. As indicated in the revised Coordinated Plan for AI, regulatory sandboxes are an important part of building an ecosystem of trust insofar as it is necessary to design public regulation that will facilitate and not stifle innovation. Other measures such as the		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">revised Coordinated Plan for AI, legislative proposal for an AI Act of 21.04.2021</a> ), <a href="#">European Digital Innovation Hubs, Testing and Experimentation Facilities</a> , and an <a href="#">AI-on-demand platform</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		European Digital Innovation Hubs, Testing and Experimentation Facilities, and the AI-on-demand platform will further contribute to the smooth implementation of the regulatory framework by providing in particular technical and scientific support to providers and notified bodies.			
23)	61. Believes that the use of AI in a high-risk context should be limited to specific purposes, in full respect of the applicable law and subject to transparency obligations; underlines that only a clear and legally certain legislative framework will be decisive for ensuring safety and security, data and consumer protection, public trust and support for the necessity and proportionality of the deployment of such technologies; calls on the Commission to carefully consider whether there are certain use cases, situations or practices for which specific technical standards, including underlying algorithms, should be adopted; deems necessary, should such technical standards be adopted, that these are regularly reviewed by competent authorities and re-evaluated, given the fast pace of technological development;	The elaboration of the Commission's standardisation mandate to European standardisation organisations to produce harmonised standards for the purpose of the AI framework (point 61) will be underpinned by extensive technical analysis regarding standardisation needs in the areas covered by the proposed AI Act. This will also include the identification of priority issues where vertical (use-case specific) standardisation may be necessary. As a general rule, standards are reviewed every five years by standardisation organisations. Moreover, whenever harmonised standards are submitted by the standardisation organisations to the Commission for publication in the Official Journal of the European Union, they are subject to the Commission's legal and technical review. Such review is intended to ensure that the standards produced reflect the contents of the Commission's mandate and they actually satisfy the requirements of the legislation that they claim to cover.		Single Market and standards, <a href="#">website</a> . No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal for an AI Act</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
24)	65. Calls on the Commission to update the existing product safety and liability framework in order to address new challenges posed by emerging digital technologies such as artificial intelligence; and urges the Commission to update inter alia the General Product Safety Directive and the Product Liability Directive, in particular by considering reversing the concept of 'burden of proof' for harm caused by emerging digital technologies, in clearly defined cases and after a proper assessment, and adapting the terms 'product', 'damage' and 'defect' so that they reflect the complexity of emerging technologies, including products with AI, IoT and robotics embedded in them, standalone software and software or updates which entail substantial modification to the product leading to a de facto new product;	The Commission has launched an impact assessment process to assess possible ways of adapting liability rules to the digital age and circular economy (point 65). This will include updating terms and concepts of the Product Liability Directive and an assessment of whether in some cases the characteristics of emerging technologies make it unreasonably difficult for consumers to obtain compensation. With respect to AI in particular, the Commission is also assessing targeted and risk-based adaptations of national liability laws to achieve the objectives set in the White Paper on AI. A public consultation on the revision of the Product Liability Directive and the harmonisation of national liability rules for AI will be launched shortly.		<a href="#">Roadmap</a> for Civil liability – adapting liability rules to the digital age and artificial intelligence, planned for <a href="#">Q3/2022</a> .	
25)	67. Calls on the Commission to assess the development and use of distributed ledger technologies including blockchain, namely smart contracts in the digital single market, and to provide guidance and consider developing an appropriate legal framework in order to ensure legal certainty for businesses and consumers, in particular the question of legality, the enforcement of smart contracts in cross-border situations, and notarisation requirements where applicable;	As already announced in the Commission reply to the Parliament's resolution on 'Digital Services Act: adapting commercial and civil law rules for commercial entities operating online' (P9_TA-PROV (2020)0273), the Commission is committed to analysing and consulting on the use of smart contracts (point 67), with the objective of overcoming obstacles as well as enabling their use across the Member States. In this regard, the Commission is about to launch a study on smart contracts to identify private law related obstacles and to assess how smart contracts can help to exercise consumer rights in the data economy. In parallel, the Commission plans a targeted consultation with stakeholders on smart contracts.  Furthermore, the Commission is working with representatives and technical experts from the Member States, Norway and Liechtenstein under the auspices of the European Blockchain Partnership (EBP) to develop the		<a href="#">Smart contracts and the digital single market through the lens of a "law plus technology" approach</a> , October 2021.  No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">European Blockchain Partnership (EBP)</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		European Blockchain Services Infrastructure, which aims to build a pan-European infrastructure for the delivery of cross border public services and thus provides a testing environment for innovative blockchain solutions. The EBP aims also to establish dialogue between regulators and innovators.			
26)	68. Calls for the plurilateral World Trade Organization (WTO) negotiations on e-commerce to be concluded with a balanced outcome; calls on the Commission to carefully assess the impact of the source code clause currently being discussed in the e-commerce negotiations on future EU AI legislation at WTO level, including its impact on consumer rights, and to involve the European Parliament in this assessment;	The Commission welcomes the Parliament’s support for the World Trade Organization (WTO) negotiations on e-commerce (point 68). Those negotiations remain the EU’s most important strategic objective in this area and the Commission is strongly committed to advancing them towards an ambitious and balanced outcome. The discipline on the protection of software source code is an important tool to fight the rising trend of digital protectionism. It was introduced in response to the practices of certain governments that force foreign businesses to transfer confidential information to the authorities, which in turn might disclose it to local competitors. Also with regard to the proposal for an AI Act, the EU has indeed taken a prudent position in bilateral and WTO e-commerce negotiations in order to preserve the necessary policy space, while at the same being able to address protectionist measures related to digital trade. These include, for example, data localisation and mandatory technology transfer requirements. The WTO negotiations on e-commerce provide the Union with a unique opportunity to tackle these challenges at global level. The Commission believes that the WTO moratorium on electronic transmissions provides much needed certainty to businesses and consumers around the globe and facilitates digital trade. This commitment is also of systemic importance for the WTO and should therefore be maintained. The EU has effectively implemented its tariff schedule under the Information Technology Agreement		EU and WTO, European Commission <a href="#">website</a> News on WTO <a href="#">website</a> (14/12/2021) E-commerce co-convenors welcome substantial progress in negotiations.  No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		(ITA), as approved by all participants in February 2017, and the Commission continues to push for ITA's and Telecommunication Services Reference Paper's full implementation by all current members as well as for its geographical expansion.			
27)	70. [...]; calls on the Commission to continue working with the US, Japan and other like-minded partners on reforming the WTO rules on, inter alia, subsidies, forced technology transfers and state-owned enterprises [...];	Concerning point 70, the Commission welcomes the establishment of the EU-US Trade and Technology Council and will use this forum to pursue a transatlantic AI agreement. The Commission welcomes the support for the work being done with the United States, Japan and other WTO Members to reform the international rules to better address competition distortions caused by state intervention in the economy, such as subsidies, forced technology transfers and state-owned enterprises. The Commission is promoting a plurilateral initiative on Competitive Neutrality as a way to tackle the negative spillovers in a coherent manner.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">Trade and Technology Council</a> , EC <a href="#">website</a> on EU Competition Policy and on <a href="#">Competitive Neutrality</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
28)	71. Urges the Member States to include in their recovery plans projects for the digitalisation of transport; stresses the need to ensure stable and adequate funding for the process of building transport and ICT infrastructure for intelligent transport systems (ITS), including the secure deployment of 5G, the development of the 6G networks and future wireless networks to allow for the full potential of digitalised transport to unfold while ensuring high transport safety standards; stresses in that regard the need to both develop new infrastructure and upgrade existing infrastructure; calls on the Member States to provide safe, resilient, high-quality transport infrastructures facilitating the deployment of connected and automated mobility services; points out that the upgrading of relevant transport and digital infrastructure in the Trans-European Transport Network (TEN-T) needs to be accelerated; calls, therefore, on the Commission to propose mechanisms in its revision of the TEN-T Regulation and the Rail Freight Corridors Regulation to ensure it;	As regards transport (point 71), the digitalisation of infrastructure of all modes is an important element to limit congestion and hence reduce greenhouse gas emissions and pollution in general, as well as and to improve the safety and security of transport. This was recognised in the Sustainable and Smart Mobility Strategy (COM(2020)789), which lays down 19 initiatives to advance smart mobility. The Connecting Europe Facility, the Digital Europe programme and the RRF can also contribute to physical and digital infrastructure projects. Furthermore, the revised Trans-European Transport Network (TEN-T) Regulation that will be proposed by the Commission in 2021, and the updated Technical Specifications for Interoperability will promote digitalisation efforts and measures, for example by accelerating the deployment of the European Railway Traffic Management System (ERTMS) in rail to optimize the use of infrastructure, or by deployment of Intelligent transport systems (ITS) on the TEN-T network. The Commission is proposing that Europe's Rail Joint Undertaking (funded under the Horizon Europe programme) will also develop advanced digitalisation solutions to improve rail performance. The revised Coordinated Plan on AI also sets out, in its section 16, a number of measures to reap the benefits of AI technologies in the transport sector. The Sustainable and Smart Mobility Strategy considers AI as a key enabler for transport automation and digitalisation in all modes and help the transport sector achieve its environmental goals. It can help optimize the planning and conduct of travel, freight and transport operations, allow better prediction and lead to faster and better decisions. Therefore, the strategy announced, under flagship 7 and more particularly action 50, the establishment of an AI roadmap for mobility		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">Sustainable and Smart Mobility Strategy (COM (2020) 789)</a> ), <a href="#">revised Coordinated Plan on AI</a> ),  Proposal for a regulation on Union guidelines for the development of the trans-European transport network, amending Regulation (EU) 2021/1153 and Regulation (EU) No 913/2010 and repealing Regulation (EU) 1315/2013 <a href="#">COM/2021/812 final</a> .	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
29)	72. [...] invites the Commission to explore how to facilitate the balanced development of MaaS, especially in urban areas;		No specific reply provided for this specific point.		Not mentioned.	
30)	80. Calls for a clearer strategy for the European Digital Innovation Hubs in order to promote the widespread uptake of new technologies by SMEs, mid-caps and start-ups; points out that the network of European Digital Innovation Hubs should ensure a broad geographical coverage across Europe, including remote, rural and island areas, as well as initiating cross-sectoral dialogue; Calls on the Commission to draw up an ambitious and comprehensive strategy to support the creation and growth of start-ups with the goal of having a new generation of European digital unicorns within 10 years, in particular, the strategy should look at measures such as tax incentives for start-ups and newly founded SMEs and the introduction of an EU Start-up Visa ;		Welcoming the Parliament’s call for a clear strategy for the European Digital Innovation Hubs (point 80), the Commission notes that the goal of the network of European Digital Innovation Hubs is to have at least one hub per region in working distance from all SMEs in Europe. They should deliver a seamless service within Enterprise Europe Network. European Digital Innovation Hubs will provide services that take into account the specialisation of the region and will also have specific local knowledge and understanding of the local context. Through the network, businesses will also have access to the expertise of other hubs around Europe. The network will be supported by a support action called the Digital Transformation Accelerator. It will ensure matchmaking for needs and demands at the European level and will facilitate sharing of best practices between groups of hubs with similar interests. The Digital Transformation Accelerator can also facilitate cross-sector learning whenever it would be appropriate. Concerning start-ups, the Organisation for Economic Co-operation and Development, mandated by the Commission, completed a first pilot-study in five countries to determine the ingredients for scaling-up. A follow-up study is being considered. This will give better evidence for a fine-tuned start-up and scale-up policy. As the scale-up gap is widening in the EU, as confirmed by different surveys and academic studies, a specific scale-up financing instrument (ESCALAR) was successfully launched in 2020 and this pilot-scheme will be integrated in Invest-EU 2021 – 2027. According to the Survey on the Access to		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests:  - <a href="#">European Digital Innovation Hubs</a> , <a href="#">Enterprise Europe Network</a> , <a href="#">Enterprise Europe Network</a> , <a href="#">ESCALAR</a> , <a href="#">business taxation for the 21st century (COM(2021) 251 final</a> , <a href="#">Recommendation for a carry backward of losses incurred in 2020 and 2021 (C(2021) 3484</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Finance of Enterprises (SAFE) 2020, taxation is not among the most important issues for SMEs. Tax incentives for SMEs, in some cases, are not well targeted to address their concerns and must be properly designed to minimise the risk of tax avoidance. The Commission is aware that some features of tax systems could have an impact on financing decisions, which is relevant for many SMEs. In view of this, the Commission will bring forward a proposal for a measure to address the debt-equity bias in corporate taxation. Finally, alongside its Communication on business taxation for the 21st century (COM(2021) 251 final), the Commission has also put forward a Recommendation for a carry backward of losses incurred in 2020 and 2021 (C(2021) 3484 final), so as to improve business cash flow, especially for SMEs, and support them during the crisis. As regards the call of the Parliament for a 'EU Start-up Visa', admission of third-country nationals through specific schemes for 'start-ups' is not regulated at EU level. A mapping of schemes targeting start-up founders and entrepreneurs was conducted in the context of the impact assessment for the Blue Card legislation revision and was updated at the end of 2019 by a study conducted by the European Migration Network on 'Migratory Pathways for Start-ups and Innovative Entrepreneurs in the EU'. Finally, the fitness check on Legal Migration has also a dedicated annex on the topic and provides for further analytical elements. Against this background, and in the context of Single Permit Directive and/ or other future initiatives on legal migration, the Commission will analyse the need and feasibility of regulating the procedures and/ or admission conditions for self-employed third-country nationals at EU level. Furthermore, through the EU's Startup Nations Standard the Commission is working closely with the Member States to enhance the enabling environment for start-ups and to ensure that all start-ups and scale-ups in the EU benefit from the best practices underpinning Europe's and the</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>world's most successful start-up ecosystems. The standards include concrete best practices on entrepreneurship friendly measures. The Commission also recalls the objective, set out in its Digital Decade Communication, for Europe grow the pipeline of its innovative scale ups and improve their access to finance, leading to doubling the number of unicorns in Europe, by 2030.</p>			
31)	<p>86. [...] Calls on the Commission and the Member States to increase the resources and investments dedicated to the agricultural sector for these purposes, and to provide sufficient resources and developing tools for research on the use of AI in these areas in order to facilitate the better use of available resources by farmers concerned, increase efficiency and production, and to nurture the creation of innovation hubs and start-ups in this field;</p>	<p>The Commission shares the Parliament's view expressed in point 86 of the resolution that it is important to foster R&amp;I and capacity building in AI and Internet of Things (IoT) technologies in agri-food, in particular to strengthen the sector's sustainability and economic performance. In the post-2020 period AI and IoT will continue to be approached strategically across programmes. Under the Horizon Europe programme, a portfolio of instruments will be available in the field of digitalisation and data technologies in agri-food. Moreover, a large-scale R&amp;I undertaking has been proposed by Commission in the form of a partnership on Agriculture of Data, to exploit the potential of data technologies and earth observation for the agricultural sector and agricultural policies. In addition the Digital Europe Programme is expected to support the upscaling and deployment of innovative solutions. In the field of agri-food, Digital Innovation Hubs, Testing and Experimentation Facilities for Artificial Intelligence as well as a Common European Agricultural Data Space will be supported to boost the digital transformation of the agricultural sector (see section 17 of the Coordinated Plan on AI). Digital and Data infrastructure relevant for digitalisation in the agricultural sector, including the roll-out of high speed internet, can also be supported under the Connecting Europe Facility and the Recovery and Resilience Facility.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests (<a href="#">Horizon Europe</a>, <a href="#">Digital Europe</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
32)	88. [...] calls on the Commission to study the different ways in which the Union is at risk of becoming dependent on external players;	The Commission notes that the AI Act proposal provides legal certainty and that rules are intended to apply only where strictly needed and in a way that minimises the burden for economic operators, with a light governance structure (point 88). The AI Act proposal addresses risks, while shielding from diverging national regulations other systems that are not posing high risks to safety or fundamental rights. It enhances the uptake of AI by increasing users' trust, legal certainty as well as by providing for special tools and measures to support small-scale providers and users.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">legislative proposal on an AI Act of 21.04.2021 COM(2021)206</a> ).	
33)	90. Calls on the Commission to incentivise European companies to start developing and building technology capacities for next generation mobile networks; calls on the Commission to analyse the impact of unequal access to digital technologies and disparities in connectivity across the Member States;	The Commission has been a pioneer in supporting research in technology for the next generations of networks in the Horizon 2020 programme (point 90). 5G networks were supported in the 5G Public-Private Partnership and will now be supported by the Connecting Europe Facility. In particular, the action for 5G Smart Connectivity aims to support its development and to reduce the digital divide. The digital divide, its impact and policies to reduce it are studied in particular in the Digital Economy and Society Index report.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests ( <a href="#">Horizon 2020, Connecting Europe Facility COM(2021)206</a> ).	
34)	92. [...] calls on the Commission to explore the use of blockchain-based cybersecurity protocols and applications to improve the resilience, trustworthiness and robustness of AI infrastructures; emphasizes the need to include cybersecurity components in all sectorial policies; underlines that effective protection requires EU and national institutions to work together with the support of ENISA to ensure	The Commission agrees with the need to reinforce cyber resilience in the EU (point 92), as a general objective to be embedded across all digital policies, mobilising relevant legislation, funding and cooperation to that effect. In particular, EU-funded support for strategic technologies should embed cybersecurity considerations from the outset. The Commission also hopes that the proposal for a revised Directive on Network and Information Security is speedily adopted.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP requests.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the security, integrity, resilience and sustainability of critical infrastructures and electronic communication networks; welcomes the Commission's proposal for a revision of the NIS Directive and its intention to enlarge the scope of it and reduce the differences of application by Member States; calls for a cautious approach towards potential dependencies on high-risk suppliers, especially for the deployment of 5G networks;				

#### 4.1.19. INTA

Between July 2019 and December 2021, the **Committee on International Trade (INTA)** was responsible for two 'ordinary' own-initiative reports (INI) and no legislative own-initiative reports (INL) leading to the adoption of two Parliament's resolutions ('INTA resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions and the Commission written follow-up documents. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent two written replies to the Parliament's two INTA resolutions. In both cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). In total, the Commission submitted two specific replies.

### Analysis of the Commission actions

The Commission proposed/promised 17 genuine actions. In 41 cases, no further specific actions were proposed/promised to be taken by the Commission. In ten cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 17 actions proposed/promised by the Commission, the Commission already carried out the action in one case. In the 16 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.19.1. INTA Resolution 1: EP resolution of 7 October 2020 on implementation of the common commercial policy – annual report 2018

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation of the common commercial policy – annual report 2018</b>		07/10/2020 <a href="#">T9-0252/2020</a> <a href="#">2019/2197(INI)</a> INTA	<a href="#">SP(2020)686</a>	Final reply (SP) received 3 March 2021	Specific reply			
1)	5. [...] and considers that the Commission should ensure a better impact assessment for each trade agreement, to be carried out in due time and conducted by independent bodies;		Impact assessments are systematically prepared before undertaking major trade policy initiatives. In addition, during negotiations, Sustainability Impact Assessments are produced by independent consultants.				No further/specific actions proposed/promised to be taken by the Commission on this particular point (the Commission assessments are systematically prepared before undertaking major trade policy initiatives).	
2)	7. [...] considers that the Commission should ensure the full transparency of roadmaps and other consultation activities in order to maximise their impact and guarantee the involvement of stakeholders;		The Commission agrees on the importance of transparency, outreach and communication in a structured way about the benefits of trade agreements and open trade in general, in order to ensure broad stakeholder involvement and the wide take up of the opportunities that the trade agreements offer, including with respect to inception impact assessments, evaluation roadmaps and other consultation activities.				No further/specific actions proposed/promised to be taken by the Commission on this particular point.	
3)	10. Stresses that the EU must ensure open trade flows and sustained global value chains, and must therefore refrain from export restrictions such as on PPE, for which the EU is depending on trade partners in third countries; urges those Member States which restrict the flow of critical goods on the internal market to immediately lift their export restrictions and calls on the Commission to apply zero tolerance to such breaches of the rules of the single market;		The Commission fully agrees with the recommendation that trade policy needs to support access to medicines and medical equipment, especially in the case of developing countries. This is the direction the EU took when it decided on 26 May to phase out its export authorisation scheme for personal protective equipment (PPE). This is also why the EU supported the conclusions of the G20 Trade ministerial meetings of 30 March, 14 May and 22 September 2020 to ensure a coordinated response to the impact of COVID-19. These conclusions notably endorsed the objective of ensuring that all countries have access to essential medical supplies and pharmaceuticals, including vaccines, at an affordable price, on an equitable basis, where they are most				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. <a href="#">(Personal protective equipment (PPE)   Internal Market, Industry, Entrepreneurship and SMEs)</a> .

		<p>needed and as quickly as possible. The Commission also subscribes to the importance of assessing the vulnerabilities in the functioning of global value chains for some critical sectors and notes that this theme is covered by the ongoing Trade Policy Review.</p> <p>Consolidated reply to point 10 and 11</p>			
4)	<p>11. Laments the economic losses due to the disruption of international trade and global value chains as a result of the COVID-19 pandemic, which may have a particularly severe impact on developing countries; calls on the Commission to ensure that its trade provisions with developing countries support access to medicines and medical equipment;</p>	<p>The Commission fully agrees with the recommendation that trade policy needs to support access to medicines and medical equipment, especially in the case of developing countries. This is the direction the EU took when it decided on 26 May to phase out its export authorisation scheme for personal protective equipment (PPE). This is also why the EU supported the conclusions of the G20 Trade ministerial meetings of 30 March, 14 May and 22 September 2020 to ensure a coordinated response to the impact of COVID-19. These conclusions notably endorsed the objective of ensuring that all countries have access to essential medical supplies and pharmaceuticals, including vaccines, at an affordable price, on an equitable basis, where they are most needed and as quickly as possible. The Commission also subscribes to the importance of assessing the vulnerabilities in the functioning of global value chains for some critical sectors and notes that this theme is covered by the ongoing Trade Policy Review.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p><a href="#">(Personal protective equipment (PPE)   Internal Market, Industry, Entrepreneurship and SMEs).</a></p>	
5)	<p>14. [...] urges the Commission, in this respect, to negotiate new rules to fight trade-distorting phenomena relating to non-market policies and practices, state-owned enterprises (SOEs) and industrial subsidies, that lead to overcapacity, forced technology transfer policies and practices, and intellectual property theft; encourages WTO members to reach an ambitious and balanced agreement on the long-standing issue of fishery subsidies during the ministerial conference to be held in</p>	<p>The Commission agrees that WTO reform requires the membership to negotiate new rules to address the identified gaps in the WTO rulebook. The 12<sup>th</sup> WTO Ministerial Conference will be an occasion to launch an initiative in this regard with key WTO members.</p>		<p>The 12<sup>th</sup> WTO Ministerial Conference was expected to start on 29 November 2021 in Geneva, Switzerland. However due to the pandemic situation, the <a href="#">conference</a> has been suspended.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	2021, and to send out a clear signal that the WTO is still able to deliver on its negotiating function;				
6)	17. Welcomes the progress made on negotiations for the Multilateral Investment Court (MIC); notes that the International Court System (ICS) is intended to be a stepping-stone towards the MIC; regrets the extremely slow progress of Member States in dismantling intra-EU bilateral investment treaties (BITs), and urges the Commission to take action where appropriate;	The Commission facilitated the adoption of Member States' interpretative Declarations on the Consequences of the Achmea judgment on 15 and 16 January 2019. In the declarations, all Member States (at the time, including the UK) politically committed to terminate their intra-EU BITs, either by means of a plurilateral termination agreement or bilaterally where that is mutually recognised as more expedient. The Commission facilitated negotiations on a plurilateral termination agreement over the course of 2019 in a special group involving all Member States. In May 2020, 23 Member States signed a plurilateral termination agreement, which entered into force on 29 August 2020 (after receipt of the second instrument of ratification). The status of Contracting Parties' ratification, acceptance or approval of the agreement can be checked at the Council Treaties and Agreements database. The Commission regrets that Austria, Finland, Sweden and the UK have not endorsed the text of the plurilateral termination agreement. These states could still formally remove their intra-EU BITs from their legal order and thus comply with their obligations under EU law. Ireland did not sign the plurilateral termination agreement, as it does not have intra-EU BITs. The Commission is monitoring closely the progress made by Sweden and Austria in removing, bilaterally by mutual consent, their intra-EU BITs from the legal orders, including the sunset clauses and all their legal effects. It should be noted that there are already infringement proceedings open against Austria and Sweden for not having terminated their intra-EU BITs (at the level of Reasoned Opinions). The Commission stands ready to use infringement procedures against those Member States that do not take the necessary measures to formally remove their intra-EU BITs from their legal order. The Commission exercised its power to launch infringement procedures against Finland and the UK		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		by sending letters of formal notice in May 2020. This was followed by the adoption by the Commission of a Reasoned Opinion, which was sent to the United Kingdom on 30 October 2020.			
7)	21. Invites the Commission to engage its US counterparts to find ways to de-escalate transatlantic trade tensions, including finding negotiated solutions with the US on the issue of civil aircraft subsidies, in particular with regard to the ongoing Airbus-Boeing dispute, and to reach a deal to end the illegal imposition of US steel and aluminium tariffs and illegal anti-subsidies and anti-dumping measures on agri-food products, including those on ripe olives; urges the Commission to increase its efforts for a coordinated and unified EU response;	As regards trade relations with the US, the Commission is committed to engage with the US to improve the trading relationship and resolve the outstanding transatlantic trade disputes. The Commission has put forward a number of concrete proposals in order to reach a balanced negotiated solution in the WTO civil aircraft disputes and to end the US Section 232 steel and aluminium measures. It has also launched a WTO dispute on the illegal US anti-dumping measures on ripe olives. In each of these areas, the Commission stands ready to find workable solutions with the future US administration. In parallel, the Commission has worked towards identifying areas of common interest, which could be part of a positive and mutually beneficial transatlantic trade agenda for the years to come. In August 2020, the Commission announced an EU-US trade facilitation package, which - once adopted in line with the relevant procedures on either side of the Atlantic - will represent the first transatlantic tariff reduction step in two decades. Furthermore, on 2 December 2020, the Commission and the High Representative of the Union for Foreign Affairs and Security Policy have jointly proposed a new transatlantic agenda, guided by stronger multilateral action and institutions; pursuit of common interests and leveraging collective strength; and looking for solutions that respect our common values of fairness, openness and competition <sup>7</sup> . The proposal comprises a positive trade agenda, identifying concrete areas of possible transatlantic cooperation. This includes, among others, facilitation of trade in essential		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (i.e. <a href="#">new transatlantic agenda</a> , EU-US. <a href="#">Understanding on a cooperative framework for Large Civil Aircraft June 2021</a> ).	

<sup>7</sup> [https://ec.europa.eu/info/files/joint-communication-new-eu-us-agenda-global-change\\_en](https://ec.europa.eu/info/files/joint-communication-new-eu-us-agenda-global-change_en)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		medical goods, starting with the WTO Trade and Health Initiative; a new transatlantic green trade agenda, including a WTO Trade and Climate Initiative and measures to avoid carbon leakage; strengthening open and fair trade, by leading WTO reform and solving bilateral trade irritants; establishing a new EU-US Trade and Technology Council to facilitate trade, develop compatible standards and promote innovation; and renewed cooperation on regulation and standards, starting by re-engaging on conformity assessment negotiations and aligning positions in international bodies.			
8)	23. [...] calls on the Commission to constantly monitor the persistent acts of discrimination and work with the Chinese authorities in order to dismantle such acts and barriers; [...]	No specific reply provided for this particular point.		Not mentioned.	
9)	24. [...] calls on the Commission to monitor the situation of market access for European products during implementation of this agreement; <i>notes that, according to the most recent report on the protection and enforcement of intellectual property rights (IPRs), more than 80 % of seizures of counterfeit and pirated goods concern goods originating from China, and that this was the case in both 2018 and 2019;</i> calls on the Commission to explore further tools to address these issues and guarantee the full protection of IPRs;	In respect to the EU-China Agreement on Geographical Indications, the Commission is following closely the implementation of the US-China Phase 1 Trade Agreement, to ensure that European products – including EU agri-food exports – are treated fairly on the Chinese market. Although the Commission acknowledges the efforts of the Chinese government to fight counterfeiting, the Commission's Report on EU customs enforcement of intellectual property rights (2018) indeed shows that, including Hong Kong (China), around 80% of seized counterfeit goods by article came from China. While stakeholders recognize the different efforts made by the Chinese authorities to improve the situation, they also underline that the situation remains very problematic. Therefore, China remains the priority country number 1 in the area of IPR. In view of this situation, an exchange mechanism with China on IPR has been established, which includes a high-level IP Dialogue and a technical level Working Group. In a Memorandum of Understanding of 2015, both sides upgraded the IP Dialogue to Vice-Minister/Deputy Director-General level and agreed on		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (i.e. Commission is following closely the implementation of the US-China Phase 1 Trade Agreement. China remains the priority country number one in the area of IPR).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		defining priority areas of cooperation in the IP Dialogue, one of them being enforcement action, in particular related to counterfeits.			
10)	26. [...] calls on the Commission to use all available means to end the exploitation of Uyghurs;	The EU is gravely concerned about the situation of the Uyghurs and other minorities in the Autonomous Region of Xinjiang in the People’s Republic of China. The EU attaches great importance to promoting responsible business practices by European companies and companies worldwide. The EU and its Member States have a solid body of legislation, measures and initiatives on responsible business conduct in specific sectors such as conflict minerals. Large EU companies (publicly listed companies with 5000+ employees) are required under the Non-Financial Reporting Directive to provide regular reports on how they mitigate risks in their supply chains. European and all other companies operating in China are encouraged to implement effective due diligence practices in line with international guidelines to identify, prevent and address human rights impacts. The EU is working to further enhance due diligence requirements and promote responsible business conduct in supply chains. A legislative proposal on sustainable corporate governance is being prepared which may introduce mandatory due diligence requirements across all sectors concerning human rights and the environment across all sectors. The EU also promotes, notably in the framework of the EU-China Human Rights Dialogue, the ratification and effective implementation of relevant fundamental ILO conventions. This includes the Forced Labour Convention No. 29 and the Abolition of Forced Labour Convention No. 105 that China has not ratified.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">EU-China Human Rights Dialogue</a> , Guidance on due diligence for EU companies to address the risk of forced labour in their operations and supply chains ).	
11)	27. [...] calls on the Commission to increase its technical and economic support via aid-for-trade measures between the EU and African	In relation to the request for the Commission to increase its support via aid for trade, the Commission notes that EU Aid for Trade has long supported efforts towards enhanced trade		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	countries as well as among African countries themselves;	relations between the EU and African states, particularly through programmes supporting the implementation of Economic Partnership Agreements (EPAs). In addition, the EU provides support for the economic and commercial integration between African countries through its Aid for Trade initiatives as well as through the Pan-African (PANAF) programme. The EU will continue supporting these efforts, engaging closely with African partners on priority areas.		working on action falling under the scope of the EP request ( <a href="#">Aid for Trade initiatives</a> , <a href="#">Pan-African programme</a> (PANAF)).	
12)	29. [...] calls on the Commission to carry out an in-depth analysis of the current EPAs on matters such as local economies, labour markets, biodiversity loss, deforestation and land-grabbing, in order to determine whether changes are needed;	In relation to the request for an in-depth analysis of the current EPAs on sustainability issues, the Commission is committed to regularly evaluate the impact of EPAs on all the dimensions named. This is done every 5 years and in close association with the trading partner countries. The final report of the second ex post evaluation of the Cariforum EPA will be published shortly. An ex-post evaluation of the interim ESA EPA is ongoing and expected to be published early 2021. The first ex post evaluation of the SADC EPA will be conducted next year and its results should be available in early 2022.		<a href="#">Ex-post evaluation</a> of the EPA between the EU and its Member States and the CARIFORUM Member States, March 2021. The ex post evaluation of the SADC EPA is scheduled for 2022.	
13)	33. Welcomes the progress towards implementation of the EU-Vietnam agreement and calls for continued speedy progress, notably in the establishment of joint institutions and the ratification of outstanding core ILO conventions and commitments on human rights issues, urging the Commission to ensure their concrete enforcement in liaison with the EEAS;	The Commission is also following closely the actions Vietnam is taking in order to reach its target to eliminate child labour by 2025. Human rights improvement is central to the Commission's engagement and has been the guiding principle for the EU. The EUVFTA provides an additional platform to engage with Vietnam on human rights. There is a binding and enforceable link between the EUVFTA and the Partnership and Cooperation Agreement (PCA), that allows for total or partial suspension of the agreements in case of systematic and severe breaches of human rights. The EEAS also holds an annual Human Rights Dialogue with Vietnam, allowing for a frank and open exchange. The EU continues to raise its concerns in relation to political and civil rights, including freedom of expression online and offline, freedom of association and assembly and human rights defenders. The		No further/specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Commission will also follow up on the implementation of the Universal Period Review (UPR) recommendations.			
14)	35. [...] invites the Commission to clarify its intention concerning future trade and association agreements on the issue of the split of the text;	In respect to Latin America and the Commission's intention concerning future trade and association agreements on the issue of the split of the text, the Commission highlights that the applicable approval procedures are always decided on a case-by-case basis as they are determined by the legal basis of the agreement, identified on the basis of the content of the agreement in question. The Commission takes a decision on this before transmitting its proposal for the signature and conclusion of such an agreement to the Council and the European Parliament.		No further/specific actions proposed/promised to be taken by the Commission.	
15)	37. Is convinced that the modernisation of the association agreement with Chile will serve to further boost the EU's presence in the wider region and help promote an international trade agenda based on sustainable development, stronger protection for environmental and labour standards and respect for human rights; calls on the Commission to ensure that the ongoing negotiations deliver on these principles and that an agreement can be reached in a timely manner;	Although no specific reply provided for this particular point, EC states in reply to point 77 that "The Commission has been negotiating gender-specific provisions within the context of the modernisation of the EU-Chile trade agreement."		No further specific actions proposed/promised to be taken by the Commission.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	38. [...] reiterates its call for the swift opening of investment negotiations with Taiwan, and invites the Commission to open a scoping exercise;	Reflecting the current importance and future potential of our trade and economic relationship with Taiwan, there is a bilateral dialogue mechanism in place, with meetings taking place on a wide range of economic and trade issues, including on investment. However, no decision has been taken yet on launching the investment negotiations with Taiwan. With the review of the EU trade policy ongoing, it would be premature to decide on a future bilateral trade agenda at this stage. The immediate priority is to finalise the investment negotiations with China. The outcome of those negotiations will offer another important contribution to the reflection on how to proceed with other investment agreements in the region.		No further specific actions proposed/promised to be taken by the Commission.	
17)	39. [...] calls on the Commission to enhance competitiveness for EU companies and SMEs;	No specific reply provided for this particular point.		Not mentioned.	
18)	41. [...] asks the Commission to continue with carrying out ex post impact assessment, including on sustainability, of the impact of trade agreements on our economy;	No specific reply provided for this particular point.		Not mentioned.	
19)	43. invites the Commission to transmit to Parliament more recent data relating to exports by EU SMEs and the overall sustainability of the agreement;	In relation to work on assisting SMEs under CETA, the Commission published in June 2020 a note on the role of SMEs in extra-EU exports. <sup>8</sup> Further work on the collection of data on SME utilization of CETA and relevant methodologies and indicators is provide for in the joint EU-Canada Work Plan <sup>9</sup> implementing the CETA SME Recommendation. The sustainability of CETA is reflected in the implementation of its provisions on Trade and Sustainable Development, which is		No further specific actions proposed/promised to be taken by the Commission.	

<sup>8</sup> The note is available at [https://trade.ec.europa.eu/doclib/docs/2020/june/tradoc\\_158778.pdf#\\_blank](https://trade.ec.europa.eu/doclib/docs/2020/june/tradoc_158778.pdf#_blank).

<sup>9</sup> The work plan can be consulted at [https://trade.ec.europa.eu/doclib/docs/2020/july/tradoc\\_158910.pdf#\\_blank](https://trade.ec.europa.eu/doclib/docs/2020/july/tradoc_158910.pdf#_blank).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		carried out under the coordination of the CETA Trade and Sustainable Development Committee. <sup>10</sup>			
20)	44. [...] calls on the Commission to further analyse preference utilisation and come up with new innovative tools and practical solutions; highlights the importance of flexible, streamlined and uncomplicated rules of origin in this regard; calls on the Commission, together with the Member States, to streamline work towards more effective trade promotion and communication strategies and to use the full potential of the EU Delegations around the world;	The Commission is continuing its analysis of utilization of tariff preferences in trade agreements, including in some of its recent ex post evaluations <sup>11</sup> and is reaching out to Member States and business, including in the context of the Market Access Advisory Committee and other fora. The Chief Trade Enforcement Officer has started to engage with business associations and other stakeholders to promote and unlock opportunities offered by EU trade agreements, with a special focus on SMEs.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
21)	45. Points out that the large number of trade and non-trade barriers and the current divergences in the level and quality of controls, customs procedures and sanctions policies at the EU's points of entry into the Customs Union, often result in distortion of trade flows, which puts at risk the integrity of the single market; therefore urges the Commission to address this issue to ensure that companies can compete fairly on a level playing field;	The Commission closely monitors compliance with and implementation of the Union's customs legislation and of the various trade related commitments of the Union. In this context, the Commission is working with the Member States' customs authorities and stakeholders to ensure uniform application of the various rules on trade facilitation and customs, including those in the EU's trade agreements. This is with a view to maximising the benefits of the Customs Union and the Union's trade agreements for legitimate business, including EU exporters and importers, and to preserve the integrity of the internal market.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>10</sup> Reports and agendas of CETA committees and working groups are available at <http://trade.ec.europa.eu/doclib/press/index.cfm?id=1811>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
22)	47. Calls on the Commission to specifically look into the cumulative effects of EU FTAs on trade diversion, for the EU as well as for its partner countries, and to compare the results to the individual impact assessments and to actual figures;	The Commission has also been looking at cumulative effects of trade agreements in the area of agriculture. <sup>12</sup> The report published in 2016 shed some light on relatively balanced cumulated impacts in terms of trade, production and price for the EU agricultural sector as a whole, while quantifying also the market development for specific agricultural sectors. The Commission is preparing a follow-up report, which will be released shortly.		In February 2021, the Commission published the <a href="#">report</a> .	
23)	49. [...] asks the Commission to develop a precise and specific methodology for monitoring and evaluating the implementation of these chapters, given that such an evaluation cannot be made on the basis of quantitative data only  [...] calls on the Commission to present proposals on how to strengthen the enforcement of the sustainable development chapter in trade agreements;	In relation to a methodology for evaluating and strengthening the enforcement of Trade and Sustainable Development chapters in trade agreements, the Commission uses a variety of sources to monitor the implementation of TSD Chapters. These include meetings with trading partners, inputs from the EU domestic advisory groups as well as inputs from other civil society stakeholders. Equally important are the official documents and reports by the relevant international organizations, like the ILO. The use of such a variety of inputs for monitoring ensures that the evaluation and monitoring is not limited to quantitative data. The European Commission also carries out ex-post evaluations of trade agreements 5 years after they enter into force. These are conducted by external consultants and they cover TSD issues in a detailed manner. The analysis done in these evaluations is based on various sources and relies on inputs from civil society. The Commission has continued to put in place efforts to strengthen the enforcement of TSD Chapters, in line with the 15-point action plan. The nomination in July 2020 of a Chief Trade Enforcement Officer (CTEO) within DG TRADE will add a further boost to these enforcement efforts – for instance, the Commission is setting up a centralized complaint system for stakeholders to bring forth		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (the Commission uses a variety of sources to monitor the implementation of TSD Chapters).	

<sup>12</sup> Study completed in 2016 is available at <https://ec.europa.eu/jrc/en/publication/eur-scientific-and-technical-research-reports/cumulative-economic-impact-future-trade-agreements-eu-agriculture>.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		complaints concerning potential breaches of commitments in TSD chapters as well as market access barriers. Finally, the review of the 15-point TSD action plan will also be advanced to 2021.		<a href="#">Open public consultation</a> on the Trade and Sustainable Development (TSD) Review - completed 05/11/2021	
24)	51. Reiterates its call on the Commission and the Member States to engage constructively in the negotiations for a legally binding UN treaty on transnational corporations and other business enterprises with respect to human rights, with the aim of ensuring access to justice for victims of human rights violations and enabling them to seek redress;	No specific reply provided for this particular point.		Not mentioned.	
25)	53. [...] calls on the Commission to be more attentive and to learn from its previous experience as seen in the establishment of a panel at the request of the EU under the EU-Korea FTA, following South Korea's failure to ratify International Labour Organisation (ILO) conventions on workers' rights, notably on freedom of association and collective bargaining;	No specific reply provided for this particular point.		Not mentioned.	
26)	54. [...] calls on the Commission to monitor the progress made with respect to the implementation of other ILO conventions, and to set up without delay the interparliamentary committee as agreed under the EVFTA, paying special attention to the prohibition of child labour;	In relation to the respect of labour commitments by Vietnam, as stated in point 33, the Commission notes that Vietnam has already ratified the ILO Convention no 98 (on the Right to Organise/ Collective Bargaining) and has presented a calendar for the ratification of Convention no 87 (Freedom of Association) by 2023. Vietnam adopted a new Labour Code in November 2019, which will enter into force on 1 January 2021, and is now working on the implementation legislation, while some of the implementing decrees are delayed. The Commission continues to monitor closely the steps taken and cooperates with the Vietnamese authorities and the ILO, supporting and advising Vietnam in this major		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	[...] calls on the Commission to monitor the situation closely and to request consultations with the Vietnamese government should it fail to make continued and sustained efforts towards ratifying, as foreseen by the agreement;	reform process. The Commission works with Vietnam to help it to reach its strong commitment to eradicate child labour by 2025. The 2018 National Survey on Child Labour - expected to be published before the end of the year - suggests a substantial decrease in incidence of child labour of more than 40% since the last survey of 2012, however, there is still one million victims of child labour, more than half of them in hazardous works. Vietnam is currently developing a new action plan on child labour to cover 2021-2025.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
27)	58. Calls on the Commission to ensure that human rights conditions linked to unilateral trade preferences such as GSP or GSP+ are effectively implemented and monitored; stresses that EU trade policy should help to combat illegal trade, deforestation and forest degradation;	In regard to human rights and their link to unilateral trade preferences such as GSP or GSP+, the Commission informs that, as reported on 10 February 2020 <sup>13</sup> , following the joint Commission/EEAS GSP+ monitoring and dialogues, beneficiaries have made progress in effective implementation of human rights conventions. For example, Armenia signed the Second Optional Protocol to the UN International Covenant on Civil and Political Rights (ICCPR), effectively abolishing the death penalty, and adhered to the Convention on the Rights of Persons with Disabilities (CRPD). Bolivia raised the minimum age for work to the international minimum standard of 14 years and Pakistan adopted laws on the elimination of honour killings and protecting transgender persons. At the same time, the challenges remain high and are growing: civil society space is shrinking, notably in Pakistan and the Philippines, and calls for the introduction or implementation of capital punishment have become louder, including in Sri Lanka, Mongolia and the Philippines. Through enhanced engagement, the EU intensified the dialogue with Bangladesh, Cambodia and Myanmar to press for concrete actions on and sustainable solutions to serious shortcomings		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

<sup>13</sup> Brussels, 10.2.2020 JOIN(2020) 3 final: JOINT REPORT TO THE EUROPEAN PARLIAMENT AND THE COUNCIL Report on the Generalised Scheme of Preferences covering the period 2018-2019.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>in respecting fundamental human and labour rights, leading to a partial and temporary withdrawal of preferences to Cambodia effective since August 2020. Countries unwilling to address and engage on issues of concern are being scrutinised.</p>			
28)	<p>59. [...] consequently, calls on the Commission to include enforceable TSD chapters in all future trade agreements;</p>	<p>The Commission is committed to ensure full implementation and enforcement of the biodiversity provisions in trade agreements, including through the EU Chief Trade Enforcement Officer, and to better assess the impact of trade agreements on biodiversity, with follow-up action to strengthen the biodiversity provisions of existing and new agreements if relevant. In line with the EU Biodiversity Strategy for 2030 and the external dimension of the European Green Deal, the Commission is actively working with partner countries to ensure that biodiversity is mainstreamed in NDICI as part of our efforts to ensure a global green and just transition. These efforts include addressing impacts of policies and investments on biodiversity, identifying needs, fostering biodiversity financing and investments benefitting nature, supporting nature-based solutions and helping build capacity globally. The EU is also determined to lead towards an agreement on an ambitious post-2020 global biodiversity framework at the 15th Conference of the Parties to the Convention on Biological Diversity (CBD) next year in Kunming, China. The EU is particularly supportive of developing a strong monitoring and review mechanism to allow for tracking progress on action targets in a dynamic and transparent manner.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
29)	<p>61. [...] calls on the Commission to ensure the effective enforcement of trade defence instruments (TDIs) so as to protect European industry from unfair market practices, and to evaluate and strengthen the safeguard instruments in order to make them more responsive to extraordinary circumstances and better adapted to reinforce European industry by effectively anticipating market disruptions from trade flow;</p> <p>[...] calls on the Commission to come forward with a legislative proposal as appropriate should current tools prove to be insufficient;</p>	<p>Although the follow-up does not mention par. 61, the Commission however states that a legislative proposal would be proposed as appropriate should current tools prove to be insufficient.</p>		<p>The Commission is working on this point in the context of its trade strategy.</p> <p>(See also : <a href="#">An assertive trade policy: EU's defence measures against unfair trade practices remained effective in 2020</a>, August 2021.)</p>	
30)	<p>63. Welcomes the announcement by the Commission of the appointment early in 2020 of a Chief Trade Enforcement Officer (CTEO) to monitor and improve compliance with the EU's trade agreements [...] calls on the Commission to further clarify this role;</p>	<p>Under the guidance of the College and of the Commissioner for Trade, the Chief Trade Enforcement Officer's key role and task will be to improve the overall effectiveness and visibility of the EU's implementation and enforcement activities. The Chief Trade Enforcement Officer will oversee the following enforcement activities: addressing market access barriers and ensuring compliance with trade and sustainable development commitments; increasing internal and external coordination and enhancing engagement with the European Parliament, Member States and stakeholders at large (including civil society organisations).</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	
31)	<p>65. [...] encourages Member States that do not yet have screening mechanisms to put in place temporary solutions, and invites the Commission to actively support such efforts;</p>	<p>No specific reply provided for this particular point.</p>		<p>Not mentioned.</p>	
32)	<p>68. Calls on EU leaders and the Commission to take bold decisions regarding the reform of</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the EU's own resources system, including the introduction of a basket of new own resources;	No specific reply provided for this particular point.		Not mentioned.	
33)	70. [...] calls on the Commission to propose unilateral modifications of the tariffs applied on 'green goods' if these can be identified as contributing to reaching the targets of the European Green Deal;	Despite all EU efforts, it was not possible to reach an agreement on the Environmental Goods Agreement (EGA) in December 2016. Negotiations had been put on hold. In his hearing before the European Parliament, Executive Vice President Dombrovskis has however announced a possible "Trade and Climate" initiative in the WTO. In this context, the Commission is proposing a broad – if possible multilateral – initiative, which encompasses more elements than EGA, notably building blocks around goods, services, transparency, development, solidifying the WTO Committee on Trade and Environment. The Commission has prepared a non-paper outlining broad ideas which it presented to the European Parliament working party on EGA on 9 November. The Commission WTO proposal for climate change suggests reduction/elimination of tariffs for a focused category of products, for example those related to production of "green" energy.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Trade and Climate initiative</a> in the WTO).	
34)	75. [...] calls on the Commission to continue its efforts to support micro-, small and medium-sized enterprises (MSMEs), with specific focus on and measures for those which are women-led; calls on the EU and its Member States to pay particular attention to the special circumstances of women-led MSMEs when establishing export helpdesks, to take advantage of the possibilities created by FTAs, and to strengthen services, technologies and infrastructures (such as internet access) that are of particular importance for the economic empowerment of women and women-led MSMEs;	Based on recent studies conducted with the International Trade Centre (ITC) on barriers that EU female entrepreneurs face when exporting, as well as a growing body of evidence from other sources such as the Organisation for Economic Co-operation and Development (OECD), the Commission observes that the challenges faced by businesswomen and women entrepreneurs are to a very large extent the challenges faced by SMEs in general: access to information, to trade finance, to networks, red tape in customs procedures, etc. In bilateral (for instance with Canada) as well as in multilateral (WTO) fora, the Commission has started exploring how best to apply a gender lens to the MSME work, and the upcoming Trade Policy Review may provide new insights from stakeholders in the matter.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (i.e. <a href="#">Trade Policy Review</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
35)	76. Asks the Commission, in collaboration with Member States, business, and stakeholders, to facilitate the use and understanding of rules of origin for SMEs;	<p>In regard to facilitating the rules of origin for SMEs, the Commission's objective is to put in place a set of rules facilitating trade under EU free trade agreements and limit the administrative burden for EU businesses, while also improving communication and increasing stakeholders' ease of access to information about rules of origin in EU free trade agreements. For example, the Commission has launched on 13 October, a new Access2Markets portal, which aims at supporting SMEs and which contains for the first time a Rules of Origin self-assessment tool (ROSA). The Commission also cooperates with the Enterprise Europe Network (3000 experts in 60 countries and 600 locations) on a number of actions including an FTA guidebook for EU companies and training sessions on how to use the Access2Markets portal. The European Trade Promotion Organisations will also use and promote the new tool. The Commission takes into account SME specificities in all chapters of trade and investment negotiations, via a comprehensive cycle of evaluation of needs, transparency in negotiation and ex-post assessment. Before negotiations start, SMEs and their associations feed their views into a public consultation organised by the Commission, to inform a comprehensive ex ante impact assessment. Then, an inclusive Sustainability Impact Assessment accompanies the negotiations, with dedicated sections assessing the potential impact on SMEs and specific recommendations. Finally, usually five to eight years into the application of EU trade agreements, the Commission carries out an ex post evaluation to compare the impact assessment and objectives envisaged with the outcomes achieved, including the SME dimension.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request( <a href="#">Access2Markets portal</a> ).	
36)	76. [...] reiterates its call on the Commission to monitor the effects of its trade policy on SMEs, as they play a vital role in international trade, recalling that owing to their size and limited	Although no specific reply provided for this particular point, in reply to point 43 the EC states that 'In relation to work on assisting SMEs under CETA, the Commission published in June 2020 a note on the role of SMEs in extra-EU exports'.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	resources administrative costs and bureaucracy affect SMEs disproportionately;			working on action falling under the scope of the EP request ( <a href="#">note on the role of SMEs in extra-EU exports</a> ).	
37)	77. [...] calls on the Commission to combat the exploitation of women; calls on the Commission and the Council to propose negotiating a specific gender chapter in EU trade and investment agreements;	On the topic of gender equality, the Commission agrees that trade policy can play an important role in promoting gender equality, both in partner countries as well as within the EU's own borders. This is also reflected in the recently adopted "EU Gender Action Plan (GAP) III – An ambitious agenda for gender equality and women's empowerment in the EU external action (2021-2025). Under the pillar: "Promoting gender mainstreaming in all areas of EU external action", it is expressly stated that "New trade agreements should include strong provisions on gender equality, including compliance with relevant ILO and UN Conventions and that the EU will also continue to include dedicated gender analyses in all ex-ante impact assessments, sustainability impact assessments". The Commission has been negotiating gender-specific provisions within the context of the modernisation of the EU-Chile trade agreement. The Commission will also include gender-specific provisions in all future negotiations, starting with the ESA EPA deepening, as well as the agreements with Australia and New Zealand. The Commission is also engaging closely with Canada on the implementation of the CETA Joint Committee Recommendation on Trade and Gender, having recently published a joint activity report <sup>14</sup> , as well as a work plan <sup>15</sup> for the year ahead.		Action ongoing/pending.  <a href="#">EU Gender Action Plan (GAP) III</a>  <a href="#">Joint Activity Report to the CETA Joint Committee Commission reports on negotiating round with five Eastern and Southern African countries</a> : A first text-based discussion also took place on trade and sustainable development, including a presentation by the European Commission of a new article on Trade and Gender Equality (December 2020).

<b>Trade related aspects and implications of COVID-19</b>	7/07/2021 <a href="#">T9-0328/2021</a> <a href="#">2020/2117(INI)</a> INTA	<a href="#">SP(2021)558</a>	Final reply (SP) received 8 November 2021	Specific reply			
1)	4. Calls on the Commission to promote fair trade initiatives through EU programmes involving young people and the private sector, in external action in general, in the implementation of TSD chapters, through EU delegations, and by rewarding best practices and facilitating knowledge exchange among local, regional and national authorities, civil society, schools and universities in the EU, including through the extension of the 'EU Cities for Fair and Ethical Trade Award' to schools and universities and the setting up of an annual fair trade week hosted in Brussels by the Commission; demands that the Commission report on support for fair-trade initiatives by the EU and the Member States;	The European Commission recognises the importance of policies and programmes to support fair and ethical trade as a means to promote sustainable development. It is engaging with willing trade partners to organise events and communication campaigns, implement projects to raise awareness and to promote fair and ethical trade.				No further/specific actions proposed/promised to be taken by the Commission.	
2)	5. [...]; calls on the Commission to engage with Member States, local governments, the private sector and civil society to achieve a fairer distribution of negative impacts and risks across supply chains; calls on the Commission to present concrete proposals following its pledge of 'zero tolerance of child labour' before the end of 2021, which the UN has declared International Year for the Eradication of Child Labour;	The Commission is designing its actions against child labour as part of long-term programming, and takes into account the new global estimates from the International Labour Organization (ILO) and the United Nations Children's Fund (UNICEF) on child labour, which show a significant rise in the number of children aged 5 to 11 years in child labour. Child labour largely occurs in the informal sector, which is not always - or only indirectly - exposed to international trade. The classic trade tools (e.g. bilateral agreements, unilateral preferences) can help support the economic growth and welfare of our				'The EU works around the world to eliminate child labour and to protect children through development cooperation, political dialogue, human rights, social, humanitarian and trade policies. Ensuring social protection floors and quality education are key factors, contributing to a decline in child labour, including during humanitarian crises. With measures tackling inequalities and social exclusion, we seek to help lift parents, families and caregivers out of poverty and	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>trading partners. This can lead to better wages and reduced need to resort to child labour. Moreover, schemes like the GSP+ (the special incentive arrangement for sustainable development and good governance under the Generalised Scheme of Preferences), condition access to EU benefits on systemic changes in partner countries, aligning their policies and laws with international values and principles, including labour and human rights. Overall, there is a need for holistic and systemic solutions that should tackle the deep root causes of poverty and inequalities.</p> <p>The Commission has been investing heavily in studying inequality drivers and universal social protection. The interventions in key relevant areas such as education and vocational training, social benefits, decent work and fair incomes can play a significant role in reducing child labour. The Commission is also working on how to support companies to comply with the upcoming due diligence legislation. In that context, the Commission is examining accompanying measures that will take into account the child labour dimension in global supply chains. As an example, one of the objectives of the Sustainable Cocoa Initiative and multi-stakeholder Cocoa Talks, launched by the Commission in September 2020, with the valuable cooperation of a number of Members of the European Parliament, is to improve sustainability of cocoa production and supply chain in West Africa, including fostering progress in the elimination of child labour and child trafficking. In addition, the Commission will address child labour in its Communication on decent work that is planned to be adopted this autumn.</p>		<p>ensure access to quality education for children. We use trade incentives, such as General Scheme of Preferences, to cooperate with partners to combat child labour.' (<a href="#">Child Labour: Statement by the European Commission and the High Representative on the World Day against Child Labour</a>, 11 June 2021).</p> <p>As an example, see '<a href="#">EU boosts sustainable cocoa production in Côte d'Ivoire, Ghana and Cameroon</a>' (26 January 2021).</p> <p>On 22 September 2021, the Commission proposed <a href="#">new EU Generalised Scheme of Preferences to promote sustainable development in low-income countries</a>.</p> <p>Also see EPRS briefings on this issue:</p> <ul style="list-style-type: none"> <li>- <a href="#">Towards a new Generalised Scheme of Preferences regulation for developing countries</a></li> <li>- <a href="#">New EU scheme of generalised preferences</a></li> </ul> <p>On 13 July 2021 the Commission and the European External Action Service (EEAS) published a <a href="#">Guidance on due diligence</a> to help EU companies to address the risk of forced labour in their operations and supply chains, in line with international standards.</p> <p>See also:</p> <ul style="list-style-type: none"> <li>- <a href="#">New EU guidance helps companies to combat forced labour in supply chains</a> (13 July 2021).</li> <li>- <a href="#">Human rights and decent work in global supply chains: the Council approves conclusions</a> (1 December 2020).</li> </ul>

3)	<p>8. Calls on the Commission to swiftly complete the EU's trade defence toolbox in 2021 through legislative proposals supported by impact assessments, giving priority to an anti-coercion instrument, an instrument to tackle distortions caused by foreign subsidies and state-owned enterprises, and the conclusion of negotiations on the International Procurement Instrument; [...]</p>	<p>As regards the anti-coercion instrument, the Commission is currently taking the necessary steps in preparation for a legislative proposal for the fourth quarter of 2021. An impact assessment will accompany the proposal. The Commission has already collected stakeholder input and the analysis of the results is ongoing. In addition, the Commission proposed on 5 May 2021 a new regulation to address distortions caused by foreign subsidies in the Single Market, which is now being discussed by the European Parliament and Council. With regard to the International Procurement Instrument (IPI), the Commission welcomes the agreement on a common negotiating mandate found by the Council on 2 June 2021 and looks forward to supporting the co-legislators in the ordinary legislative procedure once the European Parliament has adopted its position.</p>		<p>The Commission proposal for a <a href="#">legislation on an anti-coercion instrument</a> came out in December 2021.</p> <p>See also, <a href="#">Strengthening the EU's autonomy – Commission seeks input on a new anti-coercion instrument</a> (23 March 2021).</p> <p>Consultation on <a href="#">Trade – mechanism to deter &amp; counteract coercive action by non-EU countries</a>.</p>	
4)	<p>12. Stresses the risks to critical supply chains made apparent by the COVID-19 crisis and calls on the Commission to pay particular attention to the sustainability of EU supply chains in its forthcoming industrial strategy, identifying which supply chains could benefit from increased resilience through supply diversification, reshoring and stockpiling; believes, however, that companies should</p>	<p>Global supply chains have shown remarkable resilience during the crisis, despite some disruptions. Trade policy supports companies' efforts to adjust by providing a stable rules-based trading framework and opening up diversified sources of supply. In the update of the industrial strategy presented in May 2021, the Commission's initial analysis identified a list of 137 possible strategic dependencies (out of 5200 products imported into the EU) based on objective criteria - concentration of suppliers, possibility to diversify import</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	ultimately decide for themselves how to manage their global supply chains;	sources or to produce domestically. For 34 of these products, the risks are higher because it is not possible to produce internally and there are only few suppliers at global level. The Commission is now discussing these first results with industry and Member States and exploring well-targeted solutions to increase resilience.		On 5 May 2021, the Commission <a href="#">updated the 2020 Industrial Strategy: towards a stronger Single Market for Europe's recovery.</a>	
5)	14. [...] ; calls on the Commission to explore whether this model could be used in other value chains as well; supports actions to facilitate trade taken to promote food safety standards and sanitary and phytosanitary measures (SPS) in response to COVID-19; [...] calls on the Commission to identify and explore in cooperation with the UN the most appropriate measures to ensure that this pandemic does not translate into a food crisis in the developing world;	The Commission agrees that during the COVID pandemic, international cooperation and trade proved to be essential elements for ensuring food security. The Agricultural Market Information System (AMIS) played a key role in that respect. The Commission will continue to work with partner countries, the United Nations, civil society and the private sector, to support a global shift towards sustainable food systems. The Common Agricultural Policy and Horizon Europe instruments will accompany this transition. The Commission is also fully committed to the United Nations Food Systems Summit.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  <a href="#">Common Agricultural Policy</a> and <a href="#">Horizon Europe</a> instruments will accompany this transition.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	15. Calls on the Commission to come up with a digital trade strategy which increases the market access of European businesses, strengthens digital infrastructure, harmonises regulatory frameworks, modernises trade and customs tools, and protects EU citizens' rights under the GDPR <sup>16</sup> ;	Supporting Europe's digital agenda is a priority for EU trade policy. The objective is to ensure a leading position for the EU in digital trade and in the area of technology, most importantly by promoting innovation within a human-centric approach to the digital transformation. The EU should continue to lead the way in digital standards and regulatory approaches, in particular as regards data protection, where the EU's General Data Protection Regulation has been a source of inspiration. To achieve this, the World Trade Organization (WTO) needs to set the rules for digital trade and the EU needs to play a central role in creating them. The Commission will also need to step up bilateral engagement and explore stronger frameworks for cooperation on trade-related digital issues with like-minded partners. It will also seek to deepen its existing regulatory dialogues with like-minded partners in line with the Digital Compass Communication of March 2021.		See <a href="#">2030 Digital Compass: the European way for the Digital Decade</a> .	

<sup>16</sup> Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation) (OJ L 119, 4.5.2016, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	16. Calls on the Commission to make thorough assessments of whether the new EU model clause on data flows will preserve Europeans' data protection and privacy rights in the case of a dispute with a trading partner; stresses that existing and future measures protecting the fundamental rights to privacy and personal data protection must not be undermined by international trade agreements; urges the Commission to take the relevant commitments of third countries into account when assessing their adequacy, including for onward transfers of data;	The EU model clause on data flows fully preserves European's fundamental rights to data protection and privacy, which are non-negotiable. With regard to cross-border data transfers and the prohibition of data localisation requirements, the Commission will follow an open but assertive approach, based on European values and interests. The Commission will work towards ensuring that its businesses can benefit from the international free flow of data in full compliance with EU data protection and privacy rules and other public policy objectives, including public security and public order. In particular, the Commission will continue to address unjustified obstacles to data flows while preserving its regulatory autonomy in the area of data protection, cyber security and privacy. The agreed provisions on data flows and on the protection of personal data and privacy in the Trade and Cooperation Agreement with United Kingdom facilitate cross-border data flows while the point on the privacy exception ensures that the Parties provide for instruments enabling data transfers under conditions of general application. This solution ensures that the privacy exception cannot be abused for protectionist reasons.		<p><a href="#">Data protection is non-negotiable in international trade agreements</a> (22 February 2021).</p> <p>See also: European Commission, <a href="#">Rules on international data transfers</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
8)	<p>19. Calls on the Commission to thoroughly review how and to what extent transfers of emerging and disruptive technologies are taking place from the EU to authoritarian states via trade and investment flows; calls on the Commission to propose new measures to limit such transfers, including supply-chain cooperation with like-minded partners; calls for a dialogue on semiconductors to be started with Taiwan;</p>	<p>Among the preparations for the implementation of the new Export Control Regulation (EU) 2021/821, the Commission is setting up a dedicated Technical Expert Group for tightening controls on Emerging Technologies, in application of provisions for controls on non-listed dual-use items. The enhanced transparency requirements and information exchange on authorisations, denials and prohibitions under the new Export Control Regulation will allow to evaluate the trade flows about such technologies and, where needed, to introduce measures for limiting such transfers.</p> <p>The Commission is indeed discussing with like-minded partners the security and resilience of supply chains, and in particular of technology products including semiconductors. The recently launched EU-US Trade and Technology Council will provide an adequate forum to conduct such a cooperation on supply chains. In respect of Taiwan, and other relevant countries such as South Korea and Japan, the Commission is considering to conduct closer cooperation on semiconductor technologies possibly through sector specific bilateral dialogues. Should these dialogues materialize, it would be an appropriate forum to coordinate on supply chain issues related to the semiconductor sector. As regards the latter, the Commission recalls the proposed Digital Decade Communication target that by 2030 the production of cutting-edge and sustainable semiconductors in Europe, including processors, is at least 20 % of world production in value.</p>		<p>The new Export Control Regulation can be found <a href="#">here</a>. The Commission published <a href="#">new EU guidance helps companies to combat forced labour in supply chains</a> (13 July 2021).</p> <p>See also the Commission's actions to implement new EU Export Control Regulation - <a href="#">Memo</a> (9 September 2021).</p> <p>The resilience of supply chains was discussed during the <a href="#">EU stakeholders outreach on the Trade and Technology Council Working Group on Secure Supply Chains</a> (13 December 2021).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	25. Is therefore concerned about the new rise in export restrictions on vaccines by the main manufacturing countries such as the US, the UK, China, India and, to a lesser extent, the EU and emphasises that this might endanger the rapid global scaling up of vaccine production capacity, disrupt production chains and lead to retaliation; urges the Commission to engage with producing countries to rapidly eliminate export barriers; [...]	The EU is at the forefront of finding multilateral solutions for ramping up production and sharing vaccines. The Commission is making every effort to promote a Trade and Health Initiative (see reply to points 22 and 23 above), which includes, amongst other, stronger global cooperation amongst WTO members and other international organizations to build resilient global supply chain and increase the preparedness for possible future health crises. It is proposed that, when justified, export restrictions should be transparent, proportionate, targeted and limited in time. The EU export authorization mechanism complies with these principles and is being used as a measure of last resort (only one request for exports blocked and over 1,500 requests granted).		No further/specific actions proposed/promised to be taken by the Commission.  However, the <a href="#">EU extends COVID-19 vaccines export transparency and authorisation mechanism until December</a> (30 September 2021).	
10)	26. [...] urges the Commission to pursue effective vaccine and medical supply diplomacy to strengthen the EU's credibility and diplomatic visibility and calls for more international efforts to speed up the delivery of vaccines to COVAX;	Although the follow-up does not mentions point 26, the Commission however states in reply to point 58 that [...] The EU and the US expressed firm determination to end the pandemic and drive a sustainable global recovery and are committed to promote access to vaccines, diagnostics and therapeutics through COVAX and Access to COVID-19 Tools Accelerator (ACT-A).		No further/specific actions proposed/promised to be taken by the Commission.	
11)	31. [...] invites the Commission, therefore, to engage with partners to update existing trade and investment agreements by making use of their review clauses;	Consolidated reply 31-33  The Commission has brought forward and has started the review of the 15-point Trade and Sustainable Development (TSD) action plan. In the review, the Commission will have a critical look at all relevant aspects of TSD implementation and enforcement. This review will also take into account the results of the recent Trade Policy Review and the Communication, most importantly supporting the green transition and promoting responsible and sustainable value chains. As a first step, to feed this process with evidence-based inputs, a comparative study is now being conducted by an external consultant to see what countries around the world are doing		This process is ongoing:  <a href="#">European Commission open public consultation on the Trade and Sustainable Development (TSD) Review</a> (July 2021).  On 5/11/2021, <a href="#">consultations</a> closed.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>on enforcement of TSD chapters and, more globally, on climate, environmental, social and labour law, and to identify best practices. The Commission has also launched an open public consultation, which gives stakeholders the possibility to submit their views and proposals. The deadline for the submissions is 31 October 2021.</p>			
12)	<p>33. [...] calls on the Commission, therefore, to speed up its review of the 15-point action plan on TSD chapters in 2021 so that it can be implemented in ongoing negotiations;</p> <p>expects the review to address enforceability and recalls, in this regard, the non-paper from the Netherlands and France on trade, social economic effects and sustainable development<sup>17</sup>;</p>	<p>Consolidated reply 31-33</p> <p>The Commission has brought forward and has started the review of the 15-point Trade and Sustainable Development (TSD) action plan. In the review, the Commission will have a critical look at all relevant aspects of TSD implementation and enforcement. This review will also take into account the results of the recent Trade Policy Review and the Communication, most importantly supporting the green transition and promoting responsible and sustainable value chains. As a first step, to feed this process with evidence-based inputs, a comparative study is now being conducted by an external consultant to see what countries around the world are doing on enforcement of TSD chapters and, more globally, on climate, environmental, social and labour law, and to identify best practices. The Commission has also launched an open public consultation, which gives stakeholders the possibility to submit their views and proposals. The deadline for the submissions is 31 October 2021.</p>		<p>This process is ongoing:  <a href="#">European Commission open public consultation on the Trade and Sustainable Development (TSD) Review</a> (July 2021).</p> <p>On 5/11/2021, <a href="#">consultations</a> closed.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	34. Calls on the Council and the Commission to include in TSD and agricultural chapters provisions regarding animal welfare, fair trade and the circular economy; emphasises the role of the Chief Trade Enforcement Officer in this regard and calls for close cooperation with the European Parliament's Committee on International Trade in the monitoring and scrutiny of TSD enforcement; calls on the Commission to draw on the lessons learned from the recent panel of experts so that TSD chapters include a roadmap with concrete and verifiable commitments;	The monitoring and enforcement of the respect of TSD Chapters of EU trade agreements are top priorities of EU trade policy. The objective is to foster fairer and more sustainable trade and to implement and enforce the sustainability commitments of trade partners on workers' and consumers' rights, climate change, and environment protection. EU trade agreements also play an important role in promoting and enhancing cooperation on animal welfare standards. These efforts will be stepped up in the future, in line with the Green Deal and the Farm to Fork Strategy, for instance by introducing a Sustainable Food Systems chapter in trade agreements to foster dialogue and cooperation. The Chief Trade Enforcement Officer stands ready for, and looks forward to, closer cooperation with the European Parliament's Committee on International Trade.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Green Deal and the Farm to Fork Strategy</a> ).	
14)	35. [...] requests that the Commission look into instruments to tackle these distortions and walk the talk of the Green Deal by implementing it in all aspects of trade policy;	The EU Trade Policy Review Communication puts sustainability at the centre of trade policy - by further promoting trade policy for sustainability, contributing to the green deal on all its trade-related aspects and supporting our sustainability actions notably on climate. The Commission will put sustainability at the heart of all policy levels, whether multilaterally in the WTO, bilaterally through Trade and our Investment Agreements or autonomously through legislation and unilateral trade instruments. The EU is aiming to eliminate tariffs on green goods on a reciprocal basis when negotiating Free Trade Agreements, and is also pursuing an ambitious environmental agenda in the WTO, that includes liberalization of green goods and services.		EU trade negotiations <a href="#">here</a> . Developments on EU trade agreements and sustainability issues <a href="#">here</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	<p>36. Points out that high up-front costs, which could only repay themselves over time, and a lack of know-how and equipment are currently hindering or slowing developing countries in their green and digital transition; demands that the Commission use all trade instruments and development cooperation policies at its disposal to increase financial support, technical assistance, technology transfers, capacity building and digitalisation in order to empower developing countries and enable them to achieve sustainable resilience and to better implement due diligence across the supply chain;</p>	<p>Although the follow-up does not mention point 36, it states that it will continue to support the enhanced integration in the world economy of vulnerable developing countries and will promote sustainability standards across global value chains. Trade policy can contribute to this objective by promoting responsible business conduct, fair and ethical trade and greater transparency and traceability in supply chains. All recently concluded Free Trade Agreements include provisions that promote responsible business conduct and voluntary sustainability schemes. The Commission wants to ensure that EU policy contributes to its global objectives and is well implemented and enforced. One example is the forthcoming legislation on sustainable corporate governance the objective of which will be to ensure that companies can better contribute to sustainable development by putting in place proactive and reactive processes to identify, manage and report on environmental and human rights risks in their supply chains.</p>		<p>The Commission communication on sustainable corporate governance is still forthcoming.</p> <p>On 26 October 2020, the European Commission launched a <a href="#">public consultation</a>, which closed on 8 February 2021.</p> <p>On 17 December 2020, <a href="#">the European Parliament approved a non-legislative report</a> calling for more sustainable business conduct and addressing shortcomings in existing laws. Parliament wants upcoming corporate governance proposals from the Commission to include a series of mandatory obligations for companies and incentives to act rather than rely on the voluntary disclosure of information. A clear set of rules strengthening the duties of company boards regarding sustainability is also asked.</p> <p>Initially, the Commission proposal was supposed to be published in the first half of 2021, then in December 2021. The Regulatory Scrutiny Board has twice given a red light to the impact assessment accompanying the proposal, and a new text should be proposed in 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	38. Stresses the importance of drawing up sustainability impact assessments on an ex ante, intermediate and ex post basis, following a concrete timeline, addressing possible risks as early as possible, and, if ex post evaluations prove this to be necessary, address negative impacts; calls on the Commission to brief Parliament regularly on the ongoing and finalised sustainable impact assessments; stresses the need to develop a comprehensive framework with concrete targets to advance the SDGs, the Green Deal and the ILO Decent Work Agenda in trade and investment agreements; [...]	The Commission intends to continue carrying out its comprehensive evaluation policy in the field of trade. The Commission continuously strives to improve and deepen our assessment, both ex-post and ex-ante, of the impact of EU trade agreements and other trade policy initiatives, including on sustainability. The Commission stands ready to inform the Parliament whenever necessary about the results of its evaluations, as it has done regularly in the past.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  Also see the new latest Commission communication <a href="#">Better regulation: Joining forces to make better laws</a> and the EPRS briefing entitled ' <a href="#">New European Commission communication on Better Regulation: Joining forces to make better laws</a> ' (May 2021).	
17)	40. [...] calls on the Commission to engage with Parliament at all stages of its proposals, follow up on proposals made by the DAGs, reinvigorate civil society dialogue and cooperate more intensively with civil society in the European Economic and Social Committee (EESC); [...]	The Commission is a very transparent negotiator. Before launching a negotiation, the Commission publishes the draft negotiating directives and its negotiating proposals. The Commission makes public its proposals on the different chapters of trade agreements and issues reports after each negotiating round. The Commission then puts online the negotiated text before legal revision and publishes reports of negotiating rounds. In addition, the Commission has made significant efforts over the past years also to provide civil society with more information about what the Commission does and how, in particular as regards the implementation phase of trade agreements.  In all these transparency efforts, the Commission informs the European Parliament via its Committee on International Trade		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>(INTA) at the same time as the Council and treats both institutions equally. The Commission attaches great importance to informing the Parliament immediately at all stages of the negotiations. The Commission continues therefore to stand ready to present the state of play of negotiations in the INTA and in INTA’s Monitoring Groups whenever so desired by the European Parliament.</p> <p>During trade negotiations, the negotiators at political and technical level regularly meet with civil society to hear and address its concerns. Every year, the Directorate General for Trade (DG Trade) organizes around 20 Civil Society Dialogue meetings on trade policy. The topics for the meetings include updates on ongoing trade and investment negotiations and other trade policy issues. In the implementation phase, EU domestic advisory groups (DAGs) set up in all trade agreements since 2011 regularly meet with Commission officials who inform them about the latest on the implementation of their respective trade agreement. In order to further improve DG Trade’s Civil Society Dialogue (CSD), the Commission launched in 2020 a study to review the CSD and to help improving its outreach to civil society in Member States. The conclusions of the study have recently been published and the proposed follow-up was also presented to the European Parliament. The study confirms that, overall, Civil Society Organisations (CSOs) are satisfied with the CSD.<sup>18</sup> At the same time, it proposed areas for improvement, which the Commission is now taking forward as appropriate to improve in particular the preparation of CSD meetings through, for example, more advanced notice and more targeted input from CSOs. In addition, the Commission is increasing its efforts to reach out to civil society in Member States. Finally, the</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Commission calls upon Member States, the European Parliament and other stakeholders to use all possible synergies in engaging with civil society to achieve better results.			
18)	41. Invites the Commission to identify possible concrete and specific actions and a roadmap to implement the concept of open strategic autonomy, and to ensure that all options are on the table; notes with concern that geopolitical competition and tensions have accelerated following the COVID-19 outbreak;	The concept of open strategic autonomy underpins the entire TPR Communication, which in turn outlines a set of 16 headline actions for implementing this concept in the coming years grouped in six priority areas for action.		No further/specific actions proposed/promised to be taken by the Commission.	
19)	46. Shares the emphasis placed by the Commission in its vision for WTO reform on economic recovery, sustainable development, unfair state subsidies and digital trade, and urges the Commission to expend all efforts to implement its agenda, including goals on gender, human rights and labour standards;	No specific reply is provided to this particular point.		Not mentioned.	
20)	49. Stresses the importance of effective dispute settlement in establishing stability and predictability in the multilateral trading system and the need to resolve the current situation of the Appellate Body in cooperation with the US, in order to make it operational again and in this way ensure that trade disputes can be properly resolved; asks the Commission to propose as part of its WTO trade and climate initiative the inclusion of	The Commission will take forward initiatives and actions that promote climate and sustainability considerations throughout the various functions of the WTO, including a trade and climate initiative. In this respect, the Commission is engaging with like-minded countries to pursue a strong climate and environmental agenda at the WTO, both bilaterally with key partners as well as through the dedicated forum created to this end, the so-called Trade and Environmental Sustainability Structured Discussions. In disputes before the WTO, it always works to ensure that panellists have relevant expertise. Panels		<a href="#">New initiatives seek to put environment at heart of trade discussions</a> (15 December 2021). <a href="#">DDG Pauqam highlights MC12 expectations for WTO at EU Parliament event</a> (9 November 2021). <a href="#">China, US welcomed as new participants in trade and environmental sustainability talks</a> (4 November 2021).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	environmental expertise in the context of dispute settlements, where relevant;	also have the possibility to seek expert information or advice from any individual or body they deem appropriate, including from international organisations.		<a href="#">First meeting held to advance work on trade and environmental sustainability</a> (5 March 2021). Follow the Trade and environmental sustainability structured discussions <a href="#">news</a> .	
21)	50. Emphasises that reviving the WTO negotiating function will play a key role in any substantial reform of the organisation; notes, in particular, that competitive distortions caused by industrial subsidies and state-owned enterprises, particularly in China, need to be addressed and asks the Commission to put forward proposals to identify and differentiate categories of subsidies according to their contribution to legitimate public goals;	The future plurilateral initiative on Competitive Neutrality should include a modernised category of non-actionable subsidies ("Green box") that includes subsidies that support legitimate public goals while having a minimal distortive impact on trade, provided they are subject to full transparency and agreed disciplines. This would particularly be the case in certain types of environmental and research and development subsidies provided they are subject to full transparency and agreed disciplines.		No further/specific actions proposed/promised to be taken by the Commission.  On Competitive neutrality with a focus on EU State Aid policy, see <a href="#">here</a> .	
22)	51. Underlines that in order to revive the WTO negotiating function, the EU must work together with like-minded partners to find common ground for WTO reform in the broadest sense; reaffirms that meaningful progress in WTO reform needs a broad consensus and coalitions of like-minded partners; calls on the Commission to continue engaging in plurilateral negotiations as a step towards multilateral agreements; [...]	The Commission agrees that open plurilateral negotiations can represent an important avenue to allow the development of new rules in the WTO, given the difficulty to reach multilateral outcomes. The Commission also agrees that as part of the future work to update the institutional setup of the WTO, it would be important to discuss the parameters for allowing the integration of plurilateral outcomes into the WTO framework. The EU is currently strongly involved in the work of the three plurilateral negotiations in the WTO on services domestic regulation, e-commerce and investment facilitation.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. See <a href="#">EU-WTO relations</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
23)	52. Calls for the Commission to actively pursue a solution to the mismatch between the level of development and the level of commitment taken within the international trading system; [...]	The Commission will continue to support special and differential treatment of WTO members, especially the Least Developed Countries and developing countries with specific needs. At the same time, the Commission considers that special and differential treatment should be more granular. Instead of block exemptions for large number of Members self-declaring as developing, it should rather be guided by the need of supporting developing countries' genuine integration into the trading system.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request. See <a href="#">EU-WTO relations</a> .	
24)	54. [...] calls on the Commission to deliver an efficient carbon border adjustment mechanism;	Although the follow-up does not mention point 54, the Commission however states in reply to point 54 that [...] on 14 July 2021 the Commission put forward a comprehensive legislative package with the aim of delivering the EU's increased climate target, of a net domestic reduction of at least 55% in greenhouse gas emissions compared to 1990 levels – as agreed in the recently adopted European Climate Law Regulation. This package includes a proposal for a regulation on a Carbon Border Adjustment Mechanism - a climate measure that aims at preventing the risk of carbon leakage. A number of support measures are available to the EU industry to help the decarbonisation process, including EU budget and NextGenerationEU (NGEU) funds, state aid, as well as funds under the EU Emissions Trading System.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
25)	56. Recognises at the same time that some diverging interests remain; invites both the Commission and the US administration to cooperate closely in the new political context to secure a level playing field for businesses in order to increase market access for EU companies, continue to explore agreements on conformity assessment and the elimination of industrial tariffs, agree on ambitious social, technological and environmental standards, and build on each other's experience so as to promote such standards more efficiently on the global stage;	The Commission will explore with the US ways to further facilitate bilateral trade. With the launch of the Trade and Technology Council, the Commission will, among others, seek to advance a positive regulatory cooperation agenda with the US (including cooperation on standards, conformity assessment and compatible regulatory approaches) and to promote its approach to standards-making on the global stage. In line with the Council decision of April 2019 authorising the opening of negotiations with the US for an agreement on the elimination of tariffs for industrial goods, the Commission remains ready to explore the possibility for such negotiations, but the Commission notes that the US Administration would need to abandon its request to expand the negotiations to areas not covered by the Council's mandate (i.e. to include tariffs for agri-food products).		The Trade and Technology Council met in November 2021 ( <a href="#">minutes</a> ).  Developments on EU-US relations see the <a href="#">EU delegation to the United States</a> and the <a href="#">DG TRADE webpage for EU-US trade relations</a> .	
26)	60. At the June 2021 Summit, the US and the EU have underlined their interest in exploring further how trade could help in ensuring a sustainable recovery from the COVID-19 crisis as well as in preventing climate change and protecting the environment. The EU will seek close dialogue and cooperation with the US in pursuing an ambitious transatlantic green trade agenda.		The Trade and Technology Council Working Group 10 (Global Trade Challenges): EU Stakeholder Outreach Event on trade and labour and trade and environment met in Brussels, on 2 December 2021 ( <a href="#">minutes</a> ).  EU-US relations in the area of the transatlantic green trade agenda, follow developments in the <a href="#">EU delegation to the United States</a> and the <a href="#">DG TRADE webpage for EU-US trade relations</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
27)	63. Underlines that Parliament will carefully scrutinise the agreement, including its provisions on sustainable development, and reminds the Commission that it will take the human rights situation in China, including in Hong Kong, into account when asked to endorse the investment agreement;	No specific reply is provided to this particular point (on human rights in China and Hong-Kong).		Not mentioned.	
28)	64. Urges the Commission to move forward with an investment agreement with Taiwan, showing commitment to meaningful engagement in trade and investment relations and taking the necessary steps towards an impact assessment, public consultations and a scoping exercise before the end of 2021; [...]	The EU and Taiwan are in regular policy dialogues on economic, trade and investment issues. Strengthening EU-Taiwan trade and economic relations is an important element of the EU's policy in the region. These relations should be built upon the strong economic links that already exist between the EU and Taiwan. The Commission takes note of the European Parliament's views and is currently assessing how to engage closer with Taiwan, which is an important and like-minded trade and investment partner. Amongst others, the Commission would like to develop its partnership to address the most pressing and concrete challenges, focusing on issues such as supply chain vulnerabilities and critical value chains, as well as on strategic sectors like semiconductors. This is a work in progress. However, the Commission is currently not considering the launching of investment negotiations with Taiwan.		No further/specific actions proposed/promised to be taken by the Commission.	
29)	66. Reiterates the importance of a strategic and sustainable partnership with South-East Asia and India; calls on the Commission, in this context, to remain engaged with the region and proactively promote rules-based trade relations for a comprehensive and ambitious Indo-Pacific strategy;	The Commission shares the European Parliament's view of the importance of a strategic and sustainable partnership with South-East Asia and India. On 8 May 2021, the EU and Indian Leaders' agreed to resume negotiations for a "balanced, ambitious, comprehensive and mutually beneficial" trade agreement, and to launch separate negotiations on an investment protection agreement and another agreement on geographical indications. Both sides are now engaged in internal preparations to take these various strands of work forward. The Commission continues to be engaged with		The <a href="#">Joint Communication for the Indo-Pacific</a> , that was announced by Commission President von der Leyen in her speech on the State of the Union, was published on 16 September 2021. Commission action is ongoing, but too little time has lapsed since the adoption to be able to assess the action.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		countries in the Indo-Pacific region to promote rules-based trade relations, including through negotiating bilateral trade agreements. Together with the European External Action Service, the Commission will contribute to the implementation of the recently adopted (mid-September) Strategy for the Indo-Pacific.			
30)	70. Calls for all the EU institutions to maintain as a priority our trade and development cooperation and the development of greater resilience to pandemics and health emergencies; calls on the Commission to maintain a structural dialogue with partners in the abovementioned regions to this end;	No specific reply is provided to this particular point (to maintain a structural dialogue with partners).		Not mentioned.	

#### 4.1.20. ITRE

Between July 2019 and December 2021, the **Committee on Industry, Research and Energy (ITRE)** was responsible for nine 'ordinary' own-initiative reports (INI) and no legislative own-initiative reports (INL) leading to the adoption of a nine Parliament's resolutions ('ITRE resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents, as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent seven written replies to the Parliament's nine ITRE resolutions. In six cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other two replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one ITRE resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted two specific and four mixed replies. The Commission has not replied with written follow-up documents to 34 of Parliament's 271 requests. At the cut-off date of this study, the Commission had not yet replied to 36 of Parliament's 271 requests.

### Analysis of the Commission actions

The Commission proposed/promised 98 genuine actions. In 58 cases, no further specific actions were proposed/promised to be taken by the Commission and in six cases it remained unclear if an action was carried out. In 44 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 98 actions proposed/promised by the Commission, the Commission already carried out the action in 79 cases. In the 19 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.20.1. ITRE Resolution 1: EP resolution of 10 July 2020 on comprehensive European approach to energy storage

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Comprehensive European approach to energy storage</b>		10/07/2020 <a href="#">T9-2020/0198</a> <a href="#">2019/2189(INI)</a> ITRE	<a href="#">SP(2020)452</a>	Final reply (SP) received 8 December 2020	Mixed reply			
1)	2. Calls on the Commission to develop a comprehensive strategy on energy storage to enable the transformation to a highly energy-efficient and renewables-based economy taking into account all available technologies as well as close-to-market technologies and keeping a technology-neutral approach to ensure a level playing field;		[...] the Commission recognises that a comprehensive approach covering all technologies as indicated by the European Parliament could be valuable to coordinate the different actions, keep a technology-neutral approach and ensure a genuine level playing field. To ensure such a comprehensive approach, the Commission will therefore consider the recommendation of the European Parliament to adopt a strategy on energy storage.				No further/specific actions proposed/promised to be taken by the Commission.	
2)	3. Calls on the Commission to establish a task force involving all relevant Directorates-General to develop this strategy, which shall be based on a comprehensive analysis of:  (a) the carbon footprint and life cycle, taking into account at least the extraction and/or production of raw materials, including the human rights and labour standards aspects, the sourcing of components, the manufacturing process, transport and the recycling process, where applicable;  (b) the technology's energy capacity, power capacity, storage duration, Capex, Opex, roundtrip efficiency and conversion efficiency;  (c) the energy system modelling, which shall incorporate the relevant data mentioned in (b) to assess policy options, while including intra-hour effects so as to correctly estimate current and		No specific reply provided (on task-force).				Not mentioned.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	future system flexibility needs and the contribution of storage to such modelling; (d) energy demand in industry, transport and homes; and (e) the potential of small-scale storage and flexibility potential at district level, as well as cross-border connections and sector integration; (f) the contribution of energy storage technologies to fighting energy poverty;					
3)	5. Calls on the Commission to continue providing support for research on storage, including on new and emerging alternative technologies, in the framework of Horizon Europe;		The new Horizon Europe increases the relevance of energy storage, continuing to provide support for research on storage and for the development of new energy storage technologies.		Horizon 2020, Energy storage is part of <a href="#">cluster 5</a> of Horizon Europe (strategic plan 2021-2024).	
4)	11. [...] <i>Calls for the timely implementation of the Electricity Market Directive (EU) 2019/944 and the Electricity Market Regulation (EU) 2019/943; emphasises that energy storage should be coherently defined across the national legal frameworks; points to uncertainties related to its scope, particularly on inclusion of different Power-to-X technologies, Calls, therefore, on the Commission to provide urgent guidance in this matter;</i>		No specific reply provided (on guidance).		Not mentioned.	
5)	12. Requests the Commission, in the context of the Energy System Integration Strategy, to provide a sound legal basis for gas infrastructure transmission and distribution system operators with the aim of providing energy storage solutions in line with the Union's climate goals and the Paris Agreement;		The Commission has already indicated in the Energy System Integration Strategy its intention to align taxation with EU environment and climate policies [...]  The EU sustainable finance taxonomy will guide investments towards environmentally sustainable economic activities – first, to those that significantly contribute to climate change objectives, while not harming the other environmental objectives as defined in Regulation (EU) 2020/852.		Proposal for Directive restructuring the Union framework for the taxation of energy products and electricity (recast) <a href="#">COM(2021)563</a> .  Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a> .  Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a> .	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	13. Calls on the Commission and Member States to ensure coherence and avoid overlaps in legislation on European, national or regional level;		The Commission will consider common quality standards or cross-border operational rules to ensure interoperability of markets for pure hydrogen, as well as a comprehensive terminology for all renewable and low-carbon fuels and the certification of such fuels. Guarantees of origin for gas are already regulated in European legislation and will be mutually recognised.		Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a> . Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a> .	
7)	14. Calls on the Commission to differentiate between end use and storage or conversion and to develop an efficient taxation system prohibiting double taxation related to energy storage projects in its upcoming proposal for a revised Energy Taxation Directive;		As expressed in the Energy System Integration Strategy, further measures are needed to ensure that customers' decisions to save, switch or share energy properly reflect the life cycle energy use and footprint of the different energy carriers, including extraction, production and reuse or recycling of raw materials, conversion [...] In addition, several actions will be required to ensure the proper and coherent development of storage in the EU. First, the Commission has already indicated in the Energy System Integration Strategy its intention to align taxation with EU environment and climate policies, ensure the consistency of non-energy price components across energy carriers, and ensure a harmonised taxation of storage and hydrogen production, avoiding double taxation, through the revision of the Energy Taxation Directive.		Consumer rights were enhanced in the Commission proposal to revise and decarbonise the legal framework of the EU internal gas market, <a href="#">website</a> . Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a> . Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a> . Proposal for a Directive restructuring the Union framework for the taxation of energy products and electricity (recast) <a href="#">COM(2021) 563</a> .	
8)	16. Calls on the Commission to facilitate work on establishing common requirements for grid connection and to address other barriers preventing the integration of storage into electricity markets;		The Commission will consider possible ways to facilitate the work on establishing common requirements for grid connection.		Common requirements for grid connections were part of the revision and decarbonisation of the legal framework on EU internal gas market. Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a> . Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
9)	18. Calls on the Commission to acknowledge the crucial role of all flexibility and storage technologies in order to ensure an efficient energy transition and to further provide high levels of security of supply and system stability;	<p>Behind-the-meter storage is becoming a key element for flexibility and security of supply of the system. In order to support its development, the Commission will ensure the correct implementation of the CEAP as well as the future development of a Network Code on Demand Side Flexibility, including the potential of electric vehicles and the digitalisation of the front-end of the storage facilities as well as the end-to-end demand-side flexibility chain. This digitalisation would comply with commonly agreed standards aligned among the standards developing organisations.</p> <p>[...]</p> <p>Behind-the-meter storage is becoming a key element for flexibility and security of supply of the system. In order to support its development, the Commission will ensure the correct implementation of the CEAP as well as the future development of a Network Code on Demand Side Flexibility, including the potential of electric vehicles and the digitalisation of the front-end of the storage facilities as well as the end-to-end demand-side flexibility chain. This digitalisation would comply with commonly agreed standards aligned among the standards developing organisations.</p>		<p>Increased energy security and supply were one of the key elements of the revision and decarbonisation proposals of the EU internal gas market.</p> <p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a>.</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a>.</p>	
10)	23. Calls on the Commission to take into account the important role of storage in the energy transition and to address it accordingly when reviewing the State aid guidelines;	<p>The Commission will also [...] take into account energy storage and the need to foster its deployment when preparing future initiatives like [...] State Aid Guidelines.</p> <p>[...]</p>		<p>State aid for environmental protection and energy – <a href="#">revised guidelines</a> adopted on 21 December 2021.</p>	
11)	24. Calls on the Commission to make sure that the new guidelines take into account the efficiency and the contribution to grid stability of different storage technologies, so that inefficient funding is avoided and the participation of non-market players is limited to the cases and circumstances	<p>The Commission will also [...] take into account energy storage and the need to foster its deployment when preparing future initiatives like [...] State Aid Guidelines.</p> <p>[...]</p>		<p>State aid for environmental protection and energy – <a href="#">revised guidelines</a> adopted on 21 December 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	referred to in Articles 36 and 54 of the Electricity Market Directive (EU) 2019/944;				
12)	<p>27. [...] calls on the Commission to continue supporting R&amp;D related to the development of a hydrogen economy, and urges the Commission and the Member States to support the further upscaling of Power to X technology, in particular through the support of a hydrogen initiative as an Important Project of Common European Interest (IPCEI);</p> <p>calls on the Commission to assess and develop a clear taxonomy and standards for hydrogen, for both the gas grid and end users;</p>	<p>As announced in the Energy System Integration Strategy and the Hydrogen Strategy the Commission will follow-up on the recommendations for Important Projects of Common European Interest (IPCEI) to promote supporting a hydrogen supply chain. The Commission recognises that the repurposing of existing gas infrastructure may provide an opportunity for a cost-effective energy transition. However, and in order not to distort the level playing field for market-based activities, hydrogen infrastructure should be accessible to all on a non-discriminatory basis and network operators must remain neutral.</p> <p>[...]</p> <p>The Commission has already indicated in the Energy System Integration Strategy its intention to align taxation with EU environment and climate policies, ensure the consistency of non-energy price components across energy carriers, and ensure a harmonised taxation of storage and hydrogen production, avoiding double taxation, through the revision of the Energy Taxation Directive.</p>		<p>Commission <a href="#">website</a> linking to Communication - Criteria for the analysis of the compatibility with the internal market of State aid to promote the execution of important projects of common European interest (adopted on 25 November 2021, not yet published in the Official Journal, will be applied from 1 January 2022).</p> <p><a href="#">Regulation (EU) 2020/852</a> (Taxonomy) on the establishment of a framework to facilitate sustainable investment.</p> <p><a href="#">Implementing and delegated acts</a></p> <p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a>.</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a>.</p> <p>Proposal for a COUNCIL DIRECTIVE restructuring the Union framework for the taxation of energy products and electricity (recast) <a href="#">COM/2021/563</a>.</p>	
13)	<p>30. Calls on the Commission to conduct a comprehensive impact assessment, a cost-benefit analysis and an availability analysis of retrofitting gas infrastructure or building dedicated new infrastructure, which is important for the use of green hydrogen, for its transport in large quantities and for the roll-out of hydrogen mobility;</p>	<p>Although Commission mentions point 30, no specific reply (a comprehensive impact assessment, a cost-benefit analysis and an availability analysis of retrofitting gas infrastructure) provided.</p>		<p><a href="#">Impact assessment SWD(2021)455</a> accompanying the Proposal for a Directive of the European Parliament and of the Council on common rules for the internal markets in renewable and natural gases and in hydrogen (recast) and the proposal for a Regulation of the European Parliament and of the Council on the internal markets for renewable and natural gases and for hydrogen (recast).</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	<p>32. Calls on the Commission to develop a harmonised definition of green hydrogen based on a transparent methodology; calls furthermore for a system of mutual recognition of Guarantees of Origin for these gases, proposing the development of a common certification scheme and a documentation system throughout the value chain, for example by issuing a green label;</p> <p>Calls on the Commission to ensure fair and effective competition between technologies and energy carriers and between imported hydrogen and hydrogen produced in the EU;</p>	<p>The Commission will consider common quality standards or cross-border operational rules to ensure interoperability of markets for pure hydrogen, as well as a comprehensive terminology for all renewable and low-carbon fuels and the certification of such fuels. Guarantees of origin for gas are already regulated in European legislation and will be mutually recognised.</p>		<p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a>.</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a>.</p>		
15)	<p>33. [...] calls on the Commission, in the context of the Energy System Integration Strategy, to enable operators to <u>transport</u> low-carbon gases such as hydrogen, biomethane, and synthetic methane;</p>	<p>As expressed in the Energy System Integration Strategy, further measures are needed to ensure that customers' decisions to save, switch or share energy properly reflect the life cycle energy use and footprint of the different energy carriers, including extraction [...] <u>transportation</u> and storage of energy, and the growing share of renewables in electricity supply.</p>		<p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen <a href="#">COM(2021)803</a>.</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">COM(2021)804</a>.</p>		
16)	<p>41. Calls on the Commission to propose eco-design requirements for batteries in order to enhance their recyclability by design;</p>	<p>Although Commission mentions point 41, no specific reply provided (on eco-design).</p>		<p>Not mentioned.</p>		
17)	<p>42. [...] urges the Commission to address this dependence in the relevant EU strategies; highlights the role of sustainable sourcing of raw materials and the potential of domestic raw material sources in EU;</p>	<p>The deployment of energy storage requires analysing the possible new dependencies for the EU, in particular regarding the supply of raw materials. Recent EU initiatives to address the dependency on raw materials include the 2017 list of critical raw materials for the EU and the abovementioned Strategic action plan on batteries, currently under implementation. Furthermore, the resilience of the supply chains in the energy sector, and in particular the storage industry, should be assessed.</p>		<p>Commission <a href="#">website</a> on the EU industrial strategy lists the industrial alliances.</p> <p>Updating the 2020 New Industrial Strategy: Building a stronger Single Market for Europe's recovery <a href="#">COM(2021)350</a>.</p> <p>Strategic dependencies and capacities Accompanying the Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions Updating the 2020 New Industrial</p>		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				Strategy: Building a stronger Single Market for Europe's recovery <a href="#">SWD(2021)352</a> .	
18)	43. [...] calls on the Commission to apply producer responsibility, with performance and safety guarantees, to the remanufacturer reintroducing the battery to the market;  [...] calls on the Commission to clarify the extended producer responsibility schemes (EPR) related to reused batteries;	Although Commission mentions point 43, no specific reply provided (on producer responsibility, with performance and safety guarantees).  Although Commission mentions point 43, no specific reply provided (on clarification of the extended producer responsibility schemes (EPR)).		Not mentioned.  Not mentioned.	
19)	45. Calls on the Commission to propose ambitious collection and recycling targets for batteries based on critical metal fractions when revising the Batteries Directive and after conducting an impact assessment;	The deployment of energy storage requires analysing the possible new dependencies for the EU, in particular regarding the supply of raw materials. Recent EU initiatives to address the dependency on raw materials include the 2017 list of critical raw materials for the EU and the abovementioned Strategic action plan on batteries, currently under implementation.		Proposal for a Regulation concerning batteries and waste batteries, repealing Directive 2006/66/EC and amending Regulation (EU) No 2019/1020 <a href="#">COM(2020)798</a> .	
20)	46. Calls on the Commission to develop guidelines and/or standards for repurposing batteries from electric vehicles, including testing and grading processes, as well as safety guidelines;	Regarding electrochemical storage (points 36-48), as recognised by the resolution, the Commission's strong commitment to batteries is already reflected in the European Battery Alliance and the Batteries Europe Platform, which the Commission will continue to support.  The strategic imperative for batteries remains the creation of competitive and sustainable industrial value chain in Europe. Within Horizon Europe, the Commission is planning a Strategic action plan to set up a co-programmed R&I partnership on batteries that will cover the entire battery value chain. Batteries R&I Partnership is to establish the world best sustainable and circular European battery value chain to drive the transformation towards a carbon-neutral society. The Partnership ambition is to prepare and equip Europe to manufacture and commercialise by 2030 the next-generation of battery technologies, through results-oriented innovation programme, which will enable the rollout of the zero-emission mobility and renewable energy		<a href="#">Horizon Europe</a> , batteries are part of Cluster 5 on climate, energy and mobility.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		storage, thus directly contributing to the success of the European Green Deal. For example, the first IPCEI package on the battery value chain already involved 7 Member States and 17 companies.			
21)	50. [...] calls on the Commission to prioritise the necessary energy transition, to conduct a comprehensive review of the relevant legislation, and to propose changes where necessary, minimising environmental impact;	Regarding mechanical storage (points 49-52), pumped hydro storage is a key storage technology for the energy system, which amounts to more than 90% of the installed storage capacity in the EU. A possible strategy on energy storage could look at the relevant legislation and consider the need for changes while ensuring, where necessary, that negative environmental impacts are minimised.		Because of a general character of the promise, it is unclear whether the Commission will present a strategy on energy storage.	
22)	53. [...] calls on the Commission and the Member States to support and develop highly energy-efficient district heating networks; moreover, calls on the Commission to take heat infrastructure and thermal storage into account when developing the Ten-Year Network Development Plans for both the European Network of Transmission System Operators for Electricity (ENTSO-E) and the European Network of Transmission System Operators for Gas (ENTSO-G);	Regarding thermal storage (points 53-60), the Commission will promote the development of: 1) Thermal energy storage (for space heating, hot tap water, cooling) for electricity load shifting, which reduces the demand for electricity from the grid at peak times; 2) Intermediate period compact thermal energy storage in buildings, which optimise and increase the use of varying solar and wind sources in buildings that do not have district heating and cooling network connections.		Ten-Year Network Development Plan for <a href="#">ENTSO-E</a> and <a href="#">ENTSO-G</a> .	
23)	54. [...] calls on the Commission and the Member States to support research and development for these solutions and to implement large-scale pilot plants;	Regarding thermal storage (points 53-60), the Commission will promote the development of [...] Large scale Thermal Energy Storage for district heating and cooling by incorporating/connecting also heat pumps and cogeneration units.		Ten-Year Network Development Plan for <a href="#">ENTSO-E</a> and <a href="#">ENTSO-G</a> .	
24)	55. [...] calls on the Commission to promote innovative thermal storage concepts such as heat-to-electricity storage and ice storage;	Although Commission mentions point 55, no specific reply provided (on promoting ice-storage).		Not mentioned.	
25)	58. [...] calls on the Commission to spur energy efficiency renovations in its upcoming renovation wave strategy;	Commission points out that as part of the Renovation Wave initiative, several actions will promote the further electrification of buildings, the deployment of on-buildings		Renovation Wave for Europe - greening our buildings, creating jobs, improving lives <a href="#">COM(2020)662</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		renewable energy and the roll-out of electric vehicle charging points.		Proposal for a Directive on energy efficiency (recast) <a href="#">COM(2021)558</a> .	
26)	59. [...] Calls on the Commission to consider the role of thermal storage and heating infrastructure in bringing flexibility to the energy system in the upcoming Energy System Integration Strategy;	As expressed in the Energy System Integration Strategy, the Commission will facilitate the reuse of waste heat from industrial sites and accelerate investment in smart, highly-efficient, renewables-based district heating and cooling networks, including through the application of the energy-efficiency-first principle and, if appropriate, by proposing stronger obligations through the revision of the Renewable Energy Directive and the Energy Efficiency Directive.		Proposal for a Directive on energy efficiency (recast) <a href="#">COM(2021)558</a> .  Proposal for a Directive amending Directive (EU) 2018/2001 of the European Parliament and of the Council, Regulation (EU) 2018/1999 of the European Parliament and of the Council and Directive 98/70/EC of the European Parliament and of the Council as regards the promotion of energy from renewable sources, and repealing Council Directive (EU) 2015/652, <a href="#">COM(2021)557</a> .	
27)	63. [...] calls on the Commission to properly monitor the correct implementation of the Electricity Market Directive and of Directive (EU) 2018/2001 (the Renewable Energy Directive) as regards those articles establishing a regulatory framework for self-consumers and energy communities;	The Commission will ensure the correct implementation of the CEAP, that the recast <a href="#">Renewable Energy Directive 2018/2001/EU</a> takes a part of.		Proposal for a Directive amending Directive (EU) 2018/2001 of the European Parliament and of the Council, Regulation (EU) 2018/1999 of the European Parliament and of the Council and Directive 98/70/EC of the European Parliament and of the Council as regards the promotion of energy from renewable sources, and repealing Council Directive (EU) 2015/652, <a href="#">COM(2021)557</a> .	
28)	640. [...] calls on the Commission to create an enabling framework ensuring that the functionality to provide such services is enabled by EV producers, the charging software and the charging station, and to achieve full interoperability in the framework of a revised Alternative Fuels Directive;	As indicated in the Energy System Integration Strategy, the revision of the Alternative Fuels Infrastructure Directive will serve to accelerate the roll-out of zero-emission vehicles, including electric ones, strengthen interoperability requirements, ensure adequate customer information, cross-border usability of charging infrastructure, and the efficient integration of electric vehicles in the electricity system, including, where appropriate, the facilitation of smart charging and development of vehicle-to-grid potential. In the same Strategy, the crucial role of digitalisation for the management of decentralised energy solutions and flexible energy consumption has been highlighted. In addition, as part of the Renovation Wave		Proposal for a Regulation on the deployment of alternative fuels infrastructure, and repealing Directive 2014/94/EU of the European Parliament and of the Council <a href="#">COM(2021)559</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		initiative, several actions will promote the further electrification of buildings, the deployment of on-buildings renewable energy and the roll-out of electric vehicle charging points.			

## 4.1.20.2. ITRE Resolution 2: EP resolution of 17 September 2020 on maximising the energy efficiency potential of the EU building stock

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Maximising the energy efficiency potential of the EU building stock</b>		17/09/2020 <a href="#">T9-0227/2020</a> <a href="#">2020/2070(INI)</a> ITRE	<a href="#">SP(2020)597</a>	Final reply (SP) received 11 February 2021		Mixed reply	
1)	4. Calls on the Commission to assess the impact of the gentrification and 'renoviction' of neighbourhoods, as well as gender disparities and the situation of vulnerable citizens;		Although the follow-up mentions point 4, no specific reply is provided to this particular point (assessing impact of the gentrification and 'renoviction' of neighbourhoods, as well as gender disparities and the situation of vulnerable citizens).			Not mentioned.	
2)	12. Calls on the Commission to adopt a policy facilitating IRPs at community and regional level in the Member States providing for deep renovations, including staged deep renovations, and taking buildings' needs into account in an inclusive and interactive manner; <i>stresses the opportunity to secure more on-site and nearby renewable energy solutions or to demand response mechanisms through IRPs;</i>		The Commission will launch an Affordable Housing Initiative that will pilot 100 lighthouse renovation districts in a smart neighbourhood approach and provide blueprints for replication.			The affordable housing initiative is part of the Renovation Wave strategy and action plan, <a href="#">website</a> .	
3)	12. [...] calls on the Commission to step up work on the Covenant of Mayors for Climate and Energy and the EU City Facility; further highlights, in this context, the major importance of the urban agenda and the urban partnership;		Although the follow-up mentions point 12, no specific reply is provided to this particular point (on the Covenant of Mayors for Climate and Energy and the EU City Facility).			Not mentioned.	
4)	15. Calls on the Commission to set up a support service for citizen-led renovation projects, as well as to issue implementing guidelines to Member States regarding the concepts of an enabling framework and level playing field for energy communities introduced by the Electricity Market		To exploit the potential of energy communities, the Commission will look closely into the implementation of the Electricity Market Directive and the Renewable Energy Directive and use concerted actions to support their creation and diffusion across Member States.			Renewable Energy Progress Report <a href="#">COM(2020)952</a> . Proposal for a revised Renewable Energy Directive <a href="#">COM(2021)557</a> , 2021/0218(COD) includes a briefing on the results of the ex-post evaluation of the previous Directive. COM(2021)557, 2021/0218(COD).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Directive <sup>7</sup> and the RED, so as to ensure successful implementation and fully recognise the benefits of citizen-led energy projects;			<a href="#">Progress report</a> on Internal Energy Market COM (2020) 950 <a href="#">ANNEX 1</a> .	
5)	16. Calls on the Commission to immediately launch platforms, as indicated in its communication on the European Green Deal, and include these platforms as a key priority in the IRPs;	Although the follow-up mentions point 16, no specific reply is provided to this particular point (immediately launch platforms, as indicated in its communication on the European Green Deal, and include these platforms as a key priority in the IRPs).  Nevertheless, further Commission mentions that the Commission will put in place measures to increase reuse and recycling platforms and support a well-functioning internal market for secondary raw materials.		Commission Level(s), <a href="#">website</a> .  European Circular Economy Stakeholder Platform, <a href="#">website</a> .	
6)	30. [...] urges the Commission to issue implementing guidelines on the relevant provisions within the 'clean energy for all Europeans' package, in particular to create an enabling framework by requiring regular consultations to understand market needs, and encourage the blending of private and public funds, the use of clear templates for contracts and specific procurement procedures with further clarifications on correctly accounting for building efficiency-related public investments;	Although the follow-up mentions point 30, no specific reply is provided to this particular point (on issuing implementing guidelines on the relevant provisions within the 'clean energy for all Europeans' package).		Not mentioned.	
7)	31. Calls on the Commission to revise energy efficiency targets upwards, as required by the EED, starting by increasing the headline target for 2030 based on a proper impact assessment and in a predictable manner, and to propose minimum annual renovation rates for buildings and policy	The Parliament calls for the upcoming revision of the EED to include an increased level of ambition in Articles 3 (Energy Efficiency Targets), 5 (Exemplary role of public bodies' buildings) and 18 (Energy Services). As set out in its Communication on the 2030 Climate Target Plan "Stepping up Europe's 2030 Climate Ambition" <sup>8</sup> , the impact		Proposal for an energy efficiency Directive (recast) <a href="#">COM(2021)558</a> .	

<sup>7</sup> Directive (EU) 2019/944 of the European Parliament and of the Council of 5 June 2019 on common rules for the internal market for electricity and amending Directive 2012/27/EU (OJ L 158, 14.6.2019, p. 125).

<sup>8</sup> Stepping up Europe's 2030 Climate Ambition (COM(2020) 562 final)

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	measures ensuring deep, including staged deep renovations creating financial triggers and investment stability;	assessment accompanying the communication <sup>9</sup> shows that energy efficiency improvements will need to be significantly stepped up to around 36% in terms of final energy consumption. The Commission is currently preparing the proposal for a revision of the Energy Efficiency Directive for June 2021; in this context, the Commission will examine the need to extend the renovation requirements to buildings at all public administration levels, including the Commission, and to increase the annual renovation rate. As already mentioned above, the Commission will in this context also propose to expand the use of energy service companies (ESCOs) and energy performance contracts.			
8)	33. Calls on the Commission to lift the financial and non-financial barriers to higher absorption rates of the regional funds set aside for integrated building renovation by 2021;	Although the follow-up mentions point 33, no specific reply is provided to this particular point (to lift the financial and non-financial barriers to higher absorption rates of the regional funds set aside for integrated building renovation by 2021).  Nevertheless, the Commission seconds the Parliament's view that financing schemes should incentivise and prioritise deep renovations. In order to steer financing towards sustainable investments in deep renovations, the Commission will consider introducing a 'deep renovation' standard as part of the Energy Performance of Buildings Directive (EPBD) revision.		Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a> .	
9)	35. Calls on the Commission to study the feasibility of channelling ETS revenues into energy efficiency actions such as for building renovations, including safeguarding mechanisms against fluctuations, and the feasibility of earmarking a portion of the auctioning revenue at EU level;	Although the follow-up mentions point 35, no specific reply is provided to this particular (to study the feasibility of channelling ETS revenues into energy efficiency actions such as for building renovations).		"The <a href="#">proposal</a> for a separate, upstream system for road transport and buildings will regulate fuel suppliers rather than households and car drivers. The new system is designed to start in an orderly, smooth and efficient manner from 2026, while delivering a clear signal on ambition.	

<sup>9</sup> SWD/2020/176 final

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Nevertheless, the Commission declares that it stands ready to advise Member States that are considering using revenues from the EU ETS and funding opportunities under the ETS Modernisation Fund as a source of funding for building renovation programmes, in particular for lower-income households.</p>		<p>To address the social impacts of the extension of emissions trading to road transport and buildings, the Commission has also presented a proposal for a Social Climate Fund.</p> <p>More generally, the Commission proposes that Member States spend the entirety of their revenues from the auctioning of emissions allowances under the EU ETS and the new system for climate action and energy system transformation, including measures to decarbonise the road transport and buildings sectors. "</p> <p>Proposal amending Directive 2003/87/EC establishing a system for greenhouse gas emission allowance trading within the Union, Decision (EU) 2015/1814 concerning the establishment and operation of a market stability reserve for the Union greenhouse gas emission trading scheme and Regulation (EU) 2015/757 <a href="#">COM(2021)551</a>.</p>	
10)	<p>36. Calls on the Commission and the Member States to create flexible models for the synergies of different financial programmes and instruments for financing energy efficiency in buildings;</p>	<p>Although the follow-up mentions point 36, no specific reply is provided to this particular ( to create flexible models for the synergies of different financial programmes and instruments for financing energy efficiency in buildings).</p> <p>Nevertheless, In accordance with the Parliament's calls to increase absorption rates of funds through technical assistance and to step up the capability of the ELENA (European Local Energy Assistance) facility, the Commission has proposed strengthened financing for the ELENA facility from the InvestEU Advisory Hub and possibly from other European programmes. Together with the EIB, the Commission will help Member States to design national or local programmes replicating the ELENA model.</p>		<p>EU funding on building renovations, <a href="#">website</a>.</p>	
11)	<p>37. Calls on the Commission to further facilitate the use of public private partnerships (PPPs), such as PF4EE, relating to smart and sustainable</p>	<p>Although the follow-up mentions point 37, no specific reply is provided to this particular (Commission to further facilitate the use of public private partnerships (PPPs).</p>		<p>Not mentioned.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	financing, and identifying possible local investment concepts;				
12)	38. Calls on the Commission to revise EU State aid rules, including for investments by small and medium-sized enterprises (SMEs), in order to create an enabling framework for energy efficiency measures and foster IRPs, including the installation or refurbishment of district heating systems through simplified procedures and adequate thresholds, as well as scrapping schemes for fossil fuel heating devices and inefficient appliances when replaced by individual or collective renewables-based heating, or excess heating; underlines, however, that any revision of EU State aid rules must primarily contribute to equal treatment and increased competition;	Following the Parliament's request to revise EU state aid rules to create an enabling framework for energy efficiency measures, the Commission will (as part of the ongoing revision of the General Block Exemption Regulation and the Energy and Environmental Aid Guidelines) set up simpler, clearer and easier-to-apply State Aid rules for building renovation, in particular in the residential and social sectors, and clarify the scope of State Aid for renewable energy installations for self-consumption. As a first step, the Commission is revising State aid rules to facilitate co-financing of InvestEU guarantees by Member States.		<a href="#">Review</a> of Horizontal Block Exemption Regulations, planned for 2022.  State aid for environmental protection and energy – <a href="#">revised guidelines</a> , adopted on 21 December 2021.	
13)	40. <i>Emphasises the importance of flexibility in the choice of technologies used for renovation and construction; believes that all available technologies should be applied in an objective-driven approach to speed up the decarbonisation of the building stock; underlines that the use of renewable energy plays a crucial role in such decarbonisation; stresses the importance of decarbonised district heating and cooling with integrated storage for more connected and integrated communities; calls, therefore, on the Commission and the Member States to actively promote and incentivise the full integration of renewable energies into the building sector;</i>	The Commission shares the Parliament's view that the integration of renewable energies into the building sector has to be further promoted. As part of the revision of the Renewable Energy Directive by June 2021, and based on a thorough impact assessment, the Commission will consider strengthening the existing renewable heating and cooling target in accordance with the proposed higher climate target ambition for 2030 and introducing a requirement to use minimum levels of renewables in buildings, and will propose measures for facilitating access to waste and renewable heat and cold. For the latest products, which integrate renewable energy, such as from photovoltaics, the Commission will map challenges encountered by these products on the single market and consider ways to remove identified barriers.		Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a> .  Proposal for a revised Renewable Energy Directive <a href="#">COM(2021)557</a> , 2021/0218(COD) includes a briefing on the results of the ex-post evaluation of the previous Directive.	
14)	41. Calls on the Commission to support research and development (R&D) programmes for efficient			<a href="#">Horizon 2020</a> : Energy Efficiency, including energy performance of buildings.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>construction materials and, taking into account the social situation, calls for a low-cost renewable energy-based heating system to be implemented in rural and remote areas; points to the Danish best practice concerning heat decarbonisation through community-owned district heating networks powered by solar heat, heat pumps and biomass;</p>	<p>In accordance with Parliament’s call to support research and development (R&amp;D) programmes for efficient construction materials, the European Green Deal Call, part of Horizon 2020, includes an area dedicated to ‘Energy and resource-efficient buildings’.</p>		<p>RRF Build up flagship including buildings renovations.</p>	
15)	<p>42 [...] calls on the Commission and Member States to propose scrapping schemes in accordance with the circular economy and to use efficiency labelling and advice during routine check-ups to accelerate replacements;</p>	<p>Although the follow-up mentions point 42, no specific reply is provided to this particular point (on scrapping schemes). Nevertheless, the Commission agrees with the Parliament that consumers should be incentivised to replace old, inefficient heating and cooling technologies. The EU legislation on Ecodesign sets minimum energy efficiency standards for such technologies, eliminating the least performing products from the market. In addition, the EU legislation on Energy Labelling provides consumers with information on the most efficient products and steers financial incentives towards the highest performing ones<sup>10</sup>. The Ecodesign Framework Directive and the product-specific Ecodesign and energy labelling delegated and implementing acts will further be developed to continue promoting high environmental standards.</p>		<p><a href="#">Revision</a> of the Eco-design and Ecolabelling legislation is envisaged for <a href="#">Q1 2022</a>.</p>	
16)	<p>48 Stresses the need for the adequate management and reduction of construction and demolition waste; notes that collection and take-back schemes and sorting facilities should be created to ensure the appropriate and safe handling of all construction waste, as well as for the recycling or reuse of building materials, for the safe handling, removal and substitution of hazardous substances in waste streams in order to protect the health of occupants</p>	<p>As regards measures to reduce construction and demolition waste, by the end of 2024, the Commission will review the material recovery targets set in the EU legislation for construction and demolition waste. The Commission will put in place measures to increase reuse and recycling platforms and support a well-functioning internal market for secondary raw materials. The Commission’s recent Level(s) framework for sustainable buildings is a tool to help</p>		<p>A <a href="#">revision</a> of the Construction Product Regulation is foreseen for <a href="#">Q1 2022</a>.</p>	

<sup>10</sup> See Article 7(2) of the Energy Labelling Framework Regulation (EU) 2017/1369

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p><i>and workers, as well as the environment; believes that a circular economy labelling system, based on environmental standards and criteria for materials linked to their potential for easy and low-energy reintroduction into the value chain, especially taking into account the role of secondary raw materials, should be established; notes that the existing Environmental Product Declaration approach must be widened and that it should be used as input for building assessment such as the Level(s) framework; calls on the Commission to propose concrete measures on these issues as part of the circular economy action plan and the strategy for a sustainable built environment;</i></p>	<p>architects, builders and public authorities to improve the sustainability of buildings throughout their lifecycle.</p>			
17)	<p>49 [...] calls on the Commission and the Member States to incentivise the use of natural and low-carbon building materials, the deployment of green rooftops and walls, cool surfaces and other passive techniques during major building renovations and the construction of new buildings; calls on the Commission to take these considerations into account and promote green infrastructure solutions and biodiversity features in the renovation wave initiative;</p>	<p>In line with the Parliament's views, the Commission considers life-cycle thinking, high health and environmental standards and fire safety as key principles for building renovation. The Commission will promote green infrastructure and the use of organic building materials that can store carbon, such as sustainably-sourced wood, and thereby turn buildings into a carbon sink. The New European Bauhaus, as announced by President von der Leyen in her State of the Union speech on 16 September 2020, will foster innovative solutions in terms of architecture and materials, including nature-based materials such as wood. By 2023, the Commission will develop a roadmap leading up to 2050 for reducing whole life-cycle carbon emissions in buildings. The Commission agrees with the need to improve buildings' climate resilience and will accelerate work with standardisation organisations on climate resilience standards for buildings.</p> <p>Public buildings and social infrastructure are indeed a focus area of the Renovation Wave strategy. In addition to strengthening the requirements for public buildings in the</p>		<p><a href="#">New Bauhaus Initiative</a> A <a href="#">revision</a> of the Construction Product Regulation is foreseen for <a href="#">Q1 2022</a>. 		EED and the introduction of minimum energy performance standards in the context of the revision of the EPBD, the Commission will, by June 2022, look into the possibility to develop green public procurement criteria for public buildings such as office buildings and schools, related to life-cycle considerations and climate resilience and based on Level(s).			
18)	51 [...]; calls on the Commission to address these in the circular economy strategy and to revise, by 2021, Regulation (EU) No 305/2011 on harmonised conditions for the marketing of construction products <sup>11</sup> to allow the good functioning of the internal market for these products and reward technological research and innovation aimed at supporting the renovation and construction of highly energy-efficient buildings;	As announced in the Circular Economy Action Plan and as called for by the Parliament, the Commission will address the sustainability performance of construction products in the context of its revision of the Construction Product Regulation. As announced in the Circular Economy Action Plan and as called for by the Parliament, the Commission will address the sustainability performance of construction products in the context of its revision of the Construction Product Regulation.		A <a href="#">revision</a> of the Construction Product Regulation is foreseen for <a href="#">Q1 2022</a> .	
19)	52. Calls on the Commission to further identify best practices for IRPs to also include historic and heritage buildings; acknowledges the specificity and the fragility of heritage buildings;	Although the follow-up mentions point 36, no specific reply is provided to this particular (on further identify best practices for IRPs to also include historic and heritage buildings; acknowledges the specificity and the fragility of heritage buildings);		Not mentioned.	
20)	63. Calls on the Commission to launch an EU skills and information initiative in the renovation and building sector, which includes a gender dimension, in order to engage with stakeholders in retraining, upskilling and capacity building, with a focus on employment, in particular to attract young people to work in the renovation sector; underlines that ensuring quality,	Building on the 2020 Skills Agenda and the Blueprint for sectoral cooperation on skills, the Commission will launch the Pact for Skills bringing together private and public stakeholders with the shared objective of up- and reskilling Europe's workforce, including in renovation and building.		Pact for Skills, <a href="#">website</a> .	

<sup>11</sup> Regulation (EU) No 305/2011 of the European Parliament and of the Council of 9 March 2011 laying down harmonised conditions for the marketing of construction products and repealing Council Directive 89/106/EEC (OJ L 88, 4.4.2011, p. 5).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	compliance and safety requires the professionals involved during the design and construction/renovation phases to be in possession of adequate competencies and skills, and that this includes intermediaries, such as installers, architects or contractors;				
21)	64. Calls on the Commission to support skills and innovation for IRPs through the Just Transition Fund, targeted Marie Skłodowska-Curie actions and the Erasmus+ programme, and to establish a Horizon Europe mission on the renovation of communities and neighbourhoods, as well as the Education, Audiovisual and Culture Executive Agency (EACEA) to promote and implement a strategic skills alliance for the construction sector, aimed at designing and delivering common training content to tackle existing skill gaps;	The Commission agrees with the importance and potential of the Just Transition Fund for the training and qualification of workers in the construction and renovation sectors, as underlined by the Parliament, and encourages Member States to make use of the Just Transition Fund, as well as of the NextGenerationEU funds and the European Social Fund+, for this purpose.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
22)	65. Calls on the Commission to release in-depth impact assessments of building, occupier and tenure typologies by 2022, and to develop a legislative framework for the introduction of MEPS for existing buildings that are to be progressively tightened over time in line with the 2050 objective;	The Commission agrees with the Parliament's call to develop a legislative framework for the introduction of minimum energy performance standards for existing buildings that are to be progressively tightened over time in line with the 2050 objective. As part of the revision of the EPBD by the end of 2021, the Commission will propose mandatory minimum energy performance standards, following an impact assessment looking at the scope, timeline and phasing of a progressive implementation of such requirements, including the need for accompanying support policies.		Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a> .	
23)	66. Calls on the Commission and Member States to introduce expedited digital building renovation passports by 2025, including a section providing information on improved indoor air quality and healthy buildings;	The Commission will propose Building Renovation Passports, and Digital Building Logbooks that will integrate all building-related data provided by Building Renovation Passports, Smart Readiness Indicators, Level(s) and Energy Performance Certificates.		Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a> .	
24)	67. Calls on the Commission to develop an 'EU climate calculator' (ECC) as part of its 'renovation				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>wave' that will ensure accurate and easy understandable labelling for building materials, products and services related to the renovation of the EU building stock in the run-up to 2050 [...] suggests to the Commission that it use already known scientific methods when estimating GHG emissions, for example by taking inspiration from its 'product environmental footprint';</p>	<p>Although the follow-up mentions point 36, no specific reply is provided to this particular (on EU climate calculator).</p>		<p>Not mentioned.</p>	
25)	<p>69. Calls on the Commission to review the impact of Energy Performance Certificates (EPCs) across Member States and to strengthen existing provisions;</p>	<p>In line with the Parliament's call to review the impact of Energy Performance Certificates (EPCs) across Member States and to strengthen existing provisions, the Commission will propose to update the EPC framework, taking into account emerging energy performance metering technologies and introducing more stringent provisions on availability and accessibility of databases and digital repositories for EPCs</p>		<p>Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a>.</p>	
26)	<p>71. Calls on the Commission to look into the reliability and the lack of building-related data and take into account how the further use of digitalisation can contribute positively in order to ensure a strong evidence-based approach when adopting policies related to energy efficiency and renovations;</p>	<p>The Parliament calls on the Commission to look into the reliability and the lack of building-related data. As set out above, the Commission will propose Digital Building Logbooks as digital repositories for EPCs and other data. In the context of updating the EPC framework, the Commission will look into a uniform EU machine-readable data format for EPCs. The Commission will also explore with Member States, stakeholders, market players and data providers whether the European Building Stock Observatory could become a central European repository for reliable data on the building stock.</p> <p>The Parliament welcomes the promotion of smart buildings technologies through a smart readiness indicator (SRI) as a support tool in rating the smart readiness of buildings. On</p>		<p>Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		14 October, the Commission presented the new Smart Readiness Indicator <sup>12</sup> .			
27)	77. Calls on the Commission to evaluate the need to review the charging infrastructure requirements in the EPBD;	As requested by the Parliament, the Commission will evaluate the need to review the charging infrastructure requirements in the EPBD.		Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a> .	
28)	81. Calls on the Commission to make the energy efficiency first principle central to the process of the renovation of the EU building stock in line with the Energy Union Governance Regulation;	The Commission shares the Parliament's conviction that the renovation wave can mitigate the impact of the COVID-19 crisis by stimulating national and local economies.		Proposal for Directive on the energy performance of buildings (recast) <a href="#">COM(2021)802</a> .  Recovery and Resilience Facility, <a href="#">flagship Build up and Renovation</a> .	
29)	87. Calls on the Commission to enshrine the renovation wave's measures into new and revised EU legislation and review the 2030 climate and energy targets while fully respecting the principle of subsidiarity and cost-efficiency, to enable synergies between different pieces of legislation and to put them on a trajectory towards climate neutrality, while ensuring that energy efficiency measures, including the renovation of buildings, is integrated as a key policy to fill the gap in the 2030 targets;	As requested by the Parliament, the Commission has provided an overview of all available funding options in a staff working document accompanying the Renovation Wave communication <sup>13</sup> .		Support from the EU budget to unlock investment into building renovation under the Renovation Wave <a href="#">SWD(2020)550</a> .	
30)	88. Calls on the Commission to assess the LTRs and issue recommendations to the Member States highlighting both existing gaps and best practices;	Like the Parliament, the Commission considers national long-term renovation strategies (LTRS) a key instrument for planning, measuring progress and the achievement of energy efficiency objectives. The Parliament calls on the Commission to assess the LTRs and issue recommendations		Commission analysis of the national long-term renovation strategies <a href="#">SWD(2021) 365 final/2</a> .	

<sup>12</sup> Commission Delegated Regulation C(2020) 6930, supplementing Directive (EU) 2010/31/EU of the European Parliament and of the Council by establishing an optional common European Union scheme for rating the smart readiness of buildings ), and Commission Implementing Regulation C(2020) 6929, detailing the technical modalities for the effective implementation of an optional common Union scheme for rating the smart readiness of buildings.

		to the Member States highlighting both existing gaps and best practices, which the Commission will do as soon as possible, based on the submission rate by Member States. The Commission shares the Parliament's concern at the significant delays on the part of many Member States in submitting their LTRS.			

## 4.1.20.3. ITRE Resolution 3: EP resolution of 25 November 2020 on new Industrial Strategy for Europe

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
New Industrial Strategy for Europe	25/11/2020 <a href="#">T9-321/2021</a> <a href="#">2020/2076(INI)</a> ITRE	<a href="#">SP(2021)129</a>	Final reply (SP) received 2 June 2021	Mixed reply		
1)	<p>1. [...] calls on the Commission to define a comprehensive revised industrial strategy which will provide a clear policy framework and regulatory certainty, and, inter alia:</p> <p>(a) creates the conditions for long-term growth, improves the Union's innovation-based prosperity and global competitiveness and achieves climate neutrality;</p> <p>(b) mobilises the appropriate financial resources, including measures for recovery;</p> <p>(c) supports and manages the twin green and digital transitions, maintaining and creating high-quality jobs;</p> <p>(d) delivers on the European Green Deal (EGD);</p> <p>(e) secures, makes more sustainable, diversifies and digitalises strategic value chains, also by promoting and supporting rules-based international trade;</p> <p>(f) strengthens the entrepreneurial spirit, creates a business-friendly environment, supports SMEs and encourages the creation and upscaling of companies, including start-ups;</p> <p>(g) improves the Union's strategic resilience and autonomy, including in raw materials, and enhances technological leadership;</p>	<p>The European Green Deal is Europe's new growth strategy. It guides the transformation of European industry and is an integral part of the industrial strategy (points 1, 11, 49 and 51).</p> <p>[...]</p> <p>The objectives of the new industrial strategy also guide the European Recovery Plan presented by the Commission in May 2020, which is historic both in its volume and in its political, institutional and budgetary architecture. The European Recovery Plan will address the immediate economic and social damage brought by the coronavirus pandemic, kick-start a sustainable and prosperous recovery and protect and create jobs, and invest in the green and digital transitions and a more resilient European industry.</p> <p>[...]</p> <p>As announced by President von der Leyen in her State of the Union speech in September, the Commission will update the Industrial Strategy in the first half of 2021, taking into account the accelerated green and digital transformation and the changing global competitive landscape (points 1, 10, 11, 12, 48 and 50).</p>		<p>In the <a href="#">2021 Commission Work Programme</a> (CWP), the Commission stated its intention to update the new industrial strategy for Europe to take into account the impacts of the COVID-19, the global competitive context, and the acceleration of the twin green and digital transitions. In the <a href="#">annexes</a> to the CWP, the</p> <p>In its Communication of 9 March 2021, the President von der Leyen called for <a href="#">the course towards a digitally empowered Europe by 2030</a>.</p> <p>On 5 May 2021, the Commission adopted a <a href="#">Communication on Updating the 2020 New Industrial Strategy: Building a stronger Single Market for Europe's recovery</a>.</p>		

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	(h) creates the conditions for equal development and encourages it across all the Union's regions, while leaving no-one behind;				
2)	2. [...] calls on the Commission to put in place a Union policy that matches the number of jobs that may be lost in the traditional industries with the demand for labour in the digital and green transformation industries; encourages the Commission and the Member States, since these new jobs are unlikely to be created in the same regions that would lose traditional industries, or to be taken up by the same workers, to facilitate the economic and social revitalisation of territories risking depopulation and impoverishment, paying particular attention to gender disparities;	<p>Implementing the new industrial strategy requires a renewed partnership between EU institutions, Member States, regions and cities, industry, including SMEs and big companies, social partners, researchers and other stakeholders (points 2 and 85).</p> <p>[...]</p> <p>Thanks to Europe's social market economy, economic growth goes hand-in-hand with improved social and living standards and good working conditions. The European Pillar of Social Rights will continue to be the Commission's compass and help ensure the twin green and digital transitions are socially fair and address the social consequences of structural change (points 2 and 4).</p> <p>[...]</p> <p>As announced in the strategy, the Commission has set up an Industrial Forum (points 2, 53, 56 and, 85).</p> <p>[...]</p> <p>The COVID-19 pandemic has disrupted both the economic and social reality. Given the important social implications of the changes ahead, dialogue with social partners and civil society is essential (point 2).</p>		<p>Latest news on <a href="#">Industrial Strategy</a>.</p> <p>Updating the 2020 New Industrial Strategy: Building a stronger Single Market for Europe's recovery <a href="#">COM(2021) 350 final</a>, 5 May 2021.</p> <p>On 4 March 2021, the European Commission presented <a href="#">The European Pillar of Social Rights Action Plan   European Commission</a>.</p> <p>The Action Plan was published together with a <a href="#">Commission Recommendation for Effective Active Support to Employment</a> (EASE), which addresses labour market transitions in the context of the recovery and the twin transitions.</p> <p>The Action Plan constitutes the Commission's contribution to the Porto Social Summit in May 2021, which will be an occasion to rally forces to renew, at the highest political level, the commitment to the Social Pillar.</p> <p><a href="#">1st meeting of the Industrial Forum</a> took place on 1 February 2021.</p>	
3)	4. [...] calls on the Commission, therefore, to ensure that this transition fosters conditions for job creation that are fair and socially just in the spirit of the no-one-left-behind principle, going hand in hand with the full implementation of the European Pillar of Social Rights, improvement of social and living standards and good working conditions;	<p>In 2014-2020, the Commission has provided support from direct management programmes like Horizon2020-Innosup1 and COSME cluster partnerships for smart specialisation, internationalisation and cluster management capacity. In 2021-2027, these efforts will be further continued in the form of Joint Cluster Initiatives as one of the measures envisaged in the Single Market Programme. The cooperation between clusters in different regions helps identifying weaknesses in the supply chains</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>and find alternative suppliers in case of disruptions. Through its Policy Objective 1, the European Regional Development Fund 2021-2027 will also invest in more competitive and smarter Europe by promoting innovative and smart transformation. The industrial transition challenges are also addressed by the smart specialisation strategies, prepared by the regions in a place-based and bottom up approach. The Commission will also support regions build on the success of the Smart Specialisation Platform for Industrial Modernisation for the future and connect this work to the new EU Industrial priorities (points 4 and 74).</p> <p>[...]</p> <p>The Commission agrees on the importance of education and life-long learning for the competitiveness of industry and the creation of quality jobs. As the twin green and digital transition gathers speed, millions of Europeans will have to upskill or reskill and new jobs will be created (points 3, 4, 6 and 7).</p> <p>[...]</p> <p>Additionally, the Commission also presented in September 2020 the Digital Education Action Plan (2021-2027) (COM(2020) 624 final), proposing a set of initiatives for high-quality, inclusive and accessible digital education in Europe. The plan aims to strengthen the cooperation and exchange between Member States in digital education at EU level and to support Member States, education and training institutions and citizens in their efforts to adapt to the digital transition and help ensure a fair and inclusive recovery for all (points 3, 4, 6 and 7).</p> <p>[...]</p> <p>Thanks to Europe's social market economy, economic growth goes hand-in-hand with improved social and living standards and good working conditions. The European</p>		<p>Joint Cluster Initiatives fully operational in 2021 <a href="#">Funding and tenders for clusters   European Cluster Collaboration Platform.</a></p> <p><a href="#">European Skills Agenda.</a></p> <p>See EC <a href="#">website</a> on EU funding instruments for upskilling and reskilling.</p> <p>Digital Education Plan <a href="#">website</a> and communication <a href="#">COM(2020)624</a> on Digital Education Action Plan 2021-2027, resetting education and training for the digital age.</p> <p>On 4 March 2021, the Commission presented <a href="#">The European Pillar of Social Rights Action Plan   European Commission.</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Pillar of Social Rights will continue to be the Commission's compass and help ensure the twin green and digital transitions are socially fair and address the social consequences of structural change (points 2 and 4). [...]</p> <p>The Commission agrees that as the transition picks up speed, it has to be ensured that no one is left behind. To this end, the Commission has proposed to set up a Just Transition Mechanism (JTM) as part of the European Green Deal to support those regions most affected by a transition towards a climate-neutral economy. The Mechanism will provide targeted support over the period 2021-2027 to alleviate the socio-economic impact of the transition in the most affected regions (points 3, 4 and 74). [...]</p> <p>The three JTM financing pillars will be tied together by territorial just transition plans, identifying the most impacted territories that should be supported. The territorial Just Transition Plans, prepared by Member States and approved by the Commission, will need to be aligned with the European Pillar of Social Rights. Member States will need to justify how planned investments contribute to revitalising affected territories while addressing the social consequences of the transition (point 4). [...]</p> <p>The public sector loan facility with the EIB, under the Just Transition Mechanism, is expected to mobilise between EUR 25 and 30 billion of investments. The loan facility will rely on a contribution of EUR 1.5 billion from the EU budget and an EIB lending of EUR10 billion at its own risk. It will be used for concessional loans to the public sector, for example for investments in energy and transport infrastructure, district heating networks, and renovation or insulation of buildings. It can also be invested in skills</p>		<p>Link to JTM: <a href="#">The Just Transition Mechanism: making sure no one is left behind   European Commission</a>.</p> <p>A <a href="#">political agreement</a> on a proposal for a Public Sector Loan Facility of the Just Transition Mechanism was approved on 21 April 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>(Proposal for a Regulation on the public sector loan facility under the Just Transition Mechanism, COM(2020) 453 final) (point 4). [...]</p> <p>The objectives of the new industrial strategy also guide the European Recovery Plan presented by the Commission in May 2020, which is historic both in its volume and in its political, institutional and budgetary architecture. The European Recovery Plan will address the immediate economic and social damage brought by the coronavirus pandemic, kick-start a sustainable and prosperous recovery and protect and create jobs, and invest in the green and digital transitions and a more resilient European industry (points 1, 4, 10, 11, 29, 44, 45, 46, 47 and 48).</p>		<p>The European Recovery Plan was presented in May 2020: <a href="#">Recovery plan for Europe   European Commission</a>.</p>	
4)	<p>7. Calls on the Commission and the Member States to act to strengthen the coordination of education policies, with massive public investments in them across Europe; furthermore urges the Commission to set up an expert stakeholder group tasked with predicting future industrial skills gaps and shortages, with the help of AI and digital resources, especially big data's capabilities;</p>	<p>The Commission agrees on the importance of education and life-long learning for the competitiveness of industry and the creation of quality jobs. As the twin green and digital transition gathers speed, millions of Europeans will have to upskill or reskill and new jobs will be created (points 3, 4, 6 and 7). [...]</p> <p>The updated Skills Agenda 2020 also presents a new "Skills Insight" Mechanism that will strengthen skills intelligence by using big data analysis of job vacancies, 'real-time' information on skills demand at regional and sectoral level, which can be developed and published online. This skills intelligence can be widely disseminated through the Pact for Skills. The Commission will encourage the network of public employment services to prioritise the early identification of skills shortages and trends linked to growing job opportunities (points 3 and 7). [...]</p> <p>The EU platform for people to manage their learning and careers "Europass" will present skills intelligence</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request (EU Skills Agenda, Europass, European education area, Digital Education Action Plan).</p> <p><a href="#">European Skills Agenda</a>.</p>

		<p>information tailored to individuals' needs. This will assist individuals in their study, training and work choices, and help counsellors and mentors, inter alia in Public Employment Services (points 3 and 7).</p> <p>[...]</p> <p>Furthermore, the new <a href="#">Council Recommendation</a> on vocational education and training for sustainable competitiveness, social fairness and resilience puts forward a number of actions to modernise vocational education and training (VET) in the EU by adapting it to a more digital and greener economy, and to ensure that vocational education and training is agile by enabling it to respond swiftly to labour market needs and provide quality opportunities for young and adults alike. It calls on Member States to link VET to economic strategies and innovation systems, and to build on skills intelligence i.e. graduate tracking systems, skills anticipation mechanisms, including at sectoral and regional levels. Translating these principles into actions, the Osnabrück Declaration of VET ministers defines the roadmap to be completed both at the European and national level in the period 2021-2025. One of its objectives is to enhance knowledge sharing and networking on digital solutions in VET including the application of artificial intelligence and to further improve strategic skills anticipation at EU level (points 3 and 7).</p> <p>[...]</p> <p>The European Education Area will also support these efforts help strengthening the coordination of education policies across Europe. The Commission published in September 2020 a new Communication setting out the means and milestones to achieve the European Education Area by 2025 (COM(2020) 625 final). It suggests new initiatives, more investment and mutual learning facilitated by an enabling framework for cooperation with Member</p>		<p><a href="#">European education area   Legislative train schedule   European Parliament.</a></p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		States and engagement with experts and stakeholders (point 7). [...] Additionally, the Commission also presented in September 2020 the Digital Education Action Plan (2021-2027) (COM(2020) 624 final), proposing a set of initiatives for high-quality, inclusive and accessible digital education in Europe. The plan aims to strengthen the cooperation and exchange between Member States in digital education at EU level and to support Member States, education and training institutions and citizens in their efforts to adapt to the digital transition and help ensure a fair and inclusive recovery for all (points 3, 4, 6 and 7).		<a href="#">Digital Education Action Plan (2021-2027)   Education and Training.</a>	
5)	8. [...] calls on the Commission to take into account the gender dimension into due account in the implementation of the European industrial strategy, in both the recovery and the reconstruction and transformation phases, including the use of gender budgeting tools in the definition of the financial instruments supporting the industrial and economic growth of the Union;	Gender equality is also one of the priorities of the Commission. The Commission presented in March 2020 the new EU Gender Equality Strategy 2020-2025 (COM(2020) 152 final), setting out key actions for the next 5 years and committing to ensuring that the Commission will also include an equality perspective in all EU policy areas. Closing gender gaps in the labour market, achieving equal participation across different sectors of the economy, addressing the gender pay and pension gaps and achieving gender balance in decision-making and in politics are among the key objectives of the Strategy. Gender mainstreaming is another main priority, also pursued through gender budgeting (point 8).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request. <a href="#">Gender equality strategy   European Commission</a> : EC report 2021 on gender equality in the EU.	
6)	11. [...] Calls on the Commission, in this regard, to bolster relevant existing and future legislation so as to prioritise the green and digital transitions while strengthening long-term competitiveness and societal and economic resilience throughout both phases; furthermore, calls on the	The industrial strategy also promotes the creation of joint initiatives bringing together investors, governmental, institutional and industrial partners in key technologies and business areas (points 11, 44 and 45). 		transformation and the changing global competitive landscape (points 1, 10, 11, 12, 48 and 50).			
8)	13. [...] calls on the Commission to establish clear, explicit and concrete definitions of 'strategic', 'autonomy', 'strategic autonomy', 'resilience', 'strategic resilience', and other related concepts, so as to ensure that the actions taken with reference to these concepts are specific and aimed towards the EU's priorities and goals;	In the context of this update, the Commission is also advancing work on identifying strategic dependencies in the most sensitive ecosystems (points 13 and 87).		Updating the 2020 New Industrial Strategy: Building a stronger Single Market for Europe's recovery <a href="#">COM(2021) 350 final</a> , 5 May 2021.	
9)	14. [...] calls on the Commission to work towards the creation of a framework involving institutional investors, Member States and the EU, to cover the losses due to business interruption in case of a future pandemic;	Although the follow-up does not mention point 14, the Commission however states that in the context of the COVID-19 crisis, the Commission and the Member States have agreed to move forward in creating a Pandemic Preparedness Partnership to be supported through Horizon Europe. Additionally, following the communication of the European Health Union package in November 2020, the Commission is now actively working on the planning for the Health Emergency Preparedness and Response Authority (HERA). The HERA will enable more efficient and effective EU-level response to cross-border health threats. A legal proposal is planned for the fourth quarter of 2021.		On 24th February 2021, the Commission closed the "Inception impact assessment roadmap in regards to <a href="#">European Health Emergency Preparedness and Response Authority (HERA)</a> . Proposal for a Council regulation on a framework of measures for ensuring the supply of crisis-relevant medical countermeasures in the event of a public health emergency at Union level <a href="#">COM(2021)577, 2021/0294 (NLE)</a> . <a href="#">Commission Decision</a> of 16 September 2021 establishing the Health Emergency Preparedness and Response Authority <a href="#">C(2021) 6712</a> .	
10)	16. [...]; calls on the Commission, nonetheless, to ensure that the aid provided in the emergency phase is justified by the consequences of the pandemic and does not lead to a lack of effective competition in the single market, and that no strategic sector is neglected;	The Commission has conducted a fitness check of State aid rules finalised in October 2020, which concluded that, overall, the State aid rules under scrutiny are broadly fit for purpose. The Commission is currently revising the State aid rules for IPCEIs (point 44). This revision seeks to clarify the conditions under which Member State-led projects in key sectors can move forward in a timely and pro-competitive manner. It should also help SMEs to participate fully in future IPCEIs. However, the design of such projects and the selection of potential aid beneficiaries is a responsibility of the Member States (points 16, 44 and 45).		The Commission <a href="#">adopted</a> revised State aid rules on Important Projects of Common European Interest, 25/11/2021. <a href="#">Revision of State Aid rules</a> for environmental protection and energy.  On 28 January 2021, the Commission presented an amended <a href="#">Temporary Framework</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The revision of the State aid guidelines for environmental protection and energy (EEAG) (2014/C 200/01) is also ongoing and scheduled to be completed by end 2021 (point 16).</p> <p>[...]</p> <p>In the context of the COVID-19 outbreak, the Commission adopted in March 2020 a Temporary Framework to enable Member States to use the full flexibility foreseen under State aid rules to support the economy (point 16).</p>			
11)	17. [...] calls on the Commission to propose a specific State aid regime targeted at supporting the sectors that have suffered the most from the COVID-19 emergency measures, such as the automotive, tourism, aviation, steel and metal industries; calls on the Commission to set common minimum requirements for companies receiving financial assistance, in order to avoid different national criteria giving rise to further discrepancies;	The Commission launched a survey with Member States to see whether there is a need for adjustments. The Temporary Framework sets common criteria. Conditionality to other objectives can be attached by Member States but may be difficult to make mandatory, since the objective of the support measures is to provide liquidity or solvency support to remedy a serious disturbance in the economy (point 17).		In 2021, the Commission continues to work on Temporary <a href="#">Competition - State aid - State aid rules and coronavirus - European Commission</a> .	
12)	20. Calls on the Commission to establish a clear, consistent and accessible approach to market definition in competition cases across different industries;	<p>Furthermore, the Commission is revising antitrust rules governing vertical agreements while evaluations are ongoing concerning the rules on horizontal agreements and the Market Definition Notice (points 20 and 22).</p> <p>[...]</p> <p>The Commission is also finalising its evaluation of procedural and jurisdictional aspects of EU merger control. Based on these results, the Commission will consider the need for follow-up actions (point 20).</p>		<p>The <a href="#">CWP 2022</a> announces :</p> <ul style="list-style-type: none"> <li>- The revision of the vertical block exemption Regulation and of the vertical guidelines Q2 2022;</li> <li>- The revision of the horizontal block exemption Regulation and of the horizontal guidelines Q4 2022;</li> <li>- The revision of certain procedural aspects of EU merger control Q2 2022;</li> <li>- The revision of the notice on market definition Q4 2022.</li> </ul>	
13)	21. Encourages the Commission to establish a reporting system on the ways in which foreign protectionism affects the Union's industry, as well as a regular assessment of the competitiveness of	Under the Market Access Partnership, the Commission maintains a database of all trade and investment barriers reported by stakeholders (Member States and industry associations) – formerly known as the “MADB” (Market			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	the different sectors of the Union's industry compared to its main global competitors, and to act rapidly if adjustments of Union rules are necessary;	Access Database) and now integrated in the recently launched "Access2Markets" online portal. The information on barriers can be sorted by industry and by export markets. New online trade tools to support EU businesses are also being developed. On that basis, the Commission also releases every year the TIBR ("Trade & Investment Barriers Report") for transmission to the European Parliament. The TIBR contains an econometric modelling of extra-EU trade generated thanks to solved barriers (EUR 8 billion in 2019), and provides a breakdown per industrial sector of the previous year's new and solved barriers (point 21).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
14)	22. Calls on the Commission, in the light of a profoundly changed global economic context, to review the Union's antitrust rules, seeking a balance between the need to cope with global-scale competition and the protection of the supply chain and consumers from the potential negative consequences of a more concentrated internal market;	[...] the Commission is revising antitrust rules governing vertical agreements while evaluations are ongoing concerning the rules on horizontal agreements and the Market Definition Notice (points 20 and 22).		The <a href="#">CWP 2022</a> announces: - The revision of the horizontal block exemption Regulation and of the horizontal guidelines Q4 2022; - The revision of the notice on market definition Q4 2022.	
15)	23. Considers that the economic schemes put in place by individual Member States to help SMEs, start-ups and companies to cope with the short-term cash crunch are useful, but might in some cases increase their debt levels; in this context, calls on the Commission to support EU and national programmes incentivising capital increase and to facilitate recovery;	The 2021-2027 InvestEU programme will provide crucial recovery support to companies, including start-ups and SMEs. In addition to a single integrated guarantee facility, it will support equity financing for SMEs and small midcaps along all development stages from start-up to scale-up, and Initial Public Offerings (IPO). It will help leverage private funding from investors such as business angels, family offices, venture capital funds, pension funds, and insurance companies (points 23, 24 and 25).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
16)		The strategy builds on the achievements of the Small Business Act. It recognises the diversity and specific needs of SMEs and proposes both, horizontal and ad hoc support measures, to help companies grow and scale up, be

		Commission are progressing in setting up the network, which is scheduled to be operative in the last quarter of 2021 (points 27 and 31).			
20)	28. Believes that social economy enterprises should be fully involved in the outcome of the industrial strategy, since they create public value and also contribute to the development of the local communities they are grounded in; calls in this regard on the Commission to take into account the specificities of this category of enterprise in the design of the financial instruments and work programmes, in order to support their access to finance;	[...] The Commission agrees that social economy enterprises should be involved in the elaboration of a new Industrial policy. Proximity and Social Economy has been identified as one of the 14 industrial ecosystems for the recovery. There is a strong need to cushion the socio-economic effects of the decline of industrial activity by targeted investments that allow local added-value creation. The Commission is currently preparing an Action Plan for the Social Economy that will be released in 2021 where dedicated financial schemes will be available for social enterprises and organisations (point 28).		On 9 December 2021, the European Commission adopted a new <a href="#">action plan on the social economy</a> . <a href="#">Feedback</a> on the Action Plan for the Social Economy began on 1 March 2021 and concluded on 26 April 2021.	
21)	32. Calls on the Commission and the Member States to invest, inter alia, in the data economy, humancentric artificial intelligence, smart production, the Internet of Things (IoT), mobility, supercomputing, software engineering and technology, the cloud, quantum technology, resilient, affordable and secure high-speed 5G and 6G networks, Distributed Ledger Technologies (DLTs), robotics, batteries and satellite internet; therefore invites the Member States and the Commission, in this respect, to ensure a timely implementation of the relevant key measures recommended in the 5G cybersecurity toolbox, and in particular to apply, where appropriate, the relevant restrictions on high-risk suppliers for key assets defined as critical and sensitive in the Union's coordinated risk assessments;	The Commission is joining forces with the Member States and the private sector to invest in strategic digital capacities, infrastructures and services in key technological areas that will underpin Europe's digital leadership in the Digital Decade (point 32).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
22)	33. [...] asks the Commission to assess the potential environmental impact of the massive	Concerning the contribution of digital technologies to the Green Deal objectives, the Commission announced in the			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	development of digital solutions while ensuring European leadership in highly energy-efficient and circular digital technologies and data centres; calls on the Commission to propose concrete avenues for digital solutions to serve the ecological transition and to establish a methodology for monitoring and quantifying the increasing environmental impact of digital technologies;	new Circular Economy Action Plan and in the Digital Strategy, the Circular Electronics Initiative (CEI) aiming to extend the lifetime of electronic and ICT devices and work towards a "Right to Repair" (including a right to update obsolete software), thereby avoiding premature obsolescence and reducing "e-waste". The Digital Strategy also introduced initiatives to achieve climate-neutral, highly energy efficient and sustainable data centres by no later than 2030, as well as transparency measures for telecoms operators on their environmental footprint. On the former, the Commission is exploring measures to meet the 2030 goal such as developing a monitoring framework to assess energy efficiency of data centres and provide incentives through the different funding mechanisms available. On the latter, the Commission aims to assess appropriate indicators, standards and methodologies for monitoring and reporting of such footprint. In addition, the Commission is supporting the European Processor Initiative, which aims at endowing the EU with low-power processors for high-performance computing, data centres and several projects on the next generation of AI hardware, delivering this way significant improvement in energy efficiency of computing systems (point 33).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
23)	34. [...] calls on the Commission to implement a single European digital and data environment and to ensure and promote interoperability, as well as access and flow for secure data and software within the Union and across sectors, in companies of all sizes and among public institutions; furthermore, calls on the Commission to ensure European leadership in setting future-oriented standards and creating future-oriented tools and infrastructures to store and process data and pool European data in key sectors, with Union-wide common and interoperable data spaces; in this respect, calls on the Commission to	The digital sector will also contribute to the European Green Deal goals, both as a source of clean technology solutions and by reducing its own carbon footprint. With its "Strategy on Shaping Europe's Digital Future" (Digital strategy) (COM(2020) 67 final) in February 2020, the Commission set out its vision for how Europe can be a global digital leader.  As announced in the European data strategy the Commission aims at the creation of a single market for data where data can be shared and reused in full respect of European rules and values (points 34 and 35).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	focus particularly on projects aimed at data management and labelling, data format standardisation and data security, to develop and process data on European soil, in particular data from public bodies, to build a better digital taxation system in which profits are taxed and where companies have significant interaction with users, and to further develop European standards and certification on cybersecurity, thus ensuring enhanced competitiveness, promoting disruptive technologies, in particular for critical infrastructures, including by revising the Network and Information Security (NIS) directive and by establishing a cybersecurity competence centre network; calls on the Commission, moreover, to ensure a fair platform for business relations that enables enterprises in the EU, especially SMEs, to use data generated on platforms effectively;			Already on 25 November 2020, the Commission presented a <a href="#">proposal for a regulation on European data governance</a> , which will draw up rules for common European data spaces and aims to prepare the European Data strategy.	
24)	35. [...] calls on the Commission [...] to progressively reduce fragmentation in the different national strategies and address imbalances in market power, with the aim of supporting a Union-wide flow of data, interoperability, data management, protection and (re)use;	As announced in the European data strategy the Commission aims at the creation of a single market for data where data can be shared and reused in full respect of European rules and values (points 34 and 35).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
25)	38. Calls on the Commission to include in the recovery plan concrete measures to attract industries to Europe, to increase, strengthen and promote the relocation and the diversification of European industries in terms of their strategic importance and, from a climate neutrality point of view, to shorten and diversify supply chains; in this context, highlights the importance of ensuring that the Union produces enough strategic goods, such as medical and healthcare	In this context, the Commission published in September 2020 a new Action Plan on Critical Raw Materials (COM/2020/474 final) looking at the current and future challenges and proposes actions to reduce Europe's dependency on third countries, diversifying supply from both primary and secondary sources and improving resource efficiency and circularity while promoting responsible sourcing worldwide (points 38 and 59). [...] Likewise, the Commission issued in November 2020 a new pharmaceutical strategy for Europe (COM/2020/761 final)		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.

[...]</p> <p>In addition, acknowledging the importance of renewable energy technologies as key strategic assets for the EU economy, the Clean Energy Industrial Forum was set up by the Commission in order to strengthen the industrial basis and maximise the potential of the EU's value chain for all renewable energy technologies, including issues of critical raw materials usage, system integration and end-of-life (point 56). [...]</p> <p>As announced in the strategy, the Commission has set up an Industrial Forum (points 2, 53, 56 and, 85), a new, inclusive and open mechanism for co-designing solutions with stakeholders, supporting the Commission in its systematic analysis of the different ecosystems and in assessing the different risks and needs of industry as it embarks on the twin transitions and the strengthening of its resilience. It has 55 members, including all Member States, the European Investment Bank (EIB) the European Bank for Reconstruction and Development (EBRD), industrial associations, NGOs, trade unions, research and technology organisations, and associations of regions and clusters. The Commission will inform regularly on the progress of the Industrial Forum.</p>		<p><a href="#">1st meeting of the Industrial Forum</a> took place on 1 February 2021.</p>	
36)	<p>60. Calls on the Commission to develop a European export and import strategy for renewable and resource- and energy-efficient technologies;</p>	<p>The Commission agrees on the importance of undistorted trade and investment for renewables and energy efficiency technologies. This will be essential not only for the effective energy transition in the EU but also to ensure that EU businesses can compete on a level playing field in third country markets. This will help to sustain competitiveness of the EU industry and make the transition in other countries more efficient (point 60).</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
37)	64. [...] calls, therefore, on the Commission to submit a large-scale strategy for the rollout of fast EV-charging infrastructure in order to secure uptake of EVs by consumers, giving them certainty as regards the technology's potential and access to a close-knit network of compatible charging infrastructures, and to support European-based car manufacturing;	The Commission also pays special attention to sustainable and smart mobility industries. These have both the responsibility and the potential to drive the twin transitions, support Europe's industrial competitiveness and improve connectivity. As announced in the March 2020 industrial strategy, the Commission presented in December 2020 its "Sustainable and Smart Mobility Strategy" (COM(2020) 789 final) together with an Action Plan of 82 initiatives that will guide its work for the next four years. This strategy lays the foundation for how the EU transport system can achieve its green and digital transformation and become more resilient to future crises. Boosting investments in the rail sector, in sustainable urban mobility and alternative fuel infrastructure is a clear objective of the Green Deal and of the Sustainable and Smart Mobility Strategy. It will be supported at EU level through major instruments such as the regional funds (Cohesion Fund, ERDF, Just Transition Fund), InvestEU, the Recovery and Resilience Facility and the Connecting Europe Facility. Investments may be needed in both infrastructure and rolling stock (as well as signalling and digitalisation) on all rail segments including high-speed and inter-city lines (point 64). The Commission agrees with the Parliament that the planned actions of the European Battery Alliance should be implemented as a priority (point 64).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.  Proposal for a Regulation on the deployment of alternative fuels infrastructure, and repealing Directive 2014/94/EU of the European Parliament and of the Council <a href="#">COM(2021) 559</a> final, 2021/0223 (COD).  EC <a href="#">website</a> on the Green Deal and transport and the <a href="#">website</a> on Delivering the Green Deal.	
38)	66. [...] calls on the Commission to implement its recommendation to help replace imports from third countries not sufficiently meeting environmental standards and incentivise higher levels of climate ambition from the EU's global trading partners;	In the FTA negotiations of Trade and Sustainable Development (TSD) chapters the EU includes ambitious commitments, such as that Parties will effectively implement multilateral environmental agreements, including the Paris Agreement (point 40, 65 and 66).		No further/specific actions proposed/promised to be taken by the Commission.	
39)	71. [...] calls on the Commission to work closely with the Member States in order to draw up	The 2021-2027 proposals for the structural funds put forward by the Commission a frame to allow an extensive financing for the European regions' economies to achieve		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC

		<p>management capacity. In 2021-2027, these efforts will be further continued in the form of Joint Cluster Initiatives as one of the measures envisaged in the Single Market Programme. The cooperation between clusters in different regions helps identifying weaknesses in the supply chains and find alternative suppliers in case of disruptions. Through its Policy Objective 1, the European Regional Development Fund 2021-2027 will also invest in more competitive and smarter Europe by promoting innovative and smart transformation. The industrial transition challenges are also addressed by the smart specialisation strategies, prepared by the regions in a place-based and bottom up approach. The Commission will also support regions build on the success of the Smart Specialisation Platform for Industrial Modernisation for the future and connect this work to the new EU Industrial priorities (points 4 and 74).</p> <p>Additionally, the Commission has conducted preparatory work on how to manage industrial transition in the framework of the Industrial transition pilot led for the Commission by the Organisation for Economic Co-operation (OECD) with an industrial transition toolbox to help policy-makers activate the regional innovation potential and better design the next generation of smart specialisation and regional innovation strategies (point 74).</p> <p>The recently established Digital Transition Forum will also facilitate the discussion on regional tailor-made approaches. The Forum is an informal platform bringing together national Ministries responsible for the digital transition in their Member State, national and regional Managing Authorities for the EU structural funds and relevant Commission services, with the aim of making the best use of Cohesion Policy funds and of funds for digital transition from centrally managed programmes, by strengthening cooperation and exchange of information, knowledge and good practices among all the authorities</p>		<p>Joint Cluster Initiatives fully operational in 2021 <a href="#">Funding and tenders for clusters   European Cluster Collaboration Platform.</a></p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.</p> <p><a href="#">Digital Transition background information for the Cities Forum, 27-28 Nov. in Rotterdam   FUTURIUM.</a></p>

		dealing with the integration of the digital dimension both at national and regional levels (point 74).			
41)	76. Believes that interregional cooperation aimed at sustainable and digital transformation, as in the Smart Specialisation strategies, needs to be strengthened in order to stimulate regional ecosystems; therefore calls on the Commission, in addition, to ensure that these partnerships will be transparent and inclusive throughout their implementation, in particular as regards their strategic research agenda and annual work programmes;	Common industrial roadmaps under the 'New ERA' aim to link European partnerships under the 2021-2027 programme Horizon Europe to industrial ecosystems. This shall leverage private-sector investment and promote the transfer of knowledge, to support the recovery and green and digital transition (point 76). [...] Through the European Innovation Council (EIC), the Commission is putting in place a one-stop-shop for breakthrough innovation, which will bridge the gap between innovation and market deployment and support scaling up of start-ups and SMEs. Measures to support and connect actors of EU Innovation ecosystems in complementarity with the EIC and the European Institute for Innovation and Technology (EIT) will also ensure that Innovation Ecosystems in Europe are better connected and more efficient. The first Horizon Europe Work Programmes for the EIC and Innovation Ecosystems foresee a number of instruments and initiatives to implement these policy goals (points 76 and 79).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.  <a href="#">Home - Smart Specialisation Platform (europa.eu)</a> , <a href="#">European Institute of Innovation &amp; Technology (EIT)</a> .	
42)	77.[...] calls on the Commission to support creating a dedicated instrument for Pandemic Preparedness and Societal Resilience, since this measure would create the conditions for better coordination at EU level, identify priority areas, and launch actions that require high-quality medical research and coordinated R&I investments;	In the context of the COVID-19 crisis, the Commission and the Member States have agreed to move forward in creating a Pandemic Preparedness Partnership to be supported through Horizon Europe. Additionally, following the communication of the European Health Union package in November 2020, the Commission is now actively working on the planning for the Health Emergency Preparedness and Response Authority (HERA). The HERA will enable more efficient and effective EU-level response to cross-border health threats. A legal proposal is planned for the fourth quarter of 2021 (point 77).		On 24 February 2021, the EC closed the "Inception impact assessment roadmap in regards of the <a href="#">European Health Emergency Preparedness and Response Authority (HERA)</a> .  Proposal for a Council regulation on a framework of measures for ensuring the supply of crisis-relevant medical countermeasures in the event of a public health emergency at Union level <a href="#">COM(2021)577 final, 2021/0294 (NLE)</a> .

				Commission Decision of 16.9.2021 establishing the Health Emergency Preparedness and Response Authority <a href="#">C(2021) 6712</a> .	
43)	79. [...] calls on the Commission to tailor Horizon Europe and its industrial strategy to the development, scaling-up and commercialisation of breakthrough technologies and innovations in the Union so as to bridge the gap between innovation and market deployment, by providing risk financing for early-stage technology and demonstration projects and developing early value chains in order to support in the first place commercial-scale, market-uptake, zero and low-emissions, renewable, energy- and resource-efficient and circular technologies and products, processes, services and business models, as well as supporting the development of research infrastructure, also with the aim of reducing the existing gaps between Member States; encourages the Commission and the Member States to develop one-stop shops with streamlined information on financing possibilities for industrial demonstration projects for breakthrough technologies;	Through the European Innovation Council (EIC), the Commission is putting in place a one-stop-shop for breakthrough innovation, which will bridge the gap between innovation and market deployment and support scaling up of start-ups and SMEs. Measures to support and connect actors of EU Innovation ecosystems in complementarity with the EIC and the European Institute for Innovation and Technology (EIT) will also ensure that Innovation Ecosystems in Europe are better connected and more efficient. The first Horizon Europe Work Programmes for the EIC and Innovation Ecosystems foresee a number of instruments and initiatives to implement these policy goals (points 76 and 79).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.	
44)	80. Calls on the Commission to examine measures to counter the potential loss of knowledge and innovation during the current crisis, including through instruments to support companies temporarily sharing knowledge workers with public research institutions and universities so as to enable public-private research on public priorities, and to preserve	The focus of the new ERA is, among others, on knowledge creation, circulation and use. Enhanced cooperation among actors of the ecosystems is encouraged including public and private cooperation. To reinforce such links, it is also important to support value creation, including higher education and research institutions spin offs, and other arrangements for enhanced cooperation between research institutions and business, including sharing knowledge workers (point 80).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as the Commission was already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	employment and innovation capacity in times of crisis;				
45)	81. Calls on the Commission to develop, together with Member States, potential tax incentives to boost R&D investments, which have decreased heavily due to the COVID-19 crisis;	[...] the Commission proposed as part of its common corporate tax base (CCTB) proposal a tax incentive for R&D investment. This remains an important issue, in particular following the COVID-19 crisis, and the Commission is exploring as part of its broader business taxation agenda how best the tax system can support investment, including in R&D (point 81).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.  <a href="#">In its 2021 CWP</a> , the Commission included a proposal for a Council Directive on a Common Consolidated Corporate Tax Base is regarded as a priority-pending proposal. See <a href="#">Legislative Observatory</a> .	
46)	82. Calls on the Commission to continue supporting the ability of European companies to innovate on the basis of a comprehensive intellectual property (IP) regime, enhancing flexibility in licensing, so as to maintain effective protection for their R&D investments, to secure fair returns and, at the same time, to continue developing open technology standards that support competition and choice as well as the participation of EU industry in the development of key technologies;	Intellectual property rights play an important role in fostering innovation and protecting investment and can support the digital and green transitions. Intellectual property (IP) is also a lever to support EU resilience and economic recovery in times of crisis. To assume leadership in key industrial areas, improve resilience in times of COVID-19 while making the transitions to a greener and more digital economy, the EU needs to effectively protect and manage intellectual property. The Commission has designed a legal framework and intellectual property system that offers incentives for EU companies to invest in the provision of goods and services with high standards of quality, innovation, design and creativity (points 82 and 83).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.  See: Communication on Making the most of the EU's innovative potential An intellectual property action plan to support the EU's recovery and resilience <a href="#">COM(2020)760 final</a> .	
47)	83. [...] calls on the Commission to preserve and strengthen this framework; stresses the need to ensure parity with the US and China in life-science IP incentives in order for Europe to remain an attractive location for R&D investment and industrial development; calls on the Commission to maintain and develop Europe's world-class IP system by promoting strong IP protection,	Intellectual property rights play an important role in fostering innovation and protecting investment and can support the digital and green transitions. Intellectual property (IP) is also a lever to support EU resilience and economic recovery in times of crisis. To assume leadership in key industrial areas, improve resilience in times of COVID-19 while making the transitions to a greener and more digital economy, the EU needs to effectively protect		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request (Intellectual property rights).

Annual Single Market Report 2021 Accompanying the Communication on Updating the 2020 New Industrial Strategy: Building a stronger Single Market for Europe's recover <a href="#">SWD(2021) 351 final</a> .	
52)	96. [...] calls on the Commission to study how to fully use the leverage of public expenditure and investments to achieve policy objectives, including by strengthening sustainability and making public procurement central to the Union's economic recovery plan by prioritising and fostering demand for eco-innovative, cost-effective and sustainable goods and services, as well as by enabling relocation in key strategic sectors, such as health-related products, agriculture and renewable technologies, fostering shorter and more sustainable supply chains; calls on the Commission and the public authorities to analyse the conditions for making mandatory in public procurement sustainability based on environmental, social and ethical criteria, including carbon footprint, recycling content and working conditions throughout the whole life-cycle, as well as to increase awareness and make better use of the existing schemes for promoting green services;	The Commission has been promoting and will continue to promote the use of sustainability criteria in public procurement, in line with the ambitions of the Green Deal (point 96).		<a href="#">A European Green Deal   European Commission. Sustainability criteria   Energy.</a>  The Commission and a number of European countries have developed guidance in the area of Green Public Procurement (GPP), in the form of national GPP criteria. For more information on the Commission's strategy on GPP, see the <a href="#">Commission website</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
53)	98. Calls on the Commission to adopt a strong Key Performance Indicator (KPI) system to analyse the ex-ante impact of Union regulations and instruments and possible investments needed, and to monitor progress and results taking into account the SME dimension;	In line with our better regulation guidelines, the Commission carries out impact assessments when the expected economic, environmental or social impacts of EU action are likely to be significant. For each impact assessment, the most significant impacts are identified and assessed, including costs, benefits and impacts on employment and SMEs. Each impact assessment includes a section describing how will actual impacts be monitored and evaluated. Moreover, the Commission's proposals include monitoring and review clauses (point 98).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.  See <a href="#">updated</a> (November 2021) Better Regulation guidelines and toolbox.	
54)	99. Calls on the Commission to strengthen its impact assessment practise and ensure that, before presenting new proposals for legislation or adopting new measures, it carries out a detailed impact assessment of the potential compliance costs, the impact on employment, and the burdens and potential benefits for European citizens, sectors, and companies, including SMEs [...] invites the Commission to support regulatory coherence and to acknowledge a smart regulation drive designed to reduce bureaucratic burdens without undermining the effectiveness of legislation or lowering social and environmental standards, especially when traditional industry has to adapt because of regulatory decisions;	The Commission has a well-functioning better regulation system (points 99 and 100), including evaluations, impact assessments and public consultations. OECD ranks our system among the best in the world. The Commission stocktaking exercise from 2019 shows a wide support for our better regulation approach among stakeholders.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request (Better regulation).	
55)	101. [...] calls on the Commission to ensure the exchange of national and regional best practices in the field, with specific reference to the public management of economic competitiveness;	Good public administration (point 101) is a key for social progress, equality, and trust in the EU.		No further specific actions proposed/promised to be taken by the Commission.	

4.1.20.4. ITRE Resolution 4: EP resolution of 16 December 2020 on new strategy for European SMEs

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C	
<b>New strategy for European SMEs</b>	16/12/2020 <a href="#">T9-0359/2020</a> <a href="#">2020/2131(INI)</a> ITRE	<a href="#">SP(2021)190</a>	Final reply received 18 June 2021	Mixed reply			
1)	5. Calls therefore on the Member States and the Commission to acknowledge the need for better regulation and simplification and to adopt a roadmap with concrete and binding targets and indicators as an important prerequisite for our economy's ability to recover and innovate, and for the safeguarding of EU companies' competitiveness; notes that several Member States have set quantitative targets of up to 30 % <sup>14</sup> for the reduction of administrative burden and calls on the Commission to set ambitious and binding quantitative and qualitative targets at EU level for the reduction of administrative burdens, as soon as possible after conducting an impact assessment and in any case no later than June 2021, and in advance of the Commission communication;	Although the follow-up does not mention point 14, the Commission however states that 'the twin transition to digitalisation and sustainability is at the heart of the SME Strategy. SMEs need to be able to pursue Green Deal objectives in the least burdensome way. Green Deal legislation should seek to keep administrative and regulatory burden on SMEs to the minimum.' The Commission also refers to better regulation activities already in place and those announced in the April 2021 Communication. The updated Better Regulation toolbox and guidelines explained in practice the application of the novelties, such as the One In One Out principle (OIOO). A stock taking exercise will be published in the Annual Burden Reduction Survey 2023.			According to the Commission reply, a stock taking exercise will be published in the Annual Burden Reduction Survey 2023.		
2)	7. [...] calls on the Commission to manage a true single digital entry point for all enquiries on EU financing opportunities for SMEs and ensure that EU support schemes, including those addressing the COVID-19 aftermath, contain a strong SME component;	The Commission will continue to update and promote the single digital entry point for all enquiries on EU financing opportunities for SMEs ( <a href="http://www.access2finance.eu">www.access2finance.eu</a> ) (point 7).			The <a href="http://www.access2finance.eu">www.access2finance.eu</a> portal is operational.		

<sup>14</sup> Report for the German Ministry for Economic Affairs and Energy presented by the Centre for European Policy Studies, *Feasibility Study: Introducing 'one-in-one-out' in the European Commission*, 5 December 2019.

3)	9. Calls on the Commission to analyse carefully the economic and social impacts of the COVID-19 crisis on SMEs and to take into account SMEs' concerns resulting from the COVID-19 crisis when conducting impact assessments ahead of proposing legislation;	The SME performance review (point 13) is one of the main tools to monitor and assess countries' progress in implementing SME policy on a yearly basis. The review brings comprehensive information on the performance of SMEs in EU countries and other partner countries and on the impact of COVID-19 on SMEs (points 2 and 9). [...]		On 1 July 2021, the <a href="#">annual report on European SMEs</a> Related to this area also Commission Communication from <a href="#">April 2021</a> 'Better Regulation: Joining forces to make better laws' and the Better Regulation guidelines and toolbox revised in <a href="#">November 2021</a> . The guidelines presents a comprehensive approach to impact assessments, incl. impact on SMEs. The toolbox incl., inter alia, tool #23 the SME test.	
4)	11. Calls on the Commission to ensure the effectiveness and good functioning of the Regulatory Scrutiny Board (RSB) by ensuring it has a majority of external experts and support from the Joint Research Centre; reiterates that the independence, transparency and objectiveness of the RSB and its work must be ensured and that the members of the Board should not be subjected to any political control, conflict of interest or bias;  calls on the Commission to guarantee a balanced representation of large and small companies in all relevant bodies and committees associated with EU policymaking, including on the RSB; [...];	The Commission ensures independence, transparency and objectivity of the RSB and underlines that the members of the Board are not subject to any political control, conflict of interest or bias. By its constitution and by function, the RSB is de facto independent, which was confirmed by the European Court of Auditors. The RSB also complies with the Organisation for Economic Co-operation and Development (OECD) recommendation that oversight bodies should be close to 'the centre of government'. There is no requirement to have one SME representative on the RSB. Having special interests represented on the RSB would go against their independence. In any event, the RSB will have a regular dialogue with the SME envoy to understand better the challenges faced by SMEs. The RSB takes into account in their regular work how the proposed options would affect SMEs.		No further/specific actions proposed/promised to be taken by the Commission	
5)	13. Takes note of the Commission's plan to appoint a dedicated EU SME envoy to bring more visibility to SMEs' concerns and furthermore calls on the Commission to place the SME envoy in a central unit under the President of the Commission in order to enable oversight over SME issues in all Directorates-General;  calls on the Commission to build on the existing SME performance review process and engage in an annual debate on the 'State of the SMEs Union' to be held at a Parliament plenary sitting;	The EU SME Envoy and the SME Envoys' network (point 13) will play a key role in burden reduction for SMEs as set out in the SME strategy. The forthcoming Communication on better regulation will set out the vision of the Commission on how better regulation will further evolve to support the recovery of our economy.  The SME performance review (point 13) is one of the main tools to monitor and assess countries' progress in implementing SME policy on a yearly basis.		Better Regulation Communication of <a href="#">April 2021</a> , the 2021 report of SME envoy network and the latest report of <a href="#">SME performance review</a> from July 2021 are available.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	16. [...] calls on the Commission to remove such barriers by simplifying procedures, ensuring online access to information and further supporting tailored incentives for SMEs and micro-enterprises;	No specific reply is provided to this particular point.		Not mentioned.	
7)	18. Encourages the Commission and Member States to make the best use of the forthcoming EU instruments under the next multiannual financial framework (MFF) according to the specific needs of the local communities and taking into consideration, whenever possible, existing sectoral and national specificities; [...]	No specific reply is provided to this particular point.		Not mentioned.	
8)	20. Urges the Commission to better customise EU funding to attract more participation from non-digital, high-tech and innovative SMEs and calls, furthermore, for the design of new EU instruments to take into consideration whether funding can reasonably be used by SMEs and is suited to their needs, and to ensure that SMEs are able to benefit as much as all the other partners involved in the value chain, to the benefit of Europe's global competitiveness;	Under the SME window of InvestEU, the Commission will build on the experiences with the EU loan guarantee and equity financial instruments in the 2014-2020 period (such as COSME, the European programme for SMEs, Horizon 2020 or the <i>European Fund for Strategic Investments</i> (EFSI)), to tailor the new products to the needs of SMEs (point 20). The InvestEU programme aims at streamlining the range of financial instruments by integrating them into a single one: simplification and accessibility will be its major feature. To attract more patient, long-term capital into SMEs, the SME window's equity product will also aim at co-investing with private investors e.g. into VC funds. The Commission is also using regulatory tools (e.g. Solvency II) to make it more attractive for private institutional investors (e.g. insurers) to invest into SMEs, and not unduly restrain the investors' demand for long-term investments.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
9)	21. [...] reminds the Commission to use all means of communication available as well as competitions for students and young entrepreneurs;	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	24. Recalls that liquidity must be swiftly provided to SMEs, while measures for SME re-capitalisation should also be reinforced; urges Member States and the Commission to address the problem of late payments, which continue to create significant liquidity challenges for SMEs, and urges Member States that still have not done so to implement the Late Payment Directive, in particular with regard to public administrations and to business-to-business relations;	<p>The Commission will support Member States in enforcing the Late Payment Directive (points 24 and 25). It will implement stronger synergies between late payment and public procurement frameworks, support the provision of credit management education for SMEs, facilitate SMEs' access to credit information, and foster a more widespread uptake of supply chain management measures.</p> <p>At the 2020 SME Assembly, the Commission launched a virtual late payment observatory, starting with the ecosystems that are suffering most from the COVID-19 impact (points 24 and 25). Moreover, the Commission will bring together major players in the area of alternative dispute resolution and mediation to design and test pilot alternative dispute resolution schemes to support SMEs. In addition, the Commission will also monitor more closely the public authorities' payment performance, and if necessary, it will initiate infringement proceedings to ensure full compliance with the Directive.</p>		<p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.</p> <p>See <a href="#">Ex-post evaluation</a> of the <a href="#">Late Payment Directive</a> is from 2015 and a report on its implementation was carried out in 2016.</p> <p>Infringement procedure, <a href="#">website</a>.</p>	
11)	25. Urges the Commission to strengthen monitoring and enforcement of the Late Payment Directive and assess the need for its revision, so as to ensure that prompt payments are the norm across the internal market both for business-to-business transactions, in particular from bigger to smaller businesses, and for government-to-business transactions; [...]	<p>The Commission will support Member States in enforcing the Late Payment Directive (points 24 and 25). It will implement stronger synergies between late payment and public procurement frameworks, support the provision of credit management education for SMEs, facilitate SMEs' access to credit information, and foster a more widespread uptake of supply chain management measures.</p> <p>At the 2020 SME Assembly, the Commission launched a virtual late payment observatory, starting with the ecosystems that are suffering most from the COVID-19 impact (points 24 and 25). Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		will initiate infringement proceedings to ensure full compliance with the Directive.			
12)	26. Recognises the need for a temporary relaxation of State aid rules and an acknowledgement that they have led to the uneven implementation of measures across the Union; calls on the Commission and the Council to take swift action to ensure a competitive level playing field among Member States;	Since January 2019, the Commission has been evaluating its State aid rules in line with the Commission's Better regulation guidelines (point 60). This fitness check (an evaluation of all relevant state aid rules) provides the basis for decisions about whether to prolong or update the existing rules. The current rules targeted at supporting SMEs (contained in the General Block Exemption Regulation) cover all aspects the Commission deems relevant to balance the scope for Member States' SME support with the need to ensure effective enforcement of the EU's competition law to ensure a level playing field in the EU. In response to the COVID-19 pandemic, the Commission adopted a new State aid Temporary Framework to enable Member States to use the full flexibility foreseen under State aid rules to support the economy (points 26 and 27), while limiting negative consequences to the level playing field in the Single Market.		No further/specific actions proposed/promised to be taken by the Commission.	
13)	29. [...]; calls on the Commission to actively support Member States in transposing the Directive on restructuring and insolvency <sup>15</sup> to ensure a real second chance to SMEs in difficulty;	Under the Recovery and Resilience Plans (RRPs), Member States can launch and/ or accelerate reforms related to the digitalisation of their justice system to speed up procedures for insolvent companies and facilitate the second chance in business (point 29). Member States can also introduce other actions to speed up the legal procedures facilitating a fast return to the market of entrepreneurs who went bankrupt because of the COVID-19 pandemic. Furthermore, the Early Warning Europe (EWE) project has developed methodologies and tools to help companies in distress. They are now available for the Member States responsible for the transposition of the Directive to establish or upgrade the existing early warning tools aimed at flagging financial		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Recovery and Resilience Plans (RRPs)</a> ).	

<sup>15</sup> Directive (EU) 2019/1023 of 20 June 2019 on preventive restructuring frameworks, on discharge of debt and disqualifications, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt, and amending Directive (EU) 2017/1132 (OJ L 172, 26.6.2019, p. 18).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		distress at an early stage and helping entrepreneurs to rescue their companies. When doing so, Member States can request assistance from the Commission. In addition, the Commission is currently preparing a new action to the EWE project to improve services for companies in financial distress.			
14)	30. Notes that the COVID-19 crisis has pushed SMEs towards innovative technologies, new ways of organising their work and digital business models such as e-commerce, the sharing economy and remote working; points out that many SMEs have struggled to adapt to the new circumstances and calls on the Commission, in this regard, to ensure that research and innovation (R&I) investment is geared towards SME participation while striking a balance between the enforcement of intellectual property rights and the push for innovation;	SMEs play a critical role in the innovation process, in particular in breakthrough deep tech innovation. SMEs' high level of participation in the Framework Programme is a major objective for the Commission (point 30). European SMEs are invited to participate through consortia in multi-beneficiary instruments (Horizon Europe second pillar, European Innovation Council's (EIC) Pathfinder and Transition activities, Knowledge and Innovation Communities of the European Institute of Technology) or through the main mono-beneficiary instrument - the EIC Accelerator. In addition to financial support, notably through blended finance, the EIC is providing Business Acceleration Services (BAS) to start-ups and SMEs that have the potential to scale up. The Enterprise Europe Network will continue to support SMEs participation in Horizon Europe, in close cooperation with National Contact Points, including with advice on access to finance and partnering services.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Horizon Europe</a> , <a href="#">European Innovation Council's (EIC) Pathfinder and Transition activities</a> , <a href="#">Knowledge and Innovation Communities</a> of the European Institute of Technology).	
15)	38. Encourages the Commission to support SMEs' effort to, inter alia, upgrade obsolete equipment, enhance knowledge transfer and identify the most effective uses of technologies, such as industrial AI, and, upskill the workforce with the immediately necessary skills to allow remote asset control, production monitoring and employee collaboration, as well as environmentally sustainable business models, circular economy approaches, and energy and resource efficiency, where digital know-how is often crucial and allows SMEs to stay competitive; calls on the Commission also to consider the	Innovation vouchers effectively support SMEs in building capacity and skills for digital transformation (point 38). EU regions have already successfully implemented innovation voucher schemes for SMEs targeting the use of digital technologies to improve their services and competitiveness. Innovation vouchers can incentivise SMEs to pursue digital transformation, which will help them recover from the current crisis and improve future resilience. The Commission will consider how voucher programs could link to Digital Innovation Hubs and their services.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (See Interreg <a href="#">website</a> on vouchers).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	creation of an SME voucher programme to support the above;				
16)	40. [...] calls on the Commission to perform a thorough mid-term and <i>ex post</i> evaluation of these instruments by consulting SME representatives throughout the evaluation process to ensure that these networks effectively reach SMEs;	<p>The Commission recognises the importance of thorough interim and <i>ex post</i> evaluation (point 40). A central node in the network of digital innovation hubs, called Digital Transformation Accelerator (DTA), will provide services to the hubs in the areas of community building, training, online presence and network support. Specifically, the DTA will collect and analyse the Key Performance Indicators defined in the DIGITAL programme for the hubs with the contribution of the SME community, including e.g.: the number of SMEs helped, the number and quality of training events provided, the amount of financing secured for SMEs. The resulting report will help the European Commission to measure the performance of the European Digital Hubs (EDIH) network, and to identify improvements needed.</p> <p>The Enterprise Europe Network (EEN) is evaluated (interim or <i>ex-post</i>) in regular intervals, either as a separate stand-alone evaluation or as a part of a higher-level programme evaluation (COSME/ Single Market Programme). There was a separate <i>ex-post</i> evaluation of the EEN 2008-2014 in 2015-2016 and for the EEN 2015-2021, an evaluation is planned for 2022-2023 (point 40).</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
17)	42. [...] calls on the Commission to consider binding targets for connectivity;	No specific reply is provided to this particular point.		Not mentioned.	
18)	43. [...] Insists that Horizon Europe is a priority and needs robust overall funding; calls for a substantial part of it to be made available for SMEs including for the SME components of the European Innovation Council, and calls on the Commission and the Member States to ensure that, whenever possible, R&I instruments such as the EIC Accelerator offer fast-track opportunities	The budgets allocated to the Horizon Europe's third pillar, "Innovative Europe", amount to EUR 13.418 billion (point 43), including the NextGenerationEU funds. Close to EUR 10 billion are allocated to the EIC, which will have a 70% earmarking for SMEs. Under Horizon Europe, a fast-track mechanism should be set up to offer accelerated opportunities for already well known and assessed start-ups and SMEs, especially when the R&D has been conducted in the context of other parts of the Framework Programme.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Horizon Europe's third pillar</a> : 'Innovative Europe').	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to SMEs and start-ups that are developing innovative technologies;	[...] Horizon Europe is open to all types of innovators. An ambitious climate target of 35% of overall Horizon Europe funding is set to support the development of innovative solutions in the fields of resource efficiency or environmental performance (points 43,44 and 45). EU strategic priorities are set on digital and green deal objectives, as well as on innovative solutions to cushion the effects of the COVID-19 crisis (point 44). The EIC is also supporting breakthrough deep-tech innovative startups and SMEs with fully open calls for proposals, which may cover any technology (points 43, 44 and 45).			
19)	45. [...] calls on the Commission furthermore to ensure that Horizon Europe's partnerships and missions are transparent and inclusive throughout their implementation, in particular as regards SME participation and the setting of their strategic research agenda and annual work programmes; [...]	Horizon Europe is open to all types of innovators. An ambitious climate target of 35% of overall Horizon Europe funding is set to support the development of innovative solutions in the fields of resource efficiency or environmental performance (points 43,44 and 45). EU strategic priorities are set on digital and green deal objectives, as well as on innovative solutions to cushion the effects of the COVID-19 crisis (point 44). The EIC is also supporting breakthrough deep-tech innovative startups and SMEs with fully open calls for proposals, which may cover any technology (points 43, 44 and 45). [...] Within Horizon Europe's third pillar, collaboration and cooperation for the benefit of SMEs are first conducted by the European Institute of Innovation & Technology (EIT), through its thematic Knowledge and Innovation Communities. EIC's Pathfinder and Transition activities will also be supporting consortia that may include start-ups and SMEs (point 45).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Horizon Europe</a> ).	
20)	47. Calls on the Commission and the Member States to invest, inter alia, in the data economy, artificial intelligence, smart production, the	No specific reply is provided to this particular point.		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Internet of Things (IoT) and quantum computing and to ensure a strong SME component in these fields; [...]				
21)	51. [...] calls on the Commission and the Member States while lowering the regulatory burden to remove such barriers by putting in place an enabling regulatory framework and technical and financial support schemes, including through private investment, to allow SMEs to successfully and swiftly take up green practices, products, processes and services; is of the opinion that reinforced targeted technical and financial assistance will be essential in promoting green opportunities among those SMEs, including micro-enterprises; [...]	The InvestEU SME window will support green financing (including SMEs investing in energy efficiency, circular economy and other types of climate- and environmentally-friendly projects) (point 51). The Commission will encourage InvestEU implementing partners, to propose financial products that do not create unnecessary administrative burden to final recipients, and to attract private capital.		Due to a general character of the promise/reply, the action(s) taken can not be assessed.	
22)	54. Notes that a balanced intellectual property (IP) rights framework has long been known as an important step in improving the functioning of the internal market; calls on the Commission, therefore, to prioritise the announced intellectual property action plan in order to ensure EU-level protection of copyrighted goods and patented inventions and strengthen the ability of European companies, and in particular SMEs, to innovate on the basis of strong and balanced IP regimes, which will benefit the global competitiveness of innovative SMEs as well as minimising the costs and complexities of administrative procedures, while also addressing the challenges related to patent litigation and providing open source and open data models for future innovation;	No specific reply is provided to this particular point (on intellectual property action plan).		Not mentioned.	
23)	56. Calls on the Commission and the Member States to accelerate and expand initiatives to	Although no specific reply is provided to this particular point the Commission however states that:		No further/specific actions proposed/promised to be taken by the Commission on this particular point as

	<p>identify the skills needs and to address the gaps in the labour market through education, professional training strategies and skills development programmes targeted at SMEs, and regrets that the gap in entrepreneurship and access to finance for micro-enterprises and SMEs led by women still persists; [...]</p>	<p>Skills are central to Europe's recovery from the coronavirus pandemic and for mastering the digital and green transitions. Yet, mismatches and shortages in skills are increasing, while a large number of people are at risk of unemployment. Only by joining the forces of all relevant partners can we make substantial progress in meeting Europe's skills needs.</p> <p>The European Commission launched a <a href="#">Pact for Skills</a> on 10 November 2020, a central element of the <a href="#">European Skills Agenda</a> adopted on 1 July 2020. It is a shared engagement model for skills development in Europe. The Pact promotes joint action to maximise the impact of investing in improving existing skills (upskilling) and training in new skills (reskilling). The Commission invites public and private organisations to join forces and take concrete action to upskill and reskill people in Europe. The Pact will encourage the setting-up of large-scale partnerships in strategic industrial ecosystems and value chains heavily affected by the current crisis and the priority areas identified in the European Green Deal to achieve ambitious commitments. The setting-up of training centers of excellence providing vocational education and training (VET) and the opening of local or regional inter-company training centers will offer support to SMEs in a whole ecosystem and value chain. The first European skills partnerships in key industrial ecosystems have been announced in automotive, microelectronics, and aerospace and defence industries.</p> <p>The Commission will support the Pact through dedicated services to be deployed in 2021. [...]</p> <p>Networking hub, including support in finding partners and first meetings of the partnerships; linking with existing EU tools, e.g. <a href="#">Europass</a>, <a href="#">Skills Panorama</a>, <a href="#">EURES</a> and <a href="#">European Network of Public Employment Services</a>;</p> <p>Knowledge hub, including webinars, seminars peer learning activities;</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Guidance and resources hub, including access to information on relevant EU funding; guidance to identify financial possibilities; facilitation of exchange between the Pact members, national and regional authorities. The <a href="#">Recovery and Resilience Facility</a> and relevant <a href="#">funding instruments</a> under the <a href="#">Multiannual Financial Framework 2021-2027</a> can support the Pact.</p> <p>Similarly, the <a href="#">Digital Education Plan</a>, adopted on 30 September 2020, stresses the importance of promoting digital skills and competences for offering everyone an opportunity to participate in the digital transformation.</p> <p>Finally, in its Communication on '2030 Digital Compass: the European way for the Digital Decade' (COM(2021) 118 final), the Commission identified a digitally skilled population and highly skilled digital professionals as one of the four 'cardinal points' for mapping the EU's trajectory, as part of a 'Digital Compass' to translate the EU's digital ambitions for 2030 into concrete targets and to ensure that these objectives are met. The Communication recalls that the European Pillar of Social Rights Action Plan includes the objective to increase the share of adults with basic digital skills to 80% by 2030<sup>16</sup>, and includes the target to increase the number of employed ICT specialists to 20 million by the same year, with convergence between women and men.</p>			
24)	58. Calls on the Commission, in the context of the EU's SME support programmes, in particular the single market programme, to also pay particular attention to social economy enterprises, as they are locally rooted, provide a wide range of products and services across the EU single market	No specific reply is provided to this particular point.		Not mentioned.	

<sup>16</sup> COM (2021) 102.  
1458

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	and generate high quality jobs and promote social innovation;				
25)	59. Calls on the Commission to present and commit to a roadmap for the reduction of administrative burdens, including a timeline for actions and mid-term checkpoints, and on the implementation of the SME strategy to be presented at an annual plenary debate on the 'State of the SMEs Union';  [...] calls on the Commission, furthermore, to ensure that companies supplying medical supplies will not face again the same difficulties that arose within the internal market and to learn from problems that occurred during the early stages of the COVID-19 crisis;	No specific reply is provided to this particular point.		Not mentioned.	
26)	60. [...] calls on the Commission to ensure the effective enforcement of the Union's competition law, without prejudice to workers' rights; recalls, in this regard, the importance of promoting social dialogue in designing and implementing SME policies and guaranteeing a level playing field for SMEs to make sure that they benefit from the internal market on a fair basis and are able to harness opportunities to scale up;	Since January 2019, the Commission has been evaluating its State aid rules in line with the Commission's Better regulation guidelines (point 60). This fitness check (an evaluation all relevant state aid rules) provides the basis for decisions about whether to prolong or update the existing rules. The current rules targeted at supporting SMEs (contained in the General Block Exemption Regulation) cover all aspects the Commission deems relevant to balance the scope for Member States' SME support with the need to ensure effective enforcement of the EU's competition law to ensure a level playing field in the EU.		Results of the <a href="#">fitness check/ evaluation</a>  No further/specific actions proposed/promised to be taken by the Commission.	
27)	61. Calls on the Commission to ensure that SMEs will thrive in the context of the ecosystems guaranteeing an inclusive approach and bringing together all actors operating in a value chain, in order to promote European leadership in strategic sectors and competitiveness on the global stage;	[...] the Commission recalls that, although adopted before the pandemic hit the EU, the SME strategy for a sustainable and digital Europe remains more valid than ever. It is a flexible tool, which has been adapted to reply to current challenges, notably by advancing certain actions and/ or adjusting them to the new reality under COVID-19. The Strategy supports SMEs in the recovery's priorities, i.e. the twin transition to sustainability and digitalisation, and aims to increase their		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>resilience. The SME Strategy is being implemented in line with the Industrial Strategy and the Recovery Plan, which look at the specific needs of key industrial ‘ecosystems’, representing around 90% of the business value added in the EU. The concept of ecosystems was created to better identify the needs and interests of each stakeholder group in various industries, SMEs being an important element of this concept (point 61).</p> <p>Many actions of the SME strategy are already being implemented and will help SMEs withstand the impact of the crisis and support their recovery. The Commission is also moving ahead with the remaining actions. In addition, SMEs interests are mainstreamed in most EU policies e.g. in the Green Deal, the European Data strategy, industrial strategy and the single market action plan. SMEs will be specifically addressed in the upcoming update of the industrial strategy, which will take into account the accelerated transformation and the changing global competitive landscape.</p>			
28)	64. Calls on the Commission, therefore, to introduce tools such as a single digital entry point to easily identify opportunities for SMEs stemming from international trade agreements; welcomes in this respect the launch of the new Commission portal named ‘Access2Markets’ on customs procedures and formalities and urges the Commission to ensure multilingual access to this tool;	Through the dedicated SME chapters, now systematically inserted in new international trade agreements negotiated by the Commission, SMEs can learn about the benefits and opportunities those agreements offer (the most recent examples are SME chapters negotiated in the EU-UK Trade and Cooperation Agreement, or in the EU-Japan Economic Partnership Agreement) (point 64). In addition, the new ‘Access2Markets’ portal (available in all EU official languages) is offering a single digital entry point to relevant information for exporters and importers.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Access2Markets</a> ).	
29)	66. Urges the Commission to pursue a level playing field and a regulatory environment in which SMEs can thrive and compete globally and to consider the deployment of trade defence instruments (TDIs) in order to reduce unfair competition resulting from illegal or unfair trade practices of third countries, including trade	Regulatory fragmentation implies significant additional costs for SMEs and can constitute for them an insurmountable market access barrier. The Commission addresses regulatory issues as a priority in trade negotiations and steers greater cooperation in international regulatory fora, while maintaining high European standards (point 66). The Commission also continues its efforts to eliminate non-tariff		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.

	defence measures unfairly blocking EU businesses from enjoying free access to their markets;	<p>barriers through the enforcement of agreements and regulatory cooperation.</p> <p>[...]</p> <p>The Commission will pursue a model of “Open Strategic Autonomy” (point 66). A commitment to openness remains at the heart of Commission plans for future growth, prosperity and competitiveness. A key element of this approach is building alliances to drive global change, in particular to a more sustainable and fair globalisation. This however does not exclude being more assertive in defending the EU’s interests where needed. This includes stronger enforcement of agreements (multilateral and bilateral) and deploying trade defence instruments when European companies, including SMEs, are harmed by dumped or subsidised imports.</p>			

4.1.20.5. ITRE Resolution 5: EP resolution of 25 March 2021 on European strategy for data

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>European strategy for data</b></p>	<p>25/03/2021  <a href="#">T9-0098/2021</a>  <a href="#">2020/2217(INI)</a>  <b>ITRE</b></p>	<p>On 7 May 2021, the Parliament received "<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – February 2020 part-session " informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by Commissioner Didier Reynders. Furthermore, the Commission has already presented one legislative proposal and has planned further proposals for legislation in this area by the end of 2021.                      The <a href="#">plenary debate</a> took place on 25 March 2021.</p>			
1)	<p>3. Underlines that future data legislation must be designed to facilitate technological development, innovation, data access, interoperability and cross-border data portability; urges the Commission, in this respect, to carry out an evaluation and mapping of the existing legislation in order to assess what adjustments and additional requirements are needed to support the data society and economy and safeguard fair competition and legal clarity for all the relevant actors;</p>				
2)	<p>8. [...] calls on the Commission to include data sharing, particularly in the field of ticketing and booking systems, in the upcoming revision of the ITS Directive;</p>				
3)	<p>12. Urges the Commission to empower consumers, with particular attention for certain groups of consumers considered as vulnerable;</p>				
4)	<p>18. Calls for the creation of a Commission-led expert group that would have the capacity to help and advise the Commission to set common, EU-</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	wide guidelines on data governance in order to turn interoperability and data sharing into a reality in the EU; calls on the Commission to seek the regular involvement of Member States, relevant agencies and other bodies and stakeholders such as citizens, civil society and businesses in an effort to improve the governance framework;				
5)	19. [...] calls on the Commission to address fragmentation in the single market and unjustified diverging rules in Member States in order to ensure the development of common data spaces in the EU;				
6)	21. Urges the Commission and Member States to build interoperable, sectoral data spaces that follow common guidelines, legal requirements and data sharing protocols in order to avoid the creation of silos and to enable cross-sectoral innovations; [...]				
7)	22. Encourages the Commission to use common European data spaces to enhance trust, adopt common standards and regulations, and encourage the creation of well-formed application programming interfaces (APIs) along with robust authentication mechanisms, and to consider using pre-agreed, clearly specified and time-bound sandboxes to test innovations and new business models as well as new data management and processing tools, both in the public and private sector;				
8)	23. [...] calls on the Commission and the Member States to further improve individuals' access to effective remedies under the GDPR, to guarantee the interoperability and data portability of digital services and, in particular, to harness APIs to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	enable users to interconnect between platforms and to increase the range of options for different kinds of systems and services;				
9)	24. [...] calls on the Commission to provide guidance, tools and funding from existing programmes to improve the findability of metadata within data spaces; highlights initiatives such as the Nordic Smart Government programme, which aims to enable SMEs to voluntarily share data automatically and in real time through a decentralised digital ecosystem;				
10)	25. Recalls the key role of data intermediaries as structural enablers for the organisation of data flows; welcomes the Commission's plans for the classification and certification of intermediaries with a view to the creation of interoperable and non-discriminatory data ecosystems; calls on the Commission to ensure interoperability by developing minimum criteria between data intermediaries; urges the Commission to work together with European and international standards organisations to identify and close gaps in data standardisation;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	26. [...] calls on the Commission, therefore, to ensure that all consumers' rights are respected at all times and that all consumers can benefit equally from the advantages of the creation of the single market for data; underlines that when the processing of data includes mixed data sets, these data sets must be treated in accordance with the applicable legislation, including the Commission's guidance on Regulation (EU) 2018/1807 on the free flow of non-personal data;				
12)	28. [...] urges the Commission and European data protection authorities to provide further guidance on the lawful processing of data and on practices on the utilisation of mixed data sets in industrial environments, while fully respecting the GDPR and Regulation (EU) 2018/1807; considers that the use of privacy protecting technology should be encouraged in order to increase legal certainty for businesses, including through clear guidelines and a list of criteria for effective anonymization; stresses that the control of such data always lies with the individual and should be automatically protected; calls on the Commission to consider establishing a legislative framework and a clear definition of horizontal and cross-cutting personal data spaces alongside other data spaces, and to further clarify the challenge of mixed data sets; calls on the Commission to empower citizens and companies through, for example, trustworthy intermediaries such as MyData operators which facilitate data transfers with the owner's consent and provide an adequate level of detail on the permissions; emphasises the need to further develop digital identities, which are the essential foundation of a reliable, multi-player data				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	economy; calls on the Commission, therefore, to revise Regulation (EU) No 910/2014 on electronic identification and trust services for electronic transactions in the internal market <sup>17</sup> and to publish a legislative proposal on a trusted and secure European e-ID; calls on the Commission, moreover, to analyse whether organisations and things, such as sensors, should need digital identities to facilitate the cross-border use of trust services, which are essential for the multi-player data economy;				
13)	40. Calls on the Commission to explore the potential merits and scope of creating common European data spaces for the cultural and creative sectors and industries and for cultural heritage; [...]				
14)	45. Urges the Commission to present a data act to encourage and enable a greater and fair B2B, B2G, government-to-business (G2B) and government-to-government (G2G) flow of data in all sectors;				
15)	46. Encourages the Commission to facilitate a data sharing culture and voluntary data sharing schemes, such as the implementation of best practices, fair contractual model agreements and security measures; notes that voluntary data sharing should be enabled by a solid legislative framework that ensures trust and encourages businesses to make data available to others, particularly across borders; urges the Commission to clarify utilisation rights, notably in B2B and B2G market settings; urges the Commission to incentivise businesses to exchange their data,				

<sup>17</sup> OJ L 257, 28.8.2014, p. 73.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	whether original, derived or co-generated, possibly through a reward system and other incentives, while respecting trade secrets, sensitive data and IPR; encourages the Commission to develop collaborative approaches for sharing data and standardised data agreements in order to improve predictability and trustworthiness;				
16)	48. Calls on the Commission and the Member States to examine actors' rights and obligations to access data they have been involved in generating and to improve their awareness, in particular the right to access data, to port it, to urge another party to stop using it, or to rectify or delete it, while also identifying the holders and delineating the nature of such rights; calls on the Commission to clarify the right of actors to benefit from the economic value created by applications trained using data they have been involved in generating;				
17)	52. [...] calls on the Commission to promote best practices for anonymization techniques, and to further promote research into the process of reversing anonymization and how to counter it; calls on the European Data Protection Board (EDPB) to update its guidance in this regard; [...]				
18)	54. Highlights that the sharing of data should enhance competition and encourages the Commission to ensure a level playing field in the single market for data;				
19)	55. Calls on the Commission to further define for B2G data sharing the circumstances, conditions and incentives under which the private sector should be obliged to share data with the public				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	sector, such as due to its necessity for the organisation of data-driven public services; [...]				
20)	56. [...] calls on the Commission to examine opportunities for data curation at scale;				
21)	58. Stresses the importance to both the economy and society of extensively reusing public sector data, which should be, to the extent possible, real-time or at least up-to-date and easy to access and process thanks to machine-readable and user-friendly formats; encourages the Commission to coordinate with the Member States to facilitate the sharing of non-sensitive, public-sector-generated data sets in machine readable formats beyond what is required by the Open Data Directive, either for free, whenever possible, or covering the costs, and to issue guidance on a common model for data sharing in accordance with the GDPR requirements; while preserving the flexibility of updates of the high-value data sets, encourages the Commission to extend the scope of the Open Data Directive to additional public data sets and to implement the principle of implicit digital transparency of public sector data so as to encourage Member States to publish existing digital raw data in real-time;				
22)	60. Calls on the Commission to identify and establish a voluntary, open and interoperable environmental, social and governance (ESG) data register on corporate sustainability and responsibility performance, which is crucial to ensure sustainable investments and would improve the transparency of companies' sustainability and responsibility to enable them to better demonstrate action taken towards Green				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Deal objectives; calls on the Commission to assess which data sets are essential for the ecological transition and supports, in particular, the opening up of private data when justified for public research purposes;				
23)	61. Calls on the Commission and the Member States, with a view to strengthening the Union's technological sovereignty, to promote research and innovation and work on technologies that facilitate open collaboration, data sharing and analytics, and to invest in capacity-building, high-impact projects, innovation and the deployment of digital technologies, while respecting the technological neutrality principle;				
24)	62. Stresses that the ongoing COVID-19 emergency has exposed shortcomings and vulnerabilities in the digital area, both at Union and Member State level; calls for the Commission and the Member States to continue effectively addressing the digital divide, both across and within the Member States, by improving access to high-speed broadband, very high capacity networks and ICT services, including in most peripheral and rural inhabited areas, thus promoting cohesion and economic and social development; [...]				
25)	67. Calls on the Commission and the Member States to promote competitive markets while strengthening European businesses and to support the development of European cloud offerings; welcomes the initiatives of the European Cloud Federation, such as a European Alliance for Industrial Data and Cloud and funding initiatives, as well as the GAIA-X project, which aim to				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	develop a federated data infrastructure and create an ecosystem that allows scalability, interoperability and self-determination of data providers by design to ensure organisations' or individuals' self-determination to have control over their own data; supports competitive EU markets in the areas of IaaS, PaaS, and SaaS and in the development of specialised and niche cloud services and applications; urges the Commission to remain vigilant about any potential abuses of market power by dominant actors operating in oligopolistic markets in the Union that could inhibit competition or consumer choice; [...]				
26)	68. Calls on the Commission, in cooperation with the Member States, to fast-track the development of a 'cloud rule book' that will establish principles for the provision of competitive cloud services in the Union, represent a solid framework to enhance clarity and facilitate compliance for cloud services, as well as inter alia oblige service providers to reveal where data is processed and stored, while ensuring users have sovereignty over their data; [...]				
27)	70. Emphasises the importance of trust and a more robust cybersecurity framework for a stable data economy, in addition to a culture of security for entities that handle large amounts of data; stresses the importance of state-of-the-art underlying digital infrastructure and calls on the Commission and the Member States to invest together to ensure its full deployment; calls for the support of further development of technology for secure data sharing, such as via secure multi-party computing and encryption technology; urges the Commission to present solutions and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	cybersecurity standards suited to market players of all sizes, including micro enterprises and SMEs; supports the joint and coordinated approach on the EU toolbox on 5G cybersecurity and the secure 5G deployment in the EU;				
28)	71. Calls on the Commission to promote audits on the abusability, vulnerability and interoperability of data sharing infrastructure; [...]				
29)	79. [...] calls on the Commission to issue guidance on how reserving the rights will be made publicly available for all in a centralised way;				
30)	80. States that the Commission should further evaluate changes to the current legal frameworks in civil procedure law in order to reduce existing investment obstacles for private investors; calls on the Commission, in this regard, to promptly and adequately follow up on the European Parliament's resolution of 4 July 2017 on common minimum standards of civil procedure <sup>18</sup> ;				
31)	84. Urges the Commission to conduct a comprehensive assessment of similar potential legal gaps in relation to liability for data, such as for AI- and non-AI-caused damage resulting from deficiencies in or the inaccuracy of data sets, and to evaluate possible adjustments to the current liability systems before coming up with new legislative proposals;				
32)	85. Calls on the Commission to promote best practices in science, technology, engineering and mathematics (STEM) education, with a specific				

<sup>18</sup> OJC 334, 19.9.2018, p. 39.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	focus on gender equality, as well as the involvement and employment of women in tech;				
33)	89. Believes that global rules governing the use of data are inadequate; invites the Commission to come forward with a comparative analysis of the regulatory environment for data in third countries; notes that European companies operating in some third countries are increasingly faced with unjustified barriers and digital restrictions; calls on the Commission and the Member States to bolster efforts with like-minded third countries at international and multilateral forums and in bilateral and trade discussions in order to agree on new international ethical and technical standards to govern the use of new technologies, such as AI, the IoT, 5G and 6G, which should promote the Union's values, fundamental rights, principles, rules and standards and ensure that its market remains competitive and open to the rest of the world; [...]				
34)	91. [...] calls on the Commission, together with the Member States, to negotiate new rules for the global digital economy, including the prohibition of unjustified data localisation requirements; recalls the importance of making progress with e-commerce negotiations at the World Trade Organization and calls for the inclusion of ambitious and comprehensive digital trade chapters in EU free trade agreements; [...]				

## 4.1.20.6. ITRE Resolution 6: EP resolution of 19 May 2021 on European strategy for energy system integration

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>European strategy for energy system integration</b>	19/05/2021 <a href="#">T9-240/2021</a> <a href="#">2020/2241(INI)</a> ITRE	<a href="#">SP(2021)538</a>	Final reply (SP) received 9 November 2021	Specific reply			
1)	1. Supports the direction set out by the Commission in its communication on a strategy for energy system integration, namely a cascading priority for energy efficiency and savings, decarbonisation of end-uses through direct electrification, renewable-based and low-carbon fuels for applications that do not have another alternative; calls on the Commission and the Member States to ensure that a coherent long-term approach is implemented in a spirit of solidarity and cooperation and that a stable regulatory framework be designed for the industries concerned and society as a whole;	No specific reply is provided to this particular point.				Not mentioned.	
2)	3. Recalls the importance of taking into account the diversity of national energy systems and challenges; encourages the Commission to explore various decarbonisation pathways that can help each Member State to use the most efficient decarbonisation solutions according to their needs and resources;	No specific reply is provided to this particular point.				Not mentioned.	
3)	6. Calls on the Commission to assess the possibility of applying the energy efficiency first principle in the upcoming revisions of Union legislation and methodologies and in new initiatives, notably for scenario and infrastructure planning and cost-benefit analysis, and through	The proposal for a revision of the Energy Efficiency Directive (COM(2021) 558 final) adopted on 14 July 2021 introduces in Article 3 a new provision on the Energy Efficiency First principle, to provide the legal basis for the application of the principle, while minimising the administrative burden. It includes an obligation to consider energy efficiency solutions in policy and investment decisions in energy systems and non-energy sectors, including social housing. Furthermore, a				<a href="#">On the 28th September 2021</a> , the Commission published guidance on the <a href="#">Energy Efficiency First Principle</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	recommendations to Member States on their national legislation;	Commission recommendation on implementation of the Energy Efficiency First Principle providing practical guidance for the application of this principle to policy makers and regulators is planned for September 2021.			
4)	7. Notes the high energy consumption in the water sector; calls on the Commission to consider energy-efficient measures for the EU water sector and the possibility of using treated waste water as an on-site source of renewable energy in energy system integration;	The proposal for a revision of the Energy Efficiency Directive (COM(2021) 558 final) adopted on 14 July 2021 introduces in Article 5 an obligation for the public sector to reduce its energy consumption for public services and installations of public bodies. This can be reached in any subsector of the public sector, including water and waste management. Also, other elements of the recent proposal could stimulate efficiency in the water sector, namely Article 8 on energy efficiency obligations, Article 11 on energy management and energy audits and Article 24 on efficiency in heating and cooling supply. Additionally, ambient energy from sewage water is considered as renewable under the Renewable Energy Directive (Directive (EU) 2018/2001).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
5)	8. Notes the insufficient progress made by Member States, and by the Union as a whole, on energy efficiency and renovation of buildings, as presented in the 2020 Energy Efficiency Progress Report; urges the Commission to revise the targets set out in the Energy Efficiency Directive, making them more aligned with the climate targets after a thorough impact assessment, while taking into account its recommendations as part of the Energy Union governance process and the Climate Target Plan;  calls on the Commission to review the existing measures and adopt more targeted policies, especially in those sectors, such as transport, where progress has been insufficient; welcomes, in this regard, the renovation wave strategy and the upcoming revision of Directive (EU) 2018/844 of the European Parliament and of the Council of	The proposal for a revision of the Energy Efficiency Directive (COM(2021) 558 final) adopted on 14 July 2021 sets in Articles 1 and 4 an increased Union binding energy efficiency target for final and primary consumption, as well as indicative national energy efficiency contributions and provides a formula to the Member States to calculate their contributions. The Union targets are set in terms of the level of final and primary energy consumption to be achieved in 2030 and the level of ambition is expressed by comparing these levels to the 2020 Reference Scenario projections for 2030. The level of ambition expressed in such a way reflects additional efforts compared to the efforts that are in place or indicated in the National Energy and Climate Plans.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request <a href="#">Fit-for-55 package</a> , including also proposals presented on 15 December 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	30 May 2018 amending Directive 2010/31/EU on the energy performance of buildings and Directive 2012/27/EU on energy efficiency <sup>19</sup> ; recalls the importance of assessing the impacts of revised targets on businesses, notably SMEs;			Note especially: Commission proposal for a directive on common rules for the internal markets in renewable and natural gases and in hydrogen. <a href="#">COM(2021) 803</a> final 2021/0425 (COD), and Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast). <a href="#">COM(2021)804</a> 2021/0424 (COD) final published on 15 December 2021. See: Commission <a href="#">website</a>	
6)	9. Calls on the Commission to extend the principle of energy efficiency to the entire value chain and to all end-uses, as a cost-efficient way to reduce emissions;  calls on the Commission to propose concrete initiatives to reduce energy losses along the transmission and distribution networks, through the revision of the TEN-E Regulation and Regulation (EU) 2017/1938 of the European Parliament and of the Council of 25 October 2017 concerning measures to safeguard the security of gas supply and repealing Regulation (EU) No 994/2010 <sup>20</sup> ;	The proposal for a revision of the Energy Efficiency Directive (COM(2021) 558 final) adopted on 14 July 2021 introduces in Article 3 a new provision on the Energy Efficiency First principle, to provide the legal basis for the application of the principle, while minimising the administrative burden. It includes an obligation to consider energy efficiency solutions in policy and investment decisions in energy systems and non-energy sectors, including social housing. Furthermore, a Commission recommendation on implementation of the Energy Efficiency First Principle providing practical guidance for the application of this principle to policy makers and regulators is planned for September 2021.		<a href="#">On 28 September 2021</a> , the Commission published <a href="#">Energy Efficiency First Principle providing practical guidance for the application of this principle to policy makers</a> .	
7)	10. Welcomes the new EU Methane Strategy; recalls that it is essential to rapidly deploy methane emissions monitoring systems that rely on satellite observation technologies such as the ones developed through the Copernicus programme; calls on the Commission to propose measures to further reduce methane emissions in the energy sector; welcomes the Commission's	The Commission plans to come up with proposals to reduce methane emissions in the energy sector by the end of 2021.		Proposal for a Regulation on methane emissions reduction in the energy sector and amending Regulation (EU) 2019/942 <a href="#">COM(2021) 805</a> final 2021/0423 (COD).  See also: Commission <a href="#">website</a> on methane emissions.	

<sup>19</sup> OJL 156, 19.6.2018, p. 75.

<sup>20</sup> OJL 280, 28.10.2017, p. 1.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	proposal to make measuring, reporting and verification, and leak detection and repair, mandatory;				
8)	11. Underlines the potential of the reuse of waste, particularly energy and waste heat from industrial processes, biowaste, buildings and data centres; emphasises the sustainable production of energy stemming from agriculture, food consumption and forestry; calls on the Commission and the Member States to develop effective incentives and business models to recover industrial waste heat and unavoidable waste heat into heat networks or storage, when further revising the Waste Framework Directive <sup>21</sup> ;	The proposal for a revision of the Renewable Energy Directive (COM(2021) 557 final) adopted on 14 July 2021 introduces in Article 23(1) an obligation for the Member States to assess their potential for the use of waste heat and cold. Article 24(6) is also amended with a new point on a framework to facilitate coordination among actors having a role in the use of waste heat and cold.		On 14 July 2021, the Commission published <a href="#">revision of the Energy Efficiency Directive (COM(2021) 558 final)</a> , Revision of the Waste framework Directive was not envisaged in CWP 2021 nor it is foreseen for 2022.	
9)	12. Draws attention to the challenge of decarbonising heating and cooling; calls for the further implementation of the heating and cooling strategy, including when revising the Renewable Energy Directive, the Energy Efficiency Directive, as well as the creation of an enabling framework when revising the environmental and energy State aid guidelines <sup>22</sup> ; highlights the potential of 4th and 5th generation high-efficiency low-temperature district heating networks; notes that they can play a significant role in cost-efficient heat decarbonisation in urban and industrial areas; welcomes the fact that district heating and cooling networks will be eligible for funding under the revised Connecting Europe Facility Regulation, and calls for their	No specific reply is provided to this particular point (on European Network of Transmission System Operators for Electricity (ENTSO-E) and the European Network of Transmission System Operators for Gas (ENTSO-G);		Not mentioned.	

<sup>21</sup> Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJ L 312 22.11.2008, p. 3).

<sup>22</sup> Guidelines on State aid for environmental protection and energy.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	inclusion as potential projects of common interest under the TEN-E Regulation; calls, moreover, on the Commission to take heat infrastructure and thermal storage into account when developing the 10-year network development plans for both the European Network of Transmission System Operators for Electricity (ENTSO-E) and the European Network of Transmission System Operators for Gas (ENTSO-G);				
10)	13. Recalls that the energy transition will require between EUR 520 and EUR 575 billion in annual infrastructure investment and the commensurate and effective deployment of renewable energy; calls on the Commission to develop an inclusive, integrated and realistic scenario planning, which further considers energy efficiency and energy system integration, in line with the Sustainable Europe Investment Plan; [...]	No specific reply is provided to this particular point (on an inclusive, integrated and realistic scenario planning).		Not mentioned.	
11)	16. Calls on the Commission to use the revision of the TEN-E Regulation as an opportunity to make it fully consistent with the goal of climate neutrality; underlines that the principles of emissions reductions, digitalisation and energy system integration should be enshrined in the regulation's objectives and the 10-year network development planning, as well as a longer planning timeframe aligned to the climate neutrality target in order to, inter alia, avoid stranded costs; [...]	No specific reply is provided to this particular point (relative to revision of the TET-E Regulation).		Not mentioned.	
12)	17. Encourages the Commission to propose more ambitious measures and targets in the revision of the Renewable Energy Directive on the promotion of renewable energy in order to	Several references to the Commission proposal published on the 14 July 2021 on <a href="#">revision of the Energy Efficiency Directive (COM(2021) 558)</a> .		On 14 July 2021, the Commission published a proposal for the <a href="#">revision of the Energy Efficiency Directive (COM(2021) 558)</a> .	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	increase the share of renewable energy across sectors on the basis of a thorough impact assessment; [...]				
13)	18. Welcomes the adoption of the Renovation Wave for Europe strategy that will speed up the uptake of energy and resource efficiency measures and higher penetration of renewables in buildings throughout the EU; calls on the Commission and the Member States to take into account the synergies between the energy sector and the building sector in order to achieve climate neutrality;	No specific reply is provided to this particular point.		Not mentioned.	
14)	20. Welcomes the adoption of the European Hydrogen Strategy; stresses that priority should be given to building a renewable hydrogen supply chain in Europe to foster first-mover advantages, industrial competitiveness and the security of energy supply; is convinced that renewable and low-carbon hydrogen can help reduce persistent emissions, such as those from industrial processes and heavy transport, where direct electrification might be limited due to low cost-efficiency or technical, social and environmental reasons; recalls the need to accelerate the decarbonisation of existing hydrogen production; supports the launch of important projects of common European interest on hydrogen; calls on the Commission to develop a comprehensive classification and certification framework of gaseous carriers on the basis of the full life cycle GHG emissions savings and sustainability criteria, in line with the approach set out in the Renewable Energy Directive on the promotion of renewable energy; stresses that such a classification is of utmost importance for	<p>The Commission plans to come up with proposals for a comprehensive classification and certification framework of low-carbon fuels by the end of 2021. The revision of the Renewable Energy Directive (COM(2021) 557 final) already provides a detailed definition and certification for renewable fuels, including renewable hydrogen and its derivatives produced from renewable electricity, including threshold for greenhouse gas emissions and sustainability criteria. Meanwhile, the research &amp; Innovation (R&amp;I) programme is progressively embedding more and more the circularity by design principle into R&amp;I on renewable energy technology. It will especially be the case for the Work Programme of the new Joint Undertaking on Clean Hydrogen and for the part on renewable energy in the Horizon Europe Work Programme.</p> <p>The current Renewable Energy Directive already requires additionality for the production of Renewable Fuels of Non-Biological Origin (RFNBOs), including renewable hydrogen in Article 27. The revision of the Renewable Energy Directive proposed on 14 July 2021 has broadened the definition of RFNBOs to applications in all end-use sectors. As such, the requirements for additionality have also been expanded to other application areas. By 31 December 2021, the</p>		<p>Commission: Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD)</p> <p>and</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a> 2021/0424 (COD).</p> <p>See also: Commission <a href="#">website</a> on hydrogen and decarbonisation of the gas market.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>market players, authorities and consumers; underlines the need to develop a robust framework and appropriate baseline to ensure that sufficient additional renewable energy generation capacity is deployed in proportion to the need for renewable hydrogen;</p> <p>calls on the Commission to consider this diversity of needs in its forthcoming legislative proposals;</p> <p>calls on the Commission to guarantee a fair and efficient competition between hydrogen that is imported from international partners and hydrogen that is produced in the EU;</p>	<p>Commission shall adopt a delegated act to establish a Union methodology setting out detailed rules for additionality.</p>			
15)	<p>22. Highlights that transport can be a significant facilitator of renewable energy deployment; calls on the Commission and Member States to propose a favourable policy framework and ambitious targets based on the principle of technology neutrality among those technologies necessary to achieve climate neutrality, for a just, affordable and balanced transition towards the decarbonisation of all passenger and freight transport modes, including public fleets and networks, road, maritime, inland waterborne, rail and air transport primarily through electrification, and where this is not possible, sustainably-produced fuels; welcomes the Commission's announcement of the deployment of one million charging points for electric vehicles in the revision of Directive 2014/94/EU;</p> <p>calls on the Commission to incentivise car manufacturers to enable vehicle-to-grid charging; stresses the need to adapt the electrification networks and infrastructure for alternative fuels for Europe's vehicle fleet as well as to support other readily deployable solutions, notably in</p>	<p>The proposal for a revision of the Renewable Energy Directive (COM(2021) 557 final) adopted on 14 July introduces in Article 20a an obligation for the Member States to ensure that new, non-publicly accessible normal power recharging points installed in their territory can support smart charging functionalities and, where appropriate based on assessment by the regulatory authority, bidirectional charging functionalities. It also includes provisions concerning access to battery data. These provisions complement other provisions included in the proposal for a new Regulation on the deployment of alternative fuels infrastructure (COM(2021) 559 final) adopted on 14 July. The proposal defines smart recharging and introduces in Article 5 (8) an obligation that all public accessible normal power recharging points are capable of smart charging from the date of entry into force.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Fit-for-55 package</a> including also <a href="#">proposals</a> presented on 15 December 2021).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	transport hubs; underlines the potential for internal cooperation on the decarbonisation of transport across borders; highlights in this respect the critical role of the Transport Community and the Commission in order to create synergies with neighbouring countries and accelerate the transfer of EU standards on transport emissions; stresses the importance of public transport in reducing energy demand and the need to develop and expand decarbonised public transport in both urban and rural areas;				
16)	23. Stresses that there are sectors that are increasing their energy consumption, such as the transport sector, the tourism sector and the ICT sector; supports the Commission in looking into the synergies between district heating and cooling networks and sources of unavoidable waste heat; welcomes the commitment included in the EU Digital Strategy to make data centres climate-neutral by 2030; calls on the Commission to propose an action plan for the participation of the tourism sector in the process of energy system integration, looking inter alia at the promotion of rail tourism, soft and e-mobility and the creation of circular-energy communities in sustainable tourism;	While the Commission Strategy does not include actions specific to the tourism sector, several provisions contained in the Fit-for-55 package are relevant for the tourism sector, as they help to build back better in a sustainable manner, in particular the accelerated development of recharging and refuelling infrastructure for zero- and low-emission vehicles (AFIR), as well as the greater use of renewable and low carbon fuels in aviation and maritime (ReFuelEU Aviation and FuelEU maritime).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Fit-for-55 package</a> , including also <a href="#">proposals</a> presented on 15 December 2021).	
17)	26. Regrets that a number of Member States have not yet reached their 10 % electric interconnection target by 2020; welcomes the Commission's proposal to raise the 2030 electricity interconnection target to 15 %, provided that it better supports national investments through the list of projects of common interest; encourages the Commission to	No specific reply is provided to this particular point (on launching expert group on interconnection targets).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	relaunch the work of the expert group on interconnection targets;				
18)	28. Reiterates that the European energy storage capacity is an essential source of flexibility and security of supply; highlights the need to reduce regulatory barriers to the installation of storage equipment; calls on the Commission to assess how to reduce the costs of taxes and levies on energy transformation and energy storage, and to eliminate the potential double taxation on storage projects in its forthcoming revision of Directive 2003/96/EC; recalls the importance to ensure full interoperability of different transport and storage systems, including those with cross-border relevance and connected to third countries; urges the Commission to revise that directive while avoiding undue market distortions at the expense of other energy sources and adverse effects on consumers;	The Electricity Directive (Directive (EU) 2019/944) already indicates in Article 15 that active customers owning an energy storage facility shall not be subject to double charges for stored electricity remaining within their premises. As regards taxation, electricity storage facilities and transformers of electricity may be considered as redistributors when they supply electricity and electricity can be subject to taxation and become chargeable at the time of supply by the redistributor.		No further/specific actions proposed/promised to be taken by the Commission.	
19)	29. [...] calls on the Commission to further take into consideration the need for deployment of storage infrastructure in the next list of projects of common interest and in the revision of the guidelines on State aid for environmental protection and energy;	The Commission is currently consulting on proposals to revise the State aid Guidelines for Energy and the Environment, which should be formally adopted by 2022.		<p><a href="#">State aid for environmental protection and energy – revised guidelines</a>, 21 December 2021.</p> <p>Revision of State Aid rules on climate, energy and environment, Commission <a href="#">website</a> and <a href="#">public consultation</a>.</p> <p>Adoption of the latest list of PCIs: Commission <a href="#">proposes new list</a> of Projects of Common Interest for a more integrated and resilient energy market, 19 November 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
20)	33. Highlights the advantages of a 'multi-directional' system in which consumers play an active role in energy supply; recalls that the Member States must ensure that all citizens have the right to produce, consume and store their own energy individually or as a community and in this respect underlines the role of flexibility options in the shift from a supply-driven to a demand-driven energy system, enabling active consumers for demand-response via digital solutions fully in line with the General Data Protection Regulation <sup>23</sup> ; calls on the Commission and the Members States to explore ways of further incentivising the development of a European market for demand-side flexibility through, inter alia, common standards for end-use flexibility, an assessment of the potential benefits and impacts on energy system costs; [...]	No specific reply is provided to this particular point (on exploring ways of further incentivising the development of a European market for demand-side flexibility).		Not mentioned.	
21)	35. Recalls the importance of addressing cybersecurity risks in the energy sector to ensure the resilience of the energy systems; underlines that the increasing number of connected products, such as heating appliances, electric vehicles and smart meters, may increase the risk of cybersecurity attacks to the electricity system; urges the Commission to swiftly address cybersecurity risks by setting a high level of	No specific reply is provided to this particular point (on cybersecurity).		Not mentioned.	

<sup>23</sup> Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (OJ L 119, 4.5.2016, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	cybersecurity protections for connected products in the context of the electricity network code on cybersecurity;				
22)	36. Stresses that a more renewable, decentralised and better integrated energy system requires better forecasting of energy demand and more real-time matching of the supply and storage from different energy carriers; highlights, in this regard, the crucial role of digitalisation for the processing of statistical and meteorological data; calls on the Commission and the Member States to develop an internal market for digital energy technologies while protecting consumers' privacy and personal data;	The Commission is currently working on the preparation of a Digitalisation of Energy Action Plan, planned for 2022.		As regards Digitalisation of Energy Action Plan, according to Commission <a href="#">roadmap</a> adoption planned for Q2 2022.	
23)	37. Reiterates the crucial role of the Agency for Cooperation of Energy Regulators in the energy system integration and the implementation of the EU energy legislation; calls on the Commission and the Member States to make sure that the agency is provided with sufficient means to carry out its missions;	Significant increases in resources should be based on a Legislative Financial Statement (LFS). The Commission is preparing an assessment whether the Agency for the Cooperation of Energy Regulators (ACER) has sufficient resources to be included in the Commission Opinion on ACER's Programming Document 2022-2024. This assessment could identify higher proposed needs in the future and, subsequently, result in an LFS annexed to the Commission Opinion and be reflected in the autumn amending letter to the draft 2022 budget. This would be a one-off effort covering existing tasks of ACER for which staffing needs had been underestimated when preparing the third internal market package and the Regulation on Wholesale Energy Market Integrity and Transparency (REMIT). As concerns the new tasks, staffing and other funding needs should be sufficiently reflected in the LFS accompanying new legislation. This is not only important when the Commission prepares proposals. Also, the Parliament and the Council should, when agreeing on changes to a proposal in the interinstitutional negotiations which gives ACER new tasks, at the same time accept, as		European Union Agency for the Cooperation of Energy Regulators <a href="#">Single Programming Document 2022-2024</a> , December 2021.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Budgetary Authority, that ACER may need additional resources.			
24)	<p>38. Recalls that the primary objective of Union action in the field of energy is to ensure the proper functioning of the market with regard to the need to preserve and improve the environment; calls on the Commission to take the necessary measures to safeguard the well-functioning of energy markets, to ensure the full implementation of the <i>acquis</i> for the internal energy market, including the Clean Energy Package, to align consumer rights in the gas and district heating sectors with those of electricity consumers, and help them contribute to the decarbonisation of the economy; stresses the importance of guiding customers towards the most energy-efficient and cost-effective decarbonisation option, on the basis of prices that properly reflect all the costs of the energy carrier used; welcomes the initiative to revise Directive 2003/96/EC and transform it into an instrument aligning taxation policies to the energy and climate targets for 2030 and 2050; calls on the Commission and the Member States to integrate the climate objectives in this directive; stresses the need to revise its scope and differentiate fossil gases, low-carbon gases and renewable gases to incentivise the development of sustainable alternatives; calls on the Member States to remove undue taxes and levies to ensure taxation is harmonised, to promote clean innovative technologies, and to ensure competitive energy costs in Europe; calls on the Member States to work on phasing out direct and indirect fossil fuel subsidies;</p>	<p>No specific reply is provided to this particular point (Commission to take the necessary measures to safeguard the well-functioning of energy markets, to ensure the full implementation of the <i>acquis</i> for the internal energy market, including the Clean Energy Package).</p> <p>No specific reply is provided to this particular point (on climate objectives).</p>		<p>Not mentioned.</p> <p>Not mentioned.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
25)	39. Concurs with the Commission's analysis on the need to further work towards the phase out of fossil fuel subsidies, the need to provide more consistent price signals across energy sectors and the Member States, the lack of consistency on high non-energy related charges and levies borne by electricity customers and the fact that external costs are not internalised; urges the Commission and Member States to remedy the known problems through effective regulatory measures;	No specific reply is provided to this particular point.	C C	Not mentioned.	
26)	40. Is convinced of the need to encourage energy consumers to be more active; welcomes the entry into force of the new provisions set out in Directive (EU) 2019/944, which enable active consumers to fully participate to the market and reap the benefits of their activities; calls on the Commission to assess the remaining barriers to facilitate the development of renewable self-consumption and renewable energy communities in particular those in low-income or vulnerable households and for industrial consumers; calls for transparent information on the climate impact of energy choices as part of the planned consumer information campaign;	No specific reply is provided to this particular point (on assessment of the remaining barriers).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
27)	43. Calls on the Commission to propose rules allowing citizens' energy communities to further participate in energy system integration, for example through the connection to heat networks, electric-mobility charging, storage or demand-response devices alongside renewable-energy production;	No specific reply is provided to this particular point (on new rules for citizens).		Not mentioned.	
28)	45. Stresses the importance of increasing the competitiveness of European technologies to foster the autonomy of the Union in the strategic energy sector; calls on the Commission to support research and innovation through the various structural and sectoral funds; recalls the Union's global leadership in satellite emission measurement technologies and in particular the Copernicus Atmosphere Monitoring Service; recalls the expertise of the European Centre for Medium-Range Weather Forecasts in predicting weather and therefore anticipating fluctuations in the energy demand; calls on the Commission to consider further supporting technologies that will contribute to a climate-proof and integrated energy system, including where Europe has global leadership and domestic-based value chains;	No specific reply is provided to this particular point (on supporting research and innovation through the various structural and sectoral funds).		Not mentioned.	
29)	47. Highlights the need for a just transition and calls on the Commission and Member States to address structural changes in the energy sector in all relevant legislative proposals in order to help facilitate the transition towards climate neutrality; reiterates the promise outlined in the new Green deal that no one should be left behind; notes in this regard that it is of the utmost importance to	No specific reply is provided to this particular point (on structural changes).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	transform the skills of employees in sectors that face the risk of disappearing through the green transition; highlights the value of the well-established European expertise on energy system integration, and calls on Member States to value this expertise and help transfer it from the fossil energy sector to a climate-neutral sector integrated energy system;				
30)	49. Welcomes the initiatives undertaken for strategic value chains; calls for recognising renewable energy technologies as a strategic value chain and for the establishment of an alliance to support efforts in scaling up these technologies, as well as an initiative on enhancing process and energy efficiency; calls on the Commission to ensure a transparent governance of all alliances including the participation of SMEs, civil society, non-governmental organisations and independent experts while guaranteeing geographical diversity;	No specific reply is provided to this particular point.		Not mentioned.	

4.1.20.7. ITRE Resolution 7: EP resolution of 19 May 2021 on European Strategy for Hydrogen

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
European Strategy for Hydrogen	19/05/2021 <a href="#">T9-241/2021</a> <a href="#">2020/2242(INI)</a> ITRE	<a href="#">SP(2021)538</a>	Final reply (SP) received 9 November 2021	Specific reply			
1)	2. Welcomes the hydrogen strategy for a climate-neutral Europe proposed by the Commission, including the future revision of the Renewable Energy Directive, as well as the growing number of Member State strategies and investment plans for hydrogen; underlines that these strategies need to be aligned with the Member States' national energy and climate plans, and calls for their swift and ambitious implementation; believes that the Commission should take these strategies into account in future legislative proposals; urges the Commission to align its approach on hydrogen with the new EU industrial strategy and make it part of a coherent industrial policy, taking into account the fact that the hydrogen strategy is not a goal in itself, but should be seen in the context of the EU's overall efforts to reduce greenhouse gas emissions while securing long-term quality jobs and contributing to the competitiveness of EU industry;	<p>The establishment of the European Clean Hydrogen Alliance and the on-going intensive work on Important Projects of Common European Interest (IPCEI) on hydrogen demonstrate that the EU efforts are supporting the overall objective of decarbonising the European industry. Both the New EU industrial strategy and the accompanying Staff Working Document "Towards competitive and clean European steel"<sup>24</sup> recognise the interest to support the sector to ensure breakthrough innovation.</p> <p>In addition, the proposal for introducing a sub-target for Renewable fuels of non-biological origins (RFNBOs), together with an overall indicative target for renewables uptake in the industrial sector, within the revision of the Renewable Energy Directive (COM(2021) 557 final) will ensure that demand for renewable hydrogen is created in those lead markets where it is most needed to replace fossil-based hydrogen (Article 22a).</p>				<p>The Commission has been already working on action falling under the scope of the EP request in the <a href="#">Fit-for-55 package</a>, including also proposals presented on 15 December 2021.</p> <p>Commission proposals:</p> <p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD), and</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a>, 2021/0424 (COD).</p> <p>See also: Commission <a href="#">website</a>.</p>	
2)	4. Is convinced that hydrogen produced from renewable sources is key to the EU's energy transition, as only renewable hydrogen can sustainably contribute to achieving climate neutrality in the long term and avoid lock-in	[...] the proposal for introducing a sub-target for Renewable fuels of non-biological origins (RFNBOs), together with an overall indicative target for renewables uptake in the				<p>The Commission actions falling under the scope of the EP request are presented in the <a href="#">Fit-for-55 package</a>, including also proposals presented on 15/12/2021.</p> <p>Commission proposals:</p>	

<sup>24</sup> SWD(2021) 353 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>effects and stranded assets; notes with concern that renewable hydrogen is not yet competitive; therefore urges the Commission and the Member States to incentivise the value chain and market uptake of renewable hydrogen, taking into account the fact that the relationship between price and yield would gradually improve in view of the development of industrial methods and value chains;</p>	<p>industrial sector, within the revision of the Renewable Energy Directive (COM(2021) 557 final) will ensure that demand for renewable hydrogen is created in those lead markets where it is most needed to replace fossil-based hydrogen (Article 22a).</p>		<p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD), and</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a> 2021/0424 (COD).</p>	
3)	<p>5. Recognises the efforts undertaken by hydrogen valleys in various regions throughout the EU to develop integrated, cross-sectoral hydrogen value chains; underlines their important role in initiating the production and application of renewable hydrogen with a view to developing the EU hydrogen economy; urges the Commission to build on these initiatives, support their development and help those involved to pool their know-how and investments;</p>	<p>Within the framework of the Smart Specialisation Platform for Industrial Modernisation, the Commission supports the Hydrogen Valleys interregional partnership, with the objective to strengthen the value chain for hydrogen and fuel cell (HFC) technologies via interregional cooperation and develop the technological readiness and the commercial availability of HFC applications. Under the pilot action on interregional innovation partnerships for COVID-19 response and recovery, which runs until early 2022, one of the selected partnerships “Hy2Market” deals with Hydrogen Technologies in carbon-intensive regions. It will benefit from the Commission experts' support, providing, among others, advice on how to enhance the commercialisation and scale-up activities and best combine EU funds to finance projects. The Fuel Cell and Hydrogen Partnership set up a platform integrating all Hydrogen Valleys and will continue developing it, through the new Joint Undertaking on Clean Hydrogen under Horizon Europe.</p>		<p>No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Smart Specialisation Platform for Industrial Modernisation</a>).</p> <p>The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out (setting up and development of the platform integrating all Hydrogen Valleys).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	<p>7. Believes that a common legal classification of the different types of hydrogen is of utmost importance; welcomes, as a first step, the classification proposed by the Commission; points out that rapid agreement on comprehensive, precise, science-based and uniform EU-wide terminology is necessary in order to adapt national legal definitions and establish a clear classification with a view to providing legal certainty; calls on the Commission to conclude its work on establishing such terminology as rapidly as possible, in the context of all relevant legislation;</p>	<p>The revision of the Renewable Energy Directive (COM(2021) 557 final) provides a detailed definition and certification for renewable fuels, including renewable hydrogen as well as its derivatives produced from renewable electricity, including threshold for greenhouse gas emissions and sustainability criteria. Definitions for low-carbon hydrogen have also been included in the revision of the Energy Taxation Directive (COM (2021) 563 final), and a proposed certification system will be expanded in the upcoming revision of the Hydrogen and Gas Markets Decarbonisation Package (end 2021). Consistency between the certification schemes and verification schemes under the revision of the EU Emissions Trading Scheme (COM(2021) 551 final) are ensured.</p>		<p>Commission proposals: Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD) and Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a>, 2021/0424 (COD).</p>	
5)	<p>11. Stresses that the standardisation system needs to be based on a holistic approach and must be applicable to imported hydrogen; calls on the Commission to introduce a regulatory framework with robust and transparent sustainability criteria for the certification and tracking of hydrogen in the EU, taking into account its greenhouse gas footprint throughout the value chain, including transport, in order to also trigger investment in sufficient supplementary renewable electricity generation; also calls on the Commission to provide, as early as possible in 2021, a regulatory framework for hydrogen that ensures standardisation, certification, guarantees of origin, labelling and tradability across Member States, and to also use the upcoming revision of the EU Emissions Trading System (ETS) to examine what changes are needed to unlock the full potential of hydrogen to contribute to the EU's climate goals, taking into account the risks of carbon leakage;</p>	<p>The revision of the Renewable Energy Directive (COM(2021) 557 final) provides a detailed definition and certification for renewable fuels, including renewable hydrogen as well as its derivatives produced from renewable electricity, including threshold for greenhouse gas emissions and sustainability criteria. Definitions for low-carbon hydrogen have also been included in the revision of the Energy Taxation Directive (COM (2021) 563 final), and a proposed certification system will be expanded in the upcoming revision of the Hydrogen and Gas Markets Decarbonisation Package (end 2021). Consistency between the certification schemes and verification schemes under the revision of the EU Emissions Trading Scheme (COM(2021) 551 final) are ensured.</p>		<p>The Commission actions falling under the scope of the EP request are presented in the <a href="#">Fit-for-55 package</a>, including also proposals presented on 15 December 2021. Commission proposals: Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD), and Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a>, 2021/0424 (COD).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	15. Believes that the EU gas market design and the Clean Energy Package could serve as basis and example for the regulation of the hydrogen market; highlights that the rapid and predictable development of functioning hydrogen production also requires democratic public planning, associating producers, workers and their trade unions, scientists and non-governmental organisations (NGOs); also encourages the Commission and the Member States to devise specific solutions in order to ramp up hydrogen production in less connected or isolated regions, such as islands, while ensuring the development of related infrastructure, including by repurposing it;	No specific reply is provided to this particular point.		Not mentioned.	
7)	16. Calls on the Commission to include and assess the legal requirements that are necessary for an EU sustainable hydrogen economy in its impact assessments regarding the revision of the relevant legislation, in order to deliver on the EU's increased climate ambition and make renewable hydrogen more economically attractive; urges the Commission to look, in particular, into the review of the Renewable Energy Directive, the Energy Taxation Directive <sup>25</sup> and the ETS Directive, in order to ensure a level playing field and a future-proof regulatory framework for hydrogen;	Building on the project collection exercise initiated under the European Clean Hydrogen Alliance, the Commission has collected detailed information on 997 projects across the full value chain, and with detailed timelines for the completion of each project. Matchmaking exercises and the conversion of this project collection into a curated project pipeline will be provided by the end of 2021. The impact assessment (SWD(2021) 623 final) of the revision of the Renewable Energy Directive identifies the expected volumes of renewable hydrogen uptake in 2030, and the associated need for low-carbon hydrogen to fully decarbonise hydrogen production in Europe.		The Commission actions falling under the scope of the EP request are presented in the <a href="#">Fit-for-55 package</a> , including also proposals presented on 15 December 2021. Commission: Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021)803</a> final 2021/0425 (COD), and Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a> , 2021/0424 (COD). See especially impact assessment accompanying the Proposal for a Directive of the European Parliament	

<sup>25</sup> Council Directive 2003/96/EC of 27 October 2003 restructuring the Community framework for the taxation of energy products and electricity (OJ L 283, 31.10.2003, p. 51).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				and of the Council on common rules for the internal markets in renewable and natural gases and in hydrogen (recast) and the proposal for a Regulation of the European Parliament and of the Council on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">SWD(2021)455</a> .	
8)	<p>17. Welcomes the Commission’s ambitious goals of increasing the capacity of electrolysers and renewable hydrogen production;</p> <p>calls on the Commission to develop a roadmap for the deployment and upscaling of electrolysers and to forge partnerships at the EU level to ensure their cost-effectiveness;</p> <p>urges the Commission and the Member States to remove existing administrative burdens and to incentivise the expansion of the value chain and the market uptake of renewable hydrogen in order to make it technologically mature and competitive by providing financial stimuli and dedicated funding schemes, including innovative solutions such as feed-in premiums for renewable hydrogen fed into the hydrogen grid, by revising State aid rules and by carrying out a comprehensive revision of energy pricing and taxation systems with a view to internalising external costs;</p>	<p>Points 17, 18 and 19:</p> <p>The Commission will revise the State aid Guidelines for Energy and the Environment to ensure that “fossil-based hydrogen with carbon capture” projects can only be supported for a limited period, in keeping with the decarbonisation trajectory needed to meet the Union’s climate goals.</p>		<p><a href="#">State aid for environmental protection and energy – revised guidelines</a>, published on 21 December 2021.</p>	
9)	<p>18. Notes that a sustainable hydrogen economy should allow capacities to be ramped up inside an integrated EU energy market; recognises that there will be different forms of hydrogen on the market, such as renewable and low-carbon hydrogen, and underlines the need for investment to scale up renewable production fast enough to reach the EU’s climate targets and</p>	<p>Points 17, 18 and 19:</p> <p>Building on the project collection exercise initiated under the European Clean Hydrogen Alliance, the Commission has collected detailed information on 997 projects across the full value chain, and with detailed timelines for the completion of each project. Matchmaking exercises and the conversion of this project collection into a curated project pipeline will be provided by the end of 2021. The impact assessment</p>		<p><a href="#">European Clean Hydrogen Alliance - project pipeline</a> (November 2021).</p> <p><a href="#">Transition platform</a> - Just Transition Mechanism.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>environmental goals for 2030 and 2050, while recognising low-carbon hydrogen as a bridging technology in the short and medium term; calls on the Commission to assess approximately how much low-carbon hydrogen will be needed for decarbonisation purposes until renewable hydrogen can play this role alone, in which cases, and for how long;</p> <p>calls on the Commission and the Member States to reduce regulatory and economic hurdles in order to foster a quick market uptake of hydrogen; further notes the need to avoid unsustainable resource exploitation, continued methane emissions, carbon lock-in and stranded assets; underlines that the use of hydrogen should contribute to achieving EU climate goals and the fast development and deployment of renewable hydrogen;</p>	<p>(SWD(2021) 623 final) of the revision of the Renewable Energy Directive identifies the expected volumes of renewable hydrogen uptake in 2030, and the associated need for low-carbon hydrogen to fully decarbonise hydrogen production in Europe. Financial support for renewable or low-carbon hydrogen uptake will be needed from various sources, among others the Commission has set up a Just Transition platform to assist EU countries in funding support to the available Just Transition Mechanisms.</p>			
10)	<p>19. Stresses the importance of phasing out fossil-based hydrogen as soon as possible, focussing on the cleanest technologies in terms of sustainability and greenhouse gas emissions; urges the Commission and the Member States to immediately start planning that transition carefully, so that the production of fossil-based hydrogen starts decreasing swiftly, predictably and irreversibly and so that the prolongation of the lifetime of fossil-based production facilities is avoided; notes that a number of fossil-based hydrogen production sites are located in the just transition territories and highlights that effective support measures should be directed at the decarbonisation of existing fossil-based hydrogen production; urges that measures aimed at the</p>	<p>Points 17, 18 and 19:</p> <p>Financial support for renewable or low-carbon hydrogen uptake will be needed from various sources, among others the Commission has set up a Just Transition platform to assist EU countries in funding support to the available Just Transition Mechanisms.</p>		<p><a href="#">European Clean Hydrogen Alliance - project pipeline</a> (November 2021).</p> <p><a href="#">Transition platform</a> - Just Transition Mechanism.</p> <p>The Commission actions falling under the scope of the EP request are presented in the <a href="#">Fit-for-55 package</a>, including also proposals presented on 15/12/2021.</p> <p>Commission proposals:</p> <p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD) and</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>development of the European hydrogen economy should not lead to the closure of these production sites, but to their modernisation and further development, thus benefiting the regions by ensuring a locally produced sustainable energy carrier, facilitating GHG emissions reduction, and contributing to the reskilling and further employability of the local workforce;</p>			<p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a>, 2021/0424 (COD).</p>	
11)	<p>21. Underlines that a hydrogen economy requires significant additional amounts of affordable renewable energy and the corresponding infrastructure for the production of renewable energy and its transport to hydrogen production sites and of the produced hydrogen to the end users; calls on the Commission and the Member States to start the roll-out of sufficient supplementary renewable energy capacity to supply the electrification process and the production of renewable hydrogen, by inter alia simplifying permit procedures, and to develop cross-border partnerships based on the opportunities different regions have to produce renewable energy and renewable hydrogen;</p>	<p>The Commission has put forward a revision of the Renewable Energy Directive (COM(2021) 557 final), which has increased the EU-wide target for the share of renewable energy from at least 32% to at least 40% by 2030. In addition, the EU has underpinned the necessary investments in renewable energies with the EU's recovery instrument NextGenerationEU, alongside the Multiannual Financial Framework (MFF). The Commission is in the process of revising the State aid Guidelines for Energy and the Environment, as well as the General Block Exemption Regulation, to facilitate the granting of aid to renewable projects alongside appropriate competition safeguards. The delegated regulation on the EU sustainable finance taxonomy (C(2021) 2800 final) has put forward the criteria to support investments in upscaling renewables. Moreover, a substantial part of renewable energy technologies still need a lot of research and innovation (R&amp;I) to increase efficiency (including for industrial production processes) and reduce cost, for production, storage and transformation, meaning a need for substantial efforts in R&amp;I through Horizon Europe and through the national research and innovation programmes.</p>		<p>Next Generation EU, <a href="#">website</a>.</p> <p><a href="#">State aid for environmental protection and energy – revised guidelines</a>, published on 21 December 2021.</p> <p>General Block Exemption Regulation - Commission Regulation (EU) 2021/1237 of 23 July 2021 amending Regulation (EU) No 651/2014 declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty <a href="#">C/2021/5336</a>.</p> <p>Sustainable finance taxonomy Regulation 2020/852 - corresponding delegated and implementing acts, <a href="#">website</a>.</p> <p>The Commission actions falling under the scope of the EP request are presented in the <a href="#">Fit-for-55 package</a>, including also proposals presented on 15/12/2021.</p> <p>Commission proposals:</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
				Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021)803</a> final 2021/0425 (COD) and Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a> 2021/0424 (COD).	
12)	24. Underlines that renewable hydrogen can be produced from several renewable energy sources, such as wind, solar and hydropower (including pumped storage); stresses the potential of brownfield sites to provide space for renewable energy production; invites the Commission, in view of the recently published strategy on offshore renewable energy, to assess how offshore renewable energy sources could pave the way for the wider development and uptake of renewable hydrogen;	The Clean Energy Industrial Forum, relaunched under the Offshore Energy Strategy (COM(2020) 741 final), and the Clean Energy Competitiveness report (COM(2020) 953 final) have already developed a set of key performance indicators to track the performance of European industry within the renewables ecosystem. The European Clean Hydrogen Alliance, through its open membership, is ensuring the participation of SMEs as part of the creation of the European hydrogen ecosystem.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
13)	26. Notes that the transition to a climate-neutral energy system should be planned carefully, taking into account today's starting points and infrastructure, which may differ across the Member States; emphasises that the Member States should be flexible when designing support measures, including State aid measures, for the development of their national hydrogen economies; asks the Commission, in that regard, to provide more information on planned differentiation and the flexibility of support measures;	No specific reply is provided to this particular point.		Not mentioned.	
14)	30. Stresses that in order to have a properly functioning EU hydrogen market, people with specialised skills are needed, especially with regard to safety; underlines the necessity of a	The European Skills Agenda released in July 2020 proposes a number of action to ensure that the workforce has the opportunity to develop the skills need to address the huge societal changes, such as the digitalisation of everything and		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP

	<p>for the transport of pure hydrogen and the underground storage of hydrogen, taking into account various factors, such as a cost-benefit analysis, from both techno-economic and regulatory perspectives, overall system integration and long-term cost efficiency; notes that repurposing appropriately located gas infrastructure that already exists or is under development could maximise cost efficiency, minimise land and resource use and investment costs and minimise the social impact; underlines that the repurposing of gas infrastructure can be relevant for the use of hydrogen in the priority sectors of emission-intensive industries, including connections between industrial sites and multimodal transport centres, keeping in mind the need to transport hydrogen through the most efficient means;</p> <p>urges the Commission and the Member States to ensure that any potential future gas infrastructure is compatible with pure hydrogen;</p> <p>calls on the Commission to assess where hydrogen blending is currently used and to scientifically assess its demand for meeting demonstrated industrial hydrogen needs, as well as its advantages and disadvantages, with a view to identifying infrastructure needs while avoiding stranded assets;</p>	<p>Committee for Standardisation (CEN) and relevant stakeholders are already looking at the impacts of hydrogen blending on gas quality on existing gas infrastructure, and (industrial and household) end users. In addition, the impact assessment investigates how to ensure within an integrated market the quality of pure hydrogen for industrial needs.</p>		<p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD) and</p> <p>Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a> 2021/0424 (COD).</p> <p>See especially impact assessment accompanying the Proposal for a Directive of the European Parliament and of the Council on common rules for the internal markets in renewable and natural gases and in hydrogen (recast) and the proposal for a Regulation of the European Parliament and of the Council on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">SWD(2021)455</a>.</p>	
17)	<p>37. Underlines the necessity of regulating hydrogen infrastructure, in particular regarding its operation and connection to the energy network, and the need to uphold unbundling as a guiding principle for the design of hydrogen markets while taking into account that the hydrogen market still needs to be developed;</p>	<p>Currently, there are no EU rules on the ownership, operation, use and financing of dedicated hydrogen grids. The Commission will develop proposals in this regard under the Hydrogen and Gas Markets Decarbonisation Package. Experience with methane networks has shown that smart regulation is important to create an open and competitive internal energy market, and that the principles of third party</p>		<p>Commission proposals:</p> <p>Proposal for a Directive on common rules for the internal markets in renewable and natural gases and in hydrogen, <a href="#">COM(2021) 803</a> final 2021/0425 (COD) and</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	stresses that unbundling plays a key role in ensuring that innovative new products are put on the energy market in the most cost-efficient manner; notes that any derogation from this regulatory principle in the medium term would come at an unnecessarily high cost to end consumers; calls on the Commission and the Member States to establish clear guidelines on the ownership of new and repurposed pipelines in order to provide planning security;	access and neutrality of network operators have been instrumental in the integration of European energy markets. The associated Impact Assessment and stakeholder engagement ensures that new regulation is commensurate with the needs of a developing supply chain.	C C	Proposal for a Regulation on the internal markets for renewable and natural gases and for hydrogen (recast), <a href="#">COM(2021)804</a> , 2021/0424 (COD).	C C
18)	41. Notes that there are obstacles in some of the current regulatory frameworks to the use of hydrogen; encourages the Commission and the Member States to adapt those regulatory frameworks in order to stimulate hydrogen demand and to eliminate disincentives such as legal uncertainties;	No specific reply is provided to this particular point.	C C	Not mentioned.	C C
19)	42. Urges the Commission to promote lead markets for renewable hydrogen technologies and their use for climate-neutral production – especially in the steel, cement and chemical industries – as part of the update and implementation of the New Industrial Strategy for Europe;  calls on the Commission to assess the option of recognising steel produced with renewable hydrogen as a positive contribution to meeting fleet-wide CO <sub>2</sub> emission reduction targets;  further urges the Commission to soon come forward with an EU strategy for clean steel, which should include an appropriate focus on the use of renewable hydrogen;	The proposal for the revision of the Renewable Energy Directive (COM(2021) 557 final) puts forward an EU-wide methodology to claim or label the amount of renewable energy, including renewable hydrogen used in the production of industrial products (Article 22a). As part of the update of the New Industrial Strategy, a document called "Towards competitive and clean European steel" (SWD(2021) 353 final) has been published with a comprehensive overview of all the instruments that will help the European steel industry to remain competitive.  Meanwhile, the Clean Steel Joint Undertaking to be soon adopted and funded under Horizon Europe is developing joint actions with the Clean Hydrogen Joint Undertaking (also funded through Horizon Europe) for innovation in steel production using hydrogen.	C C	No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.  <a href="#">The Joint Undertaking under Horizon Europe is awaiting for final decision 2021/0048(NLE)</a> .	C C
20)	45. Calls on the Commission to increase research and investment within the framework of the	No specific reply is provided to this particular point.	C C		C C

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Sustainable and Smart Mobility Strategy and to assess whether the Renewable Energy Directive needs to be revised in order to ensure a level playing field for all renewable energy solutions in transport;			Not mentioned.	
21)	46. Stresses the importance of research, development and innovation along the whole value chain and of carrying out demonstration projects on an industrial scale, including pilot projects, and of their market uptake, in making renewable hydrogen competitive and affordable and in completing the integration of the energy system, while ensuring geographical balance with a special focus on carbon-intensive regions; calls on the Commission to stimulate research and innovation efforts relating to the implementation of large-scale high-impact projects in order to secure technology transfer throughout the hydrogen value chain; welcomes in this regard the launch of mobility laboratories in EU cities to promote sustainable public transport experiments based on the use of alternative fuels and encourages the inclusion of hydrogen as one of the fuels to be used to carry out these experiments;	No specific reply is provided to this particular point.		Not mentioned.	
22)	49. Calls on the Commission to develop a coordinated renewable energy and hydrogen investment strategy aligned with national research and innovation strategies, taking into account the different starting points of the Member States;	The Clean Energy Industrial Forum, relaunched under the Offshore Energy Strategy (COM(2020) 741 final), and the Clean Energy Competitiveness report (COM(2020) 953 final) have already developed a set of key performance indicators to track the performance of European industry within the renewables ecosystem. The European Clean Hydrogen Alliance, through its open membership, is ensuring the participation of SMEs as part of the creation of the European hydrogen ecosystem. The ratio of SMEs in the stakeholders under new Clean Hydrogen Joint Undertaking reaches		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">The Clean Energy Industrial Forum</a> , relaunched under the Offshore Energy Strategy and the <a href="#">Clean Energy Competitiveness report</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		around a third of participants, and allows SMEs to have a say in R&I in hydrogen.			
23)	<p>50. Calls on the Commission to put an emphasis on the significant role of SMEs in that strategy; stresses the need to include regulatory safeguards and to ensure access to finance and innovation assets, such as incubators and joint research projects, so that start-ups and SMEs can take root in the hydrogen industry;</p> <p>calls on the Commission to ensure equal market access and facilitation of market entry for such undertakings and to promote their participation, inter alia by proactively appointing them for round tables and including them in public consultation processes;</p> <p>calls on the Commission to estimate the needs of SMEs and the costs of decarbonising their production processes and energy supply through hydrogen, and to monitor their progress using a suitable set of key performance indicators in order to contribute to evidence-based policymaking;</p>	<p>Although the follow-up does not mention point 50, the Commission however states (in reply to point 49) that:</p> <p>The European Clean Hydrogen Alliance, through its open membership, is ensuring the participation of SMEs as part of the creation of the European hydrogen ecosystem. The ratio of SMEs in the stakeholders under new Clean Hydrogen Joint Undertaking reaches around a third of participants, and allows SMEs to have a say in R&amp;I in hydrogen.</p>		<p>The impact on SMEs is analysed in the impact assessment accompanying the proposal for a Directive of the European Parliament and of the Council on common rules for the internal markets in renewable and natural gases and in hydrogen (recast) and the proposal for a Regulation of the European Parliament and of the Council on the internal markets for renewable and natural gases and for hydrogen (recast) <a href="#">SWD(2021)455</a>.</p>	
24)	<p>52. Welcomes the European Clean Hydrogen Alliance (the Alliance), other renewable hydrogen initiatives and associations, the European Hydrogen Forum, and the important projects of common European interest (IPCEIs), as important means to enhance investment in renewable hydrogen; encourages the Member States, the Commission and economic operators to rapidly unlock the potential of IPCEIs in order to support projects of relevance for the EU hydrogen economy; calls for a pragmatic approach to facilitate the approval of these projects; also</p>	<p>No specific reply is provided to this particular point (unlock the potential of IPCEIs).</p>		<p>Not mentioned.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	welcomes the Commission’s plan to revise the State aid guidelines for environmental protection and energy to facilitate the production of hydrogen and its rapid market uptake;				
25)	53. Encourages the Alliance to come up, in cooperation with the Fuel Cells and Hydrogen Joint Undertaking (FCH JU), with an investment agenda and a project pipeline that can ensure the implementation of the hydrogen goals as soon as possible; underlines that the Alliance should focus on the development of renewable hydrogen and commit clearly to achieving the EU 2030 and 2050 climate targets; stresses that the Alliance should also ensure a balanced representation of all relevant EU stakeholders including renewable energy producers, scientists, independent experts, think tanks, environmental NGOs and social partners; stresses that the Alliance’s decision-making procedure should be improved with regard to transparency and inclusiveness, and that this process should be led by the Commission and supported by an independent body of scientific experts, and aim to define the transition pathways and provide guidance for hydrogen needs; notes the current delays in implementing the work of the Alliance and urges the Commission to speed up the process;	<p>The establishment of the European Clean Hydrogen Alliance and the on-going intensive work on Important Projects of Common European Interest (IPCEI) on hydrogen demonstrate that the EU efforts are supporting the overall objective of decarbonising the European industry. Both the New EU industrial strategy and the accompanying Staff Working Document “Towards competitive and clean European steel”<sup>26</sup> recognise the interest to support the sector to ensure breakthrough innovation. In addition, the proposal for introducing a sub-target for Renewable fuels of non-biological origins (RFNBOs), together with an overall indicative target for renewables uptake in the industrial sector, within the revision of the Renewable Energy Directive (COM(2021) 557 final) will ensure that demand for renewable hydrogen is created in those lead markets where it is most needed to replace fossil-based hydrogen (Article 22a).</p> <p>The Commission has put forward the establishment of a Clean Hydrogen Partnership with a budget of EUR 1 billion for the period 2021-2027, building upon the expertise of the FCH JU. This new Joint Undertaking has put priority on production, storage, transport and distribution of clean hydrogen and therefore set up synergies with other partnerships covering potential sectors for utilisation for hydrogen: industry (Process4Planet, Clean Steel), transport (Go4Zero, Clean Aviation, Clean Rail, maritime) and building environment (Build4People). Piling the EU contribution (1 billion), the corresponding amount from private partners and</p>		Clean Hydrogen Partnership, FCH <a href="#">website</a> , EU to set up new European Partnerships and invest nearly €10 billion for the green and digital transition, <a href="#">Press release 23/02/2021</a> . European Green Hydrogen Alliance, Commission <a href="#">website</a> .	

<sup>26</sup> SWD(2021) 353 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		the potential addition from the end-use partnerships, the overall amount reaches close to EUR 2,5 billion for R&I in hydrogen in public private partnerships.			
26)	54. Welcomes the renewal of the FCH JU under Horizon Europe; stresses the importance of its work and asks the Commission to use it as a competence centre for hydrogen and provide it with sufficient financial resources to play its role in delivering the European Green Deal objectives; highlights that it should promote research and development activities across the value chain in order to ensure cost-efficient use of funding for hydrogen and better coordination; underlines that it should carry out synergies with the joint undertakings in the transport sector in order to promote adequate integration between hydrogen technology and transport infrastructure and services; calls on the Commission to make use of the experience gained through the FCH JU and to incentivise further research into fuel cell and hydrogen energy technologies;	The Commission has put forward the establishment of a Clean Hydrogen Partnership with a budget of EUR 1 billion for the period 2021-2027, building upon the expertise of the FCH JU. This new Joint Undertaking has put priority on production, storage, transport and distribution of clean hydrogen and therefore set up synergies with other partnerships covering potential sectors for utilisation for hydrogen: industry (Process4Planet, Clean Steel), transport (Go4Zero, Clean Aviation, Clean Rail, maritime) and building environment (Build4People). Piling the EU contribution (1 billion), the corresponding amount from private partners and the potential addition from the end-use partnerships, the overall amount reaches close to EUR 2,5 billion for R&I in hydrogen in public private partnerships.		No further / specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Clean Hydrogen Partnership</a> ).	
27)	55. Requests the Commission to assess the potential inclusion of hydrogen deployment in the general objectives of the Partnership for Research and Innovation in the Mediterranean Area (PRIMA) in line with the priorities of Horizon Europe, in order to strengthen research and innovation capacities and to develop knowledge and common innovative solutions across the Mediterranean region;	No specific reply is provided to this particular point.		Not mentioned.	
28)	57. Calls, therefore, on the Commission and the Member States to engage in an open and constructive dialogue in order to establish	The Commission has established a number of bilateral and regional dialogues with North Africa and the Middle East on hydrogen and hydrogen certification under the Strategic		Action is ongoing.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>mutually beneficial cooperation and partnerships with neighbouring regions, such as North Africa, the Middle East and the Eastern Partnership countries, safeguarding the EU's strategic interests and the energy security of both the EU and its partners; underlines that this cooperation would be beneficial for creating clean and new technology markets through the transfer of knowledge, enhancing the transition to renewable energy and achieving the UN Sustainable Development Goals; stresses the need to avoid the relocation of environmental impacts, including greenhouse gas emissions, and any delay in the decarbonisation of the power grid in non-EU countries;</p>	<p>Partnership for the Implementation of the Paris Agreement (SPIPA) project, and is developing a new strategy for the "Eastern Partnership Policy beyond 2020" which will include hydrogen. At a multilateral level, the Commission participates in two taskforces under the International Partnership on Hydrogen and Fuel Cells in the Economy (IPHE) to develop a mutually agreed methodology for determining the CO<sub>2</sub> equivalent and other pollutants emissions associated with the production of hydrogen and a task force on trade rules. Under the Clean Energy Ministerial, the Commission has initiated a new Global Hydrogen Ports Coalition to enable cross-border cooperation on international trade of hydrogen. Furthermore, Mission Innovation launched a new mission on clean hydrogen at international level, which the Commission is co-leading with the objective to boost the development of hydrogen at world level, including developing widely the concept of hydrogen valleys.</p>		<p><a href="#">Eastern Partnership Policy beyond 2020.</a></p>	

4.1.20.8. ITRE Resolution 8: EP resolution of 23 November 2021 on a European strategy for critical raw materials

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
A European strategy for critical raw materials	23/11/2021 <a href="#">T9-0468/2021</a> <a href="#">2021/2011(INI)</a> ITRE	N.A. <sup>27</sup>					
1)	5. Calls on the Commission to carefully review the criticality assessment methodology before 2023, ahead of the publication of the next list of CRMs, in order to assess whether the list needs broadening, taking into account the development of the international situation related to CRMs, scenarios for future demand for CRMs and other raw materials, and social and ecological criteria based on the UN Guiding Principles on business and human rights and the SDGs, to get a broader picture of extraction conditions across the globe; further calls on the Commission to duly take into account all environmental externalities related to extraction and processing in its supply risk analysis; also calls for a comprehensive debate involving all stakeholders;						
2)	6. Calls on the Commission to pay attention not only to CRMs but also to the potential criticality of other raw materials needed for strong supply chains, the continuity of production and the twin transition, and their availability from EU sources, also taking into account natural mineral scarcity; [...]						

<sup>27</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	7. Asks the Commission to take a holistic approach when assessing the implications of several low-carbon, renewable and digital technologies competing for the same CRMs and to examine critical supply chains, also with regard to the needs of individual sectors; stresses the importance of ensuring that the energy-efficiency-first principle, zero emissions and resource-efficient solutions prevail;				
4)	9. Calls for investment in the training and reskilling of workers, including through the Just Transition Mechanism, as mining skills can be transferred to metal and mineral exploitation, processing and recycling, preferably in the same regions; calls on the Commission to ensure that respective funding also addresses the social, employment and environmental impacts of the transition in former mining areas;				
5)	10. Calls on the Commission and the Member States to create, as soon as possible, an Important Project of Common European Interest (IPCEI) on CRMs to strategically and sustainably plan for our demand for the twin transition, covering requirements, sources of supply and (social, environmental and financial) costs; [...]				
6)	11. Calls on the Commission to promote research and development on and skills and competencies relating to CRMs for small and medium-sized enterprises (SMEs) as a growth strategy for EU high-tech technologies such as lithium-ion batteries, fuel cells, wind turbines, electric traction motors, photovoltaic technology, robotics, drones, 3D printing and a broad range of digital technologies and medical devices;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	12. Calls on the Commission to conduct a comprehensive, scientific and evidence-based impact assessment to determine the minimum volumes of CRMs of strategic importance required for the twin transition;				
8)	15. Calls on the Commission to propose science-based sustainability criteria for defining what constitutes a sustainable investment in the mining sector under the Taxonomy Regulation; emphasises the need to enable the EU mining industry to contribute to the twin green and digital transitions;				
9)	16. [...] calls on the Commission to introduce support schemes encouraging innovation in new mining techniques and new small-scale mining projects; calls for the development of new and innovative technologies in the field of sustainable CRM mining in the EU;				
10)	17. Calls on the Commission, the European Investment Bank and the other EU institutions, in cooperation with international partners, to provide technical and strategic financial support for long-term strategic CRM investment projects, including to find new tools for sharing risks in the mining sector, and to promote and support investments in research on sustainable CRM sourcing and processing and on refining sites, to make them compliant with EU rules and high social and environmental standards, thereby ensuring a level playing field;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
11)	21. Regrets that the creation of strategic stockpiling is not yet part of the action plan and calls on the Commission to also focus on securing supplies of CRMs in the EU by encouraging Member States to carry out strategic stockpiling as part of a coordinated approach, where analysis deems it appropriate; [...]				
12)	22. Believes that awareness of possible scarcity problems with CRMs is too low and should be improved; calls on the Commission to expand ERMA in order to increase cooperation between industrial actors throughout the value chain, Member States, regions and non-EU countries, trade unions, civil society, research and technology organisations, investors and non-governmental organisations within the sectors of the EU economy most affected by bottlenecks in CRM supply, either through the framework offered by ERMA or by forming sector-specific industry and stakeholder alliances; [...]				
13)	23. Believes that more coordination and joint efforts are necessary to develop resilient supply chains to meet the demand for current and future CRMs for the EU's industrial needs, in order to avoid supply chain disruptions, reduce dependency and maintain high social and environmental standards; calls on the Commission to ensure that, in the EU, the assessment of imports and exports and global supply of and demand for CRMs, the coordination of stockpiling and the monitoring of CRM sourcing are implemented in a coherent and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	cohesive way, for example by establishing a CRM taskforce;				
14)	24. Asks the Commission to diversify supply chains for both primary and secondary sources and calls for better transparency regarding information on supply chains;				
15)	26. Reiterates the circular economy potential of optimised use of products and services; calls on the Commission and the Member States to support new sustainable and circular business models in the new sustainable products initiative, including product-as-a-service, provided they save resources, reduce environmental impacts and guarantee consumer protection; calls on the Commission and the Member States to facilitate these approaches by introducing regulatory frameworks;				
16)	27. Considers it important to support a circular economy approach throughout the value chain, from design to material recovery, of the key technologies for the energy, digital and mobility transitions, such as wind plants, solar plants, battery production, electric mobility and smart grids; calls on the Commission to make the transition to a circular economy a priority, reducing the EU's import dependence, improving resource efficiency, optimising resource consumption and keeping and reusing valuable raw materials within the EU; recalls its demand in its resolution on the New Circular Economy Action Plan to consider proposing, based on a comprehensive impact assessment, clear and				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	easily understandable harmonised labelling on durability, which could take the form of an index, and reparability, which could take the form of a uniform repair score;				
17)	28. Calls on the Commission to strengthen cooperation with non-EU countries on the sustainable sourcing of CRMs, particularly like-minded partners, as well as in its engagement at the World Trade Organization (WTO);				
18)	29. Underlines the need to build well-functioning secondary CRM markets in order to guarantee constant secondary CRM flows to strengthen the EU's industrial ecosystems and to keep jobs in the manufacturing sector; calls, in this regard, on the Commission to examine the balance of imports and exports of secondary CRMs in the EU and to rapidly establish a market observatory for key secondary materials, including CRMs;				
19)	30. Welcomes the proposal to map the potential supply of secondary CRMs from EU stocks, waste and the processing of by-products; encourages the Commission to make this mapping exercise a priority and carry it out earlier than envisaged; encourages the Commission, furthermore, to extend it to current available technologies used to decrease demand for CRMs and increase the reuse of CRMs in the supply chain; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
20)	31. Calls on the Commission and the Member States to unlock the potential of secondary processing projects through specific incentives, including expedited licensing, and to provide incentives for recovering CRMs to ensure reliable, secure and sustainable access to them;				
21)	34. [...] calls on the Commission to provide incentives for the recycling and recovery of CRMs from mining, processing and commercial waste streams to ensure reliable, secure and sustainable access to them;				
22)	35. Encourages the Commission to propose minimum recycled CRM content targets and dedicated CRM recycling targets accompanied by a robust monitoring framework, drawing inspiration from the proposal for a regulation concerning batteries and waste batteries and based on a comprehensive, scientific and evidence-based impact assessment assessing the minimum volumes of CRMs required for products that will facilitate the twin transition, the percentage of this demand that could be covered via recycling in line with existing assessments, and the availability of the necessary technology; notes that any reduction targets for primary raw materials should not lead to the overall raw material yield dipping below these minimum volumes;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
23)	37. Underlines that stronger controls for EU exports of key CRM waste products are needed and that a level playing field for recycling operators who meet the necessary standards for safe and efficient recovery needs to be established; calls on the Commission, when it revises the Waste Shipment Regulation, to prevent the illegal export of waste products containing CRMs; calls for the setting of requirements that only allow waste products containing CRMs to be exported with a guarantee that they will be processed in the destination country under conditions equivalent to EU social and environmental standards;				
24)	38. Calls on the Commission and the Member States to enhance efforts to properly collect and recycle end-of-life-products with CRMs instead of stockpiling them in households or landfills or incinerating them;				
25)	39. Asks the Commission to propose product design measures, tailored to different product categories, for the easy identification and removal of parts or components containing CRMs, especially with regard to post-consumer waste, in addition to eco-design requirements to significantly improve the longevity, durability, reparability, modularity, reusability and recyclability of end-of-life products manufactured or sold in the EU; stresses that these measures should create competitive advantages for EU businesses, should not place a disproportionate financial burden on them, and should trigger innovation;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
26)	40. Believes that substitution is helpful where a CRM could be substituted by an abundant material, but has little benefit if the substitute itself is not sustainable, leaves the finite nature of resources unaddressed, is critical or might become so because of the substitution; recognises the importance of maintaining the quality performance of the products and their economic viability; calls on the Commission to encourage and increase research on and innovation of substitutes for CRMs for different uses;				
27)	47. Calls on the Commission to request that industrial side streams containing CRMs be effectively used; underlines that especially in the mining industry, there is a great deal of potential for the recovery and separation of rare earths;				
28)	49. Calls on the Commission and the Member States to make sure that sustainable CRM sourcing is based on an approach diligently balancing both the EU's increased need for sustainably sourced CRMs and the need to protect nature and biodiversity;				
29)	51. Expects the Commission to provide further details on the operationalisation of CRM projects as an alternative business model and a source of regional employment in coal mining and other regions in transition;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
30)	52. Urges the Commission to foster relations with all existing CRM supplier countries of the EU, to systematically and strategically build new CRM partnerships, in cooperation with our allies, where possible, taking into account the sovereignty of non-EU countries over their resources, so as to ensure that CRM becomes a source of welfare for developing countries, to promote the participation of SMEs and make this endeavour a horizontal task of its external and internal policies, and to present the results in 2021; [...]				
31)	54. Welcomes the EU's commitment to responsible and sustainable sourcing and encourages the Commission to take the standard for responsible mining developed by the Initiative for Responsible Mining Assurance as a starting point, taking into consideration the needs of SMEs; stresses the need to underpin this commitment with concrete technical support, knowledge transfer, building of skills, institutions and legal frameworks, institution-building and political dialogue with partner countries; [...]				
32)	58. Calls on the Commission to strengthen standardisation activities with regard to CRM-related high-quality components in relevant international fora, since this is important for EU companies, in particular SMEs;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
33)	60. Asks the Commission to propose effective EU-wide collection scheme rules to increase collection rates of waste products containing CRMs; calls on the Commission to assess, among other options for extended producer responsibility, introducing deposit refund schemes in EU waste legislation, in particular in the WEEE Directive, taking into account the characteristics of different products, while ensuring the schemes are compatible across Member States, in order to incentivise consumers to bring their end-of-life electrical and electronic equipment – particularly small items – to dedicated collection and recycling facilities, building on positive experience from deposit refund schemes for glass and plastics in many Member States;				
34)	62. Calls on the Commission to prioritise CRM extraction from existing domestic mines – i.e. from mine tailings, waste rock, landfills and through more effective urban mining – in preference to new mining, if sustainable, i.e. if the environmental impacts, including from energy and chemical use, are smaller; stresses that this extraction and subsequent restoration must be carried out using the best available techniques, guaranteeing best ecological performance and economic viability;				
35)	63. Calls on the Commission to pay particular attention to the post-extraction phase of mining projects and the end-of-life phase of CRMs, in accordance with the waste hierarchy established				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	in the Waste Framework Directive, and especially where CRMs are also hazardous substances;				
36)	64. Believes that mining permits and concessions should include requirements for the safe, efficient and sustainable recovery and processing of all economically and technically recoverable CRMs; asks the Commission to urgently implement Parliament's demands in its resolution on implementation of the Mining Waste Directive; reiterates that the questionnaire currently used as a reporting system under Article 18 of the directive is not fit for purpose, and asks the Commission to create a harmonised, digitised and transparent EU registration system that is based on harmonised definitions of and treatment criteria for mining waste and that includes all the relevant environmental impact data, including the content concentrations of waste deposits;				
37)	65. Calls on the Commission to tighten enforcement and ensure full implementation of current EU environmental legislation and to propose amendments to legislation where necessary;				
38)	67. Encourages the Commission to review the Environmental Impact Assessment Directive to ensure that an environmental impact assessment is carried out for mining projects of all sizes, and that these assessments are performed by an independent third party;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
39)	70. Recalls the Commission's commitment to ensure marine minerals in the international seabed cannot be extracted or used before the effects of deep sea mining on the marine environment, biodiversity and human activities have been sufficiently researched, the risks are understood, and it is proven that the technologies and operational practices do no serious harm to the environment, in line with the precautionary principle, and calls for Parliament and the Council to make the same commitment; encourages the Commission to translate this commitment into concrete actions to protect these highly vulnerable ecosystems;				
40)	71. Calls on the Commission to consider legislative options in line with the Espoo and Aarhus Conventions to ensure that local authorities adopt and enforce the right of local communities to effective and inclusive participation in permit procedures for new mining prospecting and extraction projects, throughout all stages of mining projects and when permit requests for the extension of existing mines are submitted, and to ensure that local communities have the right of recourse to effective redress mechanisms governed by independent courts and oversight bodies free from any conflict of interest;				
41)	73. Stresses that EU industry faces fierce international competition for access to raw materials and is vulnerable to export restriction measures by non-EU countries; acknowledges that a global increase in demand is likely to lead				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	to an increase in prices and encourages the Commission to present an analysis of this point;				
42)	74. Calls on the Commission to diversify the supply sources of CRMs as much as possible, increase resource efficiency and reduce current reliance on a few non-EU countries by supporting investment which engages EU and global partners and SMEs as a part of a long-term international sourcing strategy; stresses that this goal should be achieved by strengthening existing partnerships and trade agreements and building new strategic agreements or EU joint ventures with resource-rich and other like-minded sourcing countries, in accordance with clearly defined priorities; welcomes in that sense the ongoing dialogue with Canada, Australia and Chile, aiming to strengthen trade relations in the area of CRMs; calls on the Commission to further reinforce cooperation during the next EU-US-Japan Conference on Critical Materials; emphasises the need for closer cooperation with key international suppliers in the Western Balkans, eastern Europe, Latin America and Africa, as well as with China and other developing countries in the global south;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
43)	75. Underlines that future EU free trade and partnership agreements can provide not only greater supply security but also a reliable political and economic framework, and that they should include specific provisions on CRMs, as announced by the Commission in its Trade for All Strategy, in order to promote cooperation, ensure compliance with international commitments, eliminate and avoid export restrictions and comply with the current rules for pre- and post-establishment of foreign direct investments; calls on the Commission to further enhance the monitoring and enforcement of free trade agreements, including trade and sustainable development chapters, to ensure that commitments and provisions on the responsible sourcing of CRMs are defined and are met by trading partners and that the possible concerns of communities affected by extractive activities are considered; underlines that this should be among the priority tasks of the Chief Trade Enforcement Officer;				
44)	76. Calls on the Commission to launch a discussion at the WTO on the constraints placed on the scaling up of a circular economy by local content requirement measures, to build a stronger partnership with different world regions, in particular Africa, and to ensure that free trade agreements reflect the enhanced objectives of the circular economy;				
45)	78. Underlines that a fully functioning rules-based multilateral trading system is key to ensuring open and sustainable trade flows of CRMs; expresses concern at the use of export				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>restrictions on CRMs by some WTO members, including China, and urges all members to refrain from pursuing such policies; calls on the Commission, therefore, to use international fora to curtail such distortive export restrictions on CRMs; renews its call on the Commission, in this regard, to redouble its efforts to achieve an ambitious reform of the WTO in order to fight distortions of international trade and unfair trade practices, provide a stable and predictable international trading environment and guarantee fair and effective competition worldwide;</p>				

#### 4.1.20.9. ITRE Resolution 9: EP resolution of 15 December 2021 on implementation of the Energy Performance of Buildings Directive

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation of the Energy Performance of Buildings Directive</b>	15/12/2021 <a href="#">T9-0503/2021</a> <a href="#">2021/2077(INI)</a> ITRE	N.A. <sup>28</sup>					
1)	7. Calls on the Commission to closely monitor whether the objectives of the LTRSs are aligned with the Renovation Wave, the heating and cooling comprehensive assessments required by the Energy Efficiency Directive and Renewable Energy Directive <sup>29</sup> , and the new climate and energy targets for each Member State according to their building stock;						
2)	8. Calls on the Member States to foster renovation that favours the energy system integration of renewables in buildings, such as the installation of EV charging infrastructure, thermal storage and connection to smart grids; encourages the Member States and the Commission to promote the sharing of best practices;						

<sup>28</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

<sup>29</sup> OJL 328, 21.12.2018, p. 82.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	15. Notes that the current definition of nearly zero-energy buildings in the EPBD is of a qualitative nature and leaves a wide margin of discretion to the Member States in setting standards accordingly; calls on the Commission to introduce a 'deep renovation' standard to achieve energy savings and GHG emission reductions as well as a harmonised definition of nearly zero-energy buildings;				
4)	27. [...] asks the Commission to investigate whether a revision of the cost-optimal level, as defined in Article 2(14), is necessary as part of the EPBD review;				
5)	31. Calls on the Member States to ensure the proper implementation of the directive in all its aspects, with particular regard to the social housing stock; calls on the Commission to continue monitoring this implementation and to take action, where necessary, in the event of non-compliance;				
6)	32. Calls on the Commission to strengthen the current provisions of the EPBD to ensure that Member States' LTRSs are consistent with the EU's climate neutrality goals and energy targets; highlights that building renovations will need to be carried out at a rate of 3 % per year for deep and staged deep retrofits in order for the EU to achieve climate neutrality by 2050;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	33. Calls on the Commission to investigate how to formulate a standard template that Member States could use to ensure they address all of the requirements of Article 2a of the EPBD and to harmonise the objectives and requirements to ensure better comparability of progress and results, and an assessment of national recovery and resilience plans, or any other EU funding, for which a complete LTRS is a condition; encourages the Commission to create an ad hoc network of experts to support Member States in the design, monitoring and implementation processes of their LTRSs;				
8)	34. Calls on the Commission to consider how to facilitate further the development of one-stop shops that provide advisory services to citizens and other stakeholders, including through more stringent measures in the EPBD; is convinced that additional guidance and support measures, notably technical assistance, information campaigns, training and project financing, can lead to a higher renovation rate;				
9)	44. Acknowledges the different construction and renovation dynamics for different types of buildings (public and private, non-residential and residential) in the Member States; calls on the Commission to provide a framework to introduce minimum energy performance standards, accounting for different starting points and building stocks across the Member States, notably buildings of special architectural or				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	historical merit, to accelerate renovation rates and provide visibility to the entire value chain about expected improvements and to stimulate innovation, while ensuring affordability, particularly for those on low incomes and in vulnerable situations;				
10)	46. Calls on the Commission to link the LTRs with the relevant provisions of the Energy Efficiency Directive and the Renewable Energy Directive on efficient district heating and cooling and on the promotion of renewable energy in the building sector, such as solar, thermal and geothermal energy, as well as a greater role for energy storage and self-consumption in response to grid and micro-grid signals, while recognising that fossil fuels, especially natural gas, are currently employed in heating systems for				
11)	47. Calls on the Member States to fully implement the provisions of Articles 14 and 15(4) of the EPBD, providing citizens and professionals with clear details on how the building, automation and control system can deliver the mandatory capabilities as soon as possible, in order to ensure that all of the preparatory action is taken without delay and before the 2025 deadline; calls on the Commission and the Member States to consider using tools or checklists developed by experts and professionals when transposing those provisions;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
12)	51. Calls on the Commission and the Member States to ensure that charging points in buildings are ready for smart charging and to align the requirements with the revised Renewable Energy Directive; [...]				
13)	53. Emphasises the important role that the renovation of existing buildings and design of new buildings can play in encouraging the uptake of EVs such as cars, vans, bikes and motorcycles by providing both adequate parking spaces and charging infrastructure, thereby contributing to the overall decarbonisation of the transport sector; notes that with such an intervention buildings can be made healthier, greener and interconnected within a neighbourhood district, as well as more resilient to the negative impacts of climate change; calls on the Commission to consider extending the scope of mobility of the EPBD by introducing minimum requirements, where feasible, in different types of buildings for the parking infrastructure of bicycles and recharging points for electric bicycles;				
14)	54. [...] calls on the Commission to encourage the inclusion of such requirements in the national policy frameworks;				
15)	55. [...] calls on the Commission, in cooperation with the Member States, to carry out a cost analysis to examine possible ways to encourage developers to deploy adequate infrastructure for EV users;				

#### 4.1.21. JURI

Between July 2019 and December 2021, the **Committee on Legal Affairs (JURI)** was responsible for seven 'ordinary' own-initiative reports (INI) and five legislative own-initiatives reports (INL) leading to the adoption of twelve Parliament's resolutions ('JURI resolution'). The table below provides on a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent six written replies to the Parliament’s seven JURI resolutions. In four cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other two replies, sent by the Commission within the 3-month period, were in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to one JURI resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution. In total, the Commission submitted three specific replies and one mixed reply. The Commission has not replied with written follow-up documents to 13 of Parliament's 101 requests. At the cut-off date of this study, the Commission had not yet replied to 23 of Parliament’s 101 requests.

### Analysis of the Commission actions

The Commission proposed/promised 17 genuine actions. In 41 cases, no further specific actions were proposed/promised to be taken by the Commission. In ten cases, due to the lack of reply to the Parliament's request, no action was mentioned.

The Commission proposed/promised 15 genuine actions. In 38 cases, no further specific actions were proposed/promised to be taken by the Commission and in nine cases it remained unclear if an action was carried out. In four cases, due to the lack of reply to the Parliament's request, no action was mentioned.

For all 15 actions proposed/promised by the Commission, the implementation of the action is still pending and needs to be followed at a later stage.

## 4.1.21.1. JURI Resolution 1: EP resolution of 20 October 2020 on intellectual property rights for the development of artificial intelligence technologies

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
Intellectual property rights for the development of artificial intelligence technologies	20/10/2020 <a href="#">T9-2020/0277</a> <a href="#">2020/2015(INI)</a> JURI	On 10 December 2020, the Parliament received "Commission <a href="#">communication</a> on the action taken on positions and resolutions adopted by the European Parliament – October II 2020 part-session" informing that the Commission will not be responding formally to the requests addressed in the resolution as Executive Vice-President Margrethe Vestager expressed the Commission's position in plenary. The <a href="#">plenary debate</a> took place on 19 October 2020.			
1)	4. Calls on the Commission to take into account the seven key requirements identified in the Guidelines of the High-Level Expert Group, as welcomed by it in its communication of 8 April 2019 <sup>7</sup> , and properly implement them in all legislation dealing with AI;				
2)	9. [...] calls on the Commission and the Member States to offer support to start-ups and SMEs via the Single Market Programme and Digital Innovation Hubs in protecting their products;				
3)	11. [...] calls on the Commission to support the establishment of industry standards and encourage formal standardisation;				
4)	12. [...] calls on the Commission to assess possibilities for products to be adequately tested, for example in a modular way, without creating risks for IPR holders or trade secrets due to extensive disclosure of easily replicated products;				

<sup>7</sup> 'Building trust in human-centric artificial intelligence' (COM(2019)0168).

5)	15. [...] calls on the Commission to support a horizontal, evidence-based and technologically neutral approach to common, uniform copyright provisions applicable to AI-generated works in the Union, if it is considered that such works could be eligible for copyright protection;				
6)	17. [...] calls on the Commission to reflect on the use of public domain data for such purposes;				

## 4.1.21.2. JURI Resolution 2: EP resolution of 17 December 2020 on sustainable corporate governance

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Sustainable corporate governance</b>	17/12/2020 <a href="#">T9-0372/2020</a> <a href="#">2020/2137(INI)</a> <b>JURI</b>	<a href="#">SP(2021)190</a>	Final reply (SP) received 18 June 2021	Specific reply			
1)	1. Calls on the Commission, when proposing new action in the field of company law and corporate governance, to strike the proper balance between, on the one hand, the need to ease short-term pressure on corporate directors and promoting the integration of sustainability concerns into corporate decision-making, and, on the other hand, the need for sufficient flexibility, while ensuring harmonisation;	In its impact assessment prepared for the sustainable corporate governance initiative, the Commission will assess policy options that could ease short-term pressure on directors and ensure that sustainability aspects are properly integrated into corporate decision-making, including the option of harmonisation by an EU directive. The Commission will also consider how to ensure sufficient flexibility, as requested by the European Parliament and proportionality to avoid unnecessary red tape.				The works on the proposal for <a href="#">sustainable corporate governance initiative</a> are ongoing, Commission adoption was planned for Q4 2021. The <a href="#">inception impact assessment</a> and <a href="#">Public consultation</a> were conducted. However the Regulatory Scrutiny Board gave for two times a red light to the impact assessment accompanying the proposal, and a new text should be proposed in 2022.	
2)	2. [...] calls on the Commission to take into account the recommendations included in this resolution;	Although the follow-up does not mention point 2, the Commission however states that  A large part of the points raised in the resolution is covered by the on-going Commission's work preparing an EU initiative on sustainable corporate governance and the on-going preparation of a proposal to revise the NFRD.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
3)	3. [...] invites the Commission to identify high-risk sectors of economic activity with a significant impact on sustainability matters that could justify the inclusion of small and medium-sized enterprises (SMEs) in those sectors within the scope of the NFRD; [...]	The impact assessment of the Commission prepared for the sustainable corporate governance initiative will assess various options as regards the scope of the initiative, including a scenario under which all limited liability companies are covered. In this context, due consideration will be given to limiting and alleviating the burden for SMEs; will assess the different possibilities in the light of the feedback received from public consultation and the data available. The Commission will also reflect, in line with the European				The works on the proposal for <a href="#">sustainable corporate governance initiative</a> are ongoing. Commission adoption was planned for Q4 2021. The <a href="#">inception impact assessment</a> and <a href="#">public consultation</a> were conducted. However the Regulatory Scrutiny Board gave for two times a red light to the impact assessment accompanying the proposal, and a new text should be proposed in 2022.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Parliament’s request, on the possibility to include large – listed and non-listed – companies, and only such non-micro SMEs, which are active in sectors of economic activity where the risk of having a significant impact on sustainability matters is high. The option of excluding microenterprises from all or the majority of the possible new obligations will also be explored. Furthermore, the Commission will assess ways to cover at least some non-EU companies operating in the EU market by the scope of the sustainable corporate governance initiative, in line with the suggestions of the European Parliament.</p> <p>With regard to the European Parliament’s suggestion that the Commission should identify all sectors of economic activity that have a significant impact on any sustainability matters, also involving external independent experts and keeping this assessment up-to-date, the costs and benefits of such a solution should carefully be assessed and compared to alternative options for including SMEs in the scope in a proportionate manner. The Commission will also consider the possibility of specific guidance and other supporting measures to SMEs if they should fall under the scope, as proposed by the European Parliament, or of sector-specific guidance, possibly reflecting on the European Parliament’s request to specifically target sectors that are often linked with certain illegal business activities.</p> <p>The Commission will carefully consider the call to enlarge the scope of the NFRD to cover both listed and non-listed large companies. With regard to non-EU companies, the Commission is assessing the option to include non-EU companies listed on EU regulated markets in the scope of the NFRD, to provide a level playing field as much as possible. The Commission will also carefully consider the European Parliament</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>suggestions on the enlargement of the scope of the NFRD in line with the proportionality principle as well as principles of effectiveness and efficiency. The Commission is analysing costs and impacts of the enlargement of the scope of the NFRD, namely impacts on and costs for SMEs. In this context, providing specific guidance to SMEs will be also considered. The Commission agrees on the need to draw on external independent expertise in the course of the development of non-financial reporting standards. One of the objectives of the NFRD revision is to improve access of financial market participants to reliable, comparable, standardised and relevant sustainability information, which will help them to meet the requirements of the Sustainable Finance Disclosure Regulation.</p>			
4)	<p>6. [...] invites the Commission to take the recommendations of the Task Force on Climate-related Financial Disclosures into account and promote the development of innovative accounting techniques that reflect the value of ecosystems; [...]</p>	<p>The Commission understands the importance of ensuring as much alignment as possible between the Taxonomy Regulation and the NFRD, and other interlinked initiatives, and is therefore assessing how to best achieve this.</p> <p>The Commission is considering the development of mandatory non-financial reporting standards that would specify the reporting requirements for all sustainability factors within the scope of the directive. The Commission recognises that the reporting obligations stemming from the NFRD, including possible European standards, should take into account existing international standards and frameworks, like the recommendations of the Task Force on Climate-related Financial Disclosures. Attention will also be paid to ensuring consistency with the Commission's legislative proposal on strengthening the application of the principle of equal pay for equal work or work of equal value between men and women, which is</p>		<p>On 21 April 2021, the Commission adopted a <a href="#">proposal for a Corporate Sustainability Reporting Directive (CSRD)</a>, which would amend the existing reporting requirements of the NFRD.</p> <p>The <a href="#">Commission's proposal for a Corporate Sustainability Reporting Directive (CSRD)</a> envisages the adoption of EU sustainability reporting standards. The draft standards would be developed by the European Financial Reporting Advisory Group (EFRAG).</p> <p>A <a href="#">proposal for a directive to strengthen the application of the principle of equal pay for equal work or work of equal value between men and women through pay transparency and enforcement mechanisms</a> was adopted on 4 March 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>planned to be adopted, in line with its Work Programme, in the first quarter of 2021, and with the social dimension of sustainability, notably in line with relevant principles of the European Pillar of Social Rights, including as regards investment in human capital and skills development.</p> <p>With regard to the European Parliament’s call to promote innovative accounting techniques that reflect the value of ecosystems, the Commission has funded a LIFE “Transparent” project that is supporting the development of standardized natural capital accounting and valuation principles for business. The methodology developed under the “Transparent” project will provide decision-makers with the information necessary to generate long-term value. The Skills Agenda for Europe, adopted on 1 July 2020, further commits the Commission to <i>study other ways of increasing transparency of companies’ expenditure on human capital, for example by presenting them more visibly in their accounts.</i></p>		<p>It is one of the key priorities in the EU Gender Equality Strategy 2020-2025. The Commission’s <a href="#">work programme for 2022</a> includes the file as a pending priority.</p> <p>The last report of Life <a href="#">Transparent</a> project covers some of the main activities, and trends under this project.</p>	
5)	15. [...] calls on the Commission to examine additional proposals to improve gender balance among senior managers and those holding influential positions in companies;	The Commission shares the European Parliament’s view that diversity and inclusiveness in companies lead to better business performance. In addition to the proposal for the directive on gender balance in corporate boards of listed companies, the Commission also uses other tools available, such as the Diversity Charters, to promote gender balance in decision-making positions and supports the Member States and stakeholders through awareness-raising, political dialogue, exchange of good practices and project funding.		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p><a href="#">Proposal for a directive on improving the gender balance among non-executive directors of companies listed on stock exchanges and related measures</a> dates from 2012 but is currently on hold at the Council. Some Member States consider that binding measures at the EU level are not the best way to pursue the objective.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	16. [...] invites the Commission to look into the possibility of revising the European Works Council Directive <sup>8</sup> and establishing a new framework on employees' information, consultation and involvement in European companies;	The Commission takes note of the request of the European Parliament to look into the possibility of revising the European Works Council Directive and establish a new framework on employees' information, consultation and involvement in European companies.		It is unclear to what extent the Commission has kept its promise to look into this possibility.	
7)	19. Calls on the Commission to present a legislative proposal to ensure that directors' duties cannot be misconstrued as amounting solely to the short-term maximisation of shareholder value, but must instead include the long-term interest of the company and wider societal interests, as well as that of employees and other relevant stakeholders; [...]	The Commission takes due note of the European Parliament's observation that companies' long-term performance, resilience and even survival may depend on the adequacy of their response to environmental and social matters. In this context, it will consider the possibility of clarifying the directors' duty to act in the interest of the company and their duty of care, with regard to ensuring that directors' duties include the need to take into account the long-term interest of the company and the interest of its stakeholders.		It is unclear to what extent the Commission has kept its promise to consider the possibility of clarifying the directors' duty.	
8)	22. [...] invites the Commission to identify high-risk sectors of economic activity with a significant impact on sustainability matters that could justify applying it to SMEs in those sectors; further considers that, following the impact assessment the Commission is currently undertaking, the sustainability strategies should include measurable, specific, time-bound and science-based targets as well as transition plans aligned with the EU's international commitments on the environment and climate change, in particular the Paris Agreement, the Convention on Biological Diversity and international agreements addressing deforestation;	The impact assessment of the Commission prepared for the sustainable corporate governance initiative will assess various options as regards the scope of the initiative, including a scenario under which all limited liability companies are covered. In this context, due consideration will be given to limiting and alleviating the burden for SMEs; will assess the different possibilities in the light of the feedback received from public consultation and the data available. The Commission will also reflect, in line with the European Parliament's request, on the possibility to include large – listed and non-listed – companies, and only such non-micro SMEs, which are active in sectors of economic activity where the risk of having a significant impact on sustainability matters is high. The option of excluding microenterprises from all or the majority of the possible new obligations will also be explored. Furthermore, the		The works on the proposal for <a href="#">sustainable corporate governance initiative</a> are ongoing. Commission adoption was planned for Q4 2021. The <a href="#">inception impact assessment</a> and <a href="#">Public consultation</a> were conducted. However the Regulatory Scrutiny Board gave for two times a red light to the impact assessment accompanying the proposal, and a new text should be proposed in 2022.

		Commission agrees on the need to draw on external independent expertise in the course of the development of non-financial reporting standards. One of the objectives of the NFRD revision is to improve access of financial market participants to reliable, comparable, standardised and relevant sustainability information, which will help them to meet the requirements of the Sustainable Finance Disclosure Regulation.			
9)	22. [...] calls on the Commission to further promote such remuneration schemes for top management positions;	The preparatory work on sustainable corporate governance also assesses possible ways to promote remuneration schemes that align directors' incentives with the long-term interests of their companies.		The works on the proposal for <a href="#">sustainable corporate governance initiative</a> are ongoing. Commission adoption was planned for Q4 2021. The <a href="#">inception impact assessment</a> and <a href="#">public consultation</a> were conducted. However the Regulatory Scrutiny Board gave for two times a red light to the impact assessment accompanying the proposal, and a new text should be proposed in 2022.	
10)	23. calls on the Commission to consider the introduction of new mechanisms to promote sustainable returns and the long-term performances of companies;	Although the follow-up does not mention a new mechanism to promote sustainable returns, the Commission commissioned a study on directors' duties on sustainable corporate governance addressing issues contributing to 'short-termism' in company law and corporate governance. The study suggests that a possible future EU action should pursue the general objective of fostering more sustainable corporate governance and contributing to more accountability for companies' sustainable value creation.		Although the Commission publishes the <a href="#">study on directors' duties on sustainable corporate governance</a> , it is unclear how Commission action will help pursue the general objective of fostering more sustainable corporate governance and contributing to more accountability for companies' sustainable value creation.	
11)	25. [...] urges the Commission to take swift action to ensure that existing and future trade investment agreements are fully aligned with EU environmental and climate objectives and to come forward with proposals to counteract corporate land grabbing and deforestation in the upcoming review of the NFRD;	Several independent studies have demonstrated that sustainable corporate governance practices allow companies to perform better and become more resilient. The complexity of global value chains requires a holistic approach to ensure a global level playing field and international competitiveness. In this context, the Commission will assess ways to bring certain non-EU		On 21 April 2021, the Commission adopted a <a href="#">Proposal for a corporate sustainability reporting directive</a> , which would amend the existing reporting requirements of the NFRD. Commission adoption was planned for Q4 2021. The <a href="#">inception impact assessment</a> and <a href="#">Public consultation</a> were conducted.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>companies under the scope of the sustainable corporate governance initiative, as explained above. Furthermore, the Commission will duly consider the appropriate action to ensure that its trade policy contributes to the industrial recovery and the climate ambition of the EU.</p> <p>The Commission also aims at ensuring that the initiative is coherent with its development policy objectives and accompanied by support to third-country partners setting up the appropriate frameworks ensuring that both companies and individuals promote and respect human rights, social and environmental standards. Furthermore, the Commission notes that more sustainable corporate governance practices in EU companies and in their supply chains have the potential to raise the level of protection of human rights, workers' interest or environmental standards in third countries as well.</p> <p>In relation to para. 22 on alignment with EU climate and environmental objectives in all sectors, the Commission's impact assessment prepared for the sustainable corporate governance initiative will explore how to improve the corporate governance of companies to ensure that they align their activities to the EU's overall climate-neutrality and other environmental objectives and contribute to achieving them. In this regard, the Commission will assess, in accordance with the European Parliament's request, the possibility to require directors to include in the corporate strategies measurable, specific, time-bound and science-based sustainability targets, as well as transition plans, and to align these with the EU's international commitments under the Paris Agreement,</p>		<p>There is no mention as such of deforestation and land grabbing but art. 19(b) provides that sustainability reporting standards shall, taking into account the subject matter of a particular standard: (a) specify the information that undertakings are to disclose about environmental factors, including information about [...] biodiversity.</p> <p>Or about social factors, including information about: [...] respect for the human rights, fundamental freedoms, democratic principles and standards established in the International Bill of Human Rights and other core UN human rights conventions, the International Labour Organization's Declaration on Fundamental Principles and Rights at Work and the ILO fundamental conventions and the Charter of Fundamental Rights of the European Union.</p> <p>The inception impact assessment mentions the option of companies and directors' duties to take measures to address their adverse sustainability impacts, such as climate change and environmental and human rights.</p>

		the Convention on Biological Diversity and international agreements addressing deforestation.			

4.1.21.3. JURI Resolution 3: EP resolution of 20 January 2021 on artificial intelligence: questions of interpretation and application of international law in so far as the EU is affected in the areas of civil and military uses and of state authority outside the scope of criminal justice

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Artificial intelligence: questions of interpretation and application of international law in so far as the EU is affected in the areas of civil and military uses and of state authority outside the scope of criminal justice</b>	20/01/2021 <a href="#">T9-0009/2021</a> <a href="#">2020/2013(INI)</a> JURI	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	Specific reply			
1)	1. Considers that it is necessary to adopt a common European legal framework with harmonised definitions and common ethical principles, including the use of AI for military purposes; calls on the Commission, therefore, to adopt the following definitions: – ‘AI system’ means a system that is either software-based or embedded in hardware devices, and that displays behaviour simulating intelligence by, inter alia, collecting and processing data, analysing and interpreting its environment, and by taking action, with some degree of autonomy, to achieve specific goals; – ‘autonomous’ means an AI system that operates by interpreting certain input, and by using a set of predetermined instructions, without being limited to such instructions, despite the system’s behaviour being constrained by and targeted at fulfilling the goal it was	The Commission takes note of Parliament's call to adopt a common European legal framework with harmonised definitions and common ethical principles (point 1). In this context, the Commission notes the Parliament-proposed definitions of an ‘AI system’ and for the concept of ‘autonomous AI’. As set out in its White Paper on Artificial Intelligence <sup>9</sup> , the Commission considers that AI definition needs to be future proof. As a follow up to the White Paper, a legislative proposal for a regulatory framework for AI is scheduled for the first half of 2021. The Commission considers that in any new legal instrument, the definition of the technologies concerned will need to be precise enough to provide the necessary legal certainty, while leaving some flexibility to accommodate technical progress. The results from the public consultation that the Commission carried out in the first half of 2020 have also highlighted the need for a clear definition of the				No further/specific actions proposed/promised to be taken by the Commission.	

<sup>9</sup> COM(2020) 65 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>given and other relevant design choices made by its developer;</p>	<p>scope of the future regulation. The Commission is therefore very carefully examining the definition and possible scope of application of potential regulation and it agrees with the European Parliament that a European legal framework with a harmonised definition and common principles is necessary.</p> <p>The White Paper on AI does not address the development and use of AI for military purposes.</p> <p>However, the Commission and the Member States have started preliminary consultations in 2020 to discuss challenges associated with the control of trade in dual-use items that use AI and could have military or other security applications. It is also planned to set up an expert group in 2021 to pursue discussions on controls of trade of emerging technologies, including those using artificial intelligence. Moreover, in view of the adoption of the new Dual-Use export control Regulation in 2021, the Commission is considering possible options for the control of exports of certain AI-powered cyber surveillance technologies, including facial recognition and biometrics, with a view to prevent their possible misuse for human rights violations.</p>			
2)	<p>18. Calls on the Commission to facilitate research into and discussion on the opportunities for using AI in disaster relief, crisis prevention and peacekeeping;</p>	<p>Regarding the resolution's call on the Commission to facilitate research into and discussion on the opportunities for using AI in disaster relief, crisis prevention and peacekeeping (point 18), the Commission would like to point to the EU civil security research programme. Since 2007, this programme funded more than 700 projects with over EUR 3 billion. It includes exploring the use of AI in disaster relief and crisis prevention. In particular, projects from the Disaster Resilient Societies (DRS) part of the programme are exploring the use of AI in disaster relief and crisis prevention, noting, however, that AI is an</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>enabler and not an objective per se. Moreover, there are many technological developments supported by the EU security research programme that may also make use of AI: from interoperable communications to robotics to detection of (or using) Unmanned Aerial Vehicles, to wearable equipment just to name a few. Examples of the supported projects include:</p> <ul style="list-style-type: none"> <li>- TOXI-TRIAGE (Integrated And Adaptive Responses To Toxic Emergencies For Rapid Triage: Engineering The Roadmap From Casualty To Patient To Survivor <a href="http://toxi-triage.eu">http://toxi-triage.eu</a>), which researched detection of chemical substances through unmanned vehicles and helping triage of victims (e.g. in the aftermath of an explosion).</li> <li>- ANYWHERE (EnhANCing emergencY management and response to extreme WeatHER and climate Events <a href="http://anywhere-h2020.eu">http://anywhere-h2020.eu</a>), which developed an impact-forecasting system for hydrometeorological extreme events with direct communication to civil protection units, helping rapid decision-making for examples for evacuations of areas of flashfloods risks.</li> </ul> <p>While the EU civil security research programme is mainly focused on internal civil security and addresses peacekeeping only occasionally, it includes examples of research on technology and knowledge to support peacebuilding and/or civilian humanitarian missions (such as in the GAP project (Gaming for Peace, <a href="https://cordis.europa.eu/project/id/700670">https://cordis.europa.eu/project/id/700670</a>), and in the iTRACK project (Integrated system for real-time TRACKing and collective intelligence in civilian humanitarian missions <a href="https://www.itrack-project.eu">https://www.itrack-project.eu</a>). The Commission will continue supporting research on opportunities – as well as challenges – of AI for disaster relief and crisis prevention and preparedness throughout the civil security research programme of</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		Horizon Europe. More examples of projects and details can be found on the Commission's Community Research and Development Information Service (CORDIS) ( <a href="https://cordis.europa.eu/en">https://cordis.europa.eu/en</a> ).			
3)	20. Calls on the Vice President of the Commission / High Representative for Foreign Affairs and Security Policy (VP/HR) to pave the way for global negotiations with a view to putting in place an AI arms control regime and updating all existing treaty instruments on arms control, disarmament and non-proliferation so as to take into account AI-enabled systems used in warfare; <i>calls for the Council Common Position defining common rules governing control of exports of military technology and equipment to fully take into account and cover AI-enabled weapons systems;</i>	The objective of the EDF is to foster competitiveness, efficiency and the innovation capacity of the European technological and industrial base throughout the Union. It does so by supporting collaborative research and development (R&D) projects that are consistent with defence capability priorities commonly agreed by the Member States. The EDF aims at contributing to greater efficiency of defence spending within the Union, achieve greater economies of scale, reduce the risk of unnecessary duplication and reduce fragmentation of defence products and technologies. There is a clear trend of digitisation of military operations and missions, and Europe's armed forces cannot afford to lag behind in these new developments. AI can bring many benefits for the armed forces by providing faster and better information and decision-making, by ensuring collaborative warfare and providing for greater protection of soldiers from risky tasks or for systems that take care of routine tasks. The EDF precursor programmes, the Preparatory Action for Defence Research (PADR) and the European Defence Industrial Development Programme (EDIDP), already provided funding to three AI-related defence projects.		No further/specific actions proposed/promised to be taken by the Commission.	
4)	24. Insists on the importance of investing in human skills, including digital skills, in order to adapt to scientific progress involving AI-driven solutions, for individuals exercising regulated professions, including activities connected with the exercise of state authority, such as the administration of justice; calls on the Member States and the Commission to duly take this	The Commission shares Parliament's insistence on the importance of investing in human skills, including digital skills, in order to adapt to scientific progress involving AI-driven solutions (point 24). The White Paper on AI underlined that the European approach to AI will need to be underpinned by a strong focus on skills to fill competence shortages. The results of 2020		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Digital Education Action Plan for the period 2021-2027, 2030 Digital Compass</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>into account as part of the implementation of Directive 2005/36/EC<sup>10</sup>;</p>	<p>European enterprise survey on the use of technologies based on AI suggest that one of the key barriers European companies face when adopting AI technologies is the availability of employees with adequate AI skills.</p> <p>In September 2020, the Commission adopted a new Digital Education Action Plan for the period 2021-2027<sup>11</sup>. This action plan includes specific actions for the improvement of AI skills into the larger context of promoting digital skills. In detail, a specific action will promote the understanding of emerging technologies and develop ethical guidelines of AI and Data usage in education and training. Additionally, the Action Plan foresees the update of the digital competences framework, in order to include emerging technologies, such as AI, data management, just to name a few. The Commission has also supported EU Code Week, a volunteer-led movement that brings computational thinking, coding, robotics, tinkering with hardware, computer science, AI and digital skills to as many people as possible. At the end of 2020, in order to support Member States in their effort to increase the specialised education offer in AI, the Commission awarded grants to four networks of universities, small and medium sized enterprises (SMEs) and AI excellence centres to deliver excellent master's programmes in AI, for a total of EUR 6.5 million. The selected networks should jointly design and deliver high-quality and hands-on master's programmes in different Member States, with a specific focus on human-centric AI, AI application for the public administration and AI for</p>			

<sup>10</sup> Directive 2005/36/EC of the European Parliament and of the Council of 7 September 2005 on the recognition of professional qualifications (OJ L 255, 30.9.2005, p. 22).

<sup>11</sup> COM(2020) 624 final.

		<p>healthcare. All the programmes should also include AI ethics courses and part of the content should be made available online through the Digital Skills and Jobs Platform translated into all EU languages.</p> <p>Furthermore, in its Communication on '2030 Digital Compass: the European way for the Digital Decade' (COM(2021) 118 final), the Commission identified a digitally skilled population and highly skilled digital professionals as one of the four 'cardinal points' for mapping the EU's trajectory, as part of a 'Digital Compass' to translate the EU's digital ambitions for 2030 into concrete targets and to ensure that these objectives are met. The Communication recalls that the European Pillar of Social Rights Action Plan includes the objective to increase the share of adults with basic digital skills to 80% by 2030<sup>12</sup>, and includes the target to increase the number of employed ICT specialists to 20 million by the same year, with convergence between women and men.</p> <p>Regarding the Parliament's call to duly take this into account as part of the implementation of Directive 2005/36/EC (point 24), the Commission notes that Directive 2005/36/EC does not define the skills or other training requirements for professions except for certain ones, mostly in the health area with a view to facilitating mobility. The Commission recalls that Directive 2018/958 (Proportionality Test Directive) aims at preventing unjustified or disproportionate regulatory requirements for regulated professions from being put in place. Rigorous application of the framework for ex-ante proportionality assessments will help Member States in preventing unjustified</p>

		hindrance of AI developments and at the same time in ensuring the protection of justified public interest objectives.			
5)	26.[...] ; calls on the Commission to foster dialogue, closer cooperation and synergies between Member States, researchers, academics, civil society actors, the private sector, in particular leading companies, and the military, to ensure that policy-making processes for defence-related AI regulations are inclusive;	Concerning the dialogue with stakeholders (point 26), the Commission shall, for the implementation of the EDF, be assisted by a Committee within the meaning of Regulation (EU) 182/2011 (EDF Programme Committee) and as such provides for the dialogue with Member States. The Commission will also engage in discussions with relevant stakeholders, including researchers, academics, civil society and the private sector to ensure the success of the Fund.		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.	
6)	35. Calls on the VP/HR, the Member States and the European Council to develop and adopt, as a matter of urgency, a common position on autonomous weapons systems that ensures meaningful human control over the critical functions of weapons systems, including during deployment, to speak with one voice in relevant forums and act accordingly; calls, in this context, on the VP/HR, the Member States and the Council to share best practices and garner input from experts, academics and civil society, as reflected in the 12 September 2018 position on autonomous weapons systems, which states that attacks should always be carried out with significant human intervention;	It should be highlighted that the EDF Regulation requires that R&D projects supported by the Fund should comply with relevant international, Union and national law, as well as with the ethical principles reflected in them. The EDF Regulation specifically prohibits the funding of actions related to the development of LAWS without the possibility for meaningful human control over the selection and engagement decisions when carrying out strikes against humans. It allows the possibility of providing funding for actions for the development of early warning systems and countermeasures for defensive purposes.		No further/specific actions proposed/promised to be taken by the Commission.	
7)	42. Calls on the Commission to support the research, development, deployment and use of AI for preserving peace and preventing conflicts;	No specific reply is provided to this particular point (on supporting the research, development, deployment and use of AI for preserving peace and preventing conflicts).		Not mentioned.	
8)	49. Recalls its position of 12 September 2018 on autonomous weapons systems, which states that strikes must not be carried out without meaningful human	No specific reply is provided to this particular point (on common position).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p><i>intervention; calls on the VP/HR, the Member States and the European Council to adopt a common position on autonomous weapons systems that ensures meaningful human control over the critical functions of weapons systems, including during deployment;</i></p>				
9)	<p>49. [...] reaffirms its support for the work on LAWS of the UN GGE of the High Contracting Parties to the Convention on Certain Conventional Weapons, which remains the relevant international forum for discussions and negotiations on the legal challenges posed by autonomous weapons systems; calls for all current multilateral efforts to be accelerated so that normative and regulatory frameworks are not outpaced by technological developments and new methods of warfare; calls on the VP/HR, in the framework of the ongoing discussions on the international regulation of LAWS by the states parties to the CCW, to remain engaged and help to advance, without delay, the effort to develop a new global regulatory framework and a legally binding instrument focused on definitions, concepts and characteristics of emerging technologies in the area of LAWS, ethical and legal questions of human control, in particular with regard to their critical functions, such as target selection and engagement, the maintenance of human responsibility and accountability and the necessary degree of human-machine interaction, including the concept of human control and human judgment; <i>calls for these efforts to ensure compliance with international humanitarian and human rights law during the different stages of the lifecycle of AI-enabled weapons, with a view to agreeing specific recommendations for the clarification, consideration and development of aspects of the normative framework relating to emerging technologies in the area of LAWS;</i></p>	<p>It should be highlighted that the EDF Regulation requires that R&amp;D projects supported by the Fund should comply with relevant international, Union and national law, as well as with the ethical principles reflected in them. The EDF Regulation specifically prohibits the funding of actions related to the development of LAWS without the possibility for meaningful human control over the selection and engagement decisions when carrying out strikes against humans. It allows the possibility of providing funding for actions for the development of early warning systems and countermeasures for defensive purposes.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
10)	56. Invites the Commission to assess the consequences of a moratorium on the use of facial recognition systems, and, depending on the results of this assessment, to consider a moratorium on the use of these systems in public spaces by public authorities and in premises meant for education and healthcare, as well as on the use of facial recognition systems by law enforcement authorities in semi-public spaces such as airports, until the technical standards can be considered fully fundamental rights-compliant, the results derived are non-biased and non-discriminatory, and there are strict safeguards against misuse that ensure the necessity and proportionality of using such technologies;	The Commission agrees that use of facial recognition systems need to be carefully assessed (point 56). As regards the gathering and use of biometric data for remote identification purposes in public areas, such as facial recognition, the Commission, is currently assessing the issue, taking account of the identified specific risks and of fundamental rights, notably the data protection rules, and of the views expressed in the resolution.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Commission is currently assessing the issue).	
11)	62. Calls for the explainability of algorithms, for transparency and regulatory oversight when artificial intelligence is used by public authorities, and for impact assessments to be conducted before tools using AI technologies are deployed by state authorities; calls on the Commission and the European Data Protection Board to issue guidelines and recommendations and develop best practices in order to further specify the criteria and conditions applicable to decisions based on profiling and the use of AI by public authorities;	As regards data protection issues related to AI (point 62), the Commission recalls that pursuant to the General Data Protection Regulation (GDPR), the European Data Protection Board (EDPB) has the task to ensure the consistent application of this regulation. The EDPB may issue guidelines to this end as regards processing activities falling within the scope of the GDPR and the Law Enforcement Directive. The EDPB has already issued guidelines on automated decisions, including profiling. It has announced in its Work Programme to issue guidelines on AI.		No further/specific actions proposed/promised to be taken by the Commission.	
12)	72. [...] calls, in this context, on the Commission, the Council and the Member States to pay particular attention when negotiating, concluding and ratifying international agreements related to cross-border family cases, such as international child abductions, and to ensure that in this context AI systems are always used under effective human verification, and respect due process within the EU and countries which are signatories of these agreements;	No specific reply is provided to this particular point (international agreements related to cross-border family cases).		Not mentioned.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
13)	77. Takes note of the significant economic potential of AI applications, including for the optimisation of long-term performance, maintenance, failure prediction and construction planning in transport infrastructure and buildings, as well as for safety, energy efficiency and costs; calls on the Commission, therefore, to continue promoting AI research and the exchange of good practices in transport;	The resolution calls to continue promoting AI research and the exchange of good practices in transport (point 77) and to carry out an evaluation of the use of AI and similar technologies in the transport sector (point 84). In December 2020, the Commission adopted its Sustainable and Smart Mobility Strategy, which provides (among other things) for the development of an AI roadmap for mobility. The Commission also announced a European mobility data space in its European Data Strategy <sup>13</sup> published in February 2020. AI technologies affect all modes of transport and the EU has already developed initiatives to benefit from its potential, including in road, aviation, rail and waterway sectors. For example, in the road transport sector, the Commission underlines the work of the Cooperative, Connected and Automated Mobility (CCAM) Platform and of the upcoming CCAM Partnership under Horizon Europe, which will include a cluster on procedures, methods and tools for the validation of high-level automation. Moreover, in the automotive sector, new rules on automated vehicles, cybersecurity and software updates of vehicles will become applicable as part of the vehicle type approval and market surveillance legislation as from 7 July 2022.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Sustainable and Smart Mobility Strategy</a> ).	
14)	81. Recalls that autonomous vehicles have great potential to improve mobility, safety, and bring environmental benefits, and calls on the Commission and the Member States to ensure cooperation among regulators and all stakeholders relevant to the deployment of automated road vehicles in the EU;	The Commission will also attach great importance to ensure that the R&D projects selected for funding are ethically sound. The EDF Regulation foresees an ethical screening and assessment procedure set out in Article 7 that provides for ethical screening of all fundable R&D projects, including for R&D projects involving emerging technologies such as AI. Actions that are not ethically acceptable are rejected. This addresses the resolution's		The general nature of the commitment's wording makes it unclear to what extent the action(s) was carried out.

4.1.21.4. JURI Resolution 4: EP resolution of 20 January 2021 on monitoring the application of EU law 2017, 2018 and 2019

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
Monitoring the application of EU law 2017, 2018 and 2019		20/01/2021 <a href="#">T9-0011/2021</a> <a href="#">2019/2132(INI)</a> JURI	<a href="#">SP(2021)223</a>	Final reply (SP) received 9 July 2021	Mixed reply			
1)	1. Welcomes the Commission's 2017, 2018 and 2019 reports on monitoring the application of EU law, including the country-specific reports; recognises that these annual reports, the right of petition and the European Citizens' Initiative are valuable tools for enabling EU legislators to identify potential issues; welcomes the Commission's commitment to attaching great importance to the contribution of citizens, businesses and other stakeholders in detecting breaches of EU law; urges the Commission to enhance public debate on its annual reports;		The Commission will continue to provide the Parliament and the public with comprehensive information on monitoring the implementation of EU legislation and the follow-up given to complaints and infringement procedures in its annual reports.  The Commission will also continue to support the public debate on its annual reports by endeavouring to make the data in the reports more accessible and engaging for the public.				The general nature of the commitment's wording makes it unclear to what extent the action(s) will be carried out.	
2)	8. Emphasises that a lack of enforcement not only undermines the efficiency of the internal market, but also has a direct impact on individual rights, and thus affects the credibility and image of the Union; considers that the large number of infringement procedures shows that ensuring the timely, correct and effective application of EU law in the Member States remains a serious challenge and priority; calls on the Commission to provide more information on the criteria applied under the new methodological approach applied from 2017 aiming to determine the most serious infringement cases and complaints about EU law; regrets that the		The Commission will continue to provide the Parliament and the public with comprehensive information on monitoring the implementation of EU legislation and the follow-up given to complaints and infringement procedures in its annual reports.  [...] The Commission has set clear priorities for its actions when handling infringements and complaints about breaches of EU law in the Communication 'EU law: Better results through better application'. Among these priorities, the Commission will rigorously pursue cases that reveal systemic weakness in a Member State's legal system, such as cases of national rules or general				The general nature of the commitment's wording makes it unclear to what extent the action(s) was be carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	growing number of procedures has led to the average time taken to investigate potential breaches of EU law to increase continuously since 2017; calls on the Commission to reduce the average time for dealing with complaints and infringement procedures; calls on the Commission, when appropriate, to drastically reduce the time taken to bring a Member States before the Court pursuant to Article 258 TFEU and Article 260 TFEU;	<p>practices, which impede the procedure for preliminary rulings by the Court of Justice, or where national law provides no effective redress procedures for a breach of EU law. This also goes for cases where national law otherwise prevents national judicial systems from ensuring that EU law is applied effectively. The Commission also prioritises cases where EU law is not correctly, or not at all, transposed into national legislation, or cases that involve persistent and widespread issues of bad application of EU law.</p> <p>The objective of the Commission's enforcement policy is to ensure swifter compliance where it matters.</p> <p>In its Long term Action Plan for better implementation and enforcement of single market rules, the Commission presented a range of actions [...] The Action Plan recognises that the confidence in the enforcement system relies on complaints being examined in a timely manner and on breaches being sanctioned.</p>			
3)	<p>9. Stresses Parliament's scrutiny role in drawing the Commission's attention to shortcomings in the implementation of EU law in the Member States by means of petitions and questions; encourages the Commission to further enhance its oversight of the way EU law is applied in Member States, in line with the Landscape Review by the European Court of Auditors; stresses that a close and structured dialogue between the Commission and the Member States at an early stage is key to the effective and correct application of EU law, and also to tackling the issues related to 'gold plating' during the transposition and application of EU law; recalls the need to establish a common database and website for all parts of the legislative procedure in order to increase transparency in legislative discussions; calls on the Commission, therefore, to make use of regulations as far as</p>	<p>The Better Regulation Agenda aims to ensure that legislation is prepared in an open and transparent way, using the best evidence available and making full use of stakeholder inputs. The choice of a specific legislative instrument will always depend on the outcome of this process. The Commission shares the Parliament's view that implementation periods should be realistic, in particular due to the complexity of certain directives. The Commission encourages the Parliament and the Member States, which are directly involved in negotiations regarding the substance and the transposition deadlines, to take this aspect into account during the legislative process.</p> <p>[...]</p> <p>The dialogue with national authorities on implementing European legislation has helped solve 90% of</p>		No further specific actions proposed/promised to be taken by the Commission.

	possible whenever it considers legislative proposals;	<p>infringement cases since 2014 without having to go to the Court of Justice of the European Union – saving time and taxpayer money in the process.</p> <p>Finally, the two most recent reports on monitoring the application of EU law (2018 and 2019) provide a more in-depth insight into the compliance work and tools that the Commission has developed to help the Member States transpose, implement and apply EU law correctly and on time.</p>			
4)	10. Stresses Parliament’s scrutiny role in drawing the Commission’s attention to shortcomings in the implementation of EU law in the Member States by means of petitions and questions; encourages the Commission to further enhance its oversight of the way EU law is applied in Member States, in line with the Landscape Review by the European Court of Auditors; stresses that a close and structured dialogue between the Commission and the Member States at an early stage is key to the effective and correct application of EU law, and also to tackling the issues related to ‘gold plating’ during the transposition and application of EU law; recalls the need to establish a common database and website for all parts of the legislative procedure in order to increase transparency in legislative discussions; calls on the Commission to promote compliance more consistently across different policy areas, and, where possible and appropriate, to enhance preventive instruments such as, for example, preparing implementation plans, road maps, explanatory documents, dedicated websites, and the exchange of good practices designed to help Member States identify transposition	<p>There is strong complementarity between assisting the Member States in implementing EU law, on the one hand, and a more strategic approach to pursuing serious breaches of EU law, on the other. In line with the approach set out in the Communication ‘EU law: Better results through better application’, the Commission has developed a number of tools to help Member States transpose, apply and implement EU law correctly and on time. These include guidance documents, implementation plans, expert groups, explanatory documents, providing training, organising workshops and holding package meetings. Some of these tools are used to avoid (‘prevent’) breaches of EU law, while others are intended to be used in parallel with infringement procedures to resolve (‘correct’) breaches of EU law and to avoid having to refer the matter to the Court of Justice of the European Union. The Commission often uses a combination of these tools to address problems and promote compliance with EU law.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (a <a href="#">number of tools</a> to help Member States transpose, apply and implement EU law correctly and on time).

15)	30. Calls on the Commission to ensure that the COVID-19 pandemic is not used by Member States as a pretext for the incorrect application of EU law, and that any delays in transposing directives into national legal orders are duly justified;	<p>The proper application of EU law is all the more important in times of a pandemic, as the proper functioning of the single market keeps key supply chains intact, provides shops with food and health services with medical supplies. The Commission has made it clear that it will continue to uphold EU law through infringement proceedings where necessary. At the same time, it has acknowledged that the COVID-19 pandemic and the measures needed to combat the pandemic have put a serious strain on national administrations, particularly in early 2020. In the light of this, the Commission has chosen not to suspend its enforcement action altogether, but has given more time in the first half of 2020 to Member States to reply to the Commission and to bring their laws and practices into compliance with EU law.</p> <p>The Commission is closely monitoring the situation as it evolves. It makes a case-by-case assessment of the situations where COVID-19-related obstacles make it impossible for a Member State to address an infringement case in time.</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	

4.1.21.5. JURI Resolution 5: EP resolution of 20 May 2021 on liability of companies for environmental damage

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment		C C	Action of the Commission	C C
<b>Liability of companies for environmental damage</b>		20/05/2021 <a href="#">T9-259/2021</a> <a href="#">2020/2027(INI)</a> JURI	<a href="#">SP(2021)538</a>	Final reply (SP) received 9 November 2021		Specific reply	
1)	<p>5. Regrets that environmental crimes are among the most profitable forms of transnational criminal activity; calls on the Commission and the Member States, therefore, to allocate appropriate financial and human resources to preventing, investigating and prosecuting environmental crimes, and to increase the expertise of the authorities involved, including prosecutors and judges, with a view to more effectively prosecuting and sanctioning environmental crime;</p> <p>[...]; calls, furthermore, on the Commission and the Member States to make sure that all Member States have proper environmental crisis management procedures in place at both national and transnational levels; [...]</p>		<p>The Commission is conscious that the effectiveness of the ECD is dependent on the effectiveness of the ‘enforcement chain’, i.e. the work of environmental inspectorates and law enforcement agencies in detecting, gathering evidence on and preparing dossiers on crimes and infringements; the work of environmental prosecutors in preparing cases for trial; and the work of courts in adjudicating on cases that come to trial. Measures to strengthen the ‘enforcement chain’ will also be considered in the context of the revision of the ECD.</p>			<p>The Commission recently evaluated the Environment Crime Directive, and found that it did not meet its objectives in its <a href="#">2020 evaluation</a>. A <a href="#">proposal</a> for a revised ECD was submitted the 15 December 2021.</p>	
2)	<p>7. Points out that reliable data on environmental incidents giving rise to the application of the ELD or other administrative, civil or criminal instruments should be collected under the supervision of an EU ELD task force, with the relevant data being made public; calls on the Commission to duly assess the situation in order to establish whether a combination of different legal instruments could adequately respond to environmental harm, or</p>		<p>The Commission welcomes the Parliament’s identification of specific topics to be addressed in a possible revision of the ELD. The Commission will soon start work on a second evaluation of the directive in line with Better Regulation principles. This evaluation is due to be completed by April 2023. The Parliament’s resolution therefore comes timely in the policy cycle, enabling the Commission to factor in the Parliament’s views in the evaluation process. The outcome of the evaluation cannot be prejudged at this stage.</p>			<p>The Environment Crime Directive was subject to <a href="#">evaluation</a> in 2020. The evaluation notes the lack of reliable statistical data and the need for more coherence between the ECD and ELB. A <a href="#">proposal</a> for a revised ECD was submitted the 15 December 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	whether serious gaps still exist that need to be remedied;				
3)	12. Takes note of the Member States' increasing commitment to working towards the recognition of ecocide at national and international level; asks the Commission to study the relevance of ecocide to EU law and EU diplomacy;	With regard to point 12, the Commission has no current plans to carry out a study on ecocide. It has, however, contacts with the European Law Institute, which is undertaking an academic project on the subject: <a href="https://www.europeanlawinstitute.eu/projects-publications/current-projects-upcoming-projects-and-other-activities/upcoming-projects/ecocide/">https://www.europeanlawinstitute.eu/projects-publications/current-projects-upcoming-projects-and-other-activities/upcoming-projects/ecocide/</a> . The Commission will take note of the results of this work as well as of any legal research on the ecocide concept carried out at the international level.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (European Law Institute, which is conducting an <a href="#">academic project</a> on the subject).	
4)	13. Calls on the Commission to provide further clarification and guidance to competent national authorities and prosecutors on the key legal terms of the ECD and to develop a harmonised classification of environmental crimes;	The Commission does not exclude the possibility of guidance of the sort mentioned in point 13, but considers that it is premature to start relevant work before the proposal for the ECD revision is presented and before the outcome of the ECD revision is clear.		No further/specific actions proposed/promised to be taken by the Commission.	
5)	18. Calls on the Commission and the Member States, supported by the EU ELD task force, to set up protection and support schemes for the victims of environmental damage and to ensure their full access to justice, information and compensation; emphasises the role of environmental NGOs in raising awareness and in identifying potential breaches of EU and national environmental laws;	As for the victims of environmental damage mentioned in points 18 and 19, the ELD currently entitles natural or legal persons affected or likely to be affected by environmental damage as defined in the ELD to request the competent authority to take action and to bring legal challenges against the decisions, acts or failure to act of the competent authority. As is demonstrated by its 2017 Notice (OJ C 275, 18.8.2017, p. 1–39), its related published Citizens Guide ( <a href="https://ec.europa.eu/environment/aarhus/pdf/guide/ENV-18-004_guide_EN_web.pdf">https://ec.europa.eu/environment/aarhus/pdf/guide/ENV-18-004_guide_EN_web.pdf</a> ) and its 2020 Communication on the matter (COM(2020) 643 final), the Commission attaches high importance to securing effective access to justice in environmental matters, including with regard to the ELD. The Commission's E-Justice Portal is currently being updated		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (Citizen's <a href="#">guide</a> to access to justice on environmental matters, <a href="#">Environmental compliance assurance vade mecum</a> ). The up-dated <a href="#">e-justice portal</a> was launched on the 12 October 2021.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>with regard to environmental access to justice, and the update will include country-specific information on access to justice under the ELD. This should help those affected by environmental damage to better understand their rights of redress under the ELD.</p> <p>Also with reference to points 18 and 19, the Commission recognises that, regardless of whether they come within the scope of the ELD, environmental nuisances may create justified grievances and that victims may submit those grievances to the competent public authorities. As part of its 2018 Action plan on environmental compliance assurance (COM/2018/10 final), the Commission, with the assistance of networks of practitioners, the European Network of Ombudsmen and Member State experts, published in different language versions a Vade Mecum on complaint-handling and citizen engagement (<a href="#">Environmental compliance assurance vade mecum - Publications Office of the EU (europa.eu)</a>) together with a summary guide on the same topic (<a href="#">Environmental compliance assurance vade mecum - Publications Office of the EU (europa.eu)</a>). These documents describe good practices in the handling of citizen complaints, including with regard to environmental nuisances.</p>			
6)	19. Calls on the Commission to assess the efficiency of rapid claim mechanisms with a view to ensuring swift compensation for victims in insolvency cases, which can lead to further damages;		<p>The Commission recognises that, regardless of whether they come within the scope of the ELD, environmental nuisances may create justified grievances and that victims may submit those grievances to the competent public authorities. As part of its 2018 Action plan on environmental compliance assurance (COM/2018/10 final), the Commission, with the assistance of networks of practitioners, the European Network of Ombudsmen and Member State experts, published in different language versions a Vade Mecum on complaint-handling and citizen engagement (<a href="#">Environmental compliance assurance vade mecum - Publications Office of the EU</a></p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Environmental compliance assurance vade mecum, EU Strategy on Victims' Rights</a>).</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p><a href="http://europa.eu">europa.eu</a>) together with a summary guide on the same topic (<a href="http://environmental-compliance-assurance-vade-mecum-publications-office-of-the-eu.europa.eu">Environmental compliance assurance vade mecum - Publications Office of the EU (europa.eu)</a>). These documents describe good practices in the handling of citizen complaints, including with regard to environmental nuisances.</p> <p>Also in the EU Strategy on Victims' Rights (2020-2025), the Commission acknowledges that environmental crime affects all of society, but that it may have particularly detrimental effect on individuals. It may impact personal health, livelihoods and lower property value. Victims of environmental crime may be particularly susceptible to secondary victimisation, intimidation and retaliation - notably if environmental crime is a form of organised crime. Such victims should have access to specialist support and protection. The Commission is assessing the access to justice for victims of environmental crime, including victims' access to support and protection on the basis of the Victims' Rights Directive, 2010/29 EU, and if necessary may take additional measures.</p>			
7)	<p>23. Supports the existing requirements to also report on non-financial issues; notes, however, that such reporting has until now only been a legal duty for large undertakings; calls on the Commission to put emphasis on the enforcement of those reporting requirements in case of non-performance in the upcoming revision of the Non-Financial Reporting Directive (NFRD)<sup>28</sup>;</p>	<p>With regard to point 23, on 21 April 2021, the Commission adopted a proposal for a Corporate Sustainability Reporting Directive (CSRD), which would revise and strengthen the provisions of the Non-Financial Reporting Directive (NFRD). The Commission's CSRD proposal extends the scope of the reporting requirements to approximately 50.000 companies compared to about 11.000 under the NFRD. The new requirements would apply to all large and listed companies, whereas the NFRD applies only to large</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (proposal for a <a href="#">Corporate Sustainability Reporting Directive</a>).</p>	

<sup>28</sup> Directive 2014/95/EU of the European Parliament and of the Council of 22 October 2014 amending Directive 2013/34/EU as regards disclosure of non-financial and diversity information by certain large undertakings and groups (OJ L 330, 15.11.2014, p. 1).

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		public interest entities with more than 500 employees. In addition, the proposal ensures that Member States would apply a minimum set of sanctions for non-compliance with the reporting requirements.			
8)	26. Notes that liability regimes regarding diffuse pollution in EU law are fragmented; calls on the Commission to carry out a study on how diffuse pollution is addressed by the different EU liability regimes;	As regards the study on diffuse pollution mentioned in point 26, the ELD stipulates that the Directive shall only apply to environmental damage caused by pollution of a diffuse character, where it is possible to establish a causal link between the damage and the activities of individual operators. There is therefore a qualified but not a blanket exception for diffuse pollution. Against this background, the Commission will take into account the Parliament's request when undertaking the upcoming evaluation of the ELD.		Commission promises to take into account the Parliament's request when undertaking the upcoming evaluation of the ELD.	
9)	28. Calls on the Commission to evaluate whether extending the scope of the ELD and the activities listed in Annex III thereto could limit short and long-term damage to the environment, human health and air quality;  asks the Commission, furthermore, to assess whether the precautionary principle approach properly and effectively presupposes potentially dangerous risks or effects;	With regard to point 28, although the natural resources covered by the ELD do not at present include air (being limited to protected species and natural habitats, water and land), the ELD contributes to climate action through the concept of 'natural resource services', since many natural habitats provide carbon storage or sequestration services. The provisional agreement reached by the co-legislators on the European Climate Law enshrines in legislation the EU's commitment to reaching climate neutrality by 2050, in line with the objectives of the Paris Agreement. It also provides for the Commission to assess the consistency of any draft measure or legislative proposal with the climate-neutrality objective and the other Union climate targets before adoption. The forthcoming evaluation of the ELD provides a good opportunity to assess the role of the ELD in pursuing the climate objectives of the Union. In line with the general principle set out in Article 7 of the Treaty on the Functioning of the European Union (TFEU), this assessment should take into account not only the ELD-specific aspects, but also the broader context of Union		Assessment to be drafted together with the forthcoming evaluation of the ELD, also as stipulated under Article 7 of TFEU.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>policies and measures pursuing climate objectives, and applying to various sectors of the Union's economy and thereby operators active in those sectors.</p> <p>There is no specific reply provided for the second point.</p>			
10)	<p>29. Urges the Commission and the Council to consider environmental crimes as a priority; calls on the Commission to make full use of Article 83(2) TFEU and to consider the adoption of an overall framework directive on environmental offences and effective and proportionate sanctions, defining the behaviours to be punished, the nature of infringements, the types of offences, the reparation regimes, the restoration measures and the minimum sanctions, including overall liability of legal and individual persons; calls on the Commission to evaluate the possibility of including environmental crimes among the categories of offences in Article 83(1) TFEU;</p>	<p>With regard to point 29, it is envisaged that the legal basis for a proposed revision will be Article 83(2), TFEU.</p> <p>the follow-up does not mention other points with regards to point 19, but with regards to point 52, the Commission during its revision of the ECD is assessing ways to introduce a broader and more precise range of sanctions types and levels that must be available for environmental crime in the Member States to come to more appropriate sanctions in practice. The EU has no competence to enforce particular sanction levels to be imposed in the individual case.</p>		No further/specific actions proposed/promised to be taken by the Commission.	
11)	<p>33. Calls on the Commission to explore the possibility of extending the mandate of the European Public Prosecutor's Office (EPPO), once it is fully established and fully functional, to cover environmental offences;</p>	<p>With regard to point 33, the European Public Prosecutor's Office took up its investigative and prosecutorial tasks on 1 June 2021. The Commission is ready to assess the possibility, in accordance with Article 86(4) of the Treaty on the Functioning of the European Union, of including cross-border environmental crimes within the EPPO's competence in the medium term.</p>		It is unclear to what extent the Commission will go further than being ready to assess the possibility and within which timeframe.	
12)	<p>34. Calls on Europol and Eurojust to reinforce the documentation, investigation and prosecution of environmental crimes; calls on the Commission, Europol and Eurojust to provide further support and a more effective and institutionalised structure for existing networks of practitioners, cross-border law enforcement, environmental agencies and specialised prosecutors such as the European</p>	<p>With regard to point 34, the Commission shares the Parliament's view on the importance of support for networks of practitioners. It draws attention to several forms of support that have already been established. First, in 2018, along with the action plan on environmental compliance assurance already mentioned, the Commission established a new high-level expert group, the Environmental Compliance and Governance</p>		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	Network of Prosecutors for the Environment (ENPE) and the European Union Forum of Judges for the Environment (EUFJE);	Forum (mentioned at point 3 of the resolution) with a membership that includes the chairs of IMPEL (the network of inspectorates), EnviCrimeNet (the network of police and other enforcement units), ENPE (the network of prosecutors) and EUJFE (the network of judges), along with top administrators from the Member States (C(2018)10 final). The Forum allows the networks to share their concerns and help steer Commission actions in this domain – for example, preparation of the guidance documents already mentioned above. Second, the networks can draw on support from EU-level bodies such as OLAF, CEPOL (EU Agency for Law Enforcement Training), EUROPOL (EU law enforcement agency) and EUROJUST (EU Agency for Criminal Justice Cooperation). Third, the networks have benefited from EU financial support, both the LIFE Regulation and the Internal Security Fund-Police being important in this respect. Amongst other things, financial support can help the networks to maintain secretariats and organise meetings, exchanges and events, implement project-related work, enhance capacities and training, and generally ensure the consistency and sustainability of their activities.		request ( <a href="#">Environmental Compliance and Governance Forum</a> , <a href="#">IMPEL</a> , <a href="#">EnviCrimeNet</a> ).	
13)	38. Calls on the Commission to assess the introduction of a secondary liability regime, namely parental and chain liability for damage caused to human health and the environment <sup>29</sup> , and to carry out an assessment of the current liability situation of subsidiaries active outside the EU, including possible improvements for cases of environmental damage;	The Commission would agree that all of these issues deserve close examination in the light of experience and developments. It recognises, for instance, that the list of occupational activities in Annex III is now outdated, given the replacement of several legal instruments mentioned there.		No further/specific actions proposed/promised to be taken by the Commission.	

<sup>29</sup> See, for instance, the judgment of the Court of Justice of 10 September 2009, *Akzo Nobel NV and Others v Commission of the European Communities*, C-97/08 B, ECLI:EU:C:2009:536.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
14)	41. Calls on the Commission to examine the possibility of aligning the ELD with civil liability legislation for corporate boards in cases where a causal link can be established between a corporate board's action or failure to act and environmental damage as defined in the ELD, including where such damage results from polluting activities carried out to maximise the profit of the company and increase the bonuses of its members <sup>30</sup> ;		With regard to point 41 on civil liability, the ELD is designed to prevent and remediate damage to natural resources rather than to prevent, or provide monetary compensation for damage to the property or health of individuals. There is indeed some overlap: preventive and remedial action under the ELD may prevent harm to individuals who are victims of environmental damage and who might, independently, be entitled to bring traditional tort-law claims against economic operators for adverse effects on their property or health. Changing the ELD to cover traditional tort claims and remedies would involve a fundamental re-design, however. Without drawing conclusions at this stage, the Commission would observe that there are other possible mechanisms of relevance.		No further/specific actions proposed/promised to be taken by the Commission.	
15)	43. Asks the Commission to assess the introduction of a mandatory financial security system (covering insurance, bank guarantees, company pools, securities and bonds or funds) with a maximum threshold per case, aiming to prevent taxpayers from having to bear the costs resulting from remediation of environmental damage; asks the Commission, in addition, to develop a harmonised EU methodology for calculating the maximum liability threshold, taking into account the activity and the impact on the environment; stresses the need to ensure that financial compensation can be obtained, even in the event of insolvency of the operator responsible;		The Commission would agree that all of these issues deserve close examination in the light of experience and developments. It recognises, for instance, that the list of occupational activities in Annex III is now outdated, given the replacement of several legal instruments mentioned there.		No further/specific actions proposed/promised to be taken by the Commission.	

<sup>30</sup> E.g. the dieselgate scandal and the case of the CEO of Volkswagen.

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
16)	44. Asks the Commission to compile a study on the introduction of an ELD financial compensation scheme at EU or national level for cases where available remedies are inadequate given the extent of the damage; stresses that the related discussions should address, inter alia, possible ways of quantifying environmental damage;		<p>Without prejudice to the outcome of the evaluation, the Commission offers the following observations on the Parliament's recommendations:</p> <p>With regard to point 44, the Commission draws attention to the possibility for remedial action under existing or envisaged EU funding instruments in circumstances where the ELD is currently inapplicable or incapable of ensuring that a specific economic operator meets remediation costs. For example, Member States and regions can draw on the cohesion policy funds (in particular the European Regional Development Fund, the Cohesion Fund and the Just Transition Fund) for investments in regeneration and decontamination of brownfield sites and land restoration, taking into account the 'polluter pays' principle, if such a priority is included in the relevant programmes.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point so far but it is unclear if there could be new proposal on this particular point after the evaluation of the ELD will have been completed (foreseen for 2023).</p> <p>The Commission <a href="#">announced</a> during a plenary debate in May 2021 that it was preparing a revision of the Environmental Crime Directive and would soon launch an evaluation of the Environmental Liability Directive, in line with the Better Regulation approach, before considering a possible revision.</p>	
17)	48. Recalls that the EU should promote a high level of environmental protection on its own territory and do its utmost to prevent environmental damage in third countries caused by companies based in EU Member States; recalls equally that there is no EU legal instrument addressing the possibility of prosecuting European companies abroad for environmental crimes or activities causing environmental damage; calls for the EU to encourage parent companies to take sustainable and responsible approaches to their cooperation with third countries, in line with international human rights and environmental standards, and to refrain from taking investment strategies that lead directly to hazardous outcomes; encourages the Commission to establish incentives for companies whose sustainability policies voluntarily go beyond environmental and biodiversity standards laid down in law for the purposes of evaluating these		<p>With regard to points 39 and 48, the Commission has provided comments on due diligence in response to a separate European Parliament resolution (2020/2129 (INL)).</p> <p>Through the European Circular Economy Stakeholders Platform (<a href="#">ECESP Leadership Group on economic incentive policies: reflections Summer 2020 European Circular Economy Stakeholder Platform (europa.eu)</a>), the Commission is actively promoting a debate among stakeholders (i.e. companies, NGOs (non-governmental organisation), regions, cities, Member States, citizens) on the incentives mentioned in point 48. Topics include circular public procurement, extended producer responsibility, tax shifting and CO2 pricing. There are also existing EU legal frameworks in place to encourage company 'front runners' to demonstrate their green credentials. Such companies can register under the EMAS scheme, i.e. the EU's eco-management and audit scheme, to evaluate, report, and improve their environmental</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (European Circular Economy Stakeholders Platform (<a href="#">ECESP Leadership Group on economic incentive policies: reflections Summer 2020 European Circular Economy Stakeholder Platform</a>)).</p> <p>The Commission published an <a href="#">inception impact assessment</a> on a legislative initiative on sustainable product policy planned for the first quarter 2022.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	policies, distilling best practices, and providing this as an example for other companies to follow;	performance. EMAS is open to every type of organisation eager to improve its environmental performance. Two EU funded projects focus on regulatory relief and other incentives for EMAS-registered organisations ( <a href="http://www.lifebraver.eu/">http://www.lifebraver.eu/</a> and <a href="https://www.interregeurope.eu/enhance/">https://www.interregeurope.eu/enhance/</a> ). They consist mainly of tax relief, reduction in fees, reduction in controls and integration of EMAS in green public procurement in certain Member States or regions. Frontrunners can also use the EU Ecolabel, the EU voluntary label for environmental excellence, for their products. This directs consumers to the best-performing goods and services on the market. The number of EU Ecolabel products on the market – now more than 78000 - have doubled in the last five years. Companies developing innovative environmental technologies can also get a third-party assessment of the performance reached by their technologies, based on independent tests, through the <u>Environmental Technology Verification (ETV)</u> scheme. This will help them differentiate their technologies and gain more credibility on the EU or international markets. The European Commission is also working on a legislative initiative on sustainable product policy that may consider rewarding products based on their different sustainability performance, including by linking high performance levels to incentives.			
18)	49. Calls on the Commission to ensure the full implementation and enforcement of the biodiversity provisions in all trade agreements, including through its Chief Trade Enforcement Officer; considers that the Commission should better assess the impact of trade agreements on biodiversity, including follow-up action to strengthen the biodiversity provisions of existing and future agreements, where relevant;	With regard to points 49 and 50, support for the Green Deal is a central pillar of trade policy and the Commission intends to enhance trade's contribution to the Green Deal objective accordingly. The preservation of biodiversity is a global challenge that requires global efforts and the Commission will use free trade agreements (FTAs) as platforms to engage with the EU's trade partners. The Trade Policy Review reinforces the focus of this Commission on effective enforcement and implementation. The appointment of the Chief Trade		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Green Deal, appointment of a Chief Trade Enforcement Officer, Implementation of the new biodiversity methodology that was published on 19 May 2021</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Enforcement Officer (CTEO) in 2020 highlighted this commitment. On the importance of systematically including a biodiversity dimension to all sustainability impact assessments (SIAs), the Commission is already assessing the impact of all trade agreements on biodiversity and is improving its methodology. Implementation of the new methodology that was published on 19 May 2021 will be important in both ex-ante SIAs and ex-post evaluations. Outcomes should indeed feed into FTA negotiation process. EU trade agreements include non-regression provisions aimed at preventing parties from weakening their environmental (and labour) protections in order to encourage trade or investment, and thus promote a level-playing field. These provisions are subject to a dedicated dispute settlement that covers Trade and Sustainable Development (TSD) chapters. The Commission have strengthened the implementation and enforcement of TSD provisions in EU trade agreements, including with adoption of the TSD 15-points Action Plan, the establishment of the CTEO and Single Entry Point. The 2021 TSD review considers together with stakeholders further actions ensuring on effective implementation and enforcement of TSD provisions.</p>		<p><a href="#">TSD open public consultations</a> were closed on 5 November 2021.</p>	
19)	<p>50. Calls on the Commission to ensure the enforcement of provisions regarding establishing or maintaining a level playing field on environmental issues in EU trade agreements, where those provisions are part of such an agreement;</p>	<p>With regard to points 49 and 50, support for the Green Deal is a central pillar of trade policy and the Commission intends to enhance trade's contribution to the Green Deal objective accordingly. The preservation of biodiversity is a global challenge that requires global efforts and the Commission will use free trade agreements (FTAs) as platforms to engage with the EU's trade partners. The Trade Policy Review reinforces the focus of this Commission on effective enforcement and implementation. The appointment of the Chief Trade Enforcement Officer (CTEO) in 2020 highlighted this commitment. On the importance of systematically</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (<a href="#">Green Deal, appointment of a Chief Trade Enforcement Officer, Implementation of the new biodiversity methodology that was published on 19 May 2021</a>).</p> <p><a href="#">TSD open public consultations</a> were closed on 05 November 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>including a biodiversity dimension to all sustainability impact assessments (SIAs), the Commission is already assessing the impact of all trade agreements on biodiversity and is improving its methodology. Implementation of the new methodology that was published on 19 May 2021 will be important in both ex-ante SIAs and ex-post evaluations. Outcomes should indeed feed into FTA negotiation process. EU trade agreements include non-regression provisions aimed at preventing parties from weakening their environmental (and labour) protections in order to encourage trade or investment, and thus promote a level-playing field. These provisions are subject to a dedicated dispute settlement that covers Trade and Sustainable Development (TSD) chapters. The Commission have strengthened the implementation and enforcement of TSD provisions in EU trade agreements, including with adoption of the TSD 15-points Action Plan, the establishment of the CTEO and Single Entry Point. The 2021 TSD review considers together with stakeholders further actions ensuring on effective implementation and enforcement of TSD provisions.</p>			
20)	52. Calls on the Commission to enforce the application of sanctions established under the ECD;	<p>As for point 52, the Commission during its revision of the ECD is assessing ways to introduce a broader and more precise range of sanctions types and levels that must be available for environmental crime in the Member States to come to more appropriate sanctions in practice. The EU has no competence to enforce particular sanction levels to be imposed in the individual case.</p> <p>The Commission is conscious that the effectiveness of the ECD is dependent on the effectiveness of the 'enforcement chain', i.e. the work of environmental inspectorates and law enforcement agencies in detecting, gathering evidence on and preparing dossiers on crimes and infringements; the work of environmental</p>		<p>The Commission recently evaluated the Directive, and found that it did not meet its objectives in its <a href="#">2020 evaluation</a>. A <a href="#">proposal</a> for a revised ECD was submitted the 15 December 2021.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		prosecutors in preparing cases for trial;and the work of courts in adjudicating on cases that come to trial. Measures to strengthen the 'enforcement chain' will also be considered in the context of the revision of the ECD.			
21)	53.Calls on the Commission, in this regard, to ensure that corporate social responsibility in preventing and remedying environmental harm is taken into account in procurement contracts and the allocation of public funds;	With regard to point 53, introducing specific sustainability and transparency requirements and criteria in public procurement can strongly support and incentivise responsible business behaviour. The Commission actively promotes the uptake of environmental and social criteria in public procurement across the EU, mainly by providing guidance and support tools to public buyers. The Commission develops and updates regularly sectoral green public procurement (GPP) criteria, and has issued guidance and a training toolkit on GPP. Furthermore, under the Circular Economy Action Plan, it committed to introduce mandatory GPP requirements in sectoral legislation. The proposal for the new Batteries Regulation is the first among these initiatives to be published.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">GPP</a> , Circular Economy Action Plan).	
22)	54.Calls on the Commission to come forward with a proposal for environmental inspections at EU level without further delay, as proposed by the Environmental Compliance and Governance Forum in action nine of its work programme, but is of the opinion that a recommendation to establish minimum criteria for environmental inspections is not enough;	With regard to point 54, the Commission has no current plans to make a general proposal on environmental inspections at EU level. Under its <i>Chemicals Strategy for Sustainability, Towards a Toxic-Free Environment</i> , however, the Commission will propose to entrust the Commission with the duty to carry out audits in Member States, where relevant, to ensure compliance and enforcement of chemicals legislation, in particular REACH (COM(2020) 667 final).		No further/specific actions proposed/promised to be taken by the Commission.	
23)	55.Calls on the Commission to promote action by the EU, its Member States and the international community to step up efforts against environmental crime; calls on the Commission and the Member States to raise awareness and promote solutions in international forums;	The Commission fully shares the importance of the international dimension mentioned in point 55, not only when it comes to specific kinds of environmental crime such as waste and wildlife trafficking but also when it comes to globally important issues such as preventing dangerous climate change and the loss of biodiversity.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Guidance on combatting environmental crime</a> ).	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>The above-mentioned Guidance on combatting environmental crime and related infringements describes in its Chapter 9 the European and international dimensions of coordination and cooperation. The limits of EU competence need to be borne in mind, however. For example, the EU is not a party to several important international frameworks such as The United Nations Convention against Transnational Organised Crime ('UNTOC') and the Rome Statute governing the International Criminal Court.</p>			

4.1.21.6. JURI Resolution 6: EP resolution of 24 June 2021 on regulatory fitness, subsidiarity and proportionality - report on Better Law Making 2017, 2018 and 2019

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<p><b>Regulatory fitness, subsidiarity and proportionality - report on Better Law Making 2017, 2018 and 2019</b></p>	<p>24/06/2021 <a href="#">T9-0316/2021</a> <a href="#">2020/2262(INI)</a> JURI</p>	<p>On 9 August 2021, the Parliament received "<a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – June II 2021 part-session " informing that the Commission will not be responding formally to the requests addressed in the resolution as the key questions were addressed in plenary by Commissioner Jutta Urpilainen on behalf of Vice-President Maroš Šefčovič.</p> <p>The <a href="#">plenary debate</a> took place on 23 June 2021.</p>			
1)	<p>3. [...] encourages the Commission to bring the EU closer to its citizens; points out that local and regional authorities implement and use approximately 70 % of EU legislation;</p>				
2)	<p>9. [...] calls on the Commission to implement these conclusions, and in particular to better involve local and regional authorities fully in its consultation processes, and to integrate the 'model grid', in order to assess the application of both principles throughout the decision-making process; [...]</p>				
3)	<p>17. Recalls that the Commission is obliged to consult as widely as possible with stakeholders prior to any legislative proposal, taking into account the regional and local dimension of the action envisaged;</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
4)	29. Welcomes the establishment of the 'Have Your Say' web portal and improvements thereto and calls on the Commission to further develop such tools, giving citizens and stakeholders direct access to, and involvement in, EU policy-making;				
	33. Urges the Commission to make even greater use of recasting and codification procedures in order to streamline secondary legislation;				
5)	40. Recalls that EU legislation generally replaces 27 diverging rules, which helps to reduce the fragmentation of the internal market; calls on the Commission, when assessing subsidiarity and proportionality, to ensure that initiatives aimed at achieving a deeper and fairer internal market remain a key pillar of future annual programming, while maintaining a high level of consumer protection;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
6)	41. Stresses that better law-making objectives need to be regularly reviewed and evaluated against the criteria of the better law-making agenda, including monitoring and reporting; underlines that the objectives need to be well balanced and evaluated in terms of their effectiveness, taking account of the resources deployed for activities on better regulation and for external contributions; recalls the importance of comparable EU-wide data for the purpose of this evaluation and calls on the Commission to examine whether the use of the better regulation tools have served to achieve objectives such as improved policy outcomes;				
7)	42. Calls on the Commission to take this resolution into account in the drafting of its announced communication on better regulation;				

## 4.1.21.7. JURI Resolution 7: EP resolution of 11 November 2021 on an intellectual property action plan to support the EU's recovery and resilience

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>An intellectual property action plan to support the EU's recovery and resilience</b>	11/11/2021 <a href="#">T9-0453/2021</a> <a href="#">2021/2007(INI)</a> JURI	N.A. <sup>31</sup>					
1)	2. [...] calls on the Commission to continue supporting European companies' ability to innovate on the basis of a comprehensive IP regime in order to maintain effective protection for their R&D investments, secure fair returns through licensing, continue developing open technology standards that support competition and choice and ensure the participation of EU industry in the development of key technologies at global level;						
2)	3. [...] asks the Commission, the European Patent Office (EPO) and the EUIPO to consider extending these initiatives to all kinds of IP assets and to identify further measures to promote the benefits of IPR registration for the development of SME activities;						
3)	4. Is convinced that support for SMEs, including financial and non-financial measures, is the right way to provide them with better knowledge and to facilitate their access to IPRs and that the Union's financial and legal instruments are of the utmost importance in this regard; calls on the Commission and the EUIPO, therefore, to continue						

<sup>31</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	implementing IP management support measures for SMEs and micro-enterprises during the economic recovery, including the provision of one-stop shop access to information and related services and advice about IP; stresses that this support will help to leverage and promote all national and regional initiatives of members of the European Union Intellectual Property Network (EUIPN);				
4)	5. [...] calls on the Commission to consider the possibility of introducing EU-level utility model protection, which is currently not available;				
5)	8. Welcomes the one-stop-shop alternative dispute resolution system to be established under Article 35 of the UPC Agreement, which does not interfere with current national systems, so that parties' right to justice is not undermined; asks the Member States to enable the quick roll-out of the patent arbitration and mediation centre, and calls on the Commission to assess whether the centre could, in the medium or long term, deal with all IP disputes; [...]				
6)	9. Stresses that the supplementary protection certificate (SPC) regime within the EU, while of great practical relevance, suffers from fragmented implementation across the Member States; urges the Commission to issue guidelines for the Member States and to address this fragmentation, including by legislative proposals based on an exhaustive impact assessment;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
7)	11. Asks the Commission, in the absence of a unitary SPC title, to ensure coherence between the upcoming unitary patent and current SPC regimes within the EU by clarifying that national SPCs may be granted by national patent offices on the basis of a unitary patent;				
8)	14. Underlines the important role played by public investments in R&D, and calls on the Commission and the Member States to ensure that the results of publicly financed R&D in the pharmaceutical sector are transparent, so that patenting and licensing conditions guarantee a public health return on public investments;				
9)	17. Asks the Commission to further investigate, together with the relevant actors, the requirements for an independent, neutral and transparent system of third party essentiality checks by identifying the demand for, assessing the impact of and defining the role that resources such as emerging technologies like AI and related technologies and/or technical expertise contributed by the EPO could play in that context, and to use the knowledge gained as input for the legislative initiative on SEP envisaged for the beginning of 2022 based on appropriate impact assessments;				
10)	18. Acknowledges the importance of a balanced licensing system for SEPs and insists on the importance of stable, efficient and fair rules for this; underlines that 'fair, reasonable and non-discriminatory terms' (FRAND) are vague legal terms that include legal uncertainty, and calls on the Commission to monitor industry developments and provide more clarity on various aspects of				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	FRAND as well as case law and including through designating an observatory (competence centre) for this purpose; recalls Parliament’s previous call for the Commission to publish annual reports evidencing actual cases of non-compliance with FRAND and so-called patent ‘hold-ups’ and patent ‘hold-outs’;				
11)	19.[...] calls on the Commission to continue observing the conduct of third country companies in international standardisation bodies which, together with recent decisions by foreign courts, places European companies at a significant disadvantage by undermining the competitiveness of the European market;				
12)	20.[...] and therefore asks the Commission to cooperate with the relevant stakeholders in order to find an approach to this issue and to address it;				
13)	28.[...] expects the Commission to propose legislation on this as soon as possible and by the end of 2021 at the latest;				
14)	32. Stresses that the current design protection system at EU level was established 20 years ago and should be revised; welcomes therefore the Commission’s willingness to modernise Union legislation on design protection in order to better support the transition to the digital, sustainable and green economy; calls on the Commission on the one hand to update the registration procedure to allow for new forms of design, such as graphical				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	user interfaces, virtual and animated designs, fonts and icons, and those relevant following new developments and technologies to be protected in an easy and less burdensome way, and on the other hand to further harmonise the application and invalidation procedures in the Member States;				
15)	33. Notes that design protection for parts used for the repair of complex products is only partially harmonised; points out that some Member States have already introduced a 'spare parts exception' or 'repair clause' into their legislation, allowing for component parts of complex products to be manufactured and sold without infringing IPRs; notes that this creates fragmentation in the internal market and legal uncertainty; calls on the Commission, therefore, to include a 'repair clause' in its future proposal, which will contribute to support the transition towards a more sustainable and greener economy and avoid distortions of competition;				
16)	34. Believes that the EU design protection system should be aligned with the EU trademark system in order to allow for design holders to prevent design infringing goods to enter into the EU's customs territory, since rights attached to trademarks are enforceable against infringing goods transiting through the EU, while those attached to design are not; calls on the Commission to close this gap in the revision of the design legislation and make it possible for brand owners to put a stop to design counterfeits transiting through the EU;				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
17)	<p>37. Highlights that in 2016 up to 6,8 % of EU imports, or a value of EUR 121 billion, were fake goods, and that their availability on the single market caused direct sales losses worth EUR 50 billion and approximately 416 000 direct job losses for the period 2013-2017<sup>32</sup>; points out that IPR infringement entails a low level of risk in terms of both the likelihood of detection and the sanction if detected; urges the Member States, together with the Commission, customs authorities, the EU Agency for Law Enforcement Cooperation (Europol), Interpol, and law enforcement authorities to coordinate strategies and to develop effective and dissuasive sanctions particularly in order to limit the amount of hazardous products made available to the public and to fight counterfeiting and piracy especially when it is connected to organised crime;</p>				
18)	<p>41. Welcomes the fact that the Commission intends to come up with a EU toolbox against counterfeiting in order to ameliorate cooperation between rights holders, public authorities, law enforcement authorities at national and EU level, and intermediaries by further clarifying roles and responsibilities, with the aim of facilitating effective information and data sharing between key actors, promoting the use of new tools and the tackling of counterfeiting activities; calls on the Commission to take concrete actions to monitor wilful infringement of IPRs, including where infringement is used in bad faith as a deliberate commercial</p>				

<sup>32</sup> EUIPO, 2020 Status Report on IPR infringement: average annual figures, 2013-2017.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	strategy, and to push for greater control and cross-border cooperation between customs agencies as part of the fight against the import of counterfeit products; calls the Commission to consider creating a similar EU toolbox to fight against other IPR infringements;				
19)	43. Calls on the Commission to continue protecting IPRs and promoting enforcement in non-EU countries, including through an increase in funding for targeted EU technical cooperation programmes and capacity building, such as the three ongoing IP Key cooperation programmes with China, South-East Asia and Latin America and the joint partnership with the African continent to promote better generation and management of IP, and by supporting IP regimes that enhance local agricultural development; encourages, in this context, the Commission, on the basis of the EU's experience, to assist policymakers and enforcement authorities and provide them with knowledge and guidelines for improving their capacity to tackle IPR infringements, and to promote feasible solutions, which could significantly reduce costs and simplify the procedures for obtaining, maintaining and enforcing the protection of IPRs, as well as to provide information to rights holders about the changing infringement landscape and the supply of counterfeit goods;				
20)	44. Highlights that IP protection related to AI technologies is important and should be duly considered, and that even though current rules on the protection of computer-implemented				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	inventions by patents may cover AI technologies, there is a need for clear criteria for the protection of inventions generated with the assistance of AI technologies; asks the Commission, therefore, in cooperation with the EPO and EUIPO, to provide legal certainty on this subject and to follow the issue closely at international level in the WIPO;				
21)	45. Encourages the Member States to transpose the provisions of the Copyright Directive without delay and in a manner which reflects the agreement struck by the co-legislators to improve the protection it provides, and to allow exceptions such as access to online education and digitised cultural heritage; calls on the Commission to monitor buy-out contracts to ensure fair remuneration of creators based on copyright or authors' rights; [...]				
22)	48. Regrets the fact that the Commission's 2016 study on patent assertion entities (PAE) in Europe <sup>33</sup> did not provide a clear answer to the question of whether some PAE's business models, consisting of acquiring patents from third parties and seeking to generate revenue by asserting them against alleged infringers by misusing litigation asymmetries abuse loopholes in current legislation, and therefore constitute a problem that should be tackled; encourages the Commission to continue to monitor this issue and carry out a corresponding in-depth study;				

<sup>33</sup> European Commission Joint Research Centre, *Patent Assertion Entities in Europe: Their impact on innovation and knowledge transfer in ICT markets*, 2016.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
23)	<p>50. Notes that IPR protection is key to incentivising research and production of innovative products and processes, including new medicines, but is convinced that to fight global health emergencies, address the accessibility of certain medical products, and allow life-saving interventions in the public interest voluntary pooling of patents, compulsory licensing and flexibilities provided for in the WTO TRIPS Agreement are important; calls on the Commission, therefore, to analyse and explore possible options for ensuring effectiveness and better coordination of compulsory licensing in the EU, taking into account cases in which it has been used in the Union, the reasons for its use, the conditions under which it was granted, its economic consequences and whether it achieved the desired effect;</p>				
24)	<p>51. Stresses that a more equitable distribution of vaccines around the globe is essential for effectively combating the spread of COVID-19 and its mutations, and the need to support global access to COVID-19 vaccines; notes that the lack of access to affordable vaccines is still a major challenge in developing countries; supports, therefore, the Commission and the Member States in their efforts to push non-EU countries to lift current export bans and to step up the donation of vaccines; calls on the Commission and the Member States to further increase their efforts to support technology transfer and voluntary licensing of IPRs in order to enhance global access to affordable COVID-19-related medical products, to address global production constraints and supply shortages, and to thereby</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	treat endemic or pandemic infectious diseases in the world population;				
25)	52. Welcomes the fact that least developed countries already enjoy a waiver, granted until 1 January 2033, on the implementation of TRIPS provisions on pharmaceuticals; urges the Commission, therefore, in cooperation with the WTO, to follow through on its promise to engage in active and constructive text-based negotiations at the WTO in order to work on incentivising and supporting the scaling up of vaccine production capacities in developing countries and incentivising voluntary and rapid pooling of IPR in times of crisis as well as voluntary licensing agreements, and to launch a dialogue on current obstacles to voluntary licensing and how to overcome them;				
26)	55. Recalls that IPR-intensive industries generate the bulk of EU trade activities and that also protecting and enforcing IPRs in third countries is essential; welcomes the Commission's commitment to seek robust protection for IP in future free trade agreements; asks the Commission to call for IPRs enforcement to be addressed at the World Trade Organization (WTO) and WIPO;				

#### 4.1.22. JURI/LIBE

Between July 2019 and December 2021, the Joint Committees - Committee on Legal Affairs (JURI and Committee on Civil Liberties, Justice and Home Affairs (LIBE) were responsible for one 'ordinary' own-initiative report (INI) and no legislative own-initiative report (INL) leading to the adoption of one Parliament's resolutions ('JURI/LIBE resolution'). The table below provides a summary of the analysis based on the data contained in the resolutions. By 31 January 2022,<sup>1</sup> the reply from the Commission was not received, nevertheless and the Commission was still in deadline to send the follow-up. Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

Table 27: Overview on JURI/LIBE resolutions and its follow-up (July 2019 and December 2021)

Resolutions and follow-up analysis	Quantifications

### Analysis of the Commission follow-up documents and the replies provided

By the cut-off date for the present study (31 January 2022), the Commission had not yet replied to the JURI/LIBE resolution. Nevertheless, the Commission was still in the deadline to respond formally to this resolution.

### Analysis of the Commission actions

No analysis possible, due to the lack of a written Commission reply.

## 4.1.22.1. JURI/LIBE Resolution 1: EP resolution of 11 November 2021 on strengthening democracy, media freedom and pluralism in the EU

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Strengthening democracy, media freedom and pluralism in the EU</b>		11/11/2021 <a href="#">T9-0451/2021</a> <a href="#">2021/2036(INI)</a> JURI LIBE	N.A. <sup>5</sup>					
1)	1. [...] calls on the Commission to also issue country-specific recommendations and assess their progress, including on issues concerning the situation of media freedom within the Member States;							
2)	17. [...] calls on the Commission and Member States to develop an ambitious, robust and complete legal framework in its future Media Freedom Act; [...]							
3)	21. [...] encourages the Commission to analyse anti-SLAPP best practices currently applied outside the EU which could provide valuable inspiration for Union legislative and non-legislative measures on the matter; [...]							
4)	22. [...] urgently calls the Commission to present proposals for binding Union legislation on common and effective safeguards for victims of SLAPPs across the Union, including through a directive establishing minimum standards for protection against SLAPPs, respecting rights and principles enshrined in the Charter; [...]							

<sup>5</sup> Manuscript completed in March 2022 reflecting the situation as of 31 January 2022.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	24. Considers that it is essential to adopt a legislative measure protecting the role of SLAPP victims in preventing, reporting and denouncing breaches of Union law and ensuring the proper functioning of the internal market and full respect for fundamental rights; urges the Commission to present a proposal for legislation that sets out common safeguards for persons investigating and reporting on or otherwise exposing these matters of public interest;				
6)	25. Urges the Commission to present a proposal for a measure to address SLAPP cases such as rules for the early dismissal of SLAPPs and other court actions that have the purpose of preventing public participation, which should include appropriate sanctions such as civil penalties or administrative fines, consideration of abusive motives even if the lawsuit or action is not dismissed, costs and damages suffered by the victim (economic, reputational, psychological or otherwise); stresses that the modalities for applying for an early dismissal should take account of the challenges faced by SLAPP victims, in particular by requiring that the claimant justifies why the action is not abusive, allocating the legal costs of procedures to the claimant and granting legal and financial support to the defendant; strongly encourages Member States to also apply such civil procedure safeguards to domestic SLAPPs cases and not just to cross-border cases; calls on the Commission, further, to address issues giving rise to forum shopping and libel tourism in the forthcoming review of the Brussels I and Rome II Regulations while also taking account of work carried out at The Hague Conference on Private International Law; calls on the Commission, finally, to raise awareness among judges and prosecutors				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>across the Union about SLAPPs, which including the provision of information on the need for early dismissal of such lawsuits, as well as on the proper implementation of the case law of the European Court of Human Rights on defamation;</p>				
7)	<p>28. Urges the Commission to address the seriousness of SLAPPs brought through criminal proceedings by presenting a proposal for measures to ensure that defamation, libel and slander, which constitute criminal offences in most Member States, cannot be used for SLAPPs through public or private prosecution; underlines the calls of the Council of Europe and OSCE for the decriminalisation of defamation; invites the Commission to address SLAPP as lawsuits that are used for purposes other than that of genuinely asserting or exercising a right; notes that defendants often face criminal charges while at the same time being sued for civil liability allegedly arising from the same conduct, and invites the Commission to introduce common minimum procedural safeguards against combined SLAPPs;</p>				
8)	<p>39. Calls on the Commission to strengthen, in the framework of the annual mechanism on democracy, the rule of law and fundamental rights, the regular, inclusive and structured dialogue with national authorities, NGOs, professional associations and other stakeholders in order to protect and support</p>				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	journalists, and other civil society representatives at risk of SLAPPs, prosecution or harassment;				
9)	40. Calls on the Commission to come forward with proposals on the basis of the annex to this resolution;				

### 4.1.23. LIBE

Between July 2019 and December 2021, the **Committee on Civil Liberties, Justice and Home Affairs (LIBE)** was responsible for fifteen ‘ordinary’ own-initiative reports (INI) and one legislative own-initiatives report (INL) leading to the adoption of sixteen Parliament’s resolutions (‘LIBE resolution’). The table below provides a summary of the analysis based on the data contained in the resolutions, the Commission written follow-up documents as well as the Commission replies to positions and resolutions adopted by the European Parliament that the Commission did not respond formally. Moreover, it shows the types of the actions taken by the Commission by 31 January 2022,<sup>1</sup> based on the information available on the Commission website.<sup>2</sup> Finally, further down in this section, please find brief information on:

- the analysis of the Commission follow-up documents and the replies and
- the analysis of the Commission actions.

### Analysis of the Commission follow-up documents and the replies provided

The Commission sent 15 written replies to the Parliament's 15 LIBE resolutions. In 14 cases, the Commission provided its written replies after the 3-month period prescribed by the Framework Agreement (point 16). The other one reply, sent by the Commission within the 3-month period, was in the form of a document informing that the Commission will not be responding formally to the requests addressed in the INI resolutions. In total, the Commission submitted five specific and three general replies as well as seven mixed replies. The Commission has not replied with written follow-up documents to 10 of Parliament's 189 requests.

### Analysis of the Commission actions

The Commission proposed/promised 58 genuine actions. In 89 cases, no further specific actions were proposed/promised to be taken by the Commission and in 27 cases it remained unclear if an action was carried out. In 21 cases, due to the lack of reply to the Parliament's request, no action was mentioned.

Among the 58 actions proposed/promised by the Commission, the Commission already carried out the action in 27 cases. In the 31 remaining cases, the implementation of the action is still pending and needs to be followed at a later stage.

4.1.23.1. LIBE Resolution 1: EP resolution of 10 July 2020 on conclusion of an EU - New Zealand agreement, under negotiation, on the exchange of personal data for fighting serious crime and terrorism

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Conclusion of an EU - New Zealand agreement, under negotiation, on the exchange of personal data for fighting serious crime and terrorism</b>		10/07/2020 <a href="#">T9-2020/0200</a> <a href="#">2020/2048(INI)</a> <b>LIBE</b>	<a href="#">SP(2020)452</a>	Final reply (SP) received on 8 December 2020	Mixed reply			
1)	1. Encourages the Commission to expeditiously launch negotiations with New Zealand on the exchange of personal data between Europol and the New Zealand authorities competent for fighting serious crime and terrorism in full respect of the negotiating guidelines adopted by the Council; calls on the Commission to follow the additional recommendations set out in this resolution;		Most of the recommendations included in the resolution of the European Parliament are non-controversial and already catered for in the Council negotiating directives.				No further/specific action proposed/ promised to be taken by the Commission.	
2)	8. Urges the Council and the Commission to work with the Government of New Zealand to define, pursuant to Court of Justice case law and within the meaning of Article 8(3) of the Charter, which independent supervisory authority vested with effective powers of investigation and intervention is to be in charge of supervising the implementation of the international agreement;		Several points (../..) touched upon by the resolution are already included in the Council negotiating directives. The Commission agrees with the European Parliament [...] The need to establish an independent public authority responsible for data protection with effective powers of investigation and intervention able to exercise oversight.				No further/specific action proposed/ promised to be taken by the Commission.	
3)	11. Calls on the Council and the Commission to consult the EDPS on the provisions of the draft agreement before its finalisation and throughout the negotiations;		Bearing in mind that the negotiations have not started yet at the time of writing of the present fiche, the Commission takes good note of the recommendations of the European Parliament pertaining to: [...] The consultation of the European Data Protection Supervisor (EDPS).				No further/specific action proposed/ promised to be taken by the Commission.	

#### 4.1.23.2. LIBE Resolution 2: EP resolution of 17 September 2020 on implementation of National Roma Integration Strategies: combating negative attitudes towards people with Romani background in Europe

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Implementation of National Roma Integration Strategies: combating negative attitudes towards people with Romani background in Europe</b>	17/09/2020 <a href="#">T9-0229/2020</a> <a href="#">2020/2011 (INI)</a> LIBE	<a href="#">SP(2020)597</a>	Final reply (SP) received 11 February 2021	Mixed reply			
1)	1. Notes that Romani people are subject to persistent antigypsyism - a specific form of racism - leading to the highest rates of poverty and social exclusion; notes with regret that despite continuous socio-economic development in the EU and efforts to ensure Romani inclusion both at EU and national level, the overall situation of the Romani people in the EU did not improve; often due to persistent antigypsyism and to the lack of political will; therefore calls on the Commission to lead by example and introduce a "Romani mainstreaming policy" in order to integrate the perspective of the Romani people at all stages and levels of mainstream policies, programmes and projects, but without excluding the targeted approach, and to prevent discrimination in the EU policy in general and facilitate affirmative action and active outreach to Romani people;	The Commission promotes the mainstreaming of Roma equality, inclusion and participation in all relevant EU policy initiatives and Union funds. The EU Roma strategic framework aims to combine effective mainstreaming (explicit but not exclusive) and targeting, including facilitation of the affirmative action and active outreach to Roma people. It asks Member States to spell out in their national Roma strategic frameworks how mainstream policies will be made more inclusive of Roma people needs. The Commission also promotes inclusive reform of mainstream policies under the European Semester and when negotiating the programming of 2021-2027 EU funds, considering also ongoing infringement cases under the Racial Equality Directive.				No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
2)	2. Calls on the Commission to submit a legislative proposal for the Equality, Inclusion, Participation of Romani people and Combating Antigypsyism, on the basis of a thorough impact assessment and in systemic consultations with Romani people, (pro-) Romani experts and NGOs from national, regional and especially from grassroots level as well as other interested stakeholders such as the Council of Europe and FRA; considers that this proposal could be based on Article 19 (2) of the Treaty of the Functioning of	The EU has adopted a number of binding legal instruments to ensure equality and non-discrimination that are crucial for fighting antigypsyism and discrimination against Roma: the Racial Equality Directive and the Framework Decision on combatting Racism and Xenophobia are both transposed by the Member States. The Racial Equality Directive prohibits (direct and indirect) discrimination, including harassment, based on ethnicity in a number of areas relevant for the EU Roma strategic framework (education, employment, social				The 19 March 2021 the Commission published the <a href="#">implementation report on the racial equality directive</a> .  The <a href="#">EU Framework for National Roma Integration Strategies</a> up to 2020 ended, while a new policy initiative was being prepared, integrating the lessons of the COVID-19 pandemic.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>the European Union as appropriate action to combat discrimination based on ethnic origin of Romani people; <i>is of the opinion that the previously used Council recommendation is not a sufficient form of act, as it was not legally binding and has failed to make a significant positive impact on the Romani people</i>; calls on the Commission to take into account the internal heterogeneity of the community in the priority domains of the post 2020 proposal, ensuring that nobody is left behind, and strongly encourages to use the designation ' Romani people' when referring to Romani groups in post 2020 EU policies and discussions; notes that equal participation in all domains of public life, political participation, and the language, arts, culture and history of Romani people should be explicitly mentioned in the post-2020 EU proposal for Romani people, as additional measures to the four main priority areas of education, employment, housing and healthcare;</p>	<p>protection, including social security and healthcare, social advantages, and access to and supply of good and services available to the public).</p> <p>The EU anti-racism action plan adopted by the Commission in September 2020 is providing a framework to address individual and structural racism in the EU, including antigypsyism. In terms of legislation, it announces that the Commission will report on the implementation of the Racial Equality Directive in 2021 and will present, by 2022, any legislation required to address shortcomings, including to strengthen the role and independence of equality bodies.</p> <p>[...]</p> <p>The 2013 Council Recommendation on effective Roma integration measures<sup>7</sup> in the Member States was the first EU soft law instrument to target Roma explicitly. The Commission carried out an in-depth evaluation of the EU Framework in 2018, which proved the recommendation's added value.<sup>8</sup> At the same time, the evaluation also showed a need to renew and step up the commitment to Roma equality. The objective of the recently adopted Commission proposal for a draft Council recommendation on Roma equality, inclusion and participation<sup>9</sup> is precisely to ensure that the Commission and the Member States work hand-in-hand and endorse the guidelines of the Commission. Together the communication of the Commission<sup>10</sup> and the Council recommendation will form the new EU Roma strategic</p>		<p>The 7 October 2020 the Commission had published its new <a href="#">strategic framework on equality inclusion and participation</a>.</p> <p>The Commission undertook targeted consultation activities with key stakeholders to discuss forward-looking questions and gather input to feed reflections on the new initiative The Commission undertook targeted consultation activities with key stakeholders to discuss forward-looking questions and gather input to feed reflections on the new initiative. <sup>9</sup> COM(2020) 621 final.

<sup>10</sup> COM(2020) 620 final.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>framework for equality, inclusion and participation up to 2030. Commission documents provide a specific focus on non-discrimination, spell out specific measures to be taken by the Member States in order to achieve common EU objectives and targets, outline the importance of capacity-building and partnerships between stakeholders, provide guidance for ensuring a better use of EU and national funds, as well as for improving the monitoring, reporting and evaluation of the national Roma strategic frameworks and the EU Roma strategic framework.</p> <p>The Commission uses the umbrella term 'Roma' as introduced by the Council of Europe<sup>11</sup> and adopted in the Strasbourg Declaration. In the context of the new EU Roma strategic framework for equality, inclusion and participation and other EU policy documents, 'Roma' is used as an umbrella term encompassing a wide range of different people of Romani origin such as: Roma, Sinti, Kale, Romanichels and Boyash/ Rudari. It also encompasses groups such as Ashkali, Egyptians, Dom, Lom, Rom and Abdal, as well as traveller populations, including ethnic Travellers, Yenish or those designated under the administrative term 'Gens du voyage' and people who identify as Gypsies, Tsiganes or Tziganes, without denying their specificities. While the Commission is aware that applying the term 'Roma' to all these groups does not reflect the cultural and language diversity among all groups, it considers the use of an umbrella term in policy documents and discussion justifiable to address the similar challenges in respect of equality and inclusion. The 'United in diversity' motto of the European</p>			

<sup>11</sup> This terminology was approved by the Council of Europe on 20 October 2010 at the high-level meet on the Roma with the adoption of the Strasbourg Declaration.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>Union applies in this context too, without any intention to disregard cultural identities.</p> <p>Most importantly, the Commission wishes to focus on promoting and guiding a swift development of more effective national strategic frameworks for Roma equality, inclusion and participation that cover and address the needs of all groups represented in the Member States and beyond, and in all their diversity. This is important, as effective measures require also inside knowledge and analysis of the specific context.</p> <p>[...]</p> <p>As a pre-condition for tackling exclusion, the Commission supports meaningful Roma participation in policy-making at local, national and EU level. The EU Roma strategic framework was largely informed by extensive consultations with a wide range of Roma and pro-Roma stakeholders who shared their reflections on the post-2020 initiative<sup>12</sup>. When coordinating the development of national strategic frameworks, National Roma Contact Points are encouraged to promote participatory models. The EU-level targets of the strategic framework aim to ensure participation of Roma <i>non-governmental organizations</i> (NGOs) as full members of national monitoring committees for all programmes addressing the needs of Roma; double the proportion of Roma who file a report when they experience discrimination; encourage participation of Roma in political life at local, regional and EU levels; capacitate and engage at least 90 NGOs in the EU-wide through Roma Civil Monitoring<sup>13</sup>.</p>			

<sup>12</sup> For a detailed overview of these consultations, see Annex 1 to the Staff Working Document accompanying the communication, SWD(2020) 530 final.

<sup>13</sup> The Preparatory Action Roma Civil Monitoring, funded by the European Parliament aims to build capacities of mainly Roma NGOs and support their participation in monitoring and reviewing the national Roma inclusion strategies.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>[...]</p> <p>Raising awareness about Roma arts, history and culture is a separate horizontal section of the strategic framework that provides guidance to the Member States on how to take adequate action in this area. Promotion of Roma arts, history and culture also features as one of the measures recommended for Member States to fight antigypsyism</p>			
3)	<p>5. Calls on the Commission to strengthen the link between EU mainstream financial and policy instruments and objectives related to the socio-economic development and inclusion of Romani people set out by the Commission's legally binding proposal; calls on the Commission to mobilise funding for Romani equality, inclusion and participation under the Multi-Annual Financial Framework 2021-2027 and EU Recovery Plan; insists in this respect that entities that engage in discriminatory practices against Romani people, or take decisions or implement measures to this effect, should not be eligible for funding from the Union's budget; calls upon the Commission, Member States and enlargement countries to adjust the existing mainstream financial mechanisms and make them flexible for blended use of funds in Romani communities by enabling access to information, outreach, capacity building, delivery of technical assistance and guarantees during the funding application process; is of the opinion that funds are often most effectively spent at local level by local governments and NGOs, therefore calls on the Commission to increase the funds distributed directly</p>	<p>Consolidated reply 5-30-33</p> <p>The specific objective (viii) in Article 4(1) of the European Social Fund+ (ESF+) refers to promoting the socio-economic integration of marginalised communities such as the Roma<sup>14</sup>. This objective is linked to the thematic enabling condition 4.3.2 of having a national Roma inclusion strategic policy framework in place (Annex IV of the Common Provisions Regulation).</p> <p>The Commission's proposals for the Common Provisions Regulations, the ESF+, the European Regional Development Fund (ERDF), and the <i>European agricultural fund for rural development</i> (EAFRD) provide financial support for the implementation of national Roma strategic frameworks and measures, including human capacity, infrastructure and capacity building activities. They also include several instruments, which can reinforce the implementation of comprehensive measures, such multi-fund programmes, territorial instruments (e.g Community-led Local Developments, etc.). These instruments should help to respond to complex needs of marginalised Roma communities.</p> <p>In line with the new EU Roma strategic framework, Member States where Roma inclusion related investment</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>

	opened 3 infringement procedures on segregation of Romani children; is of the opinion that the last years have shown no improvement despite the Commission's efforts; therefore calls on the Commission to take further steps and refer these cases to the European Court of Justice if necessary;				
14)	39. Is of the opinion that COVID-19 made necessary the active use of information and communication technologies (ICT) and methods; stresses however that the pandemic revealed insufficient preparedness in digital transformation as many families with Romani background and their schools are not equipped with adequate ICT tools and skills and are often unable to afford electricity and digital connectedness, considers that the possession of an ICT device is the turnkey point into digital education, therefore urges the Commission to create a pool of ICT tools and distribute it among the most vulnerable families and children to provide them with the basic tools for distant learning and prepare them for the digital age; considers that access to internet and ICT skills are a cornerstone of the forthcoming digital age for every citizen and as such it is essential for the empowerment of Romani people as well; therefore calls on the Commission to introduce the provisions related to internet access into the post-2020 proposal; [...]	The successful deployment of digital technologies and Europe's resilience and social fairness depend on people having access to the necessary infrastructure, equipment and digital skills. The Commission proposes that the Member States tackle the digital exclusion of marginalised Roma by providing access to digital technologies, in particular access to and support for online and distance learning if training and education institutions close, as during the COVID-19 pandemic. National Roma strategic frameworks should encourage synergies with other policy initiatives (especially related to online public, e-government and commercial services) and to boost digital skills and competencies among Roma. Moreover, the Commission adopted in September 2020 a <a href="#">new Digital education action plan</a> aiming to support the digital transition of education and training systems in Europe. <sup>23</sup> This initiative is extremely relevant for Roma, whose remote learning experience during the pandemic was one of heightened digital exclusion.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request ( <a href="#">Digital education action plan</a> ).	

<sup>23</sup> The new action plan will address lessons learnt and implications of the recent experience of online and distance learning due to the COVID-19 pandemic. The updated action plan will focus on boosting the digital capacity of educational institutions, including in terms of connectivity and equipment, and developing digital skills and competences for all.

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
15)	41. Stresses that housing is not a commodity, but a necessity, without which people cannot fully participate in society and access fundamental rights; calls on the Commission and the Member States to integrate in their policies the recommendations of the Council of Europe Human Rights Commissioner Report, "ECSR The Right to affordable housing, Europe's neglected duty", with particular reference to ensuring that all Member States promptly accept to be bound by Article 31 of the revised European Social Charter dealing with the right to housing, and step up investing in social and affordable housing to eradicate the housing cost overburden, particularly among marginalised groups;	Housing of many Roma people across the EU is of great concern and remains one of the biggest challenges as it greatly affects the inclusion prospects in all areas of life and even life expectancy. The Commission is committed to support the Member States in developing and strengthening Roma people access to adequate segregated housing and essential services.		Although the Commission is committed to support the Member states, there are no specific operational measures attached to this commitment.	
16)	46. Calls for the EU-wide implementation of the Aarhus Convention that links environmental rights and human rights; recommends that environmental injustices are integrated in the post 2020 proposal and call on the Commission to address the different forms of environmental discrimination;	The Commission recommends in the EU Roma strategic framework that Member States should recognise and tackle environmental discrimination, in particular as it affects marginalised Roma communities in segregated areas (as a manifestation of antigypsyism); promote understanding of how environmental discrimination and a lack of environmental services force marginalised Roma to live in environmentally degraded areas; focus on access to water, adequate sanitation, waste collection and management services etc.		No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.	
17)	49. [...] calls on the Commission and the Member States to assess whether policies are achieving the desired improvements for Romani women and girls, and to take action if there is a lack of progress;	No specific reply for this particular point, but (in relation to point24)  The EU Roma strategic framework promotes empowerment of Roma women, young people and children [...] to overcome socio-economic gaps, fully exercise their rights, realise their potential and be active agents of change  National Roma strategic frameworks should address multiple discrimination and intersectionality, establish specific goals and targeted measures for Roma women,		The Commission produced <a href="#">annual reports</a> (until 2020), to assess the EU Framework for National Roma integration strategies centred around four key areas: education, employment, healthcare and housing where special attention is given to women. The Commission makes recommendations to tackle the remaining challenges.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>children and young people and others and break down indicators by sex and age; address the gender dimension in all areas, especially education, employment, healthcare, child support and fighting (multiple) discrimination; promote participation and ensure that measures are gender-responsive; support Roma women's access to justice to prevent/ overcome exploitation, domestic violence and other human rights violations.</p> <p>Awareness of the consequences of multiple discrimination against Roma women will be aligned with the EU-wide communication campaign on combating gender stereotypes, which applies an intersectional approach to all spheres of life, as part of the gender equality strategy.</p>			
18)	51. Calls on the Commission and the Member States to include Romani girls and women more explicitly with active labour market policies, including the Youth Guarantee;		<p>No specific reply for this particular point, but</p> <p>The EU Roma strategic framework promotes empowerment of Roma women, young people and children (and Roma living with disabilities, elder Roma, LGBTI+ Roma and EU mobile citizens) to overcome socio-economic gaps, fully exercise their rights, realise their potential and be active agents of change (.../...)</p> <p>In line with the overall objectives of the 2019-2027 <a href="#">EU youth strategy</a> (to promote social inclusion and eradicate discrimination), the EU programmes for young people (e.g. Erasmus+ and the European Solidarity Corps) aim to improve social inclusion and equality. An inclusion and diversity strategy for youth activities under Erasmus+ includes action and support to overcome obstacles to participation, including those faced by minorities. Inclusiveness is a core goal for the <a href="#">European Solidarity Corps</a>.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p> <p>Nothing specific on labour market policies including Romani women.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
19)	<p>52. Calls on the Commission and Member States to ensure that the fundamental rights of Romani women and children are respected, and that – also by means of awareness-raising campaigns – Romani women and girls are aware of their rights under existing national legislation on gender equality and discrimination, and to further combat patriarchal and sexist traditions;</p>	<p>No specific reply for this particular point, but (Point 24) The EU Roma strategic framework promotes empowerment of Roma women, young people and children (and Roma living with disabilities, elder Roma, LGBTI+ Roma and EU mobile citizens) to overcome socio-economic gaps, fully exercise their rights, realise their potential and be active agents of change.</p> <p>National Roma strategic frameworks should address multiple discrimination and intersectionality, establish specific goals and targeted measures for Roma women, children and young people and others and break down indicators by sex and age; address the gender dimension in all areas, especially education, employment, healthcare, child support and fighting (multiple) discrimination; promote participation and ensure that measures are gender-responsive; support Roma women's access to justice to prevent/ overcome exploitation, domestic violence and other human rights violations.</p> <p>Awareness of the consequences of multiple discrimination against Roma women will be aligned with the EU-wide communication campaign on combating gender stereotypes, which applies an intersectional approach to all spheres of life, as part of the gender equality strategy.</p>		<p>Although the Commission is committed towards the promotion of gender equality and empowerment of Roma women and girls, including through an intersectional awareness raising campaign, it is unclear how much this is sufficient to ensure that Roma women and girls are aware of their national legislation.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
20)	54. Calls on the Commission to present a communication on guidelines and standards for discrimination-free recruitment policies for Member States and employers, including recommendations for the adoption of equality plans at company level and in sectoral collective agreements and the implementation of diversity taskforces in the workplace, including tackling stereotypes, prejudice and negative attitudes, preventing discrimination in recruitment, promotion, pay and access to training;	<p>The EU Platform for Diversity Charters was created in 2010 under the initiative of and funding from the Commission. By signing diversity charters, organisations, be it private undertaking or public institution, make a voluntary commitment to create and maintain an inclusive work environment for their employees, regardless of sex, racial or ethnic origin, religion, age, disability or sexual orientation. During the European Diversity Charters Month in May 2021, the Commission will organise a high-level event, which will gather policy-makers, chief executive officers of diversity charter signatories and other stakeholders to review and promote the consideration of racial and ethnic origin in diversity strategies. This will be followed up with an online toolkit to help companies assess their internal diversity and diversity strategies based on adjustable staff surveys, a downloadable questionnaire and recommendations for improving diversity in their organisation based on the results of the assessment.</p> <p>As presented in the EU anti-racism action plan 2020-2025, the Commission is committed to lead by example by introducing new actions during this Commission's mandate (the forthcoming human resources strategy) to promote diversity and ensure a discrimination-free and an inclusive workplace for all people, irrespective of their racial or ethnic origin or skin colour.</p>		<p>The Commission organised a high level event during the <a href="#">European diversity month 2021</a>.</p> <p>The Commission published its new <a href="#">Strategic Plan 2020-2024-Human Resources and Security</a> whereby the Commission aims at offering a unique opportunity to build an interesting career in a multinational, multilingual and multicultural environment where diversity and equality are at the forefront of HR policies.</p>	
21)	56. Calls on the Commission to fulfil its commitment to adopting an action plan to implement the European Pillar of Social Rights and to incorporate Romani inclusion as an indicator in the social scoreboard; urges the Commission and the Member States to ensure, access to decent jobs, fair wages and working conditions for Romani people and to guarantee that social protection systems and social services are adequate, accessible and used by all	<p>The Commission will come forward with an Action Plan on the European Pillar of Social Rights in 2021. For the purpose of feeding its preparations, the Commission is conducting a consultation inviting all partners to submit their inputs until 30 November 2020. In this context, the Commission takes good note of the European Parliament's call on the Commission to propose a revision of the Social Scoreboard.</p>		<p>Following 11 months <a href="#">consultations</a>, the 4 March 2021 the Commission adopted an <a href="#">Action plan on the Social Rights Pillar</a> including a revised scoreboard (annex 2). The scoreboard includes social protection and inclusion indicators but no explicit reference to Romani.</p>

	potential beneficiaries, and include universal health coverage without discrimination, as well as minimum income schemes and pension rights;				

4.1.23.3. LIBE Resolution 3: EP resolution of 7 October 2020 on the establishment of an EU Mechanism on Democracy, the Rule of Law and Fundamental Rights

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			Action of the Commission
<p><b>The establishment of an EU Mechanism on Democracy, the Rule of Law and Fundamental Rights</b></p>	<p>07/10/2020  <a href="#">T9-0251/2020</a>  <a href="#">2020/2072(INI)</a>                      LIBE</p>	<p><a href="#">SP(2020)686</a></p>	<p>Final reply (SP) received on 3 March 2021</p>	<p>General reply</p>	
<p>1)</p>	<p>8. Urges the Commission to use all the instruments at its disposal against any attempt by governments of Member States to endanger the independence of national courts and to inform Parliament of any such situation in a timely manner;</p>	<p>The Commission welcomes the resolution and fully shares its objectives to set a positive agenda for promoting, protecting and reinforcing Union values, in accordance with Article 2 of the Treaty.</p> <p>[...]</p> <p>The Commission has given the resolution careful consideration, and there are many elements which the Commission wholly supports. The Commission fully agrees with the European Parliament with regard to the importance of strengthening the EU's capacity to monitor the respect of the common values on which the EU is founded. To this end, the Commission has presented on 30 September 2020 its first annual Rule of Law Report, at the centre of the new comprehensive European Rule of Law Mechanism.</p> <p>The Mechanism is a yearly process, with the aim of preventing problems from emerging or deepening, notably by having open debates and by exchanging best practices. The aim of the Rule of Law Report is to look at key developments as regards the rule of law across the whole EU. It covers both positive developments and challenges, and provides a country-specific assessment of all the 27 Member States.</p> <p>[...]</p> <p>As regards the scope of the European Rule of Law Mechanism, the Commission underlines that this scope is</p>			<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (i.e. <a href="#">annual Rule of Law Report</a>, at the centre of the new comprehensive <a href="#">European Rule of Law Mechanism</a>).</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>already broad, covering four areas: national justice systems, anti-corruption frameworks, media pluralism and media freedom and other institutional issues related to checks and balances (.../...)</p> <p>As regards the procedure under Article 7 of the Treaty on European Union, the Commission calls on the Member States concerned and the Council to invest in accelerating the resolution of the problems raised under these procedures, finding solutions that protect the rule of law and the values common to all the Member States. Until a solution is found to the concerns raised, the Commission remains committed to supporting the Council in the continuation of the Article 7 procedures so as to resolve the issues at stake. The Commission also reiterates that the European Parliament should be given the possibility to present its case in the Council in procedures it has initiated.</p> <p>The Commission welcomes the political compromise found between the negotiation teams of the European Parliament and the Council on the Commission's proposal of 2018 linking the use of EU funds and the respect for the rule of law in the Member States. The Commission has been strongly advocating for such a mechanism. This is an important step forward that the Commission now expects to see formally endorsed by the co-legislators. An effective rule of law conditionality is important to protect both the EU budget and the funding under the NextGenerationEU.</p> <p>The Commission is continuously assessing how existing instruments can best be used to promote and uphold the rule of law, democracy and fundamental rights, and is ready to continue the dialogue with the European Parliament in this regard.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	<p>9. Recalls that the accession of the Union to the European Convention for the Protection of Human Rights and Fundamental Freedoms is a legal obligation provided for under Article 6(2) TEU; reiterates the need for a swift conclusion of the accession process in order to ensure a consistent framework for human rights protection throughout Europe and to further strengthen the protection of fundamental rights and freedoms within the Union; calls therefore on the Commission to step up efforts to fully implement the Treaties and conclude the accession process without undue delay;</p>	<p>As it stands, the rule of law mechanism also contributes to the promotion of democracy and respect of fundamental rights and equality, as these values are inextricably interlinked. The Rule of Law report will be complemented by a new Strategy to reinforce the application of the Charter of Fundamental Rights in the EU and a European Democracy Action Plan, both due by the end of 2020. These instruments illustrate together the Commission's comprehensive approach to promoting the inseparable values of democracy, the rule of law and respect for fundamental rights.</p> <p>The new Strategy on the Charter will give particular attention to the application of the Charter in the Member States and its impact on the daily life of citizens. The European Democracy Action Plan will set out a reinforced policy framework and a set of measures to ensure free and fair elections, support free and independent media, and counter disinformation. Other initiatives and strategies will also further promote the Union's founding values, for instance the forthcoming EU citizenship report and other strategies to build a Union of equality.</p>		<p>On the 2 December 2020, the EC published a <a href="#">new Strategy to strengthen the application of the Charter of Fundamental Rights</a> in the EU.</p> <p>Regarding the <a href="#">completion of EU accession to the ECHR</a>, on 29 September 2021, the occasion of the resumption of negotiations, the Secretary General of the Council of Europe, Marija Pejčinović Burić, and the EU Commission's Vice President for Values and Transparency, Věra Jourová, gave a joint statement in which they stated that the resumption of the negotiations sends a strong signal about the commitment of the two organisations and their member states to the fundamental rights that they cherish.</p> <p>The 11th negotiation meeting took place on 5 - 8 October 2021. The Group discussed proposals related to the EU's specific mechanism of the procedure before the European Court of Human Rights, the operation of inter-party applications (Article 33 of the Convention), the principle of mutual trust between EU member states and other provisions of the draft Accession Agreements (notably Articles 6-8). The Group <a href="#">held its next meeting</a> from 7-10 December 2021.</p>	
3)	<p>10. calls on the Commission to closely monitor the transposition and application of Directive (EU) 2019/1937 of the European Parliament and of the</p>	<p>As regards the Directive (EU) 2019/1937 of the European Parliament and of the Council of 23 October 2019 (that</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	<p>Council of 23 October 2019 on the protection of persons who report breaches of Union law<sup>24</sup></p> <p>[...] encourages the Commission and the Member States to further promote and facilitate the dialogue between courts and legal practitioners by fostering the regular exchange of information and best practices in order to strengthen and advance a Union area of justice based on democracy, the rule of law and fundamental rights;</p>	<p>concerns whistle-blowers protection, there is no specific mention.</p> <p>As regards the scope of the European Rule of Law Mechanism, the Commission underlines that this scope is already broad, covering four areas: national justice systems, anti-corruption frameworks, media pluralism and media freedom and other institutional issues related to checks and balances. This wide scope also covers issues such as the enabling framework for civil society, which has been highlighted in the Parliament’s resolution. In the next years, the Commission will consider consolidating its monitoring in these areas and could cover additional aspects.</p>		<p>according to the Commission, it has been already working on action falling under the scope of the EP request (i.e. <a href="#">annual Rule of Law Report</a>, at the centre of the new comprehensive <a href="#">European Rule of Law Mechanism</a>).</p>	
4)	<p>16. Invites the Commission and the Council to enter without delay into negotiations with Parliament on an inter-institutional agreement in accordance with Article 295 TFEU; considers the proposal set out in the Annex hereto to constitute an appropriate basis for such negotiations;</p>	<p>The Commission stresses the importance of swiftly finalising the setting-up of the European Rule of Law Mechanism. With a view of ensuring effectiveness, the Commission does therefore favour cooperation under existing institutional arrangements, and could see value in having regular meetings or an inter-institutional exchange of views, which could help in the preparation and discussion of rule of law, democracy or fundamental right issues.</p> <p>Whether in the future such cooperation should be codified in an inter-institutional agreement will have to be assessed at a later stage, on the basis of the experience gained through the application of the European Rule of Law Mechanism.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission.</p>	

<sup>24</sup> OJ L 305, 26.11.2019, p. 17.

4.1.23.4. LIBE Resolution 4: EP resolution of 20 October 2020 on Digital Services Act and fundamental rights issues posed

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
<b>Digital Services Act and fundamental rights issues posed</b>	20/10/2020 <a href="#">T9-0274/2020</a> <a href="#">2020/2022(INI)</a> <b>LIBE</b>	On 10 December 2020, the Parliament received " <a href="#">Replies</a> of the Commission to positions and resolutions adopted by the European Parliament – October II 2020 part-session" informing that the Commission will not be responding formally to the requests addressed in the resolution as they were comprehensively addressed in plenary by the High Representative / Vice-President Josep Borrell.  The <a href="#">plenary debate</a> took place on 19 October 2020.			
1)	2. Urges the Commission to adopt a tailored regulatory approach in order to address the differences that still persist between online and offline worlds and the challenges raised by the diversity of actors and services offered online; [...]				
2)	8. calls on the Commission and the Member States to support independent and public service media and educational initiatives on media literacy and targeted awareness-raising campaigns within civil society; [...]				
3)	14. Recalls that illegal content online should not only be removed by online platforms, but should also be followed up by law enforcement and the judiciary where criminal acts are concerned; calls on the Commission to consider obliging online platforms to report serious crime to the competent authority when they have received knowledge of such a crime; [...]				
4)	18. [...] calls on the Commission to propose the most efficient and effective solutions for the internal market as a whole, while avoiding new unnecessary administrative burdens and keeping the digital single market open, fair, safe and competitive for all its participants; [...]				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	19. [...] urges the Commission to be extremely vigilant in its approach and to also integrate international human rights standards into its revision;				
6)	20. [...] calls, therefore, on the Commission to place transparency and non-discrimination at the heart of the Digital Services Act;				
7)	21. Insists that the Digital Services Act must aim to ensure a high level of transparency as regards the functioning of online services and a digital environment free of discrimination; stresses that, besides the existing strong regulatory framework that protects privacy and personal data, an obligation for online platforms is needed to ensure the legitimate use of algorithms; calls, therefore, on the Commission to develop a regime based on the e-Commerce Directive that clearly frames the responsibility of service providers to address the risks faced by their users and to protect their rights and to provide for an obligation of transparency and explainability of algorithms, penalties to enforce such obligations, the possibility of human intervention and other measures such as annual independent audits and specific stress tests to assist and enforce compliance;				
8)	23. [...] asks the Commission to explore the creation of a single European sign-in system as an alternative to private single sign-in systems and to introduce an obligation for digital services to always also offer a manual sign-in option, set by default; [...] recommends, therefore, that the Commission also explore the creation of a verification system for users of digital services, in order to ensure the protection of personal data and age verification, especially for minors, which				

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	should not be used commercially or to track the users cross-site;				
9)	33. Calls on the Commission to ensure that users have access to diverse and quality content online as a means towards ensuring that citizens are adequately informed; [...]				
10)	34. [...] expects the Commission to issue guidelines including increased transparency rules on content moderation and advertising policy in a specific instrument accompanying the Digital Services Act to ensure that the removal and the blocking of legal content on the basis of terms and conditions are limited to the absolute minimum; calls, further, on the Commission to establish a framework that prohibits platforms from exercising a second layer of control over content that is provided under a media service provider's responsibility and that is subject to specific standards and oversight;				

## 4.1.23.5. LIBE Resolution 5: EP resolution of 25 November 2020 on strengthening Media Freedom: the Protection of Journalists in Europe, Hate Speech, Disinformation and the Role of Platforms

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			Action of the Commission	
		C C			C C	
<b>Strengthening Media Freedom: the Protection of Journalists in Europe, Hate Speech, Disinformation and the Role of Platforms</b>	25/11/2020 <a href="#">T9-0320/2020</a> <a href="#">2020/2009(INI)</a> LIBE	<a href="#">SP(2021)129</a>	Final reply (SP) received 2 June 2021	Mixed reply		
1)	3. [...] calls on the Commission and the Member States to promote sustainable measures aimed at financing and supporting high-quality and independent journalism;	<p>The Directive 2019/1152/EU on Transparent and Predictable Working Conditions, one of the key deliverables of the European Pillar of Social Rights, will modernise European labour law and adjust it to the new world of work. It provides completely new material rights targeting in particular on-demand workers. With this new directive, as from 1 August 2022, 200 million workers across Europe will benefit from more transparent and predictable working conditions. It sets limits on some of the most extreme forms of flexibility, like preventing workers from seeking work elsewhere while not guaranteeing any paid hours. Moreover, it sets a right for workers on on-demand contracts to know within which timeslots they can be called to work, and a right to compensation if an employer cancels a work assignment on short notice and measures to prevent abuse of on-demand contracts. It also sets limits on the duration of probation periods and a right for workers with at least six months' service to request more secure working conditions and to receive a reasoned written reply.</p> <p>To foster media pluralism and to support journalists, the Commission is currently financing projects that defend journalists and media freedom by providing legal and practical support to journalists under threat,</p>			<p>Currently there are over <a href="#">18 projects</a>, either ongoing or in preparation, representing close to €20 million in EU funding. These projects aim to map violations of media freedom, monitor media pluralism and freedom, defend journalists under threat and support collaborative journalism, cooperation and exchange of best practices.</p> <p>See also the cross sectoral strand of <a href="#">Creative Europe 2021-2027</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>monitor violations to media pluralism and freedom, analyse trends and conduct awareness raising campaigns. Ten projects are ongoing.</p> <p>The cross-sectoral strand of the Creative Europe programme 2021-2027 will ensure a stable financing of projects in the field of media freedom, pluralism and media literacy.</p> <p>The Commission Communication on the application of State aid rules to public service broadcasting of 2009 provides a well-established framework for stable and sufficient funding of public service broadcasters by Member States. In its dialogue with Member States on financing models, the Commission advocates models, which ensure a stable revenue stream over a longer period, in order to make public service broadcasters not dependent on annual budgetary decisions of governments. The Broadcasting Communication requires Member States to establish a system that allows close supervision that public service broadcasters fulfil their public service mission and that their expenditure is strictly linked to that mission. Furthermore, the public service mission should be designed in a way that the entrusted media indeed contribute to media pluralism and the democratic needs of the society.</p>			

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
2)	6. Strongly reiterates its call on the Commission to treat attempts by Member State governments to damage media freedom and pluralism as constituting a serious and systematic abuse of powers and as going against the fundamental values of the EU as enshrined in Article 2 TEU;	<p>Although the follow-up mentions point 6, no specific reply is provided to this particular point (to treat attempts by Member State governments to damage media freedom and pluralism as constituting a serious and systematic abuse of powers and as going against the fundamental values of the EU as enshrined in Article 2 TEU);</p> <p>Nevertheless, it notes that safeguarding media freedom and pluralism and the safety of journalists is one of the priorities of the Commission. As part of the Commission's first annual Rule of Law Report, published on 30 September 2020, the Commission analysed the framework for journalists' protection in all EU Member States, the independence of audio-visual regulatory authorities, media ownership transparency, political independence and state advertising to the media sector in the dedicated pillar on media pluralism and freedom in each country chapter.</p> <p>The Rule of Law Report has highlighted that physical and online threats to and attacks on journalists are on the rise in the EU. In the European Democracy Action Plan adopted on 3 December 2020, the Commission announced a Recommendation on the Safety of Journalists in 2021. It will aim to tackle further safety issues, including those highlighted in the 2020 Rule of Law report, ensure better implementation by Member States of the standards in the Council of Europe Recommendation, and draw particular attention to threats against women journalists.</p> <p>In order to prepare the recommendation, the Commission will set up a structured dialogue with Member States and relevant stakeholders and international organisations.</p>		The Commission is working on a <a href="#">structured dialogue</a> with MS and relevant stakeholders.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	<p>6. [...] encourages the Commission to actively cooperate with the Council of Europe, exchanging best practices and making sure that the measures undertaken are complementary;</p> <p>urges the Commission and the Member States to develop and maintain a credible framework for the protection of media freedom and media pluralism;</p> <p>calls for the Commission to aim to introduce standards and benchmarks for media freedom at Union level, as</p>	<p>In the European Democracy Action Plan adopted on 3 December 2020, the Commission announced a Recommendation on the Safety of Journalists in 2021 that [...] ensure better implementation by Member States of the standards in the Council of Europe Recommendation. [...]</p> <p>Safeguarding media freedom and pluralism and the safety of journalists is one of the priorities of the Commission. As part of the Commission's first annual Rule of Law Report, published on 30 September 2020, the Commission analysed the framework for journalists' protection in all EU Member States, the independence of audiovisual regulatory authorities, media ownership transparency, political independence and state advertising to the media sector in the dedicated pillar on media pluralism and freedom in each country chapter (.../...)</p> <p>To foster media pluralism and to support journalists, the Commission is currently financing projects that defend journalists and media freedom by providing legal and practical support to journalists under threat, monitor violations to media pluralism and freedom, analyse trends and conduct awareness raising campaigns. Ten projects are ongoing.</p> <p>No specific reply is provided to this particular point (on standards and benchmarks for media freedom at Union level). But (for higher convergence) dedicated support will be provided in the form of grants under the cross-sectoral strand of Creative Europe for collaborative news media partnerships. Grants will support the testing of new business models, in</p>		<p>The European Commission launched a <a href="#">call for proposals</a> for the Pilot Project 'Media ownership monitor', with the deadline for applications on 9 February 2021. The indicative start date was set no later than 1 July 2021, as outlined in a timetable in the <a href="#">call for proposals</a>. The <a href="#">pilot project was launched</a> in September 2021, but it is difficult to link promises by the Commission directly to EP requests; some are very general or to the contrary very specific.</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (In the <a href="#">European Democracy Action Plan</a> adopted on 3 December 2020, the Commission announced a <a href="#">Recommendation on Safety of Journalists</a> in 2021).</p> <p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>

		<p>issues, including those highlighted in the 2020 Rule of Law report, ensure better implementation by Member States of the standards in the Council of Europe Recommendation, and draw particular attention to threats against women journalists.</p> <p>In order to prepare the recommendation, the Commission will set up a structured dialogue with Member States and relevant stakeholders and international organisations.</p>			
6)	11. [...] calls on the Commission and the Member States to ensure that reporting mechanisms are accessible;	Although the follow-up mentions point 11, no specific reply is provided to this particular point (ensure that reporting mechanisms are accessible).		Not mentioned.	
7)	13. [...] ; strongly reiterates its call on the Commission to come forward with a comprehensive proposal for a legislative act aiming to establish minimum standards against SLAPP practices across the EU;	Strategic lawsuits against public participation (SLAPP) are a particular form of abusive lawsuits increasingly used against journalists and others involved in protecting the public interest. While civil society actors can be vulnerable to such initiatives, the nature of journalists' work makes them particularly exposed. The Commission announced in the European Democracy Action Plan an initiative to protect journalists and civil society against SLAPP. To prepare this work, the Commission is carrying out a mapping study and will be running a technical focus group to gather feedback on the type of legal aid or support that could be envisaged for SLAPP victims. In addition, a new expert group is being established, gathering legal practitioners, journalists, academics, members of civil society and professional organisations, with the aim to bring together expertise, exchange and disseminate best practices on legal support for journalists and other actors confronted with SLAPP cases. Dedicated judicial training should also help judges to know how to identify abusive litigation and use the available tools to address it.		<p>As outlined in the <a href="#">European Democracy Action Plan</a> adopted on 3 December 2020, the Commission set up an <a href="#">expert group on SLAPPs</a>. It will present an <a href="#">initiative</a> to protect journalists and civil society against SLAPPs in April 2022. Thus, the Commission is currently undertaking the proposed actions.</p> <p>In its <a href="#">Action plan for democracy</a> of 2020, the Commission had already announced its intention to present an initiative to protect journalists and civil society against SLAPPs in 2021.</p> <p><a href="#">Recommendation</a> on ensuring safety of journalists in the European Union.</p>

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
	calls on the Commission to step up efforts to this end; underlines the key role of civil society organisations in fostering media literacy and helping to prevent the spread of hate speech; recalls that programmes deemed to be using effective strategies to combat hate crime and hate speech are focused on cooperation, communication, conflict resolution, problem solving, mediation and bias awareness;				
23)	47. Urges the Commission to step up efforts to increase EU funding for media literacy programmes and to actively engage in the promotion of reliable, fact-based and fact-checked information by enhancing media distribution channels in order to improve access to such information;	The Commission will support media literacy projects under the new cross-sectoral strand of the Creative Europe programme. Media literacy projects will also be supported across various other programmes involving young people and schools (e.g. Erasmus+ and the European Solidarity Corps). In 2021, the priority theme for the 'etwinning' action will be 'media literacy and disinformation'. EDMO will provide support to national media literacy campaigns, and through its national hubs, the EDMO will identify specific issues to be tackled. The Commission will also scale up its efforts within the next edition of the European media literacy week. It will also cooperate closely with international.		No further specific actions proposed/promised to be taken by the Commission, as it has been already working on action falling under the scope of the EP request.  <a href="#">eTwinning annual theme 2021</a> : Media Literacy and Disinformation.  <a href="#">European Media Literacy Week</a> .	
24)	48. Encourages the Commission to provide support to complement educational programmes in all Member States, not only within the scope of media literacy, but also in wider civic education, including education in democratic values and human rights for further sensitisation to disinformation and propaganda;	The Commission will support media literacy projects under the new cross-sectoral strand of the Creative Europe programme. Media literacy projects will also be supported across various other programmes involving young people and schools (e.g. Erasmus+ and the European Solidarity Corps). In 2021, the priority theme for the 'etwinning' action will be 'media literacy and disinformation'.  [...]  In addition, the Commission will work on developing common guidelines for teachers and educational staff to foster digital literacy and tackle disinformation through education and training, as set out in the		The <a href="#">Audiovisual Media Services Directive</a> was presented in November 2018, and it promotes the development of media literacy skills. In addition to this, the cross-sectoral strand of the Creative Europe programme promotes media literacy, as highlighted by the Commission in a press release on 14 December 2020, wherein it <a href="#">welcomed a political agreement on the Creative Europe Programme</a> . Thus, no further / specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP.

4.1.23.6. LIBE Resolution 6: EP resolution of 26 November 2020 on Fundamental Rights in the European Union - Annual Report for the years 2018 - 2019

Resolution		Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment			C C	Action of the Commission	C C
<b>Fundamental Rights in the European Union - Annual Report for the years 2018 - 2019</b>		26/11/2020 <a href="#">T9-0328/2020</a> <a href="#">2019/2199(INI)</a> LIBE	<a href="#">SP(2021)129</a> -	Final reply (SP) received 2 June 2021	General reply			
1)	1. [...] calls on the Commission and the Council to consider fundamental rights while making economic policy proposals and to ensure that human rights impact assessments are conducted in conjunction with any decisions on their adoption, in order to assess any potential adverse impacts on human rights;		No specific reply is provided to this particular point (on impact assessments).				Not mentioned.	
2)	3. [...] calls on the Commission and the Member States to integrate the recommendations made by the Council of Europe Human Rights Commissioner in her comment of 23 January 2020 entitled 'The right to affordable housing: Europe's neglected duty', particularly the recommendation that all Member States should promptly accept to be bound by Article 31 of the revised European Social Charter on the right to housing; [...] calls on the Commission to duly investigate discrimination in access to housing as prohibited under the Racial Equality Directive and launch infringement proceedings in case of violations		<p>The Commission shares concerns about protection of most vulnerable people such as children in poverty or people with no access to adequate housing, and will continue to support Member States to ensure the protection of their rights.</p> <p>[...]</p> <p>The Commission recognizes the problem of affordable housing as well as its social and macroeconomic implications. Housing policies and housing regulation are a national prerogative, but since efforts to reduce homelessness by Member States over the past decade remain largely unsuccessful, the Commission will examine this subject in the framework of the Action Plan for the implementation of the European Pillar of Social Rights. Discrimination in housing based on racial or ethnic origin is explicitly prohibited by the EU Racial Equality Directive, which all the Member States have transposed into their national legislation.</p>				On 4 March 2021, the European Commission presented the <a href="#">Action Plan for the implementation of the European Pillar of Social Rights</a> . The Action Plan highlighted that access to affordable housing is an increasing concern in many Member States, regions and cities. Thus, the Commission action has been carried out.	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
3)	7. [...] calls on the Commission to include the need to uphold sexual and reproductive health and rights in its Fundamental Rights Strategy;	The Commission recognises that sexual and reproductive health and rights are at the core of gender equality. The Commission will support regular exchanges of good practices between the Member States and stakeholders on gender equality and health, including on sexual and reproductive health and rights. It will provide full support to Member States' efforts in implementing the United Nations Sustainable Development Goals relevant to women's health, such as on universal access to sexual and reproductive care, family planning and education.		Based on the general nature of the wording of the commitment or/and on the information found, it is unclear whether the promise is carried out or not.	
4)	11. [...]; calls on the Commission and the FRA to continue their work on monitoring hate crime and hate speech in the Member States, and to report regularly on cases and hate crime tendencies;	<p>The Commission has renewed its efforts to ensure the correct transposition of the Framework Decision on combating racism and xenophobia, which criminalizes the public incitement to violence or hatred on the grounds of race, color, religion, descent and national or ethnic origin. The commitment to tackle serious manifestations of racism is one of the main pillars of the Commission's Anti-racism Action Plan adopted on 18 September 2020. By end of 2021, the Commission will propose to extend the list of EU crimes to all forms of hate crime and hate speech – the so-called 'Eurocrimes' initiative under Article 83 (1) of the Treaty on the Functioning of the European Union (TFEU) which deals with particularly serious crimes with a cross-border dimension.</p> <p>By end of 2021, the Commission will propose to extend the list of EU crimes to all forms of hate crime and hate speech – the so-called 'Eurocrimes' initiative under Article 83 (1) of the Treaty on the Functioning of the European Union (TFEU) which deals with particularly serious crimes with a cross-border dimension.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request.</p> <p>As outlined in the annexes to the <a href="#">2021 CWP</a>, the Commission presented an initiative to extend the list of EU crimes to all forms of hate crime and hate speech in Q4 2021 (9 December 2021). <a href="#">EU crimes initiative</a>.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
5)	<p>16. [...] calls on the Commission to actively fight segregation and discrimination, including by initiating infringement procedures to foster the effective application of the Framework Decision on combating certain forms of racism and xenophobia by means of criminal law;</p>	<p>The Commission will continue to ensure that the extensive EU equality legislation is fully implemented at national level. It will report on the application of the Racial Equality Directive and the Employment Equality Directive in 2021. Possible identified shortcomings will result in the Commission presenting new legislation by 2022.</p> <p>The Commission has renewed its efforts to ensure the correct transposition of the Framework Decision on combating racism and xenophobia, which criminalizes the public incitement to violence or hatred on the grounds of race, color, religion, descent and national or ethnic origin. The commitment to tackle serious manifestations of racism is one of the main pillars of the Commission's Anti-racism Action Plan adopted on 18 September 2020. By end of 2021, the Commission will propose to extend the list of EU crimes to all forms of hate crime and hate speech – the so-called 'Eurocrimes' initiative under Article 83 (1) of the Treaty on the Functioning of the European Union (TFEU) which deals with particularly serious crimes with a cross-border dimension.</p>		<p>As outlined in the annexes to the <a href="#">2021 CWP</a>, the Commission presented an initiative to extend the list of EU crimes to all forms of hate crime and hate speech in December 2021. On 19 March 2021 the Commission published a <a href="#">Report on the Racial Equality and the Employment Equality Directives</a>.</p> <p>The Commission initiated the first step of the infringement procedure by sending letters of formal notice to Greece, the Netherlands and Lithuania.</p> <p><a href="#">Recent JHA relevant infringement procedures</a>.</p>	
6)	<p>20. [...]; requests the Commission to put forward a proposal for strong and comprehensive mechanisms to protect and strengthen freedom of speech, media freedom and enhance the protection of journalists, including by guaranteeing the transparency of media-ownership, adopting an EU-wide anti-SLAPP directive, creating a permanent EU fund for independent media and investigative journalists and establishing a rapid reaction mechanism for journalists in danger; calls on the Member States to prevent and penalise attacks on investigative journalists in the exercise of their work;</p>	<p>Media freedom and pluralism are fundamental principles, enshrined in the Charter of Fundamental Rights of the European Union. The first annual Rule of Law report, published in September 2020, placed these values, and the protection of journalists, at the heart of the Commission's thinking on the rule of law across Europe.</p> <p>To answer the challenges posed by the influence of the digital environment on media production, distribution and consumption, and by disinformation and growing polarisation of the electorate, in December 2020 the Commission published its</p>		<p>As outlined in the <a href="#">European Democracy Action Plan</a> adopted on 3 December 2020, the Commission intends to set up an expert group on SLAPPs in early 2021 and present an initiative to protect journalists and civil society against SLAPPs in late 2021. Thus, the Commission is currently undertaking the proposed actions.</p>	

Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
		<p>European Democracy Action Plan (EDAP), which is constructed around three integrated themes: elections' integrity; media freedom and media pluralism; and tackling disinformation. It covers active citizenship and strengthening civil society and is aligned with the Commission's proposal for the Digital Services Act that clarifies the responsibilities of online intermediaries, which play an important role as gateways to information. EDAP announced that in 2021 the Commission will present an initiative to protect journalists and civil society against Strategic Lawsuits Against Public Participation (SLAPPs). A new expert group will bring together expertise, exchange and disseminate best practices on legal support. Dedicated judicial training will help judges to know how to identify abusive litigation and use the available tools to address it.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request (under <a href="#">European Media and Audio-visual Action Plan</a>).</p>	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>In addition, in December 2020, the Commission adopted its Media and Audiovisual Action Plan, which proposes concrete measures to support the recovery, resilience and competitiveness of Europe’s media ecosystem.</p> <p>The EU is co-funding a series of projects, which aim to map threats and risks to media freedom and pluralism, to support investigative journalism and to protect journalists who face threats. In particular, the Media Freedom Rapid Response project offers legal and practical support to media actors under threat, and can provide temporary shelter when needed. The Commission has proposed to earmark stable funding for projects in the fields of media freedom, media pluralism and media literacy via the cross-sectoral strand of the Creative Europe Programme 2021-2027 in the forthcoming Multiannual Financial Framework (MFF).</p>			
7)	22. [...] calls on the Commission to promote and invest in the strengthening of media literacy, actively support quality journalism and foster data protection and create a more transparent online ecosystem while safeguarding media freedom and pluralism;		The Commission has proposed to earmark stable funding for projects in the fields of media freedom, media pluralism and media literacy via the cross-sectoral strand of the Creative Europe Programme 2021-2027 in the forthcoming Multiannual Financial Framework (MFF).		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope of the EP request ( <a href="#">Creative Europe Programme 2021-2027</a> in the forthcoming Multiannual Financial Framework (MFF)).	
8)	23. [...] calls on the Commission and the Member States to contribute to the development of education and training in critical thinking that citizens can form their own opinion to face these risks;		The Commission has proposed to earmark stable funding for projects in the fields of media freedom, media pluralism and media literacy via the cross-sectoral strand of the Creative Europe Programme 2021-2027 in the forthcoming Multiannual Financial Framework (MFF).		<p>The new <a href="#">Creative Europe-2021-2027-programme</a> has been launched with the adoption of the first annual work programme.</p> <p>With its three sub-programmes, the Culture strand, the MEDIA strand and the Cross-sectoral strand, Creative Europe aims to (.../...) promote cross-sectoral innovative and collaborative actions, including</p>

				support for media literacy and a diverse, independent and pluralistic news media environment.	
9)	25. Strongly condemns the increasing restrictions on freedom of assembly, including during election periods [...] calls on the Commission to take an active role in promoting these rights in line with international human rights standards;	The freedom of assembly is an important right in the political context, and restrictions to this right can affect free and fair elections. It is of utmost importance that emergency measures related to the COVID-19 pandemic are not at the expense of the fundamental principles and values as set out in the Treaties, and that the Member States carry out their responsibilities in accordance to international standards and guidelines, included as provided by the Council of Europe and its Venice Commission. The Commission has monitored carefully the impact of measures adopted in the emergency context on free and fair elections and a fair democratic debate and this monitoring will be maintained until the restrictions are lifted.		Based on the general nature of the wording of the commitment or/and on the information found, it was unclear if monitoring is ongoing.	
10)	27. [...] calls upon the European Commission and the Council to increase EU support for civil society organisations defending the values of Article 2 TEU in the European Union through the Rights and Values Programme, the funding of which should be significant, as asked by the European Parliament;	Civil society organisations and rights defenders are essential actors in the protection and promotion of the values on which the EU is founded, and in raising people's awareness about their Charter rights and helping them receive effective judicial protection. Ensuring an enabling, supportive environment for civil society organisations and rights defenders is one of the focal points of the Strategy to reinforce the application of the Charter of Fundamental Rights in the EU adopted on 2 December 2020. The 2020 Rule of Law report recognises that civil society is facing pressures and obstacles in certain Member States (changes in the legal environment, challenges in accessing resources, restriction of key rights such as freedom of association, expression and assembly, but also sometimes threats and attacks) and the Commission will not hesitate to take action against		Ongoing.	

	Resolution	Date of adoption TA ref Procedure ref Committee responsible	Commission follow up Commission reply/commitment	C C	Action of the Commission	C C
			<p>measures that are contrary to EU law, including the Charter of Fundamental Rights. The Commission will also continue to provide concrete support including capacity building and funding for civil society organisation. The new Multiannual Financial Framework will provide support to civil society in many key areas, and it will fund NGOs to promote activities under its specific objectives in continuity with the current practice. The Citizens, Equality, Rights and Values programme will receive EUR 1 552 billion.</p>		<p><a href="#">Citizens, Equality, Rights and Values programme.</a></p>	
11)	<p>28. [...] calls on the European Commission to include relevant indicators related to civic space, freedom of expression and freedom of association in future annual rule of law reports, to propose a plan of action to protect and promote civil society, including the adoption of Guidelines for the protection of freedom of expression, freedom of association and freedom of peaceful assembly as well as the protection of human rights defenders at risk and to establish an emergency fund for their protection[...];</p> <p>encourages the Commission, the Council and the European Parliament to systematically use the data produced by FRA in policy making;</p>		<p>The Commission is committed to uphold the rule of law in the Union by using all the means at its disposal. The Commission fully agrees with the European Parliament with regard to the importance of strengthening the EU's capacity to monitor the respect of the common values on which the EU is founded. To this end, the Commission has presented on 30 September 2020 its first annual Rule of Law Report, at the centre of the new comprehensive European Rule of Law Mechanism. The Mechanism is a yearly process, with the aim of preventing problems from emerging or deepening, notably by having open debates and by exchanging best practices. The Rule of Law Report looks at key developments as regards the rule of law across the whole EU. It covers both positive developments and challenges, and provides a country-specific assessment of all the 27 Member States. One of the objectives of the European Rule of Law Mechanism is to strengthen the inter-institutional cooperation on rule of law matters. [...]</p> <p>The Commission is also ready to organise further discussions with the European Parliament on the 2020 Rule of Law Report, including on individual country chapters, as part of a stronger inter-institutional dialogue on the rule of law.</p>		<p>No further/specific actions proposed/promised to be taken by the Commission on this particular point as according to the Commission, it has been already working on action falling under the scope of the EP request.</p>

12)	32. Calls on the European Commission to launch infringement procedures against Member States whose laws implementing the invalidated Data Retention Directive have not been repealed to bring them into line with the CJEU case law <sup>25</sup> ;	The Commission is assessing the implications of the latest rulings of the Court of Justice on data retention of 6 October 2020. Before considering any next steps, including possible infringement procedures, the Commission will consider the opinions of the European Parliament and of the Council, in light of these latest judgements and any further clarifications that may be expected from the other pending procedures for preliminary rulings.		The Commission is currently carrying out the specific action.	
13)	33. [...] calls on the Commission to put forward legislative proposals for a coordinated European approach to AI, drawing on Ethics guidelines for trustworthy AI prepared by the Commission's High-Level Expert Group on AI (AI HLEG);	The Artificial Intelligence White Paper published on 19 February 2020 pursues a human-centric approach. It sets out regulatory options to foster an ecosystem of excellence and trust. Following the White Paper, the Commission plans to present a legislative proposal in the first half of 2021. The new regulatory framework on Artificial Intelligence will introduce accountability, documentation and testing requirements to ensure the effective enforcement of fundamental rights where AI is used.		As outlined in the <a href="#">strategy for artificial intelligence</a> , the Commission presented in a Coordinated Plan on Artificial Intelligence, as well as a legislative proposal on Artificial Intelligence. In April 2021 the Commission made its <a href="#">proposal for a new Artificial Intelligence Act (AI Act)</a> . Thus, the Commission is currently carrying out the specific action.	
14)	36. Calls on the Commission and the Member States to implement the Recommendation of the Council of Europe Commissioner for Human Rights of June 2019 entitled 'Lives saved. Rights protected. Bridging the protection gap for refugees and migrants in the Mediterranean';	No specific reply is provided to this particular point (to implement the Recommendation of the Council of Europe Commissioner for Human Rights of June 2019 entitled 'Lives saved. Rights protected. Bridging the protection gap for refugees and migrants in the Mediterranean').		Not mentioned.	
15)	38. Expresses grave concern about consistent reports of violent pushbacks by law enforcement officials in some Member States; calls on the Commission and the Member States to investigate the matter and take	The Charter of Fundamental Rights of the European Union applies to Member States when they are implementing EU migration law (asylum, return, border control). The Commission monitors the respect		No further/specific actions proposed/promised to be taken by the Commission on this particular point as EC was already working on action falling under the scope
